PROCEEDINGS AND DEBATES OF THE SEVENTIETH CONGRESS
FIRST SESSION

SENATE

FRIDAY, *February 24, 1928*

The Chaplain, Rev. ZeBarney T. Phillips, D. D., offered the following prayer:

Almighty God, who in all the ages hast revealed Thy power and mercy in the preservation and protection of those who put their trust in Thee, grant that the people of this land, upon which Thou hast showered Thy blessings, may show forth their thankfulness by a loving obedience to Thy laws. And may these Thy servants, in their every endeavor for the common good, learn to be patient with themselves and with each other.

Make us all to know that as the brooding of the mind is slowly transmuted into the readiness of the will, so the wrestling of the arms of desire importuning a blessing may only slowly become that energy which as a prince has power with God, and thus prevails. Grant this, O Lord, for the sake of Him in whom Thy loving patience is revealed, Jesus Christ our Lord. Amen.

The Chief Clerk proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. JONES and by unanimous consent, the further reading was dispensed with and the Journal was approved.

CALL OF THE ROLL

Mr. JONES. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Dill	Keyes	Sackett
Barkley	Ferris	King	Schall
Bayard	Fess	La Follette	Sheppard
Bingham	Fletcher	McKellar	Shipstead
Black	Frazier	McLean	Smoot
Blaine	George	McMaster	Steiwer
Blease	Gerry	McNary	Stephens
Borah	Gillett	Mayfield	Swanson
Bratton	Glass	Metcalf	Thomas
Brookhart	Greene	Neely	Tydings
Broussard	Hale	Norbeck	Tyson
Bruce	Harris	Norris	Walsh, Mass.
Capper	Harrison	Nye	Walsh, Mont.
Caraway	Hawes	Oddie	Warren
Copeland	Hayden	Phipps	Waterman
Couzens	Heflin	Pittman	Watson
Curtis	Howell	Ransdell	Willis
Cutting	Johnson	Reed, Pa.	
Dale	Jones	Robinson, Ark.	
Deneen	Kendrick	Robinson, Ind.	

Mr. COPELAND. My colleague the junior Senator from New York [Mr. WAGNER] is in Pennsylvania on official business connected with the investigation of the coal strike. I request that this announcement may stand for the day.

Mr. FLETCHER. My colleague the junior Senator from Florida [Mr. TRAMMELL] is unavoidably detained from the Senate. I wish this announcement to stand for the day.

Mr. GERRY. I desire to announce that the junior Senator from Montana [Mr. WHEELER] is absent in Pennsylvania with the special Senate committee investigating the coal strike.

The VICE PRESIDENT. Seventy-seven Senators having answered to their names, a quorum is present.

PETITIONS AND MEMORIALS

Mr. COPELAND presented the petition of the World War Veterans' Conference (numbering over 25 per cent of the 1928 New York State Legislature), praying for the prompt passage of the so-called Tyson-Fitzgerald bill, providing for the retirement of disabled emergency officers of the World War, which was ordered to lie on the table.

He also presented a petition of sundry citizens of Buffalo, N. Y., praying for the passage of legislation granting increased pensions to Civil War veterans and their widows, which was referred to the Committee on Pensions.

He also presented telegrams in the nature of petitions from Manhattan Chapter, No. 42, of New York City, and Schenectady Chapter, No. 125, both of the Order of Ahepa, and sundry citizens of Hellenic descent at Schenectady, all in the State of New York, praying for adoption of the pending debt settlement between Greece and the United States as tending to strengthen existing friendly relations between both countries, which were referred to the Committee on Foreign Relations.

Mr. WILLIS presented a memorial of sundry citizens of Cincinnati, Ohio, remonstrating against the passage of the so-called Brookhart bill, relative to the distribution of motion pictures in the various motion-picture zones of the country, which was referred to the Committee on Interstate Commerce.

Mr. BINGHAM presented a letter, in the nature of a petition, from the president of Carlson-Sjovall Unit, American Legion Auxiliary, of Cromwell, Conn., praying for adoption of the naval building program, which was referred to the Committee on Naval Affairs.

He also presented a telegram, in the nature of a petition, from the American Legion Auxiliary of West Haven, Conn., praying for adoption of the naval building program, which was referred to the Committee on Naval Affairs.

He also presented telegrams, in the nature of petitions, from the Waterbury Chapter; Archimedes Chapter, No. 26, of Meriden; and Chapter No. 99, of Stamford, all of the Order of Ahepa, and sundry citizens, all in the State of Connecticut, praying for adoption of the pending debt settlement between Greece and the United States, which were referred to the Committee on Finance.

REPORTS OF COMMITTEES

Mr. NYE, from the Committee on Public Lands and Surveys, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (S. 3023) to revise the boundary of a portion of the Hawaii National Park, on the island of Hawaii, in the Territory of Hawaii (Rept. No. 374); and

A bill (H. R. 9842) to provide for the survey, appraisal, and sale of the undisposed lots in the town site of St. Marks, Fla. (Rept. No. 375).

Mr. WALSH of Montana, from the Committee on Public Lands and Surveys, to which was referred the bill (H. R. 445) authorizing the Secretary of the Interior to enter into a cooperative agreement or agreements with the State of Montana and private owners of land within the State of Montana for grazing and range development, and for other purposes, reported it with an amendment and submitted a report (No. 376) thereon.

Mr. KENDRICK, from the Committee on Public Lands and Surveys, to which was referred the bill (H. R. 6684) to amend section 2455 of the Revised Statutes of the United States, as amended, relating to isolated tracts of public land, reported it without amendment and submitted a report (No. 377) thereon.

Mr. METCALF, from the Committee on Territories and Insular Possessions, to which was referred the bill (H. R. 84) to approve Act 25 of the Session Laws of 1927 of the Territory of Hawaii, entitled "An act to authorize and provide for the manufacture, maintenance, distribution, and supply of electric current for light and power within Waimea and Kekaha, in the district of Waimea, on the island and in the county of Kauai, Territory of Hawaii," reported it without amendment and submitted a report (No. 378) thereon.

Mr. WALSH of Massachusetts, from the Committee on Naval Affairs, to which was referred the bill (H. R. 6194) for the relief of Frank Stinchcomb, reported it without amendment and submitted a report (No. 379) thereon.

Mr. TYDINGS, from the Committee on Naval Affairs, to which was referred the bill (S. 3131) to provide additional pay for personnel of the United States Navy assigned to duty on submarines and to diving duty reported it without amendment and submitted a report (No. 380) thereon.

APPROPRIATIONS FOR THE WAR DEPARTMENT

Mr. REED of Pennsylvania. From the Committee on Appropriations I report back favorably with amendments the bill (H. R. 10286) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1929, and for other purposes, and I submit a report (No. 381) thereon. I give notice that I shall ask to take up this bill for consideration as soon after 2 o'clock on Monday as the business of the Senate will permit.

The VICE PRESIDENT. The bill will be placed on the calendar.

ADMINISTRATION OF DALLAS FEDERAL RESERVE BANK

Mr. DENEEN. I report back favorably with an amendment, from the Committee to Audit and Control the Contingent Expenses of the Senate, the resolution (S. Res. 152) submitted by the Senator from Texas [Mr. MAYFIELD] on the 20th instant, and I ask for its present consideration.

The Senate, by unanimous consent, proceeded to consider the resolution.

The amendment was, on page 2, line 16, after the dollar mark, to insert "2,500," so as to make the resolution read:

Whereas it is alleged that the affairs of the Federal Reserve Bank of Dallas, Tex., have been administered in a manner which has worked many hardships on the farming and livestock interests in the territory included in the eleventh Federal reserve district; and

Whereas it is alleged that there is a lack of cooperation on the part of the governor of such bank with member banks in the rural communities; and

Whereas it is desirable to bring about a conclusion of the controversy in order to do justice to all concerned: Therefore be it

Resolved, That the Committee on Banking and Currency of the Senate, or a duly authorized subcommittee thereof, is hereby authorized and directed to make a full and complete investigation of the administration of the affairs of the Federal Reserve Bank of Dallas, Tex., and to report thereon to the Senate as soon as practicable. For the purposes of this resolution such committee or subcommittee is authorized to hold hearings, to sit and act at such times and places, to employ such experts and clerical, stenographic, and other assistance, to require by subpœna or otherwise the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, and to take such testimony and make such expenditures as it deems advisable. The cost of stenographic service to report such hearings shall not be in excess of 25 cents per hundred words. The expenses of such committee or subcommittee, which shall not be in excess of $2,500, shall be paid from the contingent fund of the Senate.

The amendment was agreed to.

The resolution as amended was agreed to.

The preamble was agreed to.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CARAWAY:

A bill (S. 3361) authorizing the Secretary of the Interior to convey to the city of Hot Springs, Ark., all of lot No. 3 in block No. 115 in the city of Hot Springs, Ark.; to the Committee on Public Lands and Surveys.

By Mr. ROBINSON of Arkansas:

A bill (S. 3362) granting the consent of Congress to Henry Thane, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River; to the Committee on Commerce.

By Mr. DENEEN:

A bill (S. 3363) to amend section 117 of the Judicial Code; to the Committee on the Judiciary.

By Mr. COPELAND:

A bill (S. 3364) to provide for the placing of the names of certain individuals on the rolls of the War Department, and to authorize the Board of Regents of Smithsonian institution to make certain recommendations; to the Committee on Military Affairs.

By Mr. KENDRICK:

A bill (S. 3365) to authorize allotments to unallotted Indians on the Shoshone or Wind River Reservation, Wyo.; and

A bill (S. 3366) to authorize a per capita payment to the Shoshone and Arapahoe Indians of Wyoming from funds held in trust for them by the United States; to the Committee on Indian Affairs.

By Mr. WALSH of Montana:

A bill (S. 3367) to amend the United States grain standards act requiring wheat standards to take account of the percentage of protein content in wheat; to the Committee on Agriculture and Forestry.

By Mr. CAPPER:

A bill (S. 3368) to amend the packers and stockyards act, 1921; to the Committee on Agriculture and Forestry.

By Mr. DALE:

A bill (S. 3369) granting a pension to Vina Brooks (with accompanying papers); and

A bill (S. 3370) granting an increase of pension to Clara H. Shedd (with accompanying papers); to the Committee on Pensions.

By Mr. METCALF:

A bill (S. 3371) granting an increase of pension to Anna Arnold (with accompanying papers); and

A bill (S. 3372) granting an increase of pension to Lydia Augusta Patterson (with accompanying papers); to the Committee on Pensions.

A bill (S. 3373) for the relief of John F. Hayes; and

A bill (S. 3374) to provide for hospitalization of enlisted men of the Navy and Marine Corps transferred to the retired list or to the Fleet Naval Reserve on the completion of 16 or more years of naval service; to the Committee on Naval Affairs.

By Mr. ODDIE:

A bill (S. 3375) to amend sections 23 and 24 of the general leasing act approved February 25, 1920 (41 Stat. L. 437); to the Committee on Public Lands and Surveys.

By Mr. REED of Pennsylvania:

A bill (S. 3376) to regulate the procurement of motor transportation in the Army; to the Committee on Military Affairs.

By Mr. HALE:

A bill (S. 3377) for the relief of Walter Dickey; to the Committee on Naval Affairs.

By Mr. SWANSON:

A bill (S. 3378) for the relief of Arthur M. Thompson; and

A bill (S. 3379) for the relief of the Harrison Construction Co.; to the Committee on Claims.

A bill (S. 3380) for the relief of T. Abraham Hetrick (with an accompanying paper); to the Committee on Military Affairs.

By Mr. BORAH:

A bill (S. 3381) granting a pension to Patrick M. Shea (with accompanying papers); to the Committee on Pensions.

By Mr. JOHNSON:

A bill (S. 3382) for the relief of the estate of Benjamin Fenton, late surviving partner of Fenton & Co.; to the Committee on Claims.

By Mr. WATSON:

A bill (S. 3383) granting a pension to Nellie Sherril; and

A bill (S. 3384) granting an increase of pension to Mary E. Clayton; to the Committee on Pensions.

By Mr. CAPPER:

A bill (S. 3385) to provide for the improvement and modernization of the Western Public Market in the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. BRUCE:

A bill (S. 3386) for the relief of the Charlestown Sand & Stone Co., of Elkton, Md.; to the Committee on Claims.

By Mr. METCALF:

A joint resolution (S. J. Res. 99) to amend joint resolution directing the Interstate Commerce Commission to take action relative to adjustments in the rate structure of common carriers subject to the interstate commerce act, and the fixing of rates and charges; to the Committee on Interstate Commerce.

By Mr. SMOOT:

A joint resolution (S. J. Res. 100) to provide for appropriate military records for persons who, pursuant to orders, reported for military duty, but whose induction or commission into the service was not, through no fault of their own, formally completed on or prior to November 11, 1918, and for other purposes; to the Committee on Military Affairs.

CHANGES OF REFERENCE

On motion of Mr. KEYES, the Committee on Public Buildings and Grounds was discharged from the further consideration of the bill (S. 3262) to establish a national cemetery at Fort Bayard, N. Mex., and it was referred to the Committee on Military Affairs.

Mr. FRAZIER. On the 21st the bill (H. R. 8824) to provide for the protection of the watershed within the Carson National Forest from which water is obtained for the Taos pueblo, N. Mex., came to the Senate from the House and was referred to the Committee on Public Lands and Surveys. This bill is identical with Senate bill 2361, which is now before the Committee on Indian Affairs, and the bill from the House should have been referred to that committee. I ask unanimous consent that the Committee on Public Lands and Surveys be

discharged from the further consideration of the bill and that it be referred to the Committee on Indian Affairs.

The PRESIDING OFFICER (Mr. WILLIS in the chair). Is there objection? The Chair hears none, and that order will be made.

AMENDMENTS TO DISTRICT OF COLUMBIA APPROPRIATION BILL

Mr. CAPPER submitted amendments intended to be proposed by him to House bill 11133, the District of Columbia appropriation bill, which were severally referred to the Committee on Appropriations and ordered to be printed, as follows:

On page 6, line 7, strike out the period and insert a comma and the following: "and $2,640 additional for personal services of employees assigned to operation and maintenance of the Western Public Market at or near Twenty-first and K Streets NW.";

On page 6, line 11, strike out the figures "$6,000," and insert the following in lieu thereof: "$7,500, including the repair and maintenance of the Western Public Market at or near Twenty-first and K Streets NW."; and

On page 6, immediately after line 15, insert the following: "For repairs, improvements, and remodeling of Western Public Market, at or near Twenty-first and K Streets NW., including new roof, repainting, repaving walks, construction of storage room, installation of sanitary stands, and other necessary items, $50,000."

COLUMBIA (S. C.) FEDERAL LAND AND INTERMEDIATE CREDIT BANK

Mr. BLEASE submitted the following resolution (S. Res. 159), which was referred to the Committee on Banking and Currency:

Whereas criminal prosecutions were brought and 32 days actually consumed in trying certain criminal cases at which three defendants were convicted in the Federal court at Columbia, S. C., at the session closed on February 14, 1928, and at a cost exceeding $40,000, and preliminary investigations having cost approximately $60,000 more; and

Whereas testimony brought out thereat involved certain officials of the Federal land and intermediate credit bank located at Columbia, S. C.; and

Whereas there was much talk of mismanagement, gross carelessness, and irregularities on the part of the officers of the said Federal land and intermediate credit bank located at Columbia, S. C.; and

Whereas it is rumored that the manner in which the affairs of the said bank have been managed has worked hardships to the farmers of various sections of that district, and also has shown carelessness, negligence, and willfulness on the part of its officers in handling the funds belonging to the United States; and

Whereas it is desired to bring about a conclusion of the controversy and to find out exactly what are the conditions of said bank and what losses the Government has sustained by these criminal prosecutions and the mismanagement of the affairs of the said bank: Now, therefore, be it

Resolved, That the Committee on Banking and Currency of the Senate, or a duly authorized subcommittee thereof, is hereby authorized and directed to make a complete and full investigation of the administration of the affairs of the Federal Land & Intermediate Credit Bank of Columbia, S. C., and to report thereon to the Senate as soon as practicable. For the purposes of this resolution such committee or subcommittee is authorized to hold hearings, to sit and act at such times and places, to employ such experts and clerical, stenographic, and other assistance, to require by subpœna or otherwise the attendance of such witnesses, and the production of such books, papers, and documents, to administer such oaths, and to take such testimony and make such expenditures as it deems advisable. The cost of stenographic service to report such hearings shall not be in excess of 25 cents per hundred words. The expenses of such committee or subcommittee, which shall not be in excess of $, shall be paid from the contingent fund of the Senate.

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 1759. An act to authorize appropriation of treaty funds due the Wisconsin Pottawatomi Indians;

H. R. 5501. An act authorizing the Hermann Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Hermann, Gasconade County, Mo.;

H. R. 5502. An act authorizing the Washington Missouri River Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Washington, Franklin County, Mo.;

H. R. 5722. An act authorizing the Rogers Bros. Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Ashland, Ky.;

H. R. 6639. An act authorizing the Centennial Bridge Co. of Independence, Mo. (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Liberty Landing, Clay County, Mo.;

H. R. 6991. An act authorizing the erection of a nonsectarian chapel at the Army medical center in the District of Columbia, and for other purposes;

H. R. 8106. An act authorizing F. C. Barnhill, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Arrow Rock, Saline County, Mo.; and

H. R. 8107. An act authorizing Frank M. Burruss, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Miami, Saline County, Mo.

SUPPLEMENTAL ESTIMATE OF APPROPRIATION—ADDITIONAL FACILITIES AT WALTER REED GENERAL HOSPITAL (S. DOC. NO. 63)

The PRESIDING OFFICER (Mr. BLAINE in the chair) laid before the Senate a communication from the President of the United States, transmitting a supplemental estimate of appropriation, fiscal year 1929, for the War Department, for the construction of additional facilities at Walter Reed General Hospital, District of Columbia, in the amount of $310,000, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

NORTH DAKOTA: PAST, PRESENT, AND FUTURE

Mr. NYE. Mr. President, I ask unanimous consent that there be printed in the RECORD an address on North Dakota: Past, Present, and Future, delivered last evening before the North Dakota Society by former Gov. Joseph Devine, State commissioner of immigration.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS OF FORMER GOV. JOSEPH DEVINE, OF NORTH DAKOTA

North Dakota is a big and good State. It has 70,000 square miles of land; more acres of land than New York, New Jersey, and Massachusetts combined, which States have a population of 18,774,000. North Dakota's population is 644,000. The State has 45,000,000 acres of arable land. It has 29,000,000 acres in farms, of which 19,000,000 are under cultivation—more acres under the plow than the great States of Oregon, Washington, and California combined. The average acreage per farm in North Dakota is 452; in the Middle West States east of us, 120.

North Dakota in 1919 produced 17,000,000 bushels of corn; 1923, 35,000,000 bushels. It is safe to say that in 15 years it will be one of the leading corn-producing States. It now leads all States in the production of No. 1 Hard and Durham wheat, barley, winter rye, turkeys, and honey, and fourth in oats production. In 1918 the State produced 290,000 hogs; 1927, 640,000. The State is now producing as good a milch cow as New York, Wisconsin, or Minnesota, and farm population considered, doing it more rapidly. In 1918 the value of dairy production was $19,000,000; in 1927, $49,000,000. It is producing as good a steer, hog, horse, or sheep upon its rich, low-level value land and can round them up for the market more cheaply with its corn, alfalfa, and sweet clover than can Iowa or Illinois upon their high-level value land.

In 1918 the value of the so-called diversified products was $59,000,000; in 1927, $169,000,000. The North Dakota farmer no longer has all his eggs in one basket, namely grain.

We are soon to be one of the great poultry States. In 1918 poultry production amounted to $3,712,000; the estimated value of poultry production in 1927, $17,200,000. It is unsurpassed as a great potato and vegetable State as to size, variety, quality, and ease of production. The North Dakota potato is eagerly sought by eastern consumers and southern potato growers for seed. It is now one of the leading sweet-clover and alfalfa States, both for seed and feed. In 1918 the acreage in sweet clover and alfalfa was 60,000; 1927, 495,000. In 1920 there were 170,000 sheep, all located in the southwest corner, or Missouri slope country. Now, well distributed over the State, there are 498,000.

The State produces all of her agricultural products with the season's rainfall, without irrigation, inoculation of soil, or a single ounce of commercial fertilizer, and will continue to do so for many years to come.

The State now leads in both volume and value of turkey production. In 1918 the production of turkeys just about met the consumption of the people who lived within its borders. North Dakota now commands the highest premium price in the market—particularly in the markets of Boston and New York. Annually, in North Dakota, there convenes the greatest showing of turkeys in the world. Fifteen States were represented in the last gathering.

The State now is the leading bee State, both in quality and quantity of production. In 1920 the State had 708 hives of bees. In 1927, 25,000 hives, and the estimated production was 3,000,000 pounds. The

North Dakota bureau of crop estimates shows in 1922 a production of 157 pounds to the hive, which was the highest of any State in the Union. Why this rapid development in production and quality? The answer is acres and acres of sweet clover; the long, warm, sunshiny days and the short, cool nights. The long days giving longer hours for bee work, and the short, cool nights precipitating in largest quantity the nectar in the clover blossoms.

When we became a State in 1889 Indiana as a State was 75 years old; Illinois, 71; Michigan, 52; Iowa, 43; Wisconsin, 41; Minnesota, 31; and Nebraska, 22. All these States of the Middle West have had from one to three generations the start of us, yet it can be said that the youthfulness of our State has not prevented us from taking a high place, both in general progress and in the volume and value of agricultural production. We as a State and people have gone far since that day and time. The great highways have been opened, the rough places made smooth, the fear and uncertainty of the earlier years dispelled, and under the strong, white light of intelligence, enterprise, industry, education, and progress are to be seen on every hand. The act of statehood marked the passing of the big ranches and the cowboy. Towns sprang rapidly up as if by magic where once the buffalo and antelope grazed. The farm and farm home now stand where once the Indian tepee stood. The school bell now calls 174,000 children of township, village, and city where once the coyote sent forth his high, tremulous, desolate call into the night. With a vast acreage yet to feel the plowshare, in 1924 we produced in value on our farms $457,361,000, the largest per capita value, $688, and the largest average farm value, $6,142, of any State in the Union, measured by population and number of farms. One of the big, new, and proper questions of these days is: What can a State or country do for humanity? North Dakota's very satisfactory answer to that question is, "We produce a greater quantity of human food, both for home and world-wide consumption, than any State of like numbers in the world."

The State has more people owning their own homes than any other State in the Union. Out of each 1,000, 653 own the homes in which they live, while the percentage of home owners for the country at large is 450 per 1,000. The State has no millionaires, but we have what is far better, a contented, forward-looking citizenry, whose sons and daughters of farm and city crowd our eight higher institutions of learning to capacity. Why? Because they live in a State whose per capita wealth is not only greater, but more evenly distributed, than any other State in this, the richest country in the world.

After all is said and done it is not land, wealth, or numbers, but rather the type and character of a people that best determines the right of that people for their "place in the sun." Measured by that standard North Dakota has nothing to fear. She can face the future secure, self-poised, and unafraid. Of the State's total population 515,000 were born in this country; of this number, 305,000 were born in North Dakota. As to the early pioneer settlers, the Middle West States contributed 68,000; the New England States, 6,000; the Eastern States, 9,000; and the Southern States, 4,000. Each sent of the best they had. Regarding the character and type of the foreign population, the British Isles and her colonies contributed 9,000; the Scandinavian races, 54,000; Germans and Russians of German strain, 45,000; Holland, Belgium, and France, 2,000. In all North Dakota there isn't enough scum from humanity's melting pot to make a typical pioneer village. North Dakota's citizenry is as sound as her No. 1 hard wheat and as clean as the air they breathe. Fortunate, indeed, was it for North Dakota and for all generations to come that the very early pioneers brought with them a deep and abiding faith in the great fundamental principles of law, order, society, home, church, and school. Upon these, as the firm foundation, they erected the superstructure of the new State. Because of that fact North Dakota is to-day, above everything else, a State of law, order, homes, churches, and schools.

North Dakota is justly proud of her system of education, measured from the district and consolidated schools, on our prairies, to that of the Agricultural College at Fargo and the State University at Grand Forks. We spend annually $14,800,000 for our common and high schools, and $3,250,000 biennially for our eight higher institutions of learning. North Dakota has but two-tenths of 1 per cent of illiteracy. That is a high goal to which the older States may well strive to reach.

We are abundantly well equipped as to cities, towns, and villages; we have State institutions—educational, penal, and charitable—in plenty; schools and churches in full measure; stores, banks, grain elevators, and wholesale houses in ample quantity; a great agricultural and health-giving climate; plenty of pure water, lakes, and rivers; sufficient rainfall and abundant sunshine. There are four transcontinental lines and their numerous branches cobwebbing the State in every direction—therefore, excellent transportation facilities. We have the existing executive machinery—State, county, and township—fully capable of rendering good, prompt service to a population of 1,500,000.

North Dakota has 600,000,000,000 tons of high-grade lignite coal, the greatest deposit of a continuous stretch of coal in any one locality in the world; greater than the combined coal deposits of England, France, and Germany, the great coal-producing and industrial nations of Europe, with a population of 116,000,000. We have enough coal to warm every home and turn every wheel in every factory in this country for 200 years and still barely scratch the surface of this special gift of God to the people of North Dakota. The day can not be far distant when this coal, long patiently awaiting the magic touch of organized capital, will produce the cheapest electricity the world knows and shoot it hundreds of miles away for heat, power, and light. What is needed? Vision, enterprise, organization, and capital.

North Dakota has one of the greatest deposits of high-grade pottery, brick, and chinaware in the world. We have many beautiful specimens of chinaware manufactured out of this clay, but as yet only in quantities sufficient for exhibition purposes. The clay, like our coal, awaits that day when business enterprise will cause the raw material to be transformed into trainloads of chinaware of the most delicate texture, beauty, and value. Pittsburgh is the steel center of this country. It gets its raw material in far away northern Minnesota. The Ohio River Valley is the great pottery and glass section of this country, but it gets some of its raw material from more or less distant points. Why these two great industries existing so far away from the raw materials, iron ore and clay? The answer is: "Coal, and, therefore, cheap power." North Dakota has the coal and clay lying side by side with transcontinental railroads passing by within a stone's throw of both. The child now lives who will see the western section of this State humming with factories and thousands of skilled artisans living in peace and prosperity within that section.

The State has a special beauty all her own—the broad, slightly rolling prairie lands are God's earth reduced to the highest state of perfection. A big world in its serene, beautiful, old age; they are meditative, peaceful, unafraid. It is a world of rest; kind, thoughtful brooding; a land made for homes and the carefree laughter of healthy, happy children. Its sunsets, painting in splendor the western skies—then the night and the stars. Our Clell G. Gannon, a writer, student, lover, and interpreter of the prairies and all that live thereon, has in his recent publication, Songs of the Bunch Grass Acres, expressed his thought of them in the following lines:

"I have seen cherries hanging overripe;
I have seen roses drenched in morning dew;
I have seen stars fall, trailing through the night,
In flares of gold across the star-flecked blue,
I have seen mountains fusing with the skies,
In conversation with the centuries;
I have seen sunsets dripping wet with dyes
Spilled recklessly—and dawns surpassing these!
And though I love them all, I have not seen
A sight more thrilling than a reach of plains,
Dressed in spring's vivid tapestry of green
Beneath a sun-soaked sky—after the rains!"

Civilization has ever moved westward; the country's population is rapidly increasing. Good land unoccupied in extent is rapidly decreasing. God is not making any more land. That task was forever finished when He said, "Let there be light, and there was light." Dependable prosperity has crossed the eastern border lines of the Red River of the North and swept across the "big" Missouri to the western border of the State. Within that long, wide stretch of country, housing is reasonable; rich, productive land cheaper, cost of living lower, and opportunities greater. The pioneer days of privation and isolation, of the sod barn and tar-paper shack are now as a tale that is told. Gravel-surfaced roads, the automobile, telephone, radio, and rural delivery have annihilated distance. Up-to-date creameries, packing plants, cold storage, and rapid transit deliver the farmers' finished product direct to the consuming centers of far-away Eastern States and cities. Thousands of our farm homes listen-in nightly to the best expressed thought the country can give in art, education, religion, science, literature, history, and industry. The North Dakota farm family are active, accredited members in the nation-wide extension course of business and cultural education. At no far distant day electricity will light farm homes and barns, milk the cows, cook the meals, churn cream into butter, sweep the floors, and do the washing. Why? Millions of acres covering billions of tons of coal within easy reach of the big steam shovel; therefore, cheap light, heat, and power.

In North Dakota to-day there is more faith and less doubt; more unity of thought and direction and less of dissension, both of farm and city, than at any time since statehood. Because of that pleasing fact there is every evidence that we are entering upon a new era of sound, constructive teamwork that is the harbinger of bigger and better things to come. We have the utmost respect for those who speak highly and believe thoroughly in the State in which they live. All States in this country have much that is praiseworthy. We of North Dakota should take the same commendable attitude. Our State is in every way worthy of all we can give and do for her. We live in a much bigger and better State than the people at home or the country at large have as yet conceived. To those who live in other States North Dakota will be what we tell them she is and to those who live here she will be what we make her. We must silence misrepresentation and substitute it with wholesome, dependable information. That knowledge will

come, indeed it is now gradually but just as certainly going over. To accomplish that very laudable purpose, North Dakota needs the combined effort of every loyal citizen.

THE CALENDAR

The VICE PRESIDENT. Morning business is closed. Under the unanimous-consent agreement entered into on yesterday, the Senate will proceed to the consideration of unobjected bills on the calendar, beginning at No. 253.

MEMORIAL STATUE OF CARDINAL GIBBONS

The joint resolution (S. J. Res. 72) to grant permission for the erection of a memorial statue of Cardinal Gibbons was announced as first on the calendar. The joint resolution was considered as in Committee of the Whole, and it was read, as follows:

Resolved, etc., That the Chief of Engineers, United States Army, be, and is hereby authorized and directed to grant permission to the Knights of Columbus, through Martin H. Carmody, the supreme knight of the Knights of Columbus, or his successors in office, for the erection, as a gift to the people of the United States, on public grounds, known as reservation 309–G, west of square 2675 which said reservation is bounded on the north by Park Road, on the east by Pine Street, and on the west by Sixteenth Street, and immediately in front of Sacred Heart Church in Washington, D. C., a memorial statue of the late James Cardinal Gibbons: *Provided*, That the design for the statue shall be approved by the Commission of Fine Arts: *And provided further*, That such statue shall be erected under the supervision of the Chief of Engineers, and that the United States shall be put to no expense in or by the erection of said statue.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MEMORIAL MONUMENT TO PACIFIC NORTHWEST PIONEERS

The joint resolution (S. J. Res. 33) authorizing the selection of a site and the erection of a memorial monument to the pioneers of the Pacific Northwest in Washington City, D. C., was considered as in Committee of the Whole, and was read, as follows:

Resolved, etc., That authority is hereby granted to the Oregon Trail Memorial Association (Inc.) to erect a memorial to the pioneers of the Pacific Northwest at such place in the city of Washington as may be designated by the Fine Arts Commission, subject to the approval of the Joint Committee on the Library, the model of the monument so to be erected to be first approved by the said commission and by the Joint Committee on the Library, the same to be presented by the said association to the people of the United States.

SEC. 2. That for the preparation of the site under the direction of the Director of Public Buildings and Public Parks of the National Capital, the sum of $10,000, or so much thereof as may be necessary, is hereby authorized to be appropriated out of any money in the Treasury not otherwise appropriated.

Mr. KING. Mr. President, I would like to ask whether the statue is to be erected by the Government, and if so, what the aggregate cost to the Government will be? On page 2 of the joint resolution I notice that $10,000 is to be appropriated.

Mr. FESS. The joint resolution authorizes an appropriation of $10,000, which the Senator from Washington [Mr. JONES], who introduced the measure, will explain.

Mr. JONES. Mr. President, that is for the preparation of the site within the District, if one should be selected where grading and putting in shape would be required. That expense must be taken care of by the Government. Otherwise there is no expense to the Government. If a site is selected which does not require any grading, then, as in the case of the joint resolution passed a moment ago, there will be no expense to the Government.

Mr. KING. Where private corporations or voluntary associations seek the privilege of erecting a statue of some eminent person in the District of Columbia is it customary that the Government shall pay for the site or pay for preparing the site?

Mr. JONES. I understand it is in accord with the policy which has been pursued heretofore that where the site requires grading and special preparation it has been done by the Government, but all other expenses are borne by the association or organization which furnishes the statue.

Mr. KING. My recollection is that where voluntary associations or corporations are formed for the purpose of having a monument erected they pay for the cost. As I recall—my memory may be at fault—the cost of the statue to Buchanan was imposed upon the organization which inaugurated the movement, and I think the organization in that case was the State of Pennsylvania.

Mr. JONES. I do not know how that may be. If the Senator objects to that provision, in the interest of securing the passage of the joint resolution I can suggest an amendment. I hope, however, that the Senator will not insist, if there should be any expense in securing the site, that it should be imposed upon this pioneer organization.

Mr. KING. Let me make this suggestion: I shall not object, with the understanding that if upon inquiry it shall be discovered that it is not usual for the Government to make such appropriations the Senator will agree that the action of the Senate in passing the joint resolution may be reconsidered tomorrow morning.

Mr. JONES. That will be entirely satisfactory to me.

Mr. KING. With that understanding, I have no objection to the consideration of the joint resolution.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MEMORIAL TO SAMUEL GOMPERS

The Senate, as in Committee of the Whole, proceeded to consider the joint resolution (S. J. Res. 88) authorizing the erection on public grounds in the District of Columbia of a stone monument as a memorial to Samuel Gompers, which was read, as follows:

Resolved, etc., That the Director of Public Buildings and Public Parks of the National Capital be, and he is hereby, authorized and directed to select a suitable site and to grant permission to William Green, president, and Frank Morrison, secretary, of the American Federation of Labor, for the erection, as a gift to the people of the United States, on public grounds of the United States in the city of Washington, D. C., other than those of the Capitol, the Library of Congress, the Mall, and White House, of a stone monument in memory of Samuel Gompers: *Provided*, That the site chosen and the design of the memorial shall be approved by the Joint Committee on the Library, with the advice of the Commission of Fine Arts, that it shall be erected under the supervision of the Director of Public Buildings and Public Parks of the National Capital, and that the United States shall be put to no expense in or by the erection of the monument.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

NATIONAL SURETY CO.

Mr. COPELAND. Mr. President, it will be recalled that on yesterday when the consideration of bills on the calendar was suspended the Senate had under consideration Order of Business 185, being the bill (S. 2335) for the relief of the National Surety Co. I ask that the Senate now return to that bill in order that its consideration may be completed. The Senator from Tennessee [Mr. MCKELLAR], I think, was offering an amendment to the bill when its consideration was suspended.

Mr. MCKELLAR. No.

The PRESIDING OFFICER (Mr. WILLIS in the chair). The Senator from New York asks unanimous consent to return to the consideration of the bill named by him. Is there objection?

Mr. MCKELLAR. I have no objection.

Mr. CURTIS. If the consideration of the bill is going to take time, I hope the Senator from New York will not ask its consideration, because we should like to get through the calendar this morning. We have not gone through the calendar for a long while.

The PRESIDING OFFICER. The Chair is informed that the bill, consideration for which is asked by the Senator from New York, is in the Senate and is ready to be fully acted on.

Mr. CURTIS. If its consideration will take no time, reserving the right to object if it shall take time, I will not object to the consideration of the bill.

Mr. KING. I ask the Senator from New York to make a brief explanation of the bill, because I objected to its consideration.

Mr. COPELAND. The National Surety Co. had paid a claim of $157.89, and it afterwards developed that the company was not liable because it did not write the policy until a few months after the loss; and the bill is to reimburse the company for the money improperly advanced by it. That is the purpose of the bill.

The PRESIDING OFFICER. Is there objection to the consideration of the bill?

There being no objection, the Senate resumed the consideration of the bill.

The PRESIDING OFFICER. The question is, Shall the bill pass?

The bill was passed.

TABLET AT BATTLE FIELD OF PERRYVILLE, KY.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 48) to erect a tablet or marker to the memory of the Federal soldiers who were killed at the Battle of Perryville, and for other purposes, which was read, as follows:

Be it enacted, etc., That the sum of $5,000 be, and is hereby, authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, for the purpose of erecting a tablet or marker on the grounds of the Battle of Perryville, near Perryville, in Boyle County, Ky., in honor of the Federal soldiers who took part in that battle, and many of whom are now buried therein, said tablet or marker to be erected in a suitable location, having reference to the monument erected by the State of Kentucky to the Confederate dead that also lie buried therein. Said sum to be dispensed by the Secretary of War, after he shall have approved the plans of said tablet or marker.

SEC. 2. That the Secretary of War is hereby authorized to accept, free of cost to the Government, a tract of land containing 4 acres, with the roadway 25 feet wide running from the east side of said tract to the Perryville Turnpike, and upon presentation of good and perfect title to said tract of land the Secretary of War is authorized and directed to establish thereon a national cemetery.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ESTATE OF PETER P. PITCHLYNN

The bill (S. 1705) authorizing the Court of Claims to render judgment in favor of the administrator of or collector for the estate of Peter P. Pitchlynn, deceased, instead of the heirs of Peter P. Pitchlynn, and for other purposes, was announced as next in order.

Mr. KING. Mr. President, will the Senator from Oklahoma [Mr. THOMAS], who introduced this bill, give an explanation as to the necessity for the passage of the measure.

Mr. THOMAS. Mr. President, the reason for the passage of this bill may be stated very briefly. The Court of Claims at a former time was authorized to make and did make a finding in favor of the heirs of Peter P. Pitchlynn. Those heirs are widely scattered, and there has been some complication in making an adjustment under the award of the Court of Claims. This bill is introduced and its passage is sought for the purpose of permitting the award to be made to the estate of Peter P. Pitchlynn and to let the administrator handle it as he may see proper.

Mr. KING. The passage of the bill will not increase the award at all?

Mr. THOMAS. No.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the Court of Claims is hereby authorized to render judgment in the suit of the heirs of Peter P. Pitchlynn, deceased, against the Choctaw Nation, No. 30532, now pending in said court on mandate from the Supreme Court of the United States in favor of the administrator of or collector for the estate of Peter P. Pitchlynn, deceased, appointed or to be appointed under the laws of the District of Columbia, for $3,113.92, the amount the Court of Claims on June 9, 1924, found to be due the heirs of said Pitchlynn from the Choctaw Nation. Said judgment shall be paid out of any funds in the Treasury or custody of the United States belonging to the Choctaw Nation.

SEC. 2. To the above extent, the act of Congress approved June 21, 1906 (34 Stat. L. 325, 345), under which said suit was instituted in said Court of Claims is hereby amended, and all acts or parts of acts inconsistent herewith are hereby repealed.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PROPOSED CONSTITUTIONAL AMENDMENT PROHIBITING WAR

The joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States prohibiting war was announced as next in order.

Mr. BRUCE. Let that go over.

The PRESIDING OFFICER. The joint resolution will go over.

ELECTRIC PLANT AT HANAPEPE, KAUAI, HAWAII

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 83) to approve Act No. 24 of the Session Laws of 1927 of the Territory of Hawaii entitled "An act to authorize and provide for the manufacture, maintenance, distribution, and supply of electric current for light and power within Hanapepe, in the district of Waimea, island and county of Kauai."

The bill was read, as follows:

Be it enacted, etc., That act No. 24 of the Session Laws of 1927 of the Territory of Hawaii, entitled "An act to authorize and provide for the manufacture, maintenance, distribution, and supply of electric current for light and power within Hanapepe, in the district of Waimea, island and county of Kauai," passed by the Legislature of the Territory of Hawaii and approved by the Governor of the Territory of Hawaii on March 26, 1927, is hereby approved: *Provided*, That the authority in section 16 of said act for the amending or repeal of said act shall not be held to authorize such action by the Legislature of Hawaii except upon approval by Congress in accordance with the organic act.

Mr. KING. Mr. President, there are a number of measures, I understand, either in the House or in the Senate or in both, dealing with Hawaiian matters. I should be very glad if the Senator from Delaware, who reported the bill, would give us an explanation of it.

Mr. BAYARD. Mr. President, the report on this bill was submitted by me on behalf of the Committee on Territories and Insular Possessions. This bill covers a matter which is required under the organic act of Hawaii to be submitted to the Congress of the United States. It has to do with granting a franchise for an electric-light operation in Hawaii. An act for this purpose was passed by the Legislature of Hawaii and was approved by the governor, but under the organic act, as I have just stated, that act must come before Congress for final approval before it can become operative.

The committee looked into the matter very carefully. It will be seen from consulting the report that extensive quotations are made from the safeguarding clause of the charter as passed by the Hawaiian Legislature. It seems to be a very necessary operation. The facts are these: Here was a little village, situated between two large plantations, with a population of about 3,900 people. They have no electric-light facilities, and Mr. Gomes and his friends made application to the Hawaiian Legislature for a permit or a franchise. The permit was granted after due care and consideration. The act of the Hawaiian Legislature is a very extensive instrument and goes very carefully into all phases of the operation, safeguarding it and bringing it, generally speaking, under the supervision of the public utilities commission as to the issuance of securities, the disposition of the power, the rates, the examination of the books of the organization, and all needful things such as would be provided for in this country. The passage of the bill is recommended by the Governor of Hawaii.

Mr. KING. Will the Senator permit one question?

Mr. BAYARD. Certainly.

Mr. KING. Is it a franchise in perpetuity, or is it limited?

Mr. BAYARD. No, sir. If the Senator will read the report, he will see that it is a franchise limited to 50 years.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MARY CLERKIN

The bill (S. 205) to authorize the Secretary of the Treasury to pay the claim of Mary Clerkin was considered as in Committee of the Whole. It directs the Secretary of the Treasury to pay to Mary Clerkin, of Newtownbutler, county of Fermanagh, Ireland, $140 for the loss of certain laces which were destroyed in the fire in the appraiser's warehouse at New York City in May, 1909.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

FRANK HANLEY

The bill (S. 802) for the relief of Frank Hanley was announced as next in order.

Mr. KING. I ask that that bill go over.

Mr. COPELAND. Mr. President, will the Senator withhold his objection for a moment?

Mr. KING. I will.

Mr. COPELAND. Mr. President, Frank Hanley, mentioned in the bill, had a leave of absence of 24 hours from his ship. When he came back to join his ship before his leave had expired the ship had sailed. Then, in company with other members of the crew he sailed to Savannah, Ga., because he was told that his ship had gone there; but when he got to Savannah he could not find it. Although he made every effort to rejoin his ship, this poor chap was thrown out and dishonorably discharged, when, as a matter of fact, it was physically impossible for him to reach the ship. The war was over at the time this happened. This man is now old, blind, and deaf,

and it is only right that his status should be restored and he be given an honorable discharge.

Mr. BRUCE. I will ask that the bill go over temporarily.

The PRESIDING OFFICER. The bill will be passed over.

DELAWARE RIVER BRIDGE NEAR BURLINGTON, N. J.

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2800) authorizing E. K. Morse, his successors and assigns—or his or their heirs, legal representatives, and assigns—to construct, maintain, and operate a bridge across the Delaware River, at or near Burlington, N. J., which had been reported from the Committee on Commerce with amendments.

The first amendment was in section —, on page 1, line 6, before the word "hereby," to strike out "are" and insert "is," so as to make the section read:

That in order to facilitate interstate commerce, improve the Postal Service, and provide for military and other purposes, E. K. Morse, his successors and assigns—or his or their heirs, legal representatives, and assigns—be, and is hereby, authorized to construct, maintain, and operate a bridge and approaches thereto across the Delaware River, at a point suitable to the interests of navigation, at or near Burlington, N. J., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

The amendment was agreed to.

The next amendment was, in section 3, page 2, line 22, before the word "hereby," to strike out "are" and insert "is," so as to make the section read:

SEC. 3. The said E. K. Morse, his successors and assigns (or his or their heirs, legal representatives, and assigns), is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

OFFICE OF PUBLIC BUILDINGS AND PUBLIC PARKS

The bill (S. 1628) relating to the Office of Public Buildings and Public Parks of the National Capital was announced as next in order.

Mr. KING. I ask that that bill go over. A number of persons have been to see me in regard to the bill and have suggested some amendments. Whether they are proper or not I can not say; but I ask that the bill may be passed over, not that I have any inherent opposition, but I should like to inquire into the objections which have been brought to my attention.

The PRESIDING OFFICER. The bill will be passed over.

AUGUSTUS C. TURNER

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 3144) for the relief of Augustus C. Turner, which was read, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, Augustus C. Turner, who was a member of Company F, First Regiment, and Company B, Forty-fourth Regular United States Volunteer Infantry, and Troop M, Thirteenth United States Cavalry, shall hereafter be held and considered to have been discharged honorably from the military service of the United States as a member of Troop M, Thirteenth United States Cavalry, on the 14th day of November, 1905: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

Mr. REED of Pennsylvania. Mr. President, I wish to ask about the title of the bill. As it appears on the calendar the title seems to be erroneous. The bill as it passed the House has the correct title.

The PRESIDING OFFICER. The Chair is advised that the title as passed by the House is the correct title, reading "For the relief of Augustus C. Turner."

Mr. REED of Pennsylvania. That is all right.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ELLA G. RICHTER

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 2808) for the relief of Ella G. Richter, daughter of Henry W. Richter, which had been reported from the Committee on Military Affairs with an amendment, on page 2, line 1, after the word "shall," strike out "accrue or be allowed in this case" and insert "be held to have accrued prior to the passage of this act," so as to make the bill read:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers, Henry W. Richter, who was a member of Company A, Ninth Regiment Iowa Volunteer Cavalry, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a member of that organization on the 17th day of January, 1864: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

Mr. KING. I should like to have an explanation of this bill. It seems as though the soldier was a deserter.

Mr. REED of Pennsylvania. Mr. President, this soldier served from May, 1861, down to December, 1863, in active service and received an honorable discharge. He obtained a furlough and at its expiration returned to his company. He says that he was placed on picket duty and was captured, but it happened on the same day that he returned from his furlough, and he was put on the records as a deserter, whereas the fact, as he testified, was that he was actually a prisoner.

The bill as it was presented in the House in behalf of the lady who seeks to have her dead father's record corrected, provided that she should not be entitled to any pension whatever, either past or future. She was solely prompted by a desire to have the record corrected so far as possible. The committee thought her attitude so creditable that we should give her the same privilege as the beneficiaries of other bills. That is the reason for the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

KENNETH B. TURNER

The bill (S. 133) for the relief of Kenneth B. Turner was announced as next in order. The bill had been reported adversely from the Committee on Military Affairs.

Mr. KING. I ask that the bill go over.

Mr. FESS. The Senator from California [Mr. SHORTRIDGE] is detained from the Senate and desired me to ask that this bill remain on the calendar without prejudice.

The PRESIDING OFFICER. Without objection, the bill will remain on the calendar without prejudice.

Mr. REED of Pennsylvania. Mr. President, I notice the bill itself as it appears on the calendar of bills was indefinitely postponed on February 8. If that is so, it has no place on the calendar.

The PRESIDING OFFICER. The Chair is advised that that is a mistake. The bill has been adversely reported, but it has not been indefinitely postponed.

PURCHASE OF LANDS IN BISMARCK, N. DAK.

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2279) authorizing the Secretary of the Interior to purchase certain lands in the city of Bismarck, Burleigh County, N. Dak., for Indian school purposes, which was read, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized and directed to purchase for the Bismarck (N. Dak.) Indian school, from the Dakota Corporation, Bismarck, N. Dak., or its successors in interest, certain adjoining tracts of land within the limits of the city of Bismarck, Burleigh County, N. Dak., described as follows: The southeast quarter of the southeast quarter, containing 40 acres; part of the southwest quarter of the southeast quarter, containing 23 acres more or less; and part of the northwest quarter of the southeast quarter, containing 30 acres more or less, all in section 5, township 138 north, range 80 west of the fifth principal meridian, containing 93 acres more or less, subject to survey. The purchase price shall not exceed $120 an acre and the lands shall be warranted free of all encumbrances.

SEC. 2. There is hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

KOOSHAREM BAND OF INDIANS, UTAH

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 8292) to reserve 120 acres on the public domain for the use and benefit of the Koosharem Band of Indians residing in the vicinity of Koosharem, Utah, which was read, as follows:

Be it enacted, etc., That 120 acres of land described as the west half southwest quarter and southwest quarter northeast quarter section 9, township 27 south, range 1 west, Salt Lake meridian, Utah, be, and the same is hereby, reserved for the sole use and occupancy of the Koosharem Band of Indians in Utah: *Provided*, That the rights and claims of any bona fide settler initiated under the public land laws prior to November 5, 1927, the date of withdrawal of the lands from all form of entry, shall not be affected by this act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (S. 2154) to amend an act entitled "An act for the relief of Indians occupying railroad lands in Arizona, New Mexico, or California," approved March 4, 1913, was announced as next in order.

Mr. BRATTON. I ask that that bill go over.

The PRESIDING OFFICER. The bill will be passed over.

HEIRS AND ALLOTMENTS OF DECEASED INDIANS

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2155) to amend section 1 of the act of June 25, 1910 (36 Stat. L. 855), entitled "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes," which was read, as follows:

Be it enacted, etc., That when any Indian to whom an allotment of land has been made, or may hereafter be made, dies before the expiration of the trust period and before the issuance of a fee-simple patent, without having made a will disposing of said allotment as hereinafter provided, the Secretary of the Interior, upon notice and hearing, under such rules as he may prescribe, shall ascertain the legal heirs of such decedent, and his decision thereon shall be final and conclusive. If the Secretary of the Interior decides the heir or heirs of such decedent competent to manage their own affairs, he shall issue to such heir or heirs a patent in fee for the allotment of such decedent; if he shall decide one or more of the heirs to be incompetent, he may, in his discretion, cause such lands to be sold: *Provided*, That if the Secretary of the Interior shall find that the lands of the decedent are capable of partition to the advantage of the heirs, he may cause the shares of such as are competent, upon their petition, to be set aside and patents in fee to be issued to them therefor. All sales of lands allotted to Indians authorized by this or any other act shall be made under such rules and regulations and upon such terms as the Secretary of the Interior may prescribe, and he shall require a deposit of 10 per cent of the purchase price at the time of the sale. Should the purchaser fail to comply with the terms of sale prescribed by the Secretary of the Interior, the amount so paid shall be forfeited; in case the balance of the purchase price is to be paid in deferred payments, a further amount, not exceeding 15 per cent of the purchase price, together with all interest paid on such deferred installments, may be so forfeited for failure to comply with the terms of the sale. All forfeitures shall inure to the benefit of the heirs. Upon payment of the purchase price in full, the Secretary of the Interior shall cause to be issued to the purchaser patent in fee for such land: *Provided*, That the proceeds of the sale of inherited lands shall be paid to such heir or heirs as may be competent and held in trust subject to use and expenditure during the trust period for such heir or heirs as may be incompetent as their respective interests shall appear: *Provided further*, That the Secretary of the Interior is hereby authorized, in his discretion, to issue a certificate of competency, upon application therefor, to any Indian, or in case of his death to his heirs, to whom a patent in fee containing restrictions on alienation has been or may hereafter be issued, and such certificate shall have the effect of removing the restrictions on alienation contained in such patent: *Provided further*, That hereafter any United States Indian agent, superintendent, or other disbursing agent of the Indian Service may deposit Indian moneys, individual or tribal, coming into his hands as custodian, in such bank or banks as he may select: *Provided*, That the bank or banks so selected by him shall first execute to the said disbursing agent a bond, with approved surety, in such amount as will properly safeguard the funds to be deposited. Such bonds shall be subject to the approval of the Secretary of the Interior.

Mr. KING. Mr. President, will the Senator from North Dakota explain this bill? I have not had an opportunity of reading the bill or the report. I should like to inquire whether it is sufficiently comprehensive to deal with the claims of all Indians for lands of which they have been dispossessed where they claim that the lands have been sold for prices far less than their real value and to their disadvantage. I am not quite clear as to the limitations of the bill.

Mr. FRAZIER. I do not think I get the full intent of the Senator's statement.

Mr. KING. I ask the Senator to explain the bill.

Mr. FRAZIER. Mr. President, this is a so-called departmental bill, introduced at the request of the department to take care of certain conditions in the Indian reservations. The report is quite full in regard to it. The bill was considered by the committee, and I think without any doubt is meritorious, and should be passed.

Mr. KING. Mr. President, I received a letter this morning from an Indian—and, by the way, I am receiving literally hundreds of them—complaining about the action of the department in cases where lands are communally held, so that if the person dies his heirs would not inherit an allocate part of the land, but whatever interest he had would go to the tribe. They are complaining that the Indian Bureau has taken upon itself the responsibility of carving out of lands so communally held a portion thereof, and allocating it to the heirs of the deceased, instead of permitting it to go to the tribe, when the heirs would receive the same interest in it that all other persons in the tribe would receive. I was wondering whether this measure was calculated to give to the Department of the Interior or the Indian Bureau the power to make these carvings and allocations where the land is held in a communal or tribal form by the Indians.

Mr. FRAZIER. I will say that I do not think that was the intention of this bill in any respect.

Mr. KING. I have a great deal of sympathy for the Indians. I believe that they have been wronged so often that I am very anxious to see that their rights are protected against the possibility of any invasion.

Mr. FRAZIER. I will say, further, that no objection at all was made to this bill when it was under discussion in the committee.

Mr. KING. Upon the statement of the Senator I have no objection to the consideration of the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The PRESIDING OFFICER subsequently laid before the Senate the bill (H. R. 8291) to amend section 1 of the act of June 25, 1910 (36 Stat. L. 855), "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes," which was read twice by its title.

The PRESIDING OFFICER. The Chair calls the attention of the Senator from North Dakota to this bill.

Mr. FRAZIER. Mr. President, that measure was slightly amended on the floor of the House; but I think the amendment makes no material change, and it is accepted by the Interior Department. I move that the House bill be substituted for the Senate bill.

The PRESIDING OFFICER. Without objection, the votes whereby Senate bill 2155 was ordered to be engrossed for a third reading and passed will be reconsidered.

The Senator from North Dakota now asks unanimous consent that the House bill be substituted for the Senate bill. Without objection, that will be done.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 8291) to amend section 1 of the act of June 25, 1910 (36 Stat. L. 855), "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes."

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The PRESIDING OFFICER. Senate bill 2155 is indefinitely postponed.

LANDS IN INYO COUNTY, CALIF.

The bill (S. 2157) to provide for the permanent withdrawal of certain lands in Inyo County, Calif., for Indian use was announced as next in order.

The PRESIDING OFFICER laid before the Senate the bill (H. R. 9037) to provide for the permanent withdrawal of certain lands in Inyo County, Calif., for Indian use, which was read by its title.

The PRESIDING OFFICER. The Chair calls the attention of the Senator from North Dakota [Mr. FRAZIER] to this bill. What action does the Senator from North Dakota desire to have taken in reference to it?

Mr. FRAZIER. I move that the House bill be substituted for the Senate bill.

Mr. ROBINSON of Arkansas. Mr. President, I inquire if the House bill is identical with the Senate bill?

Mr. FRAZIER. I think they are identical.

The PRESIDING OFFICER. Without objection, the House bill will be substituted for the Senate bill.

The Senate, as in Committe of the Whole, proceeded to consider the bill (H. R. 9037) to provide for the permanent withdrawal of certain lands in Inyo County, Calif., for Indian use.

Mr. KING. Mr. President, I should like to inquire the calendar number of the Senate bill?

The PRESIDING OFFICER. Two hundred and seventy-three.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The PRESIDING OFFICER. Without objection, Senate bill 2157 is indefinitely postponed.

WILLIS B. CROSS

Mr. NEELY. Mr. President, I ask unanimous consent to return to Order of Business 238, House bill 3145, consideration of which was postponed yesterday afternoon while I was absent from the Senate participating in an important meeting of the Committee on Interstate Commerce.

The PRESIDING OFFICER. The Senator from West Virginia asks unanimous consent to return to Order of Business 238, House bill 3145. Is there objection? The Chair hears none.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 3145) for the relief of Willis B. Cross.

Mr. KING. Mr. President, I should like the Senator to make an explanation of the bill.

Mr. NEELY. Mr. President, the facts in the case are as follows:

Mr. Willis B. Cross, the beneficiary of the legislation proposed in the bill, served for two years with the Seventeenth Indiana Battery, Light Artillery, performed all the duties of a private in that organization, and with it engaged in battle, although he was never enlisted or enrolled as a member of the battery.

While serving in the valley of Virginia with General Siegel's command Mr. Cross became so ill that he was obliged to go home for treatment. Upon recovering from his illness he returned to Frederick, Md., where he found that the battery with which he had been serving had been disbanded. He then enlisted in Battery B, Independent Loudoun (Virginia) Rangers, and served from the 7th day of April, 1865, to the 31st day of May, 1865, when he was discharged by reason of the end of the war.

Mr. Cross actually served in the Army more than two years, but was enlisted only from the 7th day of April, 1865, to the 31st day of the following month. The purpose of the bill is to obtain credit for the service rendered by Mr. Cross during the time he was not enrolled.

Mr. CARAWAY. Mr. President, may I ask the Senator a question?

Mr. NEELY. Certainly.

Mr. CARAWAY. How was it possible for him to serve two years without being enlisted?

Mr. NEELY. I can not answer that question. But the record, nevertheless, shows the facts to be as I have stated them.

Mr. CARAWAY. He actually served?

Mr. NEELY. He actually served and actually participated in battles.

The PRESIDING OFFICER. The amendment of the committee will be stated.

The amendment was, on page 1, line 8, after the word "discharged," to insert "therefrom after having served therein more than 90 days," so as to make the bill read:

Be it enacted, etc., That in the administration of the pension laws Willis B. Cross shall hereafter be held and considered to have been mustered into the military service of the United States as a private of Captain Miner's Seventeenth Battery, Indiana Volunteer Light Artillery, and to have been honorably discharged therefrom after having served therein more than 90 days: *Provided*, That no back pay, bounty, pension, or allowance shall be held to have accrued prior to the passage of this act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

LANDS IN NEVADA

The bill (H. R. 8281) to provide for the withdrawal of certain described lands in the State of Nevada for the use and benefit of the Indians of the Walker River Reservation was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The bill (H. R. 8282) to provide for the permanent withdrawal of certain lands bordering on and adjacent to Summit Lake, Nev., for the Paiute, Shoshone, and other Indians, was considered as in Committee of the Whole.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

OSAGE INDIANS IN OKLAHOMA

The bill (S. 2360) to amend section 1 of the act of Congress of March 3, 1921 (41 Stat. L. 1249), entitled "An act to amend section 3 of the act of Congress of June 28, 1906," entitled "An act for the division of the lands and funds of the Osage Indians in Oklahoma, and for other purposes," was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That section 1 of the act of Congress approved March 3, 1921 (41 Stat. L. 1249), entitled "An act for the division of the lands and funds of the Osage Indians in Oklahoma, and for other purposes," be amended by adding after the last line of said section 1 the following:

"*Provided further*, That the Secretary of the Interior may reduce the area to be offered annually hereunder, or suspend the offer of leases for not exceeding two years at any one time when, in his opinion, an overproduction of oil, or inadequate prices therefor, make such extension or suspension desirable in the interests of the Osage Nation, the entire unleased area, however, to be offered for lease not later than April 8, 1936."

Mr. ROBINSON of Arkansas. Mr. President, I note that this bill gives the Secretary of the Interior power to reduce the area to be offered annually for lease, but requires that the whole unleased area be offered not later than April 8, 1936. What is the object of requiring the unleased area to be submitted prior to that particular date?

Mr. LA FOLLETTE. Mr. President, I will say to the Senator from Arkansas that my understanding is that the existing law, which this bill seeks to amend, under its present terms provides for the entire leasing of that Osage area by that day. This bill is simply to give the Secretary, during that period, discretionary power as to whether he shall lease a certain amount this year or a certain amount next year; in other words, to relieve him from the obligation now contained in the statute to lease, as I remember, 100,000 acres per year. In other words, assuming that there will be an overproduction in one year, in order to prevent the throwing of these areas upon the market at a time when they would be unlikely to produce a favorable bidding the bill gives the Secretary the discretion to defer leasing them for another year or two years, until there will be a more favorable market; but it was thought that perhaps Congress would not be willing to change the general intent of the act which this bill seeks to amend, namely, that these lands shall all have been offered for lease by April 8, 1936.

I note that the Senator from Oklahoma [Mr. THOMAS] is on the floor, and as he is perhaps more familiar with the situation than I am, I will ask him to enlighten the Senator from Arkansas further.

Mr. THOMAS. Mr. President, under existing law the Secretary of the Interior is obliged to lease these lands during a certain period of time. Frequently we have depressions in the oil industry, overproduction, and decreased prices. It was thought in the interest of good business to extend and liberalize the power of the Secretary so that in times of depression and overproduction he might defer the leasing of lands that is now obligatory under the law. That is the intent of the bill.

Mr. ROBINSON of Arkansas. Mr. President, I call attention to the fact that under that practice the whole area might remain unleased until just prior to April 8, 1936, and that under the requirements of this bill the Secretary would be compelled to offer the whole area at that time. It seems to me that the bill might defeat the purpose which the Senator from Oklahoma and the Senator from Wisconsin have in mind, and compel the leasing of a very large area at a time when it would be improvident to do so.

Mr. LA FOLLETTE. I should like to suggest to the Senator that if such a situation did arise, Congress prior to April 8, 1936, could pass legislation to remedy the situation.

Mr. ROBINSON of Arkansas. If Congress happened to be in session and the situation came to its knowledge.

Mr. LA FOLLETTE. It seems to me that if we had a continued overproduction for such a long period of time it would certainly be brought to the attention of Congress. Personally I will say that I should have no objection to removing that terminal date; but inasmuch as that was in the act originally passed by Congress it was thought by the committee that Congress probably would not desire to change the final date upon which all of these lands are to be offered for lease.

Mr. ROBINSON of Arkansas. It would appear that there is ample time to make any further amendment that Congress might desire to make, so I offer no objection to the consideration of the bill.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

BOUNDARY BETWEEN UNITED STATES AND MEXICO

The bill (S. 2534) authorizing the appropriation of $65,000 to be expended by the American section, International Boundary Commission, United States and Mexico, for the purpose of making a survey to fix the boundary between the United States and Mexico, between El Paso, Tex., and Fort Quitman, Tex., and for other purposes, was announced as next in order.

Mr. SHEPPARD. Mr. President, a House bill carrying this appropriation has been enacted into law. I move, therefore, that the Senate bill be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

PAYMENT TO CERTAIN GERMAN NATIONALS

The bill (S. 2549) providing for payment to the German Government of $461.59 in behalf of the heirs or representatives of the German nationals, John Adolf, Hermann Pegel, Franz Lipfert, Albert Wittenburg, Karl Behr, and Hans Dechantsreiter, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That there is hereby authorized to be paid to the German Government, out of any money in the Treasury not otherwise appropriated, the sum of $461.59 for the heirs or representatives of the German nationals, John Adolf, Hermann Pegel, Franz Lipfert, Albert Wittenburg, Karl Behr, and Hans Dechantsreiter, who lost their lives while in the status of seamen in the American merchant marine; the above sum of $461.59 having been covered into the general fund of the Treasury Department as required by the statutes relating to the disposition of effects and unpaid wages of deceased seamen on the American vessels.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SECOND PAN AMERICAN CONFERENCE ON HIGHWAYS

The joint resolution (S. J. Res. 30) to provide for the expenses of participation by the United States in the Second Pan American Conference on Highways at Rio de Janeiro was considered as in Committee of the Whole, and was read, as follows:

Resolved, etc., That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $15,000 for the expenses of participation by the United States in the Second Pan American Conference on Highways at Rio de Janeiro, including the compensation of employees, transportation, subsistence, or per diem in lieu of subsistence (notwithstanding the provisions of any other act), including expenses of delegates in visiting Colombia and Venezuela in connection with the conference, and such miscellaneous and other expenses as the President shall deem proper.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

VIEWS OF GOVERNOR FULLER ON PRESIDENTIAL CANDIDATES

Mr. HEFLIN. Mr. President, the Washington Post of yesterday morning and the Washington Star of yesterday afternoon both carried and gave prominence to an Associated Press dispatch from Boston, Mass., quoting from a speech made the night before by the Republican Governor of Massachusetts, Governor Fuller.

In that speech the Republican governor expressed, in a feeble way, the opinion that Hoover will be nominated for President by the Republicans. And then, under the hypnotic spell of the Roman Catholic political machine, which has secretly aided him politically in Massachusetts, he boosted Al Smith for the Democratic nomination for President.

This Republican Governor of Massachusetts was not content to pick out and boost a Republican candidate for President. Oh, no. He merely mentioned Hoover in leading up to what he was told to say, and then he went into ecstasies over Al Smith, the Tammanyite and wet nullifier of New York. And, strange to say, in order to aid the candidate of Rome's political machine, this Republican Governor of Massachusetts expressed the opinion that if Hoover is not nominated Al Smith will be elected.

What influence is it that has caused this Republican Governor of Massachusetts to so forget the proprieties of the occasion and employ his political voice and power to promote the candidacy of Tammany's Al Smith for the Democratic nomination for President?

But that is not all. Even the thought of Al Smith's failure to get the Democratic nomination fills the Republican Governor of Massachusetts with anger and indignation. Smiting hard the table in front of him with his fist, he predicted disaster to the Democratic Party if it failed to nominate Al Smith for President. Let me give you his exact language on this point:

If the Democrats do not nominate Al Smith, they had better disband or else reorganize the party as a free-trade council of the Ku-Klux Klan with TOM HEFLIN as head kleagle.

No doubt some Senators are wondering why this particular Republican governor is apparently so enthusiastic over Al Smith, the candidate of the Roman political machine, and why he takes a dig at me, the Protestant Senator who is vigorously opposing the nomination of Al Smith. The answer, in my opinion, is found in the fact that Governor Fuller's wife is a Roman Catholic. The history of the Old World is full of instances where Roman Catholic wives influenced their Protestant husbands in matters where the Roman Catholic machine was interested. The historian tells us that Porfirio Diaz made the Mexican constitution of 1857 a dead letter for 30 years under the influence of his Roman Catholic wife.

I bring this to the attention of the Senate and the country, because these Roman-inspired flings are frequently made at me by men who themselves claim to be Protestants. I expect to continue to do that, to show the connecting link and just what is back of these attacks.

In this instance my judgment is that a Roman Catholic priest wrote the speech that this Romanized millionaire, purse-proud Governor of Massachusetts repeated in Boston the other night.

I know this gentleman personally. I was in the House when he was a Member of Congress for one term, and, knowing him as I do, I must say that he has more money than sense.

Mr. WALSH of Massachusetts. Mr. President, I do not care to dignify by any extensive observations what has just been said by the Senator from Alabama with reference to the Governor of Massachusetts or his wife. I decline to associate my own or the religious views of others with my public service as a Senator of a sovereign State which protects the rights of all regardless of their religious worship. I happen to know both the governor and his wife personally and I can therefore speak of them from personal as well as official knowledge.

I know the Governor of Massachusetts—he is not of my political faith—to be a very conscientious, a very able, and a very progressive public servant. I doubt if we have ever had in Massachusetts a governor of any political party who has exercised more courage and more independently performed the exacting duties of his office than the present governor, Governor Fuller. His record, I can frankly say, has been very generally approved, regardless of politics. No governor has been or deserves to be more respected.

As to Mrs. Fuller's religion, I am not concerned any more than I am in the governor's religion. Whatever may be the religion of either of them, they are each worthy representatives of their religion. I do know Mrs. Fuller as a devoted mother and a lady possessed of charming personal qualities and of inestimable character. Neither Governor Fuller nor Mrs. Fuller, I am proud to say, is thought of in terms of religion in Massachusetts. Character and achievements, not financial resources or religious group support, have won for them the love and esteem of all classes and creeds.

Mr. GILLETT. Mr. President, I did not hear the first of the remarks of the Senator from Alabama, and I do not know upon what subject he was criticizing the Governor of Massachusetts. I heard only his last sentence, saying that Governor Fuller has more money than sense.

Mr. President, the Governor of Massachusetts has a large amount of money, all of which he earned himself, starting as a poor boy, and by great ability and thrift amassing his fortune. But, sir, while he started with vastly more sense than fortune, he has accumulated, with his fortune constantly increasing, sense and wisdom, and the Senator from Alabama is entirely mistaken in thinking that he has more money than sense. On the contrary, I am glad to avow my belief that while Governor Fuller has a large accumulation of money, he has a still larger accumulation of judgment and good sense.

INTERNATIONAL ASSOCIATION OF ROAD CONGRESSES

The PRESIDING OFFICER. The calendar will be proceeded with.

The joint resolution (S. J. Res. 31) to provide that the United States extend to the Permanent International Association of Road Congresses an invitation to hold the sixth session of the association in the United States, and for the expenses thereof, was considered as in Committee of the Whole and was read, as follows:

Resolved, etc., That the President be, and is hereby, authorized and requested to extend to the Permanent International Association of

Road Congresses an invitation to hold the sixth session of the association in the United States, either in 1929 or 1930, as the association may determine.

SEC. 2. That the sum of $25,000, or so much thereof as may be necessary, is hereby authorized to be appropriated for the expenses of such session, including printing of reports, compensation of employees, transportation, subsistence or per diem in lieu of subsistence (notwithstanding the provisions of any other act), and such expenses as may be actually and necessarily incurred by the Government of the United States by reason of such invitation in the observance of appropriate courtesies.

Mr. KING. Mr. President, I find two measures, providing for two appropriations, one for $15,000 and the other for $25,000, apparently covering Pan American road conferences. Is one of them for the purpose of paying the expenses of the next meeting in South America, and is the $25,000 now authorized to pay the expenses of the conference which is to be held a year after that in the United States?

Mr. PHIPPS. Mr. President, the Senator is correct as to the first measure. It authorizes an appropriation to pay the expenses of our delegates who will attend the conference in Rio de Janeiro, which was put off one year in order to allow the United States to be represented. The pending joint resolution authorizes an expenditure of $25,000 to entertain the delegates from these foreign countries in event they set their next meeting place in the United States. It may be that only a small portion of that amount would be used, but it is known that the automobile manufacturers of the United States, in the event that the conference is held here, will take the foreign delegates on an extended trip over our country. The purposes of the appropriation are set out in a communication which was presented with the House report on House Joint Resolution 107, which is a duplicate of the Senate joint resolution.

Mr. KING. Mr. President, will the Senator permit an interruption?

Mr. PHIPPS. Certainly.

Mr. KING. I was not objecting to the appropriation. I was wondering why, if the second conference is not to be held for perhaps two years, it was deemed necessary to make the appropriation now.

Mr. PHIPPS. It is an authorization in order that the invitations may be extended. The main purpose is to invite the foreign nations to hold their convention in the United States.

Mr. KING. I do not object.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ANNA FACEINA

The bill (S. 3062) for the relief of Anna Faceina, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Anna Faceina, of New York City, the sum of $5,000, in full settlement against the Government, as compensation for injuries sustained when run down by a United States mail wagon on August 20, 1920.

SEC. 2. That no part of the amount appropriated in this act in excess of 3 per cent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered or advances made in connection with said claim. Any person or persons violating the provisions of this act shall be deemed guilty of a misdemeanor, and upon conviction shall be fined in any sum not exceeding $1,000.

Mr. KING. What is the purpose of this measure?

Mr. COPELAND. It is for the relief of a little girl struck by a mail truck.

Mr. KING. Will not the Senator state the extent of the injuries?

Mr. COPELAND. The little girl lost one of her legs.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. WALSH of Massachusetts. Mr. President, calling attention to the bill which has just passed, in which the Senator from New York was interested, I would like to ask him if the Committee on Claims have considered the advisability of some general legislation to meet this class of cases. Cases where people are being struck by mail trucks are increasing in number steadily, and it seems to me there ought to be some way of handling such claims without having them brought before the Congress.

Mr. COPELAND. Mr. President, I think the Postmaster General should be asked to call the attention of the drivers of mail trucks to the necessity for greater care on their part. Those trucks are juggernauts, going through the cities, disregarding people, moving like express trains through the streets. The way they are run is an outrage. I have been wrought up about this matter for years, as I have seen the progress of these mail trucks through the cities. It is a thing which ought to be called to the attention of the Postmaster General. I shall be glad to join the Senator from Massachusetts in a general measure, in whose State is situated the great city of Boston, where the same situation must exist.

Mr. WALSH of Massachusetts. I am interested in many claims similar to the pending case. They take a great deal of time and trouble, and it seems to me there should be some general legislation covering that class of cases.

Mr. CARAWAY. Mr. President, will the Senator permit an interruption?

Mr. WALSH of Massachusetts. Certainly.

Mr. CARAWAY. The very matter about which the Senator inquires was the subject of a bill which came before the House to give the department power to settle controversies of this kind up to a certain amount. There was quite a difference of opinion on the subject, and the legislation failed, and so far as I know, there is no measure now pending looking to legislation to give the department power to settle such cases.

Mr. WALSH of Massachusetts. Did the Senator think well of that legislation?

Mr. CARAWAY. I can not say that I did. There has been so much departmental abuse and so much favoritism that I am sometimes reluctant to relieve Congress of the burden of looking into such cases, and seeing that something approximately just is done.

Mr. WALSH of Massachusetts. Could not some law be enacted giving such claimants the right to go before some court to determine the extent of the damages?

Mr. CARAWAY. That might be done.

Mr. BRUCE. Mr. President, in connection with the question asked by the Senator from Massachusetts, I believe that a statute has been passed in recent years allowing resort to the courts in cases of collision between private vessels and Government vessels. It seems to me that such a statute as the Senator from Massachusetts has in contemplation might well be enacted along the lines of the statute relating to collisions between vessels.

Mr. CARAWAY. If such a statute were enacted it would require either that everybody should bring a suit in the District of Columbia or the Government would find itself defending personal-injury cases in every court in the United States.

Mr. BRUCE. It would be in the Federal courts.

Mr. CARAWAY. I do not know that I should very seriously object to such a statute, but an act conferring upon the department the authority to be the sole judge of the right of the claimant to compensation does not appeal to me very much.

Mr. BRUCE. I think it would be very impolitic.

Mr. WALSH of Massachusetts. I think the objection of the Senator from Arkansas is well taken.

Mr. BRUCE. If we are looking in that direction, it seems to me the most we could do would be to give the head of the department authority to assent to the bringing of suits against the United States.

Mr. CURTIS. Mr. President, we have a unanimous-consent agreement to dispose of the calendar by 2 o'clock if possible. I hope that until that time Senators will not discuss matters which are not pending. I hope we may be able to get through with the call of the calendar by 2 o'clock.

Mr. BAYARD. Mr. President, I want to suggest to the Senator from Massachusetts a very interesting fact, and that is that the other day the House passed a bill to remedy the situation with reference to the careless driving of Government trucks. Such matters are given into the hands of the department with a limitation of $5,000, and they can make settlement with the right to subrogate the injured person's claim to the Government, the Government to have the right to sue upon that subrogated claim.

Mr. WALSH of Massachusetts. I am very glad to have that information.

Mr. KING. I desire to say in this connection that at the last session of Congress a subcommittee was appointed by the Committee on the Judiciary, of which I was a member and former Senator Cummins was a member, to confer with a like subcommittee which might be appointed by the Committee on Claims to consider the entire subject. There was a contrariety of views. Some Senators believed it was unwise to permit the Federal Government to be sued in every court in the United States for tort. Some felt that perhaps a general statute might be provided to deal with questions of tort and questions of contract, and so on. The upshot was that no legislation was enacted because of the diversity of views.

I confess that I look with a good deal of reluctance upon the enactment of a statute permitting the sovereign to be sued for torts. Under the common law that is not proper. In many States the State can not be sued. Some States may have permitted suits by municipalities. At any rate, the subject is an open one and should receive consideration.

Mr. CURTIS. Mr. President, a question of order.

The PRESIDING OFFICER. The Senator will state it.

Mr. CURTIS. Is there not a limit on debate?

The PRESIDING OFFICER. The Chair understands that we are proceeding under the five-minute rule.

Mr. CURTIS. I call for the regular order.

The PRESIDING OFFICER. The regular order is called for.

Mr. BAYARD. Mr. President, I have a right to speak on anything I want to as long as I do not speak longer than five minutes.

The PRESIDING OFFICER. The Chair thinks the Senator from Delaware is entitled to five minutes under the rule.

Mr. BAYARD. I want to reply to the remarks of the Senator from Utah. It is true that there were subcommittees appointed by the Judiciary Committee and by the Committee on Claims, but I want to say something further, and that is that there never was a meeting of those two subcommittees. I happened to be on the subcommittee of the Committee on Claims, and I know I went to former Senator Means time after time, he being the chairman of the committee and the chairman of our subcommittee. We were never able to get together for consultation with the subcommittee of the Judiciary Committee. I am very frank to say—and I think the Senator from Utah will agree with me—that all these discussions took place in the subcommittee of the Committee on the Judiciary and never got to the Committee on Claims.

Mr. KING. The discussions that were had were had with Senator Means.

Mr. BAYARD. But not with the Claims Committee.

Mr. KING. I understand.

Mr. BRUCE. Mr. President, I simply desire to make the suggestion, apropos of what the Senator from Utah has said, that there might be a special Federal tribunal provided to pass on these questions, a special Federal board of some sort.

Mr. KING. That might be a good idea.

The PRESIDING OFFICER. The clerk will state the next bill on the calendar.

HERMAN SHULOF

The bill (S. 3066) for the relief of Herman Shulof was considered as in Committee of the Whole.

The bill had been reported from the Committee on Claims, with an amendment, on page 1, line 9, to strike out "who was thereafter, on June 2, 1919, a few days after his arrival at Atlanta prison, pardoned by the President," and insert in lieu thereof "subsequently pardoned by President Wilson," so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $10,000 to Herman Shulof, of New York City, which sum was paid by him to the United States by reason of the forfeiture of the bail bond of William Kahn, who was afterwards taken into custody and convicted, but subsequently pardoned by President Wilson.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PAY OF FILIPINOS, NATIONAL GUARD OF HAWAII

The bill (S. 2007) to authorize the Secretary of War to pay officers and Filipinos formerly enlisted as members of the National Guard of Hawaii for field and armory training during years 1924 and 1925, and to validate payments for such training heretofore made, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Military Affairs with an amendment, on page 1, line 6, to strike out "$3,000" and insert in lieu thereof "$4,000," so as to make the bill read:

Be it enacted, etc., That the Secretary of War is hereby authorized to cause to be paid, from the whole sum appropriated for the support of the National Guard for the fiscal year 1928, a sum not to exceed $4,000, to pay officers of the Hawaiian National Guard and Filipinos who were formerly duly enlisted as members of the Hawaiian National Guard, for field and armory training during the years 1924 and 1925, and for which training they have not been paid because the enlisted Filipinos were not citizens of the United States, as required by sections 57 and 58 of the national defense act, as amended. All such payments heretofore made to officers and enlisted men of the Hawaiian National Guard are hereby validated.

The amendment was agreed to.

Mr. KING. Mr. President, I would like to ask the Senator from Connecticut [Mr. BINGHAM] whether this measure meets the approval of the Resident Commissioners from the Philippine Islands?

Mr. BINGHAM. Does not the Senator mean the Delegate from the Hawaiian Islands?

Mr. KING. It refers to officers of the Hawaiian National Guard and Filipinos.

Mr. BINGHAM. The Senator will realize that there are 50,000 Filipinos living in the Hawaiian Islands. During the World War a number of them served in the Army of the United States. After the World War a number of them desired to enlist in the National Guard of the Territory of Hawaii and it was supposed that Filipinos might so enlist. It was later discovered that since no Filipino born away from American territory can become a citizen of the United States, they could not be properly enlisted. In the meantime some 700 had served and had performed their duties, and it is the desire of the Hawaiian government that they shall be permitted to be paid.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

FRANK HANLEY

Mr. COPELAND. Mr. President, I ask unanimous consent to return to calendar 261. The Senator from Maryland [Mr. BRUCE] has very kindly withdrawn his objection.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 802) for the relief of Frank Hanley, and it was read, as follows:

Be it enacted, etc., That in the administration of laws conferring rights and privileges upon honorably discharged soldiers or sailors, Frank Hanley shall be held to have been honorably discharged from the naval service as a landsman on board the U. S. S. *Yantic* on November 20, 1865: *Provided*, That no back pay, compensation, or other benefit shall accrue prior to the passage of this act.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CONQUEST OF NORTHWEST TERRITORY BY GENERAL CLARK

The joint resolution (S. J. Res. 23) providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by Gen. George Rogers Clark and his army, and authorizing an appropriation for the construction of a permanent memorial of the Revolutionary War in the West, and of the accession of the old Northwest to the United States on the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779, was announced as next in order.

Mr. KING. Mr. President, this is a very important measure, and I know some observations are to be made upon it by the able Senator from Indiana [Mr. WATSON]. Of course, he would like to make them now and there will perhaps be some reply. Under the five-minute rule I think we could not dispose of the joint resolution.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator withhold his objection for a moment?

Mr. KING. Certainly.

Mr. ROBINSON of Arkansas. The joint resolution is designed to commemorate the services of one of the outstanding figures in American history, to memorialize permanently one of the large movements which resulted in the contribution of a vast domain to the territory of the United States. I am in hearty sympathy with the purposes of the joint resolution. I hope it may be found consistent to give it consideration and to pass it.

The PRESIDING OFFICER. Is there objection?

Mr. KING. I dislike very much to object. I have opposed all such appropriations. When I was in the House years ago I opposed and voted against the appropriation of $5,000,000 for the St. Louis Exposition.

Mr. WATSON. Mr. President, I have no desire to ask the Senator from Utah to swerve from the path of duty as he sees it for this purpose, but after all the marvelous achievements of George Rogers Clark have never been fittingly recognized nor has he ever been adequately honored. I think it is altogether appropriate that the joint resolution should pass in order that this memorial may be erected in his honor and in memory of the marvelous achievements of George Rogers Clark.

Mr. KING. I find an appropriation for $250,000, just for entertainment, practically. If it were merely to erect a memorial I should have no objection; but it is more than that.

Mr. WATSON. It is to embody a feature, I will say to my friend, which will correctly portray and bring to the view of the people who will go there the early history of the United States. The value of teaching that history to the youth of the country at this particular time I think will address itself to the Senator from Utah. If that is the only feature to which the Senator objects, I think he very readily will withdraw his objection if he will think about it for a little while.

Mr. BRUCE. Mr. President, I hope that the Senator from Utah will allow me to add my request that he withdraw his objection. As we all know, there are very few figures in American history lit up with such luster as that of George Rogers Clark, a man whose heroic enterprise gave to this country nothing less than a great empire. John Randolph of Roanoke said of him that he was the "Hannibal of the West." The State of Virginia, duly conscious of the fact that he was one of her native sons, has already, through one of its generous citizens, Mr. McIntyre, of Charlottesville, erected a beautiful monument to him in that town. It does seem to me that if there is anything in our history which is worthy of commemoration, the exploits of this military hero are. If the Senator from Utah objects to the bill for some secondary reason, the joint resolution might well be amended to meet such an objection, but I do trust that the principal object of the measure may be carried into effect.

Mr. HARRISON. Mr. President, may I ask the Senator from Indiana a question?

Mr. WATSON. Certainly.

Mr. HARRISON. The proposed celebration is to take place in 1929, is it not?

Mr. WATSON. Yes.

Mr. HARRISON. In order to enable the Government to participate, the legislation must be enacted at a very early date, must it not?

Mr. WATSON. It must be.

Mr. HARRISON. I hope the Senator from Utah will be good enough to withdraw his objection.

Mr. SWANSON. Mr. President, I appeal to the Senator from Utah to withdraw his objection. All historians concur in the view that one of the most heroic incidents in the Revolution was the venture of George Rogers Clark with his company of Virginians, added to by men from Indiana and Kentucky, who captured the West. It was understood at the time that when a treaty of peace was concluded provision relative to the territorial possession of the West should be made in the same instrument. Recognizing this achievement, the people of Virginia have commemorated the event in a proper and fitting manner.

There is no doubt in my mind that if the courage and endurance and military skill displayed by George Rogers Clark had been displayed in that age in behalf of any other nation, there would have been a fitting commemoration of it 50 years ago to honor the man and his heroic actions and the splendid results which he gained. He was heroic; he achieved splendid results. The great West was made a part of this country as a result of the valor and foresight of George Rogers Clark.

I do hope the Senator from Utah, when he applies his theory of economy, will not apply it where sentiment, gratitude, and heroism are all involved.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

Mr. KING. Mr. President, the eloquent appeals which have been made by learned Senators and historians of course are exceedingly moving. Everyone who pretends to any knowledge of American history is familiar with the great achievements of the person who is to be honored in this memorial. I shall be very glad to see some proper memorial to the honor of George Rogers Clark, because we know of the great contribution he made to the development of our country and to the settlement not only of Indiana and that vicinity, but of the territories beyond.

But I have always felt that the large appropriations so often made for expositions and kindred movements have been largely wasted, and I have never been in favor of them. If this were only for a memorial there would not be so much objection. I would like to ask the Senator what the State of Indiana is contributing to this memorial, or whether she is seeking to have the Federal Government undertake the entire burden, and whether the $250,000 is all that is to be contributed by the Federal Government?

Mr. WATSON. The State of Indiana contributes fully $750,000 to the entire enterprise.

Mr. KING. Why is the Federal Government asked to pay so much more, and particularly the $250,000 for expenses?

Mr. WATSON. Solely in order that the thing may be done as it ought to be done, in a national way; that is all.

Mr. KING. That is not a very satisfactory answer.

Mr. WATSON. I think it is, because it requires money properly to carry out such a project. It is to be a national memorial, I will say to my friend, for, if he is familiar with the history—and I take it for granted that he is—of that whole western section of the country, he can not fail to recognize the tremendous service rendered by this heroic man at that particular crucial time in the history of our early days. In all respects the memory of George Rogers Clark should be honored by this kind of memorial in which the Nation participates.

Mr. KING. Mr. President, so many appeals have been made that I find my fortitude yielding. I withdraw the objection, but shall vote against the joint resolution.

Mr. WATSON. I thank the Senator from Utah and all the other Senators.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution, which had been reported from the Committee on the Library with amendments.

The first amendment was, on page 4, section 3, line 6, after the numeral "3," to strike out "It is further provided that the appropriations hereby authorized" and to insert "Such authorization of appropriation," so as to make the section read:

SEC. 3. Such authorization of appropriation is made on condition that the State of Indiana shall provide the site for such permanent memorial, and that full, complete, and absolute title to the land so provided shall be vested in the State of Indiana, free and clear of all liens and encumbrances, and that the State of Indiana shall assume, without expense to the Federal Government, the perpetual care and maintenance of said site and memorial constructed thereon, after such memorial shall have been constructed and after completion of the celebration herein provided.

The amendment was agreed to.

The next amendment was, on page 4, section 4, line 17, after the numeral "4," to strike out "Be it further provided that before" and to insert the word "Before"; and in line 18, after the word "herein," to insert "authorized to be," so as to make the section read:

SEC. 4. Before any of the funds herein authorized to be appropriated shall be expended, the George Rogers Clark Memorial Commission, of the State of Indiana, shall submit all plans and designs to the national Commission of Fine Arts, in accordance with existing statutory requirements governing said commission.

The amendment was agreed to.

The next amendment was, on page 4, section 5, line 25, after the name "Indiana," to insert "and approved by the Secretary of the Treasury," so as to make the section read:

SEC. 5. When such plans and designs have been adopted by the George Rogers Clark Memorial Commission, of Indiana, and approved by the Secretary of the Treasury, the appropriation herein authorized shall be paid by the Treasurer of the United States to the treasurer of the State of Indiana as the work progresses upon the presentation of proper requisitions by the treasurer of the State of Indiana, who shall receive the same and pay it out for the purposes herein designated.

The amendment was agreed to.

The next amendment was, on page 5, after line 6, to insert a new section, as follows:

SEC. 6. The Secretary of the Treasury shall represent the Federal Government in the construction of said memorial. The supervising architect to be selected by the George Rogers Clark Memorial Commission shall consult and advise with the said Secretary, and the said Secretary shall examine and approve all contracts for the construction of said memorial, and the construction of any work paid for in whole or in part by the funds herein authorized to be appropriated out of the Treasury of the United States. No funds herein authorized to be appropriated shall be expended without the approval of the plans and contracts by the Secretary of the Treasury, and no contracts shall be in excess of the appropriations herein authorized and authorized by the State and local authorities. Said Secretary shall at all times have full and free access to all books, records, and accounts of the George Rogers Clark Memorial Commission for the purpose of ascertaining whether or not the funds appropriated by the Federal Government are being expended for the purposes herein set forth, and in accordance with the provisions of the act of the General Assembly of the State of Indiana, approved February 23, 1927, entitled "An act providing for the acquisition of land, the construction and establishment of the George Rogers Clark memorial thereon, and creating the George Rogers Clark Memorial Commission, and prescribing its rights, powers, and

duties, fixing a tax levy, and making an appropriation, providing for the acceptance and expenditure of Federal funds, and prescribing the duties of the department of conservation, prescribing penalties, and declaring an emergency."

The amendment was agreed to.

The next amendment was, on page 6, line 12, after "Sec." to strike out the numeral "6" and to insert the numeral "7"; and in the same line to strike out the words "It is further provided that no" and to insert "No," so as to make the section read:

SEC. 7. No fee or charge of any character shall be imposed or made for the admission to or for the privilege of witnessing any of the celebrations or exhibitions held in 1929 and 1930, paid for in whole or in part by the appropriation herein provided, but such celebrations or exhibitions shall be free to the visiting public.

The amendment was agreed to.

The next amendment was, on page 6, line 19, after "Sec." to strike out the numeral "7" and to insert the numeral "8"; and in the same line to strike out the words "It is further provided that if" and to insert the word "If," so as to make the section read:

SEC. 8. If any part of the appropriation hereby authorized is not expended for the purpose contemplated in this act, any balance or part thereof so remaining shall revert to the Federal Treasury.

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendments were concurred in.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

REIMBURSEMENT OF INDIANS OF FORT BELKNAP RESERVATION, MONT.

The bill (S. 2815) to reimburse certain Indians of the Fort Belknap Reservation, Mont., for part or full value of an allotment of land to which they were individually entitled was announced as next in order.

The PRESIDING OFFICER. The Chair invites the attention of the Senator from North Dakota [Mr. FRAZIER] to a communication from the House of Representatives, which he lays before the Senate and which will be read.

The CHIEF CLERK. The House of Representatives has passed the bill (H. R. 9994) to reimburse certain Indians of the Fort Belknap Reservation, Mont., for part or full value of an allotment of land to which they were individually entitled.

Mr. FRAZIER. Mr. President, the House bill is a companion bill to Senate bill 2815, with a slight amendment which was adopted on the floor of the House, but which does not change the meaning. The Interior Department approves of the amendment and makes no objection to it. I therefore move that the House bill, the title of which has just been read, be substituted for the Senate bill.

The PRESIDING OFFICER. Without objection, the House bill which has just been laid before the Senate will be substituted for Senate bill 2815. The Chair hears none.

Mr. FRAZIER. I now ask unanimous consent for the consideration of the House bill.

The bill (H. R. 9994) to reimburse certain Indians of the Fort Belknap Reservation, Mont., for part or full value of an allotment of land to which they were individually entitled, which was read the first time by its title and the second time at length, as follows:

Be it enacted, etc., That there is hereby authorized to be appropriated, from any funds in the Treasury of the United States not otherwise appropriated, the sum of $45,716.80 to reimburse the following-named Indians or their heirs, if deceased, in the amounts following their respective names as full compensation for the value of an allotment of land on the Fort Belknap Indian Reservation, Mont., to which they were individually entitled under the provisions of the act of March 3, 1921 (41 Stat. 1355): Richard O'Bryan, $1,516.80; Bessie O'Bryan Dohmeyer, $3,400; Eva O'Bryan, $3,400; Kate O'Bryan Wernicke, $3,400; Gerald O'Bryan, $200; Barbara E. O'Bryan, $200; John F. O'Bryan, $3,400; Rose Ellen O'Bryan, $3,400; Archie DuBoise, $1,600; Henry Bradley, $1,000; George Bradley, $1,600; William Bradley, $1,600; Josephine First Raised, $1,600; Mary First Raised, $1,600; Bryan First Raised, $800; Elizabeth Parker, $3,400; Charles W. Parker, $3,400; Ambrose Parker, $3,400; Darlene E. Parker, $3,400; Adell Strike, $200; Rosella O'Bryan, $1,600; Daisy Adams, $1,600: *Provided*, That the funds authorized to be appropriated hereby may be paid to the Indians in cash, or expended in the purchase of inherited or other trust lands within the Fort Belknap Reservation for which patents shall be issued of the same form as those held by other Indians of the reservation.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The PRESIDING OFFICER. Senate bill 2815 will be indefinitely postponed.

WITHDRAWAL OF WATER FROM WHITE RIVER, ARK.

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 1103) permitting the withdrawal of water from White River, Ark., which was read, as follows:

Be it enacted, etc., That a permit be, and the same is hereby, granted to Alvin V. Harris and John A. Welty to withdraw from White River, Ark., at a point about half a mile above the point on said White River where the Rock Island Railroad crosses said stream, and near the town of De Valls Bluff, Ark., water from said White River sufficient to irrigate about 20,000 acres of rice land. The amount of water being necessary therefor and so to be withdrawn shall not exceed 500 cubic feet per second and is to be taken by pumping.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to, as follows:

Whereas it is necessary to irrigate the lands for the growing of rice; and

Whereas the lands of Prairie County, Ark., are exceptionally suited for the growing of that cereal; and

Whereas waters from wells are not as suitable for irrigation as those taken from streams; and

Whereas the cost of irrigation by wells is prohibitive in that section of Prairie County, Ark., in and near the town of De Valls Bluff; and

Whereas waters may be withdrawn from White River near this point without any injury to navigation: Now therefore,

OKFUSKEE COUNTY, OKLA.

The bill (H. R. 7011) to detach Okfuskee County from the northern judicial district of the State of Oklahoma and attach the same to the eastern judicial district of the said State was announced as next in order.

Mr. CARAWAY. By request, I ask that that bill be passed over.

The PRESIDING OFFICER. The bill will be passed over.

INTERNATIONAL PETROLEUM CO. (LTD.), OF TORONTO, CANADA

The bill (H. R. 8527) for the relief of the International Petroleum Co. (Ltd.), of Toronto, Canada, was considered as in Committee of the Whole.

The bill was read, as follows:

Be it enacted, etc., That the claim of the International Petroleum Co. (Ltd.), of Toronto, Canada, charterer of the tank steamer *Trontolite*, against the United States for damages alleged to have been caused by collision between said steamer *Trontolite* and the United States Navy submarine O-2 at Cristobal, Canal Zone, on November 30, 1918, may be determined in a suit to be brought by said claimant against the United States in the United States District Court for the Southern District of New York, sitting as a court of admiralty and acting under the rules governing such court in admiralty cases, and that said court shall have jurisdiction to hear and determine said suit and to enter a judgment or decree for the amount of such damages and costs, if any, as shall be found due from the United States to the said International Petroleum Co. (Ltd.) by reason of said collision upon the same principles and under the same measures of liability as in like cases between private parties, and with the same rights of appeal: *Provided*, That such notice of the suit shall be given to the Attorney General of the United States as may be provided by order of the said court, and upon such notice it shall be the duty of the Attorney General to cause the United States attorney in such district to appear and defend for the United States: *Provided further*, That such suit shall be begun within four months of the date of the approval of this act.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

A. N. ROSS

The bill (S. 2424) for the relief of A. N. Ross was announced as next in order.

Mr. HOWELL. Let that bill go over.

Mr. KING. I move that the bill be indefinitely postponed.

The PRESIDING OFFICER. The question is on the motion of the Senator from Utah.

Mr. HOWELL. Mr. President, the Federal Trade Commission wishes to make certain representations with respect to this bill, and we have not had time to listen to their presentation. I suggest that the bill go over.

The PRESIDING OFFICER. The bill goes over under objection.

F. L. CAMPBELL

The bill (S. 2227) for the relief of F. L. Campbell was announced as next in order.

Mr. KING. Mr. President, will the Senator from Kansas [Mr. CURTIS], who introduced this bill, make an explanation of it?

Mr. CURTIS. Mr. President, this bill is for the relief of the clerk of the United States District Court of Kansas. Five hundred dollars was turned over to him, which he supposed was to be considered as a bond for the appearance of a defendant. The defendant failed to appear within the time fixed by the court, and the clerk turned the money over to the Treasury of the United States. Afterwards the judge of the court held that the money was not deposited as a bond with a fixed date, but simply deposited to be returned upon the appearance of the defendant. Later on the defendant appeared and the clerk had to pay back the $500. This money having been turned into the Treasury he could get no credit for it. Therefore he asks for the passage of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to F. L. Campbell, clerk of the United States District Court for the District of Kansas, the sum of $500, being the amount erroneously deposited by him to the credit of the Treasurer of the United States and since covered into the Treasury, as proceeds of a forfeited bond, such sum in fact representing a cash bond given by George Orr for his appearance before the district court, and subsequently refunded to the bondsman by said F. L. Campbell under order of the court.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

THE L. P. ANDREWS CORPORATION

The bill (S. 2644) to carry out the findings of the Court of Claims in the case of the P. L. Andrews Corporation was considered as in Committee of the Whole. The bill was read as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $9,672.39 to the P. L. Andrews Corporation, being the damage and loss incurred and suffered by said corporation in complying with United States Navy commandeer order No. N-3255, dated June 18, 1918, as found by the Court of Claims and reported in Senate Document No. 38, Seventieth Congress, first session.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

FIDELITY & DEPOSIT CO. OF MARYLAND

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 5925) for the relief of the Fidelity & Deposit Co. of Maryland, which was read, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to redeem, without interest, in favor of the Fidelity & Deposit Co. of Maryland, 4½ per cent United States Treasury certificates of indebtedness Nos. 9415 and 9416, in the denomination of $500 each, and Nos. 18067, 18068, and 18069, in the denomination of $1,000 each, series TD-1922, issued December 15, 1921, matured December 15, 1922; also to redeem without interest 3¾ per cent United States Treasury certificates of indebtedness Nos. 1048 and 1049, in the denomination of $500 each, series TJ-1923, issued June 15, 1922, matured June 15, 1923; the said certificates having been lost, stolen, or destroyed: *Provided,* That the said certificates of indebtedness shall not have been previously presented and paid: *And provided further,* That the said Fidelity & Deposit Co. of Maryland shall first file in the Treasury Department a bond in the penal sum of double the amount of the principal of said certificates of indebtedness in such form and with such sureties as may be acceptable to the Secretary of the Treasury to indemnify and save harmless the United States from any loss on account of the lost, stolen, or destroyed certificates of indebtedness herein described.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PROPOSED AMENDMENT OF INTERSTATE COMMERCE ACT

The bill (S. 656) to amend section 15a of the interstate commerce act, as amended, was announced as next in order.

Mr. METCALF. Let that bill go over.

Mr. KING. Mr. President, that bill is one of very great importance. I should be very glad if some day could be fixed for its consideration. The eminent Senator from Nevada [Mr. PITTMAN] I know has been very diligent in trying to secure consideration of the measure, and I hope that at an early date the Senate may take up the measure, listen to the Senator from Nevada, and then pass the bill.

Mr. PITTMAN. Mr. President, the Senator from Rhode Island [Mr. METCALF] is not opposed to the bill. He saw me before we met to-day and said that he desired it to go over because he has an amendment to it which he desires to prepare but has not as yet prepared. I am trusting to the generosity of the Senate to return to this bill and consider it as soon as the Senator from Rhode Island shall have prepared his amendment. This bill has been twice reported favorably by the Committee on Interstate Commerce, and I am satisfied that there will be very little debate on it.

The PRESIDING OFFICER. The bill will be passed over.

LANGIN FIELD, MOUNDSVILLE, W. VA.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 482) to provide relief for the victims of the airplane accident at Langin Field, Moundsville, W. Va., which was read, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and directed to make a thorough investigation of the merits of the claims which have been submitted to the War Department in writing, for compensation for property damage, death, or personal injury alleged to have been caused by the airplane accident at Langin Field, Moundsville, W. Va., on July 10, 1921, and to transmit each such claim with supporting papers and a report of his finding of facts and recommendations thereon to the Comptroller General of the United States for submission to the Congress with his recommendations thereon: *Provided,* That claims on account of disability or death resulting from personal injury sustained in said accident by persons not officers or employees of the United States shall not be recommended hereunder for persons or in amounts which would not be allowable under the United States employees' compensation act if the individual killed or injured were an employee of the United States: *Provided further,* That the report to be made hereunder shall contain a brief statement of the character and justice of each claim so certified, the amount claimed, and the amount found due.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

OHIO RIVER BRIDGES

Mr. FESS. Mr. President, I will ask to have go over the next two bills on the calendar, being the bill (S. 1170) granting the consent of Congress to the Maysville Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River, and the bill (S. 761) granting the consent of Congress to Dwight P. Robinson & Co. (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River. There is a question involved as to the two companies interested in the matter getting together. The Senator from Kentucky [Mr. SACKETT] spoke to me and requested that the two bills go over for the present.

The PRESIDING OFFICER. Without objection, the two bills indicated by the Senator from Ohio will go over without prejudice.

TENNESSEE RIVER BRIDGE

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 1410) granting the consent of Congress to Midland Bridge Co. (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge across the Tennessee River, which was read, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to Midland Bridge Co. (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Tennessee River at a point suitable to the interests of navigation and within two miles of where Clarks River empties into the Tennessee River, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon Midland Bridge Co. (Inc.), its successors and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches and terminals, as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of

such State, and the proceedings therefor shall be the same as in the condemnation and expropriation of property in such State.

SEC. 3. The said Midland Bridge Co. (Inc.), its successors and assigns, is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. After the completion of such bridge, as determined by the Secretary of War, the State of Kentucky, or any political subdivision of said State, within or adjoining which any part of such bridge is located, or both of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches, and any interest in real property necessary therefor, by purchase or by condemnation in accordance with the laws of such State governing the acquisition of private property for public purposes by condemnation. If at any time after the expiration of 20 years after the completion of such bridge the same is acquired by condemnation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value, (2) the actual cost of acquiring such interest in real property, (3) actual financing and promotion cost, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interest in real property, and (4) actual expenditures for necessary improvements.

SEC. 5. If such bridge shall be taken over or acquired by the State or political subdivision thereof as provided in section 4 of this act, and if tolls are charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the cost of maintaining, repairing, and operating the bridge and its approaches, to pay an adequate return on the cost thereof, and to provide a sinking fund sufficient to amortize the amount paid therefor as soon as possible under reasonable charges, but within a period of not to exceed 20 years from the date of acquiring the same. After a sinking fund sufficient to pay the cost of acquiring the bridge and its approaches shall have been provided, such bridge shall thereafter be maintained and operated free of tolls, or the rate of tolls shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper care, repair, maintenance, and operation of the bridge and its approaches. An accurate record of the amount paid for acquiring the bridge and its approaches, the expenditures for operating, repairing, and maintaining the same, and of the daily tolls collected shall be kept, and shall be available for the information of all persons interested.

SEC. 6. Midland Bridge Co. (Inc.), its successors and assigns, shall within 90 days after the completion of such bridge file with the Secretary of War a sworn itemized statement showing the actual original cost of constructing such bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, at any time within three years after the completion of such bridge, investigate the actual cost of constructing the same and for such purpose the said Midland Bridge Co. (Inc.), its successors and assigns, shall make available all of its records in connection with the financing and the construction thereof. The findings of the Secretary of War as to the actual original cost of the bridge shall be conclusive, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to Midland Bridge Co. (Inc.), its successors and assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

CUMBERLAND RIVER BRIDGES

The bill (S. 1406) granting the consent of Congress to Valley Bridge Co. (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge across the Cumberland River was considered as in Committee of the Whole.

The bill was read, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to Valley Bridge Co. (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Cumberland River at a point suitable to the interests of navigation, at or within 1 mile of the city or town of Canton, Ky., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon Valley Bridge Co. (Inc.), its successors and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches and terminals as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State and the proceedings therefor shall be the same as in the condemnation and expropriation of property in such State.

SEC. 3. The said Valley Bridge Co. (Inc.), its successors and assigns, is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. After the completion of such bridge, as determined by the Secretary of War, the State of Kentucky, or any political subdivision of said State, within or adjoining which any part of such bridge is located, or both of them jointly may at any time acquire and take over all right, title, and interest in such bridge and its approaches, and any interest in real property necessary therefor, by purchase or by condemnation in accordance with the laws of such State governing the acquisition of private property for public purposes by condemnation. If at any time after the expiration of 20 years after the completion of such bridge the same is acquired by condemnation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value, (2) the actual cost of acquiring such interest in real property, (3) actual financing and promotion cost, not to exceed 10 per cent of the sum of cost of constructing the bridge and its approaches and acquiring such interest in real property, and (4) actual expenditures for necessary improvements.

SEC. 5. If such bridge shall be taken over or acquired by the State or political subdivision thereof as provided in section 4 of this act, and if tolls are charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the cost of maintaining, repairing, and operating the bridge and its approaches, to pay an adequate return on the cost thereof, and to provide a sinking fund sufficient to amortize the amount paid therefor as soon as possible under reasonable charges, but within a period of not to exceed 20 years from the date of acquiring the same. After a sinking fund sufficient to pay the cost of acquiring the bridge and its approaches shall have been provided, such bridge shall thereafter be maintained and operated free of tolls, or the rate of tolls shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper care, repair, maintenance, and operation of the bridge and its approaches. An accurate record of the amount paid for acquiring the bridge and its approaches, the expenditures for operating, repairing, and maintaining the same, and of the daily tolls collected shall be kept and shall be available for the information of all persons interested.

SEC. 6. Valley Bridge Co. (Inc.), its successors and assigns, shall within 90 days after the completion of such bridge file with the Secretary of War a sworn itemized statement showing the actual original cost of constructing such bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, at any time within three years after the completion of such bridge, investigate the actual cost of constructing the same, and for such purpose the said Valley Bridge Co. (Inc.), its successors and assigns, shall make available all of its records in connection with the financing and the construction thereof. The findings of the Secretary of War as to the actual original cost of the bridge shall be conclusive, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to Valley Bridge Co. (Inc.), its successors and assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill granting the consent of Congress to Valley Bridge Co. (Inc.), of Paducah,

Ky., its successors and assigns, to construct, maintain, and operate a bridge across the Cumberland River, at or within 1 mile of Canton, Ky."

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 1407) granting the consent of Congress to Valley Bridge Co. (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge across the Cumberland River, which was read, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to Valley Bridge Co. (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Cumberland River at a point suitable to the interests of navigation, within 1 mile of the city or town of Iuka, Ky., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon Valley Bridge Co. (Inc.), its successors and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches and terminals as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation and expropriation of property in such State.

SEC. 3. The said Valley Bridge Co. (Inc.), its successors and assigns, is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. After the completion of such bridge, as determined by the Secretary of War, the State of Kentucky, or any political subdivision of said State within or adjoining which any part of such bridge is located, or both of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches, and any interest in real property necessary therefor, by purchase or by condemnation in accordance with the laws of such State governing the acquisition of private property for public purposes by condemnation. If at any time after the expiration of 20 years after the completion of such bridge the same is acquired by condemnation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value, (2) the actual cost of acquiring such interest in real property, (3) actual financing and promotion cost not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interest in real property, and (4) actual expenditures for necessary improvements.

SEC. 5. If such bridge shall be taken over or acquired by the State or political subdivision thereof as provided in section 4 of this act, and if tolls are charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the cost of maintaining, repairing, and operating the bridge and its approaches, to pay an adequate return on the cost thereof, and to provide a sinking fund sufficient to amortize the amount paid therefor as soon as possible under reasonable charges, but within a period of not to exceed 20 years from the date of acquiring the same. After a sinking fund sufficient to pay the cost of acquiring the bridge and its approaches shall have been provided, such bridge shall thereafter be maintained and operated free of tolls, or the rate of tolls shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper care, repair, maintenance, and operation of the bridge and its approaches. An accurate record of the amount paid for acquiring the bridge and its approaches, the expenditures for operating, repairing, and maintaining the same, and of the daily tolls collected shall be kept and shall be available for the information of all persons interested.

SEC. 6. Valley Bridge Co. (Inc.), its successors and assigns, shall within 90 days after the completion of such bridge file with the Secretary of War a sworn itemized statement showing the actual original cost of constructing such bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, at any time within three years after the completion of such bridge, investigate the actual cost of constructing the same, and for such purpose the said Valley Bridge Co. (Inc.), its successors and assigns, shall make available all of its records in connection with the financing and the construction thereof. The findings of the Secretary of War as to the actual original cost of the bridge shall be conclusive, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to Valley Bridge Co. (Inc.), its successors and assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill granting the consent of Congress to Valley Bridge Co. (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge across the Cumberland River, within 1 mile of Iuka, Ky."

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 1408) granting the consent of Congress to Midland Bridge Co. (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge across the Cumberland River, which was read, as follows:

Be it enacted, etc., That the consent of Congress is hereby granted to Midland Bridge Co. (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Cumberland River at a point suitable to the interests of navigation at or within 2 miles of the city of Smithland, Ky., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon Midland Bridge Co. (Inc.), its successors and assigns, all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, operation, and maintenance of such bridge and its approaches and terminals as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation and expropriation of property in such State.

SEC. 3. The said Midland Bridge Co. (Inc.), its successors and assigns, is hereby authorized to fix and charge tolls for transit over such bridge, and the rates of toll so fixed shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. After the completion or such bridge, as determined by the Secretary of War, the State of Kentucky, or any political subdivision of said State, within or adjoining which any part of such bridge is located, or both of them jointly, may at any time acquire and take over all right, title, and interest in such bridge and its approaches, and any interest in real property necessary therefor, by purchase or by condemnation, in accordance with the laws of such State governing the acquisition of private property for public purposes by condemnation. If at any time after the expiration of 20 years after the completion of such bridge the same is acquired by condemnation, the amount of damages or compensation to be allowed shall not include good will, going value, or prospective revenues or profits, but shall be limited to the sum of (1) the actual cost of constructing such bridge and its approaches, less a reasonable deduction for actual depreciation in value; (2) the actual cost of acquiring such interest in real property; (3) actual financing and promotion cost, not to exceed 10 per cent of the sum of the cost of constructing the bridge and its approaches and acquiring such interest in real property; and (4) actual expenditures for necessary improvements.

SEC. 5. If such bridge shall be taken over or acquired by the State or political subdivision thereof, as provided in section 4 of this act, and if tolls are charged for the use thereof, the rates of toll shall be so adjusted as to provide a fund sufficient to pay for the cost of maintaining, repairing, and operating the bridge and its approaches, to pay an adequate return on the cost thereof, and to provide a sinking fund sufficient to amortize the amount paid therefor as soon as possible under reasonable charges, but within a period of not to exceed 20 years from the date of acquiring the same. After a sinking fund sufficient to pay the cost of acquiring the bridge and its approaches shall have been provided, such bridge shall thereafter be maintained and operated free of tolls, or the rate of tolls shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper care, repair, maintenance, and operation of the bridge and its approaches. An accurate record of the amount paid for acquiring the bridge and its approaches, the expenditures for operating, repairing, and maintaining the same, and of the daily tolls collected shall be kept, and shall be available for the information of all persons interested.

SEC. 6. Midland Bridge Co. (Inc.), its successors and assigns, shall, within 90 days after the completion of such bridge, file with the Secretary of War a sworn itemized statement showing the actual original

cost of constructing such bridge and its approaches, the actual cost of acquiring any interest in real property necessary therefor, and the actual financing and promotion costs. The Secretary of War may, at any time within three years after the completion of such bridge, investigate the actual cost of constructing the same, and for such purpose the said Midland Bridge Co. (Inc.), its successors and assigns, shall make available all of its records in connection with the financing and the construction thereof. The findings of the Secretary of War as to the actual original cost of the bridge shall be conclusive, subject only to review in a court of equity for fraud or gross mistake.

SEC. 7. The right to sell, assign, transfer, and mortgage all the rights, powers, and privileges conferred by this act is hereby granted to Midland Bridge Co. (Inc.), its successors and assigns, and any corporation to which or any person to whom such rights, powers, and privileges may be sold, assigned, or transferred, or who shall acquire the same by mortgage foreclosure or otherwise, is hereby authorized and empowered to exercise the same as fully as though conferred herein directly upon such corporation or person.

SEC. 8. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill granting the consent of Congress to Midland Bridge Co. (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge across the Cumberland River at or within 2 miles of Smithland, Ky."

TENNESSEE RIVER BRIDGE

The bill (S. 1409) granting the consent of Congress to Valley Bridge Co. (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge across the Tennessee River was considered as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with amendments, in section 1, page 1, line 7, after the word "navigation," to insert "at or"; in line 8, after the word "Ferry," to strike out "across the Tennessee River" and insert "between Marshall and Trigg Counties, Ky.," so as to make the section read:

That the consent of Congress is hereby granted to Valley Bridge Co. (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Tennessee River at a point suitable to the interests of navigation at or within 2 miles of the present location of Eggners Ferry between Marshall and Trigg Counties, Ky., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906, and subject to the conditions and limitations contained in this act.

The amendments were agreed to.

The bill was reported to the Senate as amended and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PUEBLO INDIAN LANDS, NEW MEXICO

The bill (S. 1941) to provide for the acquisition of rights of way through the lands of the Pueblo Indians of New Mexico was announced as next in order.

Mr. BAYARD. Mr. President, at the request of the senior Senator from New Mexico [Mr. BRATTON] I ask that that bill go over.

The PRESIDING OFFICER. The bill will be passed over.

STANDARDIZATION OF HAMPERS, ETC.

The bill (S. 2148) to fix standards for hampers, round stave baskets, and splint baskets for fruits and vegetables, and for other purposes, was announced as next in order.

Mr. KING. I ask that the bill go over.

Mr. McNARY. Mr. President, will not the genial Senator from Utah permit me to make a statement occupying about one minute?

Mr. KING. I will be very glad to have the Senator speak for an indefinite period; I like to hear him talk.

Mr. McNARY. Mr. President, this bill is of great importance to the citizens and producers of the State of Utah, as well as to those of other States. The bill passed the Senate last year and passed the House on two former occasions. It simply attempts to standardize hampers and baskets used as containers for vegetables. It is similar to the act which was passed in 1916 to standardize the containers for small fruits.

The purpose of the bill is to prevent deception. Some hampers appear to contain as much as others, whereas, in fact, upon measurement that is not the case, although the eye is not able to detect the deception. It is merely for the purpose of making it possible for the consumer to pay for what he receives and receive that for which he pays. It has had the indorsement of all the consumers' leagues of the country, the producers' associations, and the Department of Agriculture; indeed, I do not know of a living soul, I may say to the Senator from Utah, who is opposed to this bill, unless it is some one—I will make it quite impersonal, of course—who is not familiar with it or who wishes to deceive the public in the sale of vegetables and fruit.

Mr. KING. Mr. President, a number of persons have spoken to me in regard to this bill. They felt that it was an interference with the rights of municipalities or States or individuals. It is designed to determine the kind of hampers or receptacles employed by them in shipping fruit. I have not had time to study the bill, and I will say frankly I am objecting because of the impression that I derived from the observations made by the persons to whom I have referred. I inquire, will this bill interfere with the utilization of any hamper or any sort of receptacle which any shipper of fruit or other goods or cereals may desire to provide?

Mr. McNARY. Only so far as the hampers are used in shipments in interstate commerce. Has the Senator received objections to the bill this year, or does he have in mind the bill that was prepared and brought up for consideration in Congress two years ago?

Mr. KING. I think it was about a year ago when the persons to whom I referred spoke to me.

Mr. McNARY. Perhaps so, but there has been no objection to this bill. The Senator from Mississippi [Mr. HARRISON] two years ago raised practically the same point that has been raised by the Senator from Utah, but upon further consideration his objections were removed. I am not asking the Senator to waive any privileges or rights he may have; but I had hoped that in the interest of a more certain container and to prevent the practice of deception we might pass the bill to-day.

Mr. KING. Will the Senator allow it to be temporarily laid aside? I shall be very glad, upon examination, to join the Senator in asking that it be considered.

Mr. McNARY. Yes; it is my desire to accommodate the Senator.

Mr. KING. I thank the Senator.

The PRESIDING OFFICER. The bill will be passed over.

CROP INSURANCE

The bill (S. 2149) authorizing and directing the Secretary of Agriculture to investigate all phases of crop insurance was announced as next in order.

Mr. KING. Mr. President, this bill seems to direct the Secretary of Agriculture to study and devise plans and methods for writing crop insurance and to publish information, and so on.

Mr. McNARY. Mr. President, if I may intrude my opinion here for a moment, I want this bill to go over for the time being, because it is one of the most worthy measures that has ever been before Congress or demanded its attention. It is so worthy, indeed, that I want to speak upon this important subject, and I am trying to get together some material. After I shall have done so, I think the Senate will have no objection to make.

The PRESIDING OFFICER. The bill will be passed over.

Mr. BRUCE. Mr. President, I should like to ask a question of the Senator from Oregon. I, myself, introduced in the Senate a bill of the same character, which was referred to the Committee on Agriculture and Forestry. I am a little curious to know how my name became lost in connection with the bill and a more important and influential name became associated with it. A few days ago I met the Senator, and he was so kind as to say that the bill which I had introduced in the Senate would in all probability meet with the favor of the committee, and I prided myself upon the fact that at last I seemed to be doing a little for the farmers. Now, I appear about to be despoiled of even the little credit that I had hoped to secure through that bill.

Mr. McNARY. Mr. President, perhaps if the Senator from Maryland were historically correct and familiar with the proceedings of Congress he would recall that in 1921 the then Vice President, Mr. Coolidge, appointed a committee of three to investigate the subject of crop insurance. It happened to fall to my lot to be chairman of that committee. We held hearings for a number of years; and this bill is the product of that work, which was started five or six or seven years ago. The Senator recently and handsomely introduced a resolution asking for certain statistics with respect to crop insurance, and embodying the essentials of the bill. I have referred that bill to the Secretary of Agriculture; and in due time—it is a proper bill, and does not in any way conflict with this bill—I intend to bring it out here on the floor with a favorable report and urge its passage.

Mr. BRUCE. I am very much obliged to the Senator for his explanation. It seems that I am not to be stripped altogether of my standing as a friend of the farmer.

GAME SANCTUARIES IN NATIONAL FORESTS

The bill (S. 2456) to establish game sanctuaries in the national forests was considered as in Committee of the Whole.

The bill had been reported from the Committee on Agriculture and Forestry with an amendment, on page 1, line 3, after the words "breeding places for," to strike out "game animals" and insert "game and fur-bearing animals, game birds and fish," so as to make the bill read:

Be it enacted, etc., That for the purpose of providing breeding places for game and fur-bearing animals, game birds and fish on lands in the national forests not chiefly suitable for agriculture, the President of the United States is hereby authorized, upon recommendation of the Secretary of Agriculture and with the approval of the State legislatures of the respective States in which said national forests are situated, to establish by public proclamation certain specified areas within said forests as game sanctuaries or refuges, which shall be devoted to the increase of game animals of all kinds naturally adapted thereto, but it is not intended that the lands included in such game sanctuaries or refuges shall cease to be parts of the national forests wherein they are located, and the establishment of such game sanctuaries or refuges shall not prevent the Secretary of Agriculture from permitting other uses of the national forests under and in conformity with the laws and the rules and regulations applicable thereto so far as such uses may be consistent with the purposes for which such game sanctuaries or refuges are authorized to be established.

SEC. 2. That when such game sanctuaries or refuges have been established as provided in section 1 of this act, hunting, pursuing, poisoning, killing, or capturing by trapping, netting, or any other means, or attempting to hunt, pursue, kill, or capture any wild animals for any purpose whatever upon the lands of the United States within the limits of said game sanctuaries or refuges shall be unlawful except as hereinafter provided, and any person violating any provision of this act or any of the rules and regulations made under the provisions of this act shall be deemed guilty of a misdemeanor and shall upon conviction in any United States court be fined in a sum of not exceeding ———, or imprisonment not exceeding six months, or both.

SEC. 3. That the Secretary of Agriculture shall execute the provisions of this act, and he is hereby authorized to make all needful rules and regulations for the administration of such game sanctuaries or refuges in accordance with the purpose of this act, including regulations not in contravention of State laws for hunting, capturing, or killing predatory animals, such as wolves, coyotes, foxes, pumas, and other species destructive to livestock or wild life or agriculture within the limits of said game sanctuaries or refuges.

Mr. JONES. Mr. President, I should like to have this bill explained by the Senator.

Mr. McNARY. Mr. President, it occurs to me that perhaps we should have the presence of the distinguished Senator from Arkansas [Mr. ROBINSON]. More than that, there are three bills somewhat similar, but still treating of a portion of the great problem now before the Senate. One is the migratory bird act, introduced by the Senator from South Dakota [Mr. NORBECK]. One is the bill for the creation of a game refuge in Bear River, Utah, to provide sanctuaries and places of rest for wild water fowl; and this bill is to conserve the wild life of the forests. All three bills appertain to the same subject matter in somewhat similar conditions and units. It has been suggested to me by the able Senator from Utah that perhaps all these measures should be considered at the same time, because they are related and interrelated. For that reason, without any advantage being taken of the status of this bill, I shall ask that it go over until the presence of the Senator from Arkansas is noted.

Mr. PITTMAN. Mr. President, there is just one thing to which I want to call attention. When the Senator from Arkansas returns he will very probably ask to recur to this bill, and I wish to say that I do not believe it to be wise to attempt to consider these bills together. This bill is a very simple one and will require no amendment, in my opinion, while the other bills undoubtedly will require amendment and discussion. There is no reason at all that I know of why, with the consent of the State and the Department of Agriculture, they should not use certain portions of the forests for game preserves; and that is all that this bill amounts to.

Mr. JONES. I am perfectly willing to have the bill passed over temporarily.

Mr. McNARY. Then, without prejudice, let it go over until the return to the floor of the Senator from Arkansas.

The PRESIDING OFFICER. The bill will be passed over, under objection.

HORTICULTURAL, ETC., WORK IN SOUTHERN GREAT PLAINS AREA

The bill (S. 2832) providing for horticultural experiment and demonstration work in the southern Great Plains area was considered as in Committee of the Whole.

The bill had been reported from the Committee on Agriculture and Forestry with amendments.

The first amendment was, in section 1, page 1, line 10, after the word "at," to strike out "one" and insert "or within reasonable proximity to one or more," so as to make the section read:

That the Secretary of Agriculture is hereby authorized and directed to cause such shade, ornamental fruit, and shelter belt trees, shrubs, and vines as are adapted to the conditions and needs of the southern Great Plains area, comprised of those parts of the States of Colorado, Nebraska, Kansas, Texas, Oklahoma, and New Mexico lying west of the ninety-eighth meridian and east of the 5,000-foot contour line, to be propagated at or within reasonable proximity to one or more of the existing field stations of the Department of Agriculture in such area, and seedlings and cuttings and seeds of such trees, shrubs, and vines to be distributed free of charge under such regulations as he may prescribe for experimental and demonstration purposes within such area.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. JONES. Mr. President, let us have some explanation of this bill.

Mr. KING. I should like some explanation of the bill.

The PRESIDING OFFICER. Does the Senator object?

Mr. KING. I do unless there is some explanation.

Mr. JONES. I desire to have some explanation of the bill in order that I may know whether to object or not.

The PRESIDING OFFICER. The Senator from Oklahoma [Mr. PINE], who introduced the bill, does not seem to be present.

Mr. JONES. I ask that the bill may go over then.

The PRESIDING OFFICER. The bill will be passed over.

DECORATIONS BY FOREIGN GOVERNMENTS

The bill (H. R. 5898) to authorize certain officers of the United States Navy and Marine Corps to accept such decorations, orders, and medals as have been tendered them by foreign governments in appreciation of services rendered was considered as in Committee of the Whole.

The bill had been reported from the Committee on Naval Affairs with amendments.

Mr. REED of Pennsylvania. Mr. President, I have an amendment to offer to the bill.

The PRESIDING OFFICER. Will the Senator from Pennsylvania permit the amendments of the committee to be acted upon first?

Mr. REED of Pennsylvania. Certainly.

The first amendment was, on page 2, line 2, after the word "junior," to insert:

Rear Admiral Thomas Washington, Rear Admiral W. L. Howard, retired; Rear Admiral H. Rodman, retired; Rear Admiral J. D. McDonald, retired; Rear Admiral T. Snowden, retired; Rear Admiral C. L. Hussey, retired.

The amendment was agreed to.

Mr. JONES. Mr. President, I should like to know something about the character of these decorations and what rights or privileges they carry?

I have said at times in the past that I should object to the passage of such bills in the future. I do not like, personally, the principle that seems to be involved in issuing these decorations of foreign countries to some particular individuals in this country. It seems to me that it is, in a way, contrary to our principles and ideals of American citizenship. The committee seems to have taken a great lot of them together here.

Mr. HALE. Mr. President, Article I, section 9, clause 8, of the Constitution of the United States provides:

No title of nobility shall be granted by the United States; and no person holding any office of profit or trust under them shall, without the consent of the Congress, accept of any present, emolument, office, or title, of any kind whatever, from any king, prince, or foreign state.

Then the act of January 21, 1881, Statutes, 604, provides:

Hereafter any present, decoration * * * which shall be conferred or presented by any foreign government to any officer of the United States * * * naval * * * shall be tendered through the State Department, but shall not be delivered by the Department of State unless authorized by act of Congress.

Mr. JONES. The policy laid down in the Constitution seems to me to be really contrary to the principle followed here.

Mr. HALE. I will say that this is not a new matter. It has been customary in the past for naval officers serving on war vessels in foreign waters to be given decorations by foreign governments. The officers themselves can not receive the decorations; but they are turned over to the State Department and held there until Congress authorizes their acceptance by the naval officer.

In the past the matter has not been systematically carried out. Certain naval officers who were acquainted with some Congressman or some Senator have had special bills introduced for their benefit, authorizing them to accept the decorations given to them. Others, who did not have any such acquaintances, have not received congressional authorization to accept the decorations. This year the department decided, instead of having separate bills go in, that they would group the officers together and have it done through an omnibus bill.

The decorations that are given are not in any way objectionable, as far as I can see. In the letter of the Secretary of the Navy to the Speaker of the House he makes the following statement:

> The tender of decorations, orders, and medals to officers of the Navy and Marine Corps by a foreign government is an act of international courtesy toward the United States and is made, not as a reward to the individual officer for services to such government, but as evidence of its appreciation of the friendly action of this Government in permitting its representatives—the officers to whom the decorations, orders, and medals are offered, and the naval units, afloat or ashore, which they command or in which they are serving—to assist the government. The authorization of the acceptance of the decorations, orders, and medals is a similar act of international courtesy in token of the appreciation by this Government of the response of the foreign government to the assistance rendered.

I hope the Senator will not object.

Mr. JONES. Why do we not pass a general law authorizing any officer of the United States Government to receive any decoration that any country proposes to give him or desires to give him?

Mr. REED of Pennsylvania. Mr. President, will the Senator yield for a suggestion?

Mr. JONES. Yes.

Mr. REED of Pennsylvania. I agree with the Senator that it is bad policy to allow these things to be conferred and distributed in the future; but we have just finished up a war in which we had a number of other countries as our allies. A considerable number of medals remain in the State Department, granted to our officers by our allies during the war. I do not think we ought to give any future consent, and I shall be glad to see Congress shut down on future gifts of these decorations; but it is highly unfair to allow some of these officers to retain the medals that they won during the war and to deny them to others who were given the medals for war services a day or two, perhaps, after the expiration of the general consent that Congress gave in war time.

Mr. JONES. Are the medals for these officers now in the War Department?

Mr. REED of Pennsylvania. Yes, Mr. President.

Mr. HALE. The medals for naval officers are now in the State Department.

Mr. JONES. They have been sent over here. I should like to suggest to the Senator from Pennsylvania, at any rate, that we do not do this in the future.

Mr. SWANSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Virginia?

Mr. JONES. I yield.

Mr. SWANSON. There is an additional trouble about that: We ought either to refuse absolutely to grant the consent of Congress in any of these cases, or we ought to make no discrimination between the individuals that receive these decorations or the nations that confer them. If we permit the acceptance of an honor that has been given to an officer by one nation, and then refuse to permit the acceptance of an honor that is given to another officer by another nation, that nation feels offended because we do not permit the courtesy that it has extended to be accepted.

If we should permit the acceptance of a courtesy from France, and then another nation like Sweden should seek to extend a courtesy to somebody who went there and we should refuse our consent to its acceptance, they would say: "The United States accepted the courtesy of France but they discriminated against Sweden," or some other nation.

We ought either to prohibit the acceptance of these things entirely, or we ought to make no discrimination; and the only way in which we can avoid discrimination now, since we have accepted about two-thirds of those that are in the State Department, is to pass this bill. Then, if we want to adopt a general policy prohibiting this sort of thing, we shall not be discriminating against nations or individuals.

There are two discriminations if we refuse this consent—first, against the nation that confers the decorations, when we refuse to accept their courtesy; second, against the individuals that it is desired should receive the decorations. Consequently, there will be two wrongs, two discriminations, if this bill is defeated.

It seems to me the right thing to do is to allow the decorations that are now in the State Department to be conferred, and then I agree that in the future there must be no discrimination, either between nations or between individuals. I should like to see a prohibition against the acceptance of any decorations in the future.

Mr. JONES. I am glad to hear the Senator express himself in that way.

Mr. SWANSON. I would rather let it be understood that American officers may not be decorated by foreign governments. I prefer that course; but to deprive these officers now would be to reflect on the governments that conferred the decorations, when we have accepted them from other governments.

Mr. REED of Pennsylvania. Mr. President, will the Senator permit a suggestion there?

Mr. BLEASE. Mr. President, I object to the consideration of the bill.

The PRESIDING OFFICER. Objection is heard. The bill will be passed over. The Secretary will state the next bill on the calendar.

GAME SANCTUARIES IN NATIONAL FORESTS

Mr. ROBINSON of Arkansas. Mr. President, I ask unanimous consent to recur to Order of Business No. 311, Senate bill 2456.

The PRESIDING OFFICER. The Senator from Arkansas asks unanimous consent to return to Order of Business 311, Senate bill 2456. Is there objection? The Chair hears none.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 2456) to establish game sanctuaries in the national forests.

The PRESIDING OFFICER. The amendment has been stated.

Mr. DILL. Mr. President, will the Senator explain just what the bill provides?

Mr. ROBINSON of Arkansas. The object of the bill is pretty well expressed in the title. It seeks to establish in the national forests game sanctuaries, places where game may be conserved and safeguarded.

Mr. DILL. I think I can ask the Senator a question which will recite my attitude.

Mr. ROBINSON of Arkansas. Very well.

Mr. DILL. Does the bill provide that any part of these sanctuaries shall be used as public shooting grounds?

Mr. ROBINSON of Arkansas. No.

Mr. DILL. It does not provide for the charging of Federal licenses?

Mr. ROBINSON of Arkansas. No.

Mr. DILL. I have no objection to its consideration.

Mr. ROBINSON of Arkansas. I desire to offer an amendment to the bill.

The PRESIDING OFFICER. The Chair is advised that a committee amendment is pending. The question is on agreeing to the committee amendment.

Mr. WARREN. Mr. President, I desire to ask the Senator a question. Does the bill carry with it any of the domain of the national parks?

Mr. ROBINSON of Arkansas. No; it simply authorizes the establishment of game sanctuaries in the national forests.

Mr. PITTMAN. With the consent of the legislature of the State wherein the forest is situated.

Mr. ROBINSON of Arkansas. Yes.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. ROBINSON of Arkansas. Now, Mr. President, I move to amend the bill as follows: On line 24, page 2, after the word "exceeding," I move to insert "$500," there now being a blank in the bill. The amendment fixes the maximum penalty for violation of the statute at $500.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Arkansas, which will be stated.

The CHIEF CLERK. On page 2, line 24, after the word "exceeding," it is proposed to insert "$500."

The amendment was agreed to.

Mr. BLAINE. Mr. President, under the bill complete protection is given to predatory birds in the national forests. The national forests are growing up in many of the States of the Northwest, and there are measures pending, or to be proposed, to appropriate money for the use of the Agricultural Department, in cooperation with the agricultural departments of the several States, with the view of destroying predatory birds, which birds are causing great damage and injury to the farmers, especially in those regions about the Great Lakes, along the Mississippi River, and in the valley of the Mississippi.

The bill excludes predatory animals from protection, but in my opinion predatory birds are much more destructive than predatory animals to agricultural crops, to the corn, to the wheat, and many other crops grown in the territory to which I have referred.

I suggest, if the Senator from Arkansas will consent, that a proper amendment be submitted. I am not opposed to the bill.

Mr. ROBINSON of Arkansas. What is the amendment the Senator from Wisconsin proposes?

Mr. BLAINE. To make the same provision with reference to predatory birds that is made regarding predatory animals under the bill. The amendment would come in the last section, on page 3. I suggest that the bill go over for the purpose of drawing an amendment.

Mr. ROBINSON of Arkansas. Does the Senator object?

Mr. BLAINE. I object to the consideration of the bill unless we can agree upon an amendment.

Mr. ROBINSON of Arkansas. If the Senator desires to propose an amendment, of course I shall be glad to consider it. I do not know what amendment he proposes.

Mr. BLAINE. I propose to give predatory birds the same status as predatory animals under this bill. I am not prepared now to submit the amendment.

Mr. ROBINSON of Arkansas. The words "and predatory birds" after the word "animals" would comprehend the suggestion of the Senator from Wisconsin. Does the Senator desire to specify the predatory birds that should be included in the amendment?

Mr. BLAINE. The amendment I suggested ought to be carefully drafted and submitted to the Department of Agriculture, so that there will be no difficulty in the enforcement of the act when it becomes law. I therefore object to the present consideration of the bill, with the view of having such an amendment prepared.

The PRESIDING OFFICER. Objection is heard, and the bill will go over.

DECORATIONS BY FOREIGN GOVERNMENTS

Mr. HALE. Mr. President, I ask unanimous consent that we return to calendar 313, House bill 5898, to authorize certain officers of the United States Navy and Marine Corps to accept such decorations, orders, and medals as have been tendered them by foreign governments in appreciation of services rendered.

Mr. BLEASE. Mr. President, I have no objection if it will not lead to discussion. If it leads to discussion, I shall object.

The Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. REED of Pennsylvania. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. There are some committee amendments which will have to be acted on.

The CHIEF CLERK. The committee proposes to insert at the proper places the names of Capt. W. P. Scott, Capt. H. Laning, Capt. V. A. Kimberly, Capt. H. L. Brinser, Capt. F. D. Berrien, Capt. R. D. White, Capt. L. R. Leahy, Capt. E. H. Durell, retired, Commander J. S. McCain, Commander G. C. Logan, Commander S. S. Kennedy, Commander R. E. Byrd, retired, Lieut. Commander J. B. Will, Lieut. Commander R. Pfaff, Lieut. Commander W. E. Whitehead, retired, Lieut. D. J. Sinnott, Lieut. F. B. Stoddert, Lieut. W. E. Moore, Lieut. E. D. Snare, Lieut. C. L. Green, Lieut. C. J. Marshall, Lieut. E. J. Norcott, retired, Lieut. (Junior Grade) J. K. Lynch, Rear Admiral A. M. D. McCormick (Medical Corps), Capt. W. N. McDonnell (Medical Corps), Lieut. Commander E. P. Huff (Medical Corps), Lieut. Commander R. H. Miller (Medical Corps), retired, Lieut. J. J. Kaveney (Medical Corps), Lieut. M. J. Stubbs (Supply Corps), Capt. E. W. Scott (Chaplain Corps), Commander W. A. Maguire (Chaplain Corps), Commander J. W. Moore (Chaplain Corps), Commander E. A. Brodman (Chaplain Corps), Lieut. Commander T. L. Wood (Chaplain Corps), Chief Pharmacist C. E. Alexander, and Maj. M. B. Humphrey.

Mr. SWANSON. The amendment simply includes cases where medals have already been conferred?

Mr. REED of Pennsylvania. Where medals were conferred in the past.

Mr. SWANSON. It does not refer to any future cases?

Mr. REED of Pennsylvania. No future cases at all.

Mr. SWANSON. The Senator agrees with me that this practice shall not be followed in the future?

Mr. REED of Pennsylvania. Absolutely.

Mr. SWANSON. Then I have no objection.

The amendment was agreed to.

The PRESIDING OFFICER. The clerk will state the next committee amendment.

The CHIEF CLERK. On page 3, line 2, strike out "Lieut. Commander W. S. Haas."

The amendment was agreed to.

The PRESIDING OFFICER. The Senator from Pennsylvania proposes an amendment, which the clerk will state.

The CHIEF CLERK. To insert in the proper places the following:

Bailey K. Ashford, colonel, Medical Corps.
Edwin B. Babbitt, major general, retired.
Joseph H. Barnard, lieutenant colonel, Field Artillery.
Alfred Ilko Barton, captain, Adjutant General Reserves.
Joseph E. Barzynski, major, Quartermaster Corps.
James D. Basey, captain, retired.
William M. Beaman, major, Engineer Reserves.
William C. Bennett, jr., first lieutenant, Corps of Engineers.
Charles W. Berry, sr., major general, reserves, and major general, New York National Guard Reserves.
Tasker H. Bliss, major general, retired.
Stephen Bonsal, lieutenant colonel, Military Intelligence Reserves.
Allan L. Briggs, lieutenant colonel, Infantry.
Robert L. Bullard, major general, retired.
Benjamin F. Caffey, jr., captain, Infantry.
Daniel J. Canty, captain, Quartermaster Corps.
James E. Chaney, major, Air Corps.
Harry N. Cootes, lieutenant colonel, Cavalry.
Enoch H. Crowder, major general, retired.
Fred T. Cruse, major, Field Artillery.
Guy Cushman, lieutenant colonel, retired.
Herbert A. Dargue, major, Air Corps.
Howard C. Davidson, major, Air Corps.
Anthony Bigelow Day, captain, Medical Reserves.
Edward T. Donnelly, colonel, retired.
Lee Roy Dunbar, major, Medical Corps.
John M. Eager, major, Field Artillery.
Ira C. Eaker, captain, Air Corps.
Clarence R. Edwards, major general, retired.
Henry W. T. Eglin, major, Coast Artillery.
Muir S. Fairchild, first lieutenant, Air Corps.
John P. Finley, colonel, retired.
Allen S. Fletcher, major, Philippine Scouts.
Frederick S. Foltz, colonel, retired.
Clyde S. Ford, lieutenant colonel, retired.
William F. H. Godson, lieutenant colonel, Cavalry.
David Marvin Goodrich, lieutenant colonel, Cavalry Reserve.
Ephraim F. Graham, major, retired.
Ulysses S. Grant, third, lieutenant colonel, Corps of Engineers.
Samuel A. Greenwell, captain, Cavalry.
James G. Harbord, major general, retired.
William Lee Hart, major, Medical Corps.
William W. Harts, brigadier general.
Guy V. Henry, colonel, Cavalry.
William Joseph Hillas, major, Medical Reserves.
Roy Hoffman, brigadier general, reserves.
Nelson M. Holderman, captain, retired.
Otto Holstein, major, Military Intelligence Reserves.
Harry S. Howland, lieutenant colonel, retired.
Edgar Erskine Hume, major, Medical Corps.
Merritte W. Ireland, major general.
LeRoy Hodges, major, Ordnance Reserves.
William W. Jenna, captain, Infantry.
Herbert Spencer Johnson, major, Infantry Reserves.
Wait C. Johnson, colonel, Infantry.
William A. Jones, major, Infantry.
Charles E. Kilbourne, colonel, Coast Artillery Corps.
Wallace Whitney Kirby, lieutenant colonel, Engineer Reserves.
Arthur B. Kratz, lieutenant colonel, Engineer Reserves.
Ben. Lear, jr., lieutenant colonel, Cavalry.
Hunter Liggett, major general, retired.
Charles A. Lindbergh, colonel, Air Corps Reserves.
Arthur B. McDaniel, captain, Air Corps.
Dale F. McDonald, major, Infantry.
William McFarland, captain, Medical Administrative Corps.
Joseph Wallace McIntosh, colonel, Quartermaster Corps Reserves.
Rufus F. Maddux, major, Chemical Warfare Service.
Walter Mulford Mann, captain, Infantry.
Clarence Augustus Manning, captain, Military Intelligence Reserves.

John C. Montgomery, lieutenant colonel, retired.
Horace Morison, major, Quartermaster Corps Reserves.
Charles G. Mortimer, lieutenant colonel, Quartermaster Corps.
T. Bentley Mott, colonel, retired.
Francis LeJ. Parker, colonel, Cavalry.
Hugh A. Parker, lieutenant colonel, Infantry.
Albro L. Parsons, jr., major, Medical Corps.
Mason M. Patrick, major general.
George S. Patton, jr., major, Cavalry.
Robert U. Patterson, colonel, Medical Corps.
John J. Pershing, General of the Armies, retired.
Arthur Poillon, lieutenant colonel, Cavalry.
George W. L. Prettyman, major, Field Artillery Reserves.
Charles McK. Robinson, first lieutenant, Air Corps.
Kyle Rucker, colonel, Judge Advocate General's Department.
Francis A. Ruggles, lieutenant colonel, Field Artillery.
St. Clair Street, captain, Air Corps.
John Guy Strohm, colonel, Medical Reserves.
Harry Taylor, major general, retired.
Bernard S. Thompson, first lieutenant, Air Corps.
Harold Thompson, major, Cavalry.
Francis Bowen Upham, colonel, Adjutant General Reserves.
Frank Clayton Vincent, major, Infantry Reserves.
Roland F. Walsh, major, Quartermaster Corps.
Leonard D. Weddington, first lieutenant, Air Corps.
Ennis C. Whitehead, first lieutenant, Air Corps.
Franklin L. Whitley, major, Adjutant General's Department.
Royden Williamson, captain, Cavalry.
Charles A. Willoughby, captain, Infantry.
Ira Ayer, captain, Medical Reserves.
David Prescott Barrows, major general, reserves.
William Merriam Chadbourne, colonel, Chemical Warfare Reserves.
Sherman Montrose Craiger, major, Finance Reserves.
Edmund L. Daley, major, Corps of Engineers.
Herbert A. Dargue, major, Air Corps.
Warren Jefferson Davis, lieutenant colonel.
John H. Dawson, captain, Medical Administrative Corps.
John Ross Delafield, brigadier general, Ordnance Reserve.
Andrew J. Dougherty, colonel, Infantry.
Ira C. Eaker, captain, Air Corps.
Muir S. Fairchild, first lieutenant, Air Corps.
William Nafew Haskell, major general, reserves.
John Philip Hill, colonel, Cavalry Reserves.
Campbell B. Hodges, lieutenant colonel, Infantry.
Noble B. Judah, colonel, Field Artillery Reserves.
Arthur B. McDaniel, captain, Air Corps.
James I. Mabee, lieutenant colonel, retired.
Charles H. Martin, major general.
Jeremiah Joseph Murphy, warrant officer, also captain, Engineer Reserves.
B. Frank Cheatham, major general, the Quartermaster General.
William J. Nicholson, brigadier general, retired.
William Barclay Parsons, brigadier general, Auxiliary Reserves.
Charles McK. Robinson, first lieutenant, Air Corps.
Nathan Philip Ruditsky, first lieutenant, Military Intelligence Reserves.
Lucius A. Salisbury, colonel, Medical Reserves.
William H. Shutan, major, Quartermaster Corps.
Robert Henry Tundall, major general, reserves.
James A. Ulio, major, Adjutant General's Department.
Leroy Hodges, colonel, Reserve Corps.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Pennsylvania.

Mr. BLAINE. Mr. President, I desire to object to the present consideration of the bill. In fact, I am opposed to the bill, even as amended and as proposed to be amended. The amendment very clearly shows that there are others who ought to come under the bill. If we are going to discriminate, we might just as well stop this thing now——

Mr. REED of Pennsylvania. Mr. President, will the Senator permit me a word of explanation?

Mr. BLAINE. Instead of permitting additional names to be inserted of those who might receive these medals.

Mr. SWANSON. Mr. President, will the Senator yield?

Mr. BLAINE. I want to make another statement and then I will be glad to yield.

Mr. REED of Pennsylvania. Will not the Senator let me explain my amendment?

Mr. BLAINE. As I view this situation, our Constitution prohibits the acceptance of such medals by American citizens. The Constitution is the law of the land. It was known and understood by these citizens. The governments which extended the offer of the medals had notice of our Constitution.

Mr. BRUCE. Mr. President, I object.

Mr. REED of Pennsylvania. Mr. President, will not the Senator withhold his objection for just a moment?

Mr. BRUCE. I will not, absolutely. I am opposed to this practice on principle. I think after a while decorations will become so abundant that it will be more honorable not to have one than to have one.

The PRESIDING OFFICER. The Senator from Maryland objects.

Mr. REED of Pennsylvania. Mr. President, may I have the attention of the Senator from Maryland for a moment? The bill to which the Senator has just objected is a bill giving consent to the acceptance of past decorations given to naval and marine officers and——

Mr. BRUCE. Mr. President, I did not understand that it was for past decorations. I thought it was prospective. I have no objection to it.

Mr. BLAINE. Mr. President——

Mr. REED of Pennsylvania. Mr. President, will the Senator allow me to make an explanation? I think we can shorten this debate. In the war time Congress gave consent that the officers of our forces should accept decorations from our allies. The amendment I have sent to the desk covers a large number of cases in which such decorations were conferred for war-time service but were not received until after the limiting date of the consent which was given in war time. The amendment would not permit any officer to accept a decoration in the future, nor would the original bill, on which the Senator from Wisconsin has been speaking.

The provision in the Constitution to which reference has been made authorizes the granting of consent by Congress for the acceptance of such decorations. The bill affects a very large number of officers, from every State in the Union, who in the past have rendered good service. We are all opposed to continuing this practice in the future. I think we have made it clear that Congress is not going to sanction it in the future. But it is pretty hard on those officers whose medals were delivered at the State Department the day after the time limit went on, and whose services in the war were creditable, to single them out for discrimination in comparison with their brother officers who were permitted to accept the decorations.

I know of some cases where the medals were given before the time limit expired but did not actually get across the ocean and into the hands of the officers before the limit was reached. Those are the persons we are trying to help by this legislation.

Mr. HALE. Mr. President, I think it is fair to say that the decorations conferred on the naval officers named in this bill were not decorations conferred for military services during the war. They were decorations conferred when American ships of war have visited in foreign ports, and on other similar occasions.

Mr. REED of Pennsylvania. But that was all in the past, was it not?

Mr. HALE. It was all in the past.

Mr. REED of Pennsylvania. It does not cover the conferring of any decorations in the future. The naval decorations are all decorations that have been awarded in the past.

I sympathize with what the Senator from Wisconsin has said, and the only reason I interrupted him was to explain that although——

Mr. LA FOLLETTE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. LA FOLLETTE. Has there been objection to the consideration of this bill?

The PRESIDING OFFICER. Objection was made, and it has been withdrawn. The question now is upon the amendment offered by the Senator from Pennsylvania.

Mr. BLAINE. Mr. President, if the Senator will yield, do I understand that this limits the decorations to the Navy and Marine Corps?

Mr. REED of Pennsylvania. And the Army. My amendment would include the Army. The list is complete. It was sent to me by the War Department.

Mr. BLAINE. Are those decorations to be conferred because of some prior act of Congress, the operation of which expired at a certain time?

Mr. REED of Pennsylvania. That applies to most of them. We gave general consent during war times, and that expired.

Mr. LA FOLLETTE. That does not apply to naval officers, according to the statement of the Senator from Maine.

Mr. REED of Pennsylvania. No; it does not apply to naval officers.

Mr. BLAINE. I object to the present consideration of the bill.

Mr. LA FOLLETTE. Regular order!

The PRESIDING OFFICER. The bill will be passed over.

DUPLICATE BRIDGE BILLS

Mr. BARKLEY. Mr. President, while I was temporarily absent from the floor the Senate passed five bridge bills, commencing with Calendar No. 302 and ending with Calendar No. 306. House bills similar to the Senate bill passed by the Senate have already passed the Senate, and there was no need of passing these. I ask that in each case the vote by which the Senate passed the bill be reconsidered, and that those Senate bills be indefinitely postponed.

The PRESIDING OFFICER. Without objection, the votes by which the bills to which the Senator has referred were finally acted upon, being Senate bills 1410, 1406, 1407, 1408, and 1409, inclusive, will be reconsidered, and the bills will be indefinitely postponed.

UNALLOTTED LAND OF THE KLAMATH INDIAN RESERVATION

The bill (S. 2707) to provide for the classification of all unallotted land of the Klamath Indian Reservation and to reserve for forest-production purposes all land primarily adapted to the production of crops of timber, was considered as in Committee of the Whole, and was read, as follows:

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, directed to classify all unallotted lands of the Klamath Indian Reservation in Oregon on the basis of the primary adaptability of the lands for the production of agricultural crops, or the production of timber crops, and all lands classified under his direction as chiefly valuable for the production of timber, or the incidental purpose of water conservation, shall be maintained as the Klamath Indian Forest, the net income from which shall be used for purposes beneficial to the Indians having tribal rights on the Klamath Indian Reservation.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

DOUBLE PENSIONS FOR SUBMARINE ACCIDENTS

The bill (S. 2998) granting double pension in all cases where an officer or enlisted man of the Navy or Marine Corps dies or is disabled as the result of a submarine accident was announced as next in order.

Mr. JONES. Mr. President, I have just read over the latter part of the bill. Does it mean that if there is a widow she will get a double pension, or if there are minor children they will get double pensions? The bill does not specify as to that. I ask that the bill may go over.

The PRESIDING OFFICER. The bill will be passed over.

BEAR RIVER MIGRATORY BIRD REFUGE

The bill (S. 3194) to establish the Bear River migratory bird refuge, was announced as next in order.

Mr. JONES. Mr. President, that is quite a long bill. I rather think it should go over until there is some time for explaining it.

Mr. PHIPPS. Mr. President, will the Senator withhold his objection?

Mr. JONES. Certainly.

Mr. PHIPPS. I understand that the bill has the same purpose exactly as a bill which was passed by the Senate last year, in which an appropriation was authorized, which appropriation was included in the deficiency appropriation bill which failed of passage at the close of the last Congress. I think the bill is generally understood by Members of the Senate. It had the unanimous approval of the Committee on Agriculture and Forestry, I believe. At least, I have heard of no objection.

Mr. JONES. Is the bill in exactly the form in which it passed the Senate before?

Mr. PHIPPS. No; it is not in exactly the same form. The bill which passed the Senate last year was one I introduced. This bill has the same purpose, but it goes a little more into detail in explaining the manner in which the property shall be looked after and controlled.

Mr. JONES. Sometimes such details cause a lot of trouble.

Mr. PHIPPS. The details were added for the purpose of improving the bill.

Mr. JONES. I am rather inclined to think the bill ought to go over to-day, anyway.

The PRESIDING OFFICER. The bill will go over. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The CHIEF CLERK. A joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

Mr. ODDIE. Mr. President, I ask unanimous consent that the Senate shall continue for 15 minutes longer on the calendar. There is a bill just ahead, Senate bill 1341, upon which I am particularly anxious to have the Senate act.

The PRESIDING OFFICER. The Senator from Nevada asks unanimous consent that the Senate proceed for 15 minutes longer pursuant to the order under which it has been operating.

Mr. KING. Mr. President, I should be very glad to do that, but I know several Senators thought that at 2 o'clock we were to take up the unfinished business. They are not here and perhaps would be interested in some of the bills which might be called. I am interested in a number of bills which perhaps would be called under such an order, but——

Mr. ROBINSON of Arkansas. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard to the request of the Senator from Nevada.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

Mr. NORRIS. Mr. President, yesterday when I surrendered the floor I was discussing some questions pertaining to nitrate plant No. 2 and the production of fertilizer by the cyanamide process. I had made the assertion that, in my opinion, the cyanamide process was out of date as compared with other processes for getting nitrogen from the air.

I think I ought to say now, before I go into the discussion in detail of the cyanamide process as compared with other processes, that I have no fault to find and no criticism to offer against the American Cyanamid Co. for its attempt to secure the acceptance of the bid which it has made, together with the Air Nitrates Corporation, for Muscle Shoals. Neither have I any criticism now of any attempt that has been made by the power companies to get possession of Muscle Shoals. I have no fault to find, for instance, with the officials of the Alabama Power Co., who have always been mixed up more or less in this question since we commenced to investigate it years ago. My relationship with the officials of the power company, with the cyanamide people, with the carbide people, and everybody else who has tried to get Muscle Shoals, has always been pleasant. I have never charged that any of those officials or any of those companies were dishonorable or that they were doing what, from their standpoint, was not the proper thing to do. I make no such charge now.

I have no knowledge of any advantage that has ever been sought by the so-called Fertilizer Trust, although that trust has been charged with being mixed in this matter more or less ever since the beginning. At the very beginning of the debate and consideration of this proposition—or at least within a year or so after it began—I introduced a resolution directing the Federal Trade Commission to investigate and report as to whether there was a Fertilizer Trust. They made the report, and I think it fair to say that in the judgment of the Federal Trade Commission there was no trust in existence as they understood it. There have been combinations, I think, in that respect; dealings with the farmers and farm organizations have been complained of very often; but I have not undertaken to go into that question, and I express no opinion either in commendation or condemnation of any of the practices that have been indulged in by any of those people. I preferred and have tried to follow that course—to consider the question on a higher plane.

None of these officials have ever undertaken, to my knowledge, to do anything with the committee that was not perfectly honorable and perfectly square. I have not agreed with any of those officials. I have never agreed with any of those who have made the bids for Muscle Shoals, commencing at the very beginning with Henry Ford. I have never made any complaint against Mr. Ford or his company for seeking to get Muscle Shoals. From a business standpoint the corporation or the individual that could get Muscle Shoals—and get it on terms which I think have always been laid down in the bids that have been submitted—would be getting a business advantage; would be getting a subsidy from the Government of the United States; and it would, in my opinion, constitute a very great blunder on the part of the Congress if it were permitted.

Now, I am going to discuss the cyanamide feature and the Cyanamid Co., and I am going to do it from that standpoint. It is a great corporation doing a great deal of business, but I think I will be able to show that if its bid were accepted and Muscle Shoals turned over to it it would be the greatest donation—the greatest subsidy by the Government of the United States—that has ever been given to any individual or to any corporation.

In my opinion the bill introduced by the Senator from Ohio [Mr. WILLIS], and which was in the committee offered as a substitute for the joint resolution which is now before us, is absolutely the worst bid of any that has ever been made, viewing it from the standpoint of our Government. I think I shall be able to show that it is purely and distinctly a power proposition. I am not finding fault with that because, as I look at it, there are two things that we have been considering all the time. One is power and the other is fertilizer. They were associated together by the original act in regard to Muscle Shoals, providing for the development of Muscle Shoals. They have been separating and getting further and further apart as new inventions have been made in processes for getting nitrogen from the air. I have contended always, and do now, that we can not make a fertilizer proposition of a power proposition. I am not finding fault with the people who try to get it, but according to my view every one of them that has ever undertaken to do it, from the very beginning down to now, has had in view the power they were trying to get, and fertilizer was a secondary consideration and only included in the bid because it was known that Congress was anxious to cheapen fertilizer for American agriculture.

Now, I had something to say and I am going somewhat into detail in regard to the Willis bill because, as I shall show more in detail, there has been put forth, before the American farmer particularly, a propaganda trying to induce him to get behind the bill now known as the Willis bill and to induce him to demand that his Senator and his Representative shall favor the bill. A great propaganda, which, in my judgment, has cost an enormous amount of money, spread over the United States to try to get public sentiment at home among the farmers aroused on the question of fertilizer, with the object of inducing them to try their best to secure the passage of the bill introduced by the Senator from Ohio. It is practically the same bill that was introduced during the last Congress, and which was before the joint committee having consideration of the Muscle Shoals property. To the Committee on Agriculture and Forestry of the Senate it is nothing new. We have had the question before us in one way or another, together with a large number of other bids, ever since the beginning of the controversy.

There are three ways of getting nitrogen from the air. The oldest one is known as the arc process, the next one as the cyanamide process, which is the one provided for in the cyanamide bid. The third is the synthetic process. Each one of them has some modification, particularly the latter, because there have been changes going on continually. I have no doubt that the arc process, which is the oldest process, as now operated in some places is a very great improvement over the arc process when it was first invented. The cyanamide process has been improved and is being further improved. It was known by scientific men all over the world before the World War. The synthetic process, that has made practically all of its development since the war, and is the newest of all, is likewise continually changing; new patents are being taken out and various improvements being made. Improvement is going on every day, I might say. Every new plant seems to be an improvement over the old one. So that I have a great deal of confidence that eventually fertilizer for the American farmer will be cheapened very materially.

The arc process requires a great deal of power. To a great extent it has gone out of use. It is only employed now where power is very cheap, and then I think practically only where the plant is already constructed and it is desired to avoid the loss of scrapping. In a modified way the same thing may be said of the cyanamide process, although there have been some new plants erected.

The total annual capacity for nitrogen fixation by the arc process is 44,750 net tons; that is, there is enough machinery in the world using the arc process to produce that many net tons in a year, but the 1927 rate of production was only 39,240 tons, showing that it was not used even to its capacity.

Mr. FLETCHER. How much of that was produced in the United States?

Mr. NORRIS. None of it was produced in the United States. There is not an arc process plant in the United States and there never has been one.

The total annual capacity in the world for nitrogen fixation by the cyanamide process is 315,500 tons, but the rate of production in 1927 was only 174,250 tons.

Plants for the fixation of nitrogen by the direct synthetic ammonia process, the Haber process and its different variations, have an operating capacity of 663,000 tons, with an additional 316,160 tons under construction, showing that in the business world there has been a wonderful increase in the plants producing nitrogen from the air by the synthetic process.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER (Mr. COPELAND in the chair). Does the Senator from Nebraska yield to the Senator from North Carolina?

Mr. NORRIS. I yield.

Mr. SIMMONS. What percentage of that is produced in the United States?

Mr. NORRIS. I can not give those figures, although I am going to give what I think is a complete list of all the plants in the world which produce nitrogen by each one of these processes, what their operating capacity is, and how much they produced in the last year.

Mr. SIMMONS. Is it not a fact that Germany produces more by the synthetic process than any other country in the world?

Mr. NORRIS. I think that is a fact, although when I get further into the figures they will show definitely whether that is true or not, but I believe it to be true.

Mr. SIMMONS. I do not know whether the Senator in his investigation has inquired into the relative cost at which nitrogen is produced in Germany and in the United States, but I am under the impression that in Germany it is produced very much more cheaply than we produce it, and that the Germans rely almost entirely for their supply of ammonia upon the products of factories operating under the Haber process.

Mr. NORRIS. I think that is true, although the Senator from North Carolina must remember that in Germany there were a great many plants using other processes. I do not think there is any using the arc process there, but recently a combination was effected between the owners of plants in Norway, where the arc process was used almost exclusively, and where it was invented, and the owners of plants in Germany by which many of the plants which were extracting nitrogen from the air by the arc process were changed. In some places the entire machinery, I think, was scrapped, and in other places it was modified and they used what they could and installed the synthetic-ammonia process instead.

Mr. SIMMONS. My impression is that in Germany they use a larger percentage of ammonia than we do in this country in the fertilization of their lands; that they obtain the chief ingredients of fertilizer almost exclusively from the air, and obtain it much more cheaply than we are able to get it from the air in this country or to get it from Chile. In that way the German farmer has a very great advantage over our farmer. I was wondering why the German factories were able to produce this product so much more cheaply than the American factories are producing it, if that be true.

Mr. NORRIS. That is true. I thought I could see why they could produce it more cheaply, and I made an attempt to get definite figures. If I can get them I will furnish them. I have forgotten what they were now. I only remember, in a general way, that there were several reasons that were given to me by the authorities why the Germans were producing it more cheaply. One was that everything, including labor, in Germany was much cheaper than it was here. The cheapness of the product there was accounted for in that way. I was also assured by scientific men, of whom I made inquiry, that Germany possessed no knowledge now of any method of getting nitrogen from the air that we were not in possession of here. Not only that, but I do not believe it is unfair to say that American scientists have rather led the world along this line. They have been consulted; they have been employed in the production plants in almost all portions of the globe. So I believe, in so far as the science itself is concerned, we are not behind any country in the world.

Mr. President, at this point I ask to have printed in the RECORD tables showing the location, annual capacity, and 1927 rate of production of plants engaged in the fixation of nitrogen by the various processes.

The PRESIDING OFFICER. Without objection, it is so ordered.

The tables are as follows:

Nitrogen fixation by arc process

Location	Annual capacity	1927 rate of production
	Net tons	*Net tons*
Rjukan, Norway	31,000	38,000
Notodden, Norway	8,000	
Rhina, Germany	4,500	
La Roche de Rame, France	250	250
Patsch, Austria	1,000	1,000
Total	44,750	39,250

Nitrogen fixation by cyanamide process

Location	Annual capacity	1927 rate of production
Germany:		
Piesteritz	35,000	30,000 +5,000

Mr. NORRIS. Mr. President, Doctor Cottrell, whom all Senators know and who is employed at the Research Laboratory Bureau which has charge of this kind of work, has invented quite a number of improvements. I think he had some of them patented and that he gave them to the world. He is a poor man, working on a salary, but he was so interested in the work and became so intensely wrapped up in it that his enthusiasm for cheapening the methods of securing the ingredients of fertilizer, particularly nitrogen and phosphorous, led him to give to the world every invention he has made. His name among chemists all over the world is as well known as the name of our own President is known to us, and they hold him almost in reverence. I have not learned of any exception. Doctor Cottrell—and before I conclude I will read from a statement that comes from his bureau comparing these processes—is universally respected by all who know him, whether they agree with him or not. This very morning I had a conference with Mr. Bell, a very interesting and delightful conference. Mr. Bell is president of the Cyanamid Co. He is in favor, of course, and has done everything he could to secure the passage of the Willis bill, accepting the Cyanamid Co.'s bid. I asked him about Doctor Cottrell this very day, and, although he knows Doctor Cottrell is not in favor of the bid of his company and that Doctor Cottrell's word will go a great way with those who are trying to solve this problem properly because of the confidence all have in him, he has just as great respect for Doctor Cottrell as any man possibly can have. He told me to-day of the valuable assistance to the scientific world Doctor Cottrell had rendered and how scientific men everywhere almost revere his name because he has never made a cent of profit out of any of his discoveries.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from North Carolina?

Mr. NORRIS. I yield.

Mr. SIMMONS. The subject in which I am particularly interested is the cost. I agree with the Senator that there has been great improvement in the method of extracting nitrogen from the air and the experiments that are being conducted now promise even greater improvement; but I have not seen any evidence as yet that as the result of such activities and such development the price of the product to the farmer has been reduced in the slightest. Looking at the subject from the farmer's standpoint only, he is interested in getting a product which will be cheaper than the product heretofore relied upon, namely, nitrate of soda imported from Chile. The farmers are now buying chiefly that kind of fertilizer, and they are buying it because they can buy it as cheaply and possibly more cheaply than they can the other, and it is probably a much safer fertilizer for them to use than the other.

If the Senator has any information that indicates that the experiments and developments which are taking place are likely to result in such a decrease in the price of ammonia as will enable the farmer to get his necessary nitrate of soda or ammonia through our own factories instead of having to import it, I should like very much to have him give the Senate the benefit of that information, if he has it. I do not know whether he has it or not, and if he has it not I do not want to interrupt him by further questions along that line.

Mr. NORRIS. Mr. President, I think I can enlighten the Senator somewhat on that subject. It is possible that up to the present time this decrease in the cost of getting nitrogen from the air has not reached the farmer in fertilizer form. Nitrogen is only one ingredient of fertilizer.

Mr. SIMMONS. It is the chief ingredient, though.

Mr. NORRIS. I do not know as to that.

Mr. SIMMONS. Yes, Mr. President.

Mr. NORRIS. It is a necessary ingredient. Everybody knows that.

Mr. SIMMONS. I will say to the Senator that I have some information upon that subject. I am somewhat of a farmer myself, and I buy fertilizer very heavily and I know that it is not only the chief ingredient but it is the ingredient that makes the fertilizer expensive, that adds more to the cost of the fertilizer than either potash or acid phosphate, the other two ingredients.

Mr. NORRIS. Now, Mr. President, if the Senator will permit me, I will take up briefly what I believe to be an answer to his inquiry, which I concede, is a very proper one.

These inventions, these improvements, the Senator must remember, are very recent. The whole thing has come since the war; and the extraction of nitrogen from the atmosphere, coming as it has by degrees—first by a small factory, then by one a little larger, then a few more—has not up to the present time produced enough nitgrogen to get it into the fertilizer world to any great extent.

One of the objects of the joint resolution that I am trying to pass is to provide for the extraction of nitrogen and the making of fertilizer on a sufficiently large scale so that it will be practical, and can be adapted to the use of the farmer.

One of the things that the scientific world has been trying to do for a good many years is to get a concentrated fertilizer. One of the things that they want to cheapen, and which they must cheapen if they make fertilizer very much cheaper, is the cost of the phosphorus that is in the fertilizer, the combining of the phosphorus with the nitrates and with the potash. These chemicals are often secured, and, when you try to combine them, you find a difficulty that you have to overcome by experimentation. So, in a very general way, it may be said that a great deal of this work is still laboratory work, although many thousands of tons of nitrogen have been extracted from the air during the last year by the synthetic process, and many more thousands will be extracted during the coming years. Up to now they have used most of it in different kinds of things, various things.

For instance, the Cyanamid Co.—and I am going to offer this in evidence, I think, after a while—produce over 50 different kinds of chemicals, and, I think, minerals, perhaps, that are used in the arts and used in making explosives. The du Pont people use all that they make in making powder and other explosives.

I am told by the Senator from Virginia [Mr. GLASS] that the people who are erecting the plant at Hopewell, Va., which, when it is completed, will be the largest plant in the world using the synthetic process, and is going to cost something like $125,000,000, as I understand, expect to go into the fertilizer business themselves on a very large scale; and they are going to be able to produce fertilizer, so they believe—and I believe it, too—cheaper than the Du Ponts are producing it down in West Virginia. It is perfectly natural that they should, because theirs is a newer plant; so that the cost is going down all the time.

The cyanamide people make cyanamide, which in itself, if you could apply it properly to a plant, is a good fertilizer, although it contains no fertilizer ingredient except nitrogen. It has neither potash nor phosphorus in it; but if you put the cyanamide next to a plant it would kill it. It would burn it up. We make a good deal and send it abroad, even to Germany, and it is combined with potash over there. When we make a fertilizer here we have to send to Germany and get the potash and bring it over and combine it. The Cyanamid Co. own large beds of phosphate rock in Florida. They make a great deal of ammo-phos, which has two fertilizer ingredients, phosphorus and nitrogen. It lacks only potash to make it a complete fertilizer; and if you had a soil that needed nitrogen only you could fertilize it with cyanamide if you put it in properly. It would take a scientific man to put it in, because, as I said, it is disagreeable to handle, difficult to handle, and dangerous to handle—that is, dangerous to the plant you put it on.

Mr. SIMMONS. Mr. President, if the Senator will pardon me, I was present on yesterday when the Senator from Virginia [Mr. GLASS] made his statement.

Mr. NORRIS. The statement I referred to was made to me in private conversation. I did not refer to what the Senator said in the Senate.

Mr. SIMMONS. That is the first hopeful indication I have seen that the manufacturers of cyanamide or nitrogen by the other processes in this country were at all interested in its production for use in fertilizing the soil. They were producing it, as the Senator said yesterday in the case of the du Pont Co., in large quantities; but they were producing it for the purpose of supplying their plants engaged in the manufacture of explosives. Others were producing it for other scientific purposes. Nobody seemed to be especially interested in the production of nitrates from the air for the purposes of fertilizer.

The Senator will remember—and that is the reason why I am on my feet now—that I, together with a number of other Senators on this side of the Chamber, have insisted very earnestly in the past that this great property that the United States has at Muscle Shoals should be used primarily for the production of cheap fertilizer for the farmer. In the conditions that existed when we made that contention the manufacturers of ammonia in this country were not making it for fertilizing purposes. We insisted, therefore, that the Government owed it to the farmers to use this great power down there to see that they were supplied with nitrogen extracted from the air as cheaply as it was possible to extract it.

If in the meantime the industries that are engaged in the manufacture of this material are producing it or beginning to produce it in large quantities in the form in which the farmer wants it and must have it, and will sell it to him at reasonable prices, so that he may escape the terrific burden that is now imposed upon him by having to buy it from a foreign country, of couse, the situation has changed very much. Outside of what the Senator from Virginia has said, however, with reference to the plant at Hopewell—which is to be a very extensive one—I know of no effort on the part of any manufacturers in this country to produce this material for use in fertilizer except to a very limited extent; and that is the reason why I interrupted the Senator.

Of course, the farmer is interested in the matter only from the standpoint of fertilizer, and from the standpoint of getting a cheaper fertilizer than he is getting now. If there is no hope of getting it through individual effort, then if the Government has a plant where power is developed it could not, in my judgment, use that power for a better purpose than to experiment and, if possible, work out some process by which it can supply the farmers of this country with this absolutely essential ingredient in the production of crops at a lower price than they have to pay for it now, ranging, I will say to the Senator, when we buy it now all the way from fifty to sixty dollars a ton cash, and a much larger sum if it is bought on time; and most of it has to be bought on time.

Mr. NORRIS. If the Senator means what I assume his last remark might mean—that since we have nitrate plant No. 2, which will get nitrogen from the air, we ought to operate it, even though it will cost twice as much as it would cost to build a new plant under modern conditions and operate that—then I disagree with him.

If he means that he wants the Government to experiment in an enlightened way, the most scientific way, then I am willing to go to any length and spend almost any amount of money to have the Government do it. That is what I think we are going to accomplish by the passage of the joint resolution if it is enacted into law.

The fact that the farmer has not got the benefit of it now is probably because, as I tried to say awhile ago, up to the present time those who have engaged in the business have done it for other purposes than fertilizer; for instance, the ammonia people. There is a vast amount of ammonia sold. There are dozens of other things and chemicals that I can not name; but pure ammonia is 85 per cent nitrogen, and the ordinary ammonia that we buy at the drug store, as far as nitrogen is concerned, is a good fertilizer. It contains from 25 to 30 per cent of nitrogen. That is known as aqua ammonia.

Mr. SIMMONS. The two terms are almost interchangeable.

Mr. NORRIS. Aqua ammonia and ammonia are not quite interchangeable.

Mr. SIMMONS. Not quite; no.

Mr. NORRIS. Ammonia is 85 per cent nitrogen and aqua ammonia is only about 25 or 30 per cent nitrogen. If by the expenditure of Government money we can still further improve the process so that it can be known that we can make a fertilizer much cheaper than it is made now, then it is our theory that the fertilizer people will utilize it and make a cheaper fertilizer.

I agree with the Senator that what is going on at Hopewell is a hopeful sign; and when I get through with the figures that I was in the midst of giving I think I will demonstrate to the Senator that this method of getting nitrogen from the air has been growing with rapid strides, and has grown faster in the last year than in any other year in history. Now let me give you some more of them.

Mr. SIMMONS. I do not think the Senator and I are so far apart. I do not insist that the Government shall use the entire power that is now developed or may hereafter be developed at Muscle Shoals for the purpose of making fertilizer; but I do insist that no bill shall pass here that does not provide that the Government shall maintain a plant there and shall experiment with a view to ascertaining whether it is feasible and possible to produce at a reasonable price such a product as the farmer requires. If it is not feasible and possible, then we should abandon it; but if it is, then we ought to have a reserve power that can be utilized for that purpose.

Mr. NORRIS. Mr. President, I agree with the Senator. We will find, however, power is a secondary, almost an incidental, consideration; that you can get power to run machinery almost anywhere in the United States, except at some inaccessible point, and that as far as we know now cheap coke is more important in producing nitrogen than any other one thing.

When I was interrupted, Mr. President, I was giving some statistics in regard to the synthetic-ammonia process, and I had said that the various synthetic-ammonia processes of the world had an operating capacity in 1927 of 663,000 tons of nitrogen. That was the capacity. It will be remembered, in regard to the arc process and the cyanamide process, that I gave the capacity, and it was found that the actual production was much below the capacity. In this case the actual production was only a few tons below the actual capacity, showing that it is going at full blast, in that in the year there were under construction additional plants amounting in capacity to over 316,000 tons.

Mr. President, let me give the figures as to these various plants by years. In the year 1913, the year before the war, there were seven arc plants in the world, and they produced 18,000 tons of fixed nitrogen. There were 15 cyanamide plants, and they produced 60,000 tons. It will be seen they were comparatively small plants. There was only one synthetic-ammonia plant in the world in 1913, and that produced 7,000 tons of fixed nitrogen, a comparatively small plant, to some degree experimental, I should say.

Let us go forward five years, from before the war to after the war. In 1918, the war just being over, and there not having been much chance of expansion, there were 12 arc plants in the world. They produced 38,000 tons of nitrogen. They had increased from seven during the five years. There were 35 cyanamide plants, and they produced 325,000 tons of fixed nitrogen. They had increased from 15 in number, had more than doubled in number, and a great deal more than that in production—from 60,000 to 325,000.

In 1918 there were three synthetic-ammonia plants. There was only one in 1913. While the percentage of increase was great, the actual increase was only two plants, but they were large. Those three synthetic-ammonia plants produced 308,000 tons—still not being up to the production of the cyanamide plants.

Let us jump now from 1918 to 1927—last year. There had been opportunity to improve and increase since the war. There were seven arc plants in 1927, and their estimated production was 42,000 tons. There were only seven in 1913. There were 12 in 1918. They lost in number, although they were larger plants. They increased in production.

There were 28 cyanamide plants, and they produced 285,000 tons of fixed nitrogen. In 1918 they produced 325,000 tons. They had fallen off.

The synthetic ammonia process plants number 49 in 1927, increasing from 3 in 1918. The production was increased from 308,000 tons to 663,000 tons. I think those figures are eloquent pleaders for the proposition I have laid down and for the proposition contained in this resolution.

I have here a list of the nitrogen fixation process plants, giving the names. Those plants are mostly in Norway, Germany, France, and Austria. They have a capacity of 44,750 tons annually, but the actual production in 1927 was only 39,250 tons.

I have here a list of the nitrogen-fixation plants using the cyanamide process. There is a long list of them, more than a page, but the total capacity of all of them is 315,500 tons. The actual production was only 174,250 tons.

Here I have a list of the nitrogen-fixation plants using the synthetic-ammonia process, showing the operating capacity in 1927, which was 663,010 tons, with plants under construction in 1927 with an estimated capacity of 316,160 tons. When that construction is completed, we will have plants with capacity to produce 1,000,000 tons of nitrate by the synthetic process, and the increase has practically all come since the war. That is the new process. It has taken possession of the business and the scientific world, and is the real process any scientific or business man would adopt if he were going to get nitrogen from the atmosphere.

I want to read some testimony to the Senate now. I have before me a letter from Doctor Howe. I think I ought to pause here to tell the Senate who Doctor Howe is. He is editor of Industrial and Engineering Chemistry, published in Washington, D. C. He edits the official publication of the American Chemistry Society. That magazine is known all over the civilized world among chemists and scientific men. It is the leading publication of its kind in the world.

Doctor Howe has been decorated by kings in Europe for his service in the world of chemistry. He is well known all over the world as one of the leading chemists, and is the leading authority on this subject everywhere in civilization. He has no more interest in Muscle Shoals than has any other citizen of the United States. He has no interest in any of these processes, in any of these corporations that are interested in the patents, either directly or indirectly, in any way, so that I figure that Doctor Howe's judgment and Doctor Howe's opinion are worth a great deal.

I have before me a speech made by Doctor Howe in Chattanooga, Tenn., on October 14, 1927. The subject of it is "Chemistry in industry." I want to read a few extracts from that speech. He said:

> To-day the best statistics available show the following interesting comparison. The total annual capacity for nitrogen fixation by the arc process is 44,750 net tons.

That is practically what I have already stated. It may vary a little.

> The 1927 rate of production was 39,240 tons. The total annual capacity for nitrogen fixation by the cyanamide process, world figures, is 315,500 tons, but the 1927 rate of production was only 174,250 tons. Fixation by the direct synthetic-ammonia process, meaning the Haber process and the variations known by other names, has an operating capacity of 663,010 tons, with an additional 316,160 tons under construction. The 1927 rate of production has been within a few tons of the total operating capacity, some of the smaller works having been idle for portions of the year. These figures speak eloquently of world trends.
>
> It is history that when the war broke and it became apparent that we should not depend wholly upon Chilean nitrate, the cyanamide process was the only one sufficiently well known in this country to justify the erection of a large plant, and No. 2, at Muscle Shoals, became the largest single cyanamide plant in the world. It is also history that the No. 1 plant, erected as an experiment, produced fixed nitrogen only experimentally but that it served a useful purpose as a pioneer enterprise in this country, paving the way for a synthetic-ammonia industry which in my opinion has to-day rendered the Muscle Shoals plants obsolete—

He is speaking of nitrate plant No. 2—

> whether considered from the standpoint of nitrogen for defense or nitrogen for the uses of agriculture.
>
> Since the Muscle Shoals project has always been allied with the needs of agriculture as well as those of war, it may be well to emphasize some of the factors which to-day control the location of plants for the fixation of atmospheric nitrogen. In view of the greater power requirements, and considering that the cyanamide and the arc process must have electric energy, and the fact that the steps from the nitrogen of the air to the nitrogen in the form available for agriculture are easier and more direct by the newer process, it seems unnecessary to discuss in detail how the synthetic-ammonia process has become supreme. It has been abundantly demonstrated in all parts of the world that, other considerations being comparable, the erection of a plant to fix nitrogen to-day is based wholly upon the synthetic-ammonia process. More than that, I am proud to say that American methods, American processes, and American engineers are taking precedence over others, even in the building of plants in Norway and in Czechoslovakia, for the fixation of nitrogen.
>
> The great plants that have been built and are in process of construction in this country have been located with respect to coal, and, secondly, to markets; and none of them have been placed near a great source of electrical energy. I am informed that there are locations where surplus water power seeks a market and yet those who would manufacture the compounds of nitrogen for industry, in which we include agriculture, have passed them by in favor of close proximity to coal, with ease of transporting that basic raw material. * * *
>
> These fundamental criteria have convinced the scientists and the engineers qualified to judge that to compel the allocation for any considerable period of any substantial part of Muscle Shoals power to the manufacture of fertilizer would be wholly unjustified and little short of criminal. There is nothing disgraceful and no indication of breach of faith in saying frankly to the farmer, who has been made to believe that the operation of Muscle Shoals will reduce the fertilizer bill anywhere from 25 to 43 per cent, depending upon the imagination of the

prophet, that since the original bills were passed the progress of science has changed the picture and that for the same reason he is sure to be able to buy nitrate, thanks to synthetic ammonia, for less in future than in the past, not to mention the other ways out.

Mr. KING. Mr. President, will the Senator permit an interruption?

The PRESIDING OFFICER (Mr. SACKETT in the chair). Does the Senator from Nebraska yield to the Senator from Utah?

Mr. NORRIS. I yield.

Mr. KING. The statement which has just been read by the Senator, as I understood him, was for the purpose of demonstrating that the cyanamide process of manufacturing fertilizer is not feasible. I ask for information whether the Senator recalls the report made by former Senator Ladd when he returned from Germany a short time before his death, in which he explained that he had visited one of the large plants constructed in that country, which manufactured nitrates and fertilizers which were sold in various parts of the world. I went with Senator Ladd to the plant to which he referred in his address. I do not recall whether the cyanamide process was employed in the manufacture of fertilizer in that plant.

Mr. NORRIS. Can the Senator tell me the name of the town where it was?

Mr. KING. I had forgotten for the moment. It was about a hundred miles from Berlin. I remember that.

Mr. NORRIS. If the Senator will give me the name of the town I think I can tell him what kind of a plant it was.

Mr. KING. It was the only plant Senator Ladd visited, to my knowledge, and we were together there during the time we were in Germany. May I say that the plant was successful. They used brown coal for the development of heat, and they did not have the benefit of cheap water power. They manufactured large quantities of fertilizer which, as I said, was distributed throughout the world, and they manufactured it very cheaply. It was a nitrogen product. They took the nitrogen from the atmosphere and converted it there, before one's very eyes, into this rich nitrogenous fertilizer. I was wondering why the Senator was combating the fact that fertilizer of that character could be manufactured cheaply.

Mr. NORRIS. I can not tell the Senator unless he would tell me the process used there. I have an idea from what the Senator said.

Mr. KING. It was merely taking nitrogen from the atmosphere.

Mr. NORRIS. That is what every one of them does. We have the atmosphere here and it has nitrogen in it, and the process is to get it out.

Mr. KING. Fortunately we have the same atmosphere everywhere.

Mr. NORRIS. And the nitrogen is just the same, but the method of getting it out is different. If the Senator could tell me whether that was the arc process, the Haber process, or the synthetic-ammonia process, I could give him some information.

Mr. KING. I think it was the Haber process.

Mr. NORRIS. That is the synthetic-ammonia process. I would expect to find that in Germany, and that is the kind of process I am advocating.

Mr. KING. All I know is that it was made very cheaply and was of very superior quality.

Mr. NORRIS. If the Senator could give me the name of the town I could probably tell him exactly, because I have here a list of every plant in the world, both of the synthetic process, the Haber process, and the arc process.

Mr. KING. I do not recall the name.

Mr. HEFLIN. Germany has both.

Mr. NORRIS. Yes.

Mr. HEFLIN. They have the Haber process and the synthetic process.

Mr. NORRIS. Yes; Germany has both.

I mentioned a while ago that there is a combination between some Germans and Norwegians where they combine the different plants. This information comes from our own Bureau of Foreign and Domestic Service, as follows:

> The negotiations pending between the Norsk Hydro and the I. G. Farbenindustrie have now, according to reliable reports, come to the following arrangement or contract between the two parties.
>
> The two companies will exchange shares so that each will hold an appreciable amount of shares of the other. This will be accomplished by an increase in capital by both the Norsk Hydro and the I. G. Farbenindustrie. A complete exchange of patents, methods, and experimental information will be effected, and the agreement will also result in a sales combination.
>
> For the Norwegian industry the agreement will immediately lead to the complete modernization of the plants at Notodden and Rjukan, through which the present volume of production, 33,000 tons per year, will be greatly increased. It is the plan to discontinue the Birkeland-Eyde arc process and replace it by the German Haber-Bosch method, which is much more economical, giving from three to four times as great a volume in proportion to consumed current.
>
> It appears that the Norwegian output will be tripled by the new Norwegian-German agreement and that Germany would benefit through the elimination of competition in allocated markets.

This would show that not only in this country but in Germany and in Norway the tendency is growing toward the Haber process, known by various names, but as a general term known as the synthetic ammonia process.

Now, I want to read from a bulletin issued by the research laboratory, Bureau of Soils, Washington, D. C. That is the laboratory over which Doctor Cottrell has jurisdiction. The bulletin comes from his bureau. It starts out by saying:

> From a study of the statistics as shown, there can be no doubt that the fixation of atmospheric nitrogen for agricultural and peace-time uses, as well as for war use, is here to stay. Not only does it appear that the products of such fixation can successfully compete with Chile nitrate, but also that atmospheric nitrogen is displacing and will continue, in a large and perhaps increasing measure, to displace Chilean nitrate. Of the three atmospheric nitrogen fixation processes, the position of major prominence held by the direct synthetic ammonia process can not be disputed. Not only is the production by this process far in excess of the combined production of the arc and the cyanamide processes, but the capacity in the former case is being greatly increased, while no expansion in the two latter processes is anticipated. In fact, a part of the increase in capacity of the direct synthetic-ammonia process is to displace the cyanamide process capacity. Of the hydrogen required for the fixation of nitrogen, according to the direct synthetic-ammonia process, 82 per cent is produced through coal, either from water gas or by-product coke-oven gas, as compared with 15 per cent by the electrolysis of water. The world is fast becoming less and less dependent upon Chile as its source of supply of inorganic nitrogen, while several of the major nations have reached or are approaching the position of total independence of foreign sources of supply.

That comes from a bureau which, in my judgment, on this subject is not surpassed anywhere in civilization. It is recognized as such all over the civilized world. Further on in this bulletin, speaking of the fixation of nitrogen, it is said:

> Commercial fixation may be considered as having started in 1903, when the first successful experiments were carried out in Norway by Birkeland and Eyde. This method, known as the arc process, is the result of attempts to emulate the lightning discharge.
>
> Although, with a few small exceptions, fixation by this process has been confined to Norway, and has never become a large factor in the world's supply, nevertheless, it served as the pioneer, which was soon followed by the cyanamide process and later by the direct synthetic-ammonia process.
>
> The atmospheric nitrogen fixation industry has enjoyed a rapid growth, stimulated, no doubt, by the war, but also later undoubtedly retarded by the effects of the war. From the small beginning of 1903 production increased to 9,000 tons in the year 1910, and over 600,000 tons for the year 1925. While this production in 1910 represented but 1.4 per cent of the total production, the 1925 fixed atmospheric nitrogen production, which was approximately equal to the total world nitrogen production of 1910, represented 45 per cent of the total 1925 production.
>
> Of the 1925 production but 41,000 tons, or 6.7 per cent, were fixed by the arc process, 188,000 tons, or 30.3 per cent, by the cyanamide process, and 390,000, or 63 per cent, by the direct synthetic-ammonia process.

That, it will be remembered, was in 1925, and I have already given the figures to show that the synthetic-ammonia process up to 1927 had practically doubled the amount given here as having been produced in 1925. The amount in 1927 under construction, being something over 316,000 tons, almost equaled the total production of 390,000 tons in 1925, just two years before. If there is anything of a scientific nature that can speak more loudly or more forcibly than that, I have not been able to find it.

Further on in the same pamphlet it is said:

> The nitrogen fixation industry is developing so rapidly, capacity and production figures are ever changing. New direct synthetic-ammonia plants are being erected, plans are on foot for substituting direct synthetic-ammonia plants for cyanamide plants, and new developments in the direct synthetic-ammonia process are being announced. By diverting the power now being used to fix the 40,000 tons of nitrogen as of the year 1925 by the arc process to the direct synthetic-ammonia process, 100,000 tons of nitrogen could be fixed. One producer of cyanamide advises that "As a whole, I think the production of cyanamide

is at a standstill. The existing factories are probably used, as far as possible, but no new factories will, in my opinion, be built, owing to the high production costs per ton of nitrogen compared with synthetic nitrogen."

In parts of Europe, however, the market is still good for cyanamide, and it is likely this market will continue for some time.

Mr. President, it ought to be remembered, though, I think, I might remind Senators again of it, that there is not a member of the Agriculture Committee who has any interest in this matter except to get cheap fertilizer. I do not think there has ever been an idea on the part of any of them of doing anything else but what, in his judgment, was best for the American farmer. I do not believe I underestimate the importance of fertilizer, although I knew little about it when I commenced to study the question, because I come from a section of country that is but little interested in fertilizer, where the soil is new and where very little fertilizer is used. But I can say that fertilizer is one of the most important items that any Congress or any official having anything to do with agriculture or the future of the human race has to deal; I do not believe its importance can be overestimated; and great as I think is the benefit to the people of the development of hydroelectric energy, I think it sinks into insignificance when compared with the fertilizer proposition. I hope I am broad enough, I hope I am patriotic enough, notwithstanding I come from a portion of the country that does not much need fertilizer, not to close my eyes to the need of agriculture in other parts of the United States where fertilizer is an absolute necessity if food is to be produced for the people and the farmer is to prosper in any degree.

It is immaterial to me, Mr. President, what process for the production of nitrogen may be used; there is not anything sacred about any process; but I believe Congress ought to act as would a set of business men engaged in the consideration of a business proposition. If we have machinery engaged in the production of some commodity and the machinery becomes out of date and we can do better by scrapping it, we ought not to hesitate even to do that. That is the way civilization has progressed; that is the way improvement has come about in every line and in every human activity. We are not performing any service to agriculture if we follow the propaganda that has been, I think deceitfully and wrongfully, spread over the country. The time will come when these "chickens will come home to roost"; the time will come when the farmer will find that those who ought to have led him aright have led him astray; the time will come when the American Farm Bureau Federation will realize that its representative now in Washington is misleading them, is leading them astray in trying to convince them of the truth of something as to which he ought to know better and does know better. I shall have something further to say on that subject as I progress.

Now, Mr. President, I am going to read to the Senate some testimony. I wish the Senator from Ohio [Mr. WILLIS], who has introduced as a substitute for the pending joint resolution a bill proposing to turn over this plant to the Cyanamid Co., had honored me to-day with his presence. I should like to place before him the testimony of some of his own witnesses. I wish to read to him and to the Senate the testimony of the very men who are interested in the Cyanamid Co.'s proposal, the men and their associates who are backing it—high-class men, as I think they are. However, here is their testimony. The bill introduced by the Senator from Ohio provides for giving over nitrate plant No. 2 and all the power there and nearly everywhere else on the Tennessee River to the Cyanamid Co. and to the Air Nitrates Corporation. So on this proposition those two corporations are one and the same.

J. O. Hammitt is vice president of the Air Nitrates Corporation and is the representative of the American Cyanamid Co. In the hearing on Muscle Shoals before the House Committee on Military Affairs of the Sixty-seventh Congress, second session, Mr. Hammitt testified, and I will read a part of his testimony:

Mr. HAMMITT. At the present time we would not make any offer, because we do not believe—

He is speaking of Muscle Shoals and nitrate plant No. 2—

we do not believe it is practicable to have a commercial operation of that nitrate plant at the present time unless the United States Government will make up the losses by providing a subsidy.

That is the testimony of the vice president of one of these companies that are now trying to get nitrate plant No. 2 at Muscle Shoals. I will demonstrate to Senators later on that their bid involves a subsidy that, if accepted, would be the greatest gift ever bestowed on man since God made salvation free. I will convince them, I think, that this representative—telling the truth, as I have no doubt it was the truth as he believed it—has practically stated in his testimony that his company would not bid for nitrate plant No. 2 unless the Government should make up the losses by a subsidy; in other words, demonstrating what I have so weakly but earnestly tried to convince the Senate and the country of, that no man can take plant No. 2 and make fertilizer there at a profit of 8 per cent and sell it upon the market below the market price as it goes from day to day, from month to month, and from year to year.

Here is a confession from the vice president of the company that they could not operate the plant unless the Government should subsidize them. Here is another part of his testimony. Mr. Hammett says in answer to a question asked by Congressman GREEN of Iowa:

I do not believe, frankly, that the United States Congress is ever going to approve the principle of the Government dipping down into the Treasury to support a manufacturing operation; and I do not want, personally, to see the American Cyanamid Co. or the Air Nitrates Corporation put in the position of competing for that kind of subsidy. * * *

* * * This is not a nitrate-plant proposition; this is a water-power proposition, and this nitrate-plant end of it is nothing except what somebody offers for the purpose of attracting a certain support in order to enable him to get a cheap water-power contract.

That is the testimony of the vice president of one of these corporations that, if the Senator from Ohio succeeds in passing his bill, are going to get this property at Muscle Shoals. He is only telling what you have been told many times by a weaker voice, but he has spoken before that committee; that is his testimony.

Mr. BLACK. Mr. President, was the last statement made by Mr. GREEN?

Mr. NORRIS. No; that was made by Mr. Hammitt.

Mr. BLACK. Will the Senator read the last statement again?

Mr. NORRIS. Very well, I will read it again.

Mr. BLACK. I understood the Senator to say the statement was by Congressman GREEN. That is the reason for my making the request.

Mr. NORRIS. No; I said that the statement was made in answer to a question by Congressman GREEN. What portion does the Senator wish me to read?

Mr. BLACK. I understood what the Senator read about "dipping down into the Treasury" was in a statement by Mr. GREEN.

Mr. NORRIS. No.

Mr. BLACK. That was what I understood.

Mr. LA FOLLETTE. Mr. President, it is utterly impossible to understand the conversation between the Senator from Alabama and the Senator from Nebraska.

Mr. NORRIS. The Senator from Alabama has misunderstood something I have read, and I am trying to find out just what he wants me to read again. I will have to go over it all, and this time I will read the question.

Mr. GREEN—

That is Congressman GREEN, I understand.

And you stand, admittedly, as a dog in the manger?

There is a part of the testimony omitted, and then comes the answer of Mr. Hammitt to I presume another question.

Mr. HAMMITT. Congressman, I do not believe, frankly, that the United States Congress is ever going to approve the principle of the Government dipping down into the Treasury to support a manufacturing operation; and I do not want, personally, to see the American Cyanamid Co., or the Air Nitrates Corporation put in the position of competing for that kind of subsidy. * * *

* * * This is not a nitrate plant proposition; this is a water-power proposition, and this nitrate plant end of it is nothing except what somebody offers for the purpose of attracting a certain support in order to enable him to get a cheap water-power contract.

In other words, that means this is nothing in the world but an effort to deceive the farmer and get his support to help put the scheme through Congress in order that the beneficiary may obtain some cheap water power for manufacturing purposes.

Later on the same Mr. Hammitt says:

Here is what I would do in regard to nitrate property, or what I would advise the United States Government it should do. I would keep that nitrate plant unoperated, in a stand-by condition, which is 100 per cent better preparedness, anyway, than putting it in operation.

Much has been said by Mr. Gray, the representative of the Farm Bureau Federation against the proposition we have before us. He says that will result in the cyanamide plant standing idle. It will. It is now in a stand-by condition and it is not

operated, and Mr. Hammitt, the vice president of the Air Nitrates Corporation, telling what he would do, says:

Which—

That is, allowing it to remain idle—

is 100 per cent better preparedness, anyway, than putting it in operation. * * * The plant can not be operated commercially, Congressman, because it is not capable of making anything that has a market on which you could get back the cost of production.

Mr. GREEN. You are speaking of the nitrate plant?

Mr. HAMMITT. I am speaking of the nitrate plant; yes, sir. It is not capable of being operated on a basis that would carry any overhead. It is simply not a practicable commercial proposition.

Mr. Hammitt further says:

We see no way, without aid of the Government Treasury, that any company can afford to undertake at the present time the operation of that nitrate plant, and we will not ask aid out of the Government Treasury. Mr. Ford will not lose money on his proposition if it be accepted and sustained in the courts, in my opinion, because the losses will be borne by the United States Government through its contributions to the cost of the large and important blocks of power that Mr. Ford will receive; and it is entirely conceivable that by financing a valuable thing like a water power for an individual or a corporation you can make up to it enough of a premium to justify it in operating a manufacturing plant at a loss, and that really is the essence of the Ford proposal.

I ought to have said that all of this testimony was given when Ford's offer was before us, when these people who are now trying to get it themselves for a much more wicked proposition than Ford had, in my judgment, were contending and telling why this was an impossibility under the Ford proposition. Now their chickens are coming home to roost.

It is not a fertilizer proposition primarily, but it is a means of obtaining at the expense of the Government Treasury a very cheap water power.

Again he says:

In the first place, this plant—

Nitrate plant No. 2, he means—

is designed for the manufacture of ammonium nitrate. Ammonium nitrate is not a fertilizer material. It is not practicable as a fertilizer material. * * * As it stands to-day, the plant can not make any material that is used in the fertilizer industry.

That is true. Everybody knows that. We have to add a lot of machinery before we can make fertilizer out of it, and I have been trying to find out how much it would cost. I have asked several people. I asked Doctor Howe, for instance, some of whose testimony I have read. I asked Doctor Cottrell, and this morning I asked Mr. Bell the same question. No two of them agree. They all agree that it would cost a good deal of money. They likewise all agree that if we are going to use nitrate plant No. 2 we would have to spend considerable money on that to get it up to date even in the cyanamide business; so this man told the truth when he was talking about Ford's offer.

As it stands to-day, the plant can not make any material that is used in the fertilizer industry.

That is true to-day. Mr. Bell thought that to make the cyanamide plant up to date as a cyanamide plant would cost about $2,000,000, and he said that the other machinery necessary to install to run it to its capacity of about 40,000 tons a year would cost $35,000,000. That is three times as much as it would cost to build a synthetic-ammonia plant that would produce the same amount of nitrogen at one-sixth of the power that is required for nitrate plant No. 2.

Mr. TYSON. Mr. President, will the Senator yield?

Mr. NORRIS. Yes.

Mr. TYSON. I should like to ask the Senator what amount of power it is estimated would be required if nitrates for explosives were made during war in plant No. 2?

Mr. NORRIS. Nearly 100,000 horsepower.

Mr. TYSON. In other words, if that plant were to be kept there for that purpose, 100,000 horsepower would be required to make nitrates for use in time of war?

Mr. NORRIS. It would probably be somewhat under that. I do not know how much power the additional machinery that would have to be put in to make fertilizer would take, but it is estimated that when it is all in it would take 100,000 horsepower to operate it.

Mr. TYSON. I am assuming now that no fertilizer is made, but that it is used only for making explosives.

Mr. NORRIS. Yes; that is what I am trying to answer. It would be something less; between 80,000 and 100,000 horsepower, I should say.

Mr. TYSON. How much nitrate would be fixed in the course of a year if it were run to full capacity?

Mr. NORRIS. Forty thousand tons.

Mr. TYSON. That is what I understood.

Mr. NORRIS. Now I will finish reading Mr. Hammitt's testimony:

As it stands to-day, the plant can not make any material that is used in the fertilizer industry. * * * You can make that cyanamide of the Muscle Shoals plant into a fertilizer, cyanamide, by a relatively minor process of further manufacture, for which you must provide a plant that is not there now.

That is what I have been trying to tell the Senate.

That is not an operation that could practicably be initiated at Muscle Shoals for the use of that nitrate plant and show anything except a heavy loss. * * * In order to manufacture sulphate of ammonia at the Muscle Shoals plant you use a certain part of the existing plant; * * * it is quite obvious you can not make that at a profit.

Mr. President, the testimony of this man, the vice president of the Air Nitrates Corporation, was given several years ago when the Ford offer was here, which he was opposing and which he was fighting. I think every word of that testimony is true, but it applies 100 per cent now to this same man.

Now, I want to read some further testimony from Mr. Hammitt during the second session of the Sixty-seventh Congress at the hearings before the Senate Committee on Agriculture and Forestry on Senate bill 3420:

Neither we nor anyone else has made an offer to the Government for taking over and operating nitrate plant No. 2 without attaching to that offer some condition in the form of compensation for doing that thing. * * * Now if you cut the power end of his (Mr. Ford's) proposition out, he has no interest whatever in the nitrate plant. The reason he has no interest in it is the same reason that at the present time we are not prepared to make a proposal to the Government for its operation; namely, that you can not make anything at that nitrate plant now, even with cheap power, for which you could get more than approximately two-thirds of what it would cost you to make it. In other words, the operation of the nitrate plant in time of peace must be a losing operation. Mr. Ford, however, under his proposal, would receive from the United States compensation which he evidently considers is sufficient to make up all of his losses on the operation of the nitrate plant and still some more.

Further on, Mr. Hammitt testifies:

Now, as to the value of the United States nitrate plant No. 2, Senator, with a condition attached to it that that nitrate plant must be used in its present condition, I should say that it would have no value whatever, because you can not use that plant in its present condition, or with any modifications that would materially alter the character of the plant, for the production of anything the production of which at that plant would net you otherwise than a loss.

That is Mr. Hammitt, first before the House committee, next before the Senate committee.

Mr. GEORGE. Mr. President, will the Senator permit an interruption?

Mr. NORRIS. Yes, sir.

Mr. GEORGE. The Senator has studied the several bids made by private companies for Muscle Shoals. I desire to ask the Senator if any one of these bidders has offered to make more fertilizer, or offered to make more advantageous terms upon the fertilizing material proposed to be produced, than Mr. Ford himself did?

Mr. NORRIS. I do not think so.

Mr. GEORGE. In other words, the Ford offer, so far as the making of fertilizer is concerned, and so far as the terms upon which it was to be sold are concerned, is as good as or better than any of these others?

Mr. NORRIS. In my judgment it is, Mr. President. The Ford offer—to which, as the Senator knows, I was bitterly opposed—was, as I think Mr. Hammitt truthfully states, coupled up with the power proposition, just as this Cyanamid bid is; but here, in reality, is the difference:

The Ford proposition required the Government to build Dam No. 3; and, outside of the finishing of Dam No. 2—it was not finished at that time—that, in a general way, was practically the extent of the expenditures to which the Government would have to go under the Ford bid. The Cyanamid bid, as I will show here, not only requires all of that, but it requires the Government to build Cove Creek Dam. It requires the Government to add 30,000 horsepower to the steam plant. It

requires the Government to build transmission lines. In addition to that, it requires favorable consideration of applications for three more power sites that must be given to it by the Federal Power Commission, instead of taking their chances, as everybody else must take them, in getting from the Federal Power Commission the right to build dams. So it has much more power in it than Ford's proposition had, because the leasing of money, if you put it on a leasing basis, is practically the same. I have forgotten what it was in Ford's proposal; I had it all figured out at that time; but under the Cyanamid and Air Nitrates plant bid, if you figure up everything they pay and the amount that the Government expends, you will find that they are doing business on Government money at 2.6 per cent per annum. That is the way it was figured out by an expert.

Here is the testimony of Mr. Bell, the president of the American Cyanamid Co., when he was testifying before the joint committee last year:

Representative JAMES asked this question:

Just one question before we finish. The so-called distribution-of-power provision is section G, on page 45; is it not? * * *

Mr. BELL. You see, Mr. JAMES, that does not require us to distribute a single kilowatt. I do not want to deceive anybody about that.

So here is another point that I have already told the Senate—admitted by Mr. Bell himself—that under the bill of the Senator from Ohio the Cyanamid Co. are under no obligation to distribute a single kilowatt of electricity. They can keep it all; they can sell it all; they can do what they please with it. It is theirs, and there is no regulation or anything else about it. In that respect it is just like the Ford bill, although I think Mr. Ford said, outside of the bid, that if he got it he was going to distribute a good deal of the power. Mr. Bell, however, reminds the committee honestly—and I commend him for what he said; he was honest with the committee—

You see, Mr. JAMES, that does not require us to distribute a single kilowatt. I do not want to deceive anybody about that.

That is the notice to us, now, honestly given, like an honorable man, which I think he is. If he gets it, he says, "I am under no obligation to distribute a single kilowatt." He does not say what he would do with it.

Mr. TYSON. Mr. President, will the Senator yield?

Mr. NORRIS. Yes.

Mr. TYSON. I wish to ask the Senator if he understands that that applies also to the power which is generated or supposed to be generated at Cove Creek?

Mr. NORRIS. Yes.

Mr. TYSON. And the other three dams?

Mr. NORRIS. Yes. Before I get through I will read the provision of the bill as to those other three dams. As I remember it, there is nowhere, even indirectly, any limit as to what they can do.

Now, I want to read from the testimony of Mr. Washburn. I think, at the time this testimony was given, he was the president of the Cyanamid Co. He was an official of the company, and I think he was the president. I thought I had something here that stated what position he held, but I have mislaid it if I had it.

This was before the Senate Committee on Agriculture and Forestry, in opposition to the so-called Kahn-Wadsworth Muscle Shoals bill, Senate bill 3390, Sixty-second Congress, second session.

Senators, at least members of the Committee on Agriculture, will remember that Senator Wadsworth in the Senate and Mr. Kahn in the House introduced similar bills, I think identical bills, as I remember it now, for the purpose of disposing of this property. Mr. Washburn testified in opposition to that bill. I have considerable of his testimony, but I am not going to burden the Senate with very much of it. Here is part of the testimony:

One of the things is that the Government may be permitted to produce cyanamide fertilizer. They do not expect to do it, they say, but they can do it. This the Government can not do.

Remember, these people were going to operate nitrate plant No. 2 down there, and he is telling why they can not do it. They say they are going to use that plant No. 2 to produce fertilizer. He makes the broad statement that they can not do it, that even the Government dare not do it, and he is going to tell why. He said:

They do not expect to do it, they say, but they can do it. This the Government can not do. The rights of the Government for manufacturing at Muscle Shoals are only the rights delegated to it by the American Cyanamid Co. The patents under which rights are given are specifically set forth in the agreement with the Government and do not include the patents covering either the manufacture or the use of cyanamide fertilizer.

The CHAIRMAN. When you say "this they can not do," what do you mean by it?

Mr. WASHBURN. I mean that they can not do it in the same sense that no private party could build a plant or take an old one and proceed to make cyanamide fertilizer. They have not the patent rights, and it was never intended that they should have them. Those patent rights are our means of protection and perfectly proper means. That plant was not built to make cyanamide fertilizer; it was built to make explosives.

Suppose, as some have asked me to propose to do, we had passed legislation that the Government should operate nitrate plant No. 2. What would be the first thing we would be up against? The Cyanamid Co., which everybody concedes owns the patents says, as Mr. Washburn says here, "You are estopped from making fertilizer. We own the patents. We have given you the right, in nitrate plant No. 2, to make explosives, but that is an entirely different thing." It is somewhat of a different thing. We must have different machinery, in addition to what is there now. "You can not make fertilizer. You infringe our patent rights."

Probably arrangements could be made by paying a royalty or something of the kind to do it, but we have that notice from Mr. Washburn, representing the Cyanamid Co.

Mr. HEFLIN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Alabama?

Mr. NORRIS. I yield.

Mr. HEFLIN. Mr. Washburn, the Senator will remember, contradicted himself. He first said, "You could make it there," then later he said, "You could not." But if the American Cyanamid Co. should get the Muscle Shoals project, having the patents, they can make fertilizer, because they are making it now.

Mr. NORRIS. I am not claiming that if we passed the bill introduced by the Senator from Ohio the Cyanamid Co. would get the whole thing. Of course, they could make fertilizer. They have the patents. But I am offering this testimony to meet the statement that Congress should pass a resolution compelling the Secretary of Agriculture to operate plant No. 2 and let us see what it would do for two or three years' time. We are squarely up against a patent right if we undertake that kind of a proposition.

Further on Mr. Washburn says:

The Government acknowledges the ownership of the patents by the American Cyanamid Co., and that company licenses the operation of the plants, under specific patents indicated by number, date, and title. The company's patents covering the manufacture and use of cyanamide fertilizer, phosphoric acid or any of its processes, including the electric-furnace phosphate process and ammonium phosphate, are not included in those for which rights are given.

Later on, the chairman asked a question:

The CHAIRMAN. Does the Cyanamid Co. produce a sufficient amount now, at the present time, to supply the needs for fertilizer?

Mr. WASHBURN. Just about, so far as cyanamide is concerned.

Later on, Mr. Washburn made another statement, and I wish Senator would listen to this statement of the man who was then president of the Cyanamid Co.:

Mr. WASHBURN. The farmers are of the impression that the Muscle Shoals plant is a fertilizer plant. You know, it is always spoken of as that. They say there is a shortage of fertilizer, and they come to you gentlemen, and they use their influence, and quite properly, and say, "Please start up the Muscle Shoals plant and aid agriculture." A perfectly sound argument, if the facts were there to support it. So far as the farmer knows, the facts are there.

Further on, Mr. Washburn said:

The cost of your water power down there is going to be somewhere in the neighborhood of $20 or $25 per horsepower a year.

Senator RANSDELL. Would that be prohibitive?

Mr. WASHBURN. Absolutely.

I submit, Senators, that this testimony of the very men who are trying to get this plant substantiates what I have said, every word, in every detail.

Mr. Washburn said later on:

Senator, I would like to disabuse your mind of the idea, and the committee, of course, that that plant must be used in order to preserve it.

That is what the American Farm Bureau Federation head says in his letter in regard to my proposition, that we have to use it to keep it, that we must not keep it in a stand-by condition, that we must use it.

Mr. FLETCHER. Will not the Senator tell us about when this testimony was given?

Mr. NORRIS. I think I did state that.

Mr. FLETCHER. I was not in the Chamber when the Senator stated it.

Mr. NORRIS. This was before the Committee on Agriculture and Forestry, Sixty-second Congress, second session, I think it was on April 8, 1920. If the Senator did not hear what I said at the beginning, Mr. Washburn then was speaking in opposition to a bill pending before the committee, introduced by Senator Wadsworth, of New York.

On February 9, 1916, Mr. Washburn, the then president of the American Cyanamid Co., appeared before the House Committee on Agriculture and discussed the fertilizer question. This is reported in the hearings before the House Committee on Agriculture, Sixty-fourth Congress, first session. He said:

> We feel warranted in the belief that if the nitrogen industry is to be established in the United States it must be able to secure power by means not yet provided for under our laws and at much lower cost than it can be secured by ordinary commercial methods. There is one agency through which this possibly may be done, namely, by the Federal Government supplying power at a navigation dam built by the Government.

That was before we had this question pending here. It was in 1920 that he gave that testimony as I said. That testimony was given by the men who were then in the management of the Air Nitrates Corporation and the Cyanamid Co., testimony given when they were opposing the Wadsworth bill and the Ford bill, and this last quotation referring to some other bill, pending in the House, I am not sure what bill, but I think it was before we got into the hearing on Muscle Shoals. That was testimony by the men who are now asking that this plant be turned over to them, with the gift of the greatest power facilities generated from navigable streams of the United States, the dams entirely constructed from the funds of the Federal Treasury. Have Senators ever known of anything as great in the way of a subsidy being asked of the Government?

Mr. President, the Cyanamid Co. manufactures a great many things, and I shall put a list of them into the RECORD. As I have counted them up here hastily, there are 52, all kinds of products, using all kinds of power. They made cyanide, for instance, copper sulphate, casehardening compounds, cyanide, copper; cyanide, potassium; cyanide, silver; cyanide, sodium; cyanide, sodium, of another kind; cyanide, zinc; and a lot of other things that I will not attempt to pronounce. They make aquaamsnonia; ammonia, anhydrous; ammonium chloride; barium chloride; barium carbonate; copper carbonate; cresylic acid; formic acid; lead acetate; potash, caustic; potassium carbonate; quicksilver; soda, caustic, and a lot of other things. They make a fertilizer, ammo-phos. You can fertilize with cyanamide. It has no fertilizer ingredients in it except nitrogen, but, as I said a while ago, the ordinary farmer, or the ordinary person, can not apply it to his crop, because he would kill the crop. If it touches the crop, it burns it up. It is difficult to apply.

They make ammo-phos. That is a fertilizer that has nitrogen and phosphorus in it, and, as they say, at least half of their product is shipped abroad. They have been in that kind of business for years. I will show later that if there is a fertilizer trust they are pretty close to it.

If they are making this fertilizer, and it is a practical fertilizer that the farmer can use, why has not the farmer found it out in all these years? They do not sell any fertilizer to the farmer. They sell to fertilizer dealers and fertilizer manufacturers. If there is a trust, they sell it to the trust. There are those who favor this bill, who have been crying out aloud from the house tops and the mountain tops ever since we have had this question here that there was a fertilizer trust. These people whom they now want to get it are part of the feeders if there is such a trust. I have never claimed there was such a trust, and I do not claim it now.

I ask, Mr. President, that the list of these products manufactured by the American Cyanamid Co. be included at this point in my address, without further reading.

The PRESIDING OFFICER (Mr. BLAINE in the chair). Is there objection?

There being no objection, the list was ordered to be printed in the RECORD, as follows:

AMERICAN CYANAMID CO.,
535 Fifth Avenue, New York, N. Y.

PRODUCTS

Industrial chemicals, fertilizer materials, and insecticides and fumigants.

INDUSTRIAL CHEMICALS

Aero brand cyanide: For cyaniding gold and silver ores.

"Aerofloat" flotation reagent: A new and highly selective reagent possessing both promoter and frothing properties.

Case hardening compounds: Containing 27 per cent and 43 per cent sodium cyanide, respectively.

Copper sulphate: 98 to 99 per cent, large and small crystals for mining and insecticide uses.

Cyanide, copper: Containing 71 per cent copper.

Cyanide, potassium: Single salt, 94 to 96 per cent.

Cyanide, silver: Containing 80½ per cent silver.

Cyanide, sodium ("Aeroids"): 96 to 98 per cent NaCN, in one-half ounce ball form. For all industrial purposes.

Cyanide, sodium ("Flotation grade"): 120 per cent KCN, for use in flotation operations or any cyaniding process.

Cyanide, zinc: Containing 55 to 55½ per cent zinc.

Dicyandiamid: 99 per cent pure. Source of other guanidines and pharmaceuticals.

Di-Ortho-Tolylguanidine (D. O. T. G.): 99 per cent plus pure. An accelerator of rubber vulcanization.

Diphenylguanidine (D. P. G.): 99 per cent plus pure. An accelerator of rubber vulcanization.

Orthotoluidine: 95 per cent pure.

Pine oil: G. N. S. No. 5 oil. Pure steam distilled. The standard frothing oil.

Potassium prussiate, red: Over 99 per cent pure.

Potassium prussiate, yellow: Over 99 per cent pure.

Sodium prussiate, yellow: Over 99 per cent pure.

Sulphocyanides: Aluminum, ammonium, barium, calcium, lead, mercury, and potassium.

Sulphur: Over 99½ per cent pure, ground.

Thiocarbanalide: Technical grade for rubber accelerator and flotation uses.

Xanthate: "Rusco" brand potassium and sodium, for flotation.

Zinc dust: "Asarco" brand. High metallic for industrial uses and high efficiency for mining requirements.

Zinc sheets: Metallic content, 98 per cent plus. Standard for mining requirements.

Zinc sulphate: "Asarco" brand, containing 35 per cent zinc.

OTHER INDUSTRIAL CHEMICALS

Ammonia, aqua, ammonia, anhydrous; ammonium chloride; barium chloride; barium carbonate; blanc fixe; copper carbonate; cresylic acid; formic acid; lead acetate; potash, caustic; potassium carbonate; quicksilver; soda, caustic; sodium carbonate; sodium bicarbonate; sodium silicate; sodium sulphide; sulphuric acid; thiourea; and urea.

FERTILIZER MATERIALS

Ammo-Phos: A high-analysis material offered in two grades—13 per cent NH_3 and 48 per cent available P_2O_5; 20 per cent NH_3 and 20 per cent available P_2O_5.

Aero brand cyanamide: 25 to 28 per cent ammonia.

Phosphate rock: Florida land pebble.

INSECTICIDES AND FUMIGANTS

"Cyanogas" calcium cyanide: for fruit-tree dusting and rodent control.

Hydrocyanic acid, liquid: For general fumigation, insecticidal and chemical uses.

S-dusting mixture: For dusting fruit trees.

Our technical department will be glad to cooperate with you in solving problems involving the application of any of our products. All inquiries, which should be directed to our New York office, will receive immediate and careful attention.

Mr. HARRIS. Mr. President, the Senator stated there is no Fertilizer Trust. I suppose that is true, but there is no question about the fact that fertilizer companies have had a lobby here for years.

Mr. NORRIS. Yes; I think so. I am not denying it. If it is claimed there is a Fertilizer Trust, I will just admit it for the sake of argument.

Mr. HEFLIN. I can refresh the Senator's recollection. I call attention to the report made by the Federal Trade Commission about two years ago that we did have a Fertilizer Trust.

Mr. NORRIS. That report was made in response to a resolution introduced by me. I mentioned it yesterday. Their report said we do not have a Fertilizer Trust, as a matter of fact. That is my reading of the report. I have read it and I think,

notwithstanding that conclusion, that there are a good many elements of trust involved in it.

Mr. HEFLIN. My recollection of the report is that they charged that they did have a combination in restraint of trade.

Mr. NORRIS. I have always gone on the theory that there was a contention about it and I have never tried to find out definitely because, to my mind, for the purposes of the legislation which I was trying to have enacted or defeated, either one, it was immaterial whether there was a trust or not. I wanted to make fertilizer cheaper. I did not care whether there was a trust or whether there was not. We had a great abundance of testimony before the Committee on Agriculture and Forestry from representatives of the so-called Fertilizer Trust. They all denied it. But fertilizer was costing too much to the farmer. I have always been convinced of that. Whether anybody was making too much money out of it may be another question.

Mr. McKELLAR. Mr. President, I know the Senator has examined not only into this question but all kindred questions. Can he tell us whether the various fertilizer companies sell at substantially the same price?

Mr. NORRIS. I think they do.

Mr. McKELLAR. Or is there competition?

Mr. NORRIS. I think the reports show that in some lines there was competition, but the Attorney General charged that there was a Fertilizer Trust. I am going to refer to that at a later time, and I think I shall place in the RECORD a copy of his petition, because I have it here. He went into court and made that charge. I do not think it was ever shown in court. I do not know what happened to the case. I do not think it was ever tried.

Mr. HARRIS. May I remind the Senator that the Federal court at Baltimore indicted a number of fertilizer representatives two years ago. It was done on complaints from farmers of Georgia and North Carolina, which were brought to the attention of the Attorney General by myself. It was found that they had agreed as to price in violation of the law. Those men were fined $98,000. Behind closed doors in Baltimore they fixed the price and kept up that price.

Mr. NORRIS. I am glad to learn that, because I am going to offer some evidence which will connect the Cyanamid people up pretty close to these very places, and when I do so I shall expect the Senator from Alabama, instead of supporting the Cyanamid Co. to turn violently against it.

Mr. McKELLAR. If all those various companies have fixed their prices, that is one of the elements which we generally conceive to be an element of a trust, is it not?

Mr. NORRIS. Yes; I think so.

Mr. GEORGE. Mr. President, if the Senator from Nebraska will permit me——

Mr. NORRIS. I yield.

Mr. GEORGE. The fertilizer people were not prosecuted as a trust. I think they were simply prosecuted for entering into an agreement in restraint of trade, inasmuch as they had reached an agreement fixing prices and all had abided by the prices. That was in 1926. The prices in 1927 fell considerably. There was the very sharpest kind of competition. The prices now have been advanced to where they were in 1926, and the prices of all the leading manufacturers of fertilizer are substantially uniform, varying only a small fraction indicated by most of the fertilizer companies in cents rather than dollars per ton.

Mr. McKELLAR. That is another suggestion that there might be a trust, is it not?

Mr. GEORGE. Not a trust so far as I know, but the prosecution was because of an agreement in restraint of trade on the theory that they were independent operators and had made an agreement in restraint of trade, which, of course, would have all the effects of a trust. That was in 1926. In 1927 the prices of commercial fertilizer fell and plunged downward, to the very great relief of the farmers, but in 1928 the price is back where it was or substantially where it was in 1926, and the price is just as uniform now as it was in 1926.

Mr. NORRIS. I thank the Senator.

Mr. BLEASE. Is it not a further fact that they make the farmer pay cash?

Mr. GEORGE. That is quite true, as the Senator from South Carolina has pointed out. Of course they do not compel the farmer to pay cash, but the difference between the cash price and the time price is so great that it is exorbitant.

Mr. NORRIS. I was told to-day that the difference between the cash price and the time price is $20 a ton. I wonder if that is right.

Mr. GEORGE. It ranges from something like $8 to $10 a ton. It depends, however, on the price of fertilizer, but upon a fertilizer retailing for $30 a ton the credit price would be something like $38 to $40 a ton, so that, practically, the farmer has been compelled to pay cash.

Mr. NORRIS. Now, I am coming back again to the question of the propaganda, which I am going to discuss at a later time. At the present time I want to take up for a few moments the bid of the American Cyanamid Co. When I speak of the Cyanamid Co. I mean, of course, the bid of the Air Nitrates Co. and the American Cyanamid Co., because they have a joint bid.

The bill of the Senator from Ohio [Mr. WILLIS] would accept that bid. That is what his bill provides. I want to analyze that bid somewhat and show what it would cost the Government to accept it.

The bid of the American Cyanamid Co. covers property now owned by the Government which costs $125,104,000. In addition to this, it proposes to lease the property, which is to be built by the United States, at an estimated cost of $77,300,000, making in the aggregate the leasing of property owned by the Government which cost the Government over $200,000,000. Of this total, $133,000,000 represents power properties, exclusive of locks. Of this amount, approximately $56,000,000 represents power property now owned by the Government.

Total power lease. The power project when completed will have an installation of 1,220,000 horsepower. I have been severely criticized for using these figures. I have gone over them again. I will read later on some of the criticisms. I think that my figures are approximately right, but when I went over the figures again I got 1,174,000 horsepower. So that at least I am well over 1,000,000. That is the installed horsepower which is going to be turned over to these bidders, and it does not include three other dams which they get a special right to bid for and build at their own expense.

That is the property which will be owned by the Government and leased if the Willis bill is passed—over 1,000,000 installed horsepower. That does not mean there is 1,000,000 primary horsepower there, but it means that the installation provides for that. There will be times when that can not all be operated.

This horsepower will amount to more than one-half of the total hydroelectric power now installed in the six Southern States of Alabama, Georgia, North Carolina, South Carolina, Tennessee, and Kentucky, and will mean an average annual output of power equal to 80 per cent of the total electric energy, steam and hydro, produced in these six States in 1926.

Now, we are getting at the magnitude of the proposition and what it is proposed to turn over to the lessees. By this bid the impression is conveyed that the lessee will pay the Government 4 per cent interest on its investment. This claim is continually made by those who are advocating the acceptance of the bid. It is made all over the United States through this representative in Washington of the American Farm Bureau Federation. The claim is untrue. It is misleading, because only nominal payments are made during the first six years, and interest is paid on only a part of the estimated future investments of the Government. It will be found upon figuring it out that the total of all payments made for interest, maintenance, and alleged amortization, which the lessee makes to the Government during the period of the lease, is only 2.6 per cent upon the investment of the United States in power property. This computation excludes all locks and navigation facilities. No interest whatever is paid by the lessee for the nitrate property which cost the Government, in round numbers, $69,000,000.

Now, let us see what the lessee puts into this business. The Cyanamid Co.'s investment in power property is limited to the cost of installing 80,000 additional horsepower equipment in the Sheffield steam plant. This is estimated to cost $5,400,000. That is everything that the lessee does invest that it does not get back.

Lessee's investment in fertilizer facilities: The lessee's investment in new nitrate plant and equipment will depend upon its ability to sell, at a profit of 8 per cent, the nitrates produced. It is obligated under its bid to install equipment sufficient to produce fertilizer with a fixed nitrogen content of 10,000 tons. Any further obligation in this direction depends upon its ability to sell at a profit of 8 per cent the entire output of 10,000 tons.

It is allowed to charge, in the cost of fertilizer, every item of cost connected with the construction and operation of the nitrate properties, including each year 10 per cent of its own investment in new plants. This is an amortization fee which the purchaser of fertilizer will be compelled to pay; so, in the end, the farmer will pay the entire cost of the fertilizer investment.

Now, I want the Senate to think of that for a moment. This is in the bill which the Senator from Ohio [Mr. WILLIS] would like to see enacted into law; it is in the bill that is advocated here and elsewhere by the Washington representative of the American Farm Bureau Federation, taking advantage of his

position and sending out to the farmers all over the United States misleading and often untrue information as to what this measure really is. Every dollar the company invests in fertilizer machinery is added to the cost of fertilizer—one-tenth of it every year—so that at the end of 10 years the farmers of the country, who have been urged by this farm representative to push on this move to acquire this great power, would pay back to this corporation every cent that it invested in fertilizer machinery.

Now, as to the lessee's profit.

It is estimated by Mr. Merrill, executive secretary of the Federal Power Commission, that the annual profit, with the plants under full operation, would be in excess of $7,000,000 on an investment of the lessee in power properties of only $5,400,000.

That is a pretty good thing. There are not many men but would like to have that kind of an opportunity. That is the estimate—it has to be, to some extent, an estimate, I concede—made by Mr. Merrill, whom everybody here knows. Nobody will charge Mr. Merrill with being friendly or particularly friendly at any rate, to the idea that I have advocated in regard to Muscle Shoals. He is not a Government-ownership man who is misled by bolshevik propaganda; he is one of our sound business men; he is one of the men that even all stand-patters look up to. I also look up to him; I have great confidence in him. While I do not agree with him in a great many things, I concede the honesty and conscientiousness of his position; and everybody, I think, concedes his ability, that he is an expert on this proposition. Those are his figures, not mine.

The lessee is subject to no regulation whatever for surplus power. It is very likely the intention of the lessee to use all the power in excess of fertilizer requirements in electrochemical or other industrial processes owned by the Cyanamid Co. or by its allies or subsidiaries. The lessee has the sole power of disposition, and in making use or other disposal of the power it will be subject to no regulation whatever.

It will be remembered that I read the testimony of one of the officials of the Cyanamid Co. who said, in answer to a question of Representative JAMES, "I do not want to practice any deception; you will notice that there is no restraint whatever on us in the use of this power."

I will enumerate the total capital expenses of the Government. Under this bid the Government of the United States would be required to install additional equipment—machinery—at No. 2, so as to bring the capacity of the dam to approximately 600,000 installed horsepower. The Government would also be required to construct Dam No. 3, which would have installed horsepower of approximately 250,000. The Government would also be required to construct a transmission line between Dam No. 3 and Dam No. 2 of 250,000 horsepower capacity. The Government would also be required to build a dam 225 feet in height at Cove Creek, with an installed power capacity of 200,000 horsepower. It would be required also to construct a transmission line connecting Cove Creek with the power house at Dam No. 2. The estimated cost of the properties thus to be built at the expense of the Government of the United States—and this estimate is made by Mr. Merrill, executive secretary of the Power Commission—are itemized as follows:

Additions to Dam No. 2, $8,285,000; dam and power house No. 3 (exclusive of locks), $34,650,000; transmission line No. 2 to No. 3, $225,000; Cove Creek Dam and power house (without locks), $38,140,000; transmission line Cove Creek to No. 2, $6,000,000; making a total of $77,300,000.

It is proposed not only to turn over property that we have now that has cost us more than $125,000,000 but to include investments in other property which we also turn over to the amount of $77,300,000 from the Federal Treasury.

Mr. McKELLAR. What does the Government get out of that?

Mr. NORRIS. Under the Willis bill it gets interest on the payments it has made amounting to 2.6 per cent annually.

The total property investment of the United States would therefore be as follows:

Nitrate plant No. 1, $12,888,000; nitrate plant No. 2, including the steam plant and Waco quarry, $67,555,355.09; Dam No. 2, to present capacity, $43,388,000; New dams at Cove Creek and Dam No. 3 and additions to Dam No. 2, $77,300,000; making a total capital investment on the part of the United States of $202,404,335.09.

Now let us get the total capital investment of the Cyanamid Co. How much are they going to put in? The Government has put in over $200,000,000 for them.

The total capital expense of the Cyanamid Co. of which we can be anywhere near certain is the estimated cost of $5,400,000 for additional steam plant. Assuming, of course, that the Cyanamid Co. will use the cyanamide process for which nitrate plant No. 2 was designed, it will be necessary to build in addition to the existing plants an ammonium phosphate plant and a phosphoric acid plant. An ammonium phosphate plant of a capacity of 48,000 tons of fixed nitrogen is estimated to cost $7,500,000, and for a 10,000-ton unit about $2,000,000. I do not believe, however, if the Cyanamid Co. bid shall be accepted that the company will ever build a plant exceeding 10,000 tons, because it can not be required to build additional plants until it has sold that 10,000 tons at a profit of 8 per cent; but if the nitrate plants are, in fact, extended to permit of the entire 48,000 tons of nitrate, the additional investment required by the cyanamide process would be from $15,000,000 to $18,000,000.

That is the estimate of Mr. Merrill. I ought to say here that in my conversation with Mr. Bell this morning, as I remember it, he said that the company's investment there would be about $35,000,000. I wish to give his estimate as well as that of Mr. Merrill. I wish to call attention, however, to the fact that whether it is big or little all this machinery is added up and charged to the American farmer when he buys the fertilizer. Every year he is to pay one-tenth of the cost, so that in 10 years he will pay it all back. Therefore, it is not very material whether it is a big investment or a little one, so long as it is pushed over on to the shoulders and backs of the hard-working American farmer in whose name it is proposed to put this steal across.

I come now to a comparison of investment between lessee and Government. Out of a total investment in power properties of $139,414,000, the company would have an investment of $5,400,000, or only 3.9 per cent; and of the investment in nitrate properties of from $73,000,000 to $95,000,000, the company would have from $4,000,000 to $26,000,000, dependent upon certain contingencies and the additional nitrate properties it may construct. This would give the Cyanamid Co. an investment of from 5½ to 27½ per cent of the investment made by the Government.

Do we want to go into a partnership of that kind? I expect within a short time to demonstrate and prove every one of the allegations which I have made, and in that connection I am going to read the denial that is made of the figures by Mr. Gray in the propaganda which he sends out.

Now, I wish to speak briefly about the connection of the Cyanamid Co. and the Air Nitrates Corporation with the Power Trust and with the Fertilizer Trust. I have not made any of these charges, and I would not bring out this phase of the situation if it had not been for the apparent interest that Senators have in and the apparent idea that Senators have of the existence of a fertilizer trust. I have no doubt of the existence of a water power trust. So I think it is proper that this question should be discussed.

In the action commenced by the United States against the so-called Fertilizer Trust, entitled "The United States against the American Agricultural Chemical Co. and others," filed in the district court of Maryland December 10, 1926, the Virginia-Carolina Chemical Co. was one of the most important defendants. Remember that name. That was one of the companies alleged by the Government in its suit to constitute a part of this trust.

In the Senate on February 25, 1927, pages 4761 and 4762 of the CONGRESSIONAL RECORD, Senator DENEEN, chairman of the joint committee on the Muscle Shoals proposition, referred to a trustee the Duke estate as being president of the American Cyanamid Co. Now we are connecting them up with Duke.

In Moody's Manual for 1926 in the directors' list for the American Cyanamid Co. is W. S. Lee. Mr. Lee is the engineer brought from South Carolina by the late B. M. Duke to operate the Southern Power Co. It was also shown that Duke was prominent in inception of the American Cyanamid Co.

Following the Fertilizer Trust indictment by the Government the Virginia-Carolina Chemical Co., above referred to as being one of the defendants in the Fertilizer Trust case, was shown to be closely related to the Duke interests, and last year a corporation was announced in the press consisting of Lee, representing the Duke interests, and the du Ponts and the Mellons. Now we are getting home. The Mellons are interested in this corporation. The Mellons are connected with it.

Mr. BLACK. Mr. President, will the Senator yield just there?

Mr. NORRIS. Yes.

Mr. BLACK. After talking with the Senator last week I sent for Mr. Bell, and I asked Mr. Bell if Mr. Mellon or anybody connected with the Aluminum Co. of America or anybody who had ever been connected with Mr. Mellon or the Aluminum Co. of America had any stock or any interest in

his business. He said that they absolutely had not, and that he would be glad to send to the Senator, or to me, or any of us who wanted it, a list of his stockholders and directors.

I am stating that to the Senator because I feel sure that he would want to know that, just as I wanted to know it; and that is the reason why I asked Mr. Bell.

Mr. NORRIS. I am going to offer the evidence. I have some more. I am not making any charges myself.

Mr. BLACK. If it is true, of course I should like to know it myself; I will state that to the Senator; but I asked Mr. Bell, and he stated that he would be glad to send me a list of the stockholders and directors.

Mr. BRUCE. Mr. President——

Mr. NORRIS. Just a moment. Of course, if I were going to prosecute a trust here, or a lot of fellows like this company and others, the Duke interests and the South Carolina trust, the chemical company, and before I did it I sent for them and said, "Here, now, are you a trust?" and they said, "No; we are not a trust," and I said, "All right; that settles it; we will not prosecute you," I would not expect them to admit it. I am going to offer the evidence, and you can draw your own conclusions. I do not know whether they are a trust or not; but I have been led into this trust business by the Senators who have been making the inquiry, and I am going through with it.

Mr. BLACK. If what the Senator said was intended as a reflection on sending for Mr. Bell, if the Senator were supporting a certain bid and believed that it should go through rather than to give this point to the power company—as I believe the Senator's joint resolution would do—if he were supporting another bid and had heard that the Mellon interests were connected with it, would it not be fair and right to send for one of its officers in an effort to ascertain whether or not that was true? That is exactly what I did.

Mr. NORRIS. I am not objecting to it. The Senator must not accuse me of making any objection. I do not care anything about it.

Mr. BLACK. It seems to me that if the question of the person or corporation to whom this property should go is to enter into the matter it would be better to send for a list of the directors and stockholders, so that we may know who they are.

Mr. NORRIS. The Senator can do that if he wants to.

Now I yield to the Senator from Maryland [Mr. BRUCE], who, I believe, desires to introduce a bill or something of the kind.

Mr. HEFLIN. Mr. President, before the Senator does that, is this the situation—that if the matter goes one way the Power Trust will get the plant, and if it goes the other way the Fertilizer Trust will get it?

Mr. NORRIS. That is not the situation. I will show, I think, with the evidence that I am going to offer, that this bidder is connected not only with the Fertilizer Trust but with the Power Trust also.

Mr. BLACK. Mr. President, there is a well-grounded belief where I come from, and the papers that support the power companies substantiate it, that the power companies are now supporting the Government operation bill; and it is my belief that unless an amendment which I have, and which I am going to suggest to the Senator, is added to his joint resolution the Alabama Power Co. will get every kilowatt of power if the Senator's joint resolution goes through.

Mr. NORRIS. Of course the Senator can say that. I do not believe it at all, however. I think I can demonstrate that there is nothing to it. I can not find fault with the Senator, of course, if he believes it.

Mr. BLACK. I have an amendment which I am going to suggest and ask the Senator to accept.

Mr. NORRIS. Oh, yes. I wonder if the amendment is anything like some of these other amendments that are suggested. If the substitute that is going to be offered by the Senator from Kentucky [Mr. SACKETT] is agreed to, or if the amendment that is going to be offered by the Senator from Tennessee [Mr. TYSON] is agreed to, then I shall be willing to concede that the power companies will have the main finger in the pie; and I think to some extent, although not completely, the amendment offered by the Senator from Mississippi [Mr. HARRISON] leads in that direction.

Mr. BLACK. I agree with the Senator.

Mr. NORRIS. But I want to say to the Senator that under the joint resolution as it stands, in my judgment, there is not any possibility of the power companies getting this power unless the people of the South refuse to accept it. If they will not take it, then the power companies will get it; and if the Senator can make that any plainer by an amendment, as far as I am concerned, I stand here ready to accept it.

Mr. BLACK. May I reply to that to this effect:

The law to-day requires that municipalities be given the preference. The city of Muscle Shoals has attempted to have the Secretary of War give it that preference. He has not done it. The Alabama Power Co. to-day is getting every particle of the power that is sold. If with the law existing now the Alabama Power Co. gets all the power, when the preference should be given to these others, why would not the Alabama Power Co. get it in the future?

Here is my amendment. It is a 100 per cent guaranty that no power company will divert that power from the use to which it was intended to be put. Here it is:

I propose, first, to amend the Senator's bill at the end of line 18, page 2, as follows:

Provided, That all contracts for the sale or redistribution of such power to a person, partnership, association, or corporation, for resale by such person, partnership, association, or corporation, shall contain a provision authorizing the Secretary of War to cancel such contract after 30 days' notice in writing, given to such person or corporation.

That is the first paragraph; and I propose that for this reason——

Mr. NORRIS. The Senator is not going to debate his amendment now; is he?

Mr. BLACK. No, sir.

Mr. NORRIS. It is not pending, and the Senator is diverting me from what I was talking about to another subject; but I will yield to him and let him go on and make his speech now.

Mr. BLACK. I do not want to make a speech. I am proposing that only because the Senator referred a while ago to this bill which I am conscientiously supporting as being a "steal"——

Mr. NORRIS. All right; go ahead.

Mr. BLACK. And, in my judgment, the other measure will give the power to the power company.

Provided further, That it is hereby declared to be the express purpose of this resolution to give preference in the purchase of such power to States, counties, municipalities, and thereafter preference to be given to individuals, associations, partnerships, or corporations using such power for their own purposes—

That is the second preference—

and not for resale and distribution; and it shall be the duty of the Secretary of War to recognize such preferential rights, as above set forth. If at any time there should be an application from such preferential persons, partnerships, associations, or corporations, and if it is necessary for the Secretary of War to cancel outstanding contracts with persons or corporations which resell or redistribute such power, in order to supply power to such preferential persons or corporations, it shall be his duty to cancel such contract after 30 days' notice and supply power to such preferential persons or corporations.

It is not the intent or purpose of this resolution to interfere with the regulation of intrastate power rates by the States after such power is sold by the Secretary of War; but, in order that the power sold may reach the consumers at all times without exorbitant profits, the Secretary of War shall cancel any contract made with persons or corporations reselling or redistributing power which sell the same at a net profit of more than 8 per cent.

2½. The power sold by the Secretary of War shall be sold at a rate which will bring net to the Government a maximum of 4 per cent upon the amount of the investment in the property used in the production of the power sold.

In other words, I provide an amendment—I do not want to argue it at all, as I stated—which, in the first place, limits the profit of the Government. It then limits the profit of the distributing company that receives the power. It then provides that in order to give preference to customers who desire to use power themselves, and to municipalities, the power companies who purchase it shall have it only subject to a 30 days' cancellation clause; and at any time any customer wanting it for himself—the farmer that we want to protect, or the small merchant—can send and get it, and then they can cancel the contract with 30 days' cancellation notice.

Mr. NORRIS. Mr. President, it is not my intention to discuss the Senator's amendment now. I do not think the Senator was quite fair in injecting it here in the middle of a proposition that I was advancing and evidence that I was offering about the trust.

Mr. BLACK. I beg the Senator's pardon; I did not intend to interfere with his speech.

Mr. NORRIS. I am only going to say, in passing, that as I listened to the reading of the amendment I am of the opinion that if the Senate adopts it my joint resolution is killed.

Mr. BLACK. May I put it at the end of the Senator's remarks? I do not want to interfere with his speech in any way.

Mr. NORRIS. No; I am discussing the amendment now, so I would rather have it in right here. If I understand it correctly, it will be supported and voted for by those who are opposed—and some, of course, like the Senator, who favor it—but mainly by those who are opposed to the passage of the committee joint resolution. If I am not mistaken from my listening to the reading, if that amendment becomes part of the joint resolution that we pass, and some man running a garage down there wants to get current from the Government, he is entitled to get it, and the Secretary of War will have to supply it to him. He will have to give that man a preference. He will have to present his bills monthly and send his men there to read the meter. If everybody applies for it, he has to go into the business in every locality, every municipality, and supply this farmer or that business man with electricity from Muscle Shoals. He must render his bills and collect them individually from these people.

The Senator does not think for a moment that those who are trying to block any legislation here would support for a moment a joint resolution that means that, if his amendment would do that; and I think it would. If some man living a mile or two out of Florence wrote a letter and said, "I want electricity in my house; get it out here," the Senator's amendment would make it incumbent upon the Secretary of War to sell it to him individually. He might not take 2 kilowatts a month, or more than 20 or 30 kilowatts per month, let us say; but the Secretary of War, with electricity up to a high voltage that he could not put into that man's house, would have to go to the expense of putting in the proper machinery to step it down so that he could run it into that man's house. In other words, the Senator's amendment would put the Secretary of War in the business of retailing electricity to everybody who asked for it within transmission distance of Muscle Shoals. The Senator does not want to do that.

Mr. BLACK. May I state that this is in exactly the form of the Senator's joint resolution, except that I limit it so that the power company can not get the power. I do not think the Senator's joint resolution goes to the extent he has stated at all, and I did not intend to have my amendment do so; and I do not think it does.

Mr. NORRIS. Perhaps it does not. Of course, I have not read it.

Mr. BLACK. I do not offer it as a block, because whether this measure passes or the other, I want to get a measure through that does not turn over the power to the power company, and this will keep it from it.

Mr. NORRIS. My own idea is that that would do it. If it has the effect that I think it would have from listening to it, nobody would get it. The Secretary of War can not go into the retail business of furnishing electricity, and if we should say he should do it, we would stand no show of ever getting such a law through.

There are some things in the Senator's amendment to which I have not any objection, which I should like to see in the law. Some are already in it. I would rather the distributing power companies would get that power than to have nobody get it; but I am opposed to putting in any provision like the pending amendment, which as I remember, provides that a distributing company, a power company like the Alabama Power Co., shall have the same privilege as a municipality—in other words, in effect taking away the preference that is given to a municipality—and that is done on the ground, which I presume is true, that a great many municipalities have sold their municipal distributing plants to the Alabama Power Co., and to some other power companies, that I understand have been very active in paying fabulous prices for them. They have been doing that in Nebraska, too. They have been doing it all over the United States, and they have tied themselves up, so that they can not go into the business.

I do not want to put that city and the city that has held itself aloof and is ready to accept the proposition and to distribute the electricity on an equality. If we do put them on an equality, there is no assurance that any person or any industry anywhere within transmission distance of Muscle Shoals will get a single cent of reduction. We are selling the power now to the Alabama Power Co. from month to month. Has the Senator heard of any place in his great State where the Alabama Power Co. has reduced the price to the consumer?

Mr. BLACK. No; the Senator has not; and that is the reason he does not want to turn the rest of it over to them for 10 years or 50 years.

Mr. NORRIS. That is what the Senator is going to do, I think, if he gets his amendment through. He will fix it so that nobody will take it, and we will get no bill, and the result will be that the Secretary of War will go on doing just what he is doing now; and that is what I do not want to happen.

Mr. McKELLAR. Mr. President, in connection with the question as to who is to get it, as I understood the Senator yesterday, he said that he would be willing to accept an amendment fixing a time limit in which municipalities, States, and counties might accept the provisions of this act. Was I correct in that?

Mr. NORRIS. Yes; I would be in favor of that kind of a proposition, and I would favor this proposition. I have already had printed—probably the Senator has seen it—an amendment providing that if a municipality will come in and take electricity under this resolution they shall have a lease, if they want it, for 25 years instead of 10. I do not know whether that amendment would pass the Senate or not, but I expect to offer it.

Mr. HEFLIN. In that case, who would construct the transmission lines?

Mr. NORRIS. Either party could construct them. If the lease were for 25 years, it is more likely that the municipality would construct it.

Mr. McKELLAR. I may have misunderstood the particular provision of the Senator's measure, but does the joint resolution provide for the authorization of any fund with which to build these transmission lines?

Mr. NORRIS. Yes. I have forgotten now just where the provision is, but I think it can be done under the resolution, either by direct appropriation from Congress or by using the money that is received from the sale of electricity.

Mr. McKELLAR. At any rate, that is the intention of the measure?

Mr. NORRIS. Yes. Now let me go back to where I was when I was interrupted. I regret this digression, because I was right in the midst of something which I thought was interesting, and I took it up because Senators have been asking me about the Power and the Fertilizer Trust, and I was answering their questions. I had just gotten started offering this evidence when, all at once, Senators commenced to rise and question me about something else, about the preference given to a municipality or a private company, about this power company getting all of the current down there, and so on; in other words, diverting attention and taking me away from the thing I was discussing.

Why this sensitiveness about the Power Trust? Why are Senators anxious to prevent me from offering evidence here to show that the Cyanamid Co. is pretty close to both the Power Trust and the Fertilizer Trust? I am not saying that it is. I am going to offer some evidence, and I would like to get a chance to do so. Senators interrupt me and divert my attention to some other line. Are they afraid of the Power Trust or of the Fertilizer Trust?

Mr. McKELLAR. Mr. President, I want to make a disclaimer. I did not intend to divert the Senator. I would be glad to hear the evidence he is speaking of.

Mr. BLACK. Mr. President, may I also state that I am delighted to hear the Senator. It will be a very great pleasure for me to listen to him as he produces all the evidence. I have sat here patiently through all his speech, and I will sit here even if the Senator talks four days, because I am anxious to hear the Senator's remarks. They are illuminating and instructive.

Mr. McKELLAR. The Senator is making a splendid speech, I want to say.

Mr. NORRIS. I hope Senators will not take up any more time in either commendation or criticism, because either one will have the same effect, keeping me from going on with this evidence.

I have forgotten just how much of this I had read.

Following the Fertilizer Trust indictment by the Government the Virginia-Carolina Chemical Co.—

And remember, they are one of the defendants in the Government suit charging a trust in the fertilizer business—

above referred to, as being one of the defendants in the Fertilizer Trust case, is closely related to the Duke interest, and last year a corporation was announced in the press consisting of Lee—

He is the man whom Duke himself brought up from South Carolina to run the Duke Corporation—

representing the Duke interests, and the du Ponts and the Mellons.

I think that is where I stopped. When I mentioned the Mellons, everybody commenced to get interested in trying to shoot me off on some sidetrack. I am surprised at the influence Mellon has over on the other side of the Chamber, anyway. The people who want the Cyanamid Co. to get this ought to listen now to whatever evidence will tend to connect the Mellon interests and the Duke interests and the Virginia-Carolina Chem-

ical Co., which is part of the trust, according to your own estimate and opinion and evidence.

It was a large development of water power in Canada for chemical purposes.

That is what these fellows were doing. This shows that there is at least a friendly relation between the American Cyanamid Co. and the Duke interests and the power interests. In other words, this corporation was announced, in which Lee represented Duke and the du Ponts and the Mellons, and it was a development of water power in Canada for chemical purposes.

I will show now where the American Cyanamid Co. was directly interested, and one of the main spokes in the wheel of this Canadian corporation. When I have done that, I will have connected Cyanamid, the Water Power and Fertilizer Trust, and Mellon all in the same bunch.

I have here an advertisement from the New York Times of April 29, 1926. This is the heading:

Duke-Price Power Co. (Ltd.) first-mortgage 6 per cent sinking fund gold bonds, series A.

Amounting to $37,000,000.

Let us see, now, how they were floating that issue of bonds. They were to mature, according to this advertisement, May 1, 1966. It was just a little over a year ago that all this happened, less than two years ago.

Cumulative sinking fund, begining in 1929, calculated to retire at least half of all series A bonds by maturity.

Who are the trustees of this great company? The first name mentioned is the Union Trust Co. of Pittsburgh. Does that look like Mellon? The Union Trust Co. of Pittsburgh and the National Trust Co. (Ltd.), of Montreal. They are the trustees. Here is what part of this advertisement says:

As a result of negotiations initiated following Mr. Duke's death last year, Aluminum Co. of America—

Does that sound like Mellon?

Aluminum Co. of America interests are acquiring 53⅓ per cent of company's stock and the Shawinigan Water & Power Co. 20 per cent (the remaining 26⅔ per cent being retained by the Duke-Price interests).

And that is part of the Fertilizer Trust.

These new interests are contracting for large amounts of power. A reconstitution of company's capital structure is also being effected, which will result in a capitalization presently to be outstanding of these $37,000,000 bonds and 210,000 shares of capital stock.

More than half of it owned by the Aluminum Co. It tells what the property consists of. Remember, this is an advertisement to sell bonds. I might read all of it, but probably it is not necessary to do so. It tells now what power contracts it has. This is a power company, trying to sell bonds, and Mr. Mellon's bank in Pittsburgh and a bank in Montreal are the trustees, which are going to sell the bonds. In order to make the security attractive to the public, they are giving a statement of the assets of the company, as I have just read part of it. More than half of the stock is going to be purchased by Mr. Mellon's aluminum company.

They also tell in the advertisement the contracts for the sale of power, and that will help to sell the bonds. Here are some of them:

Company has firm contracts for sale of 330,000 horsepower, as follows:

Here is the list:

Aluminum Co. of Canada, 100,000 horsepower.

You might say that is not Mr. Mellon's company. The Aluminum Co. of Canada has contracted to take 100,000 horsepower for 50 years, and right after this name, "Aluminum Co. of Canada," is a little star. Remember, this company is the Aluminum Co. of Canada. This little star refers us to an explanatory note, which says:

All of whose stock is owned and the due performance of whose contract is guaranteed—

By whom? Whom would you think?—

The Aluminum Co. of America.

How do those who want this bid accepted like to be associated with the Aluminum Co. of America? How do they like to be in the same class with Mr. Mellon? It might be all right for me, but I do not see how Senators can live for a moment to be associated with Mellon, the Fertilizer Trust, the Duke trust, the Power Trust, or the Aluminum Trust.

Mr. BLACK. Or the Republican trust.

Mr. NORRIS. I hope the Senator will take the Republican trust with the other trusts and keep it. I do not want it.

Let us see who is going to run this company.

Management: Company's board of directors will include representatives of the Aluminum Co. of America—

Mr. Mellon might favor some of his friends here, I suppose, if we would act right in the Senate—

the Shawinigan Water & Power Co., Price Bros. & Co. (Ltd.), and the Duke estate—

There we get back to the power and the fertilizer all going to be represented in the management of this company—

all of whom have had long and successful experience in management of large industrial and hydroelectric power enterprises.

They have. There is no doubt about that.

Who sells these bonds? Here are several names: First, The Union Trust Co. of Pittsburgh. They can be bought of Mr. Mellon there. But there is another bank of Pittsburgh where they can be purchased and Senators who are particularly in love with Mr. Mellon would rather take this bank, because it shows on its face who owns it—the Mellon National Bank of Pittsburgh. We can buy the bonds there. It may be they have not sold them all yet. It might be that some could be had yet. I presume one could find out at the office of the Secretary of the Treasury whether they have any left or not.

What about the American Cyanamid Co.? It was incorporated under the laws of the State of Maine July 22, 1909; manufactures cyanamide and other things used in mining in the United States and also in many similar districts in Mexico, Canada, and other parts of the world. The manufacture, sale, and use are controlled by patents. It also manufactures other heavy chemicals and mines phosphate rock; plants located at Niagara Falls, Ontario, and Warners, N. J.; capacity of cyanamide plant at Niagara Falls 75,000 tons per annum. In 1916 the Cyanamid Co. acquired the Amalgamated Phosphate Co. with mines at Brewster, Fla.

It controls the Air Nitrates Corporation, which is one of the bidders here. Do Senators begin to see where the American Cyanamid Co. is connected up with the Fertilizer Trust which they allege exists? The Air Nitrates Corporation was formed in 1917 to construct three plants, one at Muscle Shoals on the Tennessee River, one at Cincinnati, and one at Toledo, funds for construction and operation to be furnished by the United States Government. The plant at Muscle Shoals began manufacture October 26, 1918, but all work there and the construction of two plants at Toledo and Cincinnati were discontinued by order of the Government soon after the signing of the armistice.

Here are some of the things it owns: Ferto Chemical Sales Co. (Ltd.), incorporated in Canada June 8, 1925, to buy and sell cyanamide and kindred products under a sales and financing contract with American Cyanamid Co., and designed to develop foreign markets, make foreign connections, and establish foreign agencies. Capital stock, 70,000 no par shares, of which 65,943 shares are distributed to holders of common shares of American Cyanamid Co.

So the American Cyanamid Co. and the Air Nitrates Co. are one and practically the same. Management: W. B. Bell, president. I read his testimony and he told in his testimony, when he was fighting the Ford offer, that nobody could take nitrate plant No. 2 and make fertilizer with it without a loss; that it could not be done; that it was an impossibility. Moreover, one of the other officials testified that they would not even let the Government do it because the Government did not have the patents, which they owned.

J. O. Hammitt is another one of the management, a vice president. I read his testimony, not when he was trying to get Muscle Shoals but when he was trying to prevent Mr. Ford from getting it. He was telling the truth then. He told then that it was perfectly foolish to undertake the operation of nitrate plant No. 2. He ought to know. He is in the chemical business.

W. S. Landis is another vice president. I am coming to him later. He is one of the men whose testimony this man Gray has sent broadcast over the United States. In sending out that testimony he did not tell those to whom he was sending it that he was sending them the testimony of an officer of the very company which was trying to get Muscle Shoals. There is another item of deception which the representative of the American Farm Bureau Federation was perpetrating upon the farmers of America. He sent this testimony out, saying that Landis was an ex-president of the American Chemical Society. He never was a president of the American Chemical

Society, although I concede he is a chemist and a good one. I have not a thing in the world against him. So far as I know he is a fine gentleman, truthful, and everything else, but he is directly interested in this matter, and his testimony has been sent out as that of a disinterested man advising the farmers, to try to create a sentiment in favor of the acceptance of this bid.

Now I come to the history of the Virginia-Carolina Chemical Corporation, a member of the trust as alleged by the Attorney General and half of the Members of the Senate. It was—

incorporated in Virginia March 24, 1926, to acquire property and assets of the Virginia-Carolina Chemical Co. (Inc.) in New Jersey September 12, 1895, which consolidated a number of manufacturers of fertilizers, acids—

If Senators will listen to this they will pretty nearly reach the conclusion that these people are a trust from their own statements—

which consolidated a number of manufacturers of fertilizers, acids, chemicals, and various kindred products.

Owns plants in Maryland, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Louisiana, and Tennessee, in which States it controls a large percentage of business in its line. Owns entire capital stock of Charleston Mining & Manufacturing Co.; latter owning in fee over 68,000 acres of phosphate lands in South Carolina, Tennessee, and Florida, and mineral rights on more than 6,000 acres additional, together with 7 plants for mining, preparing, and shipping phosphate rock, about 64 miles of railroad, 26 locomotives, 890 cars, 15 steam shovels, 13 steam hoisters, etc.; also owns and operates large pyrite mines, producing a large portion of the pyrites used by it in manufacturing sulphuric acid, and in addition has various foreign potash, sulphur, and other properties; controls Sulphur Mining & Railroad Co., Georgia Chemical Works, American Fertilizing Co., and Bryant Fertilizer Co.

That is almost enough to make a pretty fair showing of it being connected with and a part of the trust. It controls fertilizer, practically, in several of the Southern States. It was charged by the Attorney General of the United States with being a part of the Fertilizer Trust. This company is connected with the Duke interests. This company is connected through the Duke interests with the power interests of America. Through the Mellon interests it is connected with the water-power interests even of Canada, as I have shown.

Mr. President, this argument is particularly made for the benefit of those here who believe in the hideousness and the power of the Fertilizer Trust, of the Water Power Trust, of the Chemical Trust, and of the Mellon Trust. We showed as we were going along that these people were connected with the Southern Power Co.

Who is the Southern Power Co.? G. G. Allen is president; B. N. Duke and others are vice presidents, including W. S. Lee. These are the same men. Lee is the man, it will be remembered, whom Mr. Duke brought up here from South Carolina. Then there is A. B. Duke, who is treasurer of the Southern Power Co. On the board of directors we find B. N. Duke, W. C. Parker, W. R. Perkins, G. G. Allen, and a lot of others. So we find them all connected, and Senators can take their choice.

I want to read now a little that may be ancient history, but it is from that cemetery known as the CONGRESSIONAL RECORD, which sometimes has resurrections. I am going to read now from the CONGRESSIONAL RECORD of April 7, 1916, at page 6471.

Mr. CURTIS. Mr. President, may I interrupt the Senator?

Mr. NORRIS. Certainly.

Mr. CURTIS. Does the Senator expect to conclude his speech to-night?

Mr. NORRIS. I can not conclude it to-night. I shall be glad to suspend when I reach a good stopping place.

Mr. CURTIS. It is desired to have an executive session, and if the Senator will yield for that purpose I should like to make the motion at this time.

Mr. NORRIS. Very well; I might as well suspend for the day.

UNANIMOUS-CONSENT AGREEMENT—MIDDLE RIO GRANDE CONSERVANCY DISTRICT

Mr. BRATTON. Mr. President, I rise for the purpose of proposing a unanimous-consent agreement, and that is that when the Senate concludes its routine morning business next Tuesday it shall take up for consideration the bill (S. 700) authorizing the Secretary of the Interior to execute an agreement with Middle Rio Grande Conservancy district providing for conservation, irrigation, drainage, and flood control for the Pueblo Indian lands in the Rio Grande Valley, New Mexico, and for other purposes.

Mr. CURTIS. During the morning hour and only until 2 o'clock?

Mr. BRATTON. I prefer not to fix that limitation.

Mr. CURTIS. The unfinished business, of course, would be laid before the Senate at 2 o'clock unless it was temporarily laid aside.

Mr. BRATTON. I think the Senator from Nebraska will agree to do that.

Mr. CURTIS. May I ask the Senator if this is satisfactory to the chairman of the committee, the Senator from North Dakota [Mr. FRAZIER]?

Mr. BRATTON. I have conferred with the Senator from Wisconsin [Mr. LA FOLLETTE], who is interested in the measure.

Mr. CURTIS. Is it satisfactory to him?

Mr. BRATTON. Yes.

Mr. CURTIS. Then I have no objection.

Mr. FESS. May I ask what bill it is to which the Senator refers?

Mr. BRATTON. It is known as the Middle Rio Grande conservancy bill; in New Mexico, a local bill.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New Mexico? The Chair hears none, and it is so ordered.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened and (at 5 o'clock and 25 minutes p. m.) the Senate, under the order previously entered, adjourned until Monday, February 27, 1928, at 12 o'clock meridian.

ADDITIONAL PROTOCOL TO PAN AMERICAN SANITARY CONVENTION

In executive session this day, the following protocol was ratified, and, on motion of Mr. BORAH, and by unanimous consent, the injunction of secrecy was removed therefrom:

To the Senate:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith an additional protocol signed at Lima on October 17, 1927, to the Pan American Sanitary Convention, signed at Habana on November 14, 1924, to the ratification of which the Senate gave its advice and consent on February 23, 1925.

CALVIN COOLIDGE.

THE WHITE HOUSE,
Washington, February 15, 1928.

The PRESIDENT:

The Pan American Sanitary Convention signed at Habana on November 14, 1924, the ratification of which was advised by the Senate on February 23, 1925, and which was proclaimed on April 28, 1925, contains no provision for denunciation.

This omission has been supplied by the signature at Lima, on October 19, 1927, by duly authorized plenipotentiaries, of an additional protocol, an authenticated copy of which the undersigned, the Secretary of State, has the honor to lay before the President with a view to its transmission to the Senate to receive the advice and consent of that body to ratification, if his judgment approves thereof.

Respectfully submitted.

FRANK B. KELLOGG.

DEPARTMENT OF STATE,
Washington, February 13, 1928.

[Translation]

The Presidents of the Argentine Republic, Bolivia, the United States of Brazil, Colombia, Costa Rica, Cuba, Ecuador, the United States of America, Guatemala, Haiti, Honduras, Nicaragua, Panama, Paraguay, Peru, the Dominican Republic, Uruguay and the United States of Venezuela, desirous of adding to the Sanitary Convention signed at Habana on November 14, 1924, have appointed as their plenipotentiaries, to wit:

Argentine Republic: Dr. Laurentino Olascoaga, Dr. Nicolás Lozano, and Dr. Alfredo Sordelli.

Bolivia: Dr. Adolfo Flores and Dr. Adolfo Durán.

United States of Brazil: Dr. João Pedro de Albuquerque and Dr. Bento Oswaldo Cruz.

Colombia: Dr. Julio Aparicio.

Costa Rica: Dr. Solón Núñez F. and Mr. Jaime G. Bennett.

Cuba: Dr. Fernando Rensoli and Dr. Mario G. Lebredo.

Ecuador: Dr. Luis M. Cueva.

United States of America: Dr. Hugh S. Cumming, Dr. Bolivar J. Lloyd, and Dr. John D. Long.

Guatemala: Mr. Pablo Emilio Guedes.

Haiti: Mr. Víctor Kieffer Marchand and Dr. Guillermo Angulo P. A.
Honduras: Dr. José Jorge Callejas.
Nicaragua: Mr. Julio C. Gastiaburú.
Panama: Dr. José Guillermo Lewis.
Paraguay: Dr. Isidro Ramirez.
Peru: Dr. Carlos Enrique Paz Soldán, Dr. Sebastián Lorente, Dr. Baltazar Caravedo, Dr. Daniel E. Lavorería, and Dr. Julio C. Gastiaburú.
Dominican Republic: Dr. Ramón Baez Soler and Dr. Alejandro Bussalleu.
Uruguay: Dr. Justo F. Gonzalez.
United States of Venezuela: Dr. Emilio Ochoa.
Who, after communicating to one another their full powers and finding them in due form, have agreed to adopt, ad referendum, the following:

ADDITIONAL PROTOCOL APPROVED BY THE CONFERENCE (AD REFERENDUM)

The ratification of the Sanitary Code shall be deposited in the Office of the Secretary of State of the Republic of Cuba and the Cuban Government shall communicate these ratifications to the other signatory States, which communication shall constitute exchange of ratifications. The Convention shall become effective in each of the signatory States on the date of ratification thereof by said State, and shall remain in force without limitation of time, each one of the signatory or adherent States reserving the right to withdraw from the Convention by giving in due form a year's notice in advance to the Government of the Republic of Cuba.

Done and signed in the City of Lima on the nineteenth day of October, nineteen hundred and twenty-seven, in duplicate, one of which shall be sent to the Ministry of Foreign Relations of Peru and the other to the Pan American Sanitary Office, so that copies thereof may be deposited, through the diplomatic channel, to the signatory and adhering Governments.

For the Argentine Republic:
LAURENTINO OLASCOGA.
NICOLÁS LOZANO.
A. SORDELLI.

For Bolivia:
A. FLORES
ADOLFO F. DURÁN.

For the United States of Brazil:
JOÃO PEDRO DE ALBUQUERQUE.
BENTO OSWALDO CRUZ.

For Colombia:
JULIO APARICIO.

For Costa Rica:
SOLÓN NÚÑEZ.
JAIME G. BENNETT.

For Cuba:
D. F. RENSOLI.
Dr. MARIO G. LEBREDO.

For Ecuador:
LUIS M. ĆUEVA.

For the United States of America:
HUGH S. CUMMING.
BOLIVAR J. LLOYD.
JOHN D. LONG.

For Guatemala:
PABLO EMILIO GUEDES.

For Haiti:
V. KIEFER MARCHAND.
GMO. ANGULO P. A.

For Honduras:
JOSÉ J. ĆALLEJAS.

For Nicaragua:
J. C. GASTIABURÚ.

For Panama:
JOSÉ G. LEWIS.

For Paraguay:
ISIDRO RAMÍREZ.

Por Peru:
CARLOS ENRIQUE PAZ SOLDÁN.
SEBASTIÁN LORENTE.
BALTAZAR CARAVEDO.
D. E. LAVORERÍA.
J. C. GASTIABURÚ.

For Dominican Republic:
R. BAEZ SOLER.
A. BUSSALLEU.

For Uruguay:
JUSTO F. GONZALEZ.

For the United States of Venezuela:
E. OCHOA.

PROTOCOL TO TREATY WITH THE NETHERLANDS FOR ADVANCEMENT OF GENERAL PEACE

In executive session this day, the following protocol was ratified, and, on motion of Mr. BORAH, and by unanimous consent, the injunction of secrecy was removed therefrom:

To the Senate:

I transmit herewith, with a view to receiving the advice and consent of the Senate to its ratification, a protocol signed February 13, 1928, between the United States and the Netherlands, interpretative of Article I of the treaty concluded between the two countries on December 18, 1913, looking to the advancement of the cause of general peace.

THE WHITE HOUSE,
Washington, February 16, 1928.

FEBRUARY 13, 1928.

The PRESIDENT,
The White House:

It will be recalled that in 1913–14 this Government concluded treaties with several countries looking to the advancement of the cause of general peace. Such a treaty was concluded with the Government of the Netherlands. With minor changes the text for the most part was uniform in all the treaties. The treaty with the Netherlands (Dutch and English text) was signed on December 18, 1913, and the Senate consented to its ratification on August 13, 1914. Article I defines the character of disputes which are the subject of the treaty. After the conclusion of the treaty, in 1917, the Netherlands Government invited the department's attention to a variance between the Dutch and the English texts of Article I.

The English text reads:

> The High Contracting Parties agree that all disputes between them, of every nature whatsoever, to the settlement of which previous arbitration treaties or agreements do not apply in their terms or are not applied in fact, shall, when diplomatic methods of adjustment have failed, be referred for investigation and report to a permanent International Commission, to be constituted in the manner prescribed in the next succeeding article; and they agree not to declare war or begin hostilities during such investigation and before the report is submitted.

It will be seen that this article covers "all disputes between them of every nature whatsoever" without specifying the time of origin of such disputes. The Dutch text specifies "all disputes of every nature whatsoever that may arise between them," thus implying that only those disputes arising after the coming into force of the treaty are contemplated. The Netherlands Government observed that a literal interpretation of the Dutch text would preclude disputes having their origin in fact arising prior to the time when the treaty goes into effect, and suggested the signing, at the time of the exchange of ratification of the treaty, of a protocol interpretative of Article I, the effect of which would be to make the treaty applicable to all disputes whether arising after the coming into force of the treaty or having their origin in facts arising prior thereto. Due to the exigencies of the late war, however, the matter lay dormant and was not renewed until 1923, at which time my predecessor was of the opinion that the proposed protocol would have the effect of modifying the terms of the treaty to which the Senate had given its approval and would therefore require its submission to that body. At that time neither this Government nor the Netherlands Legation at this capital was aware of the existence of any controversy between the United States and the Netherlands and the department advised the legation that there would appear to be no occasion for submitting the proposed protocol to the Senate.

The department is now in receipt of a note from the Netherlands minister in which he states that his Government confirms his prior statement that there is no existing controversy between the two Governments. The department understands that the insistence of the Netherlands Government to have the protocol concluded is due solely to their desire to clarify the variance between the Dutch and the English texts, without which they are not prepared to proceed to the exchange of ratifications of the original treaty, since the Netherlands States Assembly has approved the treaty on the understanding that this Government would accept the interpretative protocol.

I have the honor, therefore, to request that, should your judgment approve thereof, you transmit the inclosed protocol, dated February 13, 1928, to the Senate with a view to receiving the advice and consent of that body to ratification. When such ratification has been received, steps will be taken immediately to effect the exchange of ratifications of the original treaty accompanied by this protocol.

Respectfully,

FRANK B. KELLOGG.

The Government of the United States and the Government of the Netherlands, desiring to remove any doubt or uncertainty that may exist or that may hereafter arise as to the interpretation to be placed on Article I of the treaty signed between the two Governments on December 18, 1913, with respect to disputes that may exist between them at the time of the taking effect of the said treaty, have authorized the undersigned to declare that the said Article I is meant and intended to apply, subject to the terms of that article, to all disputes between the two Governments existing at the time of the taking effect of the treaty as well as to those arising thereafter.

In witness whereof the undersigned have hereto signed their names and have affixed their respective seals at the City of Washington, this thirteenth day of February in the year one thousand nine hundred and twenty-eight.

FRANK B. KELLOGG. [SEAL.]
J. H. VAN ROYEN. [SEAL.]

EXTRADITION TREATY WITH POLAND

In executive session this day, the following treaty was ratified, and, on motion of Mr. BORAH, and by unanimous consent, the injunction of secrecy was removed therefrom:

To the Senate:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith an extradition treaty between the United States and Poland, signed at Warsaw, November 22, 1927.

There is also transmitted, merely for the information of the Senate, a protocol accompanying the treaty.

THE WHITE HOUSE,
Washington, February 16, 1928.

The PRESIDENT:

The undersigned, the Secretary of State, has the honor to lay before the President, with a view to its transmission to the Senate, to receive the advice and consent of that body to ratification, if his judgment approve thereof, an extradition treaty between the United States and Poland, signed at Warsaw on November 22, 1927.

There is also inclosed, for the information of the Senate, but which seems to require no ratification on the part of the United States, a protocol accompanying the treaty.

Respectfully submitted.

FRANK B. KELLOGG.

DEPARTMENT OF STATE,
Washington, February 15, 1928.

The United States of America and the Republic of Poland, desiring to promote the cause of justice, have resolved to conclude a treaty for the extradition of fugitives from justice, between the United States of America and the Republic of Poland, and have appointed for that purpose the following plenipotentiaries:

The United States of America: H. E. John B. Stetson, Jr., Envoy Extraordinary and Minister Plenipotentiary in Warsaw,

The Republic of Poland: H. E. August Zaleski, Minister for Foreign Affairs,

Who, after having so communicated to each other their respective full powers, found in good and due form, have agreed upon and concluded the following articles:

ARTICLE I

It is agreed that the Government of the United States and the Government of Poland shall, upon requisition duly made as herein provided, deliver up to justice any person who may be charged with, or may have been convicted of any of the crimes specified in Article II of the present treaty committed within the jurisdiction of one of the High Contracting Parties and who shall seek an asylum or shall be found within the territory of the other, provided that such surrender shall take place only upon such evidence of criminality, as according to the laws of the place where the fugitive or person so charged shall be found, would justify his apprehension and commitment for trial if the crime or offence had been there committed.

ARTICLE II

Persons shall be delivered up according to the provisions of the present Treaty, who shall have been charged with, or convicted of any of the following crimes:

1. Murder, comprehending the crimes designed by the terms parricide, assassination, manslaughter when voluntary, poisoning or infanticide;
2. The attempt to commit murder;
3. Arson;
4. Wilful and unlawful destruction or damage of track and railroad establishments, which endangers human life;
5. Crimes committed at sea:

a. Piracy;

b. Wrongfully sinking or destroying a vessel at sea or attempting to do so;

c. Mutiny or conspiracy by two or more members of the crew or other persons on board of a vessel on the high seas, for the purpose of rebelling against the authority of the Captain or Commander of such vessel, or by fraud or violence taking possession of a vessel;

d. Assault on board ship upon the high seas, with intent to do bodily harm.

6. Burglary, defined to be the act of breaking into and entering the house of another in the night time with intent to commit a felony therein;
7. Robbery, defined to be the act of feloniously and forcibly taking from the person of another goods or money by violence or by putting him in fear;
8. The fabrication of counterfeit money, wherein coin or paper, counterfeit titles or coupons of public debt, created by National, State, Provincial, Territorial, Local or Municipal Governments, bank notes or other instruments of public credit, counterfeit dies and the utterance, circulation or fraudulent use of the above mentioned objects;
9. Forgery or the utterance of forged papers or the fraudulent use of any of the same, providing the loss occasioned exceeds one thousand dollars or Polish equivalent;
10. Embezzlement or criminal malversation committed by public officers or depositaries, where the amount embezzled exceeds one thousand dollars or Polish equivalent;
11. Embezzlement by any person or persons hired, salaried or employed, to the detriment of their employers or principals, when the crime or offence is punishable by imprisonment or other corporal punishment by the laws of both countries and where the amount embezzled exceeds one thousand dollars or Polish equivalent;
12. Fraud or breach of a trust by a bailee, banker, agent, factor, trustee, executor, administrator, guardian, director or officer of any Company or Corporation, or by any one in any fiduciary position, where the amount of money or the value of the property misappropriated exceeds one thousand dollars or Polish equivalent;
13. Obtaining money, valuable securities or other property by false pretences or receiving any money, valuable securities or other property knowing the same to have been unlawfully obtained, where the amount of money or the value of the property so obtained or received exceeds one thousand dollars or Polish equivalent;
14. Larceny if the damage caused exceeds one thousand dollars or Polish equivalent;
15. Perjury or subornation of perjury, where as a result of such a false testimony, an innocent person has been punished by imprisonment or a more severe penalty, or a person has been unjustly acquitted of a crime or an unjust sentence was pronounced in a civil case where the amount exceeds one thousand dollars or Polish equivalent and a loss of this amount actually resulted;
16. Kidnapping of minors or adults defined to be the abduction or detention of a person or persons, in order to exact money from them, their families, or any other person or persons, or for any unlawful end;
17. Crimes and offences against the laws for the suppression of slavery or slave trading;
18. Crimes defined as the so-called traffic of women and girls, that means recruiting, abduction or seduction for immoral purposes of said persons, provided such crimes be punishable by imprisonment of at least one year, or by more severe penalty.

Extradition shall also take place for participation in any of the crimes before mentioned as an accessory before or after the fact, provided such participation be punishable by imprisonment of at least one year by the laws of both the High Contracting Parties.

ARTICLE III

The provisions of the present Treaty shall not import a claim of extradition for any crime or offence of a political character, nor for acts connected with such crimes or offences.

When the crime belongs to those designated in Article II sec. 1 and 2—the fact that the offence was directed against the life of the Head of the State, the President, of one of the High Contracting Parties, or against the Head of a Foreign State, or against the life of any member of his family shall not be deemed sufficient to sustain that such crime or offence was of a political character, or was an act connected with crimes or offences of a political character.

ARTICLE IV

The person delivered up shall be tried only for the crime or offence for which he was surrendered. This provision, however, does not apply to the case, when the said person fails to leave the territory of the Party to which he was surrendered within the period of three months after the date of inflicting upon him the penalty for the crime or offence for which he was delivered, or after the date of his being advised of his acquittal or of the fact that his case has been dismissed.

ARTICLE V

A fugitive criminal shall not be surrendered under the provisions hereof, when, from lapse of time or other lawful cause, according to the laws of the place within the jurisdiction of which the crime was committed, or according to the laws of the place where he was found, the criminal is exempt from prosecution or punishment for the offence for which the surrender is asked.

Extradition shall also not be granted if, in a case of concurrent jurisdiction, there has been concluded or is pending in the surrendering State the prosecution of the fugitive on a charge growing out of the same set of facts as that upon which the extradition is sought.

ARTICLE VI

If a fugitive criminal whose surrender may be claimed pursuant to the provisions hereof be actually under prosecution, out on bail or in custody, for another crime or offence, his extradition may be deferred until such proceedings be determined, or until he shall have been set at liberty in due course of law.

ARTICLE VII

If a fugitive criminal claimed by one of the Parties hereto, shall be also claimed by one or more powers, such criminal shall be delivered to that State whose demand is first received.

Nevertheless, the surrendering State may give preference to a third State provided it is bound by a treaty concluded with that State so to do.

ARTICLE VIII

Under the stipulations of this Treaty, the United States of America shall not be bound to deliver up its citizens, and the Republic of Poland shall not be bound to deliver up either Polish citizens or those of the Free City of Danzig.

ARTICLE IX

Everything found in the possession of the fugitive criminal at the time of his arrest, whether being the proceeds of the crime or offence, or which may be material as evidence of the crime, shall so far as practicable, according to the laws of either of the High Contracting Parties, be delivered up with his person at the time of surrender—nevertheless, the rights of a third party with regard to the articles referred to, shall be duly respected.

ARTICLE X

Requisitions for the surrender of fugitives from justice shall be made by the respective diplomatic agents of the High Contracting Parties. In the event of the absence of such agents from the country or its seat of government, requisitions may be made by Consular officers.

A duly authenticated copy of the sentence of the Court, before which the conviction of the criminal took place, shall be produced with requisition of surrender. If the person, whose extradition is requested, is merely charged with crime or offence, or convicted by default, a duly authenticated copy of the warrant of arrest of the Court, and of the depositions upon which such warrant may have been issued, shall be produced with such other evidence, as may be deemed competent in the case.

Extradition shall be carried out in conformity with the law governing it in the country, where the requisition of surrender is made.

ARTICLE XI

The arrest of a fugititve criminal may be requested even upon telegraphic advice, stating the existence of a sentence of conviction or a warrant of arrest.

In Poland the requisition for the arrest shall be directed to the Minister of Foreign Affairs, who will transmit it to the appropriate authorities.

In the United States of America, the requisition for the arrest shall be directed to the Secretary of State, who shall confirm the regularity of the requisition and request the appropriate authorities to take action thereon in conformity with the law.

In both countries, in case of urgency, the requisition for the arrest and detention may be addressed directly to the appropriate magistrate, in conformity with the laws in force.

A person provisionally arrested shall be released unless within three months from the date of arrest the formal requisition for surrender with the documentary proofs set out in Article X have been produced by the diplomatic agent of the demanding Government or, in his absence, by a Consular officer thereof.

ARTICLE XII

In every case of a request made by either of the High Contracting Parties for the arrest, detention or extradition of fugitive criminals, the appropriate legal officers of the country where the proceedings of extradition are had, shall assist the officers of the Government demanding the extradition before the respective judges and magistrates, by every legal means within their power.

No claim whatever for compensation for any of the services so rendered shall be made against the Government demanding the extradition, provided, however, that any officer or officers, of the surrendering Government so giving assistance, who shall in the course of their duty, receive no salary or compensation other than specific fees for services performed, shall be entitled to receive from the Government demanding the extradition the customary fees for the acts or services performed by them, in the same manner and to the same amount as though such acts or services had been performed in ordinary criminal proceedings under the laws of the country of which they are officers.

These claims for fees are to be submitted through the intermediary of the respective Government.

ARTICLE XIII

The expenses of arrest, detention, examination and transportation of the accused shall be paid by the Government, which has preferred the demand for extradition.

ARTICLE XIV

The provisions of the present Treaty shall be applicable to all territory wherever situated, belonging to either of the High Contracting Parties, or in the occupancy and under the control of either of them during such occupancy or control.

ARTICLE XV

The present Treaty shall be ratified by the High Contracting Parties and the exchange of ratifications shall take place at Warsaw, as soon as possible.

This Treaty shall take effect on the thirtieth day after the date of the exchange of ratifications and shall be applied, although the crime or offence, for which the extradition has been claimed, have been committed before its entering into force.

The present Treaty may be terminated, yet it will remain in force for one year from the date on which such notice of termination shall be given by either of the High Contracting Parties.

In witness whereof, the undersigned Plenipotentiaries have signed the present Treaty and affixed thereto their respective seals.

Done in duplicate at Warsaw this 22d day of November, 1927.

[SEAL.] JOHN B. STETSON, Jr.
[SEAL.] AUGUST ZALESKI.

PROTOCOL ACCOMPANYING THE TREATY OF EXTRADITION BETWEEN THE UNITED STATES OF AMERICA AND THE REPUBLIC OF POLAND

At the moment of signing the Treaty of Extradition between the United States of America and the Republic of Poland the undersigned Plenipotentiaries, duly empowered, have agreed as follows:

1. The Polish Government consents to extradite, at the request of the Government of the United States of America, all fugitive criminals, as they are referred to in the accompanying treaty, in cases where the charge involved exceeds $200.00, although the minimum provided for in the accompanying treaty for the High Contracting Parties is $1,000.00.

The foregoing agreement applies to the provisions of Paragraphs 9, 10, 11, 12, 13, 14 and 15 of Article II of the accompanying treaty.

2. The Polish Government, which by virtue of Article 104 of the Treaty of Peace of Versailles conducts the foreign affairs of the Free City of Danzig, undertakes to do all that is necessary to secure the adherence of the Free City of Danzig to the provisions of this protocol and the accompanying treaty as soon as possible.

In faith whereof, the undersigned Plenipotentiaries have signed the present protocol and affixed thereto their respective seals.

Done in duplicate at Warsaw this 22d day of November 1927.

[SEAL.] JOHN B. STETSON, Jr.
[SEAL.] AUGUST ZALESKI.

NOMINATIONS

Executive nominations received by the Senate February 24, 1928

UNITED STATES COAST GUARD

Isaac E. Johannessen to be a chief boatswain in the Coast Guard of the United States, to take effect from date of oath.

Alexander T. Boothe, Pierce City.
L. Tom Wilder, Ste. Genevieve.
Charles Hawker, Wheeling.

PENNSYLVANIA

Lemuel N. Ammon, Gap.
John N. Sharpsteen, Honesdale.
Charles B. Bishop, Morton.

TENNESSEE

Chester A. Scott, Selmer.

HOUSE OF REPRESENTATIVES

FRIDAY, *February 24, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Blessed Lord, we know that Thou art near by the thoughts of our hearts. Let Thy approach put everything else to silence, holy silence; it makes all others discord. Do Thou create within us chastened and softened spirits. Visit the poor and the unfortunate and cause them to smile through tearless laughter. No human being is so prized as he who advances through the conquest of difficulty. Opportunity is sacred. Teach us what patience and diligence can do through prolonged effort. Be with our country, and may the spirit of brotherhood and trust beat and throb until they echo to the remotest boundary lines of the Union. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed a concurrent resolution and bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. Con. Res. 6. Concurrent resolution to print and bind the proceedings in Congress together with the proceedings at the unveiling in Statuary Hall of the statue of Alexander Hamilton Stephens, presented by the State of Georgia;

S. 1637. An act for the relief of Martha Henson;

S. 2370. An act to amend section 24 of the immigration act of 1917;

S. 2450. An act to amend the immigration act of 1924 entitled "An act to limit the immigration of aliens into the United States, and for other purposes";

S. 2737. An act for the relief of Morgan Miller;

S. 2781. An act to amend the Code of Law for the District of Columbia so as to empower the corporation counsel for the District of Columbia and his assistants to administer oaths; and

S. 2801. An act granting the consent of Congress to the New Martinsville & Ohio River Bridge Co. (Inc.) to construct, maintain, and operate a bridge across the Ohio River at or near New Martinsville, W. Va.

The message also announced that the Senate had passed without amendment bills of the House of the following titles:

H. R. 5502. An act authorizing the Washington Missouri River Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Washington, Franklin County, Mo.;

H. R. 5722. An act authorizing the Rogers Bros. Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Ashland, Ky.;

H. R. 6639. An act authorizing the Centennial Bridge Co., of Independence, Mo. (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Liberty Landing, Clay County, Mo.;

H. R. 6991. An act authorizing the erection of a nonsectarian chapel at the Army medical center in the District of Columbia, and for other purposes;

H. R. 8106. An act authorizing F. C. Parnhill, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Arrow Rock, Saline County, Mo.; and

H. R. 8107. An act authorizing Frank M. Burruss, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Miami, Saline County, Mo.

ADJOURNMENT OVER UNTIL MONDAY

Mr. TILSON. Mr. Speaker, in case the consideration of the District of Columbia appropriation bill is completed to-day, I ask unanimous consent that when the House adjourns to-day it adjourn to meet on Monday next.

The SPEAKER. The gentleman from Connecticut asks unanimous consent, if the District of Columbia appropriation bill is completed to-day, that when the House adjourns to-day it adjourn to meet on Monday next. Is there objection?

Mr. LINTHICUM. Mr. Speaker, reserving the right to object, why not adjourn until Monday anyway, whether we complete the District of Columbia appropriation bill to-day or not?

Mr. TILSON. We must complete the appropriation bill so that it may be on its way to the Senate.

Mr. BLANTON. And does the gentleman from Connecticut have to bribe the gentleman from Nebraska [Mr. SIMMONS] in order to go over a day?

Mr. TILSON. The gentleman from Texas can characterize my request as he wishes, but it is the desire to have this bill go to the Senate promptly. If it is finished to-day, rather than take two days to finish it, we can very well adjourn over and catch up with our other work. If the bill is not finished to-day, I shall feel that I must insist upon the consideration of it going on to-morrow.

Mr. ABERNETHY. Mr. Speaker, will the gentleman yield?

Mr. TILSON. Yes.

Mr. ABERNETHY. What are we going to do on Monday?

Mr. TILSON. Next Monday is the regular District of Columbia day. I understand that the Committee on the District of Columbia has some important legislation which that committee wishes to have considered at that time.

Mr. BLANTON. And if we do not finish the appropriation bill to-morrow, is the gentleman going to run on Sunday?

Mr. TILSON. I think we ought to run to a very late hour to-morrow, if it be necessary to do so, in order to finish the consideration of this bill.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

ADDRESS OF HON. CHARLES H. BRAND

Mr. CRISP. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing therein a speech delivered by my colleague, Judge BRAND of Georgia, before the Georgia Bankers' Association, advocating that in insolvent banks the depositors be given first call on the assets.

The SPEAKER. The gentleman from Georgia asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. CRISP. Mr. Speaker, over 300 bankers from all portions of the State were in attendance upon this convention, held in Atlanta, Ga., May 16–18, 1927. He was speaking in the interest of the depositors of insolvent banks, contending that they should be paid first above all other creditors, which suggestion was approved and enacted into law at the following session of the General Assembly of Georgia.

PAY DEPOSITORS FIRST

I am not here as Congressman from the Athens district but as a delegate from the Brand Banking Co., of Lawrenceville, Ga., of which my brother, L. M. Brand, who is present, is president, I being chairman of the board of directors of this bank.

Mr. Eugene Black, in his address on the first day of this session of your convention, stated that numerous bills would be introduced at the next general assembly guaranteeing the payment of deposits of insolvent banks, and he classified that as radical legislation. I do not care to discuss what is or what is not radical legislation at this time, though in making the suggestion which I will submit to you for your consideration I want to state that I am not in favor of any character of legislation, State or national, the effect of which would be to make sound banks take care of unsound banks, successful banks to take care of unsuccessful banks, or strong banks to protect the weak banks.

The bill which I have introduced in Congress provides for a guaranty against loss to depositors in national banks and State banks members of the Federal reserve system, but there is not a line in the bill which is unjust or unfair to any bank, and there is no discrimination in favor of one bank against another. However, it is not my purpose to discourse upon the merits of this bill.

As all of you know, there are seven classes of preferred creditors under the present banking laws of Georgia. There were originally eight, but the "United States" as a preferred creditor was, by an amendment to the laws, eliminated a few years ago. The present law providing the order of paying debts of insolvent banks puts the depositors in the fifth class. I contend this is not right and that the law ought to be amended so as to take the depositors out of the fifth class and put them at the head of the list and let them be paid first in the distribution of assets of an insolvent bank.

I have attended every session of this convention and have heard all the discussions in regard to the banks of the States and all references to groups and zones, service charges, and how banks should be run, and the best way of functioning which would make money for the bankers, at which I make no complaint, but up to date no suggestion has been made regarding the payment of deposits when banks fail.

If we can not obtain more satisfactory legislation in behalf of depositors, the next best thing which should be done is to rearrange the order of paying preferred creditors, and instead of putting the State of Georgia first, which in all cases is protected by bond as counties are, the depositors should be placed first in the preferred class.

I submit to you this suggestion for your serious consideration, with the hope you will reach the conclusion that it is the duty of the general assembly to put depositors at the head of the list of preferred creditors so that when a bank in Georgia fails the people who put their money in such bank will be paid first.

The people of Georgia are no longer going to be satisfied with present legislation and the assurance that they will get the money they have deposited if the bank does not fail. What the people are clamoring for in this State, and what they are entitled to, is assurance that the depositors will get their money when they call for it when a bank does fail. This is not confined to Georgia. It is common feeling all over the country, especially in the Western States.

If the amendment which I propose to the present banking laws is enacted by the general assembly it won't hurt any bank in Georgia, it will not hurt the State of Georgia, it will not hurt any county in the State, and it will not do any injury to any of the municipalities who have bonded officers.

There is more suffering in Georgia on account of broken banks due to losses to depositors than any other one thing, and I think it is high time that the Georgia Bankers Association and this convention, which is composed of men of experience and a sense of justice and fairness, should get active and take some interest in behalf of the depositors. The situation calls for something more than passiveness or inaction on the part of the Georgia Bankers Association. The bankers of this State may as well meet the issue by proposing or supporting some constructive legislation which will afford protection to depositors. I think it would be almost a crime if the general assembly of this State at its next session does not do something to protect the depositors. I don't see how any banker or any member of the general assembly can afford to offer any opposition to the suggestion which I have made to you.

I have no right to suggest what you should do or should not do, but I give it to you as my judgment, after studying the situation for at least two years as a member of the Banking and Currency Committee of the House, that you owe it to your depositors whose money you use to make money for the banks to speak to the members of the next general assembly and urge upon them to pass some law which will give better protection to depositors than exists under present laws.

Something must be done if confidence is to be restored in the banks of the country. We must protect the depositor. If you make money in the administration of your trust as bankers, it is all right; paying dividends to your stockholders is all right; but for God's sake do something for the depositors to protect them when the banks become insolvent. [Applause.]

ADDRESS BY MR. HUSTON THOMPSON

Mr. HULL of Tennessee. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting therein a brief speech by Mr. Huston Thompson on certain phases of government and prosperity.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to extend his remarks in the RECORD by printing an address delivered by Mr. Huston Thompson. Is there objection?

There was no objection.

Mr. HULL of Tennessee. Mr. Speaker, I desire to extend my remarks in the RECORD by inserting the following address at the Jackson Day dinner, January 12, 1928, Mayflower Hotel, Washington, D. C.:

IRRESPONSIBLE GOVERNMENT AND DIVES PROSPERITY

Mr. Chairman, Andrew Jackson was superb in fighting for his beliefs—supreme in fighting the things he opposed. He fought for lawful business, big and little, just as he fought against an irresponsible government which sprang from monopoly. Like him the Democratic Party has been the best friend lawful big business and little business in this country has ever had. But that same irresponsible government which Jackson fought and defeated is more in control to-day than ever before. It is no longer invisible nor inarticulate. It is omnipresent. At home it speaks with authority and abroad is speaks with shrapnel.

In a most exciting and informing eight years on the Federal Trade Commission I saw special privilege, the father of irresponsible government, perform. I saw it wend its way to and from the places where privilege and monopoly flourish in the banking center of New York City. There is the real center of our Government to-day. From thence its tentacles have reached out over our entire land. It sits by our fires and sups in our cups. It haunts our Treasury and it sometimes sleeps in our White House.

I saw irresponsible government take complete control under a Republican administration. This irresponsible government has no ideals; it believes not in the common man and makes no pretense of this except at election time. I learned from Calvin Coolidge what its philosophy is when he said: "We justify the greater and greater accumulations of

capital because we believe that therefrom flow all the support * * * to the charities which minister to the people as a whole." He has stated this repeatedly.

This is nothing more nor less than the philosophy of Dives. You remember the Bible story of a certain rich man, Dives, who graciously permitted the crumbs of charity to fall from his table to the beggar Lazarus.

Is it any wonder that with such a philosophy the administration blew a great blast of publicity in 1926 to glorify the creation of 11,000 millionaires, but was silent as the tomb over the mortality of more banks in that year than have ever failed in any other year of our history? Do you wonder that it soft-pedaled the startling information that last year there were 48,758 bankruptcies in the United States, with a total loss of $885,557,006, which, by the way, is $200,000,000 more in this year of vaunted prosperity than the losses of the previous year? Do you wonder that the administration in 1926 proclaimed the creation of 226 multimillionaires so loudly that we could not hear the tramp, tramp, tramp of over half a million people who are each year forsaking the farms for the unrest of our cities never to return, because they can not make a living in what Jefferson said should be our primary industry? Is it surprising that this irresponsible Government, with its Dives prosperity, has looked on with complacency while 39 per cent of our farms have come to be worked by tenants and the mortgages on 170,000 of them foreclosed annually; or that the farmer's purchasing dollar has dwindled to a value of 60 cents, while that of the tariff recipients is worth 100 cents?

The announcement made just a few days before this last Christmas that the largest cotton mills in New England, followed by other mills, all having a 45 per cent tariff protection, would, after repeated cuts in wages, put into effect another cut of 10 per cent on Christmas Eve so that the families of many were brought below a living income, caused no more tremor to irresponsible government than the fact that over 80,000,000 of our people are living at this hour on an income that supports but a bare existence.

Think not that this smug, self-satisfied prosperity that comes from irresponsible government is permanent. The rest of the world is not going to permit 6 per cent of the population of the earth to maintain the comfort and luxury of Dives with the possession of one-half of the gold of the world. If you doubt it, I would remind you that the industrial units of the nations of Europe are combining to trade against us, since they can not trade with us. I would remind you that within the last few months tariff doors have one by one been closing against us among the nations of Europe, and that on the 15th of this very month the German Government will discontinue certain preferences on automobile parts. This means not only a serious reduction in profits of American companies, but the closing down of at least five great American assembling plants in Germany. What will become of this much-vaunted prosperity should the rest of the world close its markets to us, as it is giving marked indications of doing, and our goods pile up on our wharves?

But make no mistake about it, my friends, this Dives prosperity is the real issue in the next campaign. At least it should be. The administration will not dare to bring forth the subject of economy with a Coolidge budget of four billion two hundred and fifty-nine millions and the most colossal pork-barrel expenditures of congressional history in the offing. It will not dare to submit its international policies dictated by irresponsible government; and what can it say of law enforcement when there has been none?

In preparation for its campaign, this irresponsible government, with its Dives prosperity, has silenced the Federal Trade Commission, it has made the Department of Commerce a school for the study of price control, and it has held chloroform to the nostrils of the Department of Justice. Its battle lines are set, and its Big Berthas of publicity and propaganda are ready to blaze forth.

What about the ideals of the Democratic Party, which must meet the attacks of our opponents? We recorded some of them in the statute books when we were last in power. We declared our belief in property rights and in human rights. We enacted laws with the purpose of freeing lawful big and little business from the attacks of special privilege and monopoly. We legislated against unlawful concentration of capital, because unlawful concentration is death. We reduced the tariff to a point where competition in prices was once more restored in this country in order to bring about a fairer distribution of our wealth. We believe that this country was dedicated not to ideas, but to ideals that have nothing in common with the prosperity of a Dives. We believe in a foreign policy that does not destroy the lives of our own marines nor of the people of other nations with whom we are at peace, and we have set our faces against force and dollar diplomacy. We believe that this country should aspire to and maintain that position of moral and political leadership among mankind which it was privileged to have under Woodrow Wilson.

But what do we see as we look at the country to-day? Great masses whom the administration is endeavoring to fool into believing there is universal prosperity. We see apathy and loss of interest in government which does not even awaken to a resentment over the most terrible political scandals that have ever visited our land.

We see the concentration of wealth and power into the hands of a few because of the lack of law enforcement until 1 per cent of the people own more of the wealth of our Nation than the other 99 per cent; two corporations own one-half of our iron ore; four corporations own one-half of all of our copper ore; and six corporations own one-third of our developed water power. We see holding companies with as many as 150 subsidiaries who take their orders from the parent company. The parent company, operating interstate, is therefore beyond the reach of State laws, and for this reason the States have lost control; we see the helpless public descending upon Washington for protection because the States can not help them, and Congress setting up commissions, bureaus, and divisions of government to meet the situation because they know of no other remedy and because there is no other remedy if we permit great monopolies and irresponsible government to have their sway. We see powerful groups combining, merging, and incorporating until many of the avenues of publicity are no longer free or competitive. If this is not government by oligarchy, what is it?

Everywhere I hear that there are no issues. Everywhere I go men are discussing personalities and not principles. Everywhere I hear our Republican opponents seductively suggesting issues upon which they hope we will split and forget those against which Jefferson, Jackson, Lincoln, and Wilson fought and against which we, too, must fight if we are to deserve the support of the people. It is time for us to go before the country with some claims, some issue in keeping with the history of America and with the traditions of our great party.

The issue of a reasonably reduced tariff that will restore the equilibrium between the farmers and industrialists and bring back the benefits of competition to the mass of ultimate consumers. The issue of the sale of Senate seats and Cabinet bribery; the issue of the breaking down of privilege, monopoly, and the unlawful concentration of wealth; of protecting honest business, big and little, against the attacks of irresponsible government, and halting the control of the agencies which educate and inform our people. The issue of law enforcement. The issue of the resumption of our former place of moral leadership among the nations of the world. These are the issues to which free men can give impassioned allegiance. They are the issues which will justify the existence of the Democratic Party.

Let us set them over against the issue of irresponsible government and its offspring, prosperity of Dives.

You know and I know that the Government in Washington is no longer the Government of the people as a whole, but that the real Government is a soviet of financiers, a dictatorship of finances and monopolies. You know that we have gotten about as far away from the kind of a nation that Jefferson planned and Jackson builded as it is possible to get. You know that this great people has responded to nobler and higher appeals than those of Dives and the dinner pail. It was not for a Dives prosperity that men trod the frozen roads with Washington. It was not for this that our land gave 70,000 boys and $20,000,000,000 of treasure. No! All those sacrifices were made in the attempt to suppress irresponsible government, to secure social justice, to make democracy safe not only in the world at large but in our Nation and to live up to the ideals which once made America beloved and admired of all mankind.

Shall we surrender to irresponsible government and become crumb collectors like Lazarus, or shall we determine once and for all to be free men and women?

If we shall take our stand alongside the spirit of Jackson, we shall arrest the attention of the country by our challenge. Let us take that stand. Like him let us give no quarter and ask for none! Then shall we again climb to the heights of victory!

PREPAREDNESS

Mrs. ROGERS. Mr. Speaker, I ask unanimous consent to read a telegram and to address the House for three minutes.

The SPEAKER. Is there objection?

There was no objection.

Mrs. ROGERS. Mr. Speaker and Members of the House, I have been asked to read the following telegram from Mrs. Margaret N. McCluer:

KANSAS CITY, MO., *February 20, 1928.*

Mrs. EDITH NOURSE ROGERS,
Member of Congress, Washington, D. C.:

Hearty congratulations to you and the other three women in Congress for your splendid stand on national defense and the Navy bill. The American War Mothers are praying that you win. They whose sons have served and are serving on land and sea know the meaning of naval and military preparedness. The Washington report is wrong in saying only the Daughters of the American Revolution stand for preparedness. Thirty organizations that participated in last national patriotic conference went on record demanding preparedness. The American War Mothers were in that conference and cast their vote for the naval bill now in Congress and for all measures that want

adequate defense, knowing and believing reasonable preparedness is the best peace insurance. We do not wish to be classed in the pacifist ranks, so beg of you to correct same on floor of Congress, if possible.

Loyally yours,

Mrs. MARGARET N. MCCLUER,
National Legislation Chairman American War Mothers.

It is significant that these splendid patriotic war mothers want adequate national defense. Many of these women gave what was far dearer to them than life—their sons to die for us. Many of these war mothers have the agony of seeing their boys sick, and terribly mutilated, as a result of our lack of national defense. They know only too well what lack of preparedness means. They are paying the cost of it. These women believe in adequate national defense just as some of the greatest Presidents of our country believed in it.

George Washington, Alexander Hamilton, Thomas Jefferson, and Theodore Roosevelt wanted peace-time preparedness, and President Calvin Coolidge has always stated that he wanted adequate preparedness.

Theodore Roosevelt said:

So far from being a provocation to war, an adequate and highly trained Navy is the best guarantee against war, the cheapest and most effective peace insurance.

Our safe and sound President Calvin Coolidge, in his inaugural address in 1925, said:

Our country represents nothing but peaceful intentions, but it ought not to fail to maintain such a military force as comports with the dignity and security of a free people.

And Congress has believed that he favored strengthening our Navy at the present time.

We Americans do not want war. We think in terms of peace, but we owe it to those men who defended us by their supreme sacrifice to have adequate naval and military protection to insure the peace that they so dearly bought.

We all know what treaties may mean. Heaven forbid that another war should ever come. But if it should come, our young men would go into it in the same patriotic, fearless way that the young men have entered all our wars. We have asked so much in every war of the youth of this great land of ours, and the youth have never failed us. In war time the flower of the country goes forth to battle. It seems incredible that they should be allowed to go unprepared. No one wants peace more than I, as I have seen too steadily since 1917 the horrors of war not to want a lasting peace. And the only way to insure peace is to be adequately prepared in man power—prepared by an able Foreign Service, prepared by land, prepared by sea, prepared industrially, prepared in the air, and prepared under the sea.

I shall never forget seeing the *Fatherland* on January 1, 1918, creeping out of New York Harbor. The ship was packed with young men—too young to die, too young to be mutilated. I later learned that four times that interned ship started with her precious cargo of young life only to return to New York. Something was wrong with the engines. If we had had enough ships of our own we would not have been obliged to use the interned German ships that we needed and used with fear, as there was the probability that the engines had been tampered with by the Germans.

I have been very much distressed, and I believe other Members of the House have also, in receiving letters from clergymen and from other people protesting against the Navy bill. Their letters show that they do not understand that this measure of preparedness, the proposed naval bill, is one of national defense and not a preparation to wage war. There is a curious lack of understanding, a curious lack of tolerance exhibited in these communications. If words could kill, some of us would certainly be dead. I have received letters from supposedly gentle clergymen, who use language in describing this measure which makes me blush with shame for them. I believe if they really understood the original proposed naval bill the so-called pacifists would undoubtedly want that measure of national defense. They want us to be able to protect ourselves, I am sure, in case we were attacked. They little realize the impression we are receiving from their letters—that they are bitter and vindictive and are waging a kind of war against Members of Congress. They write me that Congress is "blind," that Congress is "stupid," and in the same letter they ask me to support the President, implying that the President wants no more replacements; wants no more ships. They are very unjust. They indicate very clearly that they little understand any proposed naval bill. On the other hand I have many letters like this telegram from the American War Mothers, from people who suffer as a result of war, people who want adequate defense. They are tolerant and much more pacific than most of the people who write me against the naval program. It would be unfair to say that all letters sent to me against the bill are discourteous, because many of them are most courteous. And as yet no one, except the committee, knows just what the Naval Affairs Committee will report out. I firmly believe that when the committee does report out its naval bill and when the citizens of the United States understand the need of replacements in our Navy and the need for some new ships, that only those who believe in practically no Navy at all will complain. These frenzied protests have been due in large measure to lack of knowledge of our naval problem. It is a great pity that at the present time the pacifists are separated from the patriotism of the minds of the country. I know a pacifist can also be a patriot, and I know that patriots most earnestly want peace.

Doctor Gordon, of Winnipeg, who writes under the nom de plume of Ralph Connor, was a chaplain during the World War. He said, "We of England have had to realize what a terrible thing it is to be unprepared against those who are prepared," and also "what a terrible thing it is to have but walls of flesh and blood to put up against machines of steel." Doctor Gordon is a pacifist and Doctor Gordon is a patriot.

I thank you for your attention. [Applause.]

SUBMARINES

Mr. McCLINTIC. Mr. Speaker, I ask unanimous consent to address the House for five minutes on the subject of submarines.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent to address the House for five minutes. Is there objection?

There was no objection.

Mr. McCLINTIC. Mr. Speaker and Members of the House, as long as civilized nations maintain, own, and operate submarines, just that long will the United States have to keep up this arm of its national defense. A submarine can come closer to the harbors of the world than any other type of ship in time of war. It was the submarine that destroyed as much as 1,000,000 tons of commerce per month during the World War. I venture to say that should this Nation be so unfortunate as to become involved in a war with a major nation it would have to commandeer every shipbuilding plant in the United States in order to build enough submarines to protect our country and our commerce. So, if that is true, why should we not face this situation in the proper way?

Now, we have an investigation of this subject proposed, and the issue has been joined. One of the captains in the Navy Department has made the statement that no new safety devices have been offered in a period of a few years, and the inventor of the submarine says that if the ideas that he has placed upon ships belonging to foreign nations had been adopted by our Navy we could have saved 38 or 40 of the men lost in the last submarine disaster. So that question ought to be investigated, because the naval investigating committee did not even touch the subject of safety devices; and in addition I am confidentially informed that all the tests or trial runs that were necessary for the *S–4* to make prior to this disaster were made and because the Navy would not accept the word of the commanding officers they were required to make these tests again; therefore, the Navy put aboard an inspector and a civilian engineer who, of course, lost their lives.

This disaster ought to be investigated. We ought to know whether charges of this kind are true or not; and how are we to know if we do not investigate this disaster through some committee charged with this responsibility?

So I respectfully take issue with those who object to the investigation of this disaster on the ground that a special committee of the Navy has investigated it and has gone into the matter most thoroughly. I make the statement that the committee has not touched the vital points in which the American people are interested, because you know and I know from the letters that come to us that the people want to be informed why this Government has not provided safety devices so that when a submarine is sunk it can be rescued from the bottom of the ocean.

Mr. Speaker, I have some short extracts from newspapers which relate to this last investigation. Most of them are about 10 lines long. I think they will be very valuable, because if a committee is appointed to investigate this matter the same will be in the RECORD. I ask unanimous consent to insert them as a part of my remarks.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent to insert certain extracts from various newspapers on the subject indicated. Is there objection?

Mr. SNELL. I hope the gentleman will withhold that request for a time. It is not the policy to go into those matters now.

Mr. McCLINTIC. Would the gentleman object to my inserting them in the back part of the RECORD?

Mr. SNELL. I trust the gentleman will not ask to insert them for the present.

Mr. McCLINTIC. All right. I will be glad to accede to the gentleman's wishes.

Mr. LINTHICUM. A few days ago I talked with Mrs. Jones, the widow of Roy Jones, who was in command of the *S–4*, and she spoke of a cable that had been extended from the front of the submarine to the rear, to hold it steady. Will the gentleman explain what that cable was?

Mr. McCLINTIC. I am not a submarine expert, and I am sorry I can not answer the gentleman's question.

WITHDRAWAL OF PAPERS

Mr. KVALE. Mr. Speaker, I ask unanimous consent that certain papers in the case of Seaford Anderson may be withdrawn from the files of the Committee on Military Affairs. The chairman of the committee informs me that there has been no adverse report thereon.

The SPEAKER. The gentleman from Minnesota asks unanimous consent to withdraw from the files of the Military Committee of the House certain papers in the case of Seaford Anderson, there being no adverse report thereon. Is there objection?

There was no objection.

DISTRICT OF COLUMBIA APPROPRIATION BILL

Mr. SIMMONS. Mr. Speaker, I move the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 11133, the District of Columbia appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union, with Mr. HOOPER in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill, of which the Clerk will read the title.

The Clerk read as follows:

A bill (H. R. 11133) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1929, and for other purposes.

Mr. SIMMONS. Mr. Chairman, under the unanimous-consent agreement of yesterday we should now return to the paragraph beginning on line 9 of page 46.

The CHAIRMAN. Under the unanimous-consent agreement yesterday the committee will return to the paragraph referred to on page 46, as indicated by the gentleman from Nebraska. The Clerk will read the paragraph.

No part of the appropriations herein made for the public schools of the District of Columbia shall be used for the instruction of pupils who dwell outside the District of Columbia: *Provided*, That this limitation shall not apply to pupils who are enrolled in the schools of the District of Columbia on the date of the approval of this act.

Mr. GAMBRILL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Maryland offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. GAMBRILL: Page 46, strike out all of lines 9 to 14, inclusive.

The CHAIRMAN. The gentleman from Maryland is recognized.

Mr. GAMBRILL. Mr. Chairman and ladies and gentlemen, my amendment is designed to strike out a certain paragraph of the bill which, if it is allowed to stay in the bill, will bar the children who reside outside of the District of Columbia from being instructed in the public schools of the District. We are facing here to-day the same issue which we faced two years ago.

Unfortunately the idea prevails that all children who reside outside of the District of Columbia are entitled to receive free instruction in the schools of the District. Such is not the case. Under the existing law that right or privilege is conferred only on certain children whose parents are engaged in business in the District of Columbia, officially or otherwise, or who are the children of officers and men of the United States Army and Navy. In order that the members of the committee may get this subject definitely in mind, I am going to read excerpts from the various laws: First, as to those who are entitled to admission to the public schools of the District of Columbia, the children of parents who are engaged in official duties or public duties in the District of Columbia; secondly, those whose parents are engaged, official or otherwise, in business in the District of Columbia; third, children of officers and men of the United States Army and Navy stationed outside of the District of Columbia; fourth, children of officers and men of the United States Army and Navy and children of other employees of the United States stationed outside of the District of Columbia; and, fifth, children of soldiers and sailors of the United States not residents of the District of Columbia who are on duty at stations adjacent to the District of Columbia. So you will see, members of the committee, that the privilege or right is simply granted to certain children whose parents have certain rights which the law has recognized.

The great bulk of the children who attend the schools of the District of Columbia, whose parents reside in Maryland or Virginia, are the children of those who are engaged officially or otherwise in business in the District of Columbia; and by their work and activities here contribute toward the taxable basis of this city. They are entitled for that reason to special consideration.

The general impression prevails that the State of Maryland and the State of Virginia have not done their share in trying to meet this situation. I want to disabuse the minds of the members of this committee of that idea, so far as the State of Maryland is concerned. I may say, without boastfulness but with a certain degree of pride, that the State of Maryland has in recent years made two notable contributions toward civic progress in that it has done as much if not more than any State in the Union in the construction of good roads, and it has advanced in educational facilities and conveniences from a low plane until to-day she stands in a notable position among the States of the Union.

The CHAIRMAN. The time of the gentleman from Maryland has expired.

Mr. GAMBRILL. Mr. Chairman, I ask unanimous consent to proceed for 10 additional minutes.

The CHAIRMAN. The gentleman from Maryland asks unanimous consent to proceed for 10 additional minutes. Is there objection?

There was no objection.

Mr. GAMBRILL. But we in Maryland in particular are faced with an unusual situation in that the population of the city of Washington has grown enormously in the past 8 or 10 years and there has been a great influx of population over the District line into Maryland, which has brought about a school situation that it has been difficult for us to meet, particularly if you ladies and gentlemen will bear in mind that all school activities radiate from the county seat, and we as yet have not been able to meet this situation to its fullest extent.

I want to draw attention to a very significant situation, namely, that the committee hearings of two years ago, when the District of Columbia appropriation bill was up for consideration, show that at that time there were about 3,072 nonresident pupils who were attending the public schools in the District of Columbia. To-day that number has been reduced by 500, and now there are only about 2,500 nonresident children attending the schools in the District of Columbia. So the unusual situation which confronts us in Maryland is being met. I want to emphasize that we in Maryland are endeavoring to do our part and have done our part, and wherever the convenience of the situation was such that the children of parents residing in the District of Columbia found it more convenient to attend schools in Maryland they have been privileged to attend those schools free from any tuition charges.

I have a letter from the superintendent of the public schools of Prince Georges County, a county which is contiguous to the District of Columbia, in which the statement is made that they have in Prince Georges County schools 258 pupils whose parents are either residents of the District of Columbia or are on reservations of the United States Government. The superintendent of the public schools of Montgomery County writes me that there are 106 students attending the schools in that county whose parents reside in the District of Columbia, and in Anne Arundel County, where the Naval Academy is located, and where there is a large Government camp, the number of nonresident pupils is 157. So that in three counties alone—and I have only taken three counties in the whole State of Maryland—Maryland is educating without cost to the parents 521 pupils who may be termed nonresidents.

Mr. SIMMONS. Will the gentleman yield?

Mr. GAMBRILL. Certainly.

Mr. SIMMONS. The gentleman terms as nonresidents those pupils living within the State of Maryland on Government reservations?

Mr. GAMBRILL. The number, 521, which I have given in the statement just made, is mostly made up of children whose parents reside in the District of Columbia.

Mr. SIMMONS. Can the gentleman separate those figures?

Mr. GAMBRILL. In a general way; about 158 such students are attending the public schools in Prince Georges County, about 106 in Montgomery County, and about 75 in Anne Arundel County.

Mr. SIMMONS. From the District of Columbia?

Mr. GAMBRILL. With the exception of Anne Arundel County, these figures are correct. About 158 from Prince Georges County and 106 from Montgomery County are children attending the schools in those counties whose parents reside in the District of Columbia, and they are not paying tuition charges.

Mr. SIMMONS. The remainder of those in the total the gentleman gave are living within the State of Maryland on Government reservations?

Mr. GAMBRILL. That is true.

Mr. SIMMONS. And the gentleman terms those living on Government reservations in Maryland nonresidents of the State of Maryland?

Mr. GAMBRILL. Manifestly, because they have no voting rights, they pay no taxes, and they contribute nothing in a sense toward the maintenance and support of the State government and of the county government in which they reside.

Mr. SIMMONS. Then they should be termed nonresidents?

Mr. GAMBRILL. Certainly.

Mr. SIMMONS. Does not the same argument, then, apply to your people coming into the District of Columbia?

Mr. GAMBRILL. They are nonresidents, of course.

Mr. SIMMONS. And come under the same general classification in which the gentleman puts the Government people who are in your State?

Mr. GAMBRILL. Not at all. I want to draw this distinction, that those nonresident pupils who come into the schools of the District of Columbia come under one broad class, those children of parents who are engaged officially or otherwise in business in the District of Columbia, men who are engaged in commercial pursuits here and who by their commercial activities add to the taxable basis of the city of Washington and contribute toward the support of the District of Columbia.

Mr. SIMMONS. Will the gentleman yield further?

Mr. GAMBRILL. Yes.

Mr. SIMMONS. I understand it is the gentleman's position that the people who live on Government reservations in the State of Maryland contribute nothing to the State of Maryland?

Mr. GAMBRILL. Very little, if anything. They make most of their purchases from the commissaries on the respective reservations and do very little trading in the State of Maryland; but we are glad to have them, nevertheless.

Mr. LINTHICUM. Will the gentleman yield?

Mr. GAMBRILL. Certainly.

Mr. LINTHICUM. The gentleman raised some question about reservations; was not the District of Columbia taken over under the same provision of the Constitution that all these other reservations were taken over?

Mr. GAMBRILL. That is correct.

I want to say further, the amendment is drawn very skillfully and very artfully, if I may use that designation, in that it deprives the poor Government clerk who is drawing a small, meager salary and who goes into the State of Maryland or into Virginia in order to eke out a livelihood of the privilege of sending his children to the schools here in the District of Columbia; but it does not prevent the children of a Congressman who draws $10,000 a year and who dwells here but a few months of the year from sending his children to the schools of the District of Columbia.

Mr. SIMMONS. Will the gentleman yield there?

Mr. GAMBRILL. Certainly.

Mr. SIMMONS. The gentleman will concede that if a Congressman lives in the State of Maryland or the State of Virginia while Congress is in session, it does require that his children be subject to exactly the same limitations as the children of anyone else.

Mr. GAMBRILL. I did not know this was a bill directed particularly against the Congressmen from Maryland and from Virginia. I thought it had general application.

Mr. SIMMONS. That is a method that is used by people in Maryland to stir up antagonism——

Mr. GAMBRILL. Oh, no.

Mr. SIMMONS (continuing). When the children of a Congressman receive exactly the same treatment under this provision as the children of a charwoman anywhere in the city of Washington.

Mr. GAMBRILL. But the point I seek to make is that you have men engaged in commercial pursuits here in the District of Columbia who live in Maryland or in Virginia who are doing a great deal toward increasing the taxable basis of the city, and you have, it is estimated, 224 children of Congressmen and secretaries of Congressmen who are privileged under this paragraph of the bill, which I am objecting to, to attend the public schools of the District of Columbia, when not 10 per cent of the Congressmen are contributing anything toward the taxable basis of the District of Columbia.

Mr. GOLDSBOROUGH and Mr. KETCHAM rose.

Mr. GAMBRILL. I yield first to the gentleman from Maryland [Mr. GOLDSBOROUGH].

Mr. GOLDSBOROUGH. Does the gentleman know how many pupils from the District of Columbia attend the University of Maryland annually?

Mr. GAMBRILL. About 200.

Mr. GOLDSBOROUGH. And they cost the State of Maryland $70 apiece.

Mr. GAMBRILL. That is correct.

Mr. GOLDSBOROUGH. That is an annual cost?

Mr. GAMBRILL. That is the annual cost to the State of Maryland.

Mr. KETCHAM. Will the gentleman yield for a question at that point?

Mr. GAMBRILL. Certainly.

Mr. KETCHAM. Just a moment ago I understood the gentleman to give the figures representing the number of pupils from the District of Columbia who attend school in Prince Georges and Montgomery Counties. Will the gentleman kindly repeat those figures?

Mr. GAMBRILL. I have a letter from the superintendent of public schools of Montgomery County who says we have a total of 106 pupils reported as being enrolled in our public schools whose parents do not live in Maryland, and in a talk with him over the telephone I was advised that all these children are the children of parents residing in the District of Columbia.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. GAMBRILL. If I may, I will complete the answer to the question asked me by the gentleman from Michigan.

The superintendent of the board of education of Prince Georges County informs me by letter that there are——

The CHAIRMAN. The time of the gentleman from Maryland has expired.

Mr. GAMBRILL. Mr. Chairman, I ask unanimous consent that I may have five additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. GAMBRILL. There are 158 pupils attending the schools of Prince Georges County whose parents reside in the District of Columbia.

Mr. KETCHAM. I thank the gentleman for that information. I wonder if the gentleman has given any consideration to this thought: What relation does the combined number of children from the District of Columbia bear to your total school enrollment of Prince Georges and Montgomery Counties, in relation of the 2,500 to the 69,000 who are to be found in the District of Columbia?

Mr. GAMBRILL. I have not those figures in mind beyond this statement made by the superintendent of public schools of Prince Georges County, who says there are 10,500 pupils attending the schools in that county.

Mr. KETCHAM. Is it not a fair assumption to say that considering school populations in both units, the attitude of Montgomery County and Prince Georges County toward the District of Columbia is as fair as the attitude on the reverse side of the question?

Mr. GAMBRILL. I think that is unquestionably true.

Mr. KETCHAM. And are you asking anything more, relatively, from the District of Columbia, when you ask that these children be continued, than you are willing to concede to the people of the District of Columbia in sending their children to the outside schools?

Mr. GAMBRILL. That is a correct statement and I am glad the gentleman brought that out.

Mr. CHINDBLOM. The gentleman from Maryland [Mr. GOLDSBOROUGH] a moment ago made reference to the University of Maryland. Does the University of Maryland charge tuition fees of its students?

Mr. GAMBRILL. It charges a tuition fee which is a very small part of the cost of the education of those students.

Mr. CHINDBLOM. Does it charge the same fees of residents of Maryland that it does residents of other parts of the United States?

Mr. GAMBRILL. It does charge the same fee to the District of Columbia students that it does to the residents of Maryland.

Mr. CHINDBLOM. What about other parts of the United States?

Mr. GAMBRILL. I have not any information on that score.

Mr. CHINDBLOM. Then, of course, when the gentleman says it costs the State of Maryland $70 a pupil for these students from the District of Columbia, that is exactly the same loss that the University sustains with reference to other students?

Mr. GAMBRILL. It sustains that loss in respect of the students from its own State, but there is no reason why that privilege or benefit should be extended to the students of the District of Columbia unless the State of Maryland wishes to recognize this reciprocity between the two political units.

Mr. CHINDBLOM. That of course, is a matter for the State of Maryland and for the managers of the University of Maryland to determine.

Mr. GAMBRILL. Manifestly.

Mr. CHINDBLOM. If they are willing to allow residents of other parts of the United States than the State of Maryland to attend the University of Maryland upon the same terms as their own citizens, that is due to their own determination.

Mr. GAMBRILL. It is their own determination——

Mr. CHINDBLOM. And Congress has nothing to do with it.

Mr. GAMBRILL. But it is a recognition of the fact that Maryland surrounds the District of Columbia and there has to be reciprocity and understanding and cooperation between the two in order to obtain the best results.

Mr. CHINDBLOM. Oh, but I dare say this does not specifically relate to the District of Columbia and I have no doubt citizens of Virginia or any other State can attend the University of Maryland upon the same terms, can they not?

Mr. GAMBRILL. I do not understand they can; no. That is not my understanding.

Mr. GOLDSBOROUGH. No.

Mr. CHINDBLOM. Let us get the facts.

Mr. GOLDSBOROUGH. I understand that Maryland pays cash $70 for every pupil——

Mr. BLANTON. Mr. Chairman, this is a very important matter, and I make the point that there is no quorum present.

Mr. GOLDSBOROUGH. I do not think the gentleman from Texas ought to interrupt me.

Mr. BLANTON. I am making a point of order that interrupts anybody.

The CHAIRMAN. The gentleman from Texas makes the point of order that no quorum is present. The Chair will count. [After counting.] One hundred and two Members are present, a quorum.

Mr. HOLADAY. Will the gentleman yield?

Mr. GAMBRILL. I will.

Mr. HOLADAY. In reference to the question asked by the gentleman from Illinois [Mr. CHINDBLOM] does the gentleman know that within the last two weeks the president of the University of Maryland has appeared before a committee of this House and asked that the District of Columbia pay tuitions for the students from the District in the University of Maryland.

Mr. GAMBRILL. I am aware of that fact, but that action was taken by the president without consultation with me or with other Members of this House, and I am not in sympathy with that effort.

The CHAIRMAN. The time of the gentleman from Maryland has again expired.

Mr. BLANTON. I ask unanimous consent that the gentleman have five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BLANTON. Will the gentleman yield?

Mr. GAMBRILL. I will.

Mr. BLANTON. There are 2,571 children of scholastic age from Virginia and Maryland now attending the District schools. What in return do I understand Maryland and Virginia are giving the people of the District of Columbia?

Mr. GAMBRILL. I am afraid the gentleman from Texas was not present when the subject was being discussed.

Mr. BLANTON. Oh, yes; I was here.

Mr. GAMBRILL. I gave the figures of the number of students attending schools in Montgomery County and Prince Georges County whose parents are residents of the District of Columbia, and they are not required to pay tuition.

Mr. BLANTON. They are Army officers, are they not?

Mr. GAMBRILL. Certainly not.

Mr. BLANTON. Where did the gentleman get those statistics?

Mr. GAMBRILL. From the superintendent of schools.

Mr. BLANTON. How many children are domiciled in the District and attend those schools?

Mr. GAMBRILL. In Prince Georges County, 158; Montgomery County, 106; actual residents of the District of Columbia.

Mr. BLANTON. Two hundred and sixty-four against 2,571. The people of the District and our Government are paying for the education of 2,571 children who live in Maryland and Virginia.

Mr. GAMBRILL. You are doing that because the children are children of parents who have certain rights in the District of Columbia, because they pay taxes here.

Mr. BLANTON. No; they live in Virginia and Maryland because it is cheaper, and pay their taxes in those States.

Mr. GAMBRILL. Oh, the gentleman is looking at it from a distant point of view. He lives in a State 2,000 miles away. We have a real situation to meet here, and it ought to be met in a conciliatory way and not brought in here as legislation on an appropriation bill under the guise of a limitation.

Mr. CASEY. Will the gentleman yield?

Mr. GAMBRILL. Yes.

Mr. CASEY. In response to a question propounded by the gentleman from Illinois, the gentleman from Maryland stated that the president of the University of Maryland appeared before a committee of the House. May I ask what committee it was?

Mr. GAMBRILL. The District Committee, I think—the gentleman from Maryland can enlighten the gentleman.

Mr. ZIHLMAN. It was the subcommittee of the District Committee. He did not ask that the District pay tuition in the University of Maryland, but he did ask that the District be put under the provisions of the Morrill Land Grant Act.

Mr. CASEY. What I wanted to get clear was that this man did not appear before the subcommittee of the District of Columbia on the bill we are considering.

Mr. GAMBRILL. He did not.

Mr. SIMMONS. Will the gentleman yield?

Mr. GAMBRILL. I yield.

Mr. SIMMONS. It has been said to the members of the subcommittee on District appropriations that the so-called underpaid Government clerks——

Mr. GAMBRILL. For whom I have great sympathy.

Mr. SIMMONS. And for whom we have great sympathy—were not the people who bring their children into the District schools, and that the children of the well to do with a higher salary bring their people into the District, because your district does not build schoolhouses and afford proper facilities that the Government clerk wants schools in his home community; will the gentleman discuss that?

Mr. GAMBRILL. As I understand the comment of the gentleman, it is rather a criticism of what has been done or what the school authorities of Maryland have neglected to do. It seems to me a complete answer to that criticism can be made when I say that Prince Georges County, in the territory contiguous to Washington, where a great many of these students come from——

The CHAIRMAN. The time of the gentleman from Maryland has again expired.

Mr. GAMBRILL. Mr. Chairman, I have had so many interruptions that I ask for five additional minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GAMBRILL. Prince Georges County has in the last four or five years built between 40 and 50 new school buildings in order to take care of the children of that county.

Mr. GOLDSBOROUGH. Mr. Chairman, will the gentleman yield?

Mr. GAMBRILL. Yes.

Mr. GOLDSBOROUGH. The situation about the University of Maryland is this: Pupils from the State of Maryland and from the District of Columbia are charged $70 less tuition than are pupils from all of the other States in the Union. That $70 is made up out of the treasury of the State of Maryland, and the District of Columbia pupils cost the State of Maryland about $14,000 a year, as there are about 200 of them.

Mr. GAMBRILL. I am very glad to have that contribution to my remarks, which seems to me to be a complete answer to the statement made by the gentleman from Illinois.

Mr. WHITEHEAD. Mr. Chairman, will the gentleman yield?

Mr. GAMBRILL. Yes.

Mr. WHITEHEAD. I notice in the report of the committee that they say it is the intention of this bill to exclude children who are not residents of the District of Columbia. Will the gentleman give us his opinion on just who would be included within that term "not residents of the District of Columbia." Would that mean the children of civil-service employees who have living quarters in the District of Columbia, but who are residents of the States from all over the Union?

Mr. GAMBRILL. I should say that it would not apply to one who had a dwelling or a domicile here. That seems to me to be the answer to that question.

I want to conclude my remarks by showing the attitude of the people of the District of Columbia in relation to this subject. I read an excerpt from remarks made by Mr. Whitaker, president of the Citizens' Association of Takoma Park. Speaking of this subject he said:

It will work itself out. The feeling for a number of years was very strong against the Maryland people using the District of Columbia schools. That feeling was strong on the part of the District of Columbia citizens, but it has died down somewhat, although not entirely. It has died down somewhat because of the strong efforts made by the Maryland people to build adequate school facilities, which they are doing. They are constructing school buildings which they claim will provide for all Maryland children.

I read certain excerpts from an editorial which appeared in the Washington Times of January 25, 1928, as reflecting the views of the city of Washington on this subject. In this editorial the Cramton bill is discussed.

Looked at wholly as a financial matter, the bill may be justified. Looked at as shutting our splendid schools to large numbers of poor children, whose parents are our close neighbors and can not afford to pay tuition fees, the bill has little to commend it. It is not in keeping with the cry of educators that American youth should be given every opportunity for schooling.

The various District appropriation bills for years past have carried certain exemptions from tuition fees in our schools. The principal exemption has been that of children of Government employees, men and women working in Washington, spending their money here, identified in every way with the life of this city except in actual residence.

The majority of these Government workers are underpaid. They would be unable to meet tuition charges for their children. Especially would this be true as to children in the junior and senior high schools, the tuition fees in which would be from $131 to $183 per year. Not only that, these children, living near Washington, have no high schools of their own to attend. They would be deprived of useful education.

The average enrollment in District schools is now about 72,000 a year. Of this number there are 2,582 nonresident pupils, and 57 of these pay tuition. Theoretically, their average cost to the District is something less than $100 per year, or a total of approximately $200,000.

That, however, is guesswork. If these pupils were shut out from our schools altogether, the saving would not be anything like $200,000 a year. The number of teachers employed would be practically the same, for most teachers are now instructing classes far above the number of pupils they should have.

There might be a saving in schoolbooks and in a few minor items.

Washington is the nucleus of that Greater Capital City we talk so much about, and which will some day become a reality. The environs of that greater Washington will be the territory from which the vast majority of these nonresident pupils now come. The parents of these children are nearly all workers in this city and spend their money here.

The Cramton bill should not affect pupils living within an area of 3 to 5 miles of the District line and whose parents or guardians are employed here. These are virtually District children.

Denying Maryland and Virginia children the right to study in District public schools is not in keeping with American ideals or with the pleas of educational pleaders that American children be given every opportunity to receive the best possible education at public expense. Many of those children now come into Washington with their parents, who are employed in this city and spend most of their money here. The parents may be actual citizens of Virginia or Maryland, but in business and other relations they are District people.

We are facing in this appropriation bill for the District of Columbia the same issue which was presented to this House on March 17 and 18, 1926, when the then appropriation bill for the District of Columbia was being considered, namely, an effort to destroy by limitations on an appropriation bill the purpose of existing law.

By an act of Congress approved March 3, 1915, it was provided that—

hereafter all pupils whose parents are employed officially or otherwise in the District of Columbia shall be admitted and taught free of charge in the schools of said District.

By subsequent acts of Congress this privilege was extended to—

soldiers and sailors of the United States, not residents of the District of Columbia, who are at stations adjacent to the District of Columbia—

And to—

the children of officers and men of the United States Army and Navy stationed outside of the District of Columbia.

Many have approached the question of the admission of nonresident pupils to the schools of the District of Columbia under the impresison that all nonresidents are entitled to free tuition in the schools of the District of Columbia, and that the large number of such pupils in the schools of the District of Columbia is due to some neglect or fault on the part of the school authorities of the States of Maryland and Virginia.

Let me correct that impression so far as the State of Maryland is concerned by saying that almost all of the pupils from Maryland who are in the District schools are children of parents "employed officially or otherwise in the District of Columbia," and they are entitled to come here by reason of this law, which recognized that there was merit in the idea that the sons and daughters of parents "employed officially or otherwise in the District of Columbia," are entitled to special consideration. This law, the benefits of which will be destroyed unless my amendment is adopted, was intended to meet a situation where hundreds of poorly paid, if not underpaid, Government employees have been forced by the exigencies of high costs in Washington to move into Maryland and Virginia, where their living expenses are less burdensome. And it seems to me that such men and women should be allowed to send their children to the schools of the District, as well as those engaged unofficially in Washington. This privilege should continue until Maryland and Virginia can arrange to take care of the large influx of population which has settled in Maryland and Virginia near the border line of the District.

If this paragraph of the bill remains, then not only will the children of parents employed officially or otherwise in the District of Columbia be barred, but the inhibition will extend to the children of officers and men of the United States Army and Navy stationed outside of the District of Columbia and to soldiers and sailors of the United States not residents of the District of Columbia who are on duty at stations adjacent to the District of Columbia. Provisions were made to take care of such men and children in various appropriation bills, and in some respect the legislation became permanent, as the word "hereafter" was used.

A mere statement of this situation shows the unwisdom of attempting in an appropriation bill, under the guise of limitations on an appropriation, to change existing law.

I want to disabuse the minds of the members of this committee of the thought that Maryland is not doing its part in trying to meet this situation. May I say, without boastfulness, that my State has in the past few years made two notable contributions to civic progress. She leads the States of the Union in the construction of good roads, and has advanced within a few years from a low plane in public-school facilities and educational advantages until to-day she stands high among the States of the Union in this respect.

It will be admitted, however, that this large influx of population into the State of Maryland, near the District line, has presented a problem which can only be met by an orderly and gradual development of our school facilities, especially when you ladies and gentlemen realize that all school facilities radiate from the county seats of the various counties and the seats of local governments are a considerable distance from Washington. This situation is being met as rapidly as possible, and I plead for tolerance and understanding as against arbitrary and drastic action, and in doing so, I plead for the young men and boys, the men and women of the morrow, who are entitled to and should receive an education. The situation to which I have referred is being met and the number of nonresident pupils is being reduced in a marked degree.

In the committee report on the appropriation bill for the District of Columbia for the fiscal year ending June 30, 1927, it was stated that out of a total of 70,000 pupils, in attendance at the public schools of the District of Columbia, 3,072 were nonresidents. According to the committee report on the bill under consideration, making appropriations for the fiscal year 1929, the number of nonresident pupils in all schools, day schools, night schools, and vacation schools, is 2,582, or a reduction of about 500 pupils. Of this number—2,582—57 paid tuition. Page 393 of the committee hearing. The total enrollment is about

72,000. Hundreds of parents of these nonresident pupils are but temporary residents of Maryland and Virginia, and many of them still retain their legal residence in the States from whence they came and where they participate in the elections. Being employed here in Washington they spend most of their money here and in this way contribute toward the taxable basis of the city. Let me say that the shoe does not pinch one foot only. We in Maryland have tried to meet this unusual situation in a broad spirit of reciprocity, and have welcomed to our schools the children of parents who reside in the District of Columbia, when the convenience of our schools made it desirable that such children come to us, and we have done this without exacting any tuition.

I have before me a letter from the superintendent of the public schools of Prince Georges County, which is contiguous to the District, in which the statement is made that they have in the Prince Georges County schools 258 pupils whose parents are either residents of the District of Columbia or are on reservations of the United States Government.

There is a striking statement made by this superintendent who says that of 10,500 pupils enrolled in the public schools of Prince Georges County it is "estimated that fully one-fourth of the pupils attending Prince Georges schools are the children of parents who work in Washington and consequently pay their business tax direct or indirect in that city," and he might have added do most of their trading and buying in the city of Washington. During the past six years Prince Georges County has built between 40 to 50 new school buildings in order to take care of the school situation.

The superintendent of schools of Montgomery County informs me that there are 106 pupils attending the schools in that county whose parents reside in the District of Columbia, and no tuition is charged for these pupils.

In Anne Arundel County, where the Naval Academy is located and where there is a large Army camp at Camp Meade, the number of nonresident pupils is 157, so that in three counties alone, Maryland is educating without cost to the parents, 521 pupils who may be termed nonresidents.

The provision of the bill which my amendment will strike out is drawn with great skill and artfulness, in that there is nothing to deprive a Member of Congress who receives $10,000 a year and who is a dweller in Washington, from sending his children to the public schools here free of charge, while the poor Government clerk drawing a meager and hardly a living wage, may not have that privilege, because forsooth he has made the fatal mistake of going to Maryland or Virginia where the living is cheaper.

It is estimated by the gentleman from Illinois [Mr. HOLADAY], a member of the Committee on Appropriations for the District of Columbia, that there are 224 children attending the public schools of the District whose parents are either Members of Congress or secretaries to the Members; and, of course, there is not 10 per cent of the Members of Congress who pay taxes in the District. It may be that Members of Congress may be indifferent to my amendment, so long as they stand in a preferred class, so far as their children are concerned.

Why not let this question come before the House as a legislative proposition, unrelated to an appropriation bill, as would be the case if the Cramton bill was taken up for consideration? That bill is designed to close the District schools to all nonresident pupils. If he would take the subject up in this way, then the matter might be determined independent of all other questions; but this course would not satisfy the avaricious and powerful Committee on Appropriations, which intoxicated with power seeks not only to appropriate but to legislate under the guise of a limitation on an appropriation bill.

In conclusion, I hope that you gentlemen will vote to support my amendment, and thereby allow this question to be decided some day upon its merits, unrelated to anything which is contained in an appropriation bill. I thank you for your attention. [Applause.]

Mr. HOLADAY. Mr. Chairman, we have in the District of Columbia 2,571 children who are residents of the States of Maryland and Virginia, who are attending school here in the District of Columbia. The schools in the District of Columbia are crowded. Some of the children are on half time. Some are in the portable buildings, and we are making an effort to provide adequate school facilities for all of the children of the District. If those 2,571 children were taken out of the schools, we would then have adequate facilities for the children of the District.

Everywhere throughout the United States school facilities are furnished by the residents and by the taxpayers of the particular school district. Considerable is said here about offering school facilities to the children of Maryland and Virginia. That question is not at issue. We all agree that adequate school facilities should be afforded not alone to the children of the District of Columbia but to the children of Maryland and Virginia. Much has been said about the Government clerks who live in Maryland and Virginia and who need school facilities. I agree with you, but I call attention to the fact that those poor Government clerks whom we hear so much about are now paying their taxes to the States of Maryland and Virginia, and on account of the payment of those taxes they are entitled to school facilities. Maryland and Virginia are taxing those people, and their money is going into the county treasuries of these adjoining counties, and those counties are not furnishing school facilities.

Mr. ABERNETHY. Mr. Chairman, will the gentleman yield?

Mr. HOLADAY. Yes.

Mr. ABERNETHY. Will the gentleman tell us how many of those 2,500 children are children of Government employees or clerks?

Mr. HOLADAY. I do not have that information.

Mr. ABERNETHY. Does not the gentleman think that we ought to be a little liberal when we are dealing with the employees of the Government who are forced to go into Maryland and Virginia to live on account of cheaper conditions, because they are not paid enough to live in the District of Columbia?

Mr. HOLADAY. I am in favor of being exceedingly liberal with them, and when they are forced to go out there and pay taxes I am in favor of those communities and the organization receiving their taxes furnishing school facilities for which those people are paying. [Applause.]

Mr. HERSEY. Mr. Chairman, will the gentleman yield?

Mr. HOLADAY. I yield.

Mr. HERSEY. I understand that the paragraph to be stricken out provides that those 2,500 who are already in the District schools shall remain. They are not excluded.

Mr. HOLADAY. The gentleman is entirely correct as to that. And on that point I may say, to the credit of those adjoining counties, that they are taking steps to provide school facilities for their children. In a letter which I have here from the school superintendent of Montgomery County he says, speaking of the county authorities of Montgomery County:

> County authorities have realized that the county will ultimately be called upon to furnish school facilities for the entire county school population, and we believe the money that has already been spent in this direction in Montgomery County has put this county in position to be able to nearly accommodate its entire school population. It is generally believed that the within-described policy of school construction and maintenance will be continued.

Now, listen to this.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. HOLADAY. Mr. Chairman, I ask for an additional 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. HOLADAY. I read:

> We believe that within a reasonable period of years the county school plants could accommodate all county children, but should the District schools be quickly closed to our children we estimate that they would be inconvenienced to about the extent of the figures of this estimate.

Mr. GIFFORD. Mr. Chairman, will the gentleman yield?

Mr. HOLADAY. Yes.

Mr. GIFFORD. I asked the question the other day, and I want to ask it again. The paragraph under discussion reads:

> No part of the appropriations herein made for the public schools of the District of Columbia shall be used for the instruction of pupils who dwell outside the District of Columbia—

And so forth. Does the gentleman know of any place in the United States where, if they will pay tuition, pupils will not be admitted to the schools of that town? Is it not true that because of a lack of legislation we are in a position where, if we had no tuition charges, we would be in a worse position than any town we know of that would not allow pupils by the payment of tuition to come to school?

Mr. HOLADAY. Whether or not they permit them to come in from other districts is largely dependent on the question whether or not they are able to accommodate them. I have never known of a district that will accept pupils from outside districts when they do not have adequate accommodations for their own children.

Mr. GOLDSBOROUGH. Mr. Chairman, will the gentleman yield?

Mr. HOLADAY. Yes.

Mr. GOLDSBOROUGH. I will state to the gentleman on that point that the State of Maryland not only admits children from adjoining counties but also admits children to its school facilities from the adjoining State of Delaware.

Mr. HOLADAY. Not free. They pay.

Mr. GOLDSBOROUGH. No; they do not pay a dollar.

Mr. HOLADAY. I believe before this matter is concluded that the gentleman will have opportunity to discuss that question.

Mr. GOLDSBOROUGH. And they take our children free also.

Mr. HOLADAY. Then there must be some reciprocity.

Mr. GOLDSBOROUGH. Yes.

Mr. ZIHLMAN. Mr. Chairman, will the gentleman yield?

Mr. HOLADAY. Yes.

Mr. ZIHLMAN. Does this include the children of Congressmen who dwell outside of the District?

Mr. HOLADAY. If they reside outside of the District they are included. They are on the same footing as the others.

Now, let us come back and see if we are reasonable in this. The county superintendent of Montgomery County in Maryland and in Judge MOORE'S county in Virginia—Arlington County—in letters they have written agree in suggesting that they recognize the principle that they should furnish school facilities for their children. They say they are working on the problem and that in a few years they hope to take care of all the children.

Now, let us see if we are reasonable. We provide that any child who is in school in the District when this act takes effect shall have the privilege of continuing his course through our schools and through the high school, so that if this amendment is defeated it will be 11 years before these children are all out of the District schools. Is not that reasonable? Is not that fair to Maryland and to Virginia? We put that provision in for two reasons: First, we wanted to be fair to Maryland and Virginia; and then there is the secondary reason that where a pupil has started in to school and perhaps has gone on to the high school for a year or two and has become interested in the activities of the school he naturally would prefer to continue in the school. So we have put that provision in.

Mr. LINTHICUM. The gentleman will remember that two days ago when we discussed this question it was stated by the chairman of the subcommittee, the gentleman from Nebraska [Mr. SIMMONS], that he had a letter from the county superintendent of Montgomery County saying he agreed to the proposition as set forth in this bill. Is that the letter he referred to? I ask that question because it does not in any part agree with statements made. Has the gentleman any letter showing that the county superintendent agrees to this proposition?

Mr. HOLADAY. I have read it to you.

Mr. LINTHICUM. He says they wanted to get ready in the future, but he does not agree to this amendment.

Mr. HOLADAY. The superintendent realizes that the county will ultimately be called upon to furnish school facilities. That is what he says. Then he says:

> We believe that within a reasonable period of years the county school plants will accommodate all the children.

Now, we are giving them 11 years.

Mr. CASEY. What is meant by a reasonable number of years? That does not mean the day this bill is signed, does it?

Mr. HOLADAY. That is a matter of discussion. He says: "Within a reasonable period of years." Now, we are placing this construction on his "reasonable period of years" by providing 11 years. I do not know whether the superintendent would consider that reasonable or not.

Mr. CASEY. That applies only to those children who are now in the District schools. But how about those who become of school age next September?

Mr. HOLADAY. They are able to take care of them.

Mr. CASEY. Where?

Mr. HOLADAY. In their own schools.

Mr. CASEY. Have we any information that that is the fact?

Mr. HOLADAY. I think the full information on the subject shows that they are able, and will be able, to take care of their children under this provision.

Now, let me say this in conclusion—and I want to address my remarks particularly to the gentlemen from Maryland: I fully agree with the president of your university that the State of Maryland should not be called upon to furnish educational facilities for the residents of the District of Columbia. I fully agree with the president, and I have already introduced a bill which would provide for the payment of tuition by the District of Columbia to Maryland if the residents of the District of Columbia go to the University of Virginia or to the University of Maryland. We are in entire accord on that proposition.

Mr. LINTHICUM. Will the gentleman yield?

Mr. HOLADAY. I yield.

Mr. LINTHICUM. The gentleman will notice in the hearings that, according to the estimate of the District of Columbia, there is $470,000,000 worth of Government property in the District, and the gentleman from Pennsylvania [Mr. CASEY] brought out in the hearings the fact that at $1.70 that would come to approximately $8,000,000. We are giving them $9,000,000, so why do you always say the District of Columbia? Is not Uncle Sam giving them $1,000,000 more than they could possibly get if they assessed him at $1.70, besides all the other advantages?

Mr. HOLADAY. I think Uncle Sam is very liberal with the District of Columbia.

Mr. LINTHICUM. Then why should not the District be liberal toward the children of his employees?

Mr. HOLADAY. But we come back to this proposition: The States of Maryland and Virginia are not entitled to any better or any different treatment than are any other States.

Mr. SIMMONS. Will the gentleman yield?

Mr. HOLADAY. Yes.

Mr. SIMMONS. The argument of the gentleman from Maryland, I take it, is this: Because the United States contributes to the support of the District of Columbia, therefore Maryland ought to have the full benefit of the contribution of the United States.

Mr. HOLADAY. That would be the conclusion to be drawn from his argument.

Mr. LINTHICUM. No. My contention is that Uncle Sam ought to educate the children of his employees in the District of Columbia just the same as he educates the children in any fort or camp in the country, where he erects schools and educates the children.

Mr. BRAND of Georgia. Will the gentleman yield?

Mr. HOLADAY. Yes.

Mr. BRAND of Georgia. What is it estimated the cost will be if this proposition prevails to allow these children to come to school in the District of Columbia? How much is it estimated the extra cost will be?

Mr. HOLADAY. Well, there are 2,571 children. But I am not able to give at this minute the average per capita cost.

Mr. BRAND of Georgia. Approximately how much would be the increased cost if they were allowed to come here to school?

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. HOLADAY. Mr. Chairman, I ask unanimous consent to proceed for three additional minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to proceed for three additional minutes. Is there objection?

There was no objection.

Mr. HOLADAY. I am not able to answer that question.

Mr. LINTHICUM. I can say that the total sum is $223,000 plus, but they get about $5,700 from paid tuition, leaving a balance of $217,000 plus.

Mr. BRAND of Georgia. Per year?

Mr. LINTHICUM. Per year; yes.

Mr. HOLADAY. Now, gentlemen, in conclusion, there is one phase of this that has not been especially discussed, and that is this: There is a demand from the residents of Maryland that they have these school facilities. The clerks you talk about have come to me, and they say, "We are paying taxes into the school fund, and we believe we should have school facilities at home, so that we will not be required to send our children on the street cars and on the busses into Washington." Sometimes the parent of a small child is compelled to go with it. Now, the man who is wealthy and who has his great country place out there, with his machine and with his chauffeur, can send his children into Washington without any particular trouble, but the man who has been talked about here this afternoon, the laboring man and the Government clerk, is entitled to have schools to which he can send his children without the payment of car fare.

Mr. ABERNETHY. Will the gentleman yield?

Mr. HOLADAY. Yes.

Mr. ABERNETHY. Does the gentleman think that by cutting him off here you can force Maryland and Virginia to give those facilities to him?

Mr. HOLADAY. I am absolutely sure of it; they promise they will do it; they claim they are doing it; and I am willing to admit that to a great extent they have already done it.

Mr. WELSH of Pennsylvania. Will the gentleman yield?

Mr. HOLADAY. Yes.

Mr. WELSH of Pennsylvania. Does the gentleman believe, from the testimony which was brought out before the commit-

tee, that if the city of Washington had representative government and had to assume all of this expense from taxation that the present condition would endure for six months?

Mr. HOLADAY. No; I do not think it would endure for 60 days. If the city of Washington had to pay the entire bill, it would do just exactly what Maryland and other States of the Union are doing—it would require nonresidents to pay tuition.

Mr. MONTAGUE. But under those conditions the city of Washington would not be getting $9,000,000 from the United States.

Mr. HOLADAY. No; they would be paying their own bills.

Mr. MOORE of Virginia. Mr. Chairman——

Mr. BLANTON. Mr. Chairman, before the gentleman from Virginia begins I make the point of order that we have no quorum. We ought to have a quorum here to vote on this matter.

The CHAIRMAN. The gentleman from Texas makes the point of order that there is no quorum present. The Chair will count. [After counting.] One hundred and twenty Members are present, a quorum.

Mr. MOORE of Virginia. Mr. Chairman, the gentleman from Maryland [Mr. GAMBRILL] has stated the case so fully that there is not a great deal left to be said, but I would like to make a few observations and particularly with reference to the Virginia end of the case.

All of this area from which the school children come into the District of Columbia, or nearly all of it, is what is called the metropolitan area adjacent to the District of Columbia, which of itself creates an exceptional condition.

Now, let me give, to use the language of my unemotional friend from Michigan [Mr. KETCHAM], a few cold facts. The last figures show that the number of children coming in from Virginia, including the day pupils, the night pupils, and the pupils in the vocational schools, is 620. That is the full number—a less number than heretofore—enjoying the advantages of the schools of Washington.

When an Army officer lives in Washington his children are permitted to enter the schools of the District of Columbia. When a citizen of Nebraska or Texas lives in Washington, like permission is granted him, but if an Army officer or a citizen of Nebraska or of Texas lives just across the line in the metropolitan area outside the District of Columbia that permission is to be denied his children. Now, is there any equity in that, and is it not very premature to undertake to upset what has been the policy heretofore?

I venture to say that of these 600 children who come in from Virginia, a very large percentage of them are the children of the officers and enlisted men at the military posts in my State near to Washington.

Mr. SIMMONS. Will the gentleman yield?

Mr. MOORE of Virginia. Yes, sir.

Mr. SIMMONS. Is the gentleman prepared to say what that percentage is?

Mr. MOORE of Virginia. No; and the committee does not tell me.

Mr. SIMMONS. Would the gentleman like to know?

Mr. MOORE of Virginia. Yes; I am willing to have the information.

Mr. SIMMONS. The gentleman stated there are over 600 Virginia children in the District of Columbia schools and a large percentage of such children are the children of Army and marine officers. The large percentage to which the gentleman refers is 52 from Fort Myer and 11 from Camp Humphreys, or a total of 63 ont of over 600.

Mr. MOORE of Virginia. And how many from Quantico?

Mr. SIMMONS. I beg the gentleman's pardon. There are 9 or 10 from Quantico and none from Humphreys.

Mr. MOORE of Virginia. Then we have a percentage——

Mr. SIMMONS. Of less than 10 per cent of your total.

Mr. MOORE of Virginia. Wait one minute. Has the gentleman any figures to show how many who come in are children of parents who are not legal residents of the State of Virginia and pay nothing to the support of the Virginia government, not even a capitation tax, but live in other States and are accredited to other States?

Mr. SIMMONS. The gentleman assumes if they live in the State of Virginia they are either living in property which they own or in property for which they pay rent; is not that true?

Mr. MOORE of Virginia. It may be true or it may not. They may live in an apartment house.

Mr. SIMMONS. Then the taxes on that property are included as a part of the rent. This is a tax matter now and not a question of legal residence.

Mr. MOORE of Virginia. Then I meet the gentleman there and I say that the reservations in Virginia to which I have referred are owned by the Government of the United States and the taxable capacity of Virginia is diminished to that extent.

Mr. SIMMONS. The gentleman is jumping from one thing to another.

Mr. MOORE of Virginia. I am talking about taxation.

Mr. SIMMONS. Very well; I would like to have the gentlemen keep talking about the thing on which I based my statement.

Mr. MOORE of Virginia. The gentleman is talking about people who pay taxes to a very slight extent to the State of Virginia and I am saying there is a Government ownership which is undeniable involving the withdrawal from taxation in Virginia a considerable part of the real estate in the counties to which we have reference.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. MOORE of Virginia. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MOORE of Virginia. Only this morning I had a communication from the War Department speaking of 2,000 acres of land lying in this metropolitan area on the highway between Washington and Richmond which the Government has permitted the Secretary to sell, but the Secretary has reached the conclusion he will not sell it; and for an indefinite period not one cent of revenue will go into the coffers of the State of Virginia or any subdivision of the State of Virginia from that property.

Mr. MADDEN. That is Camp Humphrey?

Mr. MOORE of Virginia. Camp Humphrey; yes.

Mr. MADDEN. There was a tremendous price paid for that property during the war, and roads were built at the expense of the Government down there in order to get to it, and all of this money came out of the Treasury of the United States.

Mr. MOORE of Virginia. That may be. The gentleman helped to spend that money; I did not. I was not here, and without regard to that, the fact I have stated remains with respect to Camp Humphrey and with respect to the reservations in question.

Now, is it not a pretty small thing to say that a man holding office, and a legal resident of the State of Nebraska, living in Virginia, who pays nothing or a mere bagatelle in the way of revenue to the State of Virginia or the county of Arlington, shall be denied access to the schools of Washington for his children although the Nebraskan who lives in Washington is allowed access to the schools?

Mr. GOLDSBOROUGH. Will the gentleman yield?

Mr. MOORE of Virginia. Yes.

Mr. GOLDSBOROUGH. Can the gentleman tell the committee how many children from the Government reservation at Fortress Monroe attend the schools of Virginia without any charge?

Mr. MOORE of Virginia. I was coming to that. There is talk about the State of Virginia being here as if a supplicant. The State of Virginia is not in any such position, and I do not intend it shall be. There is talk about denying to the children of the State, to the extent of some 600 children, the right to education here. What on the other hand? Looking at the country around Hampton Roads, and my colleague the gentleman from Virginia [Mr. DEAL] will verify what I am now stating, there are at least 10,000 employees of the Government of the United States there who are too far away from here to come to the District schools, and they attend the schools of the State of Virginia, and without any objection. They are living there only temporarily. There are officers who live there for a day and may be removed to-morrow, and the men on the ships in Hampton Roads send their children to the schools of the State of Virginia, and we have not thought of making any objection to that condition.

Mr. SIMMONS. Will the gentleman yield?

Mr. MOORE of Virginia. Yes.

Mr. SIMMONS. We could relieve that situation by removing the Government activities from those places. Would the gentleman favor that?

Mr. MOORE of Virginia. Oh, that is a very specious suggestion. It would be necessary to remove Hampton Roads also, because there is not any harbor with equal facilities in the United States as Hampton Roads.

Mr. MONTAGUE. We could relieve Washington of some of its activities and meet the situation in that way.

Mr. MOORE of Virginia. Yes.

I have barely outlined the situation, and I submit we have rather a picayune proposition here, with great deference and respect to the committee which sponsors it.

My friend has referred to a letter received from the superintendent of schools in Arlington County. That official writes me saying they are making every exertion over there to provide for the children, but that the overflow is constantly occurring. New people are coming into that section, many of them nonresidents of Virginia in a legal sense, who are on the Government pay rolls. He says there is such a constant influx that, all be it there have been constructed in the last four years 16 new schoolhouses, 2 of them graded schools with 40 classrooms each, there is present inability to take care of the congestion. We are told, as the gentleman from Pennsylvania [Mr. CASEY] said a moment ago, that while those who are now in the schools can remain, the little tots are not to be permitted to come in.

Mr. HOLADAY. Will the gentleman yield?

Mr. MOORE of Virginia. Certainly.

Mr. HOLADAY. Does the gentleman recognize that his State has any obligation to these little tots to furnish them school facilities?

Mr. MOORE of Virginia. Yes; and we are doing it. But it is difficult. In the Hampton Roads area it is equally difficult to take care of the children of the thousands of Government employees in that neighborhood. But yet it is fairly well done.

The CHAIRMAN. The time of the gentleman from Virginia has again expired.

Mr. SIMMONS. Mr. Chairman, I ask unanimous consent to proceed for 15 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. SIMMONS. Mr. Chairman and gentlemen, in this discussion I wish we could recognize one fact, and that is that the District of Columbia is a distinct municipal entity, and so far as its schools are concerned it is not a part of the Federal Government. We have been having an argument here on the part of Maryland and Virginia people in which they are demanding, not the privilege but the right, of coming into the schools of the District, a separate jurisdiction, and sending their children to these schools free of charge.

You have heard the plea of my good friend from Virginia [Mr. MOORE]. I wanted to find out what the people of Alexandria thought on the subject. He is asking as a matter of right that the children of Arlington County shall go to the schools in the District of Columbia free of charge.

I have a telegram from the county superintendent of Alexandria, and he says this:

> We charge tuition to nonresidents, from other counties or States, who send children to our schools, unless they are children of soldiers. Children in the District of Columbia would be obliged to pay tuition. We have more than 100 children in our schools where tuition is paid either by counties or by individuals. Tuition rate is $35 per school year in grades and $60 in high schools.

In other words, the gentleman from Virginia, Judge MOORE, comes here and asks as a matter of right that Arlington County children come to the District of Columbia schools free of charge, when that county says that they would charge children from the District of Columbia tuition if they went to school in that county.

I have another telegram. I wanted to find out what they did in the capital of the gentleman's State. I telegraphed the county superintendent of schools at Richmond and got this answer:

> Pupils whose parents live beyond our city limits pay $90 for high schools and $58 for elementary tuition per session. We have 322 nonresidents, of whom 111 are in high schools.

That, I will say to the gentleman from Virginia, is from his State capital.

Mr. MOORE of Virginia. Will the gentleman yield?

Mr. SIMMONS. Yes, sir.

Mr. MOORE of Virginia. The first telegram was from Alexandria city and not Arlington County, which is more seriously involved. The second telegram was from Richmond city. Now, the charges spoken of in those telegrams are made by a particular locality against another locality in the same State, and so it becomes really a matter of bookkeeping.

Mr. SIMMONS. The telegram from Alexandria says, "We charge tuition to nonresidents from other counties or States."

Mr. MOORE of Virginia. And what I am telling the gentleman is that the so-called nonresidents are pupils that come in from Arlington County or some county, another political subdivision of Virginia——

Mr. SIMMONS. But the telegram says other counties or States—anybody outside of the city limits pays tuition.

Now, let us see about the situation in Baltimore.

Mr. RANKIN. Will the gentleman yield?

Mr. SIMMONS. Yes.

Mr. RANKIN. The gentleman in speaking about Richmond, Va., the State of Virginia does not put up 40 per cent toward the expenses of its capital.

Mr. MOORE of Virginia. No. But I would like my friend to figure how much the State of Virginia helps the people employed by the Government of the United States at Hampton Roads, where there are at least 10,000 people in the service of the Government.

Mr. SIMMONS. If there is any inequality at Hampton Roads I am certain that the gentleman from Virginia is very able in his representation of the people, and he can see to it that the inequality is corrected.

Let me come to the gentleman who comes from Maryland. Maryland has approximately 2,000 children in the District of Columbia schools, without paying a dollar of tuition, and these gentlemen demand that privilege as a matter of right. Let us see what happens in the great city of Baltimore.

Mr. GAMBRILL. Mr. Chairman, will the gentleman yield for an interruption?

Mr. SIMMONS. Yes, sir.

Mr. GAMBRILL. The number is about 1,700 and not 2,000, as shown by the statement.

Mr. SIMMONS. About 1,700 in the day schools and then you have some in the vocational schools and some in the night schools. This telegram comes from the county superintendent of schools in the gentleman's fair city of Baltimore.

Mr. LINTHICUM. We have a city superintendent of schools. We are not in any county.

Mr. SIMMONS. You have two men up there anyway and one of them signs as county superintendent.

Mr. LINTHICUM. That is Baltimore County. The city of Baltimore is like the city of St. Louis. We have our own incorporation and we are not in any county.

Mr. MADDEN. Have you got one from the State superintendent? Perhaps that would satisfy the gentleman.

Mr. SIMMONS. The gentleman from Maryland [Mr. LINTHICUM] evidently does not know that they have a county superintendent. This telegram says:

> We would require tuition from Washington children to attend school in our county.

That is from the county superintendent of schools of Baltimore. Here is one from the city superintendent:

> Nonresidents paying tuition in Baltimore City, 338; approximate amount collected 1927–28 scholastic year, $33,393.62.

Now get this, and this is Baltimore:

> All children outside of the city must pay tuition. Rates per annum: Elementary schools, $75; junior high, $95; senior high, $150; polytechnic institute and vocational schools, $175.

That is signed by David E. Weglein.

Mr. LINTHICUM. Mr. Chairman, will the gentleman yield there?

Mr. SIMMONS. Yes, sir.

Mr. LINTHICUM. That is correct.

Mr. MADDEN. I suppose the gentleman from Maryland does not know this man.

Mr. LINTHICUM. Of course I do.

Mr. SIMMONS. Then it is correct that Baltimore would charge for Washington children, and yet the gentleman is demanding that we let Maryland children come in here free.

Mr. LINTHICUM. I will answer that in a moment.

Mr. SIMMONS. I want to go on and read some more telegrams.

Mr. LINTHICUM. Will not the gentleman yield for a moment?

Mr. SIMMONS. I want to read some more Maryland telegrams.

Mr. LINTHICUM. Oh, the gentleman will have plenty of time to read them.

The CHAIRMAN. The gentleman declines to yield.

Mr. SIMMONS. Just a moment until I finish reading these Maryland telegrams.

Mr. LINTHICUM rose.

Mr. MADDEN. Mr. Chairman, I demand that the gentleman from Nebraska be protected and be not interrupted.

Mr. LINTHICUM. It is not unusual for the gentleman from Illinois to be demanding something.

Mr. SIMMONS. Here is one from Centerville, Md. That is one of these suburban counties, outside of the city of Balti-

more. I wanted to find out how the gentleman's fair city of Baltimore treated these suburban folks. Here it is:

Five children attending Baltimore public schools. They pay full rate for nonresident pupils. Don't know the amount of the tuition. Pupils have to pay tuition to us not residing in our county. The rate is the average cost of instruction as figured by State of Maryland. This applies to all counties of Maryland. Nonresident pupils are not admitted free of charge.

That is signed by T. G. Bennett, superintendent of schools.

In western Maryland is a city called Cumberland, and from that city comes the distinguished chairman of the Committee on the District of Columbia, Mr. ZIHLMAN. Mr. ZIHLMAN is one of those who believes that Washington should furnish education free of charge to the people of his district in Maryland. I wanted to find out what they do up in his city, and here is what they do there:

All nonresident pupils, without regard to where they are from, pay in advance. Elementary, $3 per month; high school, $5 per month. Some adjoining sections insist on paying us absolute average per pupil cost.

That is in Mr. ZIHLMAN'S city.

Mr. MADDEN. I think that is terrible. [Laughter.]

Mr. SIMMONS. And they make them pay in advance up there. Just across, south of that fair city of Cumberland, is Keyser, W. Va. I figured that they might have some children over in the gentleman's territory, because it adjoins that—the river is between them. So I wired the superintendent of schools there, and he wired back:

Twenty-five or thirty high-school students from Mineral County in Cumberland schools; tuition about $9.60 per month.

Mr. GAMBRILL. Mr. Chairman, will the gentleman yield?

Mr. SIMMONS. Yes, sir. I am through with Maryland now.

Mr. GAMBRILL. It seems to me that in his efforts to secure information the gentleman was covering entirely too much territory. Why did he not confine his activities to the two counties involved, Montgomery and Prince Georges County? Those are the counties that educate the District of Columbia children without any tuition charges, and there is where the reciprocity exists, not in Baltimore city or in Allegheny County or in Garrett County, in the western part of the State.

Mr. LINTHICUM rose.

Mr. SIMMONS. Oh, let me answer one gentleman at a time. I did not intend to slight the fair city of Laurel. I wired your superintendent yesterday and again this morning, but I could not get him to answer.

Mr. GAMBRILL. He is not located at Laurel.

Mr. LINTHICUM. Mr. Chairman, will the gentleman yield?

Mr. SIMMONS. Does the gentleman want to explain these telegrams from Baltimore? Are the telegrams correct? Do you have a county superintendent of schools in Baltimore?

Mr. LINTHICUM. We are not in a county. We have Baltimore City and Baltimore County, entirely separate entities.

Mr. SIMMONS. Then, who is this gentleman who signs himself county superintendent?

Mr. LINTHICUM. That is Baltimore County.

Mr. MADDEN. Is Baltimore City in Baltimore County?

Mr. LINTHICUM. It is not in any county. It is just like this city and like St. Louis. In that respect they differ from other cities.

If a man owns property in Baltimore city and lives anywhere in the State or in the District of Columbia and pays school taxes in Baltimore city, that school tax is subtracted from the tuition, and he only pays the difference; and a man may live in Montgomery County and own property here in the District of Columbia, and under the gentleman's amendment his child would have to keep out.

Mr. SIMMONS. Yes; and there has never been a more unfair proposition submitted to this Congress than that. If a rich man lives in Baltimore or outside of it, he can send his children to school in Baltimore, and the man outside who does not own city property has to pay tuition. That is the situation some propose here in Washington.

Now, I want to get away from Baltimore and Maryland and wander a little far afield. We have in this House a good friend of mine, the gentleman from Michigan, JOHN KETCHAM. JOHN thinks we ought to let children from the outside come to our schools in Washington free of charge. I wanted to know what they do in his city. I have here a telegram from D. A. Vanbuskirk, superintendent of schools of the town of Hastings, Mich., in which he says:

We have 227 nonresident children. Each child has to pay $75 tuition; $15 to be paid by child, $60 to be paid by district. Children from District of Columbia would have to pay tuition.

Mr. MONTAGUE. Mr. Chairman, will the gentleman yield there?

Mr. SIMMONS. Yes, sir.

Mr. MONTAGUE. Does the gentleman think those cases are analogous? Does the United States help to maintain the schools where the gentleman from Michigan resides?

Mr. SIMMONS. I think not.

Mr. MONTAGUE. The gentleman concedes that?

Mr. SIMMONS. Yes; I will concede that. But I will not concede this, that because Maryland and Virginia are contiguous to the District of Columbia you are entitled to rights in the schools here that citizens of other States do not have, or that men from Virginia or Maryland have the right to send their children to school in the District and educate their children here free of charge.

Mr. MONTAGUE. But you discriminate. When you are speaking of the equalization of equities I may mention an illustration. We have in the State of Virginia a great many posts and reservations, Army, Marine Corps, Navy, and other posts, representing a total population of about 12,000 or 15,000. All the children of that population enter the free public schools of the State of Virginia without the payment of any tax, so that Virginia is taking care of far more people of the United States than the United States is taking care of Virginia's.

Mr. MADDEN. Is not that true of every State?

Mr. MONTAGUE. I think not, for in some of the States there are not so many Government reservations. I am explaining the way it equalizes the justice of the situation. Why should 600 pupils from the State of Virginia be held up here on the ground that we are trying to rob the Federal Government when we are doing far more in Virginia for the children of United States soldiers, sailors, and employees of the Government?

Mr. SIMMONS. Now we are asking here for justice to the District child and to the District taxpayer. That is all. We are simply asking for justice in that we do not want a District child to be turned out of the District schools by other children coming from outside jurisdictions to our schools for which the parent pays nothing.

Now, they talk about these border outlying districts. Let us see where the worst crowded condition is in the District schools to-day. It is out in Chevy Chase; and if anybody thinks that Chevy Chase and its near vicinity is a pauper place of residence, they ought to go out there and look around a little.

We are not asking that a child be taken out of the District schools who is in the schools now. Two years ago when this proposition was before the House men said, "SIMMONS, does it mean that next fall these children who are coming to school in Washington can not come?" The amendment we had two years ago meant that.

The CHAIRMAN. The time of the gentleman from Nebraska has expired.

Mr. SIMMONS. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes.

The CHAIRMAN. The gentleman from Nebraska asks unanimous consent to proceed for five additional minutes. Is there objection?

There was no objection.

Mr. SIMMONS. This year we are providing that every child in the District schools from Maryland and Virginia may remain. We are not shutting out a child. We are not denying the child now in the schools the right to continue, but we are saying to Maryland and Virginia, "Your people pay taxes in your jurisdiction, build your schools and take care of your increase from this time on." Now, that is the least hardship we can possibly do and correct this injustice.

Mr. KETCHAM. Will the gentleman yield?

Mr. SIMMONS. Yes, sir.

Mr. KETCHAM. Is it the purpose of the committee, if they may have their way about it, to carry that provision in continuing appropriation bills?

Mr. SIMMONS. Yes, sir; so far as I may influence the action of that committee.

Mr. KETCHAM. I understand, then, that this is to be the policy of the committee?

Mr. SIMMONS. I will tell the gentleman what I would like. I would like to see the gentleman from Maryland [Mr. ZIHLMAN], the chairman of the legislative committee, come in here and let us put a fair tuition law on the books, but they will not do it, and this is the only way we can get an average amount of justice for the District taxpayers and the District children.

Mr. ZIHLMAN. I will say that we have already legislated on the subject by refusing to pass any such law.

Mr. SIMMONS. The fact is that we now have 2,582 of these children in the District schools, nonresident children, and only 57 of them pay tuition.

Mr. ZIHLMAN. And that is under a law passed by Congress in the regular manner, while the Appropriations Committee, under the cloak of the Holman rule, is seeking to nullify that law.

Mr. SIMMONS. And your committee, under the power exercised over it by its chairman, will not permit a tuition law to be placed before the House.

Mr. ZIHLMAN. I do not think the gentleman should make that statement.

Mr. SIMMONS. I do make it.

Mr. ZIHLMAN. I made the statement that the matter was considered by a subcommittee, of which the gentleman from Illinois [Mr. REID] was the chairman, and after hearing the gentleman from Michigan [Mr. CRAMTON] and hearing the testimony of others who were interested they unanimously reported on the bill unfavorably.

Mr. SIMMONS. And let me say that the Lee family testified, the family which owns property around the District border and is interested with the gentleman from Maryland in developing a suburban enterprise out there adjoining the District. They do not want to pay taxes. That family came in, with other men who are interested financially in the suburbs of Maryland, who want free schools in the District and low taxes in Maryland. They testified, and officials of the Parent-Teachers' Association testified, and some of them tell me that if they have another chance they will not testify as they did two years ago.

Mr. MADDEN. Will the gentleman permit me to interrupt him?

Mr. SIMMONS. Yes, sir.

Mr. MADDEN. The gentleman from Maryland said a moment ago that this law, to which he called our attention, was passed as the result of a study made by the gentleman from Illinois [Mr. REID], a member of the committee.

Mr. ZIHLMAN. No; I did not say that.

Mr. MADDEN. I want to say to the gentleman and to the House that there is not a place in Illinois where by any chance a child can go to a school other than that to which it has been assigned, no matter how much of a tax may be paid by the parents. If children are assigned to a particular school and if they go to another school than the school to which they have been assigned, then, even though the parents may be the biggest taxpayers in the township, they are obliged to pay tuition at the rate of $100 per year for each child.

Mr. KETCHAM. Will the gentleman yield?

Mr. SIMMONS. Yes, sir.

Mr. KETCHAM. In response to my question the gentleman said a moment ago that, so far as he had anything to do with it, the policy, in the form that it now appears in the amendment, will be the continuing policy?

Mr. SIMMONS. Yes, sir.

Mr. KETCHAM. And I understood him to say it means this: That no child of the 2,500 now enrolled during the whole of his school course will be denied the privileges of the schools in the District and will not be required to pay tuition?

Mr. SIMMONS. That is the purpose of it.

Mr. KETCHAM. I want to compliment the chairman upon his recognition of the justice of the fight I made in behalf of these children.

Mr. SIMMONS. That is the entire purpose. In other words, we do not want to do any injustice to Maryland and Virginia in this situation, and this proposal seems to be the only solution of the problem. The legislative committee will not act, but we want, in a period of 10 or 12 years, to take out of the District schools these children who ought to be going to school somewhere else and let the District children have the benefit of the District schools. I recognize, and the committee does, that there may be in the District schools children who have gone along in their grades and they may be upon the point of entering high school. We do not want to deny them that right. We want to allow those to go on who are now here, and we are not going to ask Virginia or Maryland to take care of them. Over a period of 10 or 12 years they can build their own schools and work out this situation properly.

The CHAIRMAN. The time of the gentleman from Nebraska has expired.

Mr. SIMMONS. Mr. Chairman, I ask unanimous consent to proceed for five additional minutes in order to answer some of the questions.

Mr. BUSBY. Mr. Chairman, reserving the right to object, I want to ask if the gentleman is going to be liberal with those of us who are not on the committee and permit us to have a word to say about our impressions when we are not interested either as a member of the committee or as a Member from Maryland or from Virginia.

Mr. SIMMONS. Let me answer that without objection the gentleman from Maryland [Mr. GAMBRILL] opened this debate, using 35 minutes' time.

Mr. BUSBY. I have not opened it with anything. I am talking for myself.

Mr. SIMMONS. Very well; if the gentleman wants time. I hope we can bring this to a head some time. When we are through with this bill we are going to quit until Monday, men. Do not forget that. [Laughter.]

Mr. BUSBY. The gentleman is manager of the bill and I am asking the gentleman what his disposition will be toward being liberal with respect to time for those who are not on the committee.

Mr. SIMMONS. If the gentleman wants time I shall not object to it provided it is within reasonable limits.

Mr. LINTHICUM. I would also like to get a little time.

The CHAIRMAN. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. SIMMONS. I promised to yield to the gentleman from Texas [Mr. GARRETT].

Mr. GARRETT of Texas. I want to ask the gentleman from Nebraska if the committee in its consideration of this question with respect to their opposition to children of Maryland and Virginia coming to the District schools took into consideration the wonderful luxury that the people in the District of Columbia enjoy in the good roads that we ride over in Virginia and in Maryland and for which we pay no taxes. [Applause.]

Mr. SIMMONS. Did the gentleman ever buy any gasoline in Maryland or Virginia?

Mr. GARRETT of Texas. I have bought it everywhere it is sold, I reckon.

Mr. SIMMONS. Then the gentleman paid taxes. [Laughter.]

Mr. LINTHICUM. Will the gentleman yield?

Mr. SIMMONS. Yes, sir.

Mr. LINTHICUM. The gentleman in all of his arguments continually says "we; we want to do this and we intend to do this," and so on. I would like to know whom the gentleman refers to as "we."

Mr. SIMMONS. I am referring to the committee.

Mr. LINTHICUM. The Appropriations Committee?

Mr. SIMMONS. Yes, sir.

Mr. LINTHICUM. Then it is the intention of the Committee on Appropriations, even though the gentleman from Maryland [Mr. ZIHLMAN] has stated there is a law on the books providing for these children, to limit the application of that law which Congress has already enacted, is that correct?

Mr. SIMMONS. That is what we are doing. In other words, the Congress at different times and through different efforts by different Members from Virginia and Maryland has opened the schools wide. Now we are trying to close the doors a bit so that the man who pays for the schools may have them for his children, and we think this is fair.

Mr. LINTHICUM. "We, the Appropriations Committee," intend to do that in spite of the fact that Congress has enacted laws to take care of these children. Is that correct?

Mr. SIMMONS. I have answered that once.

Mr. CHINDBLOM. Will the gentleman yield?

Mr. SIMMONS. Yes.

Mr. CHINDBLOM. If the House adopts the proposal of the Committee on Appropriations, "we" hereafter will be the House.

Mr. SIMMONS. I take it so. [Laughter.]

Mr. CASEY. Mr. Chairman, I rise to speak in favor of the amendment of the gentleman from Maryland. [Applause.]

I want to say in explanation of my position as a member of the subcommittee who attended almost every hearing of the subcommittee on this and other questions that came before us, I had no knowledge that this provision was to be incorporated in the bill and come to the House with the recommendation of the subcommittee.

Mr. SIMMONS. Will the gentleman yield?

Mr. CASEY. Yes.

Mr. SIMMONS. I would like to call the gentleman's attention to the fact that at first the gentleman from Pennsylvania [Mr. WELSH] objected to this being done unless we would take care of and not cause any hardship to the children now in the District schools.

The gentleman was present at the meeting and stated he did not want to cause any hardship for the children then in the schools. No one on the committee desires to cause any hardship, and we drafted the amendment to meet the wishes of the gentleman and his colleague from Pennsylvania [Mr. WELSH].

Mr. CASEY. That may be the gentleman's opinion, but it is not the fact. We might just as well have an understanding

about this matter. Every letter and every telegram that has been read here to-day has been read because it was asked for by individuals and not by the subcommittee, and when they speak of "we" and the committee they do not speak for me as a member of the committee. [Applause.]

Mr. MADDEN. Will the gentleman yield?

Mr. CASEY. Yes.

Mr. MADDEN. Is it not competent for any Member to ask for information?

Mr. CASEY. Undoubtedly it is; but the gentleman has no right to say it represents the views of the committee when the committee has not seen them or heard them or know what they contain until they are read to the House.

Mr. MADDEN. The gentleman did not say that.

Mr. CASEY. The inference is there, even if the statement was not made.

Mr. MADDEN. The gentleman misunderstood it. The gentleman must be fair. He insists on other people being fair.

Mr. CASEY. I am; and it is unfair to me to misrepresent me on the floor of this House.

Mr. MADDEN. I rise in protest, Mr. Chairman.

Mr. CASEY. That is what I am trying to do—protest—and I am going to protest until I am protected in my rights.

Mr. MADDEN. The gentleman from Nebraska [Mr. SIMMONS] had the right to send out letters making inquiry as to what was done in other States.

Mr. GARRETT of Texas. A point of order, Mr. Chairman.

Mr. CASEY. I yielded for a question.

Mr. GARRETT of Texas. The gentleman from Illinois did not address the Chair and ask if the gentleman would yield.

Mr. MADDEN. Yes; I did.

Mr. GARRETT of Texas. Then the gentleman did not yield.

Mr. CASEY. I yielded to the gentleman for a question, not a speech.

Mr. MADDEN. I will not interrupt the gentleman, if the gentleman does not want to be interrupted; but I insist upon the gentleman from Nebraska [Mr. SIMMONS] being treated fairly.

The CHAIRMAN. The gentleman from Pennsylvania will proceed in order.

Mr. CASEY. And I hope the chairman of the Committee on Appropriations will see that I am also treated fairly. I am a member of his committee.

Mr. MADDEN. The gentleman has been treated fairly and he can not deny it.

Mr. CASEY. I am trying to do my duty here as I see it, and there is no one who is going to influence me or coerce me into agreeing to something I do not believe in.

Mr. MADDEN. Will the gentleman yield?

Mr. CASEY. Yes.

Mr. MADDEN. Does the gentleman deny he has been treated fairly?

Mr. CASEY. No; I do not deny it.

Now, let me say for the information of the members of the committee, I remember very distinctly that we went into this matter very thoroughly with the superintendent of public schools while testifying before our committee. The testimony will show that I asked the superintendent of schools if any investigation had ever been made into this matter, and he said no. I asked him if he did not think it would be more advantageous to all concerned if we have a joint investigation made into this matter by the school authorities of the District of Columbia, Maryland, and Virginia rather than to do something arbitrary when we had no definite information before us.

He said he thought that would be advisable; he also said he would make such an investigation so the committee may be in possession of all the facts. The hearings will show that I suggested that being done. No opposition was offered by any member of the subcommittee, and the understanding was that the superintendent of the public schools of the District of Columbia was to make the investigation and report his findings back to the subcommittee. Up to this very minute I have received no information from the superintendent of the public schools or the subcommittee that the superintendent had made an investigation into this matter and made a report.

Mr. SIMMONS. The superintendent reported back from Montgomery and Arlington Counties, and I sent the letters to the gentleman yesterday.

Mr. CASEY. Yesterday?

Mr. SIMMONS. The gentleman said he had not received any information up to this minute.

Mr. CASEY. When was this provision written into the bill? Mr. Chairman, I have no desire to be misunderstood in this matter, but I feel as a Member of this House and as a member of the subcommittee on District affairs that I have a duty to perform. I feel that the Members of this House look to me for certain information if I am able to give it to them, and I can not give it to them if I do not have it. The gentleman from Nebraska, chairman of the subcommittee, made a very fine speech in behalf of a tuition law. Almost all of his argument was in favor of a tuition law being passed by Congress. The unfairness of this whole proposition, in my judgment, is one that I opposed in committee in my remarks on the floor of the House yesterday, and I oppose it now; it shuts the doors of the public schools of the District of Columbia against the children who are not residents of the District of Columbia. I am in favor of a proper tuition law. This bill does not provide for tuition, this closes the doors and keeps the children out of the schools of the District of Columbia.

I do not think that is fair when parents want to send their children to the District of Columbia schools and are willing to pay tuition; I do not think it is fair for us to pass this law as it is written and close the doors of our schools to these children.

It may be that they are trying to force the gentleman from Maryland [Mr. ZIHLMAN], the chairman of the District Committee, to report out a tuition law. If that can be done, all right. But I do not think these children in Maryland and Virginia and other parts of the country should be compelled to suffer because the chairman of the District Committee can not be compelled to report out a bill providing for tuition.

That is not the fault of the children; that is the fault of the House of Representatives, because it permits the chairman of the committee to refuse to report a bill to the House when a majority of the committee orders it reported out. But do not blame the children for that. The House of Representatives should have control of the business of the House.

Mr. HOLADAY. Will the gentleman yield?

Mr. CASEY. Yes.

Mr. HOLADAY. Whatever may be the outcome of this amendment, the children will not suffer. The question is whether the taxpayers of the District will suffer or the taxpayers of Maryland and Virginia.

Mr. CASEY. That is the gentleman's opinion, but it does not meet with my views, because we have no information before us that will convince me that the States of Virginia and Maryland will be prepared on the 1st of next September to take care of the children who become of school age. That is the question that bothers me, and we have no information that justifies us in closing the doors of these schools of the District of Columbia against these children and keeping them from school for a year or two before the States of Maryland and Virginia are financially able, and before they can get the legislative machinery in action, to erect the necessary schools.

I do not have any information about it; I am in doubt; but I am going to resolve the doubt in the interest of the innocent children back in the States.

The hearings will show my attitude on this question, and my explanation to the House yesterday will show my attitude. I was led to believe that when a Member of this House is placed on a subcommittee and recommendations come to this House from that committee the members of the committee shall at least be consulted before provisions are written into a bill brought to the House carrying the recommendations of the committee.

Mr. LAGUARDIA. Mr. Chairman, I think this annual debate as to the children from Virginia and Maryland coming to schools in the District of Columbia is the smallest thing the House of Representatives indulges in. I have no children in the District of Columbia, and I do not come from Maryland or Virginia, but it seems to me that, conceding all of the facts and figures given by the gentleman from Nebraska—conceding every argument that was made—what of it? It is said that these children cost $250,000 a year, but that is an estimated cost on a per capita basis. It does not mean that if you withdraw those children from the schools you reduce the Budget by $250,000. Anyone who has had any experience in preparing budgets for public schools knows that. I do not believe that the school budget would be reduced even $10,000 if all these children were removed. Assuming it cost $250,000 a year, that is less than one one-hundredth of 1 per cent of the annual appropriation.

Assuming that it cost $250,000 a year, it is less than 10 cents a year for each income-tax payer of the United States. Instead of reading telegrams indicating a narrow policy in some parts of the country and seek to follow them, we should set a good example by establishing a generous, broad policy of a public-school system. Let us lead, if necessary, rather than follow two or three localities that, owing to local conditions, have adopted a sort of provincial attitude in dealing with children not actually living within their own townships. Why, in my city our annual budget for schools is $100,000,000.

Mr. HOLADAY. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. I come from a city that spends a hundred million dollars a year for schools. There is no city that spends as much in the whole world. We not only have a public and high school system, but we have Hunter College for girls, and then the College of the City of New York for boys, both recognized institutions of higher learning, and you will find children from every State in the United States who come to the city of New York and take up residence with some relative or even with strangers, who attend these institutions, and no question is asked. My State pays the largest proportion of the Government contribution that goes to pay for these schools here, and while I have received complaints about all sorts of expenditures, I have never received a complaint about the money spent for the schools of the District of Columbia. [Applause.] And I hardly believe anyone else has.

Why, the greatest monument to American progress is our public-school institution. [Applause.] That is our contribution to civilization. There is not anything like it in the world. Every large city, every metropolitan district, must go through what the District of Columbia is going through now, of taking children from the outlying districts and educating them until those outlying districts build themselves up into separate communities. That is not anything new. And because you pick a town here and there around the United States that has a very narrow policy of checking up on the school children in this way and requiring payment is no reason why the American Congress should establish that policy in the District of Columbia. Why, for a nation that spends $3,000,000,000 a year, that spends $650,000,000 annually on its Army and Navy, to take up the time of a whole day every year discussing whether or not you are going to keep a couple of hundred of children out of school because they live just beyond an imaginary line is an absurdity.

This matter will adjust itself. It will adjust itself—as these surrounding communities grow they will take care of their own children. In New York City we not only take in the children of Governors Island and Fort Wadsworth and Fort Totten and Fort Slocum but we have even sent our school-teachers into the military reservations and established schools there for them, all at the expense of New York City, and no one complains. I repeat that my city pays the greatest proportion of the taxes of this very expenditure and as far as my city is concerned, we do not object to the present policy, and I shall vote for the amendment.

Mr. STEVENSON. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. STEVENSON. I direct the gentleman's attention to my idea of this, which he expressed a moment ago when he spoke of this being a metropolitan district. This is all one metropolitan district, the district of Washington. Imaginary lines do not make any difference.

Mr. LAGUARDIA. Exactly; and every large city is in the same situation. It seems to me unbecoming as national legislators to take a small, selfish attitude in this matter. It seems to be most unfitting to haggle over a small expenditure which really provides an enormous amount of good. I will close by repeating that even though these children were all taken out of the school the difference in the actual cost as reflected in the appropriation bill would not be even noticeable. The biggest thing in American life is our schools; let us treat it in a big way.

Mr. WELSH of Pennsylvania. Mr. Chairman and members of the committee, I did not want to inject myself into this debate, being quite content to let our chairman handle the subject, as he has handled it in a most satisfactory manner; but I could not help but be impressed with the remarks of the gentleman from New York [Mr. LAGUARDIA], who seemed to give the impression that we are dealing in small business when we spend a day discussing the question of the education of children. If there is any question that is greater or more important before the American people than the education of children, I have yet to find it out.

Mr. LAGUARDIA. Oh, the gentleman is misquoting me. I take just the reverse position.

Mr. GOLDSBOROUGH. Is that the way the gentleman from Pennsylvania understood the statement of the gentleman from New York [Mr. LAGUARDIA]?

Mr. WELSH of Pennsylvania. Yes.

Mr. LAGUARDIA. Oh, manifestly the gentleman is mistaken. He has misunderstood me entirely.

Mr. WELSH of Pennsylvania. We are not dealing with the mere question of sending children to school. When you are dealing with a question of justice in respect to placing the burden of taxation, you are dealing with a fundamental American problem. If this were a question that rested upon the mere right of children to education, you would find every member of this committee a unit in the desire to give to the children of the District of Columbia and of every State in the United States every possible opportunity for education. But we have here in the District of Columbia a citizenship that has no representation in the government of the city. Do not let us forget that as a matter of equity. In other words, there is no human tribunal that stands between the taxpayer in the District of Columbia and the plans and zeal of public officials except the Members of this Congress. We have our duty to perform to the people of the District of Columbia, and that was the duty that confronted the subcommittee. Every member of the subcommittee approached that question with a great deal of care. No member of that subcommittee had any preconceived ideas of what was an absolute right or an absolute wrong in connection with this problem. Realizing that the District of Columbia has no spokesman on the floor of the House, no one to speak a word for its citizenship when the question of taxation is concerned, some members of the committee wanted to say at once that the children from outside the District should be prohibited from entering the schools here. The gentleman from Pennsylvania [Mr. CASEY] and I did not like adopting that point of view. We felt that the children who were already in the schools would want to go ahead until the time came for them to graduate without having their term of instruction interrupted, and the whole committee finally compromised by saying that whatever was done ought not to include the children already in school. So the ultimate effect of this provision, if it should be adopted by the House, will be to carry forward for from 10 to 12 years, so that every child that is now in the schools of the District of Columbia shall have finished his course; and only the little children arriving at school age in these surrounding districts, in this metropolitan areas as it has been called, will be affected by this bill.

Mr. CASEY. Mr. Chairman, will the gentleman yield?

Mr. WELSH of Pennsylvania. Yes; I yield to the gentleman from Pennsylvania.

Mr. CASEY. I want to say to the House that the statement that the gentleman has just made, that the whole committee was a unit on the question of those now in the schools continuing through, is true. The only difference was as to this prohibition which closes the door to the children without knowing whether they have proper facilities in the places where they live.

Mr. WELSH of Pennsylvania. I will state to the committee that the action of the gentleman from Pennsylvania, at the outset was that he insisted on being a free lance, so far as relates to his attitude on this or any other subject. Before the subcommittee, so far as that is concerned, he was conceded that right, and I want, as a member of the subcommittee, to pay my tribute of respect and appreciation to him in the preparation of this bill. There has been no friction in our committee, and this little flurry that you have seen here to-day is the only ripple, and that is only on the surface.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. WELSH of Pennsylvania. May I have five minutes more? I have not hitherto occupied much of the time of the House.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WELSH of Pennsylvania. The gentleman from Virginia and the gentleman from Maryland have spoken of this being a metropolitan area. We have here a metropolitan area for purposes of police supervision, and purposes of sanitation, and health, and all those things that go with a metropolitan area; but when we deal with a metropolitan subject, you will find that every contiguous territory in that metropolitan area assumes its proportionate share of expense, whether it be a matter of sewers, or a matter of police, or whatever may be considered by that area as a subject pertaining to a strictly metropolitan area. The fact that persons of the District of Columbia are living near this metropolitan area in the city of Washington is no reason why the parents of children outside the city should be permitted to send their children here without paying their proportionate share of the cost. This is not a case where the children concerned are in any sense denied an opportunity for education. It is for us to say whether the taxpayers of Washington shall bear that burden in supporting children in the District schools sent from outside of the District.

Mr. HARRISON. Mr. Chairman, will the gentleman yield?

Mr. WELSH of Pennsylvania. Yes.

Mr. HARRISON. Does not the United States Government contribute $9,000,000 to assist the taxpayers of the city of

Washington, and are not the people entitled to some consideration in these matters?

Mr. WELSH of Pennsylvania. Yes; that is true. That could not be disputed. But that does not prove that the District of Columbia citizens and taxpayers should bear the whole burden of responsibility for that proportionate share of taxation that the United States Government bears to the District of Columbia.

Mr. HARRISON. I will state further that the State of Virginia takes care of any number of children, the children of officers, soldiers, and employees of the Government without the slightest contribution from them to the taxes of the State.

Mr. WELSH of Pennsylvania. But the State of Virginia requires that those employees in the District of Columbia shall live within the confines of the school district which the children attend.

Mr. HARRISON. I want to call your attention to the fact that I have received a letter from an official board of the school district near Fort Monroe, in which it is stated that the children from the reservation from Fortress Monroe had so crowded their school facilities that they were scarcely able to function.

Mr. WELSH of Pennsylvania. I do not yield further. I just want to impress upon the members of the committee the fact that the subcommittee approached this question from every angle which has been mentioned on this floor. Everything you have discussed on the floor we discussed in the committee, and I think the members of this committee should understand that we consider this to be fair to the taxpayer in every respect, and if we think it fair all along the line, you can be assured that the surrounding districts will take care of the little tots and nobody will be hurt if we are fair, and whatever appeals to you as being fair I hope you will register in your vote, because there is no politics involved in this matter. [Applause.]

Mr. SIMMONS. Mr. Chairman, how many gentlemen desire to speak?

Mr. LINTHICUM. I would like to have five minutes.

Mr. BLANTON. And I would like to have five minutes.

Mr. SIMMONS. I ask unanimous consent, Mr. Chairman, that the debate on this amendment be limited to 35 minutes, to be controlled by the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. No. Just ask for 40 minutes.

The CHAIRMAN. The Chair understands that you can limit the debate to a certain time.

Mr. SIMMONS. Let it be 40 minutes.

Mr. LINTHICUM. Will not the gentleman from Nebraska say who shall receive that time? I would like to have 10 minutes.

Mr. SIMMONS. I move, Mr. Chairman, that the debate on this paragraph and all amendments thereto close in 40 minutes.

The CHAIRMAN. The gentleman from Nebraska moves that the debate on this paragraph and all amendments thereto close in 40 minutes. The question is on agreeing to that motion.

The question was taken, and the motion was agreed to.

Mr. BLANTON. I ask for recognition for five minutes.

The CHAIRMAN. The gentleman from Texas is recognized for five minutes.

Mr. BLANTON. Mr. Chairman, all of this discussion has revolved around generalities. I want to give you some concrete facts as to just what it means to vote for this amendment. I happen to know a splendid Maryland family living in the town of Berwyn, Md., and voting there, a family who have lived there for years. They live in Berwyn because they have a comfortable home there. All their children have been educated here in the District of Columbia in the graded schools and in the Central High School to graduation, with their tuition furnished them free, paid for by the District people and the Federal Government; with their school books furnished them free, paid for by the District people and the Government; when there was a good school—as "good" means in that part of Maryland, right in Berwyn—but they did not choose to go to their own school in Berwyn. They chose to go to school in the District of Columbia. What duty do the District people owe them? None, because they pay not a dollar of tax here. They pay their taxes to the State of Maryland and to Berwyn. And what duty do the whole people of the United States owe them? None, so far as furnishing free tuition and free school books to their children, for the Government does not furnish same to the children in any other of the 48 States except Maryland and Virginia. The people in the other 46 States are taxed to send their own children to school. They should not be taxed also to help school the children of Maryland and of Virginia.

Mr. GAMBRILL. Will the gentleman yield?

Mr. BLANTON. In just a moment. The gentleman has consumed 25 minutes and I have not had any time.

Mr. GAMBRILL. I yielded to the gentleman.

Mr. BLANTON. I yield to my friend from Maryland.

Mr. GAMBRILL. Did the gentleman from Texas educate his children in the District schools?

Mr. BLANTON. Yes; partly.

Mr. GAMBRILL. And did it free of any tuition charges?

Mr. BLANTON. Just as other parents do who live here and pay their share of civic expenses, as I have done for 11 years. My official duties force me to live here 11 months per year, and on an average I have had to pay about $150 per month to get a house to live in, and I spend here over $200 per month additional for something to eat and wear. And I pay for my fuel, lights, water, telephone, gas, automobile upkeep, and domestic help, which money spent here as everywhere else, helps to keep up the city. Does the gentleman send his children here?

Mr. GAMBRILL. My children are not going to school here. They are going to school in the State of Maryland.

Mr. BLANTON. I am spending in Washington each year as great a proportion of my income as any other resident in the District of Columbia is doing, and the people I have paid my money to annually have paid much of same in taxes to the District.

I am thus helping the residents of this District, while I live here, to keep up their civic improvements, if you please, by paying the fixed charges the same as all other residents pay. And while my official duties force me to reside here, I live in Texas. All property such as I own in Texas pays school taxes. I have a little farm in Jones County, Texas. It is in the Lueders independent school district. I pay school taxes there, every single year I live, and have for 20 years, yet have never had a child in school there. When I wanted to send two boys of mine to a certain high school in the capital of the State, for special studies in Austin, I paid tuition for them there, just as all others who did not reside in that county were required to pay. I chose to send them there but I had to pay for it, even though I was paying a school tax in another county on my farm.

Mr. MONTAGUE. Did the State lose anything thereby?

Mr. BLANTON. No; because I paid for it myself, but that county would have lost if I hadn't paid for it. You take this family I speak of in Berwyn. They did not live in the District of Columbia, because they did not want to pay the high property prices here. They went to Berwyn because they could get a comfortable home with plenty of room much cheaper. They had an acre of ground there; they had a garden and orchard, and they kept a milk cow in Berwyn, but instead of paying their automobile license tags in Maryland, which would have cost as much as $12 for a Ford car, and more in proportion, they took out their license tags here in the District of Columbia, where they could get automobile tags for $1, looking both ways for saving their own money. But they paid all of their real estate and personal taxes in the State of Maryland, and to Maryland, yet they got free tuition and free school books for their children through the graded schools and through the Central High School of the District of Columbia, paid for by District residents and the Government of the United States.

I want to say it is not right for the people of the District of Columbia to bear this burden. It is not fair to them and it is not just to them to have them pay for their own children, and then pay for the children of Maryland and the State of Virginia. And it is not fair or just for our people back home to have to pay part of this schooling for Maryland and Virginia.

There are 2,571 children this year in the schools here who reside in Maryland and Virginia. Prior to this year there were about 3,000 from these two States. They have been cut down some this year, and this amendment is not drastic. Your committee has called your attention to the fact that it does not apply to a single one of the 2,571 children who are now in the District schools. They are all allowed to continue on to high-school graduation. It does not apply for 8, 10, or 12 years to come.

There is not a Member in this House who can give one just reason why the Washington people and the Government of the United States should furnish free tuition and free schoolbooks, and free school buildings for 2,571 children who reside in Maryland and Virginia, through kindergarten, through eight years of graded schools, and then through four years of high school, when many of their parents pay not one dollar of taxes to the District of Columbia, but pay all of their taxes, both real estate and personal, to the States of Maryland and Virginia. If we are to do this for Maryland and Virginia, we ought to offer the same identical privileges to all of the other 46 States in the Union, for whose school children our Government is not paying one red penny on their tuition, school buildings, and schoolbooks.

There are many of the parents of these 2,571 school children, who own magnificent country estates in both Maryland and

Virginia, and who have no connection whatever with the Government, or with Washington. And I could name some Senators and some Congressmen who have selected either the old Commonwealth of Virginia, or the old Commonwealth of Maryland, as their place of abode, and who prefer to send their children to Washington schools instead of to the local schools in their vicinity.

Without embarrassing any colleague by mentioning names, I can mention the name of a former colleague in this class, our former colleague, the distinguished gentleman from Kansas, Mr. Phil Campbell, bought himself a fine residence over in the State of Virginia, overlooking the Mount Vernon Highway, and, naturally, he preferred the Washington schools over the Virginia ones. He had two choices: He could have resided here in Washington and paid Washington prices and put up with Washington inconveniences and enjoyed Washington privileges, such as sending children to Washington schools, but he preferred to live in Virginia, and there he went. But after going there he still insisted on having Washington privileges. But to show you that the people back home will hold us responsible for our choices, when he was in his last campaign in Kansas and was arising to tell why he should be returned to Congress from the State of Kansas his local Kansas band began to play "Carry me back to ole Virginny." And that is where he returned. And he is still there. And another from Kansas took his place.

Besides all the other big hand-outs that this Government is giving the District of Columbia in practically every one of the supply bills we are taking out of the Public Treasury of the United States in one lump sum in this bill $9,000,000, which comes out of the pockets of the taxpayers of the United States and which helps to pay the schooling of the 66,000 children of Washington.

And yesterday the gentleman from Maryland [Mr. ZIHLMAN] offered his amendment to increase this amount to $10,000,000, so that the taxpayers of the United States would have to contribute an additional $1,000,000, and when some of us protested he said: "What is a million dollars between friends?" It is a whole lot when the million dollars belongs to confiding constituents who live thousands of miles away and who are depending on us to protect their interests. We must not be so generous with somebody else's money. We must not be so generous with the people's tax money.

From some of the "sob" speeches made here, one might imagine that some poor boys and girls had just one chance to get an education and that was to pass this amendment, and that if we voted down the amendment, we would be depriving them of all chance to secure an education. Such position is ridiculous and ludicrous. Maryland and Virginia will supply their own schools for their own people just as soon as they definitely understand that Congress is going to stop furnishing same out of the Public Treasury.

This issue must not be camouflaged. It is plain and simple. Under the law and practice up to this time, children both from Maryland and Virginia are accepted in Washington schools. Washington people and the Government jointly pay for the buildings, tuition, and free school books. Maryland and Virginia want this practice continued. The Washington people and the Government want to stop it, and make Maryland and Virginia take care of their own children and schooling.

This year there are 2,571 children who reside in Maryland and Virginia attending the Washington schools. The bill before us does not stop them. It permits them to continue on through the years until all of them graduate through the high schools. But the bill does not permit any new ones to be enrolled. The bill says that a child living in Maryland, and one living in Virginia, now in the Washington kindergarten, may continue on through the eight years of graded school, and also through the four years of high school, but no new ones are to be enrolled, and so far as new enrollments are concerned, Maryland and Virginia must provide schools for them. Is there anything unjust or unreasonable about this? Not at all; yet the pending amendment would strike out this provision of the bill, and continue on and on the practice of letting Maryland and Virginia children attend Washington schools at the expense of Washington people and the Government. Any vote for the amendment is a vote to make all of the people of the United States pay part of the expense of sending Maryland and Virginia children to school in Washington 13 years, from kindergarten through high school.

Yesterday the gentleman from Michigan [Mr. CRAMTON] moved to reduce from $9,000,000 to $7,000,000 the amount the whole people of the United States would pay on these District expenses. That would have saved the taxpayers of the United States $2,000,000. And if we had not been forced to build and furnish buildings for these 2,571 children residing in Maryland and Virginia and to furnish them with teachers and tuition and with free school books, we might have saved this $2,000,000 for the taxpayers of the United States.

These 2,571 children from Maryland and Virginia represent between 800 and 1,000 families. Of course, they want this free schooling. Of course, they applaud and feel kindly toward any Member of Congress who speaks in their interests. And I could make myself very popular with them if I would vote for giving their children free schooling in Washington. And, after all, what is a paltry million dollars between friends when it does not come out of our pockets but the Public Treasury, with the people at home far away, and who will probably know nothing about it? And to vote with these 1,000 Maryland and Virginia families might help me tremendously in a political way, as most of them have friends and relatives living in my State. Hence, it is a great temptation for me to speak for them and to vote for them, but my conscience and my judgment tells me that it is my duty to speak for and vote for the people of Texas and the whole people of the United States, and this amendment is against their interests. We have a magnificent delegation here from Virginia. They are lovable colleagues. I would like to favor them. We have a fine delegation here from the great State of Maryland. They are all bully good fellows. I would like to favor them. I would like to be popular with them all. I would like to have their best wishes. But my sworn duty here is not to favor them at the expense of my own constituents. Feeling that way about it, I am against the amendment.

Mr. MONTAGUE. Mr. Chairman and gentlemen, the gentleman's argument is answered by the fact that he favors a change in the educational system after he gets through educating his own children at the expense of the Government of the United States and the District of Columbia. I allude to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. That is not fair, because I am paying here in Washington identically the same charges on everything that every other resident in Washington is paying, and I have the same rights as other residents here.

Mr. MONTAGUE. But you are not educating your children now.

Mr. BLANTON. But I still pay the same as all other residents pay to live here.

Mr. MONTAGUE. But the gentleman did not pay anything to enter his children in the schools. Gentlemen, you can not deal with this matter upon an analogy with other cities in the country. They are not at all similar. There are citizens of the United States and there are citizens of the States. That has been held by the Supreme Court of the United States as well as expressed by text-writers.

This District was set apart, and here, perhaps more than anywhere else in the Union, you will find the distinctive difference between a citizen of the United States and a citizen of the States. When you come to speak of the education of children here it is not done by the District of Columbia only. It is only partially done by the District of Columbia. According to the statement of the gentleman from Texas, a little while ago, the United States pays $1,000,000 more than is necessary to maintain its residence and property in the District of Columbia. I infer from him that $8,000,000 would have been the fair proportion of money to be appropriated to this District by the Federal Government. We appropriate $9,000,000. What becomes of the $1,000,000 difference?

Now, let us come to the situation here. The distinguished gentleman from Illinois [Mr. MADDEN] referred to Chicago. Of course, they charge for entrance into the schools of Chicago as they do in other places of the country, but that is the same identical jurisdiction. There is no Federal question involved. There are no Federal taxes expended, and it is just taking money out of one pocket and putting it into another. The State treasury itself is as whole as it was before such admissions. Coming to the particular situation here, which I wish, if I can, to impress upon the gentleman of the committee.

The children to be educated in the outlying regions of the District of Columbia or in propinquity or vicinity of the District of Columbia constitute nothing in this world—if you wish the truth and nothing but the truth—but a suburban population of the District of Columbia. It is not a foreign, imported population; it is the outgrowth of the District of Columbia. If you were to abolish the District of Columbia you would have none of these children and none of these nonresidents.

Now, is it possible that a Government as wealthy as ours will go to Virginia and extract from her, to educate the children of the agents, officers, soldiers of the United States, five or ten times as much as Congress appropriates for the entrance of a few Virginia children into the District of Columbia? If you

want to be just and fair, Congress should not exact from Virginia and give nothing in return.

I did not anticipate submitting any views whatever upon this subject, but to me, unless I am unaware of my own mental state, this bill is not a just administration of the Federal Government. You can draw no analogy between the city of Washington and the city of Chicago or the city of Baltimore. This District belongs to the United States of America. It was established by the Constitution of the United States of America to be governed entirely by the Congress of the United States.

Mr. MOORE of Virginia. May I interrupt my colleague?

Mr. MONTAGUE. If the gentleman does not take too long.

Mr. MOORE of Virginia. It seems from what the gentleman from Nebraska has said that the children from the Army posts within the metropolitan area do not generally come into the District of Columbia for their education, and therefore they are going to the Virginia schools.

Mr. MONTAGUE. I know it.

Mr. MOORE of Virginia. And there are between three and four thousand officers and enlisted men in these three or four posts.

Mr. MONTAGUE. We have within a radius of 10 or 20 miles of Washington at this time over 2,000 officers in the Army, Navy, and Marine Corps, to say nothing of children of privates and employees. We would have many more if we did not have nearly 4,000 marines to-day in China and, perhaps, 2,000 or 3,000 in Nicaragua, yet, as a matter of fact, I think you will find that from Quantico very few attend the schools of the District of Columbia. They are all taken care of by the Commonwealth of Virginia. [Applause.]

Mr. LINTHICUM. Mr. Chairman and members of the committee, it is not my purpose to take up much time, because the subject has been so fully discussed and the gentleman from Virginia [Mr. MONTAGUE] has covered the most of what I wanted to say. There are only two or three observations I care to make. It would appear from what has been said that there is a belief that no legislation on the subject exists. We have legislation passed by Congress to the effect that the children of men engaged in public service or doing business in the District shall have the right to send their children to the District schools. A bill was considered by the District of Columbia Committee which contemplated a change, but it was unanimously rejected by the subcommittee. The proposition now is "that the children who do not dwell in the District of Columbia shall hereafter be excluded; that the children of employees of the Government or of people doing business here shall not go to school in the District of Columbia," in accordance with existing legislation. It is the intention of the Appropriations Committee, who call themselves "We," to limit it by the provisions in the bill. In other words, the Appropriations Committee is endeavoring to overrride the legislation enacted by Congress.

The gentleman from Nebraska read a telegram from the superintendent of schools of Baltimore. Yes; they charge tuition to children coming in from the counties, except where a parent from the county has property in Baltimore City and pays the school taxes, then the school tax he pays is deducted from the tuition. That is an adjustment between the city and the county, all within the same State. The situation between the District of Columbia and Maryland, I think, is on an entirely different basis. Here we appropriate $9,000,000 out of the Federal Treasury toward the expenses of the District of Columbia. According to congressional figures, the Government property in the District is valued at $333,000,000. The District organizations say that the property in the District of Columbia, belonging to the Government, has a value of $470,000,000, which latter figure would amount to a tax of $8,000,000 at the $1.70 rate charged to all taxpayers. So the United States Government is giving the District a million more dollars than they would get if they taxed the Government property in the District of Columbia. In addition the Government gives them the free rental of property worth a rental value of $142,000 annually; the Government is paying salaries that should be paid by the District of Columbia amounting to $90.000 yearly and giving them buildings which would rent for $15,000. I take these from the hearings, pages 1029–1030 and 1033.

The point I make is this: The parents of these children are engaged in public service. They go into the counties of Maryland and Virginia and arrange a little home, and all the taxes the county gets out of each family for school purposes would not provide for the education of one child in 75 per cent of the cases. If you burden the counties with all the children of these employees, which pay very little, you will almost bankrupt the counties.

These dwellers are here for Government purposes, and are not brought here as inhabitants of the counties; they come here for Government purposes, consequently the Government should be as liberal in educating the children of those people as it is in educating the children of people in the Army camps or at Army posts or on other governmental reservations.

It is not the District we ask to do this, but the National Government. It should be done, even though it required an additional appropriation.

The CHAIRMAN. The time of the gentleman from Maryland has expired.

Mr. BUSBY. Mr. Chairman and members of the committee, I would not have taken this time if any Member in all this discussion had happened to hit on the point I have in mind and around which I shall make my speech. This is the proposition I have in mind, and I think it strikes at the very foundation of this matter. It seems to me the argument has been made here that this provision in the bill would be an injustice to the taxpayer in the District of Columbia.

A certain portion of the expenses of the District of Columbia are paid by the Federal Government—some 30 or 40 per cent of the expenses of the District of Columbia. A large portion of the expenses of the District of Columbia are not paid by the United States Government. Under all of the budgets I have seen made up in the counties in States they contain an estimate for different objects—a certain portion would be for one thing, a certain portion for another, and a certain portion of the budget would be for school expenses. When you pay your taxes you have to pay a certain per cent of that amount for schools. The Government of the United States pays $9,000,000 taxes, out of which $3,000,000 is school taxes. Say the budget for Washington is $40,000,000. The schools of the city cost, say, $12,000,000, or 33⅓ per cent of the total. Then one-third of the Federal donation of $9,000,000 to the District, or $3,000,000, should be considered the donation to the school fund. You know this city is not a manufacturing city; you know there is no other business in it disconnected with the business of the United States Government. You know that practically everyone who is in the city of Washington is dependent upon it as the Capital of the United States, and those who come in from the surrounding territory, or those who come into what we call the District of Columbia, come here to transact and carry on business mostly for and with the Government.

In fact none of the telegrams that the chairman of the subcommittee read to you has any striking effect on me, because they all apply to places where there is no contribution whatever from the United States toward maintaining any such organization as that maintained at this place. I can not see why you should lay down a line here and say that this is the District line, and that notwithstanding the fact that the Government has paid $9,000,000 into the treasury, a portion of which in all fair budget making should go to school purposes, the people who work for Uncle Sam and have to live outside of this District shall not profit by that contribution. On that basis I contend that the taxpayers of the District have no just complaint to make against us if we continue to permit the children to come along to school as we have heretofore.

Mr. CHINDBLOM. Mr. Chairman, I offer the following perfecting amendment which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. CHINDBLOM: On page 46, in line 14, after the word "act" strike out the period, insert a semicolon and add the following: "*Provided further*, That pupils who dwell outside of the District of Columbia and are not enrolled in the public schools of the District of Columbia on the date of the approval of this act may attend the public school of the District of Columbia upon payment of tuition, to be fixed by the Board of Education, together with the terms of payment, in amount at least sufficient to compensate a proportionate share of the salaries of teachers employed in giving instruction to such pupils."

Mr. ZIHLMAN. Mr. Chairman, I make the point of order against the amendment.

The CHAIRMAN. The gentleman will state the point of order.

Mr. ZIHLMAN. My point of order is that the amendment changes existing law. It is legislation on an appropriation bill. The amendment could not possibly come within the provisions of the Holman rule, because there is no saving effected thereby.

Mr. CHINDBLOM. Mr. Chairman, I should like to have the gentleman reserve the point of order for a moment.

Mr. ZIHLMAN. I should be very glad to reserve the point of order, Mr. Chairman.

Mr. CHINDBLOM. Mr. Chairman, I have offered the amendment for this purpose. If the provision now in the bill should remain, there would be no possibility for any child living outside of the District of Columbia to come into the schools, to attend the public schools of the District during the next fiscal year. If the provision that is in the bill does remain, it seems to me

that those who are opposed to the provision because they want pupils outside of the District to have an opportunity to come into the District schools ought to be willing to accept an amendment which makes it possible for such children to come into the District upon the payment of tuition. If the text of the bill remains it will not be possible for those pupils to come in after the 1st of July next, but if this amendment be adopted it will be possible for them to come in upon the payment of tuition, to be fixed by the Board of Education. The language of my amendment follows the language of the bill—H. R. 5524—introduced by the gentleman from Michigan [Mr. CRAMTON]; which he has sought to have adopted as permanent law; and if, during the next fiscal year, this law should be adopted, you will have a situation where during the year that will have passed pupils will be able to continue attending schools after the law has been passed. It applies only to this appropriation; it is limited just as the original text of the bill is limited to this appropriation alone. If I took the position which the gentleman from Maryland [Mr. ZIHLMAN] takes, I think I would want to perfect the text to make it possible for those pupils to attend in case the House determines to retain the language of the original bill. On the other hand, so far as the parliamentary situation is concerned, this amendment will be voted on first, if it is sustained by the Chair as not being obnoxious to the point of order. It will be a perfecting amendment, it will be a part of the text, and then you will have the same opportunity you have now to vote on the proposal to strike out the whole thing with the amendment added.

Mr. GAMBRILL. Mr. Chairman, will the gentleman yield?

Mr. CHINDBLOM. Yes.

Mr. GAMBRILL. The trouble is that we are attempting in an appropriation bill by a limitation to pass legislation which will cover this whole situation. The vice of your amendment is this——

Mr. CHINDBLOM. Oh, I thought the gentleman wanted to ask a question. If the gentleman wants to discuss my amendment, that is a very different thing, and I can not stop for a speech upon it now. With reference to the point of order, it will become necessary for the Chair to determine whether the original paragraph in the bill is subject to the point of order. If the original paragraph in the bill is subject to a point of order, then I submit that my amendment, being germane to the text, is also in order.

Mr. MOORE of Virginia. Mr. Chairman, will the gentleman yield for a question on parliamentary law?

Mr. CHINDBLOM. Yes.

Mr. MOORE of Virginia. I examined the question the gentleman just propounded, as to whether the paragraph reported by the subcommittee is subject to the point of order. I may say without violating any confidence that I discussed the question with the gentleman from Georgia [Mr. CRISP]. We reached the conclusion that it is not subject to the point of order.

Mr. CHINDBLOM The gentleman refers to the original provision in the bill?

Mr. MOORE of Virginia. Yes.

Mr. CHINDBLOM. I have not expressed any opinion upon that.

Mr. MOORE of Virginia. If it was subject to a point of order as being a legislative provision, the point of order not having been raised, then you would have the right to put in a legislative provision as a substitute.

Mr. CHINDBLOM. It is legislation notwithstanding. It is legislation now, but it is in order because it is legislation limiting the appropriation. It comes within the precedents. If there was no legislation in it the question of its being in order would not arise.

Mr. MOORE of Virginia. As to the paragraph as it stands, we are not objecting to it on the ground that it is legislation, but——

Mr. CHINDBLOM. I have not discussed that. I said to the Chair that it was necessary for the Chair to determine whether the original provision is in order or not, and since the gentleman has raised the question, I will say that so far as the original provision in the bill is concerned, in my opinion, that is in order.

Mr. ZIHLMAN. I insist on the point of order, Mr. Chairman.

Mr. KETCHAM. Mr. Chairman, will the Chair please state whether or not any time is remaining under the agreement made a short time since?

The CHAIRMAN. A few minutes remain. Does the gentle- from Michigan desire to be heard on the point of order?

Mr. KETCHAM. Not on the point of order; but if there is any time left under the original agreement, I desire to be heard.

The CHAIRMAN. Does the gentleman from Maryland [Mr. ZIHLMAN] desire to be heard on the point of order?

Mr. ZIHLMAN. No. I stated my views on the point of order.

Mr. LAGUARDIA. Mr. Chairman, I do not agree with the gentleman from Illinois [Mr. CHINDBLOM] when he says that if the original amendment was in order any amendment thereto would be in order, regardless of the text of the perfecting amendment. Here we have an amendment offered which is clearly a limitation which comes within the rule; but the so-called amendment offered by the gentleman from Illinois brings an entirely new subject into the law, and that is the payment of tuition. That is not in the law now, and it is clearly legislation, and the fact that it is hooked on to an amendment that is in order does not make it germane if it is not germane.

Mr. CHINDBLOM. What I want to do is to save these children who may want to attend public schools in the District.

Mr. BLANTON. Mr. Chairman, I make a point of order that the remaining time is for those who are opposed to the amendment, and the gentleman from Michigan [Mr. KETCHAM] is in favor of it.

The CHAIRMAN. The gentleman from Michigan is recognized for five minutes.

Mr. KETCHAM. Mr. Chairman and gentlemen of the committee——

Mr. CHINDBLOM. Mr. Chairman, I wish to be heard on the point of order.

The CHAIRMAN. The gentleman from Michigan is now speaking on the amendment offered by the gentleman from Maryland [Mr. GAMBRILL].

Mr. BLANTON. And he is in favor of it, although the remaining time is for those opposed to the amendment.

Mr. CHINDBLOM. In order that there may not be a wrong precedent set, Mr. Chairman, the gentleman from Illinois—myself—understood the Chair to sustain the point of order made by the gentleman from Texas [Mr. BLANTON]. Of course the gentleman from Texas could not make a point of order on the question of recognition.

Mr. SIMMONS. Mr. Chairman, I will ask unanimous consent that the gentleman from Michigan [Mr. KETCHAM] may be recognized.

The CHAIRMAN. The gentleman from Nebraska asks unanimous consent that the gentleman from Michigan [Mr. KETCHAM] may be recognized. Is there objection?

There was no objection.

Mr. KETCHAM. Mr. Chairman and members of the committee, in the first place, I want to express a word before the whole committee that I expressed to the chairman of the subcommittee a little time ago, and that is a word of appreciation of the fine spirit the subcommittee have shown in their endeavor to meet this very difficult situation.

And I think I might go further. If the gentleman had not been to such great pains as to send a telegram out to the superintendent of the city schools at Hastings, Mich., which sought to put me in a rather bad light in this situation, perhaps I might have been able to go along with him, but I find myself forced to the opposite position.

Now, with reference to my home city, that city exhibits exactly the same spirit that I wish this Capital would exhibit with reference to those boys and girls from nearby towns. It is true that we charge them tuition, but I do not think the superintendent of schools of our town will say that that tuition represents the cost of the instruction received. But we feel that it is a fine thing to establish cordial relations with the county of which we are the county seat, and to encourage the boys and girls to come there in order that they may have the advantages of education.

And now I make my plea for the amendment of the gentleman from Maryland on this basis, that this same fine spirit of reciprocity ought to characterize this great Capital. I brush aside the statements of my friends on this committee as to heavy taxation in the District as a result of these pupils as inconsequential. If I were a lawyer, I would say their contention is irrelevant, incompetent, and immaterial. [Laughter.] It certainly is inconsequential. That is the only word that occurs to me outside of the lawyers' vocabulary that begins with the letter "i." [Laughter.]

The very idea of men on this committee standing here and pleading for the taxpayers of the District of Columbia in reference to the very trifling sum that may be required from the pockets of District taxpayers to make up their small proportion of the $250,000 that might properly be charged to these children

is ludicrous. Any man who has ever had any experience in school affairs knows that you would have your school machinery already set up, with practically the rooms that you have now, and the same overhead expense, with or without these children, and no man this minute has a coin in his pocket small enough to represent the increased cost that any citizen of the District of Columbia would have to pay by reason of these children coming to school here without paying tuition.

Mr. SIMMONS. Mr. Chairman, will the gentleman yield there?

Mr. KETCHAM. I will yield to the gentleman after I have made one other statement.

I think you are all aware that within this District there reside probably 10,000 heads of families who are not citizens of the District of Columbia. They vote back in your State and back in my State, and they, in a large number of instances, do not pay one red cent of tax in the District of Columbia, except as they pay it indirectly in rents. We allow them to have the privilege of sending their children to the schools here, and if that be true, and if we extend that courtesy to Nebraska and to other States, why in the name of all that is fair, right, and just should we not extend it likewise to the States of Maryland and Virginia, which to all intents and purposes are a part of this metropolitan area?

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. ZIHLMAN. Mr. Chairman, I ask recognition.

The CHAIRMAN. Is the gentleman opposed to the amendment?

Mr. ZIHLMAN. I am in favor of the amendment.

The CHAIRMAN. Is any gentleman opposed to the amendment? If not, the gentleman from Maryland is recognized for five minutes.

Mr. ZIHLMAN. Mr. Chairman, I do not propose to take the entire five minutes. Mr. Chairman and gentlemen of the committee, we have long known of the editorial "we." Recently, due to the brilliant achievement of the pioneer of the air, Col. Charles A. Lindbergh, we have become acquainted with the aeronautical "we"; and to-day we learn of the legislative "we," which seems to be the Committee on Appropriations, who are proposing this legislation, which has been characterized upon this floor as picayune. The superintendent of schools, who is paid $10,000 to manage and administer the affairs of the schools of this District and who should know more about this subject than anyone else, stated before this subcommittee that he was working out this matter of the attendance of children from Maryland and Virginia. He stated that the Board of Education have adopted a rule that whenever the number of pupils in a room reached the total of 42 the children from Maryland and Virginia were kept out of that room, and that when the number of pupils in any room reached 48, under the rule adopted by the school board, all Maryland and Virginia children were put out of that school and out of that room and taken care of elsewhere, if possible. So the school authorities are working this thing out, and it is only a matter of a few years until the State of Virginia and the State of Maryland will be able to take care of the greatly increasing population that has been built up around the suburbs and around the imaginary line which separates the District of Columbia from the State of Maryland and the State of Virginia.

In the testimony of Doctor Ballou, he states that Arlington County, Va., had issued bonds and is building a number of splendid schools. He also admitted that the State of Maryland—or the county of Montgomery, at Takoma Park, at Bethesda, and in other sections of that county—is building schools as rapidly as possible to take care of these children. I contend that at this time to endeavor to repeal the existing legislation by a limitation of this kind is not in accord with the policy we might expect from a great committee like the Committee on Appropriations, and I sincerely trust that the amendment offered by the gentleman from Maryland [Mr. GAMBRILL] to strike this provision out of the bill will prevail and that we will be allowed to work this thing out in conjunction with the authorities of the District of Columbia.

Mr. GREEN of Florida. Will the gentleman yield?

Mr. ZIHLMAN. Yes.

Mr. GREEN of Florida. Does the gentleman mean that the superintendent of schools here says that they have not enough building space to take care of the children now in the District?

Mr. ZIHLMAN. No; he does not say that. As I read his testimony he states that certain schools will be crowded, even if they eliminate all of the children from Maryland and Virginia. He states that the school referred to by the gentleman from Nebraska, in the vicinity of Chevy Chase, would be crowded even if the Maryland children were eliminated.

Mr. GREEN of Florida. Would that drive them out of the District schools or would they be transferred to another place in the District?

Mr. ZIHLMAN. Under existing law, Maryland children, if there are facilities for them, can go to a school that is not crowded.

Mr. MURPHY. Will the gentleman yield?

Mr. ZIHLMAN. Yes.

Mr. MURPHY. I am wondering, if the shoe were on the other foot, whether the State of Maryland and its Representatives would be in this House advocating just what they are advocating on this floor now, if District children were being sent into Maryland?

Mr. ZIHLMAN. There are District children in the Maryland schools. It has been stated that 270 children from the District are attending the University of Maryland.

Mr. MURPHY. But that is not a public school. They are paying their tuition.

Mr. ZIHLMAN. I will say to the gentleman that there are children attending the Maryland schools in Prince Georges and Montgomery Counties, Md., and in Arlington County, Va., who reside within the District, and no tuition is charged. It is true the number is not comparable, but I am stating this to show that reciprocity does prevail.

Mr. CHINDBLOM. Is the proportion about 16 to 1?

Mr. ZIHLMAN. About 16 to 1.

Mr. MURPHY. I can very readily sympathize with the gentleman from Maryland in trying to save the taxpayers of Maryland at the expense of the taxpayers of the District of Columbia. The gentleman must not lose sight of the fact that every man who lives in the District of Columbia is paying taxes when he pays the rents of this District. They are paying taxes beyond anything they would pay in your State and in the State of Virginia.

The CHAIRMAN. The time of the gentleman from Maryland has expired. The question is on agreeing to the amendment offered by the gentleman from Maryland [Mr. GAMBRILL].

The question was taken; and on a division (demanded by Mr. ZIHLMAN) there were—ayes 91, noes 82.

Mr. SIMMONS. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed as tellers Mr. SIMMONS and Mr. GAMBRILL.

The committee again divided; and the tellers reported that there were—ayes 95, noes 98.

So the amendment was rejected.

The Clerk read as follows:

HOUSE OF DETENTION

For maintenance of a suitable place for the reception and detention of children under 17 years of age, and, in the discretion of the commissioners, of girls and women over 17 years of age, arrested by the police on charge of offense against any laws in force in the District of Columbia, or held as witnesses or held pending final investigation or examination, or otherwise, including transportation, the purchase and maintenance of necessary motor vehicles, clinic supplies, food, upkeep and repair of building, fuel, gas, ice, laundry, supplies, and equipment, electricity, and other necessary expenses, $14,000; for personal services in accordance with the classification act of 1923, $15,780; in all, $29,780: *Provided*, That no part of this appropriation shall be expended for the maintenance of a house of detention in the territory abutting or adjacent to the grounds of the Capitol Building, the Senate and House Office Buildings, and the Library of Congress.

Mr. SIMMONS. Mr. Chairman, I offer an amendment.

The CHAIRMAN (Mr. LAGUARDIA). The gentleman from Nebraska offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SIMMONS: Page 55, after line 24, insert the following paragraph:

"For rental, repair, and alteration of quarters for health department clinics, including installation of necessary equipment, $8,000."

The amendment was agreed to.

The Clerk read as follows:

For a site for an engine company to be located in the vicinity of Connecticut and Nebraska Avenues, NW., $12,000: *Provided*, That no part of this appropriation shall be expended for the purchase of any site the cost of which shall exceed the full value assessment of such property last made before purchase thereof plus 25 per cent of such assessed value.

Mr. LUCE. Mr. Chairman, I move to strike out the last word of this paragraph for the purpose of asking the chairman of the committee if he can give the committee any information as to what progress, if any, he is making on the question of handling the purchases of property in the District.

Before the gentleman answers I would explain that my committee duties and other relations bring me in touch with the problem and are bringing home to me forcibly some of the difficult situations that are arising. Last year we passed a bill, which became law, for the purchase of land for an arboretum. By reason of the position taken by certain real-estate promoters, we were held up in that project. Very fortunately, the bill provided that this land might be that which we had especially in view, the Mount Hamilton site, or it might be elsewhere in or near the District; and it may be well for me now to give notice that the permission to go elsewhere in the District or to go outside of the District may be resorted to if it proves impossible to buy the rest of this land at a reasonable price. I may also warn the men concerned that if the holdup continues the Government may see fit to stop any further work in the dredging of the Anacostia River and the development of the land in the upper reaches thereof.

But I am concerned with two other situations that I think should be brought to the attention of the committee, and possibly in view of them the chairman of this subcommittee may help us to determine what ought to be done.

In the case of the land that is to be bought, two squares at the lower end of the hill, for the new Botanic Garden, the bids were opened the other day and there was not one piece of property in those two squares that was offered to us at less than 100 per cent above the assessed valuation. One of the more important pieces of property was offered to us at between 300 per cent and 400 per cent above the assessed valuation. The average of the bids submitted to us was over 200 per cent above the assessed valuation. This, of course, is nothing more or less than a holdup of the Government of the United States and an attempt to extort from the Public Treasury money that should not go for that purpose; and, strongly of the hope as I am that the Botanic Garden may be speedily removed from its present situation, I for one should be very reluctant to consent to paying any such extortionate prices as are demanded; and I am ready now, unless something changes in the matter, to introduce another bill providing a different site for the Botanic Garden.

But it seems most unfortunate that we should be obliged to sacrifice the desirable locations for our public improvements and go to less desirable locations by reason of a system of assessment and a system of condemnation proceedings which mulct the Government every time either is brought into the situation.

I understand a bill has been introduced for improving the condemnation proceedings of the District. Will the gentleman inform us, if he knows, of any steps that are being taken or can the gentleman suggest any steps that ought to be taken to meet the conditions presented by the unfair, unjust, and wrong system of assessing property in the District of Columbia?

Mr. SIMMONS. Mr. Chairman, I think the gentleman from Massachusetts [Mr. LUCE] has very well stated the situation that exists here in Washington, and that is that under existing conditions the real-estate men are holding up the Government and the people of the District in the purchase of sites.

On this matter the gentleman and I are in complete accord. I believe the gentleman is right in notifying these people that if the United States can not buy property at a fair price in the District, when there are matters that affect the District, such as the matters the gentleman is interested in, then we ought to go outside of the District or stop the activity.

We are presented with a strange situation in the District. Business men, responsible taxpayers who ought to be interested in city development, refuse to serve on condemnation juries. The business men of Washington either connive in this holdup or else do not resist it. I asked the corporation counsel why it was that responsible business men in the community were not called upon as witnesses of value in condemnation cases. He said the only way he could get them was to insist that they come, and that they came only as a personal favor. The result is that the District is in the hands of real-estate speculators and boomers of real-estate values.

Condemnation juries are made up partly of real-estate men who are interested in keeping up the price of land in the District.

It seems to me the District people ought to have interest enough in the development of the city to serve on these juries, and to see to it that the District and Federal Government get a square deal in land purchases.

The gentleman from Massachusetts asks what progress is being made in the buying of land under the 125 per cent provision.

You will find the names in the hearings of three men who went to the assessor and tried to get him to raise the assessment so that they could sell their land to the District at an increased price. In one instance the owner threatened the assessor with the influence of a Member of Congress that they would get his job if he did not increase the assessment.

We have bought land and are buying land under the 125 per cent limit. The purchasing officer told me that the money we have available will nearly all be spent.

Here is what happens: The people refuse to sell until they know Congress is not going to repeal the 125 per cent provision.

In one instance last year we could not get the land because the newspapers were bombarding the Congress to do away with the 125 per cent limit. When the appropriation bill was reported with 125 per cent limit in it, the owner came around and said, "Boys, I will take your offer if that is the decision."

The assessor states that a 125 per cent limit is a fair one to the property owner and the taxpayer. If we can not buy for civic improvements with that limit, it is not the fault of Congress; but it is the fault of those who seek to hold up the District and the fault of the District people.

Mr. LUCE. Will the gentleman yield?

Mr. SIMMONS. I will.

Mr. LUCE. Has the gentleman given any study to the matter of improving condemnation process?

Mr. SIMMONS. There is a proposal for that purpose, but I have not had time to study it. The condemnation law needs amendment. The courts appoint a condemnation jury and it may be 8 or 10 months before anybody knows what their decision is or what influences may be brought to bear on them. In one instance a condemnation jury have had the matter of the purchase of a school site under consideration for six or eight months and had not reported.

Mr. ZIHLMAN. Mr. Chairman, I move to strike out the last two words. A bill was prepared by the counsel for the National Capital Park and Planning Commission, which is intended to remedy some of the defects in the existing condemnation laws, providing among other things that no man engaged in the real-estate business here can serve on a condemnation jury, and providing for an additional judge of the supreme court here to hear these cases. That bill has been introduced and is pending before the Committee on the Judiciary or a subcommittee of that committee. No report has yet been made on the bill.

The CHAIRMAN (Mr. HOOPER). Without objection, the pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

For maintenance, including personal services, of the public crematory, $2,500.

Mr. GRIFFIN. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. GRIFFIN: Page 62, line 3, strike out lines 3 and 4 and insert: "For maintenance, including personal services of the public crematorium, $3,000: *Provided*, That the health officer is authorized to provide and furnish proper containers for the reception, burial, and identification of the ashes of all human bodies of indigent persons that are cremated at the public crematorium, which ashes remain unclaimed after 12 months from date of such cremation."

Mr. GRIFFIN. Mr. Chairman, the effect of this amendment is to increase the appropriation about $500. The object of that is to enable the health officer of the District to bury the ashes of the indigent persons who are cremated with some degree of respectability and concern for the dead as well as the living. The health officer encountered a snag in the matter of the proper disposition of the ashes by the attitude of the Comptroller General that no officer of the Government had the right to bury or do away with public property. The urns are receptacles in which the ashes of the pauper dead are placed after the cremation, and they are construed to be Government property. The Comptroller held that the health officer had no authority to bury them. This appropriation gives the health officer of the District a sufficient sum to provide proper urns and identification tags, so that the ashes of the dead may be preserved in peace and respectability.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New York.

The amendment was agreed to.

The Clerk continued to read the bill.

Mr. LINTHICUM (interrupting the reading). Mr. Chairman, I have an amendment which I desire to offer on page 89 of the bill. Is it too late?

Mr. BLANTON. But the Clerk is reading now on page 90 of the bill.

Mr. SIMMONS. I shall object to returning to offer such an amendment.

Mr. LINTHICUM. Then I make the point of order that there is no quorum present.

Mr. CHINDBLOM. I suggest that the gentleman from Maryland permit his amendment to be reported.

Mr. SIMMONS. I shall reserve the right to object to returning for the purpose of offering the amendment.

Mr. CHINDBLOM. And the gentleman from Maryland temporarily withdraws the point of order of no quorum?

Mr. LINTHICUM. I withdraw the point of order for the present.

The CHAIRMAN. The gentleman from Maryland submits an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LINTHICUM: Page 89, after line 11, insert a new paragraph:

"For salaries, maintenance, and for pumping water when necessary at the Bryant Street pumping station, $45,000."

Mr. BLANTON. Mr. Chairman, I make the point of order that this is legislation on an appropriation bill, and it is a change of existing law. There is no law now that authorizes that.

Mr. LINTHICUM. Mr. Chairman, I would like to be heard on the point of order.

The CHAIRMAN. The Chair will hear the gentleman from Maryland.

Mr. LINTHICUM. Mr. Chairman, on page 17 of the committee report, under the title "Water service," subtitle "Water department," we find the following:

Water department: For salaries under the water department the committee has increased the Budget estimate of $142,000 by an addition of $2,360 for salary increases. There is recommended for the item of maintenance and operation of the distribution system and the purchase of supplies and payment of per diem wages the Budget estimate of $335,000. This is a reduction of $111,500 under the current year and is made possible by the discontinuance of the pumping of water at the Bryant Street station.

I maintain that if that $335,000 is properly in the bill, and this reduction of $111,000 has been made by virtue of the discontinuance of pumping water at the Bryant Street pumping station, this amendment is germane following that appropriation of $335,000; that it was the intention of the District Commissioners to include this $45,000 along with the $335,000, but the Budget Committee or the Subcommittee of the Committee on Appropriations having this bill in charge—I do not know which—cut it out. If it was germane as a part of the $335,000, and that was a saving of $111,000, certainly it ought to be germane to that appropriation.

Mr. SIMMONS. Mr. Chairman, this bill carries every cent for this that was asked for by the water department or by the commissioners. I insist upon my objection to returning to that point in the bill for the purpose of offering an amendment.

The CHAIRMAN. The gentleman from Nebraska insists on his objection. Does the gentleman from Maryland renew his point of order that there is no quorum present?

Mr. LINTHICUM. No.

The Clerk resumed and completed the reading of the bill.

The CHAIRMAN. Without objection, the Clerk will be authorized to change the spelling of the word "temporary" on page 77, line 17.

There was no objection.

Mr. SIMMONS. Mr. Chairman, I move that the Committee do now rise and report the bill to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Thereupon the committee rose; and the Speaker having resumed the chair, Mr. HOOPER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having under consideration the bill (H. R. 11133) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1929, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. SIMMONS. Mr. Speaker, I move the previous question on the bill and all amendments thereto to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put the amendments in gross. The question is on agreeing to the amendments.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. GAMBRILL. Mr. Speaker, I submit a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. GAMBRILL. I am.

The SPEAKER. The Clerk will report the motion of the gentleman from Maryland to recommit the bill.

The Clerk read as follows:

Mr. GAMBRILL moves to recommit the bill to the Committee on Appropriations with instructions to report the same back instanter with lines 9 to 14, inclusive, on page 46 stricken out of the said bill.

Mr. MOORE of Virginia. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Virginia makes the point of order that there is no quorum present. The Chair will count.

Mr. MOORE of Virginia. Mr. Speaker, I withdraw that.

The SPEAKER. The question is on agreeing to the motion to recommit.

The question was taken, and the Speaker announced that the ayes appeared to have it.

Mr. SIMMONS. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. As many as favor the motion of the gentleman from Maryland [Mr. GAMBRILL] to recommit the bill with instructions will, when their names are called, answer "yea"; those opposed will answer "nay." The Clerk will call the roll.

The question was taken; and there were—yeas 139, nays 146, not voting 148, as follows:

[Roll No. 38]

Mr. Fenn with Mr. Gardner of Indiana.

Mr. CRAIL. Mr. Speaker, I desire to vote.

The SPEAKER. Was the gentleman present and listening when his name was called?

Mr. CRAIL. I was not.

The SPEAKER. The gentleman does not qualify.

Mr. ARNOLD. Mr. Speaker, I desire to vote.

The SPEAKER. Was the gentleman present and listening when his name was called?

Mr. ARNOLD. I was not.

The SPEAKER. The gentleman does not qualify.

Mr. SPEAKS. Mr. Speaker, I desire to vote "no."

The SPEAKER. Was the gentleman present and listening when his name was called?

Mr. SPEAKS. I was not.

The SPEAKER. The gentleman does not qualify.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the passage of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. SIMMONS, a motion to reconsider the vote by which the bill was passed was laid on the table.

REAL FARM RELIEF

Mr. CONNALLY of Texas. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Texas asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. CONNALLY of Texas. Mr. Speaker and gentlemen of the House, under leave granted me I set forth an argument made by me before the Committee on Agriculture on February 24 in behalf of H. R. 11358, introduced by me and now pending before the Committee on Agriculture. It is sound and workable and will give the farmer real relief. The bill establishes a Federal farm board of 12 members from the 12 Federal land-bank districts. Commodity advisory councils are provided. The board is authorized to create an export corporation for each staple agricultural commodity, such as an export corporation for cotton and another for wheat.

A revolving fund of $500,000,000 is provided to be furnished by the Treasury. The board is authorized to make loans to cooperative associations to assist in handling surplus crops.

The export corporations in time of emergency would buy staple agricultural products at not less than the cost of efficient production and, of course, would pay the market price if higher. The farmer now must sell his whole crop in practically three months. The farm board would have the power to buy, store, and hold and feed out during an annual period. It would afford a purchasing agency which would stimulate the market.

The farmer is the special victim of the tariff. He sells his goods in a world-free market and must buy in a protected market. A protective tariff on agricultural products is not effective because we export such products instead of importing them.

THREE CENTS PER POUND ON COTTON

The only way in which the farmer can be given the benefit of the tariff is to provide export debentures for all staple agricultural products exported abroad. With this end in view the Connally bill provides that on agricultural products exported the Treasury shall issue debenture certificates. These certificates are tenderable in payment of tariff duties. Certificates for 3 cents per pound on cotton and 21 cents a bushel on wheat are provided. Such certificates are negotiable and may be sold to importers or others. Cooperative societies, private individuals, and the export corporations would have the privilege of receiving these debenture certificates. The proceeds from their sale would be turned into the revolving fund of the export corporations.

It has been estimated by competent authorities that these debentures would be of direct benefit to the cotton growers of the South in the amount of $200,000,000 annually and to the wheat growers a very large sum. They are direct benefits alone. Through stimulation of the market, carrying through periods of emergency, and in reduced price of manufactured goods through competition of imported goods, the indirect results will be many times greater.

The Connally bill provides no burdensome equalization fee. It requires no army of tax and fee collectors. It is sound and workable. It costs the farmer nothing. It gives the farmer the benefit of the tariff. It is indorsed by the National Grange, the oldest and largest farmers' organization in the United States. The Haugen bill is hopeless. To pass it again when it

is known that it can not become a law is simply to play politics with the farmer. It is simply to try to bunko him. It is simply to fool him again. The Haugen bill would cost the farmer $10 to $25 per bale on cotton. The Connally bill costs him nothing.

CONDENSED STATEMENT OF HON. TOM CONNALLY, REPRESENTATIVE IN CONGRESS FROM THE STATE OF TEXAS, BEFORE THE COMMITTEE ON AGRICULTURE OF THE HOUSE OF REPRESENTATIVES FEBRUARY 24, 1928

Mr. CONNALLY. Mr. Chairman and gentlemen of the committee, I want to thank you for the courtesy you are doing me in giving me an opportunity to discuss the farm relief bill introduced by me.

I believe I have the bill that is the "white hope" of this situation. I believe my bill is the "white hope," and if Congress really wants to do something for the farmer it can pass my bill, or it can pass either one of two branches of my bill; either one of them would be helpful.

My bill embodies the export corporation idea, with a Federal farm board of one member from each Federal land-bank district, with an advisory council, with power to form an export corporation for each particular agricultural product, so as to deal in that particular product without intermingling its funds and its business with the other products; for instance, one corporation for wheat, one corporation for cotton, and so on. It is to be given a revolving fund of $500,000,000, and then tied into that is the export debenture system, which would allow the corporations that export agricultural products or any private individual or any cooperative society or any other exporter to get the benefit of debenture certificates, which would be tenderable at the customhouse in the payment of tariff duties on imports.

DUMPING ON MARKET

What is the matter with agriculture? Two primary things, according to all authority. One is that the farmer has a seasonal market, and he dumps all of his products on the market at one time. How are you going to remedy that? If a man has gallstones, the thing to do is to go in there and cut out the gallstones, not to operate on him for appendicitis or ear trouble or cut off one of his legs. The thing to do is to go and get the gallstones.

Now, what is the matter? How do I meet the seasonal process of dumping farm products on the market? I meet that seasonal dumping by setting up these export corporations for each product, with the power to go into the market in periods of depression and buy each product in the open market at not less than the cost of efficient production. If it is worth more, then the board will pay more; and then the export corporations have power to store and carry and feed it out over the long period. That meets the seasonal proposition.

TARIFF ROBS FARMER

What is the other trouble with the farmer? The other trouble with the farmer and the theory upon which all of these bills are based is that he is the victim of the tariff; that he has to buy his goods in a protected market and he has to sell his goods in Europe in a world-free market. How do I meet that? Meet the situation, and when you find the trouble cut it out.

How do I meet the tariff situation? I simply say, "Mr. Farmer, since you have to ship your cotton and your wheat over to Europe you have to sell it there in competition with the world. I am going to permit you to bring back into the United States an amount fixed in this bill. I am going to allow you, Mr. Farmer, since you have got to sell your goods in that free world market, to bring back into the United States, duty free, an amount of foreign goods commensurate with the value of your product exported; and in order that you may not be required to actually bring these goods back I am going to require the Secretary of the Treasury to execute to you a debenture certificate of 21 cents a bushel on every bushel of wheat and 3 cents a pound on every pound of cotton, which is commensurate with the tariff rates that are charged on manufactured goods which you must buy."

Why is not that giving the farmer the benefit of the tariff? Tell me any other way on earth that you can give the farmer the benefit of the tariff. A protective tariff on wheat can not do the farmer any good. And why? Because we are now concerned with this surplus which we are exporting abroad. We do not import wheat—we import a little, but I mean on the whole we are not importers; we are exporters; and the foreign price fixes the domestic price, because if the price at home is higher than it is abroad, it will not be exported; it will stay here at home; and the foreign price has always got to be higher than the domestic price or it will not go there.

A tariff on cotton would not do any good because we export about two-thirds of our cotton. So the only way on earth that you can equalize the tariff burden is to give farmers who export their stuff abroad these debenture certificates, which would be tenderable at the customhouse, and which can be sold for cash.

How do I pay for the losses? The McNary-Haugen bill makes the farmer pay for the losses himself. My bill provides that the losses would be taken care of by these debenture certificates; and, as it was shown here in the hearing the other day, these debenture certificates would bring a direct benefit, one that you can see, one that you can feel, one that you can put your hand on, of $200,000,000 in increased value to the cotton farmer alone; a direct benefit of about $15 per bale on cotton.

The indirect benefits would be much greater, because it would stimulate purchasing power; it would stimulate the market here at home with a Government corporation able to get into the market at any time. It would aid the farmer, furthermore, by allowing manufactured goods to come in duty free, and thereby to compete with manufactured goods here at home, and more nearly equalize the burdens of the tariff. The farmer would get more for his cotton and wheat. He could buy manufactured goods at cheaper prices.

Now, gentlemen, if you do not want to adopt both wings of this bill, it is separable; you can cut it in two and take the export corporation idea or you can cut the other one off and take the debenture idea. But the ideal system is to link these two plans together. And, now, let me make just one or two other observations.

Mr. ASWELL. Do you have any equalization fee in your bill?

Mr. CONNALLY. There is no equalization fee in my bill. It does not take something out of the farmer's pocket. It really puts money in the farmer's pocket. The old equalization fee takes $10 to $25 out of the farmer's pocket. The equalization fee was a holdup.

Mr. ASWELL. You really give something rather than to take something away from him?

Mr. CONNALLY. My bill really gives him something. Let me show you about the old equalization fee. Now, gentlemen, some people treat the Constitution as a mere bagatelle. I believe the equalization fee is unconstitutional, because I would prefer the Attorney General's opinion to that of some one who does not know.

Mr. RUBEY. You need not be afraid of it.

Mr. CONNALLY. I am afraid of it.

Mr. RUBEY. If you believe it is unconstitutional, you can take it into court.

Mr. CONNALLY. Sure; but I am afraid, just as everybody else is afraid, of a bill that you know is going to break the hopes of the farmer and prove ineffective in the end.

Mr. RUBEY. We do not know that.

Mr. CONNALLY. I say I am afraid of it. But, anyway, some gentlemen say that "What is the Constitution among farm-relief politicians; what is the Constitution, anyway?" It is serious, gentlemen.

Mr. ASWELL. If you take it into the courts and there is a delay of two, three, or four years, what will happen?

Mr. CONNALLY. Of course, that is a possibility, as suggested by Doctor ASWELL. It is taken into the courts. About the time you get the equalization fee passed some fellow will take it into court, or before you get it organized some fellow will take it into the courts, and it will be declared unconstitutional, and, of course, the thing would blow up. And the hopes of the farmer would also blow up.

Mr. KINCHELOE. May I ask you a question there?

Mr. CONNALLY. Yes.

Mr. KINCHELOE. On the question of the practicability of getting a bill for the farmer that will do him some good I am frank to say to you I think there is a whole lot in the debenture plan. But do you think the President of the United States would sign that bill?

Mr. CONNALLY. I think he would come as near signing it as he would the Haugen bill. [Laughter.]

Mr. KINCHELOE. Then your bill is not any more certain than the McNary-Haugen bill?

Mr. CONNALLY. No. But I will say to the gentleman from Kentucky that when I have tried a fellow on one thing and I know what he has done on that I would a great deal rather take a chance on trying something else than to stick up the same old thing, as to which I know what he is going to do.

The President has vetoed the Haugen bill once and everybody knows he will do the same thing again. You remember a tale of a certain dog that went down a certain alley and what happened to him; he got badly licked and the dog, when invited to go down that certain alley again, observed to one of his dog friends, "No; I am not going down that alley. I know what will happen to me if I go down that alley." The Haugen bill has been "down that alley" once.

Mr. KINCHELOE. Do you think that bill would go down a single alley?

Mr. CONNALLY. The Haugen bill has been down that alley, and you know what the President did to it, do you not? My prediction is that if it is sent down that same alley again the same thing is going to happen to the McNary-Haugen bill. So I would rather try a different alley. But I will say to the gentleman, as I previously said, my bill is drawn so he can cut off the debenture plan and leave the export corporation or direct appropriation from the Treasury, with the power to purchase and carry farm products, somewhat as the Haugen bill, except the fee is eliminated.

The President indicated he would approve the Crisp bill, as I understand; he indicated that he would approve a bill drawn on the plan of the bill of Doctor ASWELL, of Louisiana. I voted for both of those bills.

One other thing about the equalization fee: That is why I voted against the Haugen bill. There are a lot of people in my State who are getting fat salaries from the cooperatives running around telling

the folks I am not in favor of the farmer. I have got a farm of my own; my wife has got a farm; every member of my family has got land devoted to the raising of cotton, and I would be foolish if I were not in favor of something that would really help the cotton farmers.

My district is a cotton district, and I would be a much worse politician than most of you gentlemen are if I were really against something if it were helpful to the farmer. I want to say to those gentlemen who have been abusing me around over Texas, and saying I was against the farmer because I will not swallow the little homeopath prescription they press to my lips, that I am voting for the real farmers, and not for these fellows who hold fat jobs at the farmers' expense. If we pass a real farm relief bill some of the high-salaried lobbyists will lose their jobs, and they know it.

Let me see about the equalization fee—your equalization fee. What happens when the farmer is getting along all right—when he is prosperous? You do not put any fee on him, do you? No. You are not down there operating when everything is all right.

Then when the time of stress comes, when the farmer is broke, lying flat on his back in an emergency, then is the time that you come along and put the equalization fee on him and increase his misery and increase the load that is on him, and finish the operation by just about taking all that is left; that is what you do; because the only time you put the equalization fee on him is when he is already flat on his back because of overproduction, getting nothing for his products, when he owes money at the bank that he can not pay; and then the farm board, sitting up here in Washington drawing these big salaries, will say, "Well, the people engaged in agriculture are in a bad fix; now, go ahead and take $10 to $25 out of each bale of cotton as a tax or fee."

Mr. RUBEY. That may explain why all the banks in Illinois are writing letters asking us to pass the McNary-Haugen bill?

Mr. CONNALLY. Yes. They say, "Agriculture is down and out, and now let us come along and put the fee on them and get some money to pull him out of the hole with."

* * * * * * *

Mr. CONNALLY. I do not believe, gentlemen—and I am serious about this—that if the fee were constitutional that it is workable. I do not believe it is practicable; that every time a fellow sells a bushel of wheat or a bale of cotton to have some fee collected. I observed that the other day, and I shall not go into it again.

But, what else is wrong with the equalization fee? One of the troubles about legislation at Washington is that there is always some rejoicing when somebody gets a law passed to benefit them, but they want it to operate on everybody else but themselves. The gentleman who spoke this morning, with all due respect to him, representing the dairy interests, is strong for the Haugen bill to operate on everybody except his concern. He wants other people to pay equalization fees, but he does not want the dairymen to pay it.

What else do we find here? We find that the Haugen bill is the spawn and the child of the cooperatives.

My bill provides that loans shall be made to the cooperatives to carry their surpluses. But the trouble about the Haugen bill is that the equalization fee is designed to be a tax on every farmer in the United States, and then when they get the money it is turned over to the cooperatives to handle. You can not dodge that. You can look off at the windows when I am saying that, if you want to, and twirl a pencil and scratch your head and smooth your hair. But that is a fact, that the Haugen bill is designed to tax every farmer in the United States, and take the money after it is collected and turn it over to a little group representing 7 or 8 per cent of the farmers to buy and hold and speculate on agricultural products. That group has got lobbyists here in Washington, and have had them; and it is all right for them to have them. But somebody has got to represent the 92 per cent of the unorganized farmers in this country, and I, for one, am not going to place an illegal, unconstitutional tax of $10 to $25 a bale on every cotton farmer in Texas and turn the money over to 7 or 8 per cent of the farmers who are directly and personally interested in a particular bill, the Haugen bill.

Now, what is there about the McNary-Haugen bill? What is there, gentlemen of the committee, I pray you? What is there that has suddenly made that bill so perfect until it is the only bill that has the benediction of certain authorities and certain interests? Three times we have had it, three editions of it, and each time we have been told that "you must not lay unholy hands upon it. You must not amend it; it is perfect." And yet each time they bring in a new Haugen bill and we are urged to observe that it is finally, in its essence, absolutely perfect.

I do not see anything about the Haugen bill that requires me to approach it with bared head and naked feet because the ground is holy. And yet they tell us it is sacred, sanctified ground. "When you come into the presence of the Haugen bill, pull off your shoes, and pull off your hat, because it must not be touched; it must not be amended. This is the only bill that has received the approval of the farmers; and we are the farmers. We know it is the right bill because it is the farmers' bill, and we are the only ones of the farmers who have been consulted."

What is there about that bill, what is there about the substance of it, that makes it so sublimated? What is there in the texture of the paper upon which it is written that makes it so superior to every form of agricultural legislation? What is there about the brains that fabricated it that makes it superior and better than anything else? I would like to know, gentlemen.

* * * * * * *

I am about through, Mr. Chairman. I want to know just one other thing. What sort of a mercurial or other bath has the Haugen bill had to make it absolutely without sin, without fault, absolutely impeccable? They contend, generally, that the bill is dead. You may not know it. The bill is dead, and you are going to have to embalm it; because the Haugen bill is dead, and everybody but you, the Chairman, seems to know it is dead. Everybody in this room who believes the President is going to approve that bill when it reaches him, like the Chairman does, hold up your hands; and I want the newspaper reporters to note who hold up their hands. No one holds up his hand. One word to this gentleman who said he is in favor of the chairman's——

Let me ask the Chairman this question. He admits that agriculture is not getting its deserved fair treatment under the tariff.

The CHAIRMAN. Oh, no; that is not the question.

Mr. CONNALLY. All right; if you will let me ask——

The CHAIRMAN. The large exportable surplus——

Mr. CONNALLY. Answer me this question, When you do export agricultural products abroad, are you opposed to letting those farmers bring back foreign goods in exchange for agricultural products?

The CHAIRMAN. I believe in dealing with everybody fairly.

Mr. CONNALLY. Answer that question. Are you willing to do that?

The CHAIRMAN. What?

Mr. CONNALLY. You heard my question.

The CHAIRMAN. Bring about——

Mr. CONNALLY. Bring back free foreign goods in exchange for agricultural products. Are you in favor of that?

The CHAIRMAN. They are not doing——

Mr. CONNALLY. I am not asking what they are doing; I am asking what they are going to do. Are you in favor of that?

The CHAIRMAN. Certainly.

Mr. CONNALLY. Then the gentleman is for my bill. Now, gentlemen, I want to thank you. I hope the chairman and the others will not think because of my zeal that I was discourteous. I did not mean to be. You have been very generous to me.

Let me say this in passing: You are up against a condition and not a theory. Do you really want a farm relief bill or do you simply want to pass something up to the President and have him veto it, and then go back down there and demagogue all around over your district and tell what you propose to do for the farmer. Which do you want to do?

* * * * * * *

Mr. CONNALLY. Here are two pathways open. One pathway to pass some sort of a bill that has a chance to get by the White House. If you do that, you will do some good to agriculture. You may not do all the good that ought to be done, but you will do some good.

The other course is to walk up here and hypocritically embrace the Haugen bill again, with the equalization fee, and walk down to the White House with it, when you know that death awaits it.

Everybody knows the President's real objection to that bill was the equalization fee. He stated so to everybody. He said that that bill with that fee in it is not going to get by. I contend that any man who votes for that bill and sends it over to the White House when he knows it is not going to get by is trying to bunko the American farmer and trying to fool the American farmer.

ADDRESS OF HON. WILLIAM W. COHEN

Mr. GRIFFIN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting a speech delivered by my colleague [Mr. COHEN].

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks in the RECORD by inserting a speech delivered by his colleague, Mr. COHEN. Is there objection?

There was no objection.

Mr. GRIFFIN. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following address of Hon. WILLIAM W. COHEN at meeting of Hadassah Zionist Organization, January 23, 1928:

THE ZIONIST MOVEMENT IN PALESTINE

Friends, the task on which your organization is engaged, and has been laboring during the past two decades, is a stupendous one, but you can point with pride at the achievements so far, and though completion of the work is not yet in sight a firm foundation has been laid, and enormous strides forward have been taken.

The United States Government indicated its interest and its sympathy with the Zionist movement long before the now-famous Balfour declaration of November, 1917, which declared that the British Government viewed with favor the establishment in Palestine of a national home for the Jewish people, and promised to use the government's best endeavors to facilitate the achievement of this object, while declaring nothing should be done which may prejudice the civil and religious rights of existing non-Jewish communities in Palestine, or the rights and political status enjoyed by the Jews in any other country. President Wilson was in strong sympathy with the Zionist movement, and his part in the action by Great Britain was greater than is generally known or appreciated. By a joint resolution of the Sixty-seventh Congress, approved by President Harding on September 21, 1922, our Government gave its indorsement of the pledge which was incorporated in a mandate for Palestine and intrusted to Great Britain.

The average man, the average Jew, knows of Zionism in a general way, and is in accord with its purpose and its activities, and is even willing to contribute funds to help the work along. But, as a rule, it is all so far away and so vague that he does not realize what has been done and what is still to be done. If he could only know what has already been accomplished in transforming this bit of arid country, which is only as large as the second smallest State in the United States, with a total population (Arabs and Jews) aggregating approximately 850,000, less than any one of the boroughs of Manhattan, he would understand the tremendous results that have already been accomplished and the magnitude of the project.

At the time of the Balfour declaration, the Jewish population of Palestine was about 50,000; to-day it is about 175,000, comprising 20 per cent of the total population. These have been drawn from all parts of the world, demonstrating very clearly the strong bond of religion which has given so widely different types the tie which has existed throughout the centuries. Not all who go to Palestine remain there, but the proportion of those who remain over those who find the vicissitudes of a new country too much for them is so great that it has been the source of the most encouragement for the workers who are so earnestly laboring for the Jewish homeland.

Land has been given to the Jewish settlers, tools provided, mortgage and credit facilities given, schools established, and a modern health system introduced by the Hadassah. A sound nucleus has been achieved, and growth should be steady along constructive lines. Through the Jews scientific agriculture has been brought to Palestine. Though the Arabs still use the ancient methods, the example of the Jews has been most salutary, and they are slowly discarding the former in favor of the up-to-date ones. Electricity is available in Palestine through a concession on the Jordan River granted to a Jew. Irrigation work on a large scale has been done; swamps have been drained and arid districts reclaimed for cultivation.

The Keren Hayesod, better known as the Palestine Foundation Fund, supplied the money for the erection of living quarters and farm buildings, the purchase of livestock, agriculture implements, and seeds. Through the Rothschild villages, established by Baron Edmond de Rothschild, of Paris, oranges and tobacco have been added to Palestine's exports.

One of the most important of the activities of the Zionists is the work of the Hadassah medical organization, which has brought healthful conditions into Palestine for the first time in many centuries. Ten years ago Palestine was a land of epidemics, ailments, and diseases. At that time, in the Arab population, a large percentage of the children suffered from the terrible scourge, trachoma, which led to the presence of an unusually large percentage of blind, while many other contagious diseases ravaged the land. Sanitation was completely ignored in the Arab villages, and they were places of pestilence and misery. Hadassah inaugurated health methods modeled after those employed by Colonels Goethals and Gorgas in the Panama Canal Zone. It maintains almost a score of hospitals, many dispensaries, and traveling units, which are available to all the inhabitants, regardless of race, creed, or religion, and is a blessing for which all thank the Jews.

From the earliest days of the Turkish régime, the Jews in Palestine have fostered public education for Jewish settlers. The Arabs were illiterate, but, as a result of the Jewish example, their standards improved and the Palestine government was obliged to erect schools and provide teachers. To-day, the Arab schools are maintained exclusively by the Palestine government, giving the Arabs free education, while the Jewish schools receive but a small fraction of the cost of their school system as a grant from the Palestine government. Every Zionist village has its schools; there are quite a few high schools, a technical school, a number of normal schools, and, chief of all, the Hebrew University on Mount Scopus. The school system of Palestine compares very favorably with the schools in some of the Southern and Western States, except in the large cities. As you undoubtedly know, the little one-room, old-fashioned schoolhouse is still used in parts of the United States.

In this connection, I want to call to your attention the fact that the Palestine government at presents expends about $380,000 a year for the education of the Arabs, but contributed only about $50,000 for the education of the Jews, even though the Jews pay about 40 per cent of the taxes. This situation is obviously inequitable. Jewish education should be provided for the same as Arab education and should receive equal treatment at the hands of the government.

One of the most gratifying achievements is the revival of the Hebrew language, which is now used in school and university, in the factory and farm, on the streets and in the courts, in the textbooks, and newspapers. I am informed that there has just been issued a medical journal by the Jewish physicians of Palestine in the Hebrew tongue, with modern terminology in the Hebrew language.

It was only yesterday that I had the pleasure of speaking to my dear friend, Judge Jeremiah T. Mahoney, who told me of the surprises he met with on his trip to the Holy Land three years ago. He visited Palestine and the surrounding country and was amazed at the achievements and progress of the settlers, which, of course, were only made possible by the work of the Zionist organization.

Judge Mahoney compared the Jewish settlers with the Pilgrims and Puritans of early American days—the same spirit of determination and self-sacrifice for an ideal of a home and a country. This ideal was realized by the American settlers and is well on the road to materialization for the Jewish pioneers.

He told me that the colonists were deserving of unbounded credit for what has already been accomplished, and that they were entitled to fullest cooperation not only from the Jews but from the Christians throughout the world in the way of money and financial backing, and also in the way of moral and friendly assistance. They were making a garden out of a desert; they were restoring not only for themselves but for the Christian world the spot which is looked on and worshipped as the birthplace and cradle of Judaism and Christianity.

Though Judge Mahoney was greatly impressed with the progress that had already been made, he could also see the potentialities that were lying dormant, awaiting the assistance of the civilized world to bring to fruition.

We must realize that the work once started can not be allowed to stop; that it is up to us to do everything in our power to raise the finances necessary to bring this work to a successful conclusion.

I want to thank you for giving me this opportunity to be with you to-night. I want to assure you that I am always ready and willing to be called on at any time to give you all the assistance I can, personally and officially.

PERMISSION TO ADDRESS THE HOUSE

Mr. GARRETT of Tennessee. Mr. Speaker, I ask unanimous consent that on Tuesday next, following the reading of the Journal and the disposition of business on the Speaker's table, the gentleman from Texas, Mr. WILLIAMS, may address the House for one hour.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

ADDRESS OF HON. WILL R. WOOD

Mr. THATCHER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing the Lincoln Day address of the gentleman from Indiana, Mr. WOOD, delivered at Miami, Fla.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. THATCHER. Mr. Speaker, under leave granted to extend my remarks in the RECORD, I insert the following address of Hon. WILL R. WOOD, chairman of the National Republican Congressional Committee, before the Dade County Republican Club, Miami, Fla., February 11, 1928:

LINCOLN

My friends, we are met to do honor to the memory of Abraham Lincoln. It is altogether fitting that upon the anniversary of the birth of this great American, American men and women of to-day should take thought upon his life and works. For the value of a life is in its precepts which we may emulate. How rich was the life of Lincoln in the examples which make for the highest type of citizenship. How well he understood the spirit of our institutions and came better to understand them as hour by hour and day by day, with patience and with tolerance, but with "firmness in the right, as God gave him to see the right," he grappled with the problems that arose to plague and perplex him. As has been said of him so well by the daughter of his faithful secretary and biographer, John Nicolay:

"The truth is that Lincoln was no prophet of a distant day. His heart and mind were busy with the problems of his own time. The legacy he left his countrymen was not the warning of a seer, but an example and an obligation to free their own dark shadows with the sanity and courageous independence he showed in looking upon those that confronted him."

"An example and an obligation," that was in fact the legacy he left us. An obligation to meet with patience and with courage, in accordance with our ability and our strength, the problems of our times as he met those of his.

Others more gifted than I, on countless such occasions, have painted and will paint the figure of Lincoln in its more heroic outlines. Viewed in the perspective of the waning years, the figure is indeed heroic, and it is well for those so gifted to enrich our literature with the eloquence and the imagery which it so bountifully inspires. For Lincoln was not an ordinary man. He rose above his fellows from obscurity to well-deserved and undying fame. A man of extraordinary ability, native and acquired, he gave to his country in its hour of greatest trial extraordinary services; and not alone by reason of his ability, but, better still, by reason of his faith. Yet I would not have the beautiful word pictures that have been given us remove him too far from the hopes and aspirations of the generation that must grapple with the problems of our day and of the generations yet unborn. I would not have the ideal set so high that we may not hope to approach it.

For, my friends, Abraham Lincoln was very human—a man who approached his problems much as other men, in uncertainty and sometimes in fear, whose purposes were often misunderstood, whose later strength grew out of his earlier failures, and who never for an instant regarded himself as heroic.

It may well be said of him, as was said of an earlier great American by a gifted orator of our day, that "if he had been impeccable, incapable to err, with no trace about him of our human clay, a Titan in strength, but with no touch of weakness, we should be honoring to-day the birth not of a man but of a god. A superb flower of our race, he was still a man and he is nearer to us because he was a man." Let us strive to keep Abraham Lincoln near to us, or, rather, let us keep as near to him as we can.

My friends, I am a believer in political parties. I believe it is the duty of every citizen to belong to a political party; for ours is a government of parties, and we can change it from the form that has stood the test of time to something—we know not what—no less surely by open revolution than by breaking up into groups, cliques, and blocs, vainly seeking our narrow, selfish, and sectional ends. Under our form of government, the parties receive their commission from the people and are held responsible by the people for the conduct of public affairs. They go before the people in biennial and quadrennial elections to make an accounting. If a party's ability to carry out its policies be destroyed by the destruction of party loyalty and party solidarity, then its responsibility for government is destroyed, for the people can not hold cliques and blocs to an accounting.

Notwithstanding, therefore, that it has become somewhat the fashion among the new intellectuals, living in that rarer atmosphere denied to less fortunate mortals, to deride political parties and ridicule party spirit, it is a source of much gratification to me to know that Abraham Lincoln also believed in political parties and that he joined one—the Republican Party.

He joined the new Republican Party because, after the deliberation characteristic of him, he decided that it most nearly fit his views, and that through its medium he could best accomplish his purposes. He might have held aloof because he thought there were designing and scheming men in the party who sought to use it for their selfish ends, or because his growing law practice demanded all of his time, or for any one of the innumerable reasons that men of his day and ours have shirked the duties of citizenship. But he took the time from his private affairs to enter the party councils and plan with his party associates for the good of his party and the good of his country and against the schemers who sought to serve only their selfish ends. From all that I can learn of him I do not think that if he lived and wrought in this enlightened age he would care greatly whether the party council in which he was engaged was called a "conference" or a "caucus" so long as he believed that in the main its purposes were for the best interests of the country as a whole.

Lincoln was a party man who thought, spoke, and wrote along party lines. In the truer and better sense of the word he was a politician who mixed with politicians of high and low degree. Through this contact he came to know men and gauge their purposes, and out of the knowledge so gained his statemanship grew. Moving too slowly to suit the hot-heads and radicals of his day, he yet moved too fast to suit the doubters, who were reluctant to move at all. Having a main purpose in view, he was politic to accomplish it.

He was not greatly concerned with the minor issues that fretted lesser men and warped their perspective. In his marvelously clear-minded way he waved aside nonessentials and drove straight to his point. He was concerned chiefly with fundamentals, and as a Republican I am glad to remember that more than 20 years before the birth of the Republican Party he took his stand for a principle that was to become a great fundamental principle of that party—the protective-tariff principle. In 1832, when he was a candidate for the Illinois Legislature, being only just past 23 years of age, in what has been handed down to us as his first political speech, characteristic in its brevity and pith, he said:

"Fellow citizens, I presume you all know who I am. I am humble Abraham Lincoln. I have been solicited by many friends to become a candidate for the legislature. My politics are short and sweet. I am in favor of a national bank. I am in favor of the internal-improvement system and a high protective tariff. These are my sentiments and political principles. If elected, I shall be thankful; if not, it will be all the same."

On another occasion he went to the nub of the tariff question when he said in his homely way that he did not pretend to be learned in political economy, but he thought he knew enough to know that "when an American paid $20 for steel to an English manufacturer, America had the steel and England had the $20. But when he paid $20 for steel to an American manufacturer, America had both the steel and the $20."

Though he was but 23 years of age when he made his first political speech, it will be noted that Lincoln was already thinking along national lines. Later he made a careful study of the tariff question, particularly in the campaign of 1846, when it was much to the fore, though but little that he said on the subject has been handed down to us. He was elected to Congress in that campaign and after his election made a further study of the question, as memoranda he then made show, so that he might the better discharge his duties as a Member of Congress, and he became confirmed in his view that a protective tariff was desirable as a great national policy, from which we could not depart without courting disaster.

It is unfortunate that there are but few quotations left to us from Lincoln's speeches on the tariff. But what few there are place him as a very ardent protectionist, and we have the most direct evidence that before the great struggle to preserve the Union came and engrossed his attention he made many tariff speeches, for in a letter to Dr. Edgar Wallace, under date of October 11, 1859, Lincoln wrote: "I was an old Henry Clay tariff Whig. In old times I made more speeches on that subject than any other. I have not changed my views." There can be little doubt that had he been preserved to serve his country during the days of reconstruction he would have again turned his attention to the tariff question and given to it the benefit of his clarity of thought and his enlarged national viewpoint.

For half a century a protective tariff has been regarded as a policy primarily for the benefit of manufacturers. Fifty years ago this view prevailed in the agricultural West, then just being developed. At that time the Mississippi River Valley, and the plains States, were spoken of as the granary of the world. We were a tremendous grain-exporting country. Land, at that time, was cheap, and apparently the supply was inexhaustible. The great western prairies were unfenced. Cattlemen started feeding great herds on the Texas prairies and drove them north as the season advanced to live on the fat of the land, unstaked and unclaimed. Labor was cheap. As a result, the western cattlemen and grain grower did not need, for their direct protection against foreign competition, any tariff. They could undersell the world and did do so, not only in domestic markets, but in foreign markets. Canada was still untouched as an agricultural country, the Argentine was practically unsettled; so was Australia and New Zealand.

The South shared this attitude toward the tariff. It was not only an agricultural section but a "one-crop" agricultural section. Its crop was cotton. It produced and exported approximately 60 per cent of the world's supply of cotton. Naturally, it needed no tariff to protect its only product which entered into the domestic and world markets. It opposed the policy of protection for other products, either agricultural or industrial, for it, too, was wedded to the belief that such a policy would increase the cost of all commodities it purchased (which was not true), and to the equally erroneous belief that even if protection had prospered other sections of the United States, the South would in no way benefit by such prosperity.

Years ago the agricultural West abandoned its opposition to a protective tariff. All its land was developed, its broad prairies were divided into relatively small farms, cheap labor had disappeared; modern farming methods demanded the introduction of machinery; the development of the country, such as the building of roads and irrigation plants, the setting up of governmental machinery, etc., tremendously increased taxes. The natural migration to the West created a demand for land which exceeded the supply and rapidly enhanced land values. The result of all this was an increase in the cost of production of grain and cattle. Simultaneously with this came the opening, the settlement, and the development of our three chief agricultural competing countries—Canada, Australia, Argentina.

The agricultural West soon found those countries were able—by reason of the very conditions which had favored it in the earlier days—to undersell our agricultural products not only in the foreign markets of Europe but in the American markets. It has been scientifically and officially determined that Canada can raise wheat at from 40 to 50 cents on the bushel less than can the grain growers of our Western States. It has been ascertained by exhaustive investigations that the Argentine can produce a bushel of corn for one-third the cost in the great States of Iowa or Illinois, and the Argentine cattlemen can produce a finished product, ready for the market, for 70 cents a hundred, while the best that can be done in this country on our large cattle ranches with the most modern methods is $3.20 per hundred. It has been ascertained that the dairy interests of New Zealand can produce butter at from 22 to 28 cents per pound less than it can be produced by the dairy interests of New York, Wisconsin, or Minnesota.

As a result the farmer of the Middle West has faced the economic facts, and he realizes his very salvation depends upon a protective tariff high enough to prevent these cheaply produced agricultural products from entering his home market.

A change has been going on in the South, and it is still going on. In fact, the South has entered upon a new era. Since the World War it has abandoned its "one-crop" system of agriculture. It is raising no less cotton, but it is raising a great many other things to which it formerly paid no attention. It is diversifying its crop products. It is engaging in fruit growing. It has developed into the market garden of the United States. It is engaging in the livestock industry.

Out of these changes in the agricultural situation in the South there is developing an economic change and a new political viewpoint. Southern interests realize that they now need protection. There is ample evidence of this. Declaring that "the protective-tariff principle is a recognized and extensively adopted program of our National Government," the Florida State Chamber of Commerce has memorialized Congress for higher duties upon such products as citrus fruits and vegetables, which are produced in Florida. Similar requests were made by the Florida East Coast Growers' Association, who not only went on record in favor of protective tariff on all such products but sent a delegation to Washington and filed a formal petition with the United States Tariff Commission.

At the annual convention of the Sheep Raisers' Association of Texas, held in August of last year, a resolution was adopted reading:

"We hereby agree that we will support in 1928 only those candidates for Congress and the United States Senate who will publicly declare in favor of a national policy of a just and equitable tariff protection."

Associations representing peanut growers of the States of North Carolina, Florida, Georgia, Louisiana, and Virginia have filed formal petitions with the United States Tariff Commission asking for increased tariff rates upon peanuts and peanut oil. Another petition filed with the United States Tariff Commission by Mr. L. B. Jackson, manager of the Georgia State Bureau of Markets, is signed by nine southern Democratic governors, protesting against reduction in the duty on vegetable oils. The nine Democratic governors of the Southern States who so affixed their signatures to this petition were: Clifford Walker, Georgia; Henry L. Fuqua, Louisiana; John W. Martin, Florida; M. E. Trapp, Oklahoma; Thomas G. McLeod, South Carolina; Austin M. Peay, Tennessee; Tom J. Terral, Arkansas; W. W. Brandon, Alabama; Henry L. Whitfield, Mississippi.

In taking this attitude, the South is merely returning to the doctrines of such Democrats as Thomas Jefferson, James Monroe, and Andrew Jackson. These earlier statesmen, to whom the Democratic Party now points as the founders of its faith, well knew that the first essential of political independence was economic independence, and that economic independence could not be attained by permitting the labor of other nations to perform the work which should be done by the labor of this Nation.

Thomas Jefferson stated, "My own idea is that we should encourage home manufactures to the extent of our own consumption of everything of which we raise the raw materials."

In 1817, in accepting the election to membership in a society for the encouragement of domestic manufactures, he said:

"The history of the last 20 years has been a significant lesson for us all to depend for necessaries on ourselves alone; and I hope 20 years more will place the American hemisphere under a system of its own, essentially peaceable and industrious, and not needing to extract its comforts of the eternal fires raging in the Old World."

James Monroe in his inaugural address said:

"Our manufacturers will likewise require the systematic and fostering care of the Government. Possessing, as we do, all the raw materials, the fruit of our own soil and industry, we ought not to depend, in the degree we have done, on supplies from other countries. Equally important is it to provide at home a market for our raw materials as by extending the competition it will enhance the price and protect the cultivator against the casualties incident to foreign markets."

Andrew Jackson, in a speech in the United States Senate in 1824, said:

"Providence has filled our mountains and our plains with minerals—with lead, iron, and copper—and given us a climate and soil for the growing of hemp and wool. These being the greatest materials of our national defense they ought to have extended to them adequate and fair protection, that our manufacturers and laborers may be placed in a fair competition with those of Europe; and that we may have within our country a supply of those leading and important articles so essential in war. We have been too long subject to the policy of British merchants. It is time we should become a little more Americanized; and, instead of feeding the paupers and laborers of England, feed our own; or else in a short time by continuing our present policy (that under the low tariff of 1816) we shall all be rendered paupers ourselves. It is my opinion, therefore, that a careful and judicious tariff is much wanted."

Henry Clay, in a notable speech in support of the protective tariff of 1824, outlined a situation which almost exactly parallels that of to-day. America's prosperity, he said, had been based upon an abnormal foreign demand, caused by the European wars—those of Napoleon and the lesser wars immediately following. With the advent of peace in Europe, he said, this demand was discontinued and there was lacking a market for American goods. America's agricultural productive power was developed beyond the possibility of absorption by Europe. What the United States needed, then, was a market for these products, the development of manufacturing industries and a manufacturing population, which would create such a market and would create such a variety of industries as to insure steadiness of the market. But, Mr. Clay said, without Government protection against the competition of foreign producers, domestic industry could not be established and maintained. A tariff which he then and there christened as "the great American policy" was necessary to insure the growth, the prosperity, and the stability not only of American industry but American agriculture.

That position was logical then. It is logical to-day. That was good American doctrine then. It is good American doctrine to-day. That was good Democratic Party doctrine in the days of Jefferson, Monroe, and Jackson, and if the Democratic Party is not to be wiped out in the South it must return to an advocacy of those principles to-day.

It must be realized that the American people go up or down together, they prosper or they suffer together, they progress or they decline together. What benefits the North and West and East must of necessity benefit the South. What causes business depression, industrial stagnation, general depression, and hard times in other sections of the United States has a similar effect upon the South. You people here in the State of Florida certainly realize that economic axiom. You are producing for northern consumers. Your prosperity depends upon the prosperity of those consumers.

The further development of your State and the several communities within your State, depends wholly upon the prosperous conditions of the other sections of the United States, not only because they are your customers, but because out of their surpluses, money is sent here to be invested for the purpose of assisting in your further development. These are basic truths, and yet, strange to say, the Democratic Party and free-trade advocates, deny them. The Democratic theory of free trade is based upon the false assumption that the American people are divided into two classes—producers and consumers—wholly distinct, absolutely separate, with interests that are sharply antagonistic. There is no such division. There can be none. Every consumer is a producer. Every individual produces something and consumes products of others. Any proposition which seeks to create such a division where none exists, and then seeks to prosper the so-called consumer at the expense of the so-called producer, is dishonest and dangerous. If adopted, it brings ruin to everyone. That is why hard times have resulted from every low tariff law enacted in the United States.

The Democratic Party, in order to carry out this theory that the producer and the consumer are two distinct classes eternally at warfare, urges the agricultural interests to destroy the tariff on industrial products so that they may buy manufactured goods from the cheapest industrial producers in the world. You have heard that doctrine preached in this community. But you may not have heard and you may not know that the Democratic free-trade orators of Tammany Hall urge the city wage earner to destroy the tariff on all agricultural products, including lemons and fruits of all kinds, in order that he may buy food from the cheapest agricultural producers in the world. You may not know that the Democratic free-trade speakers in the Middle West tell the grain farmer that there should be less tariff on fruits and nuts and vegetable oils, as well as manufactured products such as steel, pottery, and clothing, in order that he might reduce his living costs, and you no doubt have heard within your own community Democratic free-trade speakers tell you there should be no tariff on grain and meat products which are produced in the Central West.

In other words, the whole Democratic argument of lower tariff is essentially and fundamentally dishonest, because it would have each one to whom it is directed believe he would prosper by the inauguration of an era of cheapness for the products and labor of everyone else. It holds out to him a dishonest impression that this can be done without at the same time inaugurating an era of cheapness for the products of his own labor and land and a corresponding reduction in his own wage and income.

Free trade sets up "cheapness" as an economic ideal—a theory which has brought decay and ruin wherever put into practice. Cheap nations are backward, impoverished, and illiterate. A people with "cheapness" as a model have low, cheap standards of living, pauper wages, and lead a miserable, almost hopeless, existence.

The underlying philosophy of free trade is fallacious and dangerous, and whenever applied in the United States it has proved destructive of national and individual prosperity and has retarded human progress. It sets up cheapness as a standard of perfection in the economic world. No nation ever prospered or progressed with such a standard. Cheapness destroys initiative and prevents development. Benjamin Harrison said: "A cheap coat makes a cheap man." The primitive agricultural methods of cutting wheat with a sickle and separating the grain with a flail or by the tramping of animals are cheap, but no progressive nation indulges in those agricultural methods. Handmade goods by old women

and little children are cheap. Sweatshop labor is cheap. Coolie labor is cheap. Peon labor is cheap. Cheap products inevitably mean cheap labor—sweated labor, peonage, ignorant, illiterate labor. Cheap labor means cheap homes and low, cheap standards of living. No nation which clings to the false economic standard of cheapness has made any progress during the last hundred years. There are some in Europe, some in Asia, and some in Central and South America. They are not the abode of prosperity nor the dwelling place of contentment. Their standards are not those which the American worker and the American farmer chooses to follow.

Every time the Democratic Party persuades the American people to adopt a low tariff the free trader's ideal of cheapness is realized. Everything is cheap under a Democratic tariff, and nothing is cheaper than human labor, for millions then vainly seek employment. Farm products are cheap under a Democratic tariff, because they can not find a market at any price. Imported goods are cheap under a Democratic tariff, but the worker without a job and the farmer unable to market his crops have no money, so the bargains of cheap foreign goods are enjoyed only by the rich. Nothing is cheap to the individual who has no money and no source of income.

The cheapness attained during low-tariff eras is that brought about by destroying the purchasing power of American consumers and thus producing what we call "hard times." Once domestic production is destroyed, foreign producers may charge what they like.

The era of cheapness inaugurated by a Democratic tariff is always a period of disaster for America and her people. The progress of the individual, the community, and the Nation is financed out of accumulated savings. Savings are what is left of the pay in the envelope after the regular household expenses have been met. Savings are what is left of the proceeds of the year's crops or the year's business after the necessary expenses have been met. But during periods of Democratic tariff there are no pay envelopes; many of the crops are never sold, frequently never harvested. Business and commerce produce no surpluses; they operate at a loss and frequently discharge their help and close their doors. Savings do not accumulate under a Democratic tariff. To the contrary, they diminish. The accumulations of Republican prosperity are drawn upon during the operation of a Democratic tariff to tide the American people over the period of hard times.

There is complaint upon the part of the fruit growers and the vegetable growers of this State that the tariff is not high enough upon such products. You are feeling competition from citrus fruits grown in the Mediterranean countries, from other fruits grown in the Caribbean Sea territory, from vegetables grown in Italy and Spain, the West Indies, and Mexico. You are beginning to realize the destructive possibilities of cheap foreign products raised on cheap land, of cheap labor. You are beginning to realize the menace of the Democratic theory of cheapness as an ideal condition. You are beginning to realize the fact that you can not buy cheap stuff unless it is produced cheaply, and if it is produced cheaply the producer must suffer.

I am not any too familiar with the fruit and vegetable industry, but I believe I am correct when I state that one of the underlying principles of your industry in connection with the marketing of your product is a constant striving to "grade up" your goods. That is exactly the position of the Republican Party in regard to all products. It believes in a policy which will enable the manufacturer, and the farmer, and the cattleman, and the vegetable grower, and the orchardist to "grade up" his product, to put quality into it. The Democratic Party, on the other hand, stands for a policy of grading down everything, of opening our customhouses to a perfect flood of cheaply made articles and cheaply grown articles from every quarter of the globe, and thereby forces all the American producers, whether on the farm or in the factory, on the cattle ranch or in the orange groves, to grade down his product in order to meet the cutthroat competition from abroad.

The Republican Party holds that such a policy will drive this country into complete and hopeless bankruptcy. It says to the fruit growers and vegetable interests in Florida that if the tariff is not high enough—and it is not, according to the best information at my command—the remedy is not to turn to that party which is opposed to a protective tariff but to rally around and uphold the hands of that party which believes in a protective tariff and which is willing at the first opportunity to increase still further the schedules which are now upon the books.

What relief do the fruit and vegetable growers of the State of Florida expect if the Democratic Party regains control of Congress and writes a new tariff law? If you think your tariff is too low now, I have only to refer you to the last Democratic tariff act, the Underwood tariff, and cite you some of the differences in rates under that tariff and the present Republican tariff.

One reason the South and southern products do not have sufficient protection under the present tariff bill is because they had no one in Congress to represent them when the bill was framed. Your Senators and Members of the House of Representatives were free traders and they took no particular pains to see to it that adequate protection was given the particular products of this State. So long as you send Democratic free traders to Congress to represent your interests, you are going to get your interests represented according to the Democratic theory of a low tariff. Even if your own Representatives are disposed to write a bill giving you adequate protection, they can not do so if their party is in control.

Ladies and gentlemen, I have discussed at some length this subject of the tariff as affecting the South, for I believe it is vital to your interests here in Florida. It may seem a prosaic subject as compared to the great drama of events through which Lincoln moved, a heroic figure, yet I say to you my fellow Republicans it is not a prosaic question when you come to consider how vitally it affects not only your interests here but the material well-being of 120,000,000 of people throughout this broad land. The principle of a protective tariff is a great national policy which was under assault in Lincoln's time as it is to-day. It was worthy his study and defense and, as Republicans proud to follow in his steps, it is worthy of ours.

My friends, I want to leave this one further thought with you before I close, because it also has a peculiar application to our times. Abraham Lincoln was the friend of the downtrodden and the oppressed. He believed in equality and liberty, but with his clear insight he perceived there could be no equality and no liberty without respect for order and law. He recognized that both labor and capital have rights that must be regarded if we are to have industrial peace in justice to all, that a minority has rights that must be respected by the majority, else we would have tyranny, but first and foremost he was for the Constitution and for the enforcement of the laws enacted under the Constitution. If we were to have change, it was to be orderly change. No individual nor group of individuals had rights superior to the will of the majority, as duly expressed in the laws of the country.

In his early manhood he gave beautiful expression to this thought in a speech that can not be too often quoted. After pointing out that our gravest danger is not from without but from within, he said:

"Let reverence for the laws be breathed by every American mother to the lisping babe that prattles on her lap; let it be taught in schools, in seminaries, and in colleges; let it be written in primers, in spelling books, and in almanacs; let it be preached from the pulpit, proclaimed in legislative halls, and enforced in courts of justice; and, in short, let it become the political religion of the Nation; and let the old and the young, the rich and the poor, the grave and the gay of all sexes and tongues and colors sacrifice unceasingly upon its altars."

Let us hope that the Government for which Abraham Lincoln gave so much and the country that he loved so well will be protected against all insidious and evil influences that he would have plucked like thorns from the body politic, and that the Old Flag that he loved so well may continue unsullied and untarnished from within as it has thus far remained unsullied and untarnished from without. To him the flag meant all that Riley has had it say that it means:

"By the driven snow white and the living blood red
Of my bars, and their heaven of stars overhead—
By the symbol conjoined of them all, skyward cast,
As I float from the steeple or flap at the mast,
Or droop o'er the sod where the long grasses nod—
My name is as old as the glory of God."

In every mountain range there are a few lofty peaks that tower high above all other surrounding peaks. Since the beginning of the human race every age has produced a few characters with such transcendent genius in literature, statesmanship, art, or invention that their names will never be forgotten, and their influence will be as lasting as time.

Now that the animosity and bitterness of his time are forgotten, the fame of Abraham Lincoln will appear like one of the lofty mountain peaks to which I have referred, and his name will be forever written among the first of the few immortals that will survive the age in which he lived and wrought in so many ways for his fellow men. Monuments of stone and of bronze have been erected to perpetuate his memory, but after the last of these have crumbled into dust and rusted into decay the virtue of his deeds and the goodly influence of his life will remain imperishable as long as men love liberty, and as long as the world remains devoted to the principles of patriotism.

ADDRESS OF HON. FRANK L. BOWMAN

Mr. THATCHER. Mr. Speaker, I further ask unanimous consent to extend my remarks in the RECORD by printing an address delivered by the gentleman from West Virginia, Hon. FRANK L. BOWMAN, at Huntington, W. Va., at the meeting of the Ohio River Valley Improvement Association, October 5, 1927.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The address is as follows:

OHIO RIVER VALLEY IMPROVEMENT

Hon. FRANK L. BOWMAN. Mr. Chairman and members of the Ohio Valley Improvement Association, ladies, and gentlemen, just a little more than two weeks ago I received a very kind invitation from the secretary of this association asking me to be present and speak at the the thirty-third annual convention of the Ohio Valley Improvement Association at Huntington. Forgetting many things that I had set out to do, I accepted, and I find myself in the same predicament as the

old man who was leading his two calves to pasture. Everything went well until he reached the entrance to the meadow. There the calves would not stand while he let down the bars. He conceived the bright idea of tying the lead ropes to the straps of his boots, and just as he was letting down the first rail the calves started down the road, dragging the old man behind them. Finally he landed on the bias against a large tree with a leg on either side of it. The old man's friends came to his rescue, and as they ministered to him, he wiped his face with the shredded remnants of a shirt sleeve, looked up, and said: "Do you know that these pesky critters hadn't gone 300 yards until I knew that I had made an awful mistake?" [Laughter.]

So I am here to-day, my friends, realizing that I made an awful mistake in attempting to discuss the great project that confronts this association.

The recent disastrous flood in the Mississippi Valley has attracted the attention and thought of an entire nation. This catastrophe was a national calamity. It transformed a sectional problem into a national problem of great magnitude and importance. The irreparable losses of life and property have aroused a dormant conscience of our national responsibility and have inspired and charged that responsibility with a fixed determination to conquer and control the "untamed rivers" and to subject and utilize them for the peace, happiness, and prosperity of a great people. Water must no longer be a menace but a means of greater industrial and commercial development. This Nation must conquer and harness the rivers and transform their notorious and destructive waste of water into a great national resource. This is our national responsibility.

Water is our greatest undeveloped resource. The economic value of improved water highways has been recognized by our National Government, because they insure cheaper freight rates, reduce the cost of living, give the farmer and manufacturer broader markets, stimulate industry and commerce, and bring added wealth and prosperity to all our people. In spite of this recognition, many of our inland streams are natural enemies to industrial and commercial progress. If this condition is the result of our national policy, a new policy should be adopted which will comprehend the service of our inland waterways in the economic struggle of our Nation. Herbert Hoover says, "Every drop of water that runs to the sea without yielding its full commercial returns to the Nation is an economic loss." It is our problem to develop the commercial possibilities of our streams—including transportation, power, irrigation, conservation, and reclamation and forever drop the curtain upon our national dramas of destructive floods in which the Mississippi River and other rivers have played dominant and tragic rôles.

From an economic standpoint, the policy of controlling and preventing floods without destroying the commercial utility of our streams is most desirable, and from an engineering viewpoint the program is entirely proper and feasible. This plan would, in a large measure, check and reduce our great national losses from floods and droughts. It would add materially to the economic welfare of our country and its benefits would be reflected in the general prosperity of our people.

On the eastern slopes of the Rocky Mountains several large tributaries of the Mississippi River have their sources. Unmolested they flow through a semiarid territory approximating 2,600 miles in length and 400 miles in width, whose fertility lacks either the seasonable rainfall or irrigation to make it the most productive agricultural region in the world. According to reports, this territory produced one full crop in every seven or eight years. By reason of drought, the crop-page loss in this region last year was $800,000,000. Competent engineers report that it was the huge volume of water from these tributaries that raised the crest of the recent disastrous flood to heretofore unknown heights and added the additional destructive pressure against the levees of the southern Mississippi and caused a national economic loss of almost $1,000,000,000.

It seems anomalous that a destructive flood or an overabundance or a surplusage of water wreaking havoc in one section of the country should have its source in an arid region, which suffers continually from the absence or lack of water. Engineers say that it is both practicable and feasible to impound the flood waters of these mighty tributaries in a series of natural and artificial reservoirs and lakes and divert the waters into channels of irrigation in the arid and semiarid sections of the country when expedient and necessary. This would assist materially in the prevention of floods and at the same time would relieve a large agricultural area from the losses occasioned by drought. This is one phase of a practical comprehensive plan to prevent and control floods without destroying the utility of the water.

The Mississippi River with its tributaries, 59 of which rank as navigable streams, drain 32 States. This enormous watershed reaches from the Rocky Mountains to the Alleghenies, and from the Great Lakes to the Gulf of Mexico. It produces 58 per cent of all manufactured products, 80 per cent of the wheat, 93 per cent of the corn, 84 per cent of the cotton, 96 per cent of the coal, 93 per cent of the iron ore, 70 per cent of the petroleum, 80 per cent of the cattle, 63 per cent of the sheep, and 91 per cent of the swine produced in the United States. Here is the tangible evidence of a great empire of agriculture, mining, and manufacturing, an industrial empire susceptible of sustaining and employing many, many times the present population of the United States. Its industrial and commercial possibilities are beyond the range of human conception. This great region anxiously awaits the freedom from disastrous floods and droughts, and the development and improvement of 16,000 miles of navigable water constituting the largest and greatest system of cheap water transportation in the world. These achievements will permit the United States to enter every foreign and domestic market and maintain her commercial and industrial supremacy among the nations of the world.

In a limited and general way I have mentioned the problems of the Mississippi Valley for the reason that any effort and attempt on the part of our National Government to solve these problems will give greater impetus to the industrial and commercial development of the Ohio River.

We are primarily interested in the development of this great tributary of the Mississippi system. Flowing through the richest valley in the world, which abounds in mineral deposits of untold wealth and an almost inexhaustible supply of fuel, the Ohio River is destined to become a great commercial highway for the economic transportation and distribution of products from the farms and the factories and the mines. With the speedy completion of its improvements for canalization, it is predicted that the Ohio River will carry upon its heaving bosom burdens of trade greater than any other inland waterway and will erect upon its generous banks an incomparable empire of industry.

The commercial possibilities of the Ohio River with a thousand miles of navigable waters are strengthened when viewed in the light of the development of slack-water navigation for 37 miles on the lower Monongahela River. This river is a tributary of the Ohio River and is the greatest inland artery of water transportation in the world. It ranks with the Suez and Panama Canals. With a freight tonnage approximately 25,000,000 tons in 1926, it lacked 1,500,000 tons of equaling the tonnage of the Panama Canal for the same year, and a little more than 2,000,000 tons of equaling the the tonnage of the Suez Canal for the year 1925. The regularity and continuity of transportation and favorable freight rates, which were made possible by the construction of a series of locks and dams, have contributed materially to the industrial supremacy of the Pittsburgh district. The commercial utility of this stream is limited and restricted to the transportation of coal for fuel. By water transportation, it is estimated that the steel and iron industries of the Pittsburgh district save a sum approximating $16,000,000 annually on fuel alone.

With the remarkable accomplishments of the Monongahela River as a key, translate, if you will, the possibilities of the Ohio River, with its navigable tributaries penetrating the coal beds of Ohio, Pennsylvania, West Virginia, and Kentucky, whose combined coal deposits would supply the entire world with fuel for the next 25 years.

It is my understanding that the Ohio River will be completely canalized and made navigable at all seasons within the next few years, provided the Congress of the United States will make the necessary appropriations for the completion of the remaining seven locks and dams. Already 43 locks and dams have been constructed. The demands and needs for the completion of these locks and dams are just as urgent and necessary to-day as they were when the United States Government entered upon its definite program for improving the Ohio River. There should be no backward step. There should be no delay. Every legislative program or plan to solve the problems of the Mississippi River should contemplate immediate and final completion of the improvements on the Ohio River. The construction of locks and dams in the Ohio River is the beginning of flood control in the Mississippi and is the forerunner of commercial and industrial rehabilitation and development of our Nation.

At this point I want to congratulate the Ohio Valley Improvement Association on its noble fight waged and won, and to take this opportunity to express my full sympathy and accord with the objects and purposes of your association. I pledge my every effort to the successful completion of the canalization of the Ohio at the earliest possible date.

As your servant in the House of Representatives of the Congress of the United States, I shall regard it a signal honor of distinction to serve you in your efforts to develop the commercial and industrial possibilities of the Ohio River.

Since the World War we have been greatly concerned about the rehabilitation of the countries of Europe. In a measure, we have forgotten our national problems of rehabilitation and turned our eyes and outstretched hands of sympathy to the war-torn countries across the sea. The problems of Europe were our problems. No country could reclaim or redeem itself without the aid of America was our controlling thought. In settling our war claims with the countries of Europe, we canceled all obligations of money loaned them during the war and adjusted our claims by demanding payment of money loaned them after the war. The terms of these settlements give the debtor nations 65 years in which to liquidate their debts at a very small rate of interest, while we pay our own national indebtedness at the rate of $1,000,000,000 annually. I am not criticizing the lenient attitude of America in adjusting these claims. The settlements were based upon the capacity of the debtor nations to pay. They were just and equitable. I mention these things to show America's generous part in the rehabilitation of Europe.

I agree with our able Secretary of the Treasury, who, in my mind, is without a peer in the financial world, that the best way to get rid of a debt is to pay it.

That is the financial policy of our Government, and you will agree with me that it is sound. But we must not forget and neglect our own national problems of rehabilitation, which include the control and prevention of floods and the development and improvement of our inland waterways. If the prompt payment of our national war debt prevents or interferes with the commercial and industrial progress and rehabilitation of our own country, then America should avail itself of the same advantages and the same privileges granted by it to the debtor nations of Europe.

Our debtor nations of Europe have made amazing progress in the development and advancement of industry. The productive capacity of Europe is more than 25 per cent greater than it was before the war. Spurred and goaded by the necessity of reconstruction, they contended valiantly for economic self-efficiency. Tariff barriers were hastily erected to protect infant industries. Governments assisted and aided industry. Water power was developed. Streams were made navigable. Only by an intensive industrial development could Germany meet her crushing indemnity, and only by the same means could France and Belgium rebuild their devastated countries. The great World War demonstrated the capacities and capabilities of each national unit, and peace accentuated all economic forces to maintain industrial supremacy and seek new markets for their products.

Out of the rising tide of industrial competition comes the new tariff law of France which is a direct challenge to America.

This is the same France whose debt to America well-meaning Congressmen want us to cancel. This law embodies the principles of a protective tariff and free trade.

Against the products of America it raises a high protective barrier of excessive duties, while Germany and Belgium may enter the same products at a very low rate of duty. It creates favored nations. It discriminates against America. It is an embargo against the products of America.

This law is not without its significance. It denotes a new alignment in the economic world. It eliminates territorial boundaries, dissolves the social and political traditions of centuries, and creates a new economic nationalism. It represents an industrial coalition against the United States. In the mad struggle for the world's trade, it is Europe against America. It is the unification of Europe in industry and commerce, which threatens the economic supremacy of America.

Will America accept the challenge? America is the largest and richest Nation in the world. It is not dependent upon any other nation. It has within its broad boundaries the natural resources so necessary and essential in the economic welfare of nations. America should develop these resources to compete with a rejuvenated Europe in the trade of the world. It should turn its attention to our national problems and forget for a time the problems of Europe. To us international problems are not as serious as our internal problems. It should prevent the economic losses from floods and droughts, and develop and improve the navigability and utility of our inland streams. It should take its meddlesome fangs out of business and peace prattling about Government control and regulation of industry. It should encourage and aid industry and commerce by stimulating production and by developing, producing, and protecting markets. These things will inspire confidence and insure the stability and permanence of our industrial supremacy. By doing these things, we shall know that America has accepted the challenge. [Applause.]

ADDRESS OF HON. REGINALD M'KENNA

Mr. STRONG of Kansas. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include therein a speech of the Right Hon. Reginald McKenna, former Chancellor of the Exchequer of Great Britain, on the Federal Reserve System, and the comments of the London press thereon.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. STRONG of Kansas. Mr. Speaker, in compliance with the unanimous consent granted by the House to extend my remarks in the RECORD and to incorporate the address of the Right Hon. Reginald McKenna as chairman of the board of stockholders of the Midland Bank (Ltd.) of London, I wish to say that the Midland Bank (Ltd.) is the largest privately owned bank in the world, with assets equivalent to about $2,000,000,000. This report of Mr. McKenna's speech was printed in the London Times of Wednesday, January 25, 1928, and gives Mr. McKenna's views as to the control of the value of gold exercised by the American Federal reserve system through its open-market operations and its changes in the rediscount rate and by other means.

Mr. McKenna is a former Chancellor of the Exchequer of Great Britain, and his observations on financial and economic questions are given great weight by students of these questions throughout the world. I think the country will appreciate being advised of Mr. McKenna's views, and I hope the Members of the House will study the same with great care. It has a special bearing upon legislation which I introduced at the last session and which I will reintroduce in the near future, which will have as its primary object the direction to the authorities of the Federal reserve system to exercise their great powers to promote stability in the purchasing power of gold, meaning the purchasing power of American money.

To have an idea which I have been presenting to the Banking and Currency Committee of the House and advocating in public addresses for two years, and which has from time to time been treated as an impossible dream by some financiers of prominence and some of the officials of the Federal reserve system, now treated thus seriously on so formal and important occasion by possibly the leader of the banking fraternity of the world is exceedingly gratifying to me, especially as I expect in the near future to direct the attention of this Congress and the Nation to the need of stability in the purchasing power of our dollar, to the end that serious inflation and deflations may be avoided, and which my study of the question has convinced me may be and has been for three or four years influenced and controlled through the use of the great powers which we have given to the Federal reserve system and which I am insisting shall be adopted as a policy toward which such powers shall continue to be used.

The speech is as follows:

MIDLAND BANK (LTD.)—GROWTH IN DEPOSITS—SATISFACTORY PROFIT AND LOSS ACCOUNT—SEVENTY-SEVEN ADDITIONAL BRANCHES OPENED—NEW CAPITAL ISSUE—TERMS OF THE OFFER TO SHAREHOLDERS—CREDIT-CONTROL PROBLEMS—DEVELOPMENTS OF MONETARY POLICY IN AMERICA

The ordinary general meeting of the shareholders of the Midland Bank (Ltd.) was held at the Cannon Street Hotel, London, E. C., yesterday for the purpose of receiving the report and balance sheet, declaring a dividend, electing directors and auditors, and transacting other ordinary business.

The chairman (the Right Hon. R. McKenna), who was received with cheers, said:

"My lords, ladies, and gentlemen, a year ago I ventured to suggest that there should be an inquiry into the working of our credit and currency system. The suggestion was not made in a critical or controversial spirit, but I thought it possible, as I still do, that an examination of the provisions of the bank act of 1844 would show that they are not well adapted to our actual requirements. It appears, however, that the treasury see no sufficient reason for an inquiry, which they think might have unsettling effects in many directions. Although I can not agree with this opinion, I do not propose now to press the matter further. To-day I shall turn to another subject and ask you to consider the present position of gold as an international standard of value.

"Nearly three years have elapsed since the pound sterling was re-established on the gold basis, and most of the important currencies are now stabilized in relation to gold. This general reversion to gold gives the appearance of a return to pre-war conditions in matters of credit and currency, but if we look further into the question we shall find that there has been a remarkable change. The development of central bank policy in the United States has shown that, while gold may be retained as a medium for making international payment, it can be deprived of its function as the ultimate standard of value. How this came about, the stages through which American policy has passed, and the meaning of the conclusion deserve our close attention.

PRE-WAR CREDIT SYSTEM

"Let me begin by reminding you of the conditions before the war. At that time the central banks adopted a purely passive attitude with regard to the control of credit, allowing the movement of gold into or out of a country to regulate the internal supply of money. If gold flowed in freely, credit and currency expanded; if more credit was created than was required to support the current growth of business, prices rose. If gold flowed out, credit and currency contracted; the growth of business was checked and prices showed a tendency to fall. It followed from this that the current course of world prices was determined by the supply of monetary gold. This does not mean that other causes, such as improved methods of production and communication, do not affect the price level, but these only come into play over more extended periods of time.

"This passivity of the central banks probably arose from the peculiar structure of the British central banking system. London was then the unchallenged financial center and free-gold market of the world. In addition, Britain, as the world's principal creditor, was the main source of supply of new capital, and international trade was for the greater part financed by sterling bills. These various factors taken together constituted London the point through which a surplus or scarcity of gold made its influence felt, and the British price level was the medium through which gold operated on the price levels of

all other countries. Under the British central banking system only a small part of the country's total gold holding was available to meet a demand. So small, indeed, was the primary reserve in relation to the demands which might possibly be made upon it that the principal aim of our central-bank policy was to protect it from withdrawals of gold, even when these were really of quite moderate dimensions in relation to the total stock in the country. The movement of gold became a matter of the utmost importance, and the means of counteracting its influence on the supply of money and the course of prices hardly existed. In these circumstances there was little scope for the formulation or exercise of conscious policy, and the principles of central-bank credit control remained undeveloped, if not unknown.

POSTWAR GOLD PROBLEMS

"The first authoritative suggestion that gold movements need not have predominant importance in the control of credit and currency appeared in the recommendations of the International Economic Conference held at Genoa in 1922. The financial commission appointed at that conference, perhaps the most important of its kind that has been held, were deeply impressed by the danger of a gold shortage. As advised by most of the leading authorities, the commission took the view that a scarcity was to be looked for in the absence of any unforeseen developments in production. They were alarmed at the prospect of the supply of gold to the principal trading countries of the world becoming inadequate to provide for such an expansion of credit and currency as would be needed to meet the requirements of growing trade. Accordingly the commission's recommendations were aimed at economizing the use of gold, and one of their main suggestions was that instead of reverting to the pre-war system under which each country held its own gold stock, gold-exchange standards should be adopted by most countries, leaving only a few to hold the ultimate metallic reserves for the entire world.

"The purpose of the conference in propounding measures to economize gold was undeniably sound, and it is a matter of regret that the suggestions for the adoption of the gold-exchange standards have been widely departed from. The proposal, it is true, was at first incorporated in a modified form in schemes of reorganization in many parts of the world, particularly in central Europe and South America, but unfortunately the system has come to be regarded as merely a step on the road to a full gold standard. Already many countries actually on a gold-exchange standard are unprofitably using their foreign assets in the purchase of gold reserves.

"The eager desire to accumulate metallic reserves is no doubt prompted by the recollection of pre-war practice and ignores our more recent experience, that, even in a gold-standard country, gold need no longer be the controlling factor in the supply of money. This brings me to the example of the United States, and I shall endeavor to outline the stages along which that country has moved in its progress from pre-war to postwar conceptions of monetary policy. If, however, the successive proceedings of the American central reserve banks are to be fully understood, we must continually bear in mind a general proposition which lies at the root of monetary theory and to which I have referred on several previous occasions.

CENTRAL-BANK CREDIT CONTROL

"Stated in the briefest terms, the proposition is that every central-bank purchase and every loan by a central bank increases the cash resources of the other banks and provides the basis for an expansion in the volume of credit, or, in other words, of money; while every sale by a central bank or repayment of a central-bank loan reduces bank cash and restricts the supply of money. This proposition holds true whatever the central bank may purchase or sell, whether it buys or disposes of gold, bills, securities, or any other asset. From this it follows that central banks possess the power to regulate the supply of money irrespective of gold movements. According to their view of trade requirements they may, if they choose, wholly or partially offset a purchase of gold by a sale of other assets or a sale of gold by a purchase of assets. Obviously this power has always been inherent in a central-bank system, and, apart from its ordinary day-to-day business, the Bank of England used from time to time in pre-war days to make purchases and sales of assets other than gold. But such transactions were only undertaken as an auxiliary to bank rate policy, which was itself determined by actual and potential movements of gold. Purchases and sales of gold were alone regarded as the effective control of the volume of bank cash and consequently of the supply of money.

AMERICAN EXPERIENCE

"I come now to the story of the recent development of monetary policy in the United States. In consequence of the enormous accumulation of gold, coupled with movements into and out of the country on a scale which if left uncontrolled would have proved disastrous to the stability of the American price level, the attention of the reserve banks was forcibly directed to their controlling powers. Beginning with only a partial use, in the course of time they have learned to utilize these powers to the full. All the stages in the development of American practice can be seen in the 13 years since 1914, which I divide into five periods. Each of these is marked by distinctive gold movements, and I propose to show how the resulting problems have been successively dealt with.

PERIODS OF INFLATION

"The first period runs from the outbreak of the war to the middle of 1919, and covers the beginning of the great westward flow of gold to America. All the incoming gold, amounting on balance to over one thousand million dollars, was purchased by the Federal reserve banks, and following pre-war practice was allowed to become the basis of additional credit. As if this were not enough, the central institutions created a further basis of credit by discounting bills for member banks for very large sums, and thus the ground was laid for the vast expansion of credit which actually occurred. The demands for credit on this inflationary basis were insatiable. No sufficient measures for counteracting the effect of the incoming gold had yet been adopted, and inflation ran a free course.

"The second period runs from the middle of 1919, when the war-time embargo on gold export was removed, to the late summer of the following year. During this period dollar balances owned by South American and Far Eastern countries were withdrawn in gold, and America lost a net amount of nearly $400,000,000. The export demand was met by the reserve banks, but it should be noted that the sale of this gold did not permanently deplete bank cash. Under the influence of the current inflation the reserve banks continued freely to discount bills and buy earning assets to such an extent that the supply of bank cash was considerably increased, and an enlarged basis was provided for further credit inflation.

SCIENTIFIC GOLD CONTROL

My third period covers more than four years and extends from the summer of 1920 to the last month of 1924. This period was marked by continuous imports of gold, and already in the early years we perceive a growing anxiety on the part of the central banking authorities with regard to the inflow. They realized that if the gold were allowed to function to the fullest extent it would lead to a further expansion of credit and a perpetuation of the evils of inflation. They determined therefore, as far as possible, to deprive the incoming gold of its credit-creating capacity until the demands of trade should call for a larger credit basis.

The period I am now reviewing falls naturally into two parts; in the first the gold was neutralized, in the second it was allowed to form new bank cash. In the first two years, which covered the liquidation following the postwar "boom," one thousand million dollars of gold were imported and bought by the reserve banks. The immediate effect of the purchases was to increase bank cash, but the whole of this increase was used by the member banks to pay off maturing bills held by the central banks, and on balance the volume of bank cash was unchanged. During this time policy was at work. The gold was absorbed by the reserve banks and held by them in place of discounted bills. This process of acquiring gold in lieu of interest-earning assets was expensive and severely curtailed the income of the reserve banks. But their object had been achieved. The effect of the inflowing gold had been nullified in accordance with the dictates of policy, and pre-war practice was in process of abandonment as unsuitable to the novel conditions confronting the American authorities.

"TREATMENT OF INFLOWING AND OUTFLOWING GOLD

"During the second half of the period the inflowing gold was treated in an entirely different manner. Industry was recovering from the slump, trade was in process of development, and the banks were being called upon for larger supplies of money. The necessary credit expansion could only be effected upon a broadening basis of bank cash, and the incoming gold was utilized for this purpose. It was paid into the reserve banks and some of it was allowed to form a permanent addition to member banks' reserves. So insistent was the demand for money that bank cash was also provided by reserve bank purchases of securities and other earning assets, the result of the increase in bank cash being an expansion of nearly $8,000,000 in the deposits of all the banks in the country. Incidentally it should be noted that the reserve banks did not themselves retain the incoming gold, but handed it over to the Treasury, receiving in exchange gold certificates, which they put into circulation in place of Federal reserve notes.

"We now come to the fourth period, which, in contrast with that preceding it, was characterized by an outflow of gold. Between December, 1924, and the end of 1925, $150,000,000 of gold were exported from the United States. The whole of this amount was sold by the reserve banks, who did not, however, allow bank cash to contract. As gold was withdrawn the volume of bank cash was maintained by the acquisition of earning assets, so that, notwithstanding the outflow of gold, credit was actually increased in response to the needs of business. At the same time the position of the reserve banks was improved by the attainment of a higher proportion of earning assets.

"My last period covers the 22 months to November, 1927, during which gold again flowed into the United States, though the movement was of relatively small dimensions compared with previous years. The direction of the flow was by no means constant and was complicated in the

later months by earmarkings and releases on foreign account, but whether the movement was temporarily inward or outward the reserve banks continued to ignore it in pursuing their credit policy.

SUMMARY OF AMERICAN EXPERIENCE

"I will now summarize the developments in the years since 1920, the period during which the reserve bank credit policy has been most actively in operation. On balance $1,700,000,000 of gold have been imported into the United States. Over one-half of this amount has been absorbed into the Federal reserve banks, while the remainder has been taken by the Treasury as backing for gold certificates which have gone into circulation in the place of Federal reserve notes. Of the total import only one-third on balance has been allowed to form new bank cash. Throughout the entire period, whether gold was flowing in or out, the central banks have been careful as far as possible to regulate the supply of bank cash in accordance with the needs of business. Trade has expanded rapidly and has been accompanied by a growth in bank deposits amounting in the aggregate to $15,000,000,000, an increase of 40 per cent. Meanwhile, the almost uninterrupted prosperity enjoyed by America has been attended by a large measure of stability in the price level.

TEST OF SUCCESS OR FAILURE

"Here we find ourselves face to face with a definite test of success or failure in monetary policy. Temporary booms can always be obtained by inflationary methods, but it is certain that prosperity on a sound and lasting basis can not be secured except on a fairly steady price level. It must be remembered that, whether we are on a gold or any other standard, the direction in which the price level moves is immediately determined by the volume of money, as modified by its rate of turnover, in relation to the volume of business. If the supplies of money increase beyond the requirements of business, prices tend to rise; if, on the other hand, the supplies of money are inadequate, prices fall. The relation between money supplies and business requirements, viewed in its effect upon the price level, should then be the first care of the central banking authority, and we find on an examination of American statistics for recent years that movements in the price level upward or downward have never been allowed to proceed far. We must therefore conclude that the monetary authorities have met with a high degree of success in the formulation and execution of their policy. This they have done under conditions of great difficulty, brought about by gold movements of unprecedented magnitude.

THE DOLLAR STANDARD

"It is necessary now to observe the bearing of American monetary policy on the operation of the gold standard. To-day, as before the war, the price of gold in America is fixed, and we are apt to assume that the value of gold continues to govern the value of the dollar. But such an assumption is no longer correct. While an ounce of gold can always be exchanged for a definite number of dollars, the value of the ounce will depend upon what these dollars will buy, and this in turn will obviously depend upon the American price level. If the price level in America fluctuated according to the movements of gold, the purchasing power or value of the dollar would still depend, as it did formerly, upon the value of gold. But we know that this is not so. As I have just shown, the American price level is not affected by gold movements, but is controlled by the policy of the reserve banks in expanding or contracting credit. It follows, therefore, that it is not the value of gold in America which determines the value of the dollar, but the value of the dollar which determines the value of gold.

"The mechanism by which the dollar governs the external value of gold is obvious. If the price level outside America should rise in consequence of an increase in the supply of gold, America would absorb the surplus gold; if, on the other hand, the external price level should fall in consequence of a shortage of gold, America would supply the deficiency. The movement of gold would continue until the price levels inside and outside America were brought once more into equilibrium. Although gold is still the nominal basis of most currencies, the real determinant of movements in the general world level of prices is thus the purchasing power of the dollar. The conclusion therefore is forced upon us that in a very real sense the world is on a dollar standard.

THE OUTLOOK

"Such is the position as I see it to-day, and I am naturally led to ask how long it is likely to continue. America is able to control the world price level because of two conditions. In the first place, her gold stocks are so great that she can afford to lose large quantities without running any risk of the gold reserve falling below the legal minimum; in the second place, her central banking system is so constituted that, given her great wealth, she can absorb large quantities of gold and at the same time deprive it of its credit-creating powers. In a word, America is rich enough either to lose gold or to gain it. She holds now one-half the total monetary gold of the world. Moreover, her creditor position constitutes a permanent magnet for gold. Her debtors must pay, and, if they can find no other way, they must pay in gold. The only condition, as far as I can judge, under which America might be drained of her gold surplus is that she should continuously make foreign loans beyond her true capacity to lend. That she will lend excessively at times is quite probable—there are indications indeed that she has done so recently; it is by no means an uncommon practice with ourselves—but that she should overlend so heavily as to make a serious inroad into her surplus gold seems to me very unlikely. I conclude that, as long as conditions remain at all similar to those we know to-day, America will be able to pursue her credit policy without regard to gold movements and to maintain control over the world level of prices.

DEARTH OF STATISTICAL INFORMATION

"Let me repeat that I speak of conditions as I see them to-day. Taking a view of the world as a whole it is evident that a great advance has been made since the time when gold was the main determinant of the direction of the price level. But we have still some way to go before we attain full understanding of the principles upon which the volume of credit should be regulated in relation to business demands. We know that the proper control of credit by the central bank in any country is a very important factor in trade prosperity and that a guiding principle in the exercise of this control should be the maintenance of a stable level of prices. But this is not all; there is still a wide field for inquiry on both the practical and theoretical sides. Unfortunately, however, the dearth of statistical information is a grave difficulty in the way of investigation. Individual banks can not do much; it is useless for them to publish more than the customary details at present disclosed in their periodic statements, since no sound generalization can be deduced from banking figures unless they relate to the banks as a whole. Cooperation between all the banks, including the central bank, in publishing the statistics required by scientific students would help us materially in the solution of some of the problems of credit control."

[From the London Daily Express, January 25, 1928]

WORLD POWER OF THE DOLLAR—MR. MCKENNA AND THE GOLD BASIS—UNITED STATES CONTROL

"Although gold is still the nominal basis of most currencies, the real determinant of movements in the general world level of prices is the purchasing power of the dollar. The conclusion is forced upon us that, in a real sense, the world is on a dollar standard."

This statement was made yesterday by Mr. Reginald McKenna, presiding over the ordinary general meeting of the shareholders of the Midland Bank (Ltd.), in London:

"That is the position as I see it to-day," he continued, "and I am naturally led to ask how long it is likely to continue. America is able to control the world price level because of two conditions.

"Her gold stocks are so great that she can afford to lose large quantities without running any risk of the gold reserve falling below the legal minimum, and, in the second place, her central banking system is so constituted that, given her great wealth, she can absorb large quantities of gold and at the same time deprive it of its credit-creating powers.

"America will be able to pursue her credit policy as long as conditions remain at all similar to those we know to-day, without regard to gold movements, and to maintain control over the world level of prices."

Mr. McKenna concluded on an optimistic note:

"There has undoubtedly been a great improvement in the relations between capital and labor, while it has given us all great satisfaction to note the gradual but steady recovery of our trade following the grave difficulties through which this country passed in 1926.

"I am hopeful that these tendencies will gain in strength. I do not suggest we have any cause for unbounded optimism. The problems yet before us are numerous and complicated, but the background is brighter than a year ago."

[From the Manchester Guardian Weekly, London, Friday, January 27, 1928]

THE "DOLLAR STANDARD"—MR. MCKENNA'S VIEWS

Mr. McKenna devoted the main part of his speech to the Midland Bank shareholders on Tuesday to an interesting and penetrating analysis of recent American monetary policy, which led him to the conclusion that it is nowadays not the value of gold which determines the value of the dollar, but the value of the dollar which determines the value of gold, and that, therefore, "in a very real sense the world is on a dollar standard." His argument started from a consideration of the various stages, which he classified as five in number, into which American monetary history since the beginning of the war falls. In the first period, from 1914 to the middle of 1919, gold was flowing into America continuously in payment for war supplies, the net amount of the influx exceeding $1,000,000,000. This gold was purchased by the Federal reserve banks and treated in the traditional manner; that is to say, it was allowed to form the basis of fresh credit, with the result that America, no less than the rest of the world, though with smaller provocation, allowed inflation to run a free course. In the second period, from the middle of 1919 to the middle of 1920, inflation continued, even though America lost $400,000,000 of gold, because the

reserve banks continued freely to create credit, notwithstanding the loss of gold.

With the third period, however, which covers the four and a half years from the middle of 1920 to the end of 1924, came the development of the policy of "sterilization." Gold flowed in continuously, but as it came in it was neutralized, at first because it was used by the member banks of the reserve system to pay off their indebtedness to the reserve banks, which refrained thereupon from recreating the credit thus canceled, and because later, when industry was recovering from the slump, the reserve banks found that they could use the gold to broaden the basis of credit without any inflationary effect upon prices. In the fourth period, covering 1925, gold was flowing out of the United States, but this efflux was not allowed to influence prices either, since the reserve banks did not respond to it by contracting credit, but, on the contrary, actually allowed credit to increase in response to the needs of business. Finally, in the last period, gold was again flowing into America, and was sterilized as before.

THE CONTROL OF WORLD PRICES

America thus developed a new monetary technique, in which conscious regulation of credit replaced the more or less passive submission to the process of alternating expansion and contraction according as gold might flow in or out. This policy, which the American monetary authorities have executed "with a high degree of success," means that in America the value of gold has been made to conform to the value of the dollar instead of vice versa. The purchasing power of the dollar has been kept steady, and therefore the value of gold has been kept steady, notwithstanding the enormous increase in its quantity. It follows, further, that America has been able to regulate the external value of gold, because if the value of gold outside America threatened to fall, America absorbed the surplus supply, and if, on the other hand, it threatened to rise, America supplied out of her reserves sufficient gold to prevent it rising.

So America has enforced her dollar standard on the world, and in Mr. McKenna's view she will be able, in her position of holder of half the world's monetary gold and of creditor of the rest of the world, to maintain control over world prices for as long as it is possible to see ahead.

[From the Daily Telegraph, London, Wednesday, January 25, 1928]

MR. MCKENNA AND GOLD—REVENUE RETURNS—IMPERIAL TOBACCO DIVIDEND

CITY OFFICE, 9, DRAPERS'-GARDENS, E. C. 2,
Tuesday evening.

Apart from the usual detailed review of the bank's affairs and progress, including the information that £830,000 in gold coin was paid in to the Bank of England during December, "which we had gathered from circulation," Mr. McKenna's address at the Midland Bank meeting was devoted to considering the present position of gold as an international standard of value. It may be doubted whether many of those present really understood what he intended to convey, but although he did not actually say so, it would seem that he no longer regards gold as the best basis of currency, notwithstanding that London is rapidly recovering its former position as the world's monetary center owing to our return to a gold standard. Postulating that central bank policy in the United States has shown that while gold may be retained as a medium for making international payments, it can be deprived of its function as the ultimate standard of value, he reached the conclusion that the world in a very real sense is now on a dollar standard, because "the real determinant of world prices is the purchasing power of the dollar."

PRE-WAR BANK PRACTICE

His method of arriving at this conclusion is certainly interesting, if not wholly convincing. Before the war, he says, the central banks adopted a purely passive attitude with regard to the control of credit, allowing the gold movement into or out of a country to regulate the internal supply of money. If gold flowed in freely, credit and currency expanded; and if more credit was created than required for the growth of business, prices rose. If gold flowed out, credit and currency contracted and prices showed a tendency to fall. "It followed from this that the current course of world prices was determined by the supply of momentary gold." This rather sweeping statement required qualification, because the Federal reserve system, prior to which there was no central bank in the United States, did not come into operation until the end of 1913, while, as everyone knows, the Bank of France was only compelled to redeem its notes in legal-tender coin, which included silver.

That Mr. McKenna was really referring to the Bank of England was apparent from his subsequent remarks when he said that London, being the world's financial center, the British price level was the medium through which gold operated on the price levels of other countries. It may be admitted, however, that the first aim of the Bank of England was, as it must always be, to protect its stock of gold so as to insure the undoubted convertibility of the note issue. It may be, too, that the principles of central-bank control were undeveloped, if not unknown before the war. It will also be agreed that up to a point a central bank can expand or contract credit by buying or selling securities, and in this sense it can regulate the supply of money irrespective of gold movements. But to rule out gold as a negligible factor in the situation is quite another matter.

POSTWAR METHODS

It was, we are told, the enormous accumulation of gold which might have proved disastrous to the stability of the American price level, that directed the attention of the reserve banks to their controlling powers. Full tribute has been paid to the great ability with which the Federal Reserve Board have carried out their policy, viz., to prevent undue inflation on the one hand, and, on the other hand, in those periods when gold was temporarily flowing out, to insure that credit remained in sufficient supply for the needs of business. Yet, with all their management of the price level and in spite of a large gold influx in 1926, they could not stop the heavy fall in cotton and wheat from which their farmers suffered that year. By sterilizing for a time their surplus gold they were able to prevent its normal effect on the volume of credit, but no amount of circulating medium could counterbalance the result of an oversupply of the products just mentioned—not even the granting of a subsidy to the Iowa farmers to enable them to hold back their corn crops. The dialectical skill of the extreme followers of the quantity theory of money and the theorists of the mathematical school is apt, as Lord Overstone said many years ago, to lead people "to conclude with too much haste that fluctuations in the amount of the circulation are the immediate and only cause of all fluctuations which may occur in prices."

THE DOLLAR STANDARD

In Mr. McKenna's opinion, American monetary policy has proved that the value of gold no longer governs the value of the dollar. "While an ounce of gold can always be exchanged for a definite number of dollars, the value of the ounce will depend upon what these dollars will buy, and this in turn will obviously depend upon the American price level." Surely the same thing could be said of sterling, for we can exchange an ounce of gold for a definite number of pounds, and the value of the ounce will depend upon what these pounds will buy. That gold movements were formerly the regulator of the price level in America and are so no longer is rather a large assumption, though as a result of America's accumulation of gold they now are admittedly less of a factor, while it has been shown that the influx can be neutralized by a self-denying policy on the part of the reserve banks.

But we can not help asking if there was ever a time when the value of an ounce of gold or anything else did not depend upon what the cash given for it would buy, for the purchasing power of dollars or sterling obviously must determine the actual value of the gold for which they are exchanged. However, Mr. McKenna's conclusion that the world is on a dollar standard is based on the belief that America is able to control the world price level, because she "is rich enough either to lose gold or to gain it." So it would seem after all that gold is not such a negligible quantity either in the matter of the price level or the control of credit.

[From the Times, London, Wednesday, January 25, 1928]

MR. MCKENNA'S SPEECH—IMPERIAL TOBACCO DIVIDEND

Two of the leading banks—the Midland and Martins—held their annual meetings yesterday. At both meetings the chairmen struck an optimistic note regarding the outlook, particularly Mr. R. Holland Martin, who described the tide as having undoubtedly turned in our favor. The greater part of Mr. McKenna's address, however, was directed, as usual, to abstract monetary questions, which he succeeded in explaining in very lucid terms. As he rightly said, before the war the central banks adopted a purely passive attitude in the control of credit, for they allowed the movement of gold into or out of a country to regulate the internal supply of money. If gold flowed in freely, credit and currency expanded and prices rose. On the other hand, if gold flowed out, credit and currency contracted and prices fell. In other words, the current course of world prices was determined by a number of things, but mainly by the supply of monetary gold. It was not until after the war that there developed a new consciousness of the power of the central banks to control credit, and the necessity for exercising it. This became a matter of importance because, whereas paper credits had expanded enormously during the war, the supply of gold had not, while approximately one-half of it found its way into the hands of one country. The International Economic Conference at Genoa in 1922 was impressed by the danger of a scarcity of gold, and the financial commission established there made recommendations to economize its use. One of the commission's main suggestions was that "gold exchange standard" should be adopted by most countries, leaving only a few to hold the metallic reserves for the whole world.

AMERICA'S MONETARY POLICY

Mr. McKenna declared that it was a matter for regret that the commission's suggestions for the adoption of gold exchange standards had been widely departed from. As a matter of fact, most, if not all, of those countries which have returned to the gold standard did not revert to the pre-war system, but set up what is known as the gold-exchange standard—that is to say, the banks of issue undertake to pay

their notes either in gold or in gold exchange—i. e., the currency of a gold-standard country. Most, if not all, countries in practice seek to confine the use of gold to external payments. But though most countries have adopted the Genoa recommendations, they have nevertheless found that while in some respects gold exchange is as good as gold, it is not quite the same thing, which is true, and a few of them have been replacing their gold exchange with the actual metal. Mr. McKenna objects to this because he strongly holds the view that gold need no longer be the controlling factor in the supply of money. The experience of the United States, he declares, has proved this; better control can be exercised by the central bank regulating its loans in one form or another, irrespective of gold movements. The enormous war and postwar accumulation of gold in America would, if left to work on pre-war principles, he argues, have proved disastrous to the American price level. Mr. McKenna gave his interpretation of how the Federal reserve bank authorities contrived to avoid this. During the active period of the gold inflow it was prevented from functioning as a basis for credit to the full amount, while during the period of outflow, which occurred last year, no contraction of credit occurred; on the contrary, there was an expansion of bank credit. Certainly in recent years the American authorities have achieved a high degree of success in pursuing a policy of price stability in spite of gold movements of unprecedented magnitude.

CENTRAL BANK COOPERATION

Because of this active policy of controlling the volume of credit, irrespective of gold movements, Mr. McKenna pointed out, American prices are not gold prices, but dollar prices. Therefore, the world is not on a gold standard or gold exchange standard, but on a dollar standard, since the general world level of prices is governed by the purchasing power of the dollar. It is important to note, however, that America is making very large foreign loans, and that these foreign loans have not been allowed to reduce the supply of currency and credit internally, and to that extent she is releasing for use in the outside world more and more of her immobilized gold. Thus prices will tend to become less dollar prices and more gold prices. Mr. McKenna apparently thinks that the United States is not likely to overlend so heavily as to make a serious inroad into her surplus gold. That is a point of view which only the future can decide, but events of the past two or three years point strongly to the conclusion that America must continue to lend abroad. Mr. McKenna thinks that the control of credit by central banks is a subject which has been inadequately explored, and that it presents a wide field for inquiry, on both the practical and theoretical sides. The war has certainly opened up a new phase in monetary practice. Much has been done in the direction advocated by Mr. McKenna. Cooperation amongst central banks, which has contributed much to European reconstruction in the past few years, is so recent that there is no reason to suppose that it has reached its limits.

LETTER TO THE COMMISSIONERS OF INDIAN AFFAIRS ON H. R. 6461

Mr. ARENTZ. Mr. Speaker, I ask unanimous consent to insert in the RECORD a letter I have addressed to the Commissioner of Indian Affairs on H. R. 6461.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. ARENTZ. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

FEBRUARY 23, 1928.

The COMMISSIONER ON INDIAN AFFAIRS,
Department of the Interior, Washington, D. C.

MY DEAR MR. BURKE: On numerous occasions I have brought to your attention the situation existing on the Walker River in Nevada with respect to water rights and irrigation difficulties between the whites and Indians, and I have tried to have these difficulties settled with justice to both Indians and whites.

It is still my hope that the suit instituted by the Government at Carson City, Nev., entitled "United States of America *v.* Walker River Irrigation District et al.," may be settled by a stipulation before it comes to trial early in March of this year. This means, Mr. Burke, that if anything at all is going to be done to effect settlement it must be done within the next two or three weeks. I realize, of course, that the Government has always relied on the Winters case as conclusive of the right of the Indians to have and take all of the water of the Walker River, if necessary, to irrigate all of the irrigable lands in the Indian reservation. In this, from the viewpoint of right and justice, of equity to both Indians and whites, I can not concur.

The Winters case is similar in some respects to the Walker River case in that it involves water rights for Indian lands, but entirely different in the legal aspects involving the right to the use of the waters of the Walker River. The United States brought suit against Winters and others to enjoin the diversion of the waters of the Milk River in Montana which it claimed were reserved by treaty with the Indians for use on the Fort Belknap Indian Reservation. The Supreme Court of the United States, speaking through Justice McKenna, said:

"The case, as we view it, turns upon the agreement of May, 1888, resulting in the creation of Fort Belknap Reservation. In the construction of this agreement there are certain elements to be considered that are prominent and significant. * * * By a rule of interpretation of agreements and treaties with the Indians, ambiguities occurring will be resolved from the standpoint of the Indians."

The court then resolved the ambiguity in the treaty in favor of the Indians, holding that by implication it reserved the waters of Milk River for the use of the Indians. The State of Montana was admitted into the Union the year following the execution of the agreement with the Indians.

It is not my intention to enter into the legal phase of this controversy, but at this point it is well that we state the situation with respect to the Walker River case.

In the case, United States *v.* Walker River Irrigation District et al., the claim of the Government is predicated upon a letter dated November 29, 1859, by the Commissioner of Indian Affairs to the Commissioner of the General Land Office suggesting that an undefined area of land bordering on Walker Lake be set apart for the Indians. It was not until March 23, 1874, that President Grant by Executive order created the Walker Lake Indian Reservation. There is no treaty involved as there was in the Winters action. In the Winters action above referred to it seems too clear to require elucidation that the decision turned on the construction of the treaty, and that there is no similarity whatever in the legal aspects of the two cases.

It is contended in the present case that the letter of November 29, 1859, operated as a withdrawal of both the lands and waters for the irrigation of all of the irrigable lands in the Walker Lake Indian Reservation to the estimated extent of 10,000 acres, notwithstanding the fact that the Walker River rises in the State of California, and is in part used there and flows some 75 to 100 miles before the stream enters or touches the upper boundary of Walker Lake Indian Reservation. It must be remembered also that the Indians were at war with the United States in 1859 and for some years later down to about 1864 or 1865.

If the theory of the Government be correct that the letter, or even the actual Executive order, served to reserve all the water in the river from source to mouth, it means that thereby lands 100 miles in length bordering on the river were forever stripped of the right to utilize a drop of water from the Walker River either as riparian owners or as appropriators. It must be borne in mind, also, that the General Land Office has granted patents to settlers for thousands of acres of lands along the stream based upon the showing pursuant to the desert land act that the lands had been irrigated and cultivated by means of the use of the waters of the Walker River and had a full water right.

The maximum extent of the irrigated Indian lands at any time since the creation of the reservation is about 2,023 acres, 1,400 acres of which may be termed cultivated and the balance partially irrigated or pasture. That the normal flow of the river has been used for many years by the white settlers to its full extent, save for the 1,400 to 2,023 acres of Indian lands, and that if all the natural flow is awarded to the Indians it actually destroys water rights for white settlers' lands, acre for acre, to its maximum amount so awarded over 2,000 acres. Because of the reuse of the water by the whites it is no exaggeration to say that water for 2,000 acres of Indian land is equivalent to double this amount when used on white lands 30 to 50 miles up the river where the return flow is high.

Permit me to state, in this connection, that at a recent conference (November, 1927) held at Reno, Nev., between the attorneys for the Government and the attorneys for the defendants in the case under consideration, Mr. John F. Truesdell, attorney for the Indian Department, together with Judge Cole L. Harwood, special assistant to the Attorney General, represented the Government. At this meeting the defendants offered to stipulate with the Government that the Indians be awarded a first right to water in the natural flow of the stream for 2,000 acres of land which they felt was 600 acres more than the Indians actually irrigated, and which area was conceded to be the greatest amount upon which they had ever used water.

The Government officials countered with the proposition for a first right for 4,000 acres, and Mr. Truesdell then stated that if such stipulation were consummated and a decree entered confirming it, they would recommend the construction of the reservoir for which I have a bill pending. His attention was called to a statement in the report prepared by the engineers for the Bureau of Indian Affairs under the act of Congress which appropriated $10,000 for that purpose, which statement is as follows (H. Doc. No. 767, 69th Cong., 2d sess.):

"It seems apparent from the foregoing that if the Indians are decreed a water right prior to all others on the river, and such right is enforced, that for any cultivated area less than 4,000 acres there is no necessity for storage except as an economic measure for benefiting the entire community."

Mr. Truesdell answered that the statement in the report was an irresponsible one and not binding on the Indian Department, and that they were not responsible for the "mouthings of some underling," or words of similar import, and that the Indian Department did not approve any

such statement; but, on the contrary, that recommendation would be made to construct the dam and reservoir if the stipulation for 4,000 acres was included.

I respectfully refer you to House Document No. 767, Sixty-ninth Congress, which I have before me. This is a report on water supply and storage investigations of Walker River Indian Reservation, Nev., transmitted by S. J. Flickinger, chief, irrigation division; W. M. Reed, chief engineer; and C. A. Engle, supervising engineer, of the Bureau of Indian Affairs, and the following data is taken from the summary and conclusions of this report; hence they are official in character and may be accepted by you without question.

Under the heading, "Summary of irrigation data," Mr. Engle gives the following chronological summary:

1859 (November 29): Reservation segregated by General Land Office.

1859: Indian agency established on reservation.

1859: Indians irrigate by flooding from river. [I question this statement. S. S. A.]

1864 (December): Reservation surveyed by Eugene Monroe.

1866: Agent Campbell and Indians build Campbell ditch.

1874 (March 19): Reservation formally established by Executive order.

WATER SUPPLY

Source: Walker River.

* * * * * * *

Average flow (April to July, inclusive): 275 to 500 second-feet.
Average flow (August to March, inclusive): 0 to 150 second-feet.
Maximum flow, 1926 (May 18–20): 119 second-feet.
Maximum annual run-off (1907): 794,425 acre-feet.
Maximum annual run-off (1924): 94,780 acre-feet.
Average annual run-off: 390,000 acre-feet.

AGRICULTURAL CONDITIONS

Total area of reservation	acres	85,760
Size of Indian allotments	do	20
Total number of Indians allotted		503
Total area allotted to Indians	acres	10,060
Total irrigable area of project	do	10,278
Area now under canals	do	3,600
Area irrigated, 1926	do	1,809
Area unirrigated but under canals, 1926	do	1,791
Area irrigated by Indians, 1926	do	1,785
Area irrigated by white owners, 1926	do	20
Area irrigated by lessees, 1926	do	4
Irrigable area Indian-owned land in project	do	9,900
Irrigable area white-owned land in project	do	25

At this point I wish to bring to your attention the official statement that in 1926 there were only 1,785 acres irrigated by the Indians. This is the maximum amount ever under cultivation at one time. It is important that this figure be borne in mind because in a recent discussion of this matter with Mr. Flickinger it was stated that the amount under cultivation was double this amount. If the basis of your counselor's action in demanding a priority of 4,000 acres is predicated on the acreage under cultivation, my constituents, the water users of the Walker River irrigation district, I am quite sure, are perfectly willing to settle the suit on this basis.

Mr. Engle, in the report heretofore referred to, states as follows: "The attitude and patience of the Indians on this reservation is to be commended. They have shown great forbearance in attempting to cultivate their lands under the variable and uncertain water-supply conditions of the past. The location and favorable markets for farm produce, combined with soil fertility and climatic conditions make it possible to realize substantial profits from irrigated farming. These Indians have demonstrated their ability in this industry, and with an adequate supply guaranteed would undoubtedly make rapid progress toward the full development of the project." Also: "The success of an irrigation project depends primarily upon the delivery of an adequate quantity of water to the land as, and when, needed.

"Storage sufficient for assuring a dependable water supply for the entire irrigable area of Indian lands within the reservation is believed to be feasible at what we have designated as the Rio Vista Reservoir site. * * *

"It is my personal judgment," he says further, "that even though the Indians should be granted a water right of first priority for the area actually cultivated up to the limit of their total irrigable area of 10,280 acres, there would be frequent occasions during average or normal years and most certainly during low-water years, when the total normal flow of the river would be insufficient to produce the required flow at their diversion point and the river bed would, not infrequently, be dry. Taking conditions as they actually are and have been for years, at least since 1898, and leaving aside any consideration of what 'might have been,' providing the Indians would have had a prior water right and such right had been enforced, it is plainly apparent that storage is an economic necessity, and it is a matter of surprise that the Indians have succeeded as well as they have without it.

"Some idea of the excessive water loss in the river channel is indicated when it is considered that at the time above referred to, although 320 acre-feet were actually delivered in the river channel below all diversions above the Indian reservation, only 80 acre-feet finally reached the Indian diversion dam 35 miles farther downstream. * * * it is believed that it would be conservative to estimate the loss in the 35 miles of river channel between the Indian diversion and the lowest upstream diversion at 35 per cent. It is considered extremely doubtful as to whether the upstream users should be asked to stand so great a loss, if the loss can be obviated by the construction of a storage reservoir near the Indian land."

At this point allow me, Mr. Burke, to point out to you that if storage is resorted to, the white settlers have agreed to and will guarantee to the Indians, delivered at the diversion point of the river to the Indian lands, a sufficient amount of water to amply take care of the land now under cultivation plus an additional amount of water which will meet the needs of the Indians, according to the figures given by both Mr. Truesdell and Mr. Reed, for all time to come.

Again, quoting from Mr. Engle, "It is realized by all that the loss in the river channel is very great; but it is, of course, practically impossible to determine it under present conditions of control and management. * * * As early as 1898 (see report of L. A. Ellis included in this report, H. Doc. No. 767) it is reported that 'there was no water after July 10, and the quantity was insufficient for about two weeks preceding that date."

Bearing out my statement, Mr. Burke, that there is need, and urgent need for a reservoir, I will quote further from Mr. Engle's report. He says, "Moreover, it should be borne in mind that were it not for the usual water shortage, and were it not for the fact that the superintendent of the reservation and irrigation officials have for many years consistently discouraged the improvement of new lands because of the deficiency in the water supply, it is apparent that the cultivated area would be at least twice what it now is." And I may add to this the further statement that were water available the whole 10,000 acres, or 500 allotments of 20 acres each, would be tilled by Indian farmers.

Referring further to the summary of irrigation data, attention is called to the fact that "there are now 3,600 acres under canal and susceptible of irrigation (only 1,785 acres to which water has been applied) therefrom, at a total construction cost of $127,815, or $36 per acre for the area actually benefited." (A cost of $65 per acre instead of $36 if figured on the basis of land under cultivation.) "The estimated cost of the completed project with canals and laterals covering the entire irrigable area of 10,280 acres, and with the storage reservoir, is $540,000, or $53 per acre. It is apparent that land with an assured all-season water supply at $53 per acre is far more valuable and desirable than the same land with only a partial water supply at $36 or $65 per acre."

So much for reference to Mr. Engle's report, which I consider a splendid one—a straightforward, honest statement of facts. Let us pass on to the recent hearing before Mr. CRAMTON'S committee.

I can not view the testimony of the representatives of the Bureau of Indian Affairs before the House Subcommittee of the Appropriations Committee without alarm and a feeling that the Indians are being harmed and the white settlers treated unfairly by the more or less loose talk being indulged in by these men. The Indians on the Walker River Reservation can not get along without a reservoir. Your assistants know this as well as I, but in order to press home their ideas relative to priority of water rights and make untenable in the eyes of Congress the position of the white settlers they are making it very hard for me, or anyone else, to bring about the passage of a bill in Congress for the construction of a reservoir for the Indians at Schurz, Nev.

I feel duty bound to go into this matter with you in detail to point out certain ambiguities, misstatement of facts, and uncalled-for testimony of witnesses on matters which I believe they should have left for another occasion.

One can not view the work of the Bureau of Indian Affairs during the past six years without a feeling of pride for the work accomplished generally throughout the Nation. The personnel under your direction is as sincere and conscientious in its duties as can be found in any body of men and women in any department of the Government. Everyone with whom you come into contact must be impressed with your sincerity and good judgment. This also holds true with respect to all of your assistants whom I know. So, anything I may say here is meant in no degree to cast aspersions or question the motives actuating the men named or anyone in your department. You look to them for recommendations—you are entitled to their unbiased opinion and best judgment always—it is impossible for you to know the details of every problem presented. Within the limited scope of this letter I hope I may be able to present a true picture of the problems on the Walker River to you so that you, in turn, may help in their solution.

On page 234, hearings, appropriations, Interior Department, 1929, we see the following:

"Mr. CRAMTON. What about the suit, or what is the status of it?

"Mr. REED. I think Mr. Truesdell can give that a little better than I can, but I can tell you about it in a general way. There have been two attempts since the suit was filed to reach some kind of agreement—that is, to stipulate along certain lines, at least. Those attempts have not been entirely successful. The first one failed, although we had some assurance they [I presume Mr. Reed meant the directors of the Walker River irrigation district] were in a frame of mind to meet our

minds. However, that did not prove to be true, and unless there is a yielding it must go to trial when the court sets it.

"Mr. CRAMTON. What is the status of that suit, Mr. Truesdell?

"Mr. TRUESDELL. The suit is pending as a bill filed and the answers thereto, and it has just been set for March, I think, by Judge Farrington.

"Mr. REED. And I, at the request of the Representative from Nevada, Mr. ARENTZ, went to Reno in May and tried to see what could be done in the way of effecting a settlement of the whole controversy on the basis of the information in the report (H. Doc. No. 767) which you have just described. We went through the thing thoroughly and gave our views, namely, that we felt that we could recommend that the suit be settled on the basis of adequate water from the unstored flow of the river or a first right for 4,000 acres and then a first right of storage for 30,000 acre-feet, which would be enough water to fill the reservoir. We. felt that a 4,000-acre first right on the unstored flow would take care of the Indian lands or the lands that the Indians now on that reservation would be likely to use, and also they would use, as far as could be used, the unstored flow of the river; that is to say, that a greater right in the river for the unstored flow would be so seldom needed that it would not warrant putting in new lands on that basis and that then, if Congress saw fit upon any theory to build the dam the first right of storage would be adequate to irrigate all the land of the reservation susceptible to cultivation, namely, about 10,000 acres.

"Mr. CRAMTON. Have the white lands above been using the water to such an extent as to create an insufficient supply for the Indian lands? In other words, if the whites were not taking the water above, the Indians would have enough water without building this storage reservoir, would they not?

"Mr. TRUESDELL. I do not understand it that way. It is very difficult, of course, to estimate just what would have been the situation if changes that have taken place in many years had not taken place; but, so far as we know, and so far as this report shows, we believe that if the whites were not there we could irrigate only about 4,000 acres.

"Mr. CRAMTON. And this project is to cover——

"Mr. TRUESDELL (interposing). About 10,000 acres.

"Mr. CRAMTON. And the area under constructed works is 3,600 acres?

"Mr. TRUESDELL. Yes, sir.

"Mr. CRAMTON. There is not enough water for the 3,000 acres?

"Mr. TRUESDELL. No, sir; not now. We are irrigating not more than 2,000 acres at the present time, and that occasionally goes short. We thought if that could be boosted to 4,000 acres, and if we had a decree of court giving us a first right for that much, we could irrigate it pretty well, although even then we would go short to a certain extent.

"Mr. CRAMTON. Do you mean to say that if there were not undue encroachment by the owners of white lands above, the stream flow, without storage, would be sufficient probably to take care of 4,000 acres?

"Mr. TRUESDELL. Yes, sir; with an occasional shortage.

"Mr. CRAMTON. But is it not sufficient now?

"Mr. TRUESDELL. No, sir.

"Mr. CRAMTON. Of course, the pinching necessity for that reservoir is not because of a desire to provide water for 10,000 acres, but it is because of the necessity of providing water for 4,000 acres, and that necessity is created by the encroachment of white lands above.

"Mr. TRUESDELL. I do not think it would be quite accurate to put it that way.

* * * * * * *

"Mr. FRENCH. Is the suit pending?

"Mr. TRUESDELL. It is pending. The bill asks for a prior right for the whole 10,000 acres, but we feel that even if we get a decree for that it will be more or less empty. After the 4,000 acres is supplied the stream would not supply those lands sufficiently.

* * * * * * *

"Mr. TRUESDELL. My idea is this: That if the Government simply wanted to irrigate this 4,000 acres the best thing to do would be to prosecute this suit. If, however, it wants to irrigate the full 10,400 acres, or whatever it is, then it should build the reservoir. If it wants to build the reservoir, I would very much prefer to have the suit settled by an agreement on the terms that we suggested, so that we would get the first storage right, rather than to simply have the right that the court would be likely to give us. That is because the storage right would be very valuable."

You will please note that Mr. Reed in his statement says definitely that the first conference failed because the directors of the Walker River irrigation district were not in a frame of mind to meet "ours," meaning by this the minds of himself and Mr. Truesdell, and he further states that unless there is yielding, and by this he means the acceptance of Mr. Truesdell's plan for 4,000 acres of priority water, the case must go to trial shortly after the 1st of March. Mr. Reed further says, and if you had been present at this conference you would believe as I do, that the entire matter is in the hands of Mr. Truesdell and Mr. Reed, that "we felt that we could recommend that the suit be settled on the basis of adequate water from the unstored flow of the river or a first right for 4,000 acres"—this is not for 4,000 acres now under cultivation. It is for the acreage that would likely be used in the future and would be the very limit of acreage in normal years, but in an abnormal year there would not be a sufficient amount of water, under any condition, for more than the land now under cultivation, namely, 2,023 acres. The district has agreed to guarantee this amount, as well as a sufficient amount of flood water to amply supply the needs of the full 10,000 acres.

I think both Mr. Reed and Mr. Truesdell are looking at this matter entirely from the viewpoint of the Indian; I think they are acting very fair indeed from the Indian viewpoint, nevertheless, Mr. Truesdell is correct when he makes the statement that "so far as we know, and so far as this report shows, we believe that if the whites were not there we could irrigate only about 4,000 acres, with an occasional shortage." I feel sure that both Mr. Reed and Mr. Truesdell appreciate the fact that 4,000 acres is far above the maximum that could be irrigated, and I repeat that in a subnormal year, a year when the river becomes almost dry during the months of July and August, that it would require some very serious "pinching" to spread the water over the less than 2,000 acres now under cultivation, not to mention 4,000 acres, unless the supply were supplemented by stored water.

Mr. Truesdell further states, "we are irrigating no more than 2,000 acres at the present time and that occasionally goes short," and he says "we thought if that could be boosted to 4,000 acres, and if we had a decree of court giving us a first right for that much, we could irrigate it pretty well, although even then we would go short to a certain extent." In order to fully understand this Mr. CRAMTON asked this question: "Do you mean to say that if there were not undue encroachments by the owners of white lands above, the stream flow, without storage, would be sufficient probably to take care of 4,000 acres?" And Mr. Truesdell answered, "Yes, sir; with an occasional shortage." And Mr. Truesdell goes on still further and states that the bill, meaning the bill filed in court upon which the suit is based, asks for a prior right for the whole 10,000 acres, and he says, "But we feel that even if we get a decree for that it will be more or less empty. After the 4,000 acres is supplied, the stream would not supply those lands sufficiently." Mr. Burke, unless sufficient water is supplied to irrigate lands diversified farming is impossible and only failure stares the rancher in the face who tries to carry on under such conditions of water shortage.

It is my contention that by prosecuting this suit to a final conclusion the Government will get less than it would if the suit were settled by stipulation under the terms agreed to by the Walker River irrigation district officials and their attorneys for this reason, and it should be very clear to you, being a western man, knowing the value of water and water rights, that it is as Mr. Truesdell says—the decree for 4,000 acres, and even less than this, would be absolutely empty. It would not carry a storage right, and storage is essential if it is ever contemplated to give the 500 Indian allottees on the Walker River Reservation water for their acreage of 20 acres each, or a total of 10,000 acres. Surely, if these Indians have been given their allotments of 20 acres each, it is a gesture of the emptiest sort unless it is contemplated that water is to be supplied for these allotments some time in the future, and if water is to be supplied to these allotments at some future date it is absolutely essential that the Government protect the rights of the Indians by flood-water rights on the Walker River so that when the reservoir is constructed at least 30,000 acres of flood water can be stored for application to their lands.

The Walker River irrigation district is now storing about 90,000 acre-feet of water, and within a short time it is contemplated to erect another reservoir—if they do this they will take all the flood water from the Walker River and leave the Indians—what? Their priority. And even though they get a priority of 10,000 acres, Mr. Truesdell admits that this will be an empty decree, that even if they have enough water to irrigate 4,000 acres by the natural flow of the stream for part of the irrigation season, the flow would be insufficient in the late season, when it is needed for maturing of crops, and it will be conceded by anyone who knows how to irrigate that it can not be done successfully when one year there is enough water for the crops and the next not enough, and the crops dry up the latter half of the season when the water supply falls short—crops are not grown successfully that way.

No matter how one looks at the proposition, storage is essential. Nothing should be done in this case which would jeopardize the passage of legislation authorizing the construction of a dam and reservoir. There is a direct and an indirect way to bring about storage for the Indians. I am suggesting the direct method through the settling of the suit by equitable agreements and favorable report on my bill to construct the dam and reservoir.

In making the following statement, Mr. Truesdell, I think, summed up the situation in the clearest possible manner; he states the case exactly when he says, "My idea is this: That if the Government simply wanted to irrigate this 4,000 acres (I think he meant a priority of 4,000 acres), the best thing to do would be to prosecute this suit. If, however, it wants to irrigate the full 10,000 acres, or whatever it

is, then it should build the reservoir. If it wants to build the reservoir, I would very much prefer to have the suit settled by an agreement on the terms that we suggested, so that we would get the first storage right, rather than to simply have the right that the court would be likely to give us. That is because the storage right would be very valuable."

In conclusion, Mr. Burke, let me state that I do not view this case strictly from a legal standpoint alone but from the viewpoint of justice and equity, justice both to the whites and to the Indians. We gained nothing, arrived at no conclusion, in the discussions and conferences entered into during the past two years. It appears to me that the terms of settlement of this suit by stipulation seem to be in the hands of Mr. Truesdell. He appears to be determined that this suit shall be carried to a conclusion in the Federal court at Carson City at an early date or the settlement be made on his terms, namely, the prior right for 4,000 acres. This amount is 2,000 acres in excess of the acreage ever under cultivation by the Indians, even though Mr. Truesdell and his associates have admitted time after time that a decision for 4,000 acres would be an empty one, because the flow of the Walker River during July and August of some years is insufficient to supply the needs of more than 2,000 acres. If at any time the 500 allottees, each possessing 20 acres, desired to put their land under cultivation, and surely you believe with me that this should be done, a further right on the stream for at least 30,000 acres of flood water would be essential and necessary, and it is contended by neither Mr. Truesdell nor the assistant to the Attorney General that a decision on 4,000 acres priority would carry with it a flood-water right for this necessary storage.

I appeal to you, Mr. Burke, to give this matter your personal thought, the benefit of your mature judgment, and that you will use your influence to settle this question at once out of court by stipulation under guaranties protecting the Indians of the Walker River Reservation to the fullest extent, yet balance the scales in favor of neither the Indians nor the whites by settling the case in equity and justice along the lines herein proposed—first, a priority of normal flow of the Walker River sufficient to irrigate the maximum acreage, according to official reports, ever tilled by Indians on the Schurz Reservation; and, second, such other recommendations as were made in the Engle report, including the construction of the reservoir discussed in said report.

Respectfully yours,

SAMUEL S. ARENTZ.

PERMISSION TO SIT DURING SESSIONS OF THE HOUSE

Mr. PARKER. Mr. Speaker, I ask unanimous consent that the Committee on Interstate and Foreign Commerce may sit during the sessions of the House for 10 days beginning next Tuesday.

Mr. BANKHEAD. Mr. Speaker, reserving the right to object, is this for the purpose of considering any special legislation?

Mr. PARKER. Yes; it is to consider railroad consolidation.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

PERMISSION TO ADDRESS THE HOUSE

Mr. GARRETT of Tennessee. Mr. Speaker, I desire to prefer another request. I ask unanimous consent that the gentleman from Oklahoma [Mr. CARTWRIGHT] may address the House for 10 minutes on Tuesday next, following the address of the gentleman from Texas [Mr. WILLIAMS].

Mr. SCHAFER. Mr. Speaker, reserving the right to object, on what subject?

Mr. GARRETT of Tennessee. On farm relief.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

ABRAHAM LINCOLN WITH THE IMMORTALS

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent to extend my remarks by printing in the RECORD a speech made before the Bronx County Bar Association on Abraham Lincoln by Prof. Emanuel Hertz, a student of Lincoln.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. LAGUARDIA. Mr. Speaker, under permission granted me I extend herewith a speech of Prof. Emanuel Hertz, of New York City, on February 12, 1928, delivered over WGL, entitled "Abraham Lincoln with the Immortals." Prof. Emanuel Hertz, a lawyer and a scholarly gentleman of our city, is not only a great admirer of the great American, but also a profound student of Lincolnian lore. I am sure his remarks will be of interest to the membership.

The speech is as follows:

It is a custom hallowed by the ages to recall at least annually the memories and performances of those who departed. Fervent and intense as is the observance at first, it gradually mellows and becomes more formal and frequently the anniversary becomes a biennial event and then a quinquennial, then centennial memorial, frequently remembered only—rather than formally observed. The vast majority of these terminate within a short period, for only the closest family ties keep us concerned about those departed. Have we not seen it all in our own day—how short-lived and baseless is temporary fame? The hero of to-day—whom we greet with triumphal arches and hosannahs—who is greeted by rulers and people alike—is barely remembered 20 years later. Witness the late Admiral Dewey—upon whom the honors of a hundred million people were showered. Who recalls that gigantic universal outpouring of praise and pomp and popular acclaim? McKinley—as lovable a soul as ever lived—universally beloved in his day—is rarely, if ever, referred to. A statue here and there—perhaps three in all—certainly not more—marks all that was earthly of that simple soldier boy—in Philip Sheridan's regiments—who was raised to the highest post in the land. Who remembers three generals in the great World War of 10 years ago?

We must, therefore, conclude that nothing short of lasting performance, nothing less than what benefits the race, only an unselfish performance coupled with the greatest sacrifice which changes the course of an entire race, frees a people from bondage, and implants upon the minds of those who follow an eternal, elemental principle, which up to that day was either unknown or unrecognized, and which does not change with the tides nor with the process of the suns—only such an individual, whoever he be, wherever he comes from—only such a one can not and will not be forgotten.

And when one such is found human nature veers completely the other way. No lip worship only, no formal memorial will do. They go the whole length of the gamut of human gratitude and love and set apart an entire day—an entire day in the United States of complete rest, of complete inactivity, of shutting down the myriads of human endeavor and occupation on the farm, in the mine, in the counting house, in the courts, in the schools—all given and dedicated to the memory of Lincoln—indeed, a gigantic sacrifice running into hundreds of millions of dollars, counting time and effort suspended and money expended and lovingly foregone, in order to celebrate this natal day of him who breathed the spirit of life into an expiring Union. An entire day, not only to remember, to recount, but to contemplate and study the life and character of him who has thus become distinguished. First one State, then another, then the Congress of the United States have decided to celebrate Lincoln's birthday.

And now there have sprung up all over this land Lincoln organizations who follow annually a program which has for its object to keep before the people of his Union—young and old—the great services rendered by him to make his Union free and mighty and respected by all the nations of the world, because he made it an emblem of righteousness, an example of brotherly love, a people loving and pursuing justice. His heritage of unselfish advice to the plain people—and he concerned himself mostly with those only because the vast majority of his fellow countrymen were plain people—is now and has for the last 70 years been slowly absorbed. His appeal seemed to reach those common people—they understood Father Abraham—whether it be the starving dole-receiving cotton spinners of Manchester, England, crippled by the blockade which prevented the exporting of cotton, or the plain people in the marshes at Shiloh, Vicksburg, or in the Wilderness; they all understood him and went straight into the shadow of the valley of death because he asked it. The so-called leaders could not respond so quickly. How could you expect the Cabots, the Adamses, the Sumners, the Sewards, the Chases, the Lees, the Davises, the Longstreets, the Beauregards, and the rest of the aristocracy of the North as well as of the South to stoop or rather look up to—for like Saul he towered over all—this crude frontier giant who would talk in the patois of the frontier, who like Æsop of old would draw his similes from the farm and from nature, and who had as much regard for clothes or the habiliments of the boudoir as did Socrates.

Somehow or other these few human intellectual giants have a vision peculiar to themselves; they see through it all; no phrase, no adornment, no veil, no hue, no color conceals the great heart, the great soul, which burns like a perpetual fire, now and forever. Unconsciously, perhaps, Lincoln ignored all these superficialities, suffered from all these social disadvantages, so called, and concerned himself with eternal things only. He even used some of these social leaders—for he needed mannikins in the Diplomatic Service; he needed social secretaries; he needed intermediaries with these recalcitrant governors and unreasonable Senators, with these pompous and strutting would-be saviors of the Nation, who simply did not comprehend him or the problems with which he was coping. To-day he was perfectly willing to give up his task to anyone who would appear to be able to do better than he; the next day he actually convinced the two or three other men in the country, who seemed to understand the enormous task but actually tried to side-step it, or to sacrifice the Union in carrying out their theory as to slavery, that to do what they advocated was treason, if not madness outright; and then, when he had arranged the fighting forces, his diplomatic forces, his legislative forces, his State leaders, and his spiritual leaders into some semblance of teamwork, he was forced to combat the entire Democratic Party, who had actually succeeded in organizing itself in the North under the influences

of Vallandigham, Pendleton, and Seymour, in opposition to his struggle for the Union, and urged cessation of hostilities at any price and negotiation for peace with the Confederacy in 1864 at any cost—the very thing he prevented England and France and other European powers from inaugurating two years before. Not one of these timeservers, not one of these political or military leaders saw or wanted to see or hear his reasoning or his program. Resignations from high officials were either threatened or requested; Washington was a treason-infested town; and the miracle of it all was that the assassination of the one man who stood between the living and the dead was so long deferred.

Little wonder, then, that those who lived to see what he had accomplished turned an intellectual somersault and from suspicion turned to trust, from carping, heartless criticism, to immeasurable love and praise and appreciation and trust. He had made it clear, at last, that Lincoln was honest, that Lincoln was capable, that Lincoln was unselfish, that Lincoln was trustworthy, that Lincoln was a statesman, that Lincoln was a great military leader, that Lincoln was adamant on saving the Union, that Lincoln was not a slave driver, that Lincoln was not a clown, that Lincoln was not a cruel conqueror, that Lincoln was not an enemy of the South, that Lincoln was not prepared to upturn southern society, that Lincoln was not against peace on honorable terms, that Lincoln was not a candidate for reelection, that Lincoln was not here to perpetuate a military hierarchy; above all, that Lincoln was not afraid, intimidated, or turned from the one true course he had outlined to himself when he registered his oath in heaven to preserve the Union. And now that he was no more—all saw even more clearly how this simple child of the forest had been selected by Providence to bridge the chasm between the slave and the free, between a mobocracy and a democracy, between darkness and between light.

Of course, there were those who saw it not to the very end—nay, to this day there be learned dissenters. Men to-day demonstrate by quoting the unspeakable billingsgate of Civil War and reconstruction times, then voiced by the halt, the lame, the sick, the mentally decrepit—that the real Lincoln was not what the people thought he was. Of course, we are not concerned with those—there be even spots on the sun—but the sun ever shines, and yields life and nourishment and health and vigor—and only the lame, the halt, and the blind concede it not. But they are as ineffective as the fool who sayeth there is no God.

The commotion, the noise, the misleading rumors, the unholy slanders were gaining such velocity, such strength were voiced from so many points of vantage, appeared and reappeared in so many disloyal and half loyal sheets, that Lincoln himself began to doubt—not that his cause was just, not that his was the only course to pursue—but he began to doubt whether the people, his people, would continue to stand by him or whether the siren sounds of peace, of a disgraceful peace, of a perverted peace, would not finally become so effective as to distract the attention of his followers and finally defeat him at the polls at a time when the rays of the rising sun of victory and of peace with honor were becoming visible on the horizon.

And at one time, and only one time, he said: "It is my belief that from present indications the administration will be defeated at the polls at the next election." But he had hardly spoken those words when things began to happen. Grant regenerated the Army, and it began to hammer away, and the process of attrition was on. Sherman began to destroy the heart of the Confederacy. Sheridan destroyed its source of supplies. Thomas (a northern Robert E. Lee) gave the death blow to the Confederacy when he wiped out its army within its borders and helped to isolate Lee. Farragut at Mobile, and the blockade along the entire coast, and the election in November was as overwhelming as was the work of the Army and Navy. The people had spoken again for Abraham Lincoln. The prophets of evil, the soothsayers in the North, were indeed as effective as the fool who sayeth there is no God.

But the common people, the plain people, the poor people, Lincoln's people, Lincoln's neighbors, Lincoln's soldiers, Lincoln's sailors, Lincoln's clients—an entire Nation of clients saw it all—not only at the end where even Chase and Andrew and Reverdy Johnson and Henry Winter Davis—they saw in the beginning—God Almighty had opened their eyes and they beheld Lincoln and Douglas arguing and debating whether a house divided against itself could stand. Douglas, wanting the Senatorship, said it could; Lincoln, however, cared not for the Senatorship, and actually lost it when he said, so that an entire world could hear, "A house divided against itself can not stand," and won the Presidency. I know of no better example or anecdote which better describes than the quotation from Maj. H. C. Whitney, in concluding his great work, "Lincoln on the Circuit," to illustrate the dramatic election of 1860:

"The story is somewhere told that 25 centuries ago the citizens of Mitylene resolved to erect a statue of Jupiter, father of gods and men, in front of that masterpiece of architecture, the great theater, and that they invited a display of statues of the mythological god from which to choose one adequate.

"Upon the day of choice the citizens of the Lesbian Isle crowded into the plaza, there to behold two draped figures which were to compete for the honor of saluting the sun as it arose from the Mediterranean for hundreds of slowly revolving years.

"The draperies fell apart and revealed a figure of classical beauty, the perfection of symmetry, a paragon of sculpture, a miracle of art, an image in which glorious life had been arrested at its highest tide, a fit marble ideal of the presiding divinity in the assemblage of the gods!

"Also a rough effigy of a human figure—no majesty in its lineaments; no grace in its pose; apparently no art in its execution; no harmony in its relations; no dignity in its bearing: 'Tetrum ante omnia vultum.'

"The popular verdict was prompt—one mighty shout rent the air: 'Here is our Jupiter!' was the universal acclaim, all pointing to the masterpiece of sculpture, 'To the sea with the base imposture,' designating the inglorious statue.

"But the poet Alcaeus arrested the fierce outcroy: 'Men and brethren,' exclaimed he, 'I crave one further test of judgment; let but the applauded and the condemned statues each be elevated to the height of the shaft where the chosen one is to find its long repose before we judge conclusively.'

"To this fair proposal assent was finally made, and on the designated day the same eager throng filled the great space which was to be the scene of final judgment.

"The two draped figures were poised in mid-air. The draperies were unloosed, and the two competitors stood out in bold relief against the pure azure sky.

"But mark the change! The favorite had been transformed by the intervening distance. The classical features, the sparkling eye, the luminous countenance had vanished; but a greater transformation had been wrought in the other figure by distance, the arch enchanter.

"Life had been impressed upon those hitherto ungainly features—majesty sat enthroned upon those rugged lineaments—the eyes gleamed with the fire of genius; * * * 'deep on his front engraven deliberation sat, and public care'; and a god stood outlined in classical marble, to the view.

"A cry went up, drowning the sound of the waves that broke on the Lesbian shore: 'Here is, indeed, a god! this is worthy to preside at the council of the Immortals!! This is Jupiter!!!'

"In the year of destiny—1860—our people, moved by fate, met to select a Jupiter Tonans to preside over councils much more majestic than the fabled assemblages of Mount Olympus—councils involving the destiny of the human race.

"The competition which ensued and its results are indited on the most familiar pages of recent history; and the statue of Abraham Lincoln, reproduced ad infinitum in bronze, granite, and marble, and enshrined in all patriotic hearts, will remain the great central figure of humanity and unselfish patriotism as long as civilization shall hold sway."

VISITORS TO THE NAVAL ACADEMY

The SPEAKER. The Chair appoints on the Committee of Visitors to the Naval Academy, to fill the vacancy caused by the resignation of the gentleman from Texas [Mr. SUMNERS], the gentleman from Arkansas [Mr. OLDFIELD].

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted—

To Mr. BLAND, for three days, on account of important business.

To Mr. GOODWIN, for one week, on account of sickness in his family.

To Mr. ROMJUE, for one week, on account of important business.

ORDER OF BUSINESS

Mr. TILSON. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. TILSON. At the opening of the session this noon I asked unanimous consent that in case the District appropriation bill were completed before adjournment to-day that the House adjourn until Monday next. I assume that the bill having been completed a motion to adjourn now will mean a motion to adjourn until next Monday.

The SPEAKER. The Chair will so hold.

SENATE BILLS AND CONCURRENT RESOLUTION REFERRED

Bills and a concurrent resolution of the following titles were taken from the Speaker's table and, under the rule, referred to the appropriate committees, as follows:

S. 1104. An act granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across Red River at or near Garland City, Ark.; to the Committee on Interstate and Foreign Commerce.

S. 1637. An act for the relief of Martha Henson; to the Committee on War Claims.

S. 2370. An act to amend section 24 of the immigration act of 1917; to the Committee on Immigration and Naturalization.

S. 2450. An act to amend the immigration act of 1924, entitled "An act to limit the immigration of aliens into the United States, and for other purposes"; to the Committee on Immigration and Naturalization.

S. 2737. An act for the relief of Morgan Miller; to the Committee on Claims.

S. 2781. An act to amend the Code of Law for the District of Columbia so as to empower the corporation counsel for the District of Columbia and his assistants to administer oaths; to the Committee on the District of Columbia.

S. Con. Res. 6. Concurrent resolution to print and bind the proceedings in Congress together with the proceedings at the unveiling in Statuary Hall of the statue of Alexander Hamilton Stephens, presented by the State of Georgia; to the Committee on Printing.

ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 5501. An act authorizing the Hermann Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Hermann, Gasconade County, Mo.;

H. R. 5502. An act authorizing the Washington Missouri River Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Washington, Franklin County, Mo.;

H. R. 5722. An act authorizing the Rogers Bros. Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Ashland, Ky.;

H. R. 6639. An act authorizing the Centennial Bridge Co. of Independence, Mo. (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Liberty Landing, Clay County, Mo.;

H. R. 6991. An act authorizing the erection of a nonsectarian chapel at the Army medical center in the District of Columbia, and for other purposes;

H. R. 8106. An act authorizing F. C. Barnhill, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Arrow Rock, Saline County, Mo.; and

H. R. 8107. An act authorizing Frank M. Burruss, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Miami, Saline County, Mo.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1759. An act to authorize appropriation of treaty funds due the Wisconsin Pottawatomi Indians.

ADJOURNMENT

Mr. SIMMONS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 38 minutes p. m.) the House, under its previous order, adjourned until Monday, February 27, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Saturday, February 25, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

Navy Department appropriation bill.

COMMITTEE ON AGRICULTURE

(10 a. m.)

To establish a Federal farm board to aid in the orderly marketing and in the control and disposition of the surplus of agricultural commodities in interstate and foreign commerce (H. R. 7940).

COMMITTEE ON IMMIGRATION AND NATURALIZATION

(10.30 a. m.)

To amend the immigration act of 1924 by making the quota provisions thereof applicable to Mexico, Cuba, Canada, and the other countries of continental America and adjacent islands (H. R. 6465).

For Monday, February 27, 1928

COMMITTEE ON LABOR

(10 a. m.)

To divest goods, wares, and merchandise manufactured, produced or mined by convicts or prisoners of their interstate character in certain cases (H. R. 7729).

COMMITTEE ON THE MERCHANT MARINE AND FISHERIES

(10 a. m.)

To further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States (S. 744).

To promote, encourage, and develop an American merchant marine in connection with the agricultural and industrial commerce of the United States, provide for the national defense, the transportation of foreign mails, the establishment of a merchant-marine training school, and for other purposes (H. R. 2).

To amend the merchant marine act, 1920, insure a permanent passenger and cargo service in the North Atlantic, and for other purposes (H. R. 8914).

To create, develop, and maintain a privately owned American merchant marine adequate to serve trade routes essential in the movement of the industrial and agricultural products of the United States and to meet the requirements of the commerce of the United States; to provide for the transportation of the foreign mails of the United States in vessels of the United States; to provide naval and military auxiliaries; and for other purposes (H. R. 10765).

COMMITTEE ON WAYS AND MEANS

(10.30 a. m.)

Providing for the cooperation of the United States in the Pacific Southwest Exposition in commemoration of the landing of the Spanish padres in the Pacific Southwest and the opening of the Long Beach, Calif., world port (H. J. Res. 126).

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

Navy Department appropriation bill.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

374. A letter from the Secretary of the Navy, transmitting draft of a proposed bill "To amend section 1493 of the Revised Statutes," as amended; to the Committee on Naval Affairs.

375. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination of Yaquina Bay and Entrance, Oreg.; to the Committee on Rivers and Harbors.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII:

Mr. MILLIGAN: Committee on Interstate and Foreign Commerce. H. R. 9018. A bill granting the consent of Congress to E. M. Elliott & Associates (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River; with amendment (Rept. No. 752). Referred to the House Calendar.

Mr. JOHNSON of Indiana: Committee on Interstate and Foreign Commerce. H. R. 9953. A bill authorizing the State of Indiana, acting by and through the State highway commission, to construct, maintain, and operate a toll bridge across the Wabash River, at or near Vincennes, Ind.; with amendment (Rept. No. 753). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. WARE: Committee on Claims. H. R. 9902. A bill for the relief of James A. DeLoach; with amendment (Rept. No. 751). Referred to the Committee of the Whole House.

Mr. JAMES: Committee on Military Affairs. H. R. 1627. A bill for the relief of Abram H. Johnson; with amendment (Rept. No. 754). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 11170) granting an increase of pension to Sarah C. Lutgen; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 11366) granting an increase of pension to Ada M. Young; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BACHMANN: A bill (H. R. 11402) authorizing and directing the War Department to obtain and place a commemorative monument on the spot where the late Thornsbury B. Brown lost his life; to the Committee on Military Affairs.

By Mr. BACON: A bill (H. R. 11403) to admit to the United States, and to extend naturalization privileges to, alien veterans of the World War; to the Committee on Immigration and Naturalization.

By Mr. CRAMTON: A bill (H. R. 11404) authorizing the Port Huron, Sarnia, Point Edward International Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the St. Clair River at or near Port Huron, Mich.; to the Committee on Interstate and Foreign Commerce.

By Mr. ENGLEBRIGHT: A bill (H. R. 11405) to acquire an area of State land, situate in Lassen Volcanic National Park, State of California, by exchange; to the Committee on the Public Lands.

Also, a bill (H. R. 11406) to consolidate or acquire alienated lands in Lassen Volcanic National Park in the State of California by exchange; to the Committee on the Public Lands.

By Mr. FISHER: A bill (H. R. 11407) to amend the World War veterans' act, 1924; to the Committee on World War Veterans' Legislation.

By Mr. HOFFMAN: A bill (H. R. 11408) to provide for the participation in the erection of monuments and tablets to mark historic points of interest in the Battle of Monmouth; to the Committee on the Library.

By Mr. REECE: A bill (H. R. 11409) to provide for the appointment of cadets at the United States Military Academy from among members of enlisted reserve corps who have pursued the prescribed course at a civilian military training camp; to the Committee on Military Affairs.

By Mr. SPROUL of Kansas (by request): A bill (H. R. 11410) to amend the act of October 28, 1919, known as the national prohibition act (41 Stat. L. 85), as amended and supplemented, for the purpose of enforcing the eighteenth amendment to the Constitution more efficiently and preventing evasions thereof; to the Committee on the Judiciary.

By Mr. WINTER: A bill (H. R. 11411) to amend an act entitled "An act to provide relief in cases of contracts connected with the prosecution of the war, and for other purposes," approved March 2, 1919, as amended; to the Committee on Mines and Mining.

By Mr. MORTON D. HULL: A bill (H. R. 11412) to amend section 117 of the Judicial Code; to the Committee on the Judiciary.

By Mr. MORIN: A bill (H. R. 11413) to regulate the procurement of motor transportation in the Army; to the Committee on Military Affairs.

By Mr. SUMMERS of Washington: A bill (H. R. 11414) to authorize the Secretary of Agriculture to establish trading rules and business practices for handlers of and dealers in fresh fruits and vegetables, to provide for a system of adjustment of disputes, and for other purposes; to the Committee on Agriculture.

By Mr. HOFFMAN: A bill (H. R. 11415) to amend the laws relating to navigation, and for other purposes; to the Committee on the Merchant Marine and Fisheries.

By Mr. MANLOVE: A bill (H. R. 11416) to amend an act entitled "An act to provide revenue, to regulate commerce with foreign countries to encourage the industries of the United States, and for other purposes"; to the Committee on Ways and Means.

By Mr. WAINWRIGHT: A bill (H. R. 11417) providing for the biennial appointment of a board of visitors to inspect and report upon the government and conditions in the Philippine Islands; to the Committee on Insular Affairs.

By Mr. HALL of Illinois: A bill (H. R. 11418) fixing salaries of United States Senators, Members of Congress, and others; to the Committee on the Judiciary.

By Mr. HUGHES: Resolution (H. Res. 125) to increase the salaries of employees of the House of Representatives, and for other purposes; to the Committee on Accounts.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ARNOLD: A bill (H. R. 11419) granting an increase of pension to Sarah E. Ward Goldsmith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11420) granting an increase of pension to Maggie J. La Dow; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11421) granting an increase of pension to Richard Howe; to the Committee on Pensions.

4444. By Mr. CLAGUE: Petition of Rev. J. P. Linn, Redwood Falls, Redwood County, Minn., and 90 others, supporting House bill 9588, Stalker bill; to the Committee on the Judiciary.

4445. Also, petition of H. F. Berkner, Sleepy Eye, Brown County, Minn., and others, opposing House bill 6465, Box immigration bill; to the Committee on Immigration and Naturalization.

4446. By Mr. DAVENPORT: Petition signed by George Patten and other citizens of Oneida County, N. Y., protesting against the passage of House bill 78; to the Committee on the District of Columbia.

4447. Also, petition signed by citizens of Newport, N. Y., urging the passage of a bill to increase pensions to veterans and widows of veterans of the Civil War; to the Committee on Invalid Pensions.

4448. By Mr. ESTEP: Petition of Harry Arenson and 12 other citizens of Pittsburgh, protesting against House bill 78, the Langford compulsory Sunday observance bill; to the Committee on the District of Columbia.

4449. By Mr. FAUST: Petition signed by many citizens of St. Joseph, Mo., petitioning for increased compensation for Civil War veterans and their widows; to the Committee on Invalid Pensions.

4450. By Mr. GALLIVAN: Petition of Boston Typographical Union, No. 13, John O. Battis, secretary-treasurer, 819–820 Province Building, Boston, Mass., recommending early and favorable consideration of the Cooper-Hawes bills (H. R. 7729 and S. 1940); to the Committee on Labor.

4451. By Mr. GARBER: Resolution of George R. Anderson Post, No. 65, American Legion, Ardmore, Okla., in support of Senate bill 777 and House bill 500, for retirement of disabled emergency Army officers; to the Committee on World War Veterans' Legislation.

4452. Also, letter of the Merchants' Association of New York, in support of House bill 8557, providing for the establishment, operation, and maintenance of foreign trade zones in ports of entry in the United States; to the Committee on Interstate and Foreign Commerce.

4453. Also, letter of Mrs. George T. Norton, secretary-treasurer Ladies Auxiliary of the Payne County Rural Letter Carriers' Association in support of the Gibson bill and the Reece road bill; to the Committee on the Post Office and Post Roads.

4454. Also, letter of District of Columbia Federation of Woman's Clubs, Washington, D. C., in support of Senate bill 1907 and House bill 6664; to the Committee on the District of Columbia.

4455. Also, letter of Andy Montgomery, of the Enid Poultry & Egg Co., Enid, Okla., in support of Senate bill 2506 and House bill 9288; to the Committee on Agriculture.

4456. By Mr. HADLEY: Petition of residents of Everett, Wash., protesting against the Lankford Sunday closing bill; to the Committee on the District of Columbia.

4457. Also, petition of residents of Jefferson County, Wash., protesting against the Lankford Sunday closing bill; to the Committee on the District of Columbia.

4458. Also, petition of residents of Snohomish, Wash., protesting against the Lankford Sunday closing bill; to the Committee on the District of Columbia.

4459. By Mr. HARRISON: Resolution of General Assembly of Virginia, in regard to the appropriation for roads; to the Committee on Appropriations.

4460. Also, resolutions of General Assembly of Virginia, in regard to emergency officers; to the Committee on Military Affairs.

4461. By Mr. HOFFMAN: Petition of Rev. Elijah F. Reed and 28 others of South Amboy, N. J., favoring enactment of the Lankford bill; to the Committee on the District of Columbia.

4462. Also, petition of Rev. G. E. Sehlbrede and 44 others of South Amboy, N. J., favoring enactment of the Lankford bill; to the Committee on the District of Columbia.

4463. By Mr. HOOPER: Petition of Maude Holmes and 127 other residents of Eaton Rapids, Mich., urging that a Civil War pension bill be brought to a vote; to the Committee on Invalid Pensions.

4464. By Mr. HOWARD of Nebraska: Petition signed by Laura Bane, of Genoa, Nebr., and 63 others of that city, protesting against the passage of the Lankford bill for compulsory observance of the Sabbath, or any other proposed legislation for compulsory Sunday observance; to the Committee on the District of Columbia.

4465. By Mr. IRWIN: Petition of Harry J. McRoberts, 337 East Broadway, East St. Louis, Ill., et al., praying for the enactment of legislation in behalf of veterans of the Civil War and widows of veterans of the Civil War at the present session of Congress; to the Committee on Invalid Pensions.

4466. By Mr. JENKINS: Petition signed by two voters of Meigs County, Ohio, urging that immediate steps be taken to bring to a vote a Civil War pension bill for the relief of widows and veterans; to the Committee on Invalid Pensions.

4467. By Mr. JOHNSON of Texas: Petition of Alamo Iron Works, of San Antonio, Tex., opposing House bill 7759, to amend the Judicial Code and to define and limit the jurisdiction of courts sitting in equity, etc.; to the Committee on the Judiciary.

4468. Also, petition of O. W. Atterbury, of San Antonio, Tex., indorsing the Box immigration bill; to the Committee on Immigration and Naturalization.

4469. Also, petition of Carl L. Lucas, of Houston, Tex., favoring and urging passage of the following bills: Senate bills 1727, 2106, and 2108; House bills 25, 55, 88, 89, 9059, 9502, 9585, and 9766, relative to Postal Service employees; to the Committee on the Post Office and Post Roads.

4470. Also, petition of Charles Penick, of Grapevine, Tex., favoring all legislation for the benefit of disabled American veterans; to the Committee on World War Veterans' Legislation.

4471. By Mr. JOHNSON of South Dakota: Petition of citizens of Iroquois and Herreid, S. Dak., protesting against the passage of any compulsory Sunday observance legislation; to the Committee on the District of Columbia.

4472. Also, petition of citizens of Milbank, S. Dak., urging immediate action on legislation increasing Civil War pensions; to the Committee on Invalid Pensions.

4473. By Mr. KELLY: Petition of Ladies of the Grand Army of the Republic, Maj. William G. Lowry Circle, of Wilkinsburg, Pa., praying for proper care of Civil War battle flags; to the Committee on the Library.

4474. Also, petition of Keystone Welfare Association, urging adoption of national origin plan in immigration legislation; to the Committee on Immigration and Naturalization.

4475. By Mr. MARTIN of Massachusetts: Petition of Rev. J. F. Knipschild and 95 other residents of Taunton, Mass., protesting against the enactment of a compulsory Sunday observance bill; to the Committee on the District of Columbia.

4476. By Mr. MEAD: Petition of numerous residents of Buffalo, N. Y., in opposition to Senate bill 1667; to the Committee on Interstate and Foreign Commerce.

4477. By Mr. MOORMAN: Petition submitted by the National Tribune, in reference to Civil War veterans; to the Committee on Invalid Pensions.

4478. Also, petition submitted by the National Tribune, in reference to Civil War veterans; to the Committee on Invalid Pensions.

4479. Also, petition submitted by residents of the fourth district of Kentucky, in reference to compulsory Sunday observance; to the Committee on the District of Columbia.

4480. By Mr. MOREHEAD: Petition containing over 200 names in behalf of the Federal employees at Omaha, Nebr., requesting the passage of the following bills: House bills 25, 492, 6518, and 7928; to the Committee on the Civil Service.

4481. By Mr. O'CONNELL: Petition of the drug and chemical section of the New York Board of Trade and Transportation, favoring the passage of House bill 9195, the Cuban parcel post bill; to the Committee on Ways and Means.

4482. Also, petition of the Upper Manhattan Chapter No. 42, Order of Ahepa National American Organization, favoring the passage of the Greece settlement legislation; to the Committee on Ways and Means.

4483. By Mr. PALMER: Memorial of Washington Camp No. 36, Patriotic Order Sons of America, of Pottsville, Pa., indorsing restriction of immigration, deportation of aliens, and continuance of our policy to protect American ideals and institutions; to the Committee on Immigration and Naturalization.

4484. By Mr. RAMSEYER: Petition of residents of sixth congressional district of Iowa, urging vote against the further postponement, amendment, or repeal of the national origins provision of the restrictive immigration act of 1924; to the Committee on Immigration and Naturalization.

4485. By Mr. SANDERS of New York: Petition of H. S. Austin and 18 other citizens of Attica, N. Y., protesting against the passage of House bill 78, the Lankford compulsory Sunday observance bill; to the Committee on the District of Columbia.

4486. By Mr. SHALLENBERGER: Petition against compulsory Sunday observance; to the Committee on the District of Columbia.

4487. By Mr. SINNOTT: Petition of numerous citizens of Malheur County, Oreg., protesting against House bill 78, or any compulsory Sunday bills; to the Committee on the District of Columbia.

4488. By Mr. TIMBERLAKE: Petition signed by 1,973 residents of second Colorado district, against passage of House bill 78; to the Commmittee on the District of Columbia.

4489. By Mr. WAINWRIGHT: Petition of seven citizens of Harrison, N. Y., and one residing at Lyons, N. Y., protesting against the passage of House bill 78, known as the Lankford compulsory Sunday observance bill; to the Committee on the District of Columbia.

4490. By Mr. WEAVER: Petition of citizens of western North Carolina, protesting against the passage of House bill 78, Lankford Sunday observance law; to the Committee on the District of Columbia.

4491. By Mr. WYANT: Petition of Pennsylvania Council of Churches, 1,400,000 members, protesting against naval bill; to the Committee on Naval Affairs.

4492. Also, petition of Jeannette Post, No. 344, the American Legion, favoring American Legion legislative program, and particularly House bills 5604 and 8297; to the Committee on World War Veterans' Legislation.

4493. Also, petition of Washington Camp, No. 627, Patriotic Order of Sons of America, favoring passage of House bill 10078; to the Committee on Immigration and Naturalization.

4494. Also, petition of 60 members of the Church of the Italian Mission of Mount Pleasant, Pa., protesting against big navy bill and favoring passage of Lankford bill (H. R. 78); to the Committee on the District of Columbia.

4495. Also, petition of five residents of Greensburg, Westmoreland County, Pa., protesting against Lankford Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

4496. Also, petition of Sons of the American Revolution, indorsing House bill 10171; to the Committee on the District of Columbia.

4497. Also, petition of Pennsylvania Federation of Labor, indorsing Cooper-Hawes bills (H. R. 7729 and S. 1940); to the Committee on Labor.

4498. Also, petition of Post A, Virginia Division Travelers' Protective Association of America, with membership of over 1,600, indorsing House bill 5588; to the Committee on Interstate and Foreign Commerce.

4499. Also, petition of Jacob's Creek Council, Junior Order of United American Mechanics, favoring passage of House bill 3; to the Committee on Immigration and Naturalization.

4500. Also, petition of John F. Wolf Commandery, No. 364, Ancient and Illustrious Order Knights of Malta, favoring passage of House bill 10078; to the Committee on Immigration and Naturalization.

4501. Also, petition of A. & S. Wilson Co., contractors and builders, Pittsburgh, Pa., indorsing House bill 5772; to the Committee on the Judiciary.

SENATE

MONDAY, *February 27, 1928*

The Chaplain, Rev. Zebarney T. Phillips, D. D., offered the following prayer:

Almighty God, who alone gavest us the breath of life and alone canst keep alive in us the holy desires Thou dost impart, we implore Thy grace and protection for the ensuing day. Keep us temperate in all things, and make us to be diligent in our several callings, just and upright in all our dealings, quiet and peaceable, full of compassion, ready to do good to all men according to our abilities and opportunities. Defend us from all dangers and adversities; and be graciously pleased to take us and all things belonging to us, and all who are near and dear unto us, under Thy fatherly care and protection. These things, and whatever else Thou shalt see necessary and convenient to us, we humbly beg through the merits and mediation of Thy Son Jesus Christ, our Lord and Savior. Amen.

The Chief Clerk proceeded to read the Journal of the proceedings of the legislative day of Friday last, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed a bill (H. R. 11133) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1929, and for other purposes, in which it requested the concurrence of the Senate.

HOUSE BILL REFERRED

The bill (H. R. 11133) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of such District for the fiscal year ending June 30, 1929, and for other purposes, was read twice by its title and referred to the Committee on Appropriations.

CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Dale	Harrison	Norbeck
Bayard	Deneen	Hayden	Norris
Bingham	Dill	Heflin	Nye
Black	Edge	Howell	Oddie

Cutting	Harris	Neely	Smoot

Steck	Thomas	Walsh, Mont.	Willis
Steiwer	Tydings	Warren	
Stephens	Tyson	Waterman	
Swanson	Walsh, Mass.	Watson	

The VICE PRESIDENT. Eighty-one Senators having answered to their names, a quorum is present.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate the following joint resolution of the Legislature of the State of Kentucky, which was ordered to lie on the table:

IN SENATE,

Regular session 1928, Friday, February 17, 1928.

Joint Resolution 12, memorializing the Congress of the United States to take prompt and favorable action upon, and to adopt the legislation embodied in the Tyson-Fitzgerald bill (H. R. 500; S. 777) providing relief for disabled emergency Army officers, who incurred physical disability in line of duty while in service of the United States during the World War

The following bill was reported from the house, ordered to be printed, viz, joint resolution memorializing Congress, etc.:

Be it enacted by the General Assembly of the Commonwealth of Kentucky—

Whereas there were nine classes of officers in the World War, namely, (1) Regular Army officers, (2) regular naval officers, (3) regular Marine Corps officers, (4) provisional Army officers, (5) provisional naval officers, (6) provisional Marine Corps officers, (7) emergency Army officers, (8) emergency naval officers, (9) emergency marine officers; and

Whereas all officers disabled in line of duty in the service of the United States during the World War are granted retirement privileges, except the emergency Army officers, disabled in line of duty; and

Whereas it is simply justice to the emergency Army officers who served in the World War and who were disabled in line of duty to receive the same benefits accorded the other eight classes of officers; and

Whereas numerous States and organizations have heretofore presented resolutions to the United States Senate and House of Representatives requesting that this condition be corrected; and

Whereas it is the sense of this body that same should be done: Therefore be it

Resolved, That the Congress of the United States be memorialized to make prompt and favorable action upon the Tyson-Fitzgerald bill (H. R. 500 and S. 777), to the end that same be enacted into law and such discrimination against the disabled emergency Army officers be rectified at the earliest moment possible; and be it further

Resolved, That the chief clerk of the senate forward one copy each of this resolution to the President of the United States, to the President of the Senate and the Speaker of the House of Representatives of the United States, and to our Senators and Representatives in the United States Congress.

Mr. FESS presented sundry petitions numerously signed by citizens of the State of Ohio, praying for the passage of Senate bill 1667, the so-called Brookhart bill, relative to the distribution of motion pictures in the various motion-picture zones of the country, which were referred to the Committee on Interstate Commerce.

Mr. WARREN presented resolutions adopted by the Sheridan Commercial Club, of Sheridan, Wyo., favoring the passage of legislation providing Federal funds for the maintenance of State and Federal aid roads in the public-lands States, also the making of more adequate appropriation for the development of roads through Government lands and reservations, which were referred to the Committee on Post Offices and Post Roads.

Mr. FRAZIER presented the petition of A. M. Nees and 31 other citizens of Alexander, N. Dak., praying for the passage of House bill 25, the so-called Lehlbach retirement bill, and House bill 6518, the so-called Welch bill, relative to civil-service employees, which was referred to the Committee on Civil Service.

Mr. LA FOLLETTE presented a memorial numerously signed by sundry citizens of the State of Wisconsin, remonstrating against the passage of the so-called Brookhart bill, relative to the distribution of motion pictures in the various motion-picture zones of the country, which was referred to the Committee on Interstate Commerce.

Mr. BLAINE presented a petition of 33 citizens of the State of Wisconsin, praying for the passage of the so-called McNary-Haugen farm relief bill, which was referred to the Committee on Agriculture and Forestry.

He also presented petitions of 130 citizens of the State of Wisconsin, praying for the passage of the bill (S. 1481) to amend sections 11 and 12 of an act to limit the immigration of aliens into the United States, and for other purposes, approved May 26, 1924, which were referred to the Committee on Immigration.

He also presented petitions of 52 citizens of the State of Wisconsin, praying that the present quota distribution of immigration based on the census of 1890 be retained and that the proposed quota distribution on the basis of national origins be annulled, and that no further reduction of the Scandinavian quotas be made, which were referred to the Committee on Immigration.

Mr. COPELAND presented a petition of sundry citizens of Highland, N. Y., praying for the adoption of the so-called Wheeler resolution providing an investigation of American concessions abroad, which was referred to the Committee on Foreign Relations.

He also presented a telegram in the nature of a petition from Stephen Larios and John Stamatokos, of Kingston, N. Y., praying for the adoption of the pending debt settlement with Greece, which was referred to the Committee on Finance.

He also presented a resolution adopted by Harry B. Bentley Post, No. 443, the American Legion, at Elmira, N. Y., protesting against the transfer of the camp for veterans at Bath, N. Y., to the United States Veterans' Bureau, etc., which was referred to the Committee on Finance.

He also presented a resolution adopted by Friendship Council, No. 44, Junior Order United American Mechanics, of Fort Richmond, N. Y., favoring the passage of legislation providing for the registration of all aliens in the United States and an alien deportation bill, and also that the national-origins provision of the existing immigration law be carried into execution, which was referred to the Committee on Immigration.

He also presented memorials of sundry citizens and organizations in the State of New York, remonstrating against the postponement or repeal of the national-origins provision of the existing immigration act, which were referred to the Committee on Immigration.

Mr. McLEAN presented a letter in the nature of a petition of the Bridgeport (Conn.) Traffic Association, praying for the passage of House bill 9195, providing for parcel-post service to Cuba, etc., which was referred to the Committee on Post Offices and Post Roads.

He also presented telegrams in the nature of petitions from the Waterbury Chapter; Elpis Chapter, No. 117, of New Britain; and Stamford Chapter, No. 99, all of the Order of Ahepa, in the State of Connecticut, praying for adoption of the proposed debt settlement between the United States and Greece, which were referred to the Committee on Finance.

He also presented a letter in the nature of a petition from Ira R. Wild, past commander, Department of Connecticut, Grand Army of the Republic, of Danbury, Conn., praying for the passage of the so-called Norris bill, providing a reunion of the blue and the gray as guests of the Nation, which was referred to the Committee on Military Affairs.

He also presented memorials of members of the Second Congregational Church of Manchester, the Young Men's Christian Association of Haddam, the congregation of the United Church of Beacon Falls, and of sundry citizens of Cheshire, all in the State of Connecticut, remonstrating against adoption of the proposed naval building program, which were referred to the Committee on Naval Affairs.

He also presented petitions of Rau-Locke Post, No. 8, of Hartford; Stanley Dobosz Post, No. 14, of Rockville; Seicheprey Post, No. 2, of Bristol; the August Matthias Post, No. 63, of Westport; Carlson-Sjovall Post, No. 105, of Cromwell; and Ormont Post, No. 69, of Portland, all of the American Legion Auxiliary, in the State of Connecticut, praying for the adoption of the proposed naval building program, which were referred to the Committee on Naval Affairs.

Mr. REED of Pennsylvania presented a memorial of the Philadelphia (Pa.) Board of Trade, which was referred to the Committee on the Judiciary and ordered to be printed in the RECORD, as follows:

PHILADELPHIA BOARD OF TRADE,
Philadelphia.

To the honorable Senate and House of Representatives in Congress assembled:

This memorial of the Philadelphia Board of Trade respectfully represents—

That it has given careful consideration to the provisions of H. R. 7759 entitled, "A bill to amend the Judicial Code and to define and limit the jurisdiction of courts sitting in equity, and for other purposes";

That in the view of your memorialist this bill, if enacted, would most seriously impair the usefulness of the courts in affording to the citizens of the United States, without discrimination, that protection to their lives and liberties which is essential to them as individuals and to the public welfare;

That the right to the pursuit of happiness—the right to work and to enjoy the rewards of one's labor free from threats and intimidations—is guaranteed to all by constitutional provision; no government can do justice or maintain the freedom of its people unless this fundamental right is most jealously guarded and preserved;

That to limit the power of the courts, as proposed in this bill, to the protection of "tangible and transferable" property is to expose to violence rights more sacred than any physical property; the right to acquire and use property without unlawful interference is fundamental; the home and the factory can alike be rendered valueless if the courts may protect the physical structure, but are deprived of power to protect those lawfully engaged in the enjoyment or use of that structure;

That the power of the courts to issue injunctions for the protection of individual rights and the maintenance of public services is subject to well-defined limitations; it can be used in general only to prevent threatened wrong that would result in injury of an immediate and irreparable kind; to this end it is most necessary. The courts can not be interfered with in the performance of their functions without danger to each individual citizen and to the stability of government: Therefore

Your memorialist, the Philadelphia Board of Trade, is opposed to the enactment of the suggested measure, H. R. 7759, for the reasons set forth in the foregoing, and earnestly petitions your honorable bodies not to enact as law the bill in question;

And your memorialist will ever pray.

THE PHILADELPHIA BOARD OF TRADE,
[SEAL.] WM. M. COATES, *President.*
Attest:
WILLIAM R. TUCKER, *Secretary.*

CONDITIONS IN PENNSYLVANIA COAL FIELDS

Mr. REED of Pennsylvania presented a telegram from Horace F. Baker, president of the Pittsburgh Terminal Coal Corporation, which was referred to the Committee on Interstate Commerce and ordered to be printed in the RECORD, as follows:

PITTSBURGH, PA., *February 7, 1928.*

Hon. DAVID A. REED,
Care of United States Senate, Washington, D. C.:

Understand Senator JOHNSON read into Senate RECORD yesterday, page 2470, telegram from Representative LAGUARDIA concerning confession one Hampton Matthews that he and another fired certain shots at store and union barracks, Bruceton, February 1, for which promised $25 by policeman this company. Have run this down carefully; have seen copy alleged confession. Investigation shows clearly, I believe, that Matthews signed confession while under arrest, after being terribly beaten and kicked while handcuffed in office of justice of the peace and under threats of being shot. Affidavit of Matthews says that revolver drawn and he was forced to sign. Believe have absolute proof that Matthews was working in mine another location at time of alleged shooting. Justice of peace taking confession was former employee of this company, and both constables present at this time are striking miners. Concerning Johnson resolution, would welcome opportunity to tell of dastardly acts of our opponents in this strike.

HORACE F. BAKER,
President Pittsburgh Terminal Coal Corporation.

LAKE CARGO COAL HANDLED AT LAKE ERIE PORTS

Mr. REED of Pennsylvania presented a statement showing the origin districts, lake cargo coal handled at Lake Erie ports, years 1923 to 1927, inclusive, which was referred to the Committee on Interstate Commerce and ordered to be printed in the RECORD, as follows:

REPORTS OF COMMITTEES

Mr. REED of Pennsylvania, from the Committee on Military Affairs, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (S. 1822) to authorize the Secretary of War to transfer or loan aeronautical equipment to museums and educational institutions (Rept. No. 382);

A bill (S. 1825) to amend section 12 of the act approved June 10, 1922, entitled "An act to readjust the pay and allowances of commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," as amended by the act of June 1, 1926 (44 Stat. L. 680), so as to authorize an allowance of 3 cents per mile, in lieu of transportation in kind, for persons using privately owned conveyances while traveling under competent orders (Rept. No. 383);

A bill (S. 1828) to amend the second paragraph of section 5 of the national defense act, as amended by the act of September 22, 1922, by adding thereto a provision that will authorize the names of certain graduates of the general service schools and of the Army War College, not at present eligible for selection to the General Staff Corps eligible list, to be added to that list (Rept. No. 384);

A bill (S. 1829) to authorize the collection in monthly installments, of indebtedness due the United States from enlisted men, and for other purposes (Rept. No. 385);

A bill (S. 1833) to amend the act approved June 1, 1926 (44 Stat. L. 680), authorizing the Secretary of War to exchange deteriorated and unserviceable ammunition and components, and for other purposes (Rept. No. 386);

A bill (S. 2387) to authorize appropriations for contingencies of the Army (Rept. No. 387);

A bill (S. 2537) to amend section 110, national defense act, so as to provide better administrative procedure in the disbursements for pay of National Guard officers and enlisted men (Rept. No. 388);

A bill (S. 2948) to amend section 6, act of March 4, 1923, as amended, so as to better provide for care and treatment of members of the civilian components of the Army who suffer personal injury in line of duty, and for other purposes (Rept. No. 389);

A bill (S. 2950) to amend the second paragraph of section 67, national defense act, as amended (Rept. No. 390);

A bill (S. 3058) to amend that provision of the act approved March 3, 1879 (20 Stat. L. 412), relating to issue of arms and ammunition for the protection of public money and property (Rept. No. 391);

A bill (H. R. 230) to authorize an appropriation for the recovery of bodies of officers, soldiers, and civilian employees (Rept. No. 392);

A bill (H. R. 233) to provide for the purchase of land in connection with the Fort Monmouth Military Reservation, N. J. (Rept. No. 393);

A bill (H. R. 234) to amend section 47d of the national defense act, as amended, so as to authorize an allowance of 1

cent a mile for subsistence of candidates in going to and returning from camp (Rept. No. 394);

A bill (H. R. 235) to authorize the payment of travel expenses from appropriations for investigations and surveys of battle fields (Rept. No. 395);

A bill (H. R. 238) to amend an act entitled "An act to provide for the payment of six months' pay to the widow, children, or other designated dependent relative of any officer or enlisted man of the Regular Army whose death results from wounds or disease not the result of his own misconduct," approved December 17, 1919, so as to include nurses of the Regular Army (Rept. No. 396);

A bill (H. R. 248) to authorize appropriations to be made for the disposition of remains of military personnel and civilian employees of the Army (Rept. No. 397);

A bill (H. R. 5476) to authorize the Secretary of War to sell to the Pennsylvania Railroad Co. a tract of land situate in the city of Philadelphia and State of Pennsylvania (Rept. No. 398);

A bill (H. R. 7195) to provide for the purchase of horses and mules for the Military Establishment (Rept. No. 399); and

A bill (H. R. 5635) to amend the act approved June 7, 1924, authorizing the Secretary of War to sell a portion of the Carlisle Barracks Reservation (Rept. No. 402).

Mr. REED of Pennsylvania also, from the Committee on Military Affairs, to which were referred the following bills, reported them each with an amendment and submitted reports thereon:

A bill (H. R. 242) to amend section 90 of the national defense act, as amended, so as to authorize employment of additional civilian caretakers for National Guard organizations, under certain circumstances, in lieu of enlisted caretakers heretofore authorized (Rept. No. 400); and

A bill (H. R. 3510) to authorize the President, by and with the advice and consent of the Senate, to appoint Capt. George E. Kraul a captain of Infantry, with rank from July 1, 1920 (Rept. No. 401).

Mr. REED of Pennsylvania also, from the Committee on Military Affairs, to which were referred the following bills, reported them severally with amendments and submitted reports thereon:

A bill (S. 1823) to amend section 2 of the act approved June 6, 1924 (43 Stat. L. 470), entitled "An act to amend in certain particulars the national defense act of June 3, 1916, as amended, and for other purposes" (Rept. No. 403);

A bill (S. 1830) to authorize the Secretary of War to withhold pay or allowances of any person in the military service to cover indebtedness due the United States or its military agencies or instrumentalities (Rept. No. 404);

A bill (S. 1831) to authorize the Secretary of War and the Secretary of the Navy to class as secret certain material, apparatus, or equipment for military and naval use, and for other purposes (Rept. No. 405);

A bill (S. 1838) to amend section 110 of the national defense act by repealing and striking therefrom certain provisions prescribing additional qualifications for National Guard State staff officers, and for other purposes (Rept. No. 406);

A bill (H. R. 8309) to amend an act entitled "An act to prohibit the unauthorized wearing, manufacture, or sale of medals and badges awarded by the War Department," approved February 24, 1923 (Rept. No. 407); and

A bill (H. R. 9202) to authorize construction at the United States Military Academy, West Point, N. Y. (Rept. No. 408).

Mr. GEORGE, from the Committee on Military Affairs, to which were referred the following bills, reported them each without amendment:

A bill (H. R. 2294) for the relief of George H. Gilbert; and

A bill (H. R. 4655) for the relief of David E. Goodwin.

Mr. WATERMAN, from the Committee on Naval Affairs, to which was referred the bill (S. 1434) for the relief of Mattie Halcomb, reported it with amendments and submitted a report (No. 409) thereon.

Mr. STEIWER, from the Committee on Claims, to which was referred the bill (H. R. 2524) for the relief of Mary M. Jones, reported it without amendment and submitted a report (No. 410) thereon.

Mr. BAYARD, from the Committee on Claims, to which was referred the bill (S. 3294) for the relief of certain newspapers for advertising services rendered the Public Health Service of the Treasury Department, reported it without amendment and submitted a report (No. 411) thereon.

Mr. CAPPER, from the Committee on Claims, to which was referred the bill (S. 1956) for the relief of Levi R. Whitted, reported it with amendments and submitted a report (No. 412) thereon.

Mr. WILLIS, from the Committee on Territories and Insular Possessions, to which were referred the following bills reported them each with amendments and submitted reports thereon:

A bill (S. 2069) to extend the provisions of section 1814 of the Revised Statutes to the Territories of Hawaii and Alaska (Rept. No. 413); and

A bill (S. 2292) providing for the employment of certain civilian assistants in the office of the Governor General of the Philippine Islands, and fixing salaries of certain officials (Rept. No. 414).

Mr. DALE, from the Committee on Commerce, to which were referred the following bills, reported them severally with amendments and submitted reports thereon:

A bill (S. 2449) to authorize the construction of a bridge across the Mississippi River at or near the city of Baton Rouge, in the parish of East Baton Rouge, and a point opposite thereto in the parish of West Baton Rouge, State of Louisiana (Rept. No. 416);

A bill (S. 2965) authorizing the State of Indiana, acting by and through the State highway commission, to construct, maintain, and operate a toll bridge across the Wabash River, at or near Vincennes, Ind. (Rept. No. 417); and

A bill (H. R. 5727) to extend the times for commencing and completing the construction of a bridge across the Ouachita River at or near Harrisonburg, Lr. (Rept. No. 415);

A bill (H. R. 6073) authorizing E. M. Elliott, of Chicago, his heirs, legal representatives, and assigns to construct, maintain, and operate a bridge across the Ohio River at Ravenswood, W. Va. (Rept. No. 418).

Mr. DALE also, from the Committee on Commerce, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

A bill (H. R. 5818) authorizing J. H. Peacock, F. G. Bell, S. V. Taylor, E. C. Amann, and C. E. Ferris, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near the city of Prairie du Chien, Wis. (Rept. No. 419);

A bill (H. R. 6973) authorizing E. H. Wegener, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Chester, Ill. (Rept. No. 420);

A bill (H. R. 8227) authorizing the Sunbury Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Susquehanna River at or near Bainbridge Street, in the city of Sunbury, Pa. (Rept. No. 421);

A bill (H. R. 8530) granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Coosa River near Cedar Bluff, in Cherokee County, Ala. (Rept. No. 422);

A bill (H. R. 8531) granting the consent of Congress to the Highway Department of the State of Alabama to construct, maintain, and operate a free highway bridge across the Coosa River on the Columbiana-Talladega road between Talladega and Shelby Counties, Ala. (Rept. No. 423);

A bill (H. R. 8726) authorizing Oscar Baerteh, Christ Buhmann, and Fred Reiter, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Alma, Wis. (Rept. No. 424);

A bill (H. R. 8740) granting the consent of Congress to the county of Cook, State of Illinois, to construct, maintain, and operate a free highway bridge across the Little Calumet River in Cook County, State of Illinois (Rept. No. 425);

A bill (H. R. 8741) authorizing the Dravo Contracting Co., its successors and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Chester, Ill. (Rept. No. 426);

A bill (H. R. 8743) to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near St. Paul and Minneapolis, Minn. (Rept. No. 427);

A bill (H. R. 8818) granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a free highway bridge across the Red River at or near Moncla, La. (Rept. No. 428);

A bill (H. R. 8837) authorizing the American Bridge & Ferry Co. (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Cassville, Wis. (Rept. No. 429);

A bill (H. R. 8896) granting the consent of Congress to the State of Alabama to construct, maintain, and operate a free highway bridge across the Conecuh River on the Brewton-Andalusia road in Escambia County, Ala. (Rept. No. 430); and

A bill (H. R. 9064) granting the consent of Congress to the Highway Department of the State of Alabama to construct,

maintain, and operate a free highway bridge across the Coosa River at or near Pell City, on the Pell City-Anniston road between Calhoun and St. Clair Counties, Ala. (Rept. No. 431).

Mr. NORBECK, from the Committee on Banking and Currency, to which was referred the bill (H. R. 81) to authorize the coinage of silver 50-cent pieces in commemoration of the one hundred and fiftieth anniversary of the discovery of the Hawaiian Islands by Capt. James Cook, and for the purpose of aiding in establishing a Capt. James Cook memorial collection in the archives of the Territory of Hawaii, reported it without amendment and submitted a report (No. 432) thereon.

Mr. WATERMAN, from the Committee on the Judiciary, to which was referred the joint resolution (S. J. Res. 41) directing the Comptroller General of the United States to reopen, readjust, and resettle the account between the State of Nevada and the United States, reported it with an amendment and submitted a report (No. 433) thereon.

Mr. CARAWAY, from the Committee on Claims, to which was referred the bill (S. 3097) for the relief of the State of North Carolina, reported it with an amendment and submitted a report (No. 434) thereon.

Mr. FESS, from the Committee on the Library, to which were referred the following bills and joint resolution, reported them severally without amendment:

A bill (S. 3092) to enable the George Washington Bicentennial Commission to carry out and give effect to certain approved plans;

A bill (S. 3292) providing for turning over to the Ohio State Archæological and Historical Society two dedication stones formerly a part of one of the locks of the Ohio & Erie Canal; and

A bill (H. R. 9036) to increase the salary of the Librarian of Congress.

Mr. FESS, from the Committee on the Library, to which was referred the joint resolution (S. J. Res. 98) authorizing the selection of sites and the erection of monuments to John Bunyan and William Harvey in Washington City, D. C., reported it with an amendment.

He also, from the Committee on the Library, to which was referred the bill (S. 1169) to create an establishment to be known as the national archives, reported it with amendments and submitted a report (No. 435) thereon.

Mr. BLAINE, from the Committee on the Judiciary, to which was referred the bill (H. R. 8725) to amend section 224 of the Judicial Code, reported it with amendments and submitted a report (No. 436) thereon.

Mr. BROOKHART, from the Committee on Military Affairs, to which were referred the following bills, reported adversely thereon:

A bill (S. 1928) to provide for appointing Robert J. Burton, a former field clerk, Quartermaster Corps, a warrant officer, United States Army; and

A bill (H. R. 2649) authorizing the President to reappoint John P. Pence, formerly an officer in the Signal Corps, United States Army, an officer in the Signal Corps, United States Army.

Mr. BROOKHART also, from the Committee on Military Affairs, to which was referred the bill (S. 2966) for the relief of Oliver C. Sell, reported it with an amendment and submitted a report (No. 437) thereon.

ENROLLED BILL PRESENTED

Mr. GREENE, from the Committee on Enrolled Bills, reported that on February 25, 1928, that committee presented to the President of the United States the enrolled bill (S. 1759) to authorize appropriation of treaty funds due the Wisconsin Pottawatomi Indians.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SHEPPARD:

A bill (S. 3387) to authorize the Secretary of War to lend War Department equipment for use at the Tenth National Convention of the American Legion; to the Committee on Military Affairs.

By Mr. REED of Pennsylvania:

A bill (S. 3388) to equalize the rank of the Chief of Staff of the Army and the Chief of Naval Operations; to the Committee on Military Affairs.

By Mr. GEORGE:

A bill (S. 3389) to limit the time for bringing suit on the bonds of clerks of United States district courts; to the Committee on the Judiciary.

By Mr. COPELAND:

A bill (S. 3390) granting an increase of pension to John B. Wickersham; to the Committee on Pensions.

By Mr. RANSDELL:

A bill (S. 3391) to establish a national institute of health, to authorize increased appropriations for the Hygienic Laboratory, and to authorize the Government to accept donations for use in ascertaining the cause, prevention, and cure of disease affecting human beings, and for other purposes; to the Committee on Commerce.

By Mr. FLETCHER:

A bill (S. 3392) to amend section 3207 of the Revised Statutes, as amended by section 1030 of the act approved June 2, 1924; to the Committee on Finance.

By Mr. DILL:

A bill (S. 3393) granting a pension to Thomas F. Strafford; to the Committee on Pensions.

By Mr. NEELY:

A bill (S. 3394) granting compensation to Bessie Pearl Meek; to the Committee on Claims.

By Mr. CAPPER:

A bill (S. 3395) to amend subchapter 3 of Chapter XVI of the Code of Law for the District of Columbia; to the Committee on the District of Columbia.

By Mr. McNARY:

A bill (S. 3396) providing for the creation of a national park in Marion County, in Oregon, to be known as the Silver Creek Falls national park, and authorizing the appropriation of money therefor; to the Committee on Public Lands and Surveys.

By Mr. SACKETT (for Mr. GOFF):

A bill (S. 3397) granting a pension to Esta Bonham (with accompanying papers); to the Committee on Pensions.

By Mr. WILLIS:

A bill (S. 3398) granting an increase of pension to Florence W. Liston (with accompanying papers); to the Committee on Pensions.

By Mr. TYDINGS:

A bill (S. 3399) to readjust the pay of certain commissioned personnel of the Army; to the Committee on Military Affairs.

A bill (S. 3400) to exempt certain plant foods and the essential ingredients thereof from special dumping duty; to the Committee on Finance.

By Mr. COPELAND:

A bill (S. 3401) to provide for regulating traffic in certain clinical thermometers, and for other purposes; to the Committee on Interstate Commerce.

By Mr. WALSH of Montana:

A bill (S. 3402) to extend the benefits of the United States employees' compensation act, of September 7, 1916, to Dorothy Anderson; to the Committee on Claims.

By Mr. SMOOT:

A bill (S. 3403) to authorize reimbursement of Dr. B. W. Black, formerly a commissioned officer of the United States Public Health Service, for travel performed subsequent to June 7, 1924, under orders of the Secretary of the Treasury, issued prior to that date; to the Committee on Finance.

By Mr. ROBINSON of Indiana:

A bill (S. 3404) granting an increase of pension to Wallace Barkman (with accompanying papers); and

A bill (S. 3405) granting pensions and increase of pensions to certain soldiers and sailors of the war with Spain, the Philippine insurrection, or the China relief expedition, to certain widows, minor children, helpless children, and dependent parents of such soldiers and sailors, and for other purposes (with accompanying papers); to the Committee on Pensions.

By Mr. SHIPSTEAD:

A bill (S. 3406) granting a pension to Mary Asylda Moreau (with accompanying papers); to the Committee on Pensions.

A bill (S. 3407) providing for the examination and survey of the Mississippi River in and in the vicinity of Minneapolis, Minn.; to the Committee on Commerce.

By Mr. EDGE:

A joint resolution (S. J. Res. 101) authorizing the Postmaster General to issue a set of stamps relative to the good-will flight of Colonel Lindbergh; to the Committee on Post Offices and Post Roads.

CHANGES OF REFERENCE

On motion of Mr. FESS, the Committee on the Library was discharged from the further consideration of the bill (S. 3254) authorizing the erection of a memorial to John D. Orear, and it was referred to the Committee on Foreign Relations.

On motion of Mr. HOWELL, the Committee on Claims was discharged from the further consideration of the bill (S. 3289) for the relief of Carrie S. Abbe, and it was referred to the Committee on Civil Service.

COLUMBIA BASIN RECLAMATION PROJECT

Mr. BORAH submitted an amendment intended to be proposed by him to the bill (S. 1462) for the adoption of the Columbia Basin reclamation project, and for other purposes, which was ordered to lie on the table and to be printed.

CUMBERLAND RIVER BRIDGE, TENNESSEE

Mr. TYSON submitted an amendment intended to be proposed by him to the bill (H. R. 9137) granting the consent of Congress to the Highway Department of the State of Tennessee, to construct, maintain, and operate a bridge across the Cumberland River on the Lebanon-Hartsville road in Wilson and Trousdale Counties, Tenn., which was referred to the Committee on Commerce and ordered to be printed.

PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that on February 25, 1928, the President approved and signed the following acts:

S. 1193. An act granting certain rocks or islands to the State of Oregon for park purposes;

S. 1312. An act to change the name of the Utah National Park, the establishment of which is provided for by the act of Congress approved June 7, 1924 (43 Stat. 593), to the Bryce Canyon National Park, and for other purposes; and

S. 1959. An act to transfer to the Secretary of the Navy jurisdiction over oil and gas leases issued by the Secretary of the Interior on lands in naval petroleum reserves.

REGULATION OF IMMIGRATION (S. DOC. NO. 65)

The PRESIDING OFFICER (Mr. BINGHAM in the chair) laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Immigration and ordered to be printed:

To the Senate:

In response to Senate Resolution 156 of February 23, 1928, there is transmitted herewith a copy of the joint communication of the Secretary of State, the Secretary of Commerce, and the Secretary of Labor to the President, dated February 25, 1928, with accompanying report of the departmental committee appointed under the provisions of the immigration act of 1924.

CALVIN COOLIDGE.

THE WHITE HOUSE, *February 27, 1928.*

CLAIM OF BRITISH GOVERNMENT FOR RELIEF OF AMERICAN NATIONALS IN RUSSIA IN 1920 (S. DOC. NO. 66)

The PRESIDING OFFICER (Mr. BINGHAM in the chair) laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Foreign Relations and ordered to be printed:

To the Congress of the United States:

I transmit herewith a report from the Secretary of State in relation to a claim presented by His Britannic Majesty's Government for the payment of a sum of money turned over to American citizens in Russia by the British subject, the Reverend Mr. North, upon his departure from Moscow, and I recommend that an appropriation be authorized to effect a settlement of this claim in accordance with the recommendation of the Secretary of State.

CALVIN COOLIDGE.

THE WHITE HOUSE, *February 27, 1928.*

PANAMA RAILROAD & STEAMSHIP LINE

Mr. FLETCHER. Mr. President, I desire to have printed in the RECORD an interesting communication from the Panama Railroad and Steamship Line, of date February 24, 1928, and a copy of the communication inclosed therein, of date February 14, 1927.

The VICE PRESIDENT. Without objection, it is so ordered.

The communications are as follows:

PANAMA RAILROAD CO.,
(PANAMA RAILROAD STEAMSHIP LINE),
New York, February 24, 1928.

Hon. DUNCAN U. FLETCHER,
United States Senate, Washington, D. C.

DEAR SIR: Your letter of the 21st instant reached this office shortly after the departure of Mr. Rossbottom for the Isthmus on a business trip.

In the event that you should have need for the information you request, and in order that you may have it immediately available, we give you the following information, which Mr. Rossbottom will probably amplify later, with comments that may be of particular interest to you.

Our records are kept for fiscal periods, and our fiscal year ends June 30. All of the following figures are for the fiscal year ended June 30, 1927.

We operated two combined passenger and freight steamers on a fortnightly schedule between New York and Cristobal, stopping en route at Port au Prince, Haiti, both on the southbound and northbound voyages. Those steamers are the steamship *Ancon*, 9,640 tons gross, 7,531 tons net, and the steamship *Cristobal*, 9,604 tons gross, 7,026 tons net. The steamship *Ancon* has accommodations for 258 passengers and the *Cristobal* can accommodate 174 passengers.

We also operated two small freight steamers of the lake type on an approximately monthly schedule from New York to west coast ports of Colombia and Ecuador as far south as Guayaquil. That service was inaugurated by us some years ago in order to provide effective American competition to the English flag steamers of the Pacific Steam Navigating Co., which discontinued its former practice of transhipping cargoes in connection with our line and extended its west coast service beyond the Isthmus to New York. Our service has since been maintained and has been a considerable factor in stabilizing the rate and traffic situation in that territory. The steamers are the S. S. *Guayaquil*, 2,592 tons gross, 1,613 tons net, and the S. S. *Buenaventura*, 2,618 tons gross, 1,610 tons net.

The operating revenue of the steamship line was $2,026,875.91, against operating expenses of $2,075,843.68, leaving a deficit of $48,967.77. That deficit, however, tells only a small portion of the story of our operations. As you are no doubt aware, we carry freight for account of the United States Government at substantial reductions from tariff, and transport the personnel of the various Government departments stationed on the Isthmus and their families at rates that in most instances are far below cost. Had we been paid for the transportation of Government freight and passengers at our full tariff rates, we would have received an additional revenue of $484,028.93, so that our deficit of $48,967.77 appears to have been a very good investment for the Government.

We charge depreciation on our steamers at the rate of 6 per cent per annum, and our charges to operating expenses on that account during the past fiscal period amounted to $116,601.74.

Our voyage or current repairs for that period amounted to $81,480.11.

In addition to the foregoing voyage or current repairs, it is our practice to take the expenses for extraordinary repairs and prorate those expenses over a period of years in order that no one fiscal period will be disproportionately affected. In 1920 we spent for extensive repairs to the S. S. *Cristobal* $270,423.62. That expense was amortized and regular charges made since to the operating expenses of that steamer. During the past fiscal year there was charged into operating expenses on that account the sum of $30,480.43, completing the retirement of that obligation. There are no charges for extraordinary repairs now being made against that steamer as they have all been absorbed. In 1925 we spent for extensive repairs to the S. S. *Ancon* the sum of $93,074. That expense was similarly amortized and during the past fiscal year operating expenses were charged with $13,200 on that account. The total charges to operating expenses for both above steamers during the fiscal period on account of extraordinary repairs were $43,680.43, and as all charges on the S. S. *Cristobal* had been absorbed there remained to be charged June 30, 1927, the sum of $71,074 against the S. S. *Ancon*, which is being provided for at the rate of approximately $1,100 per month.

We do not carry insurance, as we are prohibited by Congress enactment from doing so. The intent of that legislation was to discontinue the payment of insurance premiums by the Panama Railroad Co., and to have it reimbursed for its losses by congressional appropriation. Congress, however, has not reimbursed us for a single loss since our insurance was discontinued on July 1, 1908, nor have we asked it to do so. While no insurance premiums have been paid since July 1, 1908, we have absorbed out of our earnings losses aggregating $901,970.09, included among which was the sum of $191,865.92 for the loss of the S. S. *Finance* in 1908, within several months after our insurance had been discontinued; $234,580.64 due to collision of our S. S. *Panama* with the S. S. *Saratoga* in 1917; and a number of other losses ranging up to $76,000.

As stated before, the foregoing information is submitted so that it may be available for your immediate reference. If there are other points on which Mr. Rossbottom feels that further information will be helpful to you, he will, no doubt, communicate with you further promptly upon his return late in March.

You will doubtless recall that information similar to the foregoing was supplied to you through the Secretary of War for the fiscal year ended June 30, 1926, and for your ready reference we inclose here-

with a copy of the letter written by Mr. Rossbottom to the chief of office of the Panama Canal under date of February 14, 1927, which embodies the data that were submitted to you.

Yours respectfully, W. R. PFIZER,
Assistant to Vice President.

PANAMA RAILROAD CO.,
(PANAMA RAILROAD & STEAMSHIP LINE),
New York, February 14, 1927.

Mr. A. L. FLINT,
Chief of Office, The Panama Canal,
Washington, D. C.

DEAR SIR: 1. Your letter of the 11th instant reached us this morning.

2. We submit the following information in reply to the inquiries contained in Senator FLETCHER'S letter to the Secretary of War, dated the 9th.

3. The Panama Railroad & Steamship Line, during the fiscal year that ended June 30, 1926, and up to the present time, is operating four steamships. Their names and tonnage are as follows:

	Gross	Net	Dead weight
S. S. Ancon	9,640	7,531	13,000
S. S. Cristobal	9,604	7,026	13,000
S. S. Guayaquil	2,592	1,613	4,155
S. S. Buenaventura	2,618	1,610	4,155

4. The result of the steamship line's operation for the fiscal year ended June 30, 1926, was:

Operating revenue	$2,210,775.29
Operating expenses	2,496,124.55
Deficit	285,349.26

5. It is the policy of the directors of the Panama Railroad Co. to operate its steamship line practically as an adjunct of the Panama Canal, and with that purpose in mind, all freight shipped for account of the Panama Canal, the War, Navy, and other departments of the Government of the United States is carried at a reduction of 25 per cent from regular commercial rates. The passenger traffic of the Panama Canal including its employees and their families, the War and other departments of the Government of the United States, is carried on the steamship line at rates that represent reductions of from 25 to 80 per cent from the regular tariff.

6. The Government freight that was carried amounted to approximately 36 per cent of our outward tonnage and represented a reduction of $84,724.03 from our tariff rates.

7. The Government passenger traffic amounted to approximately 71 per cent of our passenger revenue and represented a reduction of $420,238.05 from our tariff rates.

8. Had the company's steamship line been paid its regular rates of fare for the passengers and freight carried by its steamers during the last fiscal year, the deficit of $285,349.26 would have been converted to a profit of $219,612.82.

9. The policy of applying reductions from regular rates to all Government freight and passenger traffic was adopted long before the opening of the Panama Canal to commerce, when the other commercial traffic of the Panama Railroad & Steamship Line was sufficient in volume and in revenue to permit of the operation of the steamship line at a reasonable profit, notwithstanding the low rates charged on Government traffic.

10. The directors of the company have deemed it advisable to continue these reduced rates for freight and passenger traffic handled for account of the Government of the United States, even though it does involve an actual deficit for the steamship line because of the reduced amount of commercial traffic now obtainable since the Panama Canal was opened to commerce, rather than to apply tariff rates to this Government traffic which would permit of the steamship line operating at a profit.

11. There were several reasons that governed them in arriving at that conclusion. The first is that the total operations of the Panama Railroad Co. from its railroad, terminals, commissary, etc., resulted in sufficient profit to not only overcome the deficit resulting from the operations of its steamship line, but to yield a reasonable return on the total investment. The second is that this deficit of the steamship line amounts to much less than the Panama Canal and other departments of the Government would be charged for the transportation of their freight and passengers if tariff rates were applied. The third is that because of the action of the Panama Railroad & Steamship Line quoting reduced rates for all Government freight shipments to the Canal Zone, other lines that carry any part of this Government traffic are obliged to quote the same reduced rates—which results in an important saving to the Government as compared with the payment of tariff rates. The fourth is that the application of tariff rates to the passenger traffic of the Government would involve a radical change in the conditions under which employees are engaged, and would make it necessary for the Panama Canal and other departments of the Government to secure additional funds to the extent of over $400,000.

12. The policy of the management is to render a service that will be satisfactory to its commercial and Government patrons, and at as reasonable rates as conditions justify, having in mind the reduction of the deficit of the steamship line to an absolute minimum without requiring additional revenue from any Government department, through the application of tariff rates to its traffic.

13. We trust this will give Senator FLETCHER the information he desires.

Yours very truly, T. H. ROSSBOTTOM, *Vice President.*

FREIGHT RATES ON GEORGIA AND NORTH CAROLINA PEACHES

Mr. GEORGE. Mr. President, I ask unanimous consent to have inserted in the RECORD an article appearing in the Macon (Ga.) News of Sunday, February 19, 1928, having direct reference to the recent order of the Interstate Commerce Commission in the case of the Georgia Peach Growers' Exchange et al. *v.* The Alabama Great Southern Railroad et al, relative to the new rate and weight bases for peaches shipped from Georgia and Carolina points.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

"LOWER RATE" REALLY HIKE, SAY EXPERTS—FIGURE NEW WEIGHT AND RATE BASES WILL COST GROWERS $100,000 PER SEASON—REPARATION IS DENIED—NO ACTION TAKEN ON REFRIGERATION CHARGES OR ON ICING REPARATION

With the ironic commentary that extraordinary measures were being taken to reduce peach freight rates because of the poor financial condition of the growers, the Interstate Commerce Commission at Washington Saturday ordered into effect April 20 new weight and rate bases for peaches shipped from all Georgia and Carolina points that will mean considerable increases in the aggregate.

The burden of these new charges naturally will be imposed on the Georgia peach growers, and rate experts consulted Saturday after careful study agreed that the increase will be not less than $100,000 for a 15,000-car season.

The decision deals with but one of the three pleas made by the Georgia growers. They asked for lower freight rates and reparation; for lower refrigeration and icing charges, and for reparation on the latter. The decision purports to grant lower freight rates, but really orders an increase; reparation on freight rates is denied; action on refrigeration charges is deferred; action also is deferred on the refrigeration reparation.

This means that the growers will not have relief on the refrigeration charges this season. It also means, according to the experts, that the growers will have to pay $100,000 more in freight charges than in previous years.

The commission ordered a change in weight effective April 20. After that date the standard carload of peaches carrying 476 crates will be billed at 24,276 pounds instead of 20,000 pounds as at present. Also, the standard carload of 387 bushel baskets will be billed at 21,280 pounds instead of 20,000.

This increase in the weight more than offsets the reductions on rates.

For example: It now costs the Fort Valley grower $196 to ship a standard carload of peaches to Chicago, not including the refrigeration charges. But, under the new scales, it will cost him $234.58 if the peaches are in crates, or $206.32 if they are in bushel baskets. This despite a "reduction" in the rate from 98 cents to 97 cents per 100 pounds.

In some instances this increase is as high as $60 per carload over present rates.

The rate from Fort Valley to New York was ordered reduced from $1.245 per hundred pounds to $1.02, but because of the weight basis change, the grower will save by this reduction only $1.39 per carload of crates, and only $31.95 per carload of bushel baskets. The present freight charge for a standard carload is $249, and the new charge for crates will be $247.61; for baskets, $217.05.

Outside of New York and Philadelphia, there are no reductions whatever in the actual freight charge the grower will have to pay. Some will remain about the same as at present, but the majority will be increased.

Heretofore more than 50 per cent of the total Georgia crop movement has been in crates. Because of the working of the new weight scale, there is a decided difference in favor of bushel baskets in comparison with the total freight charges, and if this order stands it may mean virtual elimination of the crate method of packing.

A statement on the Interstate Commerce Commission decision was given to The News Saturday night by W. C. Bewley, general manager of the Georgia Peach Growers' Exchange. It follows:

"The commission's decision in this case practically seals the fate of the unfortunate Georgia peach growers in so far as early relief from excessive freight and refrigeration are concerned. The peach growers made out a good case and the commission's decision is not only grave injustice and unwarranted by the facts presented, but the decision is inconsistent in light of their recent decision in the so-called California

case, involving fruits from Pacific coast in which the commission granted the 'lowest possible lawful rates compatible with maintenance of adequate transportation service.' Relief was granted in the California case because the agriculture involved was in an unprofitable state and because the railroads, with improved financial conditions, could afford to handle the products involved at a lower rate.

"All things considered, the Georgia peach industry is in much worse condition than the California interests referred to, and as the carriers originating and handling the Georgia peach traffic are enjoying great prosperity, it is inconceivable why the commission denied the Georgia growers relief in accordance with the principles of the Hoch-Smith resolution, on which their decision in the California case was based. In the commission's decision in the Georgia case it is stated that the principles of the Hoch-Smith resolution were applied, but their words are empty, as the decision places an additional burden on the Georgia peach industry, whereas the principle of the Hoch-Smith resolution contemplate relief for agricultural producers under such conditions.

"Freight rates on peaches from Georgia, from time immemorial, were based on an estimated weight of 42 pounds per crate, but the commission's decision increases the estimated weight per crate to 51 pounds, with a corresponding increase in the estimated weight of the bushel basket, resulting in growers having to pay freight charges on 24,276 pounds when shipping in crates, instead of 20,000 pounds as heretofore for a carload of 476 crates. Although the decision prescribes lower rates to the East, there is a very substantial increase in rates to the North and West, which, with the increased weights referred to, will likely offset any reductions in rates to the East and result in increase in aggregate freight charges.

"With respect to carload minimum on Georgia peaches and the proper number of crates to be loaded in refrigerator cars, the commission seems to agree with the railroads' contentions, regardless of whether they advocate a heavy load or a light load. In 1910 when this matter was before the commission and the carload minimum was 22,500 pounds, contemplating a load of 535 crates, the growers contended that the refrigerator cars could not properly refrigerate that number of crates and went to the commission asking for a reduction on the ground that the growers were forced to load from 59 to 87 crates less than the prescribed carload minimum contemplated, owing to deficiency of refrigerator-car equipment. At that time the railroads contended that the cars would refrigerate 535 crates of peaches satisfactorily, although there was an abundance of evidence to the contrary. The commission's decision, which was unfavorable to the peach growers, seemed to be based on some far-fetched theory that Georgia peaches should be precooled, which would permit the continuance of the heavy loading of cars and which would permit the railroads to continue to enjoy the existing revenues from such heavy loading.

"That decision was unjust to the peach growers and based on unsound reasoning. The peach growers, failing to obtain any relief from the commission, struggled along for 10 years paying the railroads freight charges on from 59 to 87 crates of peaches which they could not safely ship, and this unjust tax on the peach growers during a long period up to 1921, probably aggregated several millions of dollars revenue to carriers, for which they rendered no corresponding service. The growers, becoming desperate, and seeing no hope of obtaining relief from the Interstate Commerce Commission, asked executive traffic officers of southeastern lines for a hearing in 1921, and after presenting the peach growers' case to these traffic officials, they voluntarily agreed to reduce the carload minimum to 20,000 pounds, contemplating a loading of 476 crates, or 387 bushels in the standard car. This concession was made by the traffic officials, because they doubtless realized that both the carriers and the Interstate Commerce Commission, were wrong in the case which was heard in 1910, and that a reduction in the minimum would be beneficial to all interests as was previously claimed by the shippers.

"During recent years the carriers, especially in this section, seem to be continually seeking to find ways and means of increasing their revenues, either by a direct increase in rates, or by changes in rules, minima or otherwise, and they hit upon the plan of raising the carload minimum, by raising the estimated weight of the crate and bushel basket of peaches. They were not satisfied merely to increase the weight of the packages, but have insisted on reducing the number of packages constituting the carload minimum from 476 to 448 crates. Although the carriers in 1910 insisted that the cars would safely carry 535 crates, they have recently insisted on reducing the number of packages to 448 for the standard car, or nearly a hundred crates less than the previous prescribed loading.

"Their object is to maintain or increase the present per car revenue and at the same time reduce the claim hazard, cost of refrigeration, and transportation cost to themselves, but the reduction in the carload minimum to 448 crates is against economy in that it will require more cars, more ice, more supervision, and other things, all of which will have to be paid for by the growers.

"Of course, the carriers must pay dividends on stocks and bonds as will represent a fair rate of interest to the investors; also that revenue must be high enough to support adequate expansion and extension; but what of the peach industry? Is this industry, which is struggling for existence, not entitled to some consideration? At least to a fair return on investment and for the labor of the producers?

"About the worst part of this whole decision is the fact that the growers are left to pay the high refrigeration charges for an indefinite time, on which they are clearly entitled to lower rates and reparation, and at the same time their freight charges in the aggregate are increased. The decision involving freight rates, estimated weights, and carload minima should not have been rendered until the commission was in position to also render its decision in the refrigeration phase of the case. It was agreed by all concerned, and is in the record, that the refrigeration and freight rate cases were to be consolidated and handled as one case, and the partial decision is unjust and unwarranted by the facts. This decision, to state the case frankly, is an outrage, because, temporarily at least, the growers must pay the same stated refrigeration charges on 448 crates or less as they have heretofore paid on 476 crates.

"Reparation was denied on that phase of the case involving the so-called 'short cars.' It is generally known that the so-called short cars were unsuitable equipment from several standpoints, but partly because the minimum load of 476 crates could not be safely carried in such cars and the growers have been forced to load usually 420 crates, but pay freight and refrigeration on 476. If the growers are not entitled to reparation on this phase of the case, they are not even entitled to live and breathe the air which God gave us.

"Commission denied reparation mainly on the ground that the estimated weight of 42 pounds per crate and 51 pounds per bushel has been several pounds less than the actual weight, and therefore that the railroads have been hauling more freight than they were paid for. The railroads and everybody concerned for a long number of years agreed that 42 pounds was the approximate weight of a crate of peaches, but in 1910 the railroads made some tests and claimed that crates packed with the bulge weighed 47 and 48 pounds average. In 1925, during which year there was the worst drought in the history of this section and the peaches were small, a test was made under the supervision of the Interstate Commerce Commission and they found the average weight of crates to be 51 pounds and bushels 55 pounds, but the number of packages weighed or tested as compared with the total crop was so small as to be almost meaningless not only on account of the small number of packages weighed but abnormal conditions, due to the drought, and the results were not representative over a long period of years. In spite of these facts the railroads have insisted that the estimated weights be increased to 51 pounds and 55 pounds for the crate and basket, respectively, and, according to our information, this has been prescribed by the commission in their decision.

"The commission, in raising the estimated weights in Georgia and the carload minimum, have placed the Georgia peach industry at a great disadvantage as compared with other producing and competing sections of the country, such as Texas, Arkansas, Tennessee, New Jersey, New York State, Michigan, and other sections, where the minimum is 20,000 pounds or less. This is an unjust discrimination against the Georgia peach industry.

"It seems that the railroads are too formidable, too strongly entrenched in Washington, too well organized, equipped and financed to be coped with by the disorganized and depressed peach industry of Georgia. The railroads are in the saddle and we have very little to hope for under present conditions. Maybe there will some day be a change; let's hope so."

In closing Mr. Bewley stated that he had conferred with attorneys representing the peach growers and that the attorneys are already drawing up a petition for rehearing in this case and a definite announcement regarding the petition for rehearing will be made as promptly as possible.

It is understood from press dispatches that Commissioner Taylor dissented on the ground that the decision would improperly decrease railroad earnings about $500,000, and also that Chairman Campbell and another commissioner dissented on the ground that the decision did not adequately decrease the carriers' earnings. (Macon News, Sunday, February 19, 1928.)

ALIEN PROPERTY AND OTHER CLAIMS (S. DOC. NO. 64)

Mr. SMOOT. Mr. President, I submit a conference report on the bill (H. R. 7201) to provide for the settlement of certain claims of American nationals against Germany and of German nationals against the United States, for the ultimate return of all property of German nationals held by the Alien Property Custodian, and for the equitable apportionment among all claimants of certain available funds.

At the request of the junior Senator from Utah [Mr. KING], I shall ask that it go over until to-morrow. To-morrow, when I call up the conference report, I shall take about half an hour to explain the amendments which have been agreed to by the House conferees and the amendments on which the Senate conferees had to yield to the House. I therefore merely submit the report at this time and ask that it be printed and lie on the table.

The VICE PRESIDENT. The report will be printed and lie on the table.

APPROPRIATIONS FOR THE TREASURY AND POST OFFICE DEPARTMENTS

Mr. WARREN submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10635) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1929, and for other purposes, having met, after full and free conference have agree to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1 and 2.

F. E. WARREN,
REED SMOOT,
LEE S. OVERMAN,
WM. J. HARRIS,
Managers on the part of the Senate.

MARTIN B. MADDEN,
M. H. THATCHER,
JOSEPH W. BYRNS,
Managers on the part of the House.

The report was agreed to.

INDEPENDENT OFFICES APPROPRIATION BILL

Mr. WARREN submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9481) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1929, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 5, 7, 11, 12, 13, and 14.

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows: In lieu of the matter inserted by said amendment insert the following: ", of which $1,000,000, or so much thereof as may be necessary, may be used for reconditioning and operating ships for carrying coal to foreign ports"; and the Senate agree to the same.

Amendment numbered 8: That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: ": *Provided*, That not more than one attorney shall be paid in excess of $10,000 per year"; and the Senate agree to the same.

The committee of conference have not agreed on amendments numbered 1, 4, 9, and 10.

F. E. WARREN,
REED SMOOT,
W. L. JONES,
LEE S. OVERMAN,
CARTER GLASS,
Managers on the part of the Senate.

WILL R. WOOD,
EDWARD H. WASON,
THOMAS H. CULLEN,
Managers on the part of the House.

Mr. WILLIS. Mr. President, I desire to submit an inquiry to the Senator from Wyoming. Does the report embody——

Mr. WARREN. I may say, with reference to what the Senator from Ohio is about to refer, that the conferees disagreed, but the conferees on the part of the House insisted upon having further information on account of the bill reading the way it did in making the appropriation for this project. They intend to do that in order that it may be taken care of in the deficiency appropriation bill at this session.

Mr. WILLIS. I desire to ask the Senator from Wyoming what was the action of the conferees on the amendment which was adopted by the Senate.

Mr. WARREN. The conferees on the part of the Senate were compelled to recede on the amendment.

Mr. WILLIS. Mr. President, I merely desire to make this brief statement. I have not any doubt at all that the conferees on the part of the Senate have done everything they could to secure an agreement to the Senate amendment.

Mr. WARREN. The amendment, I will say to the Senator, was taken under consideration several times.

Mr. WILLIS. I know the Senator and his fellow conferees have given every consideration to the matter. I merely wish to express my deep regret that the House conferees would not agree to the Senate amendment, for I believe it to be a perfectly proper amendment and I think when the House comes to inquire into the matter they will agree that it ought to be taken care of in the deficiency bill.

Mr. FLETCHER. Mr. President, I understand there has not been a complete agreement on the part of the Senate, but that there is to be a further conference on some items which are still in disagreement, which items are to be taken back to the House, and that there is to be an additional conference report?

Mr. WARREN. That is true.

The VICE PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

APPROPRIATIONS FOR THE WAR DEPARTMENT

Mr. REED of Pennsylvania. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of House bill 10286, the War Department appropriation bill.

The VICE PRESIDENT. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 10286) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1929, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

Mr. REED of Pennsylvania. I ask unanimous consent that the Senate dispense with the formal reading of the bill and that it be read for amendment, the committee amendments to be first considered.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. REED of Pennsylvania. I further ask unanimous consent that at the conclusion of the bill the Secretary be empowered to make the necessary corrections of the totals and in section numbers as the result of amendments.

The VICE PRESIDENT. Without objection, it is so ordered.

The Chief Clerk proceeded to read the bill.

The first amendment of the Committee on Appropriations was, on page 8, after line 4, to insert:

ARMY WAR COLLEGE

For expenses of the Army War College, being for the purchase of the necessary special stationery; textbooks, books of reference, scientific and professional papers and periodicals; maps; police utensils; employment of temporary technical or special services, and expenses of special lecturers; for the pay of employees; and for all other absolutely necessary expenses, $73,610.

The amendment was agreed to.

The next amendment was, on page 9, after line 2, to strike out:

ARMY WAR COLLEGE

For expenses of the Army War College, being for the purchase of the necessary special stationery; textbooks, books of reference, scientific and professional papers and periodicals; maps; police utensils; employment of temporary, technical, or special services and expenses of special lecturers; for the pay of employees; and for all other absolutely necessary expenses, $73,610.

The amendment was agreed to.

The next amendment was, under the subhead "Military post exchanges," on page 9, line 25, before the word "salaries" to insert "$53,220 for," and on page 10, line 6, after the word "established" to strike out "$67,740" and insert "$98,140," so as to make the paragraph read:

For the equipment and conduct of the post exchange, school, reading, lunch, and amusement rooms, service clubs, chapels, gymnasiums, and libraries, including periodicals and other publications and subscriptions for newspapers for which payment may be made in advance, and including $53,220 for salaries and travel for civilians employed in the hostess and library services, and for transportation of books and equipment for these services; for the rental of films, purchase of slides for and making repairs to moving-picture outfits, and for similar and other recreational purposes at training and mobilization camps now established or which may be hereafter established, $98,140.

The amendment was agreed to.

The next amendment was, under the subhead "Finance Department, pay, etc., of the Army," on page 11, line 8, after the word "available," to strike out "$6,547,016" and insert "$6,598,579"; in line 18, after the word "mounts," to strike out "not to exceed"; and in line 19, after the words "in all," to strike

out "$130,282,810" and insert "$130,334,373," so as to make the paragraph read:

For pay of officers of the line and staff, $31,168,426; pay of officers, National Guard, $100; pay of warrant officers, $2,156,880; aviation increase to commissioned and warrant officers of the Army, $1,571,326; additional pay to officers for length of service, $7,778,298; pay of enlisted men of the line and staff, not including the Philippine Scouts, $51,022,306; pay of enlisted men of National Guard, $100; aviation increase to enlisted men of the Army, $460,723; pay of enlisted men of the Philippine Scouts, $976,854; additional pay for length of service to enlisted men, $3,286,620; pay of the officers on the retired list, $7,349,729; increased pay to retired officers on active duty, $216,638; pay of retired enlisted men, $10,631,858; increased pay and allowances of retired enlisted men on active duty $9,878; pay of retired pay clerks, $6,750; pay of retired veterinarians, $3,570; pay of not to exceed 65 civil-service messengers at $1,080 each at headquarters of the several Territorial departments, corps areas, Army and corps headquarters, Territorial districts, tactical divisions and brigades, service schools, camps, and ports of embarkation and debarkation, $70,200; pay and allowances of contract surgeons, $44,550; pay of nurses, $823,780; pay of hospital matrons, $600; rental allowances, including allowances for quarters for enlisted men on duty where public quarters are not available, $6,598,579; subsistence allowances, $5,855,602; interest on soldiers' deposits, $75,000; payment of exchange by officers serving in foreign countries, and when specially authorized by the Secretary of War, by officers disbursing funds pertaining to the War Department, when serving in Alaska, and all foreign money received shall be charged to and paid out by disbursing officers of the Army at the legal valuation fixed by the Secretary of the Treasury, $1,000; additional pay to officers below the grade of major required to be mounted and who furnish their own mounts, $225,000; in all, $130,334,373; and the money herein appropriated for "Pay, etc., of the Army" shall be accounted for as one fund.

The amendment was agreed to.

The next amendment was, in the items for regular supplies of the Army, on page 18, line 10, after the word "reports," to strike out "$10,241,996" and insert "$10,304,056," so as to make the paragraph read:

Regular supplies of the Army: Regular supplies of the Quartermaster Corps, including their care and protection; stoves required for the use of the Army for heating offices, hospitals, barracks and quarters, and recruiting stations, and United States disciplinary barracks; also ranges, stoves, coffee roasters, and appliances for cooking and serving food at posts in the field and when traveling, and repair and maintenance of such heating and cooking appliances; authorized issues of candles and matches; for furnishing heat and light for the authorized allowance of quarters for officers, enlisted men, and warrant officers, including retired enlisted men when ordered to active duty, contract surgeons when stationed at and occupying public quarters at military posts, officers of the National Guard attending service and garrison schools, and for recruits, guards, hospitals, storehouses, offices, the buildings erected at private cost, in the operation of the act approved May 31, 1902, and buildings for a similar purpose on military reservations authorized by War Department regulations; for sale to officers, and including also fuel and engine supplies required in the operation of modern batteries at established posts; for post bakery and bake-oven equipment and apparatus; for ice for issue to organizations of enlisted men and offices at such places as the Secretary of War may determine, and for preservation of stores; authorized issues of soap, toilet paper, and towels; for the necessary furniture, textbooks, paper, and equipment for the post schools and libraries, and for schools for noncommissioned officers; for the purchase and issue of instruments, office furniture, stationery, and other authorized articles for the use of officers' schools at the several military posts; for purchase of commercial newspapers, market reports, etc.; for the tableware and mess furniture for kitchens and mess halls, each and all for the enlisted men, including recruits; for forage, salt, and vinegar for the horses, mules, oxen, and other draft and riding animals of the Quartermaster Corps at the several posts and stations and with the armies in the field, for the horses of the several regiments of Cavalry and batteries of Artillery and such companies of Infantry and Scouts as may be mounted, and for remounts and for the authorized number of officers' horses, including bedding for the animals; for seeds and implements required for the raising of forage at remount depots and on military reservations in the Hawaiian, Philippine, and Panama Canal Departments, and for labor and expenses incident thereto, including, when specifically authorized by the Secretary of War, the cost of irrigation; for the purchase of implements and hire of labor for harvesting hay on military reservations; for straw for soldiers' bedding, stationery, typewriters and exchange of same, including blank books and blank forms for the Army, certificates for discharged soldiers, and for printing department orders and reports, $10,304,056, of which amount not exceeding $3,000,000 shall be available immediately for the procurement of fuel for the service of the fiscal year 1929.

The amendment was agreed to.

The next amendment was, in the items for Army transportation, on page 21, line 24, after the words "in all," to strike out "$17,417,701" and insert "$17,516,250," so as to read:

Army transportation: For transportation of the Army and its supplies, including retired enlisted men when ordered to active duty; of authorized baggage, including that of retired officers, warrant officers, and enlisted men when ordered to active duty and upon relief therefrom, and including packing and crating; of recruits and recruiting parties; of applicants for enlistment between recruiting stations and recruiting depots; of necessary agents and other employees, including their traveling expenses; of dependents of officers and enlisted men as provided by law; of discharged prisoners, and persons discharged from St. Elizabeths Hospital after transfer thereto from the military service, to their homes (or elsewhere as they may elect): *Provided*, That the cost in each case shall not be greater than to the place of last enlistment; of horse equipment; and of funds for the Army; for the purchase or construction, not exceeding $62,000, alteration, operation, and repair of boats and other vessels; for wharfage, tolls, and ferriages; for drayage and cartage; for the purchase, manufacture (including both material and labor), maintenance, hire, and repair of pack saddles and harness; for the purchase, hire, operation, maintenance, and repair of wagons, carts, drays, other vehicles, and horse-drawn and motor-propelled passenger-carrying vehicles required for the transportation of troops and supplies and for official military and garrison purposes; for purchase and hire of draft and pack animals, including replacement of unserviceable animals; for travel allowances to officers and enlisted men on discharge; to officers of National Guard on discharge from Federal service as prescribed in the act of March 2, 1901; to enlisted men of National Guard on discharge from Federal service, as prescribed in amendatory act of September 22, 1922; and to members of the National Guard who have been mustered into Federal service and discharged on account of physical disability; in all, $17,516,250, of which amount not exceeding $2,000,000 shall be available immediately for the procurement and transportation of fuel for the service of the fiscal year 1929.

The amendment was agreed to.

The next amendment was, under the subhead "Horses for Cavalry, Artillery, Engineers, etc," on page 23, line 7, after the word "maintenance," to strike out "$504,750" and insert "$546,000," so as to read:

For the purchase of horses within limits as to age, sex, and size to be prescribed by the Secretary of War for remounts for officers entitled to public mounts, for the United States Military Academy, and for such organizations and members of the military service as may be required to be mounted, and for all expenses incident to such purchases (including $150,000 for encouragement of the breeding of riding horses suitable for the Army, in cooperation with the Bureau of Animal Industry, Department of Agriculture, including the purchase of animals for breeding purposes and their maintenance), $546,000:

The amendment was agreed to.

The next amendment was, under the subhead "Military posts," on page 24, line 6, after the figures "1927," to insert "as amended by the act approved February 18, 1928"; and in line 14, after the name "United States," to strike out "$4,874,000" and insert "$5,084,000," so as to read:

For construction and installation at military posts of buildings, utilities, and appurtenances thereto, as authorized by an act entitled "An act to authorize appropriations for construction at military posts, and for other purposes," approved March 3, 1927, as amended by the act approved February 18, 1928, without reference to sections 1136 and 3734, Revised Statutes, including also the engagement, by contract or otherwise, of the services of architects, or firms, or partnerships thereof, and other technical and professional personnel as may be deemed necessary without regard to civil-service requirements and restrictions of law governing the employment and compensation of employees of the United States, $5,084,000.

The amendment was agreed to.

The next amendment was, on page 24, line 18, after the word "made," to insert a colon and the following proviso:

Provided, That no part of the sums appropriated or authorized to be contracted for in this paragraph shall be available for construction at Scott Field, Ill.

The amendment was agreed to.

The next amendment was, under the subhead "Seacoast defenses," on page 28, line 21, after the figures "$304,127," to insert "and in addition thereto there is hereby reappropriated and made available for this purpose the sum of $50,000 of the unexpended balance of the continuing appropriation for 'Rock Island Arsenal,'" so as to read:

For all expenses properly pertaining to the respective branches below stated as may be incident to the preparation of plans and the construction, purchase, installation, equipment, maintenance, repair, and operation of fortifications and other works of defense, and their

accessories, including personal services, maintenance of channels to submarine mine wharves, purchase of lands and rights of way as authorized by law, and experimental, test, and development work, as follows:

United States: Signal Corps, $115,000; Corps of Engineers, $516,000; Ordnance Department, $1,023,000; Chief of Coast Artillery, $304,127, and in addition thereto there is hereby reappropriated and made available for this purpose the sum of $50,000 of the unexpended balance of the continuing appropriation for "Rock Island Arsenal."

The amendment was agreed to.

The next amendment was, on page 29, line 3, after the figures "$221,900," to insert "and in addition thereto there is hereby reappropriated and made available for this purpose the sum of $54,000 of the unexpended balance of the continuing appropriation for 'Rock Island Arsenal,'" so as to read:

Insular possessions: Signal Corps, $35,000; Corps of Engineers, $384,610; Ordnance Department, $332,762; Chief of Coast Artillery, $221,900, and in additional thereto there is hereby reappropriated and made available for this purpose the sum of $54,000 of the unexpended balance of the continuing appropriation for "Rock Island Arsenal."

The amendment was agreed to.

The next amendment was, on page 29, line 10, after the figures "$133,847," to insert "and in addition thereto there is hereby reappropriated and made available for this purpose the sum of $68,940 of the unexpended balance of the continuing appropriation for 'Frankford Arsenal,'" so as to read:

Panama Canal: Signal Corps, $34,120; Corps of Engineers, $609,350; Ordnance Department, $329,000; Chief of Coast Artillery, $133,841, and in addition thereto there is hereby reappropriated and made available for this purpose the sum of $68,940 of the unexpended balance of the continuing appropriation for "Frankford Arsenal."

The amendment was agreed to.

Mr. BORAH. Mr. President, I should like to ask the Senator in charge of the bill a question. Does this appropriation bill make full appropriations for the Army?

Mr. REED of Pennsylvania. Yes; it does.

Mr. BORAH. I should like to ask the Senator in a general way how it leaves the Army as to size, and so forth?

Mr. REED of Pennsylvania. It leaves the officer personnel of the Army exactly as provided in the national defense act, with a maximum allowance of commissioned officers of 12,000, just as it has been since 1920. It also leaves the enlisted strength of the Army at 118,750 men, which is the same as it was last year.

There is an increase provided for the Air Corps in this year's bill, but that is taken out of the enlisted strength of the other branches, so that while the number of enlisted men in the Air Corps is increased the number in the other branches is decreased and the aggregate is not changed.

Mr. BORAH. Is the number of enlisted men increased in any way?

Mr. REED of Pennsylvania. Not in any way.

Mr. BORAH. What is the size of our National Guard at the present time?

Mr. REED of Pennsylvania. About 120,000 men. I have not the exact figures at hand, but I can get them for the Senator.

Mr. OVERMAN. Mr. President, may I inquire of the Senator whether there is a decrease in appropriation for the National Guard or an increase?

Mr. REED of Pennsylvania. There are several increases, one of which is to enable the National Guard to buy additional animals, something very much desired by the Guard, and approved by the Budget, but for some reason stricken out in the House. We have restored that.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the subhead "Signal Corps, Signal Service of the Army," on page 31, line 6, after the word "purposes," to insert "tuition, laboratory fees, etc., for Signal Corps officers detailed to civilian technical schools for the purpose of pursuing technical courses of instruction along Signal Corps lines," so as to make the paragraph read:

Telegraph and telephone systems: Purchase, equipment, operation, and repair of military telegraph, telephone, radio, cable, and signaling systems; signal equipment and stores, heliographs, signal lanterns, flags, and other necessary instruments; wind vanes, barometer, anemometers, thermometers, and other meterological instruments; photographic and cinematographic work performed for the Army by the Signal Corps; motor cycles, motor-driven and other vehicles for technical and official purposes in connection with the construction, operation, and maintenance of communication or signaling systems, and supplies for their operation and maintenance; professional and scientific books of reference, pamphlets, periodicals, newspapers, and maps for use of the Signal Corps and in the office of the chief signal officer; telephone apparatus, including rental and payment for commercial, exchange, message, trunk-line, long-distance, and leased-line telephone service at or connecting any post, camp, cantonment, depot, arsenal, headquarters, hospital, aviation station, or other office or station of the Army, excepting local telephone service for the various bureaus of the War Department in the District of Columbia, and toll messages pertaining to the office of the Secretary of War; electric time service; the rental of commercial telegraph lines and equipment and their operation at or connecting any post, camp, cantonment, depot, arsenal, headquarters, hospital, aviation station, or other office or station of the Army, including payment for official individual telegraph messages transmitted over commercial lines; electrical installations and maintenance thereof at military posts, cantonments, camps, and stations of the Army, fire-control and direction apparatus and material for Field Artillery; salaries of civilian employees, including those necessary as instructors at vocational schools; supplies, general repairs, reserve supplies, and other expenses connected with the collecting and transmitting of information for the Army by telegraph or otherwise; experimental investigation, research, purchase, and development or improvements in apparatus, and maintenance of signaling and accessories thereto, including patent rights and other rights thereto, including machines, instruments, and other equipment for laboratory and repair purposes; tuition, laboratory fees, etc., for Signal Corps officers detailed to civilian technical schools for the purpose of pursuing technical courses of instruction along Signal Corps lines; lease, alteration, and repair of such buildings required for storing or guarding Signal Corps supplies, equipment, and personnel when not otherwise provided for, including the land therefor, the introduction of water, electric light and power, sewerage, grading, roads and walks, and other equipment required, $2,797,790.

The amendment was agreed to.

The next amendment was, under the subhead "Air Corps, Army," on page 32, line 24, before the word "balloons," to strike out "airships," and on page 33, line 24, after the word "aircraft," to strike out "$24,817,268" and insert "$24,630,268," so as to read:

For creating, maintaining, and operating at established flying schools and balloon schools courses of instruction for officers, students, and enlisted men, including cost of equipment and supplies necessary for instruction, purchase of tools, equipment, materials, machines, textbooks, books of reference, scientific and professional papers, instruments and materials for theoretical and practical instruction; for maintenance, repair, storage, and operation of airships, war balloons, and other aerial machines, including instruments, materials, gas plants, hangars and repair shops, and appliances of every sort and description necessary for the operation, construction, or equipment of all types of aircraft, and all necessary spare parts and equipment connected therewith and the establishment of landing and take-off runways; for purchase of supplies for securing, developing, printing, and reproducing photographs in connection with aerial photography; improvement, equipment, maintenance, and operation of plants for testing and experimental work, and procuring and introducing water, electric light and power, gas and sewerage, including maintenance, operation, and repair of such utilities at such plants; for the procurement of helium gas; salaries and wages of civilian employees as may be necessary, and payment of their traveling and other necessary expenses as authorized by existing law; transportation of materials in connection with consolidation of Air Corps activities; experimental investigation and purchase and development of new types of aircraft, accessories thereto, and aviation engines, including plans, drawings, and specifications thereof, and the purchase of letters patent, applications for letters patent, licenses under letters patent and applications for letters patent; for the purchase, manufacture, and construction of balloons and other aerial machines, including instruments, gas plants, hangars, and repair shops, and appliances of every sort and description necessary for the operation, construction, or equipment of all types of aircraft, and all necessary spare parts and equipment connected therewith; for the marking of military airways where the purchase of land is not involved; for the purchase, manufacture, and issue of special clothing, wearing apparel, and similar equipment for aviation purposes; for all necessary expenses connected with the sale or disposal of surplus or obsolete aeronautical equipment, and the rental of buildings, and other facilities for the handling or storage of such equipment; for the services of not more than four consulting engineers at experimental stations of the Air Corps as the Secretary of War may deem necessary, at rates of pay to be fixed by him not to exceed $50 a day for not exceeding 50 days each and necessary traveling expenses; purchase of special apparatus and appliances, repairs and replacements of same used in connnection with special scientific medical research in the Air Corps; for maintenance and operation of such Air Corps printing plants outside of the District of Columbia as may be authorized in accordance with law; for

publications, station libraries, special furniture, supplies and equipment for offices, shops, and laboratories; for special services, including the salvaging of wrecked aircraft, $24,630,268.

The amendment was agreed to.

The next amendment was, on page 34, line 10, after the words "not exceeding," to strike out "$200,000" and insert "$13,000"; in line 15, after the word "necessary," to insert "and in addition to the sum of $1,736,619 there is hereby reappropriated for the same purposes, for expenditure only in Panama and Hawaii, the sum of $1,018,000 of unexpended balances of continuing appropriations and in amounts as follows: 'Sites for military purposes,' $335,669.31; 'Terminal storage and shipping buildings,' $322,381.63; 'Cantonment construction, Panama Canal,' $204,546.61; 'Evacuation of ordnance depots,' $122,904.22; and 'Rock Island Arsenal,' $32,498.23"; and on page 35, line 6, after the numerals "1927," to insert "and in addition there is hereby reappropriated for expenditure for bombardment planes and their equipment, spare parts and accessories, the sum of $1,160,000 of unexpended balances of appropriations and in amounts as follows: 'Mileage of the Army, 1926,' $100,000; 'Army transportation, 1926,' $800,000; 'Pay of Military Academy, 1926,' $110,000; and 'Arming, equipping, and training the National Guard, 1925,' $150,000," so as to make the proviso read:

Provided, That not to exceed $2,794,361 from this appropriation may be expended for pay and expenses of civilian employees other than those employed in experimental and research work; not exceeding $200,000 may be expended for the procurement of helium from the Bureau of Mines, which may be transferred in advance, in amounts as required, to that bureau; not exceeding $2,200,000 may be expended for experimental and research work with airplanes or lighter-than-air craft and their equipment, including the pay of necessary civilian employees; not exceeding $13,000 may be expended for the production of lighter-than-air equipment; not exceeding $1,736,619 may be expended for improvement of stations, hangars, and gas plants for the Regular Army and for such other markings and fuel supply stations and temporary shelter as may be necessary, and in addition to the sum of $1,736,619 there is hereby reappropriated for the same purposes, for expenditure only in Panama and Hawaii, the sum of $1,018,000 of unexpended balances of continuing appropriations and in amounts as follows: "Sites for military purposes," $335,669.31; "Terminal storage and shipping buildings," $322,381.63; "Cantonment construction, Panama Canal," $204,546.61; "Evacuation of ordnance depots," $122,904.22; and "Rock Island Arsenal," $32,498.23; not less than $11,257,445 shall be expended for the production or purchase of new airplanes and their equipment, spare parts and accessories, of which not to exceed $3,995,000 shall be available for the payment of obligations incurred under the contract authorization for these purposes carried in the War Department appropriation act for the fiscal year 1928, approved February 23, 1927, and in addition there is hereby reappropriated for expenditure for bombardment planes and their equipment, spare parts, and accessories the sum of $1,160,000 of unexpended balances of appropriations and in amounts as follows: "Mileage of the Army, 1928," $100,000; "Army transportation, 1926, $800,000; "Pay of Military Academy, 1926," $110,000; and "Arming, equipping, and training the National Guard, 1925," $150,000; not more than $6,000 may be expended for settlement of claims (not exceeding $250 each) for damages to persons and private property resulting from the operation of aircraft at home and abroad when each claim is substantiated by a survey report of a board of officers appointed by the commanding officer of the nearest aviation post and approved by the Chief of Air Corps and the Secretary of War.

The amendment was agreed to.

The next amendment was, under the subhead "Medical hospital department," on page 38, line 5, after the name "Medical Department," to insert "for tuition of officers of the Medical Department, including the Army Nurse Corps, under section 127a of the Army reorganization act approved June 4, 1920," so as to read:

For the manufacture and purchase of medical and hospital supplies, including disinfectants, for military posts, camps, hospitals, hospital ships and transports, for laundry work for enlisted men and Army nurses while patients in a hospital, and supplies required for mosquito destruction in and about military posts in the Canal Zone; for the purchase of veterinary supplies and hire of veterinary surgeons; for expenses of medical supply depots; for medical care and treatment not otherwise provided for, including care and subsistence in private hospitals of officers, enlisted men, and civilian employees of the Army, of applicants for enlistment, and of prisoners of war and other persons in military custody or confinement, when entitled thereto by law, regulation, or contract: *Provided*, That this shall not apply to officers and enlisted men who are treated in private hospitals or by civilian physicians while on furlough; for the proper care and treatment of epidemic and contagious diseases in the Army or at military posts or stations, including measures to prevent the spread thereof, and the payment of reasonable damages not otherwise provided for bedding and clothing injured or destroyed in such prevention; for the pay of male and female nurses, not including the Army Nurse Corps, and of cooks and other civilians employed for the proper care of sick officers and soldiers, under such regulations fixing their number, qualifications, assignments, pay, and allowances as shall have been or shall be prescribed by the Secretary of War; for the pay of civilian physicians employed to examine physically applicants for enlistment and enlisted men and to render other professional services from time to time under proper authority; for the pay of other employees of the Medical Department; for tuition of officers of the Medical Department, including the Army Nurse Corps, under section 127a of the Army reorganization act approved June 4, 1920; for the payment of express companies and local transfers employed directly by the Medical Department for the transportation of medical and hospital supplies, including bidders' samples and water for analysis; for supplies for use in teaching the art of cooking to the enlisted force of the Medical Department; for the supply of the Army and Navy Hospital at Hot Springs, Ark.; for advertising, laundry, and all other necessary miscellaneous expenses of the Medical Department, $1,251,197.

The amendment was agreed to.

The next amendment was, under the subhead "Instruction in Field Artillery activities," on page 50, line 8, after the words "practical instruction" to insert "for the tuition of officers detailed as students at civil educational institutions," so as to make the paragraph read:

To provide means for the theoretical and practical instruction in Field Artillery activities at the two brigade firing centers at Fort Sill, Okla., and Fort Bragg, N. C., by the purchase of modern instruments and material for theoretical and practical instruction, for the tuition of officers detailed as students at civil educational institutions, and for all other necessary expenses, to be allotted in such proportion as may, in the opinion of the Secretary of War, be for the best interests of the service, $3,440.

Mr. DILL. Mr. President, I should like to ask the Senator from Pennsylvania a question. Have additional allowances for Army officers at universities and colleges been provided in this bill?

Mr. REED of Pennsylvania. No, Mr. President; but the House had stricken out the provision for Army officers detailed for special instruction—Signal Corps officers for radio instruction, for example. That provision we have restored so as to permit it to be done in the same way as in past years.

Mr. DILL. That meets the demand that has been coming in in letters from various colleges for money for this purpose?

Mr. REED of Pennsylvania. Exactly.

Mr. DILL. While I am on my feet, let me ask another question which I should like to have answered, and that is as to the amount of money appropriated for training the officers in the Officers' Reserve Corps.

Mr. REED of Pennsylvania. We made an increase in the mileage allowance over the amount allowed by the House, and we fixed the same amount for training as was authorized by the House committee. It represents an increase over the Budget, but a decrease over the amount adopted on the floor of the House. I can best state the situation by giving the figures. The Budget, in the estimates as they came to Congress, authorized the training of 15,125 officers for periods of less than 15 days. The House committee raised that to 16,000 officers, and on the floor of the House it was raised to 20,000 officers, but without any sufficient provision for the transportation of those officers. When we came to look into the subject we found that the applications totaled about 19,000, of whom some 2,500 were believed to be unsuited for the training. They were officers who had not kept up their correspondence courses during the winter. We therefore fixed the amount at the same figure as did the House committee, sufficient to provide for the training of 16,000, at least, and probably sufficient, with the economies it will be possible to make, to train 16,500.

Mr. DILL. If there should not be a demand for the full appropriation provided by the House it would not be used, would it?

Mr. REED of Pennsylvania. That is true.

Mr. DILL. Why should the Senate limit the amount so that there may not be a sufficient sum available?

Mr. REED of Pennsylvania. The Senate committee was troubled by several conflicting considerations. There no doubt is a desire on the part of the reserve officers' associations and many of the reserve officers who have studied the subject to provide for the training of a gradually increasing number of reserve officers each year. That also shows itself in the Air Corps Reserve, where the demand is very insistent for additional hours of reserve flying; and we were able to increase

that item so that reserve officers this year will get 23,500 hours of actual flying training and instruction.

What we have done represents an increase over the Budget. To that extent it is satisfactory to the reserve officers. It continues the number to be trained at the same level as this year and the year before and the year before that. So far, it is all right. We should all like to have increased it, but we did not feel warranted in doing so, because this bill does carry a considerable amount more than the Army bill of last year. In the effort to be very liberal to everybody we had to make cuts all the way along the line.

That is about all I can say. It is a compromise. It is not as big as I should like to see it myself.

Mr. DILL. Mr. President, let me say to the Senator that I am one of those who are opposed to enlarging the Regular Army, but I am very much in favor of the training of the Organized Reserves; and it seems to me that the expense is so small in comparison to the results obtained that the Senate should not limit this amount as I understand it has done, but rather should leave the amount provided by the House bill.

I wish the Senator would indicate where that amendment is.

Mr. REED of Pennsylvania. We have not yet reached it. It appears on page 57, however.

Mr. DILL. I thank the Senator.

Mr. COPELAND. Mr. President, I should like to say to the Senator from Washington that I had the same feeling he has expressed—that if possible we should increase the number of officers to 20,000. I believe that is the figure the Senator had in mind. The evidence brought before the committee, however, indicated that on one occasion only was there an application in excess of 19,000; and last year—I think I am right in this—every applicant who was qualified found a place; and it was the feeling of the committee that with the figures as provided in the bill 16,500 should be trained.

Then it came also to the question of the training camps. We asked the question of General Summerall—I did, myself—if he could advantageously train 50,000 men. He said he could; but the committee finally arranged the bill to make it clear that 40,000 men could be trained in the civilian camps; so I think the committee really did very well in its recommendation.

Mr. BRATTON. Mr. President, will the Senator from New York yield?

Mr. COPELAND. Certainly.

Mr. BRATTON. The item that is now being discussed appears at page 57 of the bill. The figures fixed by the House seem to be $3,702,302. The Senate committee reduced that to $3,189,496, or a reduction of slightly in excess of half a million dollars. Did the figure fixed by the House contemplate training 20,000 men for a period of 15 days?

Mr. COPELAND. Mr. President, I ask the attention of the Senator in charge of the bill to page 57. This is the place where the House made the mistake in their figures.

Mr. REED of Pennsylvania. The House made a great increase for the pay, but they did not provide any mileage, so that it would not have been effective as they passed it.

Mr. COPELAND. Does the Senator from New Mexico get the point there—that the House, in changing the figures, did not provide for mileage, so that even if the House bill were adopted as it is there could not be this increased number of trainees?

Mr. BRATTON. The first item under the subject of "Organized Reserves" appears to be as follows:

Officers' Reserve Corps: For pay and allowances of members of the Officers' Reserve Corps on active duty for not exceeding 15 days' training, $2,657,000.

The Senate committee have reduced that to $2,125,600. Is that the reduction to which the Senator from Pennsylvania refers in respect to paring down the number of men that it is contemplated should be trained from 20,000 to 16,500?

Mr. REED of Pennsylvania. Exactly; yes.

Mr. BRATTON. Does the Senator feel that the sum should be reduced to that minimum, or should it be reduced to such a figure as would permit the training, say, of 18,000 or 18,500 or 19,000 men?

My purpose in propounding the inquiry is this: I do not think we should have any let down or decrease in training our reserve officers. I believe we should keep the appropriation sufficiently large to train all of the available men in that line of activity; and it would seem to me that if the reduction there should be less, so that the number of men to be trained would be increased substantially above 16,500, it would be better than to pare it to the very minimum.

Mr. REED of Pennsylvania. Mr. President, we are pulled in two directions. We feel, as does the Senator, that it is desirable to make a gradual increase in the number being trained. On the other hand, we find the Budget tending to cut down the number each year; and there is a certain advantage in having the number remain fairly constant, so that the department may make its plans and the officers may make their plans knowing approximately in what rotation they will secure this training. What we hope to do is to get training every third year for every officer who keeps up his interest in the work and shows it by taking the winter correspondence training. Substantially that is what we are trying to do by this.

Mr. BRATTON. Mr. President, will the Senator tell us what figure the Budget fixed for that particular item?

Mr. REED of Pennsylvania. The estimate of the Budget was $2,000,356.

Mr. BRATTON. So that even the figure fixed by the Senate Committee on Appropriations is in excess of the figure fixed by the Budget?

Mr. REED of Pennsylvania. An increase of over $115,000 for that item; yes.

Mr. BRATTON. That is all, Mr. President. I thank the Senator.

Mr. DILL. Mr. President, does the amount reported in the Senate amendment meet the desires of the representatives of the Officers' Reserve?

Mr. REED of Pennsylvania. No, Mr. President; I am confident in saying that it does not.

Mr. DILL. They are in favor of the amount passed by the House?

Mr. REED of Pennsylvania. They would like an increase, just as the National Guard would like an increase, and the Regulars would like an increase. It is desired all along the line. We can not in any case meet the expressed desires of the representatives of the various organizations. We tried, however, to be impartial, because we believe in the Organized Reserves.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment was, under the subhead "Pay of Military Academy," on page 51, line 15, after the figures "$4,000," to insert "constructing quartermaster, in addition to his regular pay, $1,000"; and at the end of line 18, after the words "in all," to strike out "$50,192" and insert "$51,192," so as to read:

Permanent establishment: For eight professors, $30,500; chaplain, $4,000; constructing quartermaster, in addition to his regular pay, $1,000; additional pay of professors and officers for length of service, $11,750; subsistence allowance of professors and officers, $3,942; in all, $51,192.

The amendment was agreed to.

The next amendment was, under the subhead "Militia Bureau, National Guard, arming, equipping, and training the National Guard," on page 54, at the end of line 12, to increase the appropriation for compensation of help for care of materials, animals, and equipment from $2,328,553 to $2,436,300.

The amendment was agreed to.

Mr. WILLIS. Mr. President, I desire the attention of the Senator from Pennsylvania. Is it the desire of the Senator to complete the consideration of committee amendments first? I wish to interrogate him about a proposed amendment on page 55.

Mr. REED of Pennsylvania. If it is to a committee amendment, I shall be glad to have it offered now.

Mr. WILLIS. No; it is not to a committee amendment. I desire to know whether we are proceeding under an understanding that we are to complete the committee amendments first. Is that the idea?

Mr. REED of Pennsylvania. Yes; that is the unanimous-consent agreement.

Mr. WILLIS. I was not present at the time the agreement was made. Very well, then; we will return to these matters for individual amendments.

The VICE PRESIDENT. The Secretary will continue the reading of the bill.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, under the subhead "Arms, uniforms, equipment, etc., for field service, National Guard," on page 56, line 8, after the word "use," to strike out "$5,180,650" and insert "$5,263,150," so as to read:

To procure by purchase or manufacture and issue from time to time to the National Guard, upon requisition of the governors of the several States and Territories, or the commanding general, National Guard of the District of Columbia, such military equipment and stores of all kinds and a reserve supply thereof, including horses conforming to the

Regular Army standards for use of the Cavalry, Field Artillery, and mounted organizations of the National Guard, as are necessary to arm, uniform, and equip for field service the National Guard of the several States, Territories, and the District of Columbia, and to repair such of the aforementioned articles of equipage and military stores as are or may become damaged when, under regulations prescribed by the Secretary of War, such repair may be determined to be an economical measure and as necessary for their proper preservation and use, $5,263,150, of which not less than $734,288 shall be available only for the production and purchase of new airplanes and their equipment, spare parts, and accessories—

And so forth.

The amendment was agreed to.

The next amendment was, under the subhead "Organized Reserves," on page 57, at the end of line 7, to reduce the appropriation for pay and allowances of members of the Officers' Reserve Corps on active duty for not exceeding 15 days' training from $2,657,000 to $2,125,600; at the end of line 13 to increase the appropriation for mileage, reimbursement of actual traveling expenses, or per diem allowances in lieu thereof, as authorized by law, for Organized Reserves from $371,750 to $390,344; and at the end of line 18 to change the total appropriation for the officers of the Reserve Corps from $3,702,302 to $3,189,496.

Mr. THOMAS. Mr. President, I desire to offer three amendments changing the three sets of figures having to do with the appropriation for the reserves, but I take it that I can submit this amendment as one amendment, because it has to do with the desire of the national reserve organization.

Mr. REED of Pennsylvania. Mr. President, I ask the Senator to withhold his amendments until the committee amendments have been considered.

The VICE PRESIDENT. The amendments are to the committee amendments.

Mr. REED of Pennsylvania. Very well.

Mr. THOMAS. On page 57, in line 7, I move to strike out the committee amendment figures "$2,125,600" and substitute therefor "$2,583,667."

To make that amendment harmonious, I move, in line 13, on the same page, to strike out the committee amendment "$390,-344" and insert in lieu thereof "$463,614."

Then in the total, in line 18, I move to strike out the committee amendment in the sum of $3,189,496 and substitute $3,720,833.

Mr. REED of Pennsylvania. I make the point of order that no estimate has been received for the increases covered by the amendments.

The VICE PRESIDENT. The amendments are in order, since they do not increase the total in the bill. Is there objection to the consideration of the three amendments as one?

Mr. REED of Pennsylvania. Mr. President, I understand that they do increase the total in the bill.

Mr. THOMAS. They do not increase the total carried by the House, Mr. President.

The VICE PRESIDENT. Is there objection to the consideration of the three amendments as one? The Chair hears none.

Mr. REED of Pennsylvania. Mr. President, a parliamentary inquiry. What was the request?

Mr. THOMAS. That these three amendments be considered as one, because they tend to the one purpose.

Mr. President, there are something in excess of 120,000 reserve officers. It is thought by that organization that 20 per cent of those men should be trained annually. If this organization is worthy of continuance as a part of our national defense for war, it occurs to me that 20 per cent is not too much to ask to have trained each year. If it is not to be maintained, if 20 per cent is too large a number, then it occurs to me that the entire organized reserves should be abolished. If they can not be trained at the rate of one-fifth of that number each year, then it occurs to me that they are not worth training at all.

The Budget, I understand, makes allowance for 16,000. The reserve association went before the House committee and asked for a training allowance for 20,000. On the floor of the House they increased that to 20,000, and the bill comes to this body with an appropriation sufficient to train 20,000 reserve officers this year. The Senate committee seeks to cut that down to approximately 16,000.

At this time I desire to have read a letter addressed to me by the president of the National Reserve Officers' Association, which sets forth the ideas of that organization. I send the letter to the desk and ask that it be read.

The VICE PRESIDENT. Without objection, the letter will be read.

The Chief Clerk read as follows:

RESERVE OFFICERS' ASSOCIATION OF THE UNITED STATES,
Washington, D. C., February 27, 1928.

DEAR SENATOR: I ask your indulgence in a matter which I believe of serious importance in the national defense.

Page 57, H. R. 10286, the War Department appropriation bill, provides for the Organized Reserves by reducing the amount for pay and allowances for reserve officers on active duty not exceeding 15 days' training. The Senate committee has eliminated the training of 4,000 officers that was provided for by the Wurzbach amendment in the House, thus reducing the total number of such trainees from 20,000 to 16,000.

This is less than was provided for in the fiscal years 1927 and 1928 by 382, being the first setback the Organized Reserves ever received in the number to be trained.

Reserve training has been the subject of serious discussion in the House by a decisive vote of approximately 3 to 1 (268–95). It declared for the training of 20,000 reserve officers for the next training period.

The American Legion, which has as one of its objects the maintenance of adequate national defense is on record as favoring training for 20,000 reserve officers annually.

The recommendation to train 20,000 reserve officers annually was agreed to by unanimous vote after careful survey of the situation at the last annual convention of the Reserve Officers' Association of the United States at Milwaukee last October.

Even at this rate, if only combat officers were trained, it would only give two weeks' training once in three years, as the reserve contains approximately 60,000 combat officers. With the training available of all branches, however, it is available but once in something over five years, the period of an officer's appointment. We submit that a less amount of training will render impotent and valueless the reserve component of the Army of the United States, which, in time of an emergency, constitutes 85 per cent of the entire force.

If the committee report is adopted by the Senate, it will work an injustice to thousands of reserve officers whose commissions are about to expire, and require renewal during the current year, by reason of not being given the opportunity to secure the required hours of credit to qualify for either promotion or reappointment.

The bulk of the Officers' Reserve Corps are seasoned war veterans. They are giving to the country patriotic service in time, money, and knowledge learned in active warfare. They receive no pay, expense, or allowance of any kind for time devoted to correspondence school courses, study, instruction meetings, etc.

The national defense act is sweeping and comprehensive; but if it is not vitalized, if the Congress withholds its support for training the citizens' component, it must fail of its purpose.

Major General Summerall, Chief of Staff of the Army, is on record as stating, in effect, the country would require 220,000 to make fully effective the War Department's mobilization plan or six field armies, as contemplated by the national defense act. We are developing less than one-half the required number, and giving them only the slightest encouragement.

Through mistake or inadvertence the House failed to provide a sum sufficient for mileage for 20,000 officers. I therefore suggest if the Senate does not desire to increase the sum required for training in the bill as it came from the House, that it divide the sum of $531,400, added by the House, into two items, namely, "pay and allowances" and "mileage," for we find that unless a proportionate fund for mileage purposes is provided, the pay and allowance sum added by the House will not be available or expendable. The division of the sum as suggested would provide training for 3,448 officers, $458,067 should be set aside as pay and allowances, and the sum of $73,270 as mileage.

I appeal to you upon behalf of this patriotic band of citizens, the youngsters going into the reserves through the citizens' military training camps and Reserve Officers' Training Corps, and those who have served in the World War who are able, ready, and willing to help this country provide a citizens army upon which the country must largely depend in a major emergency.

I urge you not to render their efforts futile and unavailing, but to afford such recognition and assistance as will keep up their morale and interest.

To provide the training requested only requires about one-half of 1 per cent of the fund appropriated annually for national defense.

It is the most economical, democratic policy our country has ever advanced for being in a position of readiness.

If it can not be developed into a dependable strength, then any money spent on it is wasted, and it would seem the plan had best be abandoned altogether.

Sincerely yours,

ROY HOFFMAN,
Brigidier General, Infantry Reserve, President.

Mr. HAYDEN. Mr. President——

The VICE PRESIDENT. Does the Senator from Oklahoma yield to the Senator from Arizona?

Mr. THOMAS. I yield.

Mr. HAYDEN. I would like to state to the Senate that I have been personally acquainted with Roy Hoffman, who wrote the letter which has just been read, for nearly 20 years, beginning with the time when we first attended the national rifle matches together at Camp Perry, Ohio. No man in America has devoted his time and talents to a public cause with greater benefit to the Nation than has General Hoffman. I am sure that what he asks in that letter comes from a sincere desire to be of service to his country.

As I understand the effect of the amendment proposed by the Senator from Oklahoma, it is not to change the total amount of money carried in the bill but to reduce the amount as proposed by the House of Representatives for the training of officers by enough to add a sum sufficient to provide for the payment of mileage whereby they may be able to attend the training camps. In other words, the House, in voting the pay and allowances for the training of 20,000 reserve officers, unfortunately failed to appropriate the money necessary to pay the mileage necessary to take them to the camps. To correct the situation in which we find ourselves, without changing the total amount carried in the bill, it is proposed to reduce the amount for pay and allowances, and increase the amount for mileage, so that an additional number of reserve officers can be trained.

I am firmly convinced that no greater value can be obtained from the expenditures of money for national defense than through the training of officers of the Organized Reserves, and I hope that the amendment offered by the Senator from Oklahoma will prevail.

Mr. THOMAS. Mr. President, the amendment submitted by me carries out the request of the National Reserve Officers' Association. The letter just read was prepared by General Hoffman, at the present time the president of that association. General Hoffman was a brigadier general in the World War and led a division in France.

This amendment would not increase the amount of money carried by the bill as it passed the House. It would rearrange the appropriation. If the amendment I have offered shall prevail, it will provide for the training of 19,348 officers. The request of the association was for the training of 20,000, but the matter has gotten into such shape that in order to get the amendment adopted and not increase the amount carried by the bill as it passed the House, it is necessary to rearrange the figures so as to provide for the training of only 19,348 officers.

I submit this amendment in behalf of the National Reserve Officers' Association, which is composed of units from every State. As a rule, that organization is made up of men who saw service in the recent World War. In addition to those men, it takes into its organization National Guard officers, likewise graduates of our colleges who are trained in military tactics. It occurs to me that if we are to maintain this branch of the national defense, it must be adequately and properly taken care of. At the present time there is a bill pending before Congress proposing to incorporate this association as a national organization under the authority of Congress.

I move the adoption of the amendment.

Mr. REED of Pennsylvania obtained the floor.

Mr. SHIPSTEAD. Mr. President, will the Senator yield for a question?

Mr. REED of Pennsylvania. I yield.

Mr. SHIPSTEAD. Under this appropriation would there be provision for the training of officers of the Reserve Corps of the Air Force?

Mr. REED of Pennsylvania. The appropriation for the training of the officers in the Air Corps Reserve will be found on page 59. The Senator will see that we have found an unexpended balance, which we can reappropriate, providing $425,000 additional for that training.

Mr. SHIPSTEAD. Mr. President, I would like to ask the Senator another question, if he will yield.

Mr. REED of Pennsylvania. I yield.

Mr. SHIPSTEAD. I have always thought that the Reserve Officers' Training Corps was the most important part of our Military Establishment in time of peace. It is a peace organization, training officers for emergencies, and the last emergency showed that our weakness lay in the lack of officers. I can not understand why so small a sum has been provided for that very important branch out of this tremendously large appropriation for military purposes. I suppose the committee have some valid reason for their action and I would like to have the Senator state why so little has been provided for that important branch of the service. I think it is the most important branch in the Military Establishment.

Mr. REED of Pennsylvania. If the Senator means the Reserve Officers' Training Corps, that comes under a totally different item, which he will find begining on page 60. The Senator will observe that we have slightly increased the appropriation for the Reserve Officers' Training Corps. He will see that on page 62 there is provided $2,970,000 for the Reserve Officers' Training Corps, in addition to the amounts provided for the Organized Reserves.

Mr. TYDINGS. Mr. President, while the Senator from Pennsylvania is on his feet I would like to ask him if there will not be a deficit created, as far as armory drills are concerned, under the bill as reported?

Mr. REED of Pennsylvania. That comes under another item, but I am glad to explain it, if the Senator wishes, though we have already passed this item.

The appropriation for armory drills, as appears on page 55 of the bill, is $10,700,000. The estimate of the Bureau of the Budget was in that amount. The appropriation last year was $9,498,000, so that we have increased the appropriation for this item by over $1,200,000. Nevertheless, that probably will be insufficient. We thought that it might be possible to get a supplemental estimate which would take care of that, and application was made to the Bureau of the Budget, but I understand that it was refused, on the ground that it was not yet possible to determine the exact amount that should be appropriated. Therefore it was thought best to do as we did in the present year—allow the deficiency to be taken care of in the last deficiency bill.

Mr. TYDINGS. I thank the Senator.

Mr. REED of Pennsylvania. I might say, just to finish the statement, that there is no disposition that I can discover, either in the War Department or in the Bureau of the Budget, to reduce the number of armory drills below 48 each year. That seems to be an accepted, settled policy.

Mr. BAYARD. Mr. President, I would like to ask the Senator on that very point whether this would insure a minimum of 48 drills?

Mr. REED of Pennsylvania. We can not insure it, because we do not know how many men are coming out for the early drills each year, but it is a settled policy, as far as we are able to have one, in the Appropriations Committee, in the War Department, and in the Bureau of the Budget to provide each year for 48 drills.

Mr. BAYARD. There was a suggestion made by the Senator a moment ago that the second deficiency bill would take care of the resetting of these figures. That, I suppose, will insure a minimum of 48 drills.

Mr. REED of Pennsylvania. Yes; absolutely; and we would have been glad to provide for it here, but neither the department, the Militia Bureau, nor the Bureau of the Budget could tell us how much to put in for that purpose.

Just a word on this amendment about the Organized Reserves. It is true that there were 110,014 officers commissioned in the Reserve Corps at the end of the last fiscal year. When we speak of training 16,000 a year, that does not seem like a large percentage. But let us consider the figures that go to make up that 110,000.

To begin with, more than 10 per cent of them, or 11,711 officers, are in the Medical Reserve. They are doctors. They are being trained every day of their lives, and they do not need to be called out to camp to train them to do doctoring.

We find that 4,630 of the officers are dentists, and we do not need to call them to camp in the summer to teach them dentistry. They are practicing that every day.

There are 1,079 veterinary surgeons, and they are practicing their profession as the days go by and do not need to be called to camp for that purpose.

There are 1,215 chaplains, and presumably they are pious men throughout the year and do not need to receive an accession of virtue by being called to a summer camp.

There are 6,903 of these officers commissioned in the Air Corps, and very liberal provision has been made to keep up their training throughout the year by giving them flying training in regular Army planes. We provide for all the expense of that in another place in this bill.

So when we get the number reduced down to those who really need the summer training we find that it is largely limited to the combatant groups. There are, I may be permitted to say, 10,652 of these officers in the Quartermaster Corps. Many of them will be used in the service of procurement, and we can not give them in any summer camp training in buying millions of blankets and that kind of necessary wartime training.

When we get down to the "brass tacks" of the situation we find that there are 32,000 Infantry officers, 3,900 Cavalry officers, almost 11,000 Field Artillery officers, and 4,800 Coast

Artillery officers. Those are officers of the Reserve Corps who need the summer camp training. The total is less than 60,000.

I yield to nobody in my admiration for the reserve officers as a part of the Army of the United States. Only the fact that the Constitution compelled it made me surrender my own commission in the Field Artillery Reserve. I was proud of it. I would be glad to hold to it as long as they think me of any use.

I know General Hoffman, of whom the Senator from Arizona [Mr. HAYDEN] has spoken so highly, and I admire him and I admire the work he is doing. He is a source of great inspiration for the Officers' Reserve Corps. But he is like everybody else in the Army in that he wants more for his particular branch of it than the needs of the Treasury will permit us to give. We might call in the chief of any branch, beginning with the Air Corps and going right down through the list, and each one would tell us that he needs more money in order to keep his branch perfectly efficient. Call in the head of the Militia Bureau and he would tell us the same thing about the National Guard. Call in the Chief of Staff and he could point to 20 places where he wants more money.

Constantly that kind of application is made. We have tried to strike a fair balance among them. Of less than 60,000 officers in the line branches we have provided for the training of 16,000 each year. If we eliminate the deadwood, the old fellows like myself whose military days are well along toward their conclusion and who ought not to have money wasted on them for summer training now, it will be found that under the appropriation we can each year train about one line officer in three. In other words, each officer will get training every three years.

We have fixed the amount at substantially exactly what it was last year in the hope that we will train about 16,400 officers with the money. If we keep that situation stable, then the department can count on a regular roster for training, the officers themselves can make their arrangements in advance, and we will have a stabilized system that will give us the best results. But if we are going to be impulsive each year, because we have a host of friends in the Reserve Corps, and each of us has, and because we admire General Hoffman, and each of us does, if we are going to take away all semblance of system in the thing, and we are going to find that finally the department will say that we are getting beyond the place where they can give useful training and make good use of the money which we are appropriating.

I hope that the judgment of the committee will be sustained by the Senate.

The PRESIDENT pro tempore. The question is on agreeing to the amendment submitted by the Senator from Oklahoma [Mr. THOMAS] to the amendment of the committee.

Mr. THOMAS. I call for the yeas and nays.

The yeas and nays were ordered.

Mr. BINGHAM. Mr. President, I should like to call the attention of Senators to one or two sentences that appear in the hearings before the Senate committee. Under the head of "Organized Reserves" General Summerall, the Chief of Staff, when asked by the chairman of the committee about the increases, said:

> The War Department estimate, approved by the Bureau of the Budget, provided for the training of 15,125 reserve officers for 15 days or less.
>
> Senator REED of Pennsylvania. That is a reduction from last year, is it?
>
> General SUMMERALL. Yes, sir. That reduction was made by reason of the necessity for reimbursing the supply branches of the Army for wear and tear on equipment used in reserve training and because of the increased cost of flying training for officers flying on an inactive status and for those undergoing flying training incident to their training for not more than 15 days. The House committee recommended 16,000.

On page 21 of the hearings we find a table showing reserve officers trained for 15 days, which shows that in the fiscal year 1926 there were 16,237, for the fiscal year 1927 there were 16,889, and for the fiscal year 1928 provided for in the appropriation, 16,382.

The amount which is approved by the House committee will probably take care of 16,500. That is the amount approved by the Senate committee. It seems inadvisable to increase the amount, for this reason: While there were some 19,000 officers applied, yet two or three thousand of them had done practically no work during the wintertime when they take their correspondence courses, had not prepared themselves for their study as officers, but would, nevertheless, enjoy a 15-day vacation in camp at Government expense. We all appreciate that fact, but it did not seem wise to the committee to provide training for more officers than were willing to spend their time during the winter, under the Army officers who were assigned to their corps areas, in preparing themselves for their work in camp. The work in camp is only a small part of the training of the reserve officers and the committee believes that the amount provided for in the bill would continue the work of training as it has been going on in the last three or four years and would take care of all the officers likely to apply and able to qualify to take the work.

Mr. HAYDEN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Connecticut yield to the Senator from Arizona?

Mr. BINGHAM. I yield.

Mr. HAYDEN. Would the Senator from Connecticut say that any officer who had not performed the proper amount of study during the winter should be permitted by those in authority to attend one of the training camps?

Mr. BINGHAM. No; that has not been the policy of the War Department. They have sent a number of those who have not done any training in the winter, whom they thought did not need that training, and have permitted them to go to camp. But the bill as it passed the House provides for more officers to be sent than have ever applied and, as the Senator from Pennsylvania [Mr. REED] has well said, there are only some 60,000 of the reserve officers who are actually in those branches of the Army which need the summer camp training. Of them, quite a number would never apply for it in any case. The bill as approved by the committee permits these officers to get the training once in three years if they choose, and no larger number of the men has ever applied.

Mr. HAYDEN. I fail to see how the Senator can multiply 16,000 by 3 and get 60,000 as the result.

Mr. BINGHAM. The Senator evidently did not hear the statement of the Senator from Pennsylvania that quite a number of these officers have already passed the age when they are really effective trainees or desire to go to camp.

Mr. FLETCHER. Mr. President, as I understand the House provision, while it is taking care of 20,000 officers, it did not provide for mileage and other items for the 20,000, so that the Senate committee has fixed the number at 16,500, with the hope and the idea that 16,500 will be taken care of and provided with mileage and maintenance and all that sort of thing. It is thought that 16,500 will be accommodated in that way.

The PRESIDENT pro tempore. The question is on agreeing to the amendment submitted by the Senator from Oklahoma [Mr. THOMAS] to the amendment of the committee. On this the yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. CURTIS (when his name was called). I have a pair with the senior Senator from Arkansas [Mr. ROBINSON]. I transfer that pair to the Senator from Idaho [Mr. GOODING] and vote "nay."

Mr. FLETCHER (when his name was called). I have a general pair with the Senator from Delaware [Mr. DU PONT]. I understand that on this question he would vote as I am about to vote, so I am at liberty to vote. I vote "nay."

Mr. TYSON (when his name was called). I have a general pair with the senior Senator from West Virginia [Mr. GOFF]. I transfer my pair to the junior Senator from New Jersey [Mr. EDWARDS] and vote "yea."

Mr. COPELAND (when Mr. WAGNER'S name was called). My colleague, the junior Senator from New York [Mr. WAGNER] is absent with the Coal Investigating Committee. If he were here and permitted to vote, he would vote "yea."

The roll call was concluded.

Mr. MCKELLAR. I wish to state that the Senator from West Virginia [Mr. NEELY] is unavoidably absent. If present, he would vote "yea."

Mr. GERRY. I desire to announce that the junior Senator from Montana [Mr. WHEELER] is necessarily detained on business of the Senate, being in attendance upon the special committee which is investigating conditions in the coal fields of Pennsylvania.

I also desire to announce that the junior Senator from Kentucky [Mr. BARKLEY], the senior Senator from Missouri [Mr. REED], the junior Senator from Missouri [Mr. HAWES], and the senior Senator from South Carolina [Mr. SMITH] are unavoidably absent. If the junior Senator from Kentucky were present, he would vote "yea."

The result was announced—yeas 52, nays 22, as follows:

YEAS—52

Ashurst	Copeland	Edge	Glass
Black	Couzens	Ferris	Hale
Blease	Cutting	Fess	Harris
Bratton	Dale	Frazier	Harrison
Brookhart	Deneen	George	Hayden
Caraway	Dill	Gerry	Heflin

Howell	Norbeck	Shipstead	Thomas

NOT VOTING—20

Barkley	Gooding	Norris	Smith
du Pont	Gould	Pine	Trammell
Edwards	Hawes	Reed, Mo.	Wagner
Gillett	King	Robinson, Ark.	Watson
Goff	Neely	Robinson, Ind.	Wheeler

So Mr. THOMAS's amendment to the amendment of the committee was agreed to.

The VICE PRESIDENT. The question is on agreeing to the committee amendment as amended.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Appropriations was, on page 58, line 2, after the word "publications," to insert "and blank books," so as to read:

Manuals: For purchase of training manuals, including Government publications and blank books, $20,000.

Mr. REED of Pennsylvania. Mr. President, that is a printer's error. The amendment should read "and blank forms," and I move to amend the committee amendment so to read.

The PRESIDENT pro tempore. In the absence of objection, the error will be corrected. Without objection, the amendment is agreed to.

The reading of the bill was resumed.

The next amendment was, on page 59, line 8, after the figures "1924," to strike out "$1,534,169" and insert "$1,539,650 and in addition thereto there is hereby reappropriated and made available for this purpose the sum of $425,000 of unexpended balances for 'Organized Reserves, 1926 and 1927,'" so as to make the paragraph read:

Headquarters and camps: For establishment, maintenance, and operation of divisional and regimental headquarters and of camps for training of the Organized Reserves; for miscellaneous expenses incident to the administration of the Organized Reserves, including the maintenance and operation of motor-propelled passenger-carrying vehicles; for the actual and necessary expenses, or per diem in lieu thereof, at rates authorized by law, incurred by officers and enlisted men of the Regular Army traveling on duty in connection with the Organized Reserves; for reimbursement for the use, including upkeep and depreciation costs, of supplies, equipment, and matériel furnished in accordance with law from stocks under the control of the War Department, except that not to exceed $194,087 of this appropriation shall be available for expenditure by the Chief of the Air Corps for the production and purchase of new airplanes and their equipment, spare parts, and accessories; for transportation of baggage, including packing and crating, of reserve officers on active duty for not less than six months; for medical and hospital treatment, continuation of pay and allowances not to exceed six months, and transportation when fit for travel to their homes of members of the Officers' Reserve Corps and Enlisted Reserve Corps of the Army injured in line of duty while on active duty under proper orders or while voluntarily participating in aerial flights in Government-owned aircraft by proper authority as an incident to their military training, and for the preparation and transportation to their homes and burial expenses of the remains of members of the Organized Reserves who die while on active duty, as provided in section 4 of the act of June 3, 1924, $1,539,650 and in addition thereto there is hereby reappropriated and made available for this purpose the sum of $425,000 of unexpended balances for "Organized Reserves, 1926 and 1927": *Provided*, That not to exceed $100,000 of this amount may be used for establishment and maintenance of divisional and regimental headquarters.

The amendment was agreed to.

The next amendment was, under the subhead "Citizens' Military Training, Reserve Officers' Training Corps," on page 62, line 15, after the word "vehicles," to strike out "$2,953,500" and insert "$2,970,000"; so as to read:

CITIZENS' MILITARY TRAINING

RESERVE OFFICERS' TRAINING CORPS

For the procurement, maintenance, and issue, under such regulations as may be prescribed by the Secretary of War, to institutions at which one or more units of the Reserve Officers' Training Corps are maintained, of such public animals, means of transportation, supplies, tentage, equipment, and uniforms as he may deem necessary, including cleaning and laundering of uniforms and clothing at camps; and to forage, at the expense of the United States, public animals so issued, and to pay commutation in lieu of uniforms at a rate to be fixed annually by the Secretary of War; for transporting said animals and other authorized supplies and equipment from place of issue to the several institutions and training camps and return of same to place of issue when necessary; for purchase of training manuals, including Government publications and blank forms; for the establishment and maintenance of camps for the further practical instruction of the members of the Reserve Officers' Training Corps, and for transporting members of such corps to and from such camps, and to subsist them while traveling to and from such camps and while remaining therein so far as appropriations will permit or, in lieu of transporting them to and from such camps and subsisting them while en route, to pay them travel allowance at the rate of 5 cents per mile for the distance by the shortest usually traveled route from the places from which they are authorized to proceed to the camp and for the return travel thereto, and to pay the return travel pay in advance of the actual performance of the travel; for reimbursement for the use, including upkeep and depreciation costs, of supplies, equipment, and matériel furnished in accordance with law from stocks under the control of the War Department; for pay for students attending advanced camps at the rate prescribed for soldiers of the seventh grade of the Regular Army; for the payment of commutation of subsistence to members of the senior division of the Reserve Officers' Training Corps, at a rate not exceeding the cost of the garrison ration prescribed for the Army, as authorized in the act approved June 3, 1916, as amended by the act approved June 4, 1920; for medical and hospital treatment, subsistence until furnished transportation, and transportation when fit for travel to their homes of members of the Reserve Officers' Training Corps injured in line of duty while at camps of instruction under the provisions of section 47a and section 47d of the national defense act approved June 3, 1916, as amended; and for the cost of preparation and transportation to their homes and burial expenses of the remains of members of the Reserve Officers' Training Corps who die while attending camps of instruction as provided in section 4 of the act approved June 3, 1924; and for the cost of maintenance, repair, and operation of passenger-carrying vehicles, $2,970,000, to remain available until December 31, 1929.

The amendment was agreed to.

The next amendment was, on page 63, line 15, after the word "thereat," to strike out the following proviso:

Provided further, That none of the funds appropriated in this act shall be used for the purpose of employment of hostesses for the citizens' military training camps.

The amendment was agreed to.

The next amendment was, under the subhead "Citizens' military training camps," on page 65, line 17, after the figures "1929," to insert "and this sum shall be available for training not to exceed 40,000 trainees," so as to read:

in all, $2,801,240, to remain available until December 31, 1929, and this sum shall be available for training not to exceed 40,000 trainees.

The amendment was agreed to.

The next amendment was, under the subhead "National Board for Promotion of Rifle Practice, Army national matches," on page 67, line 2, after the figures "1927," to insert "except the pay and allowances of officers and the pay, allowances, and subsistence of enlisted men of the Regular Army, Navy, and Marine Corps, who are on duty in any capacity in connection with the national matches and Small Arms Firing School, which pay and allowances and pay, allowances, and subsistence, respectively, shall be paid from other funds appropriated for that purpose," and on page 68, line 22, after the name "Secretary of War," to strike out "$500,000" and insert "there is hereby reappropriated the sum of $500,000 of unexpended balances of appropriations and in amounts as follows: 'Citizens' military training camps, 1925,' $100,000; 'Reserve Officers' Training Corps, 1925,' $290,000; 'Reserve Officers' Training Corps, 1926,' $110,000," so as to make the paragraph read:

For every expenditure requisite for and incident to the conduct of the national matches and the maintenance and operation of the Small Arms Firing School held in conjunction therewith as authorized by section 113 (c) of the national defense act (act of June 3, 1916, as amended by the act of June 7, 1924, and February 14, 1927), except the pay and allowances of officers and the pay, allowances, and subsistence of enlisted men of the Regular Army, Navy, and Marine Corps, who are on duty in any capacity in connection with the national matches and the Small Arms Firing School, which pay and allowances and pay, allowances, and subsistence, respectively, shall be paid from other funds appropriated for that purpose, including procurement and installation of equipment, ammunition, supplies, materials, flooring and frames for tents, construction of shooting galleries, and shelters for rifle practice; nonstructural improvements; repairs and alterations to buildings, water system, sewer and lighting systems; repairs and alterations to equipment and supplies; communication service; pay and

allowance of officers and enlisted men of the National Guard participating in the national matches and the Small Arms Firing School from the date of departure from their homes to the date of return thereto; pay and allowance of reserve officers called to active duty in connection with the national matches and the Small Arms Firing School; personal and nonpersonal services; subsistence, including commutation of rations to authorized teams from the National Guard, Organized Reserve, Reserve Officers' Training Corps, citizens' military training camps, and civilian teams representing the States and including the enlisted men of teams from the Regular Army from the date of departure from their homes or stations to the date of return thereto at the rate not exceeding $1.50 per day each; transportation, including repair, operation, and maintenance of motor-propelled and animal-drawn vehicles; travel of authorized teams representing the Regular Army, National Guard, Organized Reserve, Reserve Officers' Training Corps, citizens' military training camps, and civilian teams representing States, including officers and enlisted men of the Regular Army; travel of commissioned and enlisted personnel of the Regular Army; National Guard, and Organized Reserve on duty in connection with the national matches and the Small Arms Firing School, including mileage of officers; reimbursement of travel expenses or allowance in lieu thereof as authorized by law for officers of the Regular Army and Organized Reserve; travel of civilian employees to and from the national matches, including a per diem allowance in lieu of subsistence while traveling to and from said matches and while on duty thereat; all to be expended under the direction of the Secretary of War, there is hereby reappropriated the sum of $500,000 of unexpended balances of appropriations and in amounts as follows: "Citizens' military training camps, 1925," $100,000; "Reserve Officers' Training Corps, 1925," $290,000; "Reserve Officers' Training Corps, 1926," $110,000.

The amendment was agreed to.

The next amendment was, under the subhead "Quartermaster Corps, national cemeteries," on page 72, after line 2, to insert:

Chalmette National Cemetery, La.: For moving and construction of buildings, preparing new addition for interments, reinterments, and necessary changes and improvements incident to providing a right of way through the Chalmette National Cemetery, Chalmette, La., for the construction of a new levee by the State of Louisiana, $32,000.

The amendment was agreed to.

The next amendment was, under the subhead "Gettysburg National Military Park," on page 77, line 14, to strike out "$48,841" and insert "$53,026," so as to make the paragraph read:

GETTYSBURG NATIONAL MILITARY PARK

For continuing the establishment of the park; acquisition of lands, surveys, and maps; constructing, improving, and maintaining avenues, roads, and bridges thereon; fences and gates; marking the lines of battle with tablets and guns, each tablet bearing a brief legend giving historic facts and compiled without censure and without praise; preserving the features of the battle field and the monuments thereon; compensation of superintendent, clerical and other services, expenses, and labor; purchase and preparation of tablets and gun carriages and placing them in position; maintenance, repair, and operation of a motor-propelled passenger-carrying vehicle, and all other expenses incident to the foregoing, $53,026.

The amendment was agreed to.

The next amendment was, under the subhead "National monuments," on page 80, line 12, after the figures "$25,000" so insert a colon and the following proviso:

Provided, That not to exceed $5,000 of this sum may be expended for the purchase of plans, drawings, and specifications for the erection of this monument by open competition, under such conditions as the commission may prescribe.

The amendment was agreed to.

The next amendment was, under the subhead "Construction and maintenance of roads, bridges, and trails, Alaska," on page 83, line 4, after the word "amended," to strike out "$590,000" and insert "$900,000," so as to make the paragraph read:

For the construction, repair, and maintenance of roads, tramways, ferries, bridges, and trails, Territory of Alaska, to be expended under the direction of the board of road commissioners described in section 2 of an act entitled "An act to provide for the construction and maintenance of roads, the establishment and maintenance of schools, and the care and support of insane persons in the District of Alaska, and for other purposes," approved January 27, 1905, as amended by the act approved May 14, 1906, and to be expended comformably to the provisions of said act as amended, $900,000, to be available immediately.

The amendment was agreed to.

The next amendment was, under the subhead "Rivers and harbors," on page 83, line 23, after the name "Miami Harbor," to strike out "as provided under the rivers and harbors act passed March 3, 1925, in accordance with House Document 516, the sum of" and insert "under the provisions of the river and harbor act approved March 3, 1925, $605,000," so as to make the paragraph read:

Harbor reimbursement: To pay the city of Miami, out of any funds available in the Treasury not otherwise appropriated, for part reimbursement of the $1,605,000 advanced or loaned to the Government by said city for the improvement of Miami Harbor, under the provisions of the river and harbor act approved March 3, 1925, $605,000.

The amendment was agreed to.

The next amendment was, on page 84, at the end of line 21, to strike out "$55,886,310" and insert "$52,000,000," so as to make the paragraph read:

For the preservation and maintenance of existing river and harbor works, and for the prosecution of such projects heretofore authorized as may be most desirable in the interests of commerce and navigation; for survey of northern and northwestern lakes, Lake of the Woods, and other boundary and connecting waters between the said lake and Lake Superior, Lake Champlain, and the natural navigable waters embraced in the navigation system of the New York canals, including all necessary expenses for preparing, correcting, extending, printing, binding, and issuing charts and bulletins and of investigating lake levels with a view to their regulation; for examinations, surveys, and contingencies of rivers and harbors, provided that no funds shall be expended for any preliminary examination, survey, project, or estimate not authorized by law; and for the prevention of obstructive and injurious deposits within the harbor and adjacent waters of New York City, for pay of inspectors, deputy inspectors, crews, and office force, and for maintenance of patrol fleet and expenses of office, $52,000,000.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

Mr. McKELLAR. I wish to make a statement about this particular item.

Mr. SHIPSTEAD. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The roll was called, and the following Senators answered to their names:

Ashurst	Edwards	La Follette	Sheppard
Bayard	Ferris	McKellar	Shipstead
Bingham	Fess	McLean	Shortridge
Black	Fletcher	McMaster	Simmons
Blaine	Frazier	McNary	Smoot
Blease	George	Mayfield	Steck
Borah	Gerry	Metcalf	Steiwer
Bratton	Gillett	Moses	Stephens
Brookhart	Glass	Neely	Swanson
Broussard	Gould	Norbeck	Thomas
Bruce	Greene	Norris	Tydings
Capper	Hale	Nye	Tyson
Caraway	Harris	Oddie	Walsh, Mass.
Copeland	Harrison	Overman	Walsh, Mont.
Couzens	Hayden	Phipps	Warren
Curtis	Heflin	Pittman	Waterman
Cutting	Howell	Ransdell	Watson
Dale	Johnson	Reed, Pa.	Willis
Deneen	Jones	Robinson, Ind.	
Dill	Kendrick	Sackett	
Edge	Keyes	Schall	

The PRESIDENT pro tempore. Eighty-one Senators have answered to their names. A quorum is present.

Mr. McKELLAR. Mr. President, I merely wish recognition for a few moments. The House in the case of this item provided an appropriation of $55,886,310. That figure is taken from the War Department report. The department asked for that amount, or was about to ask for it, when the Budget Director and the President stated that they would not recommend more than the flat amount of $50,000,000. The estimate came to the House in that form. When, however, that item reached the House the House by an overwhelming majority of 3 or 4 to 1 restored the estimate of the department, namely, $55,886,310. In the consideration in the Senate committee an amendment was offered restoring the $50,000,000, as recommended by the Budget. That proposal was voted down. Then another Senator, the Senator from Washington [Mr. JONES], offered the amendment which now appears in the bill fixing the amount at $52,000,000. That amendment carried by a vote of 12 to 10, as I recall, with the privilege to those of us who did not agree to that figure to seek to change it on the floor of the Senate.

Mr. President, I think we ought to allow the full amount of $55,886,310 for a number of reasons. In the first place, I wish to read what the Chief of Engineers had to say about it:

Senator FLETCHER. You could advantageously and economically use this $55,800,000?

General JADWIN. We can use that economically and advantageously. It will all go on projects you have authorized, and on what we regard as the most pressing at this time.

Senator FLETCHER. Your estimate originally was cut, and the Budget cut it to $50,000,000; or, rather, your estimates provided for it?

General JADWIN. Our estimates provided for it.

Senator FLETCHER. In other words, it is not more than you could economically and advantageously use during the year?

General JADWIN. No, sir; it is just a matter of the expenditure of funds which we can spend economically and advantageously.

Mr. President, this work ought to go on. I think it is a mistaken policy to pare down the appropriations and to expend the money for this great purpose by piecemeal.

In addition to that, we have 4,000,000 people in this country without employment to-day; and it seems to me to be bad policy for the Government to be undertaking to cut down expenditures for public works. Instead of cutting them down, we ought to add to them, and give as much employment as possible to people in the country.

For these reasons, Mr. President, I hope that the committee amendment of $52,000,000 will be voted down, and the House provision restored.

Mr. HEFLIN. Mr. President, I heartily concur in what the Senator from Tennessee [Mr. MCKELLAR] has said. The House passed this provision by a vote of four to one. I have talked to some Members of the House about it. They are very much disappointed at the action that has been taken by the Senate committee. They are going to insist, and I think they ought to insist, on keeping the House provision in the bill.

Among other things that will be taken care of by this appropriation is money for surveys of streams in the interest of navigation, flood control, power development, and irrigation. The amount that has been stricken off leaves an inadequate sum to carry on this and other important work. The House figures ought to be restored; and I am going to vote to retain in the bill the provision placed there by the House. I do not think there is any good reason or excuse for this amendment of the Senate committee in the face of the strong statement of General Jadwin. He says this money is needed.

The Senator from Tennessee made a good suggestion—that in view of the fact that the army of the unemployed is increasing, the carrying on of this important Government work would also give employment to patriotic Americans, and at the same time carry on to completion meritorious Government projects in several States of the Union. I trust that the Senate will reject the committee amendment.

Mr. SWANSON. Mr. President, I should like to ask the Senator in charge of the bill, who is recognized as knowing what is likely to occur in case certain things are done, if this amount is reduced from $55,000,000 to $52,000,000, what undertakings will be abandoned by the War Department?

Mr. REED of Pennsylvania. Mr. President, nothing will be abandoned. The Budget allowance was $50,000,000. The House increased that by nearly $6,000,000 to the amount requested by the Chief of Engineers. In the committee we fixed it at $52,000,000, having in view what I shall state. Perhaps I am answering the question by approaching it the other way. We thought it was highly necessary that the full program of surveys be carried out. The $50,000,000 includes only one and a half million dollars for that, whereas the Chief of Engineers wanted $2,000,000. There was a half million dollar increase over the Budget that we thought might justifiably be made; so we put that on. Then we wanted to go as fast as possible in the improvement of the Missouri River up to Kansas City and to some extent beyond, but principally to Kansas City, because of the very obvious effect it will have on freight rates on the farm products that come from those regions. The Chief of Engineers figured that if he had $4,000,000 to put on that each year he could do the work in three years. The Budget allowed only $1,690,000; but he found that he could scrape up nearly a million dollars out of the funds that had been unexpended in prior years and were still available, making that about $2,600,000 or $2,700,000. We added to that another $1,000,000, so as to let him do the maximum of work possible in that improvement.

Mr. SWANSON. I was asking the Senator what would happen if the House appropriation were reduced from $55,000,000 to $52,000,000.

Mr. REED of Pennsylvania. I am contrasting what we did with the Budget allowance. The House took certain action on the item, too, but I am trying to show the Senator what it was that we did. That and the increase allowed for surveys made up the $52,000,000 arrived at by the committee.

If the Senator will look at the hearings before the Senate committee he will find, at pages 226 to 231, a long, detailed statement showing the difference in application of these two funds, the $50,000,000 fund and the $55,000,000 fund. It will answer his question; but to do so in detail would take a long time, because there are hundreds of items.

Mr. SWANSON. As I understand, the House gave $55,000,000, which included certain specific improvements.

Mr. REED of Pennsylvania. That is right.

Mr. SWANSON. The Budget recommended $50,000,000. The Senate committee reduced the House appropriation to $52,000,000. There is nothing imperative in this provision, nothing in the law to govern it, and does anyone know whose undertaking is to be eliminated if the $52,000,000 prevails?

Mr. REED of Pennsylvania. No; but we have heard from the Chief of Engineers.

Mr. SWANSON. But there is no assurance as to what he will do.

Mr. REED of Pennsylvania. Oh, yes. He has given us assurance of what he will do; and in order to avoid log-rolling and pork-barrel accusations——

Mr. SWANSON. Which I know the Senator is very much opposed to.

Mr. REED of Pennsylvania. Congress has very wisely put this matter in the discretion of the Chief of Engineers. He has come before us and told us what he proposes to do with the money if he gets it. There is no doubt about where the money will go, and all of that appears in these tables of which I speak.

Mr. SWANSON. Now, I should like to know this: Of course the harbors of this country and the approaches to them by channels facilitate cheap shipping of all agricultural products to foreign countries. Does this affect any of the ports on the Atlantic, Pacific, and Gulf coasts?

I think we have retarded the development of our harbors at the expense of exportation of goods on account of requiring the use of smaller ships instead of larger ones. I think that has reacted against the farmers and agriculturists. Does this affect the real, honest, genuine development of the harbors of this country so that they can have quick and cheap exportation of agricultural and other products?

Mr. REED of Pennsylvania. The bill as recommended by the Budget would provide $12,858,000 for seacoast harbors and channels.

Mr. SWANSON. Is that reduced by the committee's reduction to $52,000,000?

Mr. REED of Pennsylvania. No; I am speaking of the Budget. That is not changed by what we did.

Mr. SWANSON. Your reduction from $55,000,000 to $52,000,000 will not retard the development of these harbors?

Mr. REED of Pennsylvania. I have not finished. This will explain it:

If $55,000,000 is appropriated, $2,000,000 additional will be available for work on the seacoast harbors and channels. Fourteen million nine hundred and forty-two thousand dollars will be spent under the bill as it passed the House, as against $12,858,000 under the bill as reported by the Senate committee. It will make a difference of about $2,000,000 in the allowance for seacoast harbor work.

Mr. SWANSON. That is, they will be reduced to that extent?

Mr. REED of Pennsylvania. They will not be increased to that extent. Perhaps that is a better way to put it.

Mr. SWANSON. But if we accept your amendment in opposition to the House amendment, what will happen?

Mr. REED of Pennsylvania. It will make a difference of $2,000,000; yes.

Mr. SIMMONS and Mr. COPELAND addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Virginia yield; and if so, to whom?

Mr. SWANSON. I yield to the Senator from North Carolina.

Mr. SIMMONS. Mr. President, I desire to ask the Senator from Pennsylvania what harbors would lose by the elimination of this $2,000,000 that has been cut off of the appropriation for harbor work?

Mr. REED of Pennsylvania. Would the Senator like me to give a list of them?

Mr. SIMMONS. Yes; I would.

Mr. REED of Pennsylvania. The first difference would be in the work on the Thames River in Connecticut. The House bill would allow $50,000 more than the Senate bill for that work.

The next would be Norwalk Harbor, Conn., a difference of $10,000.

The next would be Jamaica Bay, N. Y., a difference of $200,000. The House bill would allow $1,000,000, whereas the Senate bill would allow $800,000.

The next would be the East River, N. Y., where the House bill would allow $1,685,000 and the Senate bill $1,375,000, a difference of $310,000.

The next would be Newtown Creek, N. Y., a difference of $10,000.

Harlem River, N. Y., a difference of $25,000.

Hudson River Channel, N. Y., a difference of $25,000.

Does the Senator want me to go down the whole list?

Mr. OVERMAN. Has the Senator got the figures for North Carolina?

Mr. SWANSON. I do not feel that I can yield to have the whole list given, Mr. President.

Mr. REED of Pennsylvania. I will come to North Carolina, if the Senator wishes.

Mr. SWANSON. I would suggest that the Senator from Pennsylvania furnish the list to the Senator from North Carolina.

Mr. FLETCHER. It is all detailed in the hearings.

Mr. SIMMONS. I know it is in the hearings, but not everybody has had an opportunity to read the hearings.

Mr. FLETCHER. The figures are printed in the RECORD.

Mr. SIMMONS. Not everybody has had an opportunity to read the RECORD.

Mr. SWANSON. Mr. President, I can not yield for that purpose. I understand that this is a table of three pages. I yield to the Senator, but not to have that entire statement read.

Mr. SIMMONS. Mr. President, I want to know now, in the time of the Senator from Virginia, if he controls the time, or I will know afterwards in my own time, exactly what harbors have been denied appropriations by reason of this cut made by the Senate committee.

Mr. REED of Pennsylvania. If the Senator will permit me, I will complete the list, so that it will be all at one place in the RECORD.

Mr. SWANSON. Will the Senator furnish to the Senator from North Carolina the items relating to North Carolina?

Mr. SIMMONS. Mr. President, I have not asked for the items relating to North Carolina; and I do not see why the Senator from Virginia, who is always asking for large river and harbor improvements, especially harbor improvements, should suspect that my interest was merely a local one when I ask the question in order that I may be myself informed who would lose through the cut made by the Senate committee from the $14,000,000 allowed by the House for river and harbor work.

Mr. SWANSON. Mr. President, in reply to that I will say that I am very anxious to know what is done for Virginia, because I know specifically in Virginia whether the committee does rightly or wrongly. I am not acquainted with the Atlantic. I am not acquainted with New York. I am not sufficiently acquainted to know whether they administer righteousness or wrong there. I should like to know, however, what items in Virginia are affected by this action. I have the report before me.

Mr. SIMMONS. Mr. President, the difference between the Senator from Virginia and myself is that the Senator seems to be interested only in Virginia, while I am interested in the harbors of the country.

Mr. SWANSON. The difference is that I say exactly what I think, while the Senator is using broader language than he really means.

Mr. SIMMONS. I shall be willing for the Senate to constitute a jury to determine that question between the Senator and myself.

Mr. SWANSON. It will be my pleasure to have that done. I know they would sustain me. I warn the Senator from North Carolina not to ask the Senate to be a jury.

What changes are proposed to be made in Virginia?

Mr. REED of Pennsylvania. Will not the Senator let me get to it in an orderly way?

Mr. SWANSON. Yes; proceed.

Mr. SIMMONS. Mr. President, I hope the Senator from Virginia will be given all the time he wants, but I am going to have all the time I want under the Senate rules.

Mr. SWANSON. Nobody can prevent the Senator from having it, and nobody will rejoice more than I in his having it, because the Senator always enlightens the Senate with a great deal of knowledge.

Mr. FLETCHER. May I suggest that the columns from which the Senator is reading give in detail the allotments under the $50,000,000 program and the allotments under the $55,800,000 program, but not the $52,000,000 program according to the amendment of the committee. I just wanted to explain these figures.

Mr. SIMMONS. I should like to have that explained, too.

Mr. FLETCHER. One is based on the $50,000,000 program that is recommended by the Budget, and the other is based on the $55,800,000.

Mr. SWANSON. I will give the Senator in a few minutes these figures which appear on page 227 of the hearings.

Mr. COPELAND. Mr. President, this is a very pleasant conversation, but some of the rest of us in the Chamber would like to hear it.

The PRESIDENT pro tempore. The Senator from New York desires that the Senator from Virginia and the Senator from North Carolina cease their exchange of confidences.

Mr. SIMMONS. Mr. President, I should be glad to have the Senator from New York take part in this conversation, as he always enlivens any conversation in which he participates.

Mr. SWANSON. The Senator from New York is not only good in conversation, but also in oratory, and I yield to him any time he requests.

I would like to ask the Senator from Pennsylvania another question. As I understand from the hearings, they have a basis of compromise between the $50,000,000 appropriation recommended by the Budget and the $55,000,000 appropriated by the House. I ask the Senator the question because I have not been able to find any basis for the distribution if we reduce the $55,000,000 to $52,000,000 and increase the $50,000,000 to $52,000,000.

Mr. REED of Pennsylvania. I tried to explain that to the Senator a little while ago. The committee was willing to find the additional money for that Missouri River improvement and for the completion of these surveys throughout the country. That, in substance, is the way we arrived at that compromise amount of $52,000,000.

Mr. SWANSON. As I understand, the committee takes the House provision, reduces it to $52,000,000, and then accepts the Budget estimate of $50,000,000 except so far as Kansas City is concerned?

Mr. REED of Pennsylvania. That was the thought of the committee, I believe.

Mr. SWANSON. As I understand, then, if this item of $52,000,000 goes through as the committee recommend, every other appropriation will be reduced on the basis of the $50,000,000, as contained in this report, except as to Kansas City?

Mr. REED of Pennsylvania. The general surveys will be permitted to the extent of $2,000,000.

Mr. SWANSON. Two million dollars will be permitted for simply general surveys, and the rest of the appropriation is to go for the Missouri River?

Mr. REED of Pennsylvania. The Senator has asked me what will be the effect on the State of Virginia. I can answer that in a word. The appropriation for the maintenance of Norfolk Harbor will not be changed. The appropriation for the improvement of Norfolk Harbor will be $50,000, as against $55,000, not a very substantial reduction. The Thimble Shoal Channel appropriation for maintenance will be unchanged. Under the bill as it passed the House, $580,000 would be spent on the improvement of the Newport News Channel and under the Senate committee amendment $520,000. On the James River we will spend $15,000 more under the bill as it passed the House, which gives $100,000 for improvement, and there will be $30,000 for maintenance under both schemes. That is all Virginia is interested in.

Mr. SWANSON. Will the Senator from Pennsylvania state to the Senator from North Carolina what the committee has done for North Carolina?

Mr. REED of Pennsylvania. I know the Senator from North Carolina is interested in the whole country.

Mr. SWANSON. I am interested in North Carolina also.

Mr. SIMMONS. Mr. President, as I understand, the sum total of the changes does not materially reduce the appropriations for the Virginia harbors.

Mr. REED of Pennsylvania. That is true.

Mr. SIMMONS. That satisfies the Senator from Virginia.

Mr. SWANSON. It does not complete the matter. What is the use spending $300,000 for a project when we lack $25,000 to complete it? That is a kind of picayune economy of which I do not approve. I am interested in North Carolina. I love North Carolina. Next to Virginia, there is no State I love more. I would like to have the Senator from Pennsylvania state what the committee has done for North Carolina.

Mr. SIMMONS. I am glad that the Senator, having heard from Virginia, and all the news being good, feels so kindly toward North Carolina, and I hope that when the Senator from Pennsylvania shall read the list of cuts in North Carolina, it will not be shown that they are any more disastrous than the little cuts that were made in Virginia.

Mr. SWANSON. If there are any cuts, I shall protest against them, in my own time, and then yield to the Senator from North Carolina to supplement what I may say.

Mr. REED of Pennsylvania. In the matter of seacoast harbors and channels, the State of North Carolina would receive the same under the bill as it passed the House and under the Senate committee bill.

Mr. SWANSON. I hope the Senator from North Carolina will join me in preventing the appropriations for Virginia being reduced.

Mr. SIMMONS. The Senator has already ascertained to his satisfaction that Virginia will not be greatly affected, and I have also ascertained that North Carolina will not be greatly affected. Still I am not satisfied. I want to know the main river and harbor projects which will be affected by reducing the bill as it passed the House from $55,000,000 to $52,000,000.

Mr. REED of Pennsylvania. Mr. President, I had not finished my answer about North Carolina. In fairness to the Senator from North Carolina, I ought to call attention to the fact that the intercoastal waterway from Beaufort to Cape Fear would receive $710,500 under the Senate committee bill as against a million dollars under the bill as it passed the House. That is the most important cut made in that region.

Mr. SIMMONS. That is a very material cut.

Mr. SWANSON. As to that cut, Mr. President, I will yield to the Senator from North Carolina.

Mr. SIMMONS. Mr. President, that is a cut in which the Senator from Virginia is about as much interested, although indirectly, as in North Carolina. It is one of the links in the great inland waterways which the Government has undertaken to construct from Boston down to the Gulf, and farther on, I believe. It has almost finished that inland waterway to Beaufort, N. C. There is one portion that is not quite finished, but it will be shortly. I understand there is no cut in the appropriation for that purpose.

The last Congress authorized the extension of the inland waterway from Beaufort to Wilmington, N. C.—that is, connecting it with the Cape Fear River—and for that purpose it authorized an appropriation of practically $6,000,000. It is a work of considerable emergency. Its completion will do more to relieve agriculture of the high rates it is now being compelled to pay than any like project that I have in mind, although I have been connected with river and harbor work for many years. I am at a loss to know why the Senate committee should see fit to reduce the appropriation under that authorization from a million dollars to $710,000, cutting off $290,000. I assume that the engineers in charge of this work, knowing of its importance, knowing of the exigencies, recommended to the House committee an appropriation of a million dollars for the purpose of carrying on this work during the next few years.

I would be glad to have the Senator from Pennsylvania give the reasons why the Senate committee thought it necessary to reduce the appropriation for this work from a million dollars down to $710,000. I repeat to the Senator from Pennsylvania, if I may have his attention, that it is a part of this great inland waterway scheme. It connects it with one of the main rivers of the South, the Cape Fear River. It extends it a hundred miles farther than it now reaches. Those waters, since the completion of that inland waterway from Norfolk to Beaufort, have assumed a commercial importance that has astonished even the engineers of the War Department.

They have expressed their astonishment to me at the increase in the navigation on, and the use of those waters, and the benefits that have accrued to the shippers along the line as a result of the opening of that waterway from Norfolk to Beaufort. The results have been wonderful, and if it is carried further to the Cape Fear River, which runs and is navigable into the very heart of the State of North Carolina, the effect will be very beneficial. It is one of the urgent works of the river and harbor improvement scheme.

Mr. SWANSON. Mr. President, I fully concur in what the Senator from North Carolina has said. I know of no appropriation for improvement that would result in greater benefits than the benefits to be derived from this. This waterway connects the Chesapeake Bay region, Baltimore and the surrounding country, Norfolk, Virginia, the Potomac River, the James River, the Rappahannock River, and the interior of North Carolina. I know of no appropriation that would have more commercial benefit and be of greater advantage to manufacture and agriculture than this appropriation. One of my reasons for asking what would be done in case it were left at $52,000,000 was because of the fact that the reduction in this project was one of the most serious that would be made. The population around Chesapeake Bay, the population around the Potomac River, the population around the Rappahannock River, the James River, Norfolk, and all of that section, by these means have a splendid method of communication, and I know of no appropriation of so small a sum that could exceed this in benefit.

Mr. President, in conclusion, I want to say that I shall vote for the House appropriation. I see no occasion to reduce it by two or three million dollars, when the House after months and months of study and thought, reached a conclusion as to what was urgent and what was most needed. Consequently, I am willing to stand on the House provision.

I hope we have received from no source information that if we did not reduce it so much there would be a veto of the measure. I hope no such language has been indulged in and no such suggestion made. It seems to me the House and Senate ought to reach their own convictions as to what is right and proper in this situation, and take the consequences.

The senior Senator from Utah has said that he has delayed bringing in the bill for the reduction of taxation until he finds out what the appropriations are going to be, as then he will know by how much to reduce the taxes. Of course, that is simply an invitation to everybody to loot the Treasury, and after the looting is over, we will then determine whether we shall reduce taxes or not. I believe taxes ought to have been reduced before this. I am sorry to see that the Senator has laid aside tax reduction and let others take it up. As to these appropriations which are necessary for the development of the country, necessary for commerce, necessary for rivers, necessary for harbors, I am not willing that they shall be reduced, and to have an invitation extended to others to engage in enterprises which are not as deserving.

I am satisfied, after hearing the discussion, that every appropriation for rivers and harbors made by the House was deserved, was needed, and has been delayed too long already, and should not be delayed further. I for one shall vote for the appropriations made by the House.

Mr. COPELAND obtained the floor.

The PRESIDENT pro tempore. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The LEGISLATIVE CLERK. A joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrates plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

Mr. NORRIS. Mr. President, I would like to inquire of the Senator from Pennsylvania [Mr. REED] if he can give me any idea about the length of time it is going to take to dispose of the appropriation bill which has been under consideration this morning.

Mr. REED of Pennsylvania. That would require an estimate of how much discussion there will be on the item which has been under discussion. However, when that item is finished, as I hope it will be within an hour, there is nothing else I know of in the bill that will lead to any discussion.

Mr. NORRIS. I think it was understood, when Senate Joint Resolution 46 was made the unfinished business of the Senate, that we would lay it aside for the consideration of appropriation bills. I do not want to interfere with that arrangement except that I would not like to have the unfinished business laid aside indefinitely. I am willing to ask and I do ask that the unfinished business be temporarily laid aside. However, before the Chair puts the question, will he permit me to submit a parliamentary inquiry? If unanimous consent is granted as I have asked, would it be my province, if I so desired, to call up the unfinished business at any time?

The PRESIDENT pro tempore. The Chair so holds.

Mr. NORRIS. Very well.

The PRESIDENT pro tempore. Is there objection to the unanimous consent request submitted by the Senator from Nebraska? The Chair hears none, and it is so ordered. The Senator from New York is recognized.

Mr. COPELAND. Mr. President, we find in the report on the pending appropriation bill a table referred to in the conversations which have gone on at the other end of the Chamber. This contains statements of the amounts which can be profitably expended during the fiscal year 1929 for maintenance and improvement of existing river and harbor work based on appropriations for that fiscal year. We have two estimates, one of them for $50,000,000 and the other for $55,886,000. To my mind it makes a great difference whether we accept the amendment proposed by the committee or reject it, not alone because the amount would be materially decreased if we accept the committee amendment, but because the whole river and harbor project would be rendered very uncertain.

If we were to reduce the amount to a round figure of $52,000,000, it would leave in the hands of the Board of Engineers almost unlimited authority to do what they please with that money—to spend it where they like, to take up whatever project may be particularly pleasing to the board. We have in this list in the second column a statement of the amount appropriated by the House, and in that statement we have definite improvements, definite projects, to be carried out according to legislation already enacted. The surveys have been made and the board is ready to proceed.

As I view it, we have been too prone to adopt projects, decide on expenditures, finish the survey, and then delay the work of completion. These are enterprises which have passed the scrutiny of all those in authority. They are approved projects. They should be carried out to completion.

I do not want to be selfish about it, but it makes a difference of $1,000,000 to my State whether the committee amendment prevails or whether the House action is indorsed. For instance, in the East River the Senate committee amendment would cut off an expenditure of $40,000. On Jamaica Bay the amount cut off would be very considerable, about $200,000. Some of the lake ports in my State would suffer a considerable reduction. All told, the reduction in appropriations involving my State would be over a million dollars. The Senator from Virginia [Mr. SWANSON] has already brought out what it means to his State, and the Senator from North Carolina [Mr. SIMMONS] has indicated the effect it would have on his State. The State of Connecticut would be involved to the extent of between $50,000 and $100,000.

But it is not that alone. We have now a very serious state of unemployment in the country. I believe that in ordinary times I would say by all means let us economize. We have had a great disaster in the Mississippi Valley which must be dealt with. The public is crying for tax reduction.

But when we read every day in the newspapers about the industrial situation, for my part I am very much disturbed. I hold in my hand a copy of the New York Times of to-day, in which is a report made by the American Federation of Labor in support of their declaration that unemployment has increased in the past four months. They have issued a table showing the increase in unemployment from December, 1927, to January, 1928. I ask unanimous consent that the statement may be included at this point in my remarks.

The PRESIDING OFFICER (Mr. BINGHAM in the chair). Without objection, it is so ordered.

The statement referred to is as follows:

The American Federation of Labor, in support of its declaration that unemployment has increased in the four months, issued the following table giving the percentage of union members unemployed in the cities mentioned out of the total membership of the local unions reporting:

	October to December, 1927	January, 1928
Atlanta	8.7	9.7
Baltimore	31.2	42.5
Birmingham	12.3	16.6
Boston	17.8	19.6
Buffalo	12.3	26.7
Chicago	11.2	7.8
Cincinnati	12.0	18.6
Cleveland	16.6	33.8
Denver	19.4	21.3
Detroit	21.0	32.3
Jersey City	12.4	21.6
Los Angeles	16.2	22.7
Milwaukee	7.3	9.8
Minneapolis	8.1	11.6
New York	18.6	24.2
Omaha	14.7	26.0
Philadelphia	14.3	30.6
Pittsburgh	15.1	17.6
San Antonio	4.0	9.0
San Francisco	11.7	14.3
St. Louis	9.4	12.5
Seattle	10.0	11.3
Washington, D. C	9.3	13.0
Total	13.8	17.8

"The average unemployment in these 23 cities," the federation asserted, "is over one-sixth of the workers represented by these unions. Since members of the unions are in the majority skilled workers, and since most of the unions give special aid to their members in finding employment, it is very probable that unemployment among the unorganized workers is much higher.

"Especially the East and northern Middle West are hit hard by unemployment. Baltimore, Buffalo, Cleveland, Detroit, New York, and Philadelphia have each one-fourth to one-third or more unemployed. Outstanding on the other side is Chicago, the only town in which unemployment decreased, although it was in the fall already comparatively low."

Mr. COPELAND. The table shows that the average unemployment in the 23 cities referred to is over one-sixth of the workers represented by these unions; to be exact, 17.8 per cent of the union labor in the 23 cities mentioned is out of employment. That is a very serious thing, Mr. President.

The governor of my State has recently made a survey indicating the tremendous number of persons in the city of New York who are out of employment. Unemployment exists in every State in the Union. I have a letter from the Welfare Council of New York City, signed by a young lady who has had charge of that work for some time. She was formerly one of the employees of the health department in New York City when I was in charge of that department. She writes as follows:

You know all our efforts to teach health and help the prevention of diseases have been ineffectual in unemployment which makes a standard of living commensurate with health impossible for so many families.

She speaks about the visit made by a thousand field nurses and points out how many families in New York City are almost without means of sustenance by reason of unemployment. I believe that in an emergency like this it is the business of Government to do what it can to relieve the situation.

(At this point sundry messages in writing from the President of the United States were communicated to the Senate by Mr. Latta, one of his secretaries.)

Mr. COPELAND. Mr. President, I say with all respect to the President of the United States that to my mind the most important message he could send us would be one urging us to consider seriously all the building projects and developments that we have now on the trestle board, in order that means may be found to put those projects under way and to make possible the wiping out of unemployment so far as the building of public works can accomplish it.

I am perfectly clear in my own mind that this is not the year to economize on the projects which have been approved by the Congress. We are not entering upon some new schemes. We are not considering now de novo projects of development. We are considering projects which have been acted upon, which have been approved by Congress, which have been approved by the Board of Army Engineers. I think that we should by all means reject the amendment proposed by the committee and agree to the House proposal for the larger amount for this particular item.

Mr. FLETCHER. Mr. President, very briefly, because I would like to get to a vote on the bill as quickly as possible, I call attention to the fact that the new works authorized by the last Congress amounted to $73,000,000. The Budget allowed $50,000,000 to be allocated to the new work. Of course that gives the engineers a chance to pick out what they consider to be emergency items, or the most needed items, and leave undone a great many things that Congress has already authorized in the way of new work. If we make the amount, as the House did, $55,800,000, we come nearer taking care of the new work which has been authorized, and I think we should do that.

I agree with the Senator from New York [Mr. COPELAND], the Senator from Tennessee [Mr. MCKELLAR], and others who have spoken to the effect that where we have public works authorized by Congress we ought to go on and perform that work at a time when there is so much unemployment in the country. In the first place, we can get the work done cheaper, we can get material cheaper and other things cheaper that enter into this character of construction work. In the next place, it gives employment to people who need it at this time. I think we ought to go on with the work.

The $55,800,000 will not actually accomplish all that has been authorized, but it will reach to a larger extent the important things to be done than would, of course, the $50,000,000. Whereas it would take perhaps at least $63,000,000 to take care of the most important of the new projects, the $55,800,000 will go to a considerable extent and do things that ought to be done and that need to be done now. The Chief of Engineers testified before the Committee on Appropriations that $55,800,000 could be economically and advantageously spent in the coming year. With that testimony before us I do not see why we should not approve the amount of money fixed by the House. The Chief of Engineers will have to allocate it. It is not enough to take care of all the work we have authorized, but he will allocate it to the most needed projects. He has given in the hearings a list of those projects which would receive the benefit of the appropriation.

I think that the Senate committee amendment ought to be disagreed to. That is the whole question.

Mr. DILL obtained the floor.

Mr. HEFLIN. Mr. President, will the Senator from Washington yield to me?

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Alabama?

Mr. DILL. I will yield to the Senator in order that he may make a few remarks on the pending amendment.

Mr. HEFLIN. Mr. President, I merely wish to say that the appropriation for Alaska has been increased about a half million dollars, about one-seventh of the amount that we are asking to have restored for river and harbor work. Just a few days ago

several Senators voted for an appropriation of $130,000,000 to refund taxes to certain persons in the country, numbering a few thousand, and not a question was asked about that great sum except those that the Senator from Tennessee and I and two or three other Senators asked. Now, here is an item of $3,800,000 which if appropriated would benefit practically all of the States, but that amount has been stricken out upon the suggestion of the Budget Bureau. The Budget Bureau in some instances does good, but I am never going to consent that the Budget Bureau shall legislate for the people of the United States. When we know what ought to be done, as representatives of the people, we ought to do it, and I am going to insist on having restored the amount the House put into the bill.

RADIO REGULATION

Mr. DILL. Mr. President, this morning's Washington Herald prints a statement from Mr. O. H. Caldwell of the Radio Commission to the effect that if certain legislation shall be enacted the radio broadcasting structure of this country will be wrecked. He refers to a proposed amendment to the radio law pending in the House of Representatives which would require that an equal number of wave lengths and an equal amount of power shall be allotted to each of the five zones into which the country is divided by the radio law. His argument against such legislation is, to my mind, the best proof that I have had of the injustice with which the Radio Commission has treated certain sections of the country.

He says that the southern zone has only 45,000 watts of broadcasting power, and that under such a statute as is proposed the other zones could have but 45,000 watts. That leads me to call attention to the fact that in the zone which Mr. Caldwell represents one station—WEAF—has 50,000 watts; another station in New Jersey—WJZ—has 30,000 watts; another station in New York State—WGY, at Schenectady—has 50,000 watts, and another station at Pittsburgh, Pa.—KDKA—has 50,000 watts. No station west of Pittsburgh or south of New York has to exceed 15,000 watts, and only one station—WGN, at Chicago—has that.

The very picture which Mr. Caldwell paints shows the absolute disregard by the Radio Commission of the statute as now written, which should be carried out and which provides that the commission shall grant wave lengths and power so as to give equitable radio service to the people throughout the country. The radio commissioners sit down and refuse to do anything. They postponed the changes which they think should be made, so they tell us, until March 1; and then when no legislation has yet been enacted to continue them in office for a year they postpone them until April 1. I do not know whether they lack ability or whether they are just plain cowards; but I do know that they are not earning their salt as radio commissioners when they allow to continue the condition that prevails with respect to the radio broadcasting in this country.

I am not speaking in support of the proposed amendment to the law which has been offered in the other House. I think it is unworkable for the reason that the division of the country into radio zones was not made with a view to the number of wave lengths or power that should be used. There was no consideration whatsoever of that, but I can not sit silent and allow Mr. Caldwell to talk about that sort of a provision without calling attention to the fact that the entire South, embracing 10 or 12 States, has less broadcasting power than has one station in New York City. If there is any place where there should not be tremendously high-powered stations, it is in the centers of great population, because such high-powered stations force other stations off the dial.

Whether or not Mr. Caldwell has any leanings toward the Radio Corporation and the Westinghouse Co. and the General Electric Co. I do not attempt to say, but I do say that the stations of those great corporations get all they want in the way of power and in the way of wave lengths.

Mr. LA FOLLETTE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Wisconsin?

Mr. DILL. I yield to the Senator.

Mr. LA FOLLETTE. Can the Senator from Washington inform me as to whether or not it is the policy of the present Radio Commission to decline to take any action on pending applications until such time as Congress may have acted upon legislation either continuing or abolishing the present commission?

Mr. DILL. I may say to the Senator, that is exactly their position. I do not know whether they are afraid to act or whether they do not know what to do; but I do know that they refuse to do anything to clear up the present condition. There is only one commissioner who shows any indication of having initiative and ability to do the things which should be done, and that is the last one who was appointed, Mr. Lafount.

Mr. LA FOLLETTE. Mr. President, does not the Senator from Washington think that the commission ought not to take cognizance of the fact that their terms are expiring but go ahead and discharge their obligations until that time shall have been reached?

Mr. DILL. The very fact that their terms are expiring is the best reason on earth why they should act and act as quickly as possible. If Congress shall not enact additional legislation it will leave the situation in a hodgepodge that could be cleared up to a large extent, if they would only proceed to act as they have authority to act.

Mr. LA FOLLETTE. I agree entirely with the Senator, and it occurs to me that the fact that it fails to take action in a critical situation of this kind is an indication perhaps that the commission can not justify its existence.

Mr. DILL. The commission could justify its existence, but if its individual members refuse to meet their responsibilities they should not be confirmed, but other men should be put in their places who will meet the situation and give real service to the country.

Mr. President, I wish to call attention to the fact that when the Radio Commission came into existence practically all of the big, high-powered stations and far more than a proportionate share of wave lengths available for broadcasting were in the New York, Boston, Pittsburgh, and Schenectady area. That was a natural result of lack of control, but it was the business of the Radio Commission to remedy that condition. They have not done so; in fact, they have increased the power of some of those great stations that should have been decreased. It is my judgment that they either are anxious to do the will of the great organizations of capital that demand these favored wave lengths and high power, or else they have no desire to carry out the law which says there shall be equitable radio service to every part of the United States. Their failure to act is most strikingly evidenced by the statement of Mr. Caldwell himself. He does nothing and criticizes attempts by legislation to compel him to be just to all sections of the country.

I wanted, Mr. President, to make these remarks at this time, because I want it to be evident that whatever wreckage in radio broadcasting we may have is not due to any legislation that may be pending in either House, but to the inability or, at least, the inactivity of the members of the commission.

APPROPRIATIONS FOR THE WAR DEPARTMENT

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 10286) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1929, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

Mr. BROOKHART. Mr. President, I desire to speak for a moment or two on the pending amendment in reference to the appropriation for rivers and harbors.

In 1922 when I first came to the Senate I voted against the river and harbor appropriation bill because of its pork-barrel features. There were some projects in it that ought not to have been in the bill. Perhaps there are some in this bill. However, subsequently I became a member of the special committee of the Senate appointed to investigate the Lakes-to-the-Gulf waterway. Membership on that committee involved a study of the river and harbor question. I found out then that the Government had divided the Mississippi Valley projects into four or five and allotted appropriations to each. There had already been spent something like $250,000,000 on those projects, but not one of them had been completed within the time commanded by the law, although $94,000,000 would complete them all and extend the barge line over the whole system.

The law had expired as to the lower Mississippi project, the upper Mississippi project, the Ohio River project, and the Missouri River project, and none were completed within the time they should have been completed as provided by law.

When I returned I introduced a bill requiring the Government to complete all of those projects as quickly as possible and appropriating sufficient money by a bond issue, a method of financing similar to that used in connection with the construction of the Panama Canal, in order to complete them in the shortest time. It seemed to me that since we had an investment of $250,000,000 in these projects and were getting but small return and could not obtain a complete return until the projects were completed that they should be completed speedily. It therefore occurred to me now that the biggest pork-barrel idea in the situation is the delay in the construction work, and that it is mainly caused by restricted and inadequate appropriations. I also thought I found out that the railroads were quite largely

instrumental, through their lobby in Congress, in restricting these appropriations. Therefore I introduced the bill to which I have referred. Since then I have adhered to the policy that we should proceed in the shortest time possible to complete every project after it has been authorized and started. Delay means an enormous expense in loss of use and, I might say, loss of return.

Therefore, I favor the larger appropriation, and I would be better pleased if in this bill we had a sufficient appropriation to enable the War Department to complete all of these projects in the speediest time the work can be well and efficiently done. For those reasons I mean to vote for the House appropriation and against the Senate committee amendment which reduces that appropriation.

I want to see a similar plan extended to all the river and harbor projects. I want to see them all developed as fast as possible, for that will mean much to the Middle West and I think it will mean considerable to the whole country. It will mean better prices for agricultural products, because immediately when rates are reduced that reduction is reflected in better prices to the farmers of the United States. I find that since the Panama Canal was constructed there has been a great discrimination against the Middle West in railroad rates across the continent; and the most efficient method to approach that problem and to work for its solution is to improve the waterway transportation. That, of itself, will help to regulate these rates and will be more powerful and more efficient than much of the action of the commission.

Mr. LA FOLLETTE. Mr. President, may I ask the Senator from Pennsylvania a question?

Mr. REED of Pennsylvania. Certainly.

Mr. LA FOLLETTE. On page 226 and following of the hearings before the Senate committee there appears a table which purports to show the difference in the amount of specific items as between a $50,000,000 appropriation, which, as I understand, was recommended by the Bureau of the Budget, and a $55,886,000 appropriation, which, as I understand, was added by the House. Can the Senator tell me whether or not the same proportionate differences that prevailed between $50,000,000 and $55,000,000 would prevail under the Senate amendment of $52,000,000?

Mr. REED of Pennsylvania. No, Mr. President; they would not. Half a million of the additional $2,000,000 carried by the Senate amendment over the $50,000,000 Budget estimate would be spent to provide for the additional surveys throughout the country that are hoped for; and all of the other million and a half would be applied to the Missouri River improvement between its mouth and Kansas City. That was the intention of the committee in making that increase.

Mr. LA FOLLETTE. So that if the Senate committee amendment prevails all of the specific items which are listed on the pages referred to, with the exception of the Missouri River from Kansas City to the mouth, would be as they are listed under the $50,000,000 head?

Mr. REED of Pennsylvania. That is correct.

Mr. BLAINE. Mr. President, in going over the committee's report I find the memorandum shows the total increased military activities at about three-quarters of a million dollars, or, to be exact, $725,644. That is the increase for purely military activities. On page 4 of the same report I find that the total decrease proposed is $5,104,710 with respect to the total appropriations proposed by this bill, and of that decrease $3,886,310 is due to a decreased appropriation for internal improvements. In other words, it is proposed to increase the amount appropriated for military activities almost three-quarters of a million dollars, but to decrease the appropriation for internal improvement of rivers and harbors almost $4,000,000.

Mr. REED of Pennsylvania. Mr. President, will the Senator yield?

Mr. BLAINE. I yield.

Mr. REED of Pennsylvania. Surely the Senator does not offer that as a fair comparison. There is a decrease in the military activities of almost a million and a quarter dollars. There is an increase in the nonmilitary activities of over $2,000,000. We have increased the nonmilitary activities over $2,000,000 and the military activities less than three-quarters of a million. The Senator surely has not omitted to notice that.

Mr. BLAINE. I understand that; but the appropriations for the Quartermaster Corps for such purposes as the national cemeteries; the Chalmette National Cemetery, in Louisiana; the National Military Park, Gettysburg; and then for the Corps of Engineers for roads, bridges, and trails in Alaska, and flood relief for the Mississippi Valley are for nonmilitary activities; but the total increase in military activities is almost three-quarters of a million dollars, while the decrease in appropriations for purely internal improvements is $3,886,310.

Mr. President, these internal improvements, as I understand, are to suffer by way of strangulation in withholding the necessary appropriation for such improvements. I want to present just two examples, two propositions, one affecting my own State in part and the other affecting the seven Northwest States; another proposition affecting only slightly my own State, but the entire Mississippi Valley. I refer first to that which relates to or affects my own State the most.

In the city of Milwaukee the effect of reducing the appropriation from $55,000,000 to $50,000,000 is to make a reduction of about $60,000. The city of Milwaukee is the outpost of transportation from the Great Lakes to the Pacific Ocean. It is a great gateway, and Milwaukee has not been derelict in her duty with respect to the improvement of her harbors.

I want to read from the report of the board of harbor commissioners of the city of Milwaukee as to the expenditures made by that city.

Up to the present time the total expenditures of the city with respect to the execution of just the outer harbor project alone have amounted to $1,474,509, not including the ordinary expenses amounting to $198,721.50. At the present time the sum appropriated and available by the city of Milwaukee for harbor improvement is $610,000, which will all be expended during the year 1928. In addition, there is available and unappropriated in the harbor-improvement fund another $798,614.63; and the greater portion of this fund will in all probability be expended during 1928, whereupon for further expenditures in 1929 the board of harbor commissioners will have to rely and will rely on the half million dollars for which bonds are at present made available for subsequent years.

The city of Milwaukee, therefore, has more than matched the Government; and what does this mean to the Northwest? It is not for Milwaukee alone, but the manufactured products of the seven States—Minnesota, Iowa, North Dakota, South Dakota, Nebraska, Wyoming, and Montana—in 1923 were estimated at about two and a half billion dollars. Adding to that Wisconsin's manufactured products of a billion and three-quarters makes a total of over $4,000,000,000; and about one-half of this, in addition to the agricultural products of the Northwest, passes through the port of Milwaukee and the ports north of Milwaukee on Lake Michigan, largely through the port of Milwaukee.

Here is a great territory, and Milwaukee is the outpost; and Milwaukee proposes to meet the Government far better than on a 50-50 basis—almost twice that amount—for the improvement of the harbor, which is beneficial to the Great Lakes waterways and to the Northwest States.

Here is the Mississippi River Valley, which is to be deprived of half a million dollars; and it seems to me that our Government is cutting off its own nose to spite its own face when it undertakes to reduce the appropriation for the improvement of the Mississippi River. I call attention to the one item alone, amounting, as I understand, to a reduction of a half million dollars for that part of the Mississippi River between the Missouri River and Minneapolis.

We have the Inland Waterways Commission operating the Mississippi-Warrior service, which is furnishing a method of transportation for the Northwest States, for the grain for the manufactured products, down the Mississippi River to the great port of New Orleans; and here it is proposed to hamper and to hinder that Inland Waterways Commission, so beneficial not only to the industrial development of the Mississippi Valley but as well to its agricultural development.

The Inland Waterways Commission within the last four years, pinched because of lack of necessary appropriations, denied the necessary capital to improve its services, yet has had a tonnage increase on the Mississippi River in the last six years from 360,000 tons to 1,341,000 tons, and a revenue increase from $1,000,000—I am giving it in round numbers—to over $5,000,000; and yet we propose to reduce the appropriation necessary to make the Mississippi River, practically and effectually a navigable stream, upon which the commerce of the Mississippi Valley should and must be transported, if we are to do our duty to our country as a whole.

So, Mr. President, the larger aspect of this, I am sure, justifies the rejection of the amendment proposed by the committee, and the reinsertion of the amount proposed by the House.

Mr. SHIPSTEAD. Mr. President, I find on page 230, if the report of the committee is correct, that this committee amendment strikes from the appropriation, affecting the Mississippi River between the Ohio and the Missouri Rivers $300,000, and from the item covering the work on the Mississippi River between the Missouri River and Minneapolis, $500,000, a total of

$800,000 stricken out covering the work that has been contemplated by the engineers on the Mississippi River.

I find that the committee strikes out $1,000,000 provided for work on the Missouri River from Kansas City to its mouth.

Mr. BINGHAM. Mr. President, will the Senator yield at that point?

Mr. SHIPSTEAD. I yield.

Mr. BINGHAM. Possibly the Senator did not hear the explanation made by the Senator in charge of the bill a few moments ago, to the effect that the $52,000,000 proposed by the committee includes the million dollars for the Missouri River.

Mr. SHIPSTEAD. I thank the Senator for calling that to my attention. I was out of the Chamber and did not hear the explanation. However, the Senator did not state, did he, that the $800,000 for work on the Mississippi River is included?

Mr. BINGHAM. No. Of that $2,000,000 addition to what the Budget allowed $500,000 is for new projects and surveys and $1,500,000 for the Missouri River project.

Mr. SHIPSTEAD. For new projects not already authorized by law?

Mr. BINGHAM. For the studies of new projects.

Mr. SHIPSTEAD. Not already authorized?

Mr. BINGHAM. Not authorized by law; and $1,500,000 of the $2,000,000 is for the Missouri River project and $500,000 for the study of new projects, the study of which is already authorized by law.

Mr. SHIPSTEAD. May I ask the Senator if the $60,000 which the committee struck out under the Missouri River item for work from Kansas City to Sioux City, is included in the $2,000,000?

Mr. BINGHAM. That is included by the committee.

Mr. SHIPSTEAD. To make the total $52,000,000?

Mr. BINGHAM. Yes; that is included in the $52,000,000.

Mr. SHIPSTEAD. I thank the Senator for that correction. There is still stricken out $800,000, covering work between St. Louis and the upper Mississippi River, to Minneapolis.

Mr. BINGHAM. That is correct.

Mr. SHIPSTEAD. With all due respect to the report of the committee and the Senator in charge of the bill, and with all due respect to the Director of the Budget, I will say that I have some respect also for the recommendations of the Army engineers, and the policy established by Congress a year ago, when it passed a rivers and harbors bill increasing the appropriation for the work to be done on the inland waterways of the Nation.

This committee amendment strikes at a very important part of the Nation, a part of the country that for years has been suffering from high freight rates. We have started out in a very small way to remedy that situation. We have a few barges on the Mississippi. We want more. And some more work must be done. We have been working on the Mississippi for something like 20 years without having completed the channel to such an extent that private individuals or the Government have felt justified in expending any large amount of money for equipment with which to carry on transportation on the Mississippi.

A year ago Congress enacted a new policy which was accepted with a great deal of hope and enthusiasm by the people of the Northwest, because they were told and believe that the policy established by Congress would give some relief from the high freight rates in effect in the Mississippi Valley. But that policy must be carried out by appropriations to furnish a channel and to furnish equipment for the inland waterways corporation if we are going to haul any freight. If that policy is not to be carried out to its ultimate conclusion so that freight can be hauled on the Mississippi River, we might as well stop spending money altogether for that purpose.

I fail to understand why in this bill, appropriating millions and millions of money for military purposes, this very important item, which has to do with the commerce and the transportation of the country and for the relief of the Middle West, so far as high freight rates are concerned, should have been put in by the committee.

Mr. REED of Pennsylvania. Mr. President, will the Senator yield?

Mr. SHIPSTEAD. I yield.

Mr. REED of Pennsylvania. I do not think the Senator heard the explanation made a while ago about this Missouri River item. The Chief of Engineers can not spend more than $4,000,000 a year on that river. If he spends that much, he will have the work finished in three years. That is all he asks for, and that is what the committee has given him in increasing the appropriation of $50,000,000.

Mr. SHIPSTEAD. I am talking about the item with respect to the Mississippi River.

Mr. REED of Pennsylvania. As to the Mississippi, the Senator will notice we have been very liberal; at least we think so. The bill carries an item of a million and a half for emergency flood relief, and $10,000,000 for flood control.

Mr. SHIPSTEAD. I am talking about the money that is to be spent to improve the channel, so that we can get a system of transportation upon the Mississippi.

I find in the hearings of the Senate Committee on Appropriations the reasons given by the Chief of Engineers for the reduction by the Bureau of the Budget of the estimates that were sent to the Bureau of the Budget by the Army engineers.

On page 220, at the foot of the page, I find this stated by the Chief of Engineers—

> our statements as to the way the money can be spent most economically and advantageously, and that aggregated this year the sum of $55,886,310.

Later he says:

> Then the matter is taken up with the War Department. They have an outside Budget figure, and they authorize us to submit an estimate for an amount which this year was $50,000,000.
>
> They also authorized us to submit a supplemental estimate for $5,000,000.
>
> We submitted the $50,000,000 estimate, and the matter about the $5,000,000 estimate hung for quite a while. We put one in, and after a conversation with General Walker, who is the representative of the War Department in those matters, it was decided to let that rest for some time.
>
> As time went on it became apparent that it might be well and advantageous to spend more money, particularly on the Missouri River below Kansas City. That was pressed upon us a great deal, and the underlying situation conveyed was something like this: The inland waterways have been doing a great deal better in the last few years, and this year they have made quite a step forward. The Federal barge line on the Black Warrior River passed, according to its records, out of the red into the black, so that it was paying. Business on the Mississippi below St. Louis increased. The total got up there over $50,000,000. The Ohio increased something over a million dollars, and the other works, on the Monongahela and the Allegheny, held steady, the Allegheny going ahead a little; and a short time ago the Federal barge line put on its line going up to St. Paul and Minneapolis. We have been working on that stretch for many years. There has been a little commerce there. They started that. That is a very important matter to a good many people in the Middle West. There were two projects which came out as being rather more pressing for additional advancement than others. One was the waterway from the Mississippi up to Chicago, and the other was the waterway to Kansas City.

I will say that, so far as the Missouri River project is concerned, that has been explained by the Senator from Connecticut and also by the Senator from Pennsylvania. The item striking out the appropriation for the upper Mississippi has not been explained, and I submit that that action is not justified.

Congress having established a policy, and the situation, so far as freight rates are concerned, being very pressing in the Middle West, it seems to me illogical for the Congress, having appropriated money for something like 20 years to furnish a channel in the Mississippi River, to continue to delay finishing the project. If we can spend several hundred million dollars for military purposes, we can spend two or three million dollars to relieve the freight situation in the Northwest by hastening the completion of the channel in the Mississippi River, and then later we can appropriate sufficient money to enable the Inland Waterways Corporation to construct and operate barges, so that the congestion of freight in the terminals of the railroads may be relieved, and the high freight rates be lowered. That is what Congress promised to the people of the Middle West, and is Congress now going to say they did not mean what they said?

Unless some explanation is made of the action of the committee in striking out that appropriation for the upper Mississippi, I think the committee amendment should be voted down.

Mr. EDGE. Mr. President, I would like to propound an inquiry to the Senator in charge of the bill. I notice in the item under consideration the following language:

> And for the prevention of obstructive and injurious deposits within the harbor and adjacent waters of New York City, for pay of inspectors, deputy inspectors, crews, and office force, and for maintenance of patrol fleet and expenses of office, $55,886,310.

In consideration of that authorization, I have consulted the report of the hearings before the subcommittee on the bill, and I note that the Chief of Engineers, General Jadwin, in giving his statement of the method he would employ in spending either the $50,000,000, as first considered, or the fifty-five million

eight hundred thousand and odd dollars, subdividing, as he has, the various projects, rivers, and harbors, and channels, and inland waterways, he includes no presentation of an item that would refer to this particular authorization. I am wondering if the Senator in charge of the bill can enlighten me at all. While the authorization is perfectly clear and plain in the bill, the subdivision of the method of expenditure, whether the amount is fifty million or fifty-five million, does not seem to include any amount for this particular work.

Mr. REED of Pennsylvania. Mr. President, the amount allotted for that work, I believe, is contained in several different items of maintenance carried by the bill, those for the maintenance of the harbors concerned possibly also, although I am not sure; the amount allowed to the supervisor of New York harbor, and possibly under the head of contingencies on rivers and harbors, which is next to the last item in the tabulation. In any event, the Senator can depend on it that it is all within the maintenance item, and that it is not affected by the decision of this question. The same amount would be carried by the Senate committee bill and by the bill which passed the House.

Mr. EDGE. I simply want to add that the menace of the refuse, and so forth, in the waters of New Jersey and New York, is pretty well and generally known, and I am particularly interested in having this information that there will be an appropriate amount in the bill, in either item, that would be available and would be expended for that purpose.

Mr. WALSH of Montana. Mr. President, I assume that somewhere in the bill, although I have not been able to locate it, is an appropriation to meet the expenses of the preparation of what are known as the bulletins issued by the headquarters of the Army areas and for the preparation, the printing, and the circulation of the same.

Some time in the year 1926 my attention was called to documents apparently sent out by the Reserve Officers' Association of the Department of Indiana in penalty envelopes without postage. The documents thus apparently sent out included a letter signed by one John G. McNutt, secretary-treasurer of the Reserve Officers' Association of the Department of Indiana, with two inclosures, one being an extract from the CONGRESSIONAL RECORD and another being a copy of a statement by President Elliott, of Purdue University. The letter is as follows:

RESERVE OFFICERS' ASSOCIATION OF DEPARTMENT OF INDIANA,
Indianapolis, Ind., May 11, 1926.

The inclosed papers are sent to a number of the officers of the American Association of University Women in Indiana, due to the fact that the association is said to be giving support to one Frederick J. Libby, executive secretary for the National Council for the Prevention of War.

Pacifists are making a determined effort to destroy military training in the schools and colleges, and Mr. Libby is believed to be associated with persons who are active in working to this end. This is likewise a very prominent objective of communist efforts in this country, and the propaganda is well financed and aggressive.

It is regretted that no compilation of data is available now to show the unfortunate and, with very many persons, unintentional alliance between communists and good people who thoughtlessly have lent their support to the attempted destruction of our national defense policy.

It is suggested that your State association withhold support to the National Council for the Prevention of War pending further investigation of this body and its associates.

JOHN G. MCNUTT,
First Lieutenant, Field Artillery Reserve, Secretary-Treasurer.

(Inclosures: Sixty-seventh Congress, second session, Senate committee print, Reserve Officers' Training Corps at educational institutions; copy of statement by President Elliott, Purdue University, January 28, 1926, St. No. 862.)

The statement of President Elliott, of Purdue, is as follows:

STATEMENT MADE IN PERSONAL LETTER DATED JANUARY 28, 1926, BY PRESIDENT ELLIOTT, OF PURDUE UNIVERSITY

Here at Purdue University the Reserve Officers' Training Corps is regarded as an integral and valuable element in the plan of technical education, to which this institution is primarily devoted. However, entirely apart from the question of the specific training of men for reserve miltary commissions, and entirely apart from the relation of the military training to engineering instructions, I consider that the Reserve Officers' Training Corps contributes largely and efficiently to the development of those essential qualities of which dynamic character is composed—the sense of personal responsibility, the spirit of purposeful cooperation, the inspiration of leadership, and a recognition of the eternal place or order and organization in human society. Whatever may be its weakness, the Reserve Officers' Training Corps is one agency in the university in which civic service and relations are given a practical setting. While the course of training is immediately intended to qualify men for commissions in the reserve Army, I have always considered that this training had an equally important aim of giving to the young men, who are fortunate enough to receive it, something in sharp contrast to the present-day tendencies toward personal irresponsibility and lawless individuality; making them realize that strength of character depended upon certain common realities of life rather than upon sentimental preachments.

My attention having been called to the circulation of these documents in apparently plain violation of the law and by some one having no authority whatever under the law to use the penalty envelope, I addressed a communication to the Department of Justice asking whether the circulation of this matter under the circumstances constituted a violation of the law. I was not accorded an answer to that letter. Doubtless it was overlooked in some way. I make no complaint about that. But under date of November 24, 1926, I addressed another letter to the Attorney General as follows:

NOVEMBER 24, 1926.

Hon. JOHN G. SARGENT,
Attorney General of the United States.

MY DEAR MR. ATTORNEY GENERAL: Shortly before the adjournment of Congress my attention was called to what seemed a plain case of the use of a penalty envelope by one John G. McNutt, of Indianapolis, Ind., for the circulation of a letter referring to one Frederick J. Libby, and other matter, its use for that purpose being apparently a plain violation of the law. I, of course, advised that the matter be called to your attention and that of the Postmaster General. I am told that this was done, but that nothing has since been heard of the matter except the receipt of a communication from you saying that the subject would have consideration. Will you have the kindness to write me what has been done and what was the result of the investigation you prosecuted. I am, of course, interested, as you no doubt will be, in learning just how Mr. McNutt came to get possession of War Department envelopes, whether by collusion of some of the clerks or officials of that branch of the service or through some means even more reprehensible.

Very truly yours,

THOS. J. WALSH.

I had a letter from the Attorney General, to which I replied, under date of December 4, 1926, as follows:

DECEMBER 4, 1926.

Hon. JOHN G. SARGENT,
Attorney General of the United States.

DEAR MR. ATTORNEY GENERAL: I have the honor to acknowledge receipt of your letter of November 27 referring to the use of penalty envelopes by one John G. McNutt, in which you quote from a letter of the Secretary of War as follows:

"The envelope with its inclosures was sent out by authority of the chief of staff of the Eighty-fourth Division, Col. G. L. Townsend, an officer of the Regular Army and competent under the law."

Will you have the kindness to advise me whether you concur in the view of the Secretary of War that Colonel Townsend is "competent under the law" to send such matter in a penalty envelope without postage? I venture without hesitation to say that he is not, and that the matter sent out by McNutt is not such as relates "exclusively to the business of the Government of the United States" nor does it relate in any wise to the business of the Government of the United States. It seems to me perfectly plain that the law has been flagrantly violated in this matter. We may both entertain views quite antagonistic to those expressed by Mr. Libby, but the Constitution guarantees to him the right to teach his particular notions concerning policies of the Government just as it does your right and mine to voice our convictions on any subject. Neither of us can tolerate a plain disregard of the penal statutes in an effort to combat his efforts to popularize his doctrines.

Very truly yours,

THOS. J. WALSH.

It seems that the Attorney General then submitted the matter to the consideration of one of his subordinates, who reached a queer conclusion that the matter here is not such as officers entitled to use penalty envelopes are entitled to circulate in that way. I might say that it is quite apparent that the reserve officer desirous of getting this matter out prepared the documents and then was able to persuade the Army officer to send the matter out inclosed in the penalty envelope and without postage.

The opinion of the Attorney General refers to a complaint made by Mr. Libby concerning the circulation of these documents. The documents are then inclosed, and he embraced likewise a copy of the address on the envelope in which they were circulated:

War Department, Headquarters Eighty-fourth Division, Indianapolis, Ind. Official business. Penalty for private use to avoid payment of postage, $300.

He then quotes the letter and the statement of the president of Purdue, and then states that the matter was referred to the Department of War, and the Department of Justice was advised by the Department of War that the matter was in fact sent out by Col. G. L. Townsend, of the Regular Army. He continues:

In answer to an inquiry dated November 24, 1926, Hon. THOMAS J. WALSH was advised, under date of November 27, 1926, of the statement made by the Secretary of War.

Under date of December 4, 1926, a further letter was received from Senator WALSH, in which he questioned the legality of transmitting in a penalty envelope the letter and inclosures involved on the ground that the matter contained therein is not such as relates "exclusively to the business of the Government of the United States."

When the matter was called to the attention of the Secretary of War in June, 1926, by this department, the Secretary directed Maj. Gen. Robert L. Howze, commanding general of the Fifth Corps Area, Fort Hayes, Ohio, within whose military jurisdiction the State of Indiana lay, to make an investigation of the matter with report and recommendation. General Howze called upon Col. G. L. Townsend, Chief of Staff of the Eighty-fourth Division, whose stamp appeared upon the envelope under discussion, for a report. Colonel Townsend made a reply to General Howze as follows:

"The mimeographed letter from the Reserve Officers' Association, dated May 11, 1926, with statement of President Elliott, was sent out from this office to a small number of officers of the Indiana branch of the Association of American University Women; this with a view to assisting the Reserve Officers' Association in an effort to support the national defense act by inducing the ladies to investigate before acting."

I suspend the reading of the letter to inquire what business an officer of the Army has to send out any kind of material to an association of ladies for the purpose of inducing them to inquire whether the views expressed by Mr. Libby concerning public affairs are or are not very sound. He continues:

The papers were not sent out by First Lieut. John G. McNutt, Field Artillery Reserve, who had no relationship with this office to warrant his use of penalty envelopes, and, so far as known, has sent out no matter under penalty stamp. The envelope addressed to Mrs. W. C. Stevens, Muncie, Ind., was sent from this office. The circular letter was not sent for the benefit of any individual and was for purposes considered as public entirely.

He concludes:

Similar use of the penalty envelopes will not be made in the future.

Whereupon, General Howze reported to the War Department. I do not read further from these papers, but the learned Assistant Attorney General reaches the conclusion that this does not constitute a violation of law. I do not enter into any controversy with him over that subject. I submit it for the careful consideration of the eminent lawyer who is chairman of the Committee on Military Affairs.

But that is not the whole of the offending in this particular. Apparently each of the Army headquarters in the various areas gets out what is called a bulletin for the purpose of advising the men under their command about matters relating to their duties and for the purpose of enabling them the better to discharge the same. That is a perfectly proper function, and no doubt the penalty envelopes are very appropriately used for the purpose of getting the material to the men. If that were all there were to it, there would be no cause for complaint at all. But the bulletins contain not only such matter as is of interest in the disciplining and training of the men, but they contain a whole lot of other matters entirely foreign thereto and generally combating the efforts of what are called "pacifists."

Mr. LA FOLLETTE. Mr. President, will the Senator yield to me?

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Wisconsin?

Mr. WALSH of Montana. I yield.

Mr. LA FOLLETTE. I agree entirely with what the Senator from Montana has had to say about the reprehensible character of the use of penalty envelopes for the purpose of franking private literature. I should like to inquire if the Senator does not intend to offer an amendment to this item which would preclude the use of the appropriation for such a purpose? It seems to me it would be clearly within the rule to offer such a limitation to this item, and I should like to see the question passed upon by the Senate.

Mr. WALSH of Montana. My purpose was simply to call the matter to the attention of the chairman of the committee that appropriate action might be taken.

Mr. REED of Pennsylvania. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield to the Senator from Pennsylvania?

Mr. WALSH of Montana. I yield.

Mr. REED of Pennsylvania. I agree, of course, that it is utterly inappropriate to urge any political question in bulletins sent out under the frank of the War Department; there can not be any two minds about that; but I do not believe that there is any limitation that we could put on an appropriation that would be any more severe than is the present law on the subject to which the Senator from Montana has called attention. There already is a drastic law against the abuse of the penalty envelopes in that way; and I am glad to say that the department has taken the position that, so far as it is within its power to control, such an occurrence will not again happen.

The Senator from Montana, however, knows how difficult it is to keep the use of those envelopes within the proper limits. In our own offices we have that experience. It seems to me I am always on the alert, because I find every now and then my office is sending out letters in franked envelopes that have no business to go out in that way; and I know the Senator from Montana has had the same experience.

Mr. WALSH of Montana. Exactly.

Mr. REED of Pennsylvania. And the War Department apparently in this case has had a similar experience. I agree with the Senator that such a practice is improper.

Mr. WALSH of Montana. I want to call attention to the fact that the offense is not limited to the use of the penalty envelope. The grave offense to which I now call attention is the inclusion in the bulletins of matter that has no business there so that the penalty envelope may be used. For instance, here [exhibiting] is a bulletin that was sent to the Committee on Military Training, 387 Bible House, Astor Place, New York City. It was in a penalty envelope. There is an offense against the law in using that penalty envelope for the purpose of sending a copy of a bulletin intended for the use of individuals entirely outside of the service. But that is not the grave offense. The offense is including in this bulletin all manner of matter that has no relation whatever to the duties of men in the service.

Let me remind the Senate that as the result of an investigation conducted by this body in the year 1913 it was disclosed that certain interested parties took a speech which had been delivered by former Senator Lodge on this floor, published it with some additional matter, and sent it out under the frank of Senator Lodge. It was held that it was not frankable, and the Post Office Department began suit and recovered $27,000 in postage against the persons who circulated that material, because by reason of inclusion of the additional matter in it it ceased to be frankable.

Now let me call attention to some of these things that are included in these bulletins. I have before me a bulletin of the Third Coast Artillery district, with headquarters at Fort Monroe, Va., issued in January, 1928. It carries an article by one Fred R. Marvin entitled "Breeders of turmoil." Mr. Marvin was for some time the editor of a paper which was known as the New York Commercial. In addition to his other activities he has specialized in what are called "red scares." He made a tour all through the western section of the country and spoke in various cities in the State of Montana upon the imminent peril to which the Government of the United States was subject from the reds in Moscow, who were just about to come here and swamp us and swallow us up.

Mr. SHIPSTEAD. When he went to Montana did he not accompany Blair Coan, of the Republican committee, who went out there to endeavor to obtain evidence against the junior Senator from Montana [Mr. WHEELER]?

Mr. WALSH of Montana. There were some associations that I can not recall. However, having made an address in the city of Billings, having come in contact with some of the business men in that city, among others Mr. E. C. Shields, of that city, he addressed Mr. Shields a letter, which will be found in the CONGRESSIONAL RECORD of March 3, 1924, at page 3451, as follows:

NEW YORK COMMERCIAL,
New York, February 15, 1924.

Mr. E. C. SHIELDS,
Associated Industries, Billings, Mont.

MY DEAR MR. SHIELDS: How goes the game? I have not had time to write you since Heck was a pup, as the work down here has been exceptionally heavy.

Now I am writing only because I want a little "dope." I want the "low down" on one THOMAS WALSH, Senator from your State. To what extent has he been mixed with Bill Dunn and the radical ele-

ment? What is his political life, so far as connections with radicals are concerned? If you have anything along that line, shoot it to me, please, and I will be your everlasting friend.

Hope the game goes well with you. When you have any bulletin or news matters about open-shop work in Billings, mail it in; we like to use all such matter in the Commercial.

Yours for national loyalty,

FRED R. MARVIN,
Editor Searchlight Department.

The answer he received from Mr. Shields I shall not read, but it will be found in the RECORD immediately following the letter to which I have adverted.

Mr. Marvin, when he was editor of the New York Commercial, expatiated at considerable length upon certain investigations conducted by a committee of the Senate, and particularly upon the investigation of the leasing of the naval oil reserves. Thus, in an issue of the Army and Navy Journal of May 1, 1926, appeared the following editorial:

A Senate investigating committee was invoked. This came because of the inconsistency of a certain radical group in the Senate that has been ready at all times to play the hand of foreign agencies seeking disruption in the United States. The publicity work which followed was guided largely by the socialist and communist movements in this country. Well meaning and loyal Democrats were dragged into the net, thinking it a "clever political play" for them. Witnesses who could not sustain their statements and others who were wildly confused, or clearly uninformed, were placed upon the stand. The prosecutors were, at the same time, the judges. The Secretary of the Navy was driven from the Cabinet, and yet in the light of full knowledge he proved his actions to be those of a loyal American citizen unswayed by foreign propaganda, unsullied by pacifist denunciations, working to carry out a scheme of preparedness that meant American safety.

Mr. SHIPSTEAD. Mr. President, will the Senator yield?

Mr. WALSH of Montana. I yield.

Mr. SHIPSTEAD. Does Mr. Marvin refer to the Secretary of the Navy who transferred the oil reserves?

Mr. WALSH of Montana. Obviously.

He continues:

SENATORS WORKING WITH RADICALS

A thoroughly disorganized Senate, working in accord with the wishes of a small group of radicals, some of them at this writing taking prominent places in an organization that is seeking to discredit the State Department in its dealings with Mexico, aided in rushing through a resolution directing the President to employ special counsel to bring suit for the cancellation of certain leases to drill naval reserve oil land.

When the cases came into the calm quarters of Federal judges and the truth was presented by witnesses of credibility, these facts were brought out:

There was no scandal. No one sought to rob the Government.

Mr. SHIPSTEAD. Mr. President, will the Senator yield again?

Mr. WALSH of Montana. Certainly.

Mr. SHIPSTEAD. I am curious to know whether when he refers to radicals he means Doheny and Sinclair and Fall? He talks about people who are not loyal to the Government.

Mr. WALSH of Montana. I think he must have in mind another class, or, perhaps, his classification is not sound.

Under date of November 26, 1926, he had another editorial in the New York Commercial, as follows:

Back of the entire move to discredit all who at that time had any hand in undertaking a proper policy of naval preparedness was a group of so-called pacifists and internationalists not as well known then as now, for since that time their overt acts have brought them more or less into the public limelight. Japan had directed the mobilization of its navy with a view of attacking the United States to acquire the Hawaiian Islands and later the Philippines. At least that was the information in the hands of the Navy. Our Pacific Fleet burns oil. At that time—and the situation has not changed, since the great tanks erected at Pearl Harbor for the Government by Mr. Doheny have never been filled with fuel oil—the Navy had no fueling stations. The purpose of the Government to develop its oil lands, erect fuel stations at strategic points naturally could not be advertised to the world. Secrecy, above all things, was necessary. The Navy had much difficulty in securing any construction firm that would undertake the work because the Navy had no appropriation; had money been asked for that purpose clearly the whole matter of defense would have been frustrated. Under the law the Secretary of the Navy was authorized to drill the naval reserves and use the proceeds any way in his judgment he deemed desirable for the best interests of the Government.

Then, on May 1, 1926, he contributed an article to the Army and Navy Journal, in which he said:

The defendants—

Referring to the defendants in the oil cases—

The defendants, loyal citizens, having entered into the contracts with the Navy that were made the occasion for a vast amount of undesirable publicity, thought more of the welfare of their country than of their own reputations. Say what you will, this exhibition on the part of these defendants was pure loyalty.

Mr. CARAWAY. Mr. President, I do not think I caught the full force of the Senator's statement. Who is this superpatriot who is defending Sinclair and Fall?

Mr. WALSH of Montana. His name is Fred R. Marvin, who since his services as editor of the New York Commercial have been discontinued, finding he could no longer have in that way an avenue by which to get his views before the public, makes use of these bulletins issued by the War Department.

Mr. CARAWAY. I rather object to the word "views"; they are worse than that.

Mr. WALSH of Montana. I think, perhaps, it was an unfortunate choice.

In a pamphlet or book issued by Mr. Marvin, he says:

Calm, cold, reliable, and trustworthy evidence brought out in court, however, proved these leases and contracts instead of being part of a scheme to rob the Government were but part of a preparedness program approved by the Naval War Board; that the purpose of these leases and contracts was to give a fuel-burning Navy emergency oil stored at strategic points through the erection of the necessary tanks—then and now still lacking—and to construct pipe lines from far interior oil fields to connect with water points that the oil in such fields might promptly be made available in case of necessity.

Mr. CARAWAY. He is evidently attacking the Supreme Court of the United States, which canceled the leases.

Mr. WALSH of Montana. It would be interesting to submit in connection with his observations those of the Supreme Court.

Mr. SHIPSTEAD. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Montana yield further to the Senator from Minnesota?

Mr. WALSH of Montana. I yield.

Mr. SHIPSTEAD. Does the Senator say that this stuff was sent out under frank?

Mr. WALSH of Montana. No. I am reading editorials from the New York Commercial and contributions to the Army and Navy Journal, and this is the man whose further effusions——

Mr. SHIPSTEAD. Along the same line?

Mr. WALSH of Montana. Practically along the same line. The argument is that this was one of the preparedness measures, and so he is arguing for preparedness in the other effusions to which I shall immediately call your attention.

In an editorial in the New York Commercial of November 26, 1926, he said:

That he did, but not without consulting others, for the final determination to let the contract for the drilling as part of the agreement to erect the much-needed storage tanks at Pearl Harbor came only after an agreement on the part of the Government servants, whose integrity has never been so much as questioned.

And again from his pamphlet, Ye Shall Know the Truth—

There was no evidence of fraud, conspiracy, or secrecy in connection with the letting of these contracts, save so far as a certain degree of secrecy was necessary, because the whole program involved the good of the Nation.

Several other editorials along the same line and of the same tenor I ask to have incorporated in the RECORD without reading.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The matter referred to is as follows:

When no construction firm could be found that would undertake the work, the Government in desperation turned to the oil companies operating on the Pacific coast. One after another they were approached on the subject. The only man who could be interested was E. L. Doheny, of the Pan-American Petroleum Co., and he was not interested until the cards had been laid on the table and his patriotism and loyalty to country appealed to. Then he agreed to undertake the work. He carried out that work, erected the tanks, and it was then our pacifistic and international friends knowingly forced what they called an "oil scandal" to the front. These tanks to-day are worthless so far as the Navy is concerned, and should there appear an emergency on the Pacific, do not forget the present activities of certain forces in Mexico may make that emergency a reality overnight—our fleet would be helpless. (From an editorial by Fred Marvin in the New York Commercial, November 26, 1926.)

The contracts made by the Navy with certain oil companies were for the erection of emergency fuel-oil tanks at strategic points and for the construction of pipe lines from interior oil fields to connect

up with tidewater. There was, at the time these contracts were let, a great emergency. The United States was facing a most serious situation which, however, was unknown to the public. The fuel-oil tanks were an immediate necessity else our Pacific Fleet would be useless. The Navy had but one way to secure and pay for these tanks. That was by selling oil secured from the naval oil lands. There was a law which gave the Secretary of the Navy the right to do this. That law was constitutional and was so held by Judge Kennedy in the Teapot Dome case, and the Secretary of the Navy only carried out the specific mandate of the statute.

The men made defendants were unable to present the real occasion for the contracts and leases since they were based upon a great national emergency. The Secretary of the Navy, when asked to present the court with documents in his possession which would have contained the truth, begged to be excused from so doing on the ground that to present them would be contrary to public policy. This the defendants well understood. They did not press their demand. Had these documents been made public it might have involved us with a friendly nation. (From an article written by Fred Marvin for the Army and Navy Journal, May 1, 1926.)

So far as I know, the editorial from the New York Commercial [November 26, 1926], quoted on the editorial page of the World tomorrow [October, 1927], is correct. As a newspaper correspondent I listened to every line of testimony of the Elk Hill case. I personally read all the exhibits presented. I heard the arguments of both the Government and the defendants. I have no occasion whatever to change the statement I made. You will recall that a jury in Washington City in a criminal case acquitted Mr. Doheny, and if you have looked carefully into the Elk Hill civil case you will find that the decision which invalidated the lease was based upon the court's decision that the law transferring the administration of the lands from the Navy to the Interior Department was illegal. Mr. Doheny did not make this law. The Congress of the United States passed this law.

I readily understand why people gain a false impression of many things. They read headlines and they read prejudiced statements or plain propaganda and they do not undertake to ascertain the exact facts.

Having been a newspaper correspondent for many years and having covered a large number of very important national trials, I feel that I have the ability to understand evidence, and further I feel that I can express an opinion upon that evidence based upon a better knowledge than some one who has never reported a trial, who heard none of the court proceedings, and who gains his impression wholly from reading the press. (From a letter written by Fred Marvin to Dr. John G. Fleck, October 11, 1927.)

Mr. WALSH of Montana. I read, however, the last I have here, from the New York Commercial of November 26, 1926:

But at Washington the very reputation of a patriotic citizen is at stake. The record of the man is as clean as a hound's tooth. He is the victim of a gigantic international conspiracy carried on in the United States through the aid of many who do not understand what they are doing. Emotion produced by the cry of the pacifist has dulled their senses to national loyalty. They have fallen for the vicious propaganda of the internationalists—or shall we call them socialists and communists?

Mr. SHIPSTEAD. Mr. President, what does that mean when he is talking about this great "patriot"?

Mr. WALSH of Montana. Of course, that is Mr. Fall.

Now, I call attention to the article entitled "Breeders of turmoil," by Fred R. Marvin, included in the Army bulletin, to which I have asked your attention.

Mr. SHIPSTEAD. Was this sent out by an Army officer?

Mr. WALSH of Montana. Oh, of course; sent out under a frank.

Mr. REED of Pennsylvania. Mr. President, was this done by more than one of these reserve division headquarters?

Mr. WALSH of Montana. Yes; it was, Mr. President. I have here quite a lot of them. This is from the headquarters of the Third Coast Artillery district at Fortress Monroe; and I am going to call attention to some that were sent from other places:

BREEDERS OF TURMOIL

By Fred R. Marvin, editor New York Commercial, executive director Key Men of America

The rambling, radical alien, who, by virtue of the fact that there is no present law to compel his registration, conducts himself in the United States largely as his perverted inclinations dictate. He has become a problem with which Congress can not long escape dealing. There are 1,000,000 of his kind illegally in the country, according to official and conservative estimates, and it is the opinion of Immigration, Labor, and Department of Justice officials that all could be deported if Congress would only give the authorities an alien registration law which could be made the basis of a check-up.

Another argument is in favor of an alien registration law, which I do not suppose anybody would contend is a proper matter to be incorporated in this Army bulletin.

That was issued January, 1928.

I call attention to another one from the same headquarters issued April, 1927, also an article from Mr. Marvin, entitled "The menace from within."

Mr. SHIPSTEAD. Was that also sent out under the frank?

Mr. WALSH of Montana. Yes; that was sent out under the frank.

Mr. SHIPSTEAD. And at the expense of the War Department?

Mr. WALSH of Montana. At the expense of the Government of the United States.

Mr. SHIPSTEAD. I have heard of such things; I have heard of their being sent through the mails by the War Department, but this is the first I have seen of it.

Mr. WALSH of Montana. I read from this article, as follows:

Now, these agencies of foreign origin would be of no considerable menace if confined entirely to their own devices. Quite obviously they would have no success in promoting propaganda against the protection of American citizens if their foreign identity was known. They know this full well and maneuver all too successfully to grind their axes in the names of various pacifist organizations, the American Civil Liberties Union, the Federal Council of Churches, and many so-called progressive bodies, mostly of a distinctly pink tinge. The latter is continually adding to its program undertakings distinctly nonreligious in nature and outside of the mission of the church, as most members see it.

Among the leaders of the council are persons active in many extremely radical and subversive movements who regularly cooperate with agencies which refused to support the Government even while we were at war.

The American Civil Liberties Union may be described as the "left wing" of the council, and has extensive and dangerous ramifications in the Third Internationale at Moscow.

I read from another paragraph:

Fortunately the loyal press of the country, together with other justifiable agitation against the church lobby at Washington, seems now in a fair way to initiate an investigation of the council's activities and the sources from which it derives financial sinews. The investigation might well be broadened to include the workings of other propaganda agencies and the methods of their operation.

The orthodox ministerial pacifism is receiving a wealth of inspiration "against war" at this time, although there has not been, in any of the situations upon which they base most of their "letters to the papers" and other devices for obtaining publicity, any serious suggestion of a passage at arms. There remains, however, the obvious fact that the world's wealthiest nation should not regard itself as secure from attack unless it has fighting forces in proportion to its importance as a world power.

Now observe:

The United States has neither an army nor a navy nearly sufficient to its needs; and yet the hue and cry for further reductions continues from many quarters.

Now I want to call attention to a postscript to this by the editor:

EDITOR'S NOTE.—This is the second of a series of articles by Mr. Marvin exposing the menace to our free institutions by the professional pacifists, the idealists, and the peace-at-any-price advocates whose activities are, in many cases, unknowingly influenced and directed by the paid communistic representatives of a foreign government.

Mr. Marvin is a recognized authority on this question and his statements carry the weight of "one who knows."

So that not only are they circulated in plain defiance of the law in relation to the use of penalty envelopes, and in contravention of the statute which authorizes the circulation only of matter that is official in character, but they actually receive the indorsement and the commendation of the editor of the bulletin. If I may remark, it would be just as exactly as justifiable, so far as the law is concerned, to include in this bulletin the pamphlet of Mr. Libby as it would the statement of Mr. Marvin.

Mr. FRAZIER. Mr. President——

Mr. WALSH of Montana. I yield to the Senator.

Mr. FRAZIER. I understand that this man Marvin, during the last few months, has written up every Member of the Senate who raised his voice against the policy of the State Department toward Mexico and Nicaragua. I was wondering if he sent those write ups to the War Department also.

Mr. WALSH of Montana. Mr. President, I can not say as to that; but let me call your attention to some of the headings which you will find in these bulletins.

I have in my hand this one issued December, 1927. On page 7 you will find an article entitled "For pacifists to think about."

On page 17 you will find an article entitled "Education and war." Probably that is all right.

Next you will find, on page 28, "The Army too small."

Page 45, "Patriotism and preparedness."

In another bulletin issued in April, 1927, you have "Militarism in our schools"; an editorial "Some pertinent questions"; and a reprint from the Cincinnati Inquirer on "Pacifism, peace, preparedness, and patriotism."

These are simply suggestive of the character of the articles found in these bulletins.

I want to call attention before I close, however, to two of these bulletins issued by the headquarters of the Seventh Corps Area at Omaha, Nebr. Here is an article which is quoted from the Emporia (Kans.) Teachers' College Bulletin, entitled "A mistaken idea, that's all." It reads as follows:

A few Christian organizations, not all, but too many, are all roused up right now over the impending disaster to American colleges in the established Reserve Officers' Training Corps on the campuses. The military organizations, say the Young Men's Christain Association, are leading directly to war and ruin. It is not right, they declare, that State universities and colleges established and maintained through land grants by the National Government, require their students to take a very limited amount of military training and tactics under the supervision of the Government that is largely responsible for their existence.

Certain men connected with the Young Men's Christian Association shout that military training in colleges leads to the national feeling and practice of militarism. It will cause the Nation to try to subjugate less fortunate peoples and usurp the right of self-government in weaker countries. All kinds of absurd possibilities are conjured up by the extreme pacifist to discourage and prevent the presentation of military training to the men in the institution of higher education. Yet despite all these wild dreams to which the Young Men's Christian Association man is subject, he supports foreign missions.

Now:

And foreign missions are always more or less dependent upon military power for their continued existence. China has been especially hard to convert. It was necessary to drive home the precepts of the Christian religion with the point of a bayonet to make a believer of the heathen Chinese. The Boxer uprising and the present oriental crisis are startling examples. And did the Young Men's Christian Association kick when the United States marines were ordered to China? Not yet.

Military training for college men is not meant to foster the spirit of militarism. It is given primarily for physical training and training in citizenship, and, secondly, for the training of men for the military. The national defense is certainly of interest to the good citizen, and by thinking for a moment the citizen can readily see that with the small standing Army of the United States it is necessary to have a number of men who know something of military tactics to train the uninitiated in time of national conflict. Military men are not more militaristic than other men. But having dealt with war, they believe in being ready to take care of it when it comes. The Young Men's Christian Association in this case has the wrong idea.

Mr. President, I feel that something ought to be done—perhaps by a limitation in connection with the appropriate appropriation, as suggested by the Senator from Wisconsin—pointedly to advise the officers of the War Department and the men in command that they ought to set an example of obedience to the law; that they are the servants of the people of the United States in these great duties that are reposed in them; and that they ought to exercise the highest care to see that matters of this character do not get into official publications of any character for which they are responsible.

It is a matter of no consequence whatever whether we agree with the so-called pacifists, or whether we agree with the so-called militarists; neither of them have any right to use these agencies and instrumentalities for the circulation of their peculiar views with respect to the matter. The papers are open to them, and the magazines are the proper forum through which they ought to impress the public with the soundness of their peculiar notions.

Mr. DILL. Mr. President, will the Senator yield?

Mr. WALSH of Montana. I yield.

Mr. DILL. How large a mailing list was used by the department sending out these publications?

Mr. WALSH of Montana. I have no idea; but the commander who was responsible for the sending out of the letters to which your attention was first directed by me, said that they were sent only to a limited number of people. I have no means of knowing how generally they are circulated, but sufficiently generally so that there have been placed in my possession a large number of these, the general character of which can be divined from the ones to which I have called specific attention.

Mr. President, I ask that the excerpts from the various journals from the articles by Mr. Marvin be incorporated in the RECORD without reading.

The PRESIDING OFFICER (Mr. TYDINGS in the chair). Without objection, it is so ordered.

The matter referred to is as follows:

[From the Bulletin of the Third Coast Artillery District, Fort Monroe, Va., April, 1927, page 16]

THE MENACE FROM WITHIN

By Fred R. Marvin

Several present-day political issues are affording anti-Government propaganda forces fuel for the fires of attack upon the present administration, upon preparedness and upon any commendable effort to protect the lives and interests of American nationals abroad. Conspicuous among these, of course, are the Mexican situation, the trouble in Nicaragua, and the landing of forces in China.

For their own purposes these propagandists, whose leaders in most cases were born outside the United States, have sought to make it appear that the bone of controversy in Mexico is religion or the interests of "immensely rich oil concerns." They paint this country as materialistic and imperialistic, completely ignoring the fact that the issue involves also the holdings of thousands of small property owners south of the Rio Grande.

The facts regarding the situation in Nicaragua have been similarly perverted with a view to making it appear that our marines have been landed in that country solely to protect interests fraudulently acquired by Americans who do not deserve the protection of their Government.

Of course the ultimate object of the persons inspiring the publication of all this misinformation is the weakening of the defensive forces of the United States. Some few of them are idealistic, impractical, and seriously deluded ministers or pacifists who believe with more or less sincerity that an adequate defensive force constitutes a threat of war. But these are being dangerously maneuvered by persons whose interests are wholly inimical to those of this country whether it be at war or at peace.

In any competent consideration of this increasingly menacing situation, it must be accepted as fact, and it is easily provable, that elaborate propaganda agencies are maintained in the United States by foreign governments, at least one of which has openly expressed an enmity for the form of civilization maintained in this and most countries of the world.

Now, these agencies of foreign origin would be of no considerable menace if confined entirely to their own devices. Quite obviously they would have no success in promoting propaganda against the protection of American citizens if their foreign identity was known. They know this full well and maneuver all too successfully to grind their axes in the names of various pacifist organizations, the American Civil Liberties Union, the Federal Council of Churches, and many so-called progressive bodies, mostly of a distinctly pink tinge. The latter is continually adding to its program, undertakings distinctly nonreligious in nature and outside of the mission of the church, as most members see it.

Among the leaders of the council are persons active in many extremely radical and subversive movements, who regularly cooperate with agencies which refuse to support the Government even while we were at war.

The American Civil Liberties Union may be described as the "left wing" of the council and has extensive and dangerous ramifications in the Third Internationale at Moscow.

These are the organizations which boasted so gloatingly of having influenced the disappointing reactions against the statement of Secretary Kellogg at the outbreak of the dispute with Mexico. Since the deluge of subversive propaganda they released at that time there has been a considerable change in the sentiment of the people manifested in the more radical elements of the press, which at the inception of the controversy "played to the gallery" by taking a position against the administration.

Naturally such organizations, aside from their professed interest in "peace at any price," would have an almost corresponding interest in Mexico and the welfare of its obviously communistic government. Mexico, there can be little doubt, is the capital of communism on the American continent, the base from which the doctrine of destruction is being spread through this country and in South America.

Fortunately the loyal press of the country, together with other justifiable agitation against the church lobby at Washington, seems now in a fair way to initiate an investigation of the council's activities and the sources from which it derives financial sinews. The investigation might well be broadened to include the workings of other propaganda agencies and the methods of their operation.

The orthodox ministerial pacifism is receiving a wealth of inspiration "against war" at this time, although there has not been in any of the situations upon which they base most of their "letters to the papers" and other devices for obtaining publicity any serious suggestion of a passage at arms. There remains, however, the obvious fact that the world's wealthiest nation should not regard itself as secure from attack unless it has fighting forces in proportion to its importance as a world

power. The United States has neither an Army nor a Navy nearly sufficient to its needs, and yet the hue and cry for further reductions continues from many quarters.

Since the publication of the March Bulletin the committee of "unofficial meddlers" I mentioned there has returned from Mexico with glowing reports on the efficiency and humanity of the present administration in that almost bolshevised country. Summarized, their unsought study "revealed" that the best thing for our Government to do would be to let Mr. Calles and his crew confiscate the property of Americans in Mexico and raise no hand to stop him.

There have been other developments in Mexico and in South America which clearly indicate the correctness of the suspicion that Mexico is being used by communist Russia as a base for operations against the United States and for organizing revolution in the Latin Republics to the south.

The propagandists against American prestige on this hemisphere deluge the press with pleas to "mind our own affairs," and let revolution reign as it will in Central and South America. Most of them are the unthinking idealists, who take no thought of the obligations assumed by this country under the Monroe doctrine.

But many of them, those who are really inspiring that philosophy, I say without fear of successful contradiction, are the representatives of foreign nations who know full well the purport of those obligations and would like nothing better than to see this country embroiled with some major world power against which our present defensive equipment would be hopelessly inadequate.

[EDITOR'S NOTE.—This is the second of the series of articles by Mr. Marvin exposing the menace to our free institutions by the professional pacifists, the idealists, and the peace-at-any-price advocates whose activities are in many cases unknowingly influenced and directed by the paid communistic representatives of a foreign government. Mr. Marvin is a recognized authority on this question and his statements carry the weight of "one who knows."]

[From the Bulletin of the Third Coast Artillery district, Fort Monroe Va., January, 1928, page 19]

BREEDERS OF TURMOIL

By Frank R. Marvin, editor New York Commercial, executive director Key Men of America

The rambling, radical alien, who by virtue of the fact that there is no present law to compel his registration conducts himself in the United States largely as his perverted inclinations dictate. He has become a problem with which Congress can not long escape dealing. There are 1,000,000 of his kind illegally in the country, according to official and conservative estimates, and it is the opinion of immigration, labor, and Department of Justice officials that all could be deported if Congress would only give the authorities an alien registration law which could be made the basis of a check up.

The American Civil Liberties Union have so far been successful in thwarting the efforts of thoughtful legislators to present such a registration bill in Congress. With the necessity for such an act becoming more apparent every day, however, it is doubtful that they can much longer stem the tide of national demand. Other societies and organizations with a decided international tinge are using all their influence to the same end.

The Sacco-Vanzetti controversy, tainted as it was by bomb outrages in various sections of the country, served to crystallize considerable sentiment in favor of such a registration bill as has been advocated by Secretary of Labor Davis and other competent students of the essential volume of American alienage, and the problem it presents.

A consideration fully as important as the potentiality for destruction of life and property of the thousands of dangerous radical aliens who are here illegally, however, is that of justice to the immigrant from overseas who has entered the country legally under the quota allotment of his native land and is preparing himself for American citizenship. The unlawful activities of "bootlegged" aliens, a majority of whom are here to serve no good purpose, affect his status adversely in the community where he plans to make his home.

The opponents of the registration bill argue that it will place in the hands of the regularly constituted authorities a vehicle by which all aliens and potential citizens may be hounded from pillar to post. That is obviously rubbish which emanates from the same sources as opposition to adequate national defense and most other proposals designed for the best interests of the United States. No law-abiding alien would derive anything but benefit from the proposed measure, but by the same token it would provide a basis for determining those among our millions of aliens who fail to abide by our laws and customs, thereby making themselves undesirable and deportable.

No alien who makes a business of attacking our form of government has any right to remain here. All immigrants are rightfully in the United States on suffrance until such time as they may assume citizenship. Aliens who enter without the knowledge of the immigration officials have no right here whatever and their early deportation is for the best interests of the country at large.

Under our present system any foreigner who can make an entry into the country by any devious means whatever is comparatively safe from molestation because the authorities have no adequate means of ascertaining the legality of his residence. In some instances fugitives from justice in other countries have been discovered domiciled in the United States after violation of our criminal laws has concentrated the attention of the authorities upon them. In nearly all cases they had committed vicious crimes here before their past records were revealed. Had a proper registration act provided a basis for an early determination of their status, American property and in some instances American lives, might have been saved.

Agitators of every description against American institutions and ideals find the present negligent system a boon to their activities. There are thousands of them in the country to-day, sowing the seeds of discontent and potential trouble among well-meaning immigrants who, if left to their own devices, would doubtless become useful, contented citizens.

It is time for Congress to give its attention to these breeders of internal turmoil who are here without legal authority.

Mr. WALSH of Montana. Mr. President, a few moments ago I referred to an opinion by Assistant Attorney General O. R. Luhring. I ask that it be incorporated in the RECORD in connection with my remarks, together with certain other letters on the subject to which I have been addressing myself.

The PRESIDING OFFICER. Is there objection?

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF JUSTICE,
Washington, D. C., December 22, 1926.

Memorandum for Attorney General.

In re: Complaint of Mr. Frederick J. Libby, of Washington, D. C., relative to an alleged violation of the postal laws in connection with the sending through the mails in a War Department penalty envelope a letter and inclosures signed by First Lieut. John C. McNutt, Field Artillery Reserve, secretary-treasurer of the Reserve Officers' Association of Indiana.

Under date of June 8, 1926, Mr. Frederick J. Libby, executive secretary of the National Council for Prevention of War, 532 Seventeenth Street NW., Washington, D. C., submitted a complaint to the department alleging that certain photostatic inclosures had been transmitted through the mails in violation of the postal laws and requested that proper attention be given to the matter.

The photostatic copies inclosed with Mr. Libby's letter consisted of the following:

RESERVE OFFICERS' ASSOCIATION OF
DEPARTMENT OF INDIANA,
Indianapolis, Ind., May 11, 1926.

The inclosed papers are sent to a number of the officers of the American Association of University Women in Indiana, due to the fact that the association is said to be giving support to one Frederick J. Libby, executive secretary of the National Council for the Prevention of War.

Pacifists are making a determined effort to destroy military training in the schools and colleges and Mr. Libby is believed to be associated with persons who are active in working to this end. This is likewise a very prominent objective of communists efforts in this country, and the propaganda is well financed and aggressive.

It is regretted that no compilation of data is available now to show the unfortunate and, with very many persons, unintentional alliance between communists and good people who have thoughtlessly lent their support to the attempted destruction of our national defense policy.

It is suggested that your State association withhold support to the National Council for the Prevention of War pending further investigation of this body and its associates.

JOHN G. MCNUTT,
First Lieutenant, Field Artillery Reserves,
Secretary-Treasurer.

(Inclosures: Sixty-seventh Congress, second session, Senate committee print, Reserve Officers' Training Corps at educational institutions; copy of statement by President Elliott, Purdue University, January 28, 1926, statement No. 362.)

(War Department: Headquarters Eighty-fourth Division, Indianapolis, Ind. Official business.)

(Penalty for private use to avoid payment of postage, $300.)

Mrs. W. C. Stevens, 311 W. Adams, Muncie, Ind.

STATEMENT MADE IN PERSONAL LETTER, DATED JANUARY 28, 1926, BY PRESIDENT ELLIOTT, OF PURDUE UNIVERSITY

"Here at Purdue University, the Reserve Officers' Training Corps is regarded as an integral and valuable element in the plan of technical education, to which this institution is primarily devoted. How-

ever, entirely apart from the question of the specific training of men for reserve military commissions and entirely apart from the relation of the military training to engineering instruction, I consider that the Reserve Officers' Training Corps contributes largely and efficiently to the development of those essential qualities of which dynamic character is composed—the sense of personal responsibility, the spirit of purposeful cooperation, the inspiration of leadership, and a recognition of the eternal place or order and organization in human society. Whatever may be its weakness, the Reserve Officers' Training Corps is one agency in the university in which civic service and relations are given a practical setting. While the course of training is immediately intended to qualify men for commissions in the Reserve Army, I have always considered that this training had an equally important aim of giving to the young men who are fortunate enough to receive it something in sharp contrast to the present-day tendencies toward personal irresponsibility and lawless individuality; making them realize that strength of character depended upon certain common realities of life, rather than upon sentimental preachments."

A copy of a pamphlet was also inclosed with the letter of May 11, 1926, signed by Lieutenant McNutt and transmitted in the penalty envelope, as appears by the inclosure notation thereon, but which was not transmitted to the department by Mr. Libby, consisting of a Senate committee print, Sixty-seventh Congress second session, printed for the use of the Committee on Military Affairs, entitled "Reserve Officers' Training Corps at Educational Institutions." This pamphlet consisted of extracts from letters from presidents of universities and colleges commenting on the value of the work of the Reserve Officers' Training Corps.

The matter was referred to the Secretary of War, who, after investigation, advised the department under date of July 20, 1926, that—

"Lieutenant McNutt had nothing to do with the use of the penalty envelope in this case. The envelope, with its inclosures, was sent out by authority of the chief of staff of the Eighty-fourth Division, Col. G. L. Townsend, an officer of the Regular Army and competent under the law."

In answer to an inquiry dated November 24, 1926, Hon. THOMAS J. WALSH was advised under date of November 27, 1926, of the statement made by the Secretary of War.

Under date of December 4, 1926, a further letter was received from Senator WALSH in which he questioned the legality of transmitting in a penalty envelope the letter and inclosure involved on the ground that the matter contained therein is not such as relates "exclusively to the business of the Government of the United States."

When the matter was called to the attention of the Secretary of War in June, 1926, by this department, the Secretary directed Maj. Gen. Robert L. Howze, commanding general of the Fifth Corps Area, Fort Hayes, Ohio, within whose military jurisdiction the State of Indiana lay, to make an investigation of the matter with report and recommendation. General Howze called upon Col. G. L. Townsend, chief of staff of the Eighty-fourth Division, whose stamp appeared upon the envelope under discussion, for a report. Colonel Townsend made a reply to General Howze as follows:

"The mimeographed letter from the Reserve Officers' Association, dated May 11, 1926, with statement of President Elliott, was sent out from this office to a small number of officers of the Indiana branch of the Association of American University Women; this with a view to assisting the Reserve Officers' Association in an effort to support the national defense act by inducing the ladies to investigate before acting.

"The papers were not sent out by First Lieut. John G. McNutt, Field Artillery Reserve, who had no relationship with this office to warrant his use of penalty envelopes and, so far as known, has sent out no matter under penalty stamp. The envelope addressed to Mrs. W. C. Stevens, Muncie, Ind., was sent from this office. The circular letter was not sent for the benefit of any individual and was for purposes considered as public entirely. Similar use of the penalty envelopes will not be made in the future."

Whereupon General Howze reported to the War Department as follows:

"From the preceding third indorsement it appears the letter in question was mailed by authorities of the Eighty-fourth Division; therefore, responsibility for this act can not properly lie upon Lieutenant McNutt. It further appears that Lieutenant McNutt, as secretary-treasurer of the Reserve Officers' Association of the Department of Indiana, has no relationship with the War Department which authorizes him to use penalty or official envelopes of that department; there is no evidence he has done so.

"As to the propriety of use by Eighty-fourth Division authority of the franked envelope in this case. Its inclosures were a public document, an indorsement by a notable educational authority of a form of training especially and particularly sanctioned by law as a War Department activity, and a request by an association—acting in support of the legally constituted national defense plan—that support to agencies alleged to be inimical to national defense be withheld until motives of these be scrutinized. The inclusion of the letter last named is the sole point of debate as to propriety in this case.

"An appeal for support—negative though it be—for undertakings lawfully carried on by the War Department made by a duly constituted agency of that department, by no stretch of imagination can properly be adjudged as other than public business. Supporting documents to such an appeal enjoy a similar character. I am unable to discover any violation whatever of postal laws in this case."

The Secretary of War concurred in the conclusions expressed by General Howze in his report.

The applicable provisions of law are as follows:

(Section 5 of the act of March 3, 1877, c. 103, 19 Stat. 335)

"It shall be lawful to transmit through the mail, free of postage, any letters, packages, or other matters relating exclusively to the business of the Government of the United States: *Provided*, That every such letter or package to entitle it to pass free shall bear over the words "Official business" an indorsement showing also the name of the department, and, if from a bureau or office, the names of the department and bureau or office, as the case may be, whence transmitted.

(Section 227 of the Criminal Code)

"Whoever shall make use of any official envelope, label, or indorsement authorized by law, to avoid the payment of postage or registry fee on his private letter, packet, package, or other matter in the mail, shall be fined not more than $300."

It will be noted that penalty envelopes may be used to transmit through the mails free of postage any letter or other matter relating "exclusively to the business of the Government of the United States." It would seem only reasonable that the head of the department whose indorsement the penalty envelope bears and whence it is transmitted should, a least in the first instance, determine what matter relates to the business of his department. After such determination, clear and convincing reasons should be presented before his conclusions may be held to be erroneous.

After a consideration of the matter transmitted in a penalty envelope under the direction of Colonel Townsend, I am unable to arrive at the conclusion that it does not relate to the business of the War Department. As stated by General Howze, it is an appeal for support for undertakings lawfully carried on by the War Department made by a duly constituted agency of that department. It relates to the administration of a portion of the national defense act, the administration of which the Secretary of War is charged. The Secretary has a discretion as to the means to be employed in effecting the purposes of such act.

Section 227 of the Criminal Code provides that,

"Whoever shall make use of any official envelope * * * authorized by law, to avoid the payment of postage or registry fee on his private letter. * * * in the mails, shall be fined not more than $300."

It is clear that the penal provision is not applicable unless an official envelope is used "to avoid the payment of postage on a private letter." Obviously, there was no such intention in the instant case. The matter transmitted in the penalty envelope related to the public business and does not constitute a private letter within the meaning of the statute. While one may possibly question the expediency of the means employed to enlist support in favor of the national defense act and to combat what public officials deem to be influences inimical to the proper administration of such act, I am unable to discover any violation of the postal statutes in question. Public officers are entitled to a reasonable latitude in the means selected to carry out the duties with which they are charged. Before their activities can be said to be unlawful, I believe they must at least come within the purpose and intent of some criminal statute. Nothing of the sort is apparent in the present case.

I concur, therefore, in the conclusion of the Secretary of War that the facts in the instant case do not constitute a violation of the postal laws.

Respectfully,

O. R. LUHRING,
Assistant Attorney General.

E. F. HOUGHTON CO.,
Philadelphia, Pa., October 31, 1927.

Lieut. Commander H. N. WALLIN,
Construction Corps, Navy Department, Washington, D. C.

MY DEAR COMMANDER: As near editor of the Houghton Line, I am in about the same position as the radio artist—neither of us has any means of knowing what our great, unseen audience thinks of our efforts unless some one is kind enough to write in and give us the benefit of their opinion, and therefore your esteemed favor of October 28 is more than welcome.

I regret very much that for the first time in the 19 years that the Houghton Line has been published that I am compelled to deny a request to reprint an article published therein, and the reason I do not is because Mr. Kirby Page has convinced me that he is not the author of the so-called Kirby Page pledge, and that the various publications which have been printing the pledge and connecting his name with it have been doing him a great injustice.

You will please understand that Mr. Page does not threaten me with legal procedure; he has just stated his case very plainly; and although

Mr. Page is a noted pacifist I think you and I both know he is a man of courage who has done things and who undoubtedly has the courage of his convictions, and he would be the very last man in the world to deny being the author of the pledge, if he were; and in view of that fact I don't think it would be honest or fair to Mr. Page to permit any further circulation of my article.

Yours very sincerely,

CHAS. E. CARPENTER, *President.*

KEY MEN OF AMERICA,
New York, November 18, 1927.

Mr. CHARLES E. CARPENTER,
President E. F. Houghton & Co.,
Philadelphia, Pa.

MY DEAR MR. CARPENTER: After writing you the other day regarding Mr. Kirby Page, I made a very close examination to locate the original source of the so-called slackers' pledge and found the exact language, as the pledge is quoted in his book War: Its Causes, Consequence and Cure.

We had considerable trouble getting a copy of this book, our original being missing from the files, and I have sent it to a lady in New Jersey who made the original inquiry.

However, if you have such a book available, let me call your attention to the fact that you will find this information on page 89, toward the bottom. It is true it is not stated as a pledge, but this is the language of Mr. Page and will have to be accepted in the light in which uttered.

Let me suggest that you ask Mr. Page whether or not that was his language and whether or not it is not in effect a pledge.

From all I can learn, this appears to have gotten him in rather hot water, and there seems to be a disposition to side step, and I would suggest that before you give any publicity to him, you make a little further investigation.

Yours for national loyalty,

FRED R. MARVIN, *Executive Director.*

NOVEMBER 21, 1927.

Mr. FRED R. MARVIN,
Executive Director, New York, N. Y.

DEAR MR. MARVIN: I am sure I very highly appreciate your esteemed favor of the 18th, but I don't think you understand the situation.

So far as I am concerned, Mr. Page is not on trial.

As to who was or was not the author of the pledge is only collateral, if it is not really irrelevant. It is not the pledge or the authorship of the pledge with which I am concerned.

My exception is taken to a purely volunteer body of men, in the name of Christ, knowingly or unknowingly aiding the cause of everything that is un-Christianlike.

We must be fair, honest, and decent, and exceptionally liberal in our controversies with pacifists, or else we shall find ourselves subject to the accusation of unfairness and we must avoid even the appearance of being unfair.

I think you will admit that it is just as unfair to connect Mr. Page with the authorship of the so-called "Kirby Page pledge" on a technicality, as it is for Mr. Page to avoid the responsibility for said authorship on a technicality.

The great solution to the proper preparedness and the minimizing of war, is to convert these people—not attempt to crush them.

Certainly I can give publicity to an expression of opinion, but I am not responsible if some one takes that expression of opinion and converts it into a pledge.

I am not trying to excuse Mr. Page; he seems to be perfectly competent to take care of himself, and whatever may be said about him, he is certainly a gentleman, for his correspondence with me indicates that, and is in marked contrast with those who are doing business under the Christ trade-mark.

I feel I owe Mr. Page the duty of publishing his correspondence, and I shall do my duty as I see it.

Yours very respectfully,

CHAS. E. CARPENTER, *President.*

NOVEMBER 23, 1927.

Mr. C. E. CARPENTER,
E. F. Houghton Co., Philadelphia, Pa.

MY DEAR MR. CARPENTER: Many thanks indeed for letting me see a copy of your letter to Mr. Marvin. I greatly appreciate the spirit you are showing.

Mr. Marvin is mistaken. I have not the slightest disposition to side step anything I have ever said or written. As a matter of fact, I have exerted myself to secure a wide reading of my books, and War: Its Causes, Consequences, and Cure, has had a circulation of 150,000 copies and has been translated into eight foreign languages.

What I object to is being accused of practices of which I am not guilty. I have never asked anyone to sign a pledge. As I wrote you previously, I do not believe in this method.

Cordially yours,

NOVEMBER 23, 1927.

Mr. FRED R. MARVIN,
Key Men of America, Suite 1203,
120 West Forty-second Street, New York City.

MY DEAR MR. MARVIN: Mr. Charles E. Carpenter has sent me a copy of your letter to him of November 18 and of his reply to you of November 21.

Since you seem to be having difficulty in getting full information about me, I am taking the liberty of sending you under separate cover a complete set of all the books and pamphlets I have written which are now in print. This may enable you to be a bit more accurate in your reference to me, since you seem to be especially interested in my activities. Let me say further that if at any time you want reliable information regarding me and my work, I shall be glad to answer any question you may care to ask.

Mr. Carpenter had already seen the book to which you refer, as I sent him a copy some weeks ago.

Sincerely yours,

OFFICE OF THE ATTORNEY GENERAL,
Washington, D. C., November 27, 1926.

Hon. THOMAS J. WALSH,
United States Senate.

MY DEAR SENATOR WALSH: I have your letter of the 24th instant relative to the complaint of Mr. Frederick J. Libby, of Washington, D. C., in connection with a possible violation of the postal laws by First Lieut. John Gilbert McNutt, Field Artillery Reserve, secretary-treasurer of the Reserve Officers' Association of Indiana.

I beg to advise you that the matter was called to the attention of the Secretary of War, who, after investigation, advised me as follows:

"The delay in making final answer to your letter has been occasioned by an investigation, as the result of which it has been definitely learned that Lieutenant McNutt had nothing to do with the use of the penalty envelope in this case. The envelope, with its inclosures, was sent out by authority of the chief of staff of the Eighty-fourth Division, Col. G. L. Townsend, an officer of the Regular Army and competent under the law."

Very truly yours,

JNO. G. SARGENT,
Attorney General.

Mr. McKELLAR. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Edge	McKellar	Sheppard
Bayard	Fess	McMaster	Shipstead
Bingham	Fletcher	McNary	Simmons
Black	Frazier	Mayfield	Smoot
Blaine	George	Metcalf	Steck
Blease	Gerry	Moses	Steiwer
Bratton	Gillett	Neely	Stephens
Brookhart	Glass	Norbeck	Swanson
Broussard	Hale	Norris	Thomas
Bruce	Harris	Nye	Tydings
Capper	Harrison	Oddie	Tyson
Caraway	Hayden	Overman	Walsh, Mass.
Copeland	Heflin	Phipps	Walsh, Mont.
Couzens	Howell	Pittman	Warren
Curtis	Johnson	Ransdell	Waterman
Cutting	Jones	Reed, Pa.	Watson
Dale	Kendrick	Robinson, Ind.	Willis
Deneen	Keyes	Sackett	
Dill	La Follette	Schall	

The PRESIDENT pro tempore. Seventy-four Senators having answered to their names, there is a quorum present.

Mr. SIMMONS obtained the floor.

Mr. LA FOLLETTE. Mr. President, will the Senator yield to me for the purpose of asking a question of the Senator from Pennsylvania in connection with a matter which has been adverted to by the Senator from Montana?

Mr. SIMMONS. I yield.

Mr. LA FOLLETTE. I take it, from the remarks which the Senator from Pennsylvania made during the speech of the Senator from Montana, that he does not approve of what is being done in the matter of conveying this propaganda under Government frank?

Mr. REED of Pennsylvania. No, Mr. President; I do not approve of it.

Mr. LA FOLLETTE. I should like to ask the Senator what appropriate remedy the Senator feels lies in the matter, as far as action by the Senate is concerned?

Mr. REED of Pennsylvania. I do not think the Senate needs to take any more action than it already has taken in establishing a penalty for the abuse of the Government frank.

Mr. LA FOLLETTE. But that does not seem to have been effective, may I suggest to the Senator.

Mr. REED of Pennsylvania. I think these are sporadic cases. I believe when the attention of the War Department is called to them, as it will be, we shall not have any more trouble of this sort, and if we do, the present laws provide an adequate penalty.

Mr. LA FOLLETTE. On the contrary, Mr. President, it seemed to me that the Senator from Montana made a showing that these were not sporadic, but seemed to be rather general in character.

Mr. REED of Pennsylvania. Anyway, I do not see how we can provide in an appropriation bill against this. These bulletins were not printed, as I understand it; they do not come within the appropriations for printing and binding, and there is nothing we can do here. I agree with the Senator that it ought not to be done. I believe that it will be stopped, and if it is not stopped, the present penal laws afford an adequate remedy. But we can not reach the matter by putting a limitation on the printing and binding item, because that does not apply to them at all.

Mr. LA FOLLETTE. Then, if I understand the Senator, there is no item in this bill out of which the expenses for the publication and printing and circulation of the documents referred to by the Senator from Montana are provided for.

Mr. REED of Pennsylvania. Yes; in the item for the divisional headquarters of the Organized Reserves.

Mr. LA FOLLETTE. On what page is that?

Mr. REED of Pennsylvania. On page 58 there is the item for the maintenance of those headquarters, and I presume that includes the mimeographing machines which were used in this case.

The PRESIDENT pro tempore. If the Chair may exercise his authority as a Senator, he will say that undoubtedly this whole matter may be reached by action of the Joint Committee on Printing, which has sole authority over the publication of the bulletins to which the Senator from Montana has referred. Speaking as chairman of the Joint Committee on Printing, the Chair assures the Senator from Montana that the matter will be called to the attention of the appropriate committee.

Mr. SHIPSTEAD. Mr. President——

The PRESIDENT pro tempore. Does the Senator from North Carolina yield to the Senator from Minnesota?

Mr. SIMMONS. I yield.

Mr. SHIPSTEAD. Before this subject of propaganda is dropped I want to call the attention of the Senate to something that happened two or three years ago, when General Fries, I think it was, sent out some kind of a chart that was an insult to every women's organization in the United States. He sent out a chart which purported to show that all the women's organizations in the United States, practically without exception, were somehow in league with or were being used as dupes by a foreign government. I think that was also done at the expense of the appropriation for the Army and the Navy.

I want publicly to protest against the use of money appropriated from the Treasury to insult the women of America.

Mr. SIMMONS. Mr. President, as I understand, the question now before the Senate is whether we will agree to the committee amendment to the bill as it passed the House, reducing the appropriation from $55,000,000 to $52,000,000. I sincerely trust that the action of the Senate committee in reducing the amount provided in the bill as it passed the House will not be sustained.

I have heard no reason assigned why the amount fixed in the bill as it passed the House should be reduced, except a suggestion that the situation calls for economy. Notwithstanding the fact that the engineers had estimated that they would need to use $55,000,000, and the House decided to give them that amount, though it was $5,000,000 in excess of the Budget estimate, the Senate committee has cut it down to $52,000,000.

The reductions made affect nearly every section of the country. There has been some suggestion here that because the Senator from Virginia and myself this morning dissented from the action of the Senate committee, the reduction was made upon sectional grounds. There is no justification for that charge, because our section is not the only section that is cut down in its allowance. Nearly every other section is more or less cut down.

An examination of the item to which I referred this morning shows that there is no sectionalism in our attitude. That item is the construction of an intercoastal waterway, and is a great project which the Government undertook quite a number of years ago, and upon which it has already expended, I should say, nearly a hundred million dollars, including the works of construction and the purchase of canals. That waterway starts at Boston. We have purchased every toll canal along the line of that inland water route from Boston to Beaufort, N. C. I think we appropriated for the purchase of the last one during the last Congress—that is the Cape Cod Canal—making a free inland waterway stretching from Boston down to Beaufort, N. C. It is over that waterway that nearly all the yachts of the country that go between the north and the south during the winter season of the year travel, taking advantage of the safety of the inland waterways until they get to Beaufort where they must go out to sea. When the waterway shall have been extended to the Cape Fear River those vessels will not go out to sea until they arrive at the Cape Fear River, and they will then be beyond the last danger point upon the south Atlantic coast. They will have passed Cape Hatteras, they will have passed Cape Lookout, and they will have passed Frying Pan Shoals.

This inland waterway is one of the most ambitious ventures upon which the Government has ever entered. It is only half completed. When it shall have been completed it will give a great continuous inland waterway all the way from Maine to Mexico.

That part of it which has been completed, upon which all the money has been expended that needs to be expended by the Government, is in the Northern and Eastern States. The waterway does not reach the South until it gets to Chesapeake Bay.

It is now on its way of construction southward. It has got as far as my State, or about 200 miles to the south of the north line of my State. It is proposed here to cut down an appropriation that conforms to the estimate of the engineers as to the amount of money that they can profitably expend upon this extension during the next year.

The State of North Carolina is so much interested in the further extension, we have derived so much benefit from the extension down to Beaufort, we know so well the advantages of the extension further to Wilmington, N. C., a seaport on the Cape Fear River, that the State of North Carolina, which under the act is to furnish a right of way 1,000 feet wide the whole length of about 100 miles, at the last session of the State legislature appropriated a large sum of money to procure the right of way. The Federal Government, by reason of the failure of the river and harbor appropriation bill at the last session of Congress, was unable to furnish the money for the purpose of completing the work and the State of North Carolina, so anxious was it for the extension, so beneficial did it regard the extension, and so anxious was it that it be completed as quickly as possible, offered to advance the money to the Federal Government to pay for the cost of the survey, to be refunded out of the next appropriation.

Mr. President, I trust that the proposed reduction of the amount carried in the pending bill will not prevail, not only on account of the item about which I have spoken and in which I am specially interested, but on account of reductions made in the bill generally. I think we have been in recent years making no extravagant appropriations for rivers and harbors. Since the war we have been appropriating lump sums and as a rule they have been nothing like as much as we appropriated before the war and before we began the lump-sum method of providing for our rivers and harbors. In every other direction the Government has expanded its expenditures. In the matter of river and harbor improvements the Government has not increased its expenditures since the war. There has been no extravagance and there is none in this bill. There ought not to be any objection to granting to the engineers the full amount they are able to expend profitably during the next year.

Mr. HOWELL. Mr. President, there is no section of the country that has suffered from agricultural depression more severely than the great Middle West. For a number of years the West has been here, knocking at the doors of Congress and asking for relief. Up to the present time relief has been denied. But recently in the Middle West we have been told that there was a possibility of improving conditions through the development of navigation on the upper Missouri.

About a year ago Secretary Hoover appeared before the chamber of commerce in Omaha and from his remarks it was then inferred that he favored the improvement of that portion of the river. During the last session of Congress a bill was passed authorizing the expenditure of $12,000,000 for the improvement of the Missouri from Kansas City to Sioux City. Nothing was appropriated, however; but in the present bill I find the magnificent sum of $510,000 suggested for that work, although it will require some $50,000,000 to complete the improvement of that section of the river.

As a matter of fact, under the proposed appropriation, as the bill passed the House, although the Missouri River from Kansas City north to Sioux City would probably be allotted but $510,000, I have been in hopes that possibly a larger amount might be allocated ultimately, and especially if the House appropriation of $55,866,000 should be adhered to. But if we are to reduce the amount by about $3,000,000, what are we to hope for the upper Missouri? It must be evident that on the basis of any such allotment for the improvement of the upper river it would require 100 years to complete the work from Kansas City to Sioux City. Had I thought it were possible to secure the adoption of an amendment to appropriate the $12,000,000 authorized, I should have offered it; but I understand it would be useless to do so.

Certainly we ought not to decrease the $55,000,000 appropriation of the House. If we do it means that, under the provisions of the bill, but $32,000,000 or less than that amount—in fact, only $30,960,000—will be available for actual improvement of rivers and harbors during the coming year.

It is proposed that $50,000,000 of the Senate's appropriation shall be used about as follows: $1,500,000 for general surveys; $250,000 for temporary surveys; $605,000 to recoup Miami, Fla., for funds expended; $150,000, department service, allotment roll. The total is $2,505,000. Deducing this sum from $50,000,000 leaves $47,495,000. The estimated expenditures for maintenance of river and harbor works during the year is $16,535,000. Subtracting this from $47,495,000 leaves $30,960,000. It is true that the bill provides for $2,000,000 more than $50,000,000, assumed, or $52,000,000, but that $2,000,000 will not be available except for the lower Missouri and further surveys.

Certainly, in view of what we did for insurance companies the other day, providing for the payment of virtual war profits to the extent of $52,000,000, and deferring the possible receipt of Government awards 26 years, that the insurance companies might get their money soon, it seems to me that it would be wholly incompatible with such generosity now to cut down this appropriation a paltry $3,000,000. Certainly the amendment of the committee should be defeated.

Mr. McKELLAR. Mr. President, I desire to say that I am anxious that we shall reach a vote. I hope we are going to have a vote pretty soon, and I wish to say, merely, that a vote "nay" is for the $55,866,000 and a vote "yea" is for $52,000,000, as reported by the Senate committee.

Mr. LA FOLLETTE. Mr. President, before the vote is taken I should like to call attention to various items which will be reduced if the committee amendment is agreed to. I make this statement on information given to me by the Senator from Pennsylvania [Mr. REED], that of the $52,000,000 which the committee provides the only portion which will go to present projects is the portion of it which is provided for the Missouri River from Kansas City to the mouth.

Beginning on page 226 of the committee hearings, the reductions provided by the committee would be as follows—and if I have made any mistake in hastily making the calculation I shall appreciate it if the Senator from Pennsylvania will correct me:

Thames River, Conn., reduced $5,000.
Norwalk Harbor, Conn., $10,000.
Jamaica Bay, N. Y., reduced $310,000.
East River, N. Y., reduced $310,000.
Newton Creek, N. Y., reduced $10,000.
Harlem River, N. Y., reduced $25,000.
Hudson River Channel, N. Y., reduced $25,000.
Hudson River, N. Y., reduced $375,000.
Newark Bay, N. J., reduced $100,000.
New York and New Jersey channels, reduced $125,000.
Ponce Harbor, P. R., reduced $20,000.
Delaware River, Philadelphia to the sea, reduced $94,000.
Baltimore Harbor and channels, reduced $15,000.
Norfolk Harbor, Va., reduced $5,000.
Channel to Newport News, Va., reduced $60,000.
James River, Va., reduced $15,000.
Charleston Harbor, S. C., reduced $15,000.
Savannah Harbor, Ga., reduced $25,000.
Miami Harbor, Fla., reduced $100,000.
Sabine-Neches Waterway, Tex., reduced $50,000.
Galveston Harbor, Tex., reduced $50,000.
San Francisco Harbor, Calif., reduced $15,000.
Oakland Harbor, Calif., reduced $25,000.
San Pablo Bay, Calif., reduced $25,000.
Suisun Bay Channel, Calif., reduced $5,000.
Crescent City Harbor, Calif., reduced $25,000.
Honolulu Harbor, Hawaii, reduced $65,000.
Hilo Harbor, Hawaii, reduced $85,000.
Nawiliwili Harbor, Hawaii, $60,000.
Coos Bay, Oreg., $30,000.
Umpqua River, Oreg., $25,000.
Wrangell Narrows, Alaska, $50,000.

Then, coming to lake harbors and channels.

Green Bay Harbor, Wis., $20,000; Milwaukee, $60,000; Muskegon Harbor, Mich., $10,000; Frankfort Harbor, Mich., $15,000; Michigan City Harbor, Ind., $30,000; St. Marys River, Mich., $300,000; Sandusky Harbor, Ohio, $125,000; Black Rock Channel, N. Y., $30,000.

Internal waterways:

Appomattox River, Va., $5,000; Inland waterway from Norfolk, Va., to Beaufort Inlet, N. C., $31,000; intercoastal waterway from Beaufort to Cape Fear River, N. C., $290,000; intercoastal waterway, Jacksonville to Miami, Fla., $235,000; Louisiana-Texas intercoastal waterway, Sabine River, Corpus Christi section, $31,000; Mississippi River, between Missouri River and Minneapolis, $500,000; Missouri River, Kansas City to Sioux City, Iowa, $60,000; Illinois River, Ill., $25,000; Sacramento River, Calif., $41,000.

Mr. President, it seems to me that this question has been discussed until every Senator is familiar with the issue which is involved. It is a well-known fact that the House of Representatives and the House Committee on Appropriations are not prone to make unnecessary increases in Budget estimates, but after careful consideration and after thoroughgoing hearings the House committee increased this item by $5,886,000.

Mr. REED of Pennsylvania. Will the Senator from Wisconsin yield there?

Mr. LA FOLLETTE. Yes.

Mr. REED of Pennsylvania. The House committee reported $50,000,000, or $2,000,000 less than the Senate committee reported. The increase was made on the floor of the House.

Mr. LA FOLLETTE. I thank the Senator for having corrected me. I was misinformed, or perhaps I misunderstood what one of the House Members stated to me here this afternoon. However, I sincerely trust, Mr. President, in view of all the statements which have been made and the representations which have been advanced here on the floor justifying the expenditure for these various items, that the Senate committee amendment will be rejected, and upon that amendment I ask for the yeas and nays.

The VICE PRESIDENT. The Secretary will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. CURTIS (when his name was called). I have a pair with the Senator from Arkansas [Mr. ROBINSON]. Were he present he would vote "nay," and if I were permitted to vote I should vote "yea."

Mr. FESS (when his name was called). I am paired with the Senator from Michigan [Mr. FERRIS], but I understand that if he were present he would vote as I intend to vote. Therefore I shall vote. I vote "nay."

Mr. FLETCHER (when his name was called). I have a general pair with the Senator from Delaware [Mr. DU PONT], which I transfer to the senior Senator from Missouri [Mr. REED], and vote "nay." If the Senator from Missouri were present, he also would vote "nay."

Mr. MOSES (when his name was called). On this vote I am paired with the junior Senator from Florida [Mr. TRAMMELL]. I therefore withhold my vote.

Mr. REED of Pennsylvania (when his name was called). I have a general pair with the Senator from Delaware [Mr. BAYARD]. I transfer that pair to the Senator from Vermont [Mr. GREENE], and vote "yea."

Mr. TYSON (when his name was called). I have a pair with the senior Senator from West Virginia [Mr. GOFF]. I transfer that pair to the junior Senator from Missouri [Mr. HAWES], and vote "nay."

Mr. COPELAND (when Mr. WAGNER's name was called). My colleague, the junior Senator from New York [Mr. WAGNER], is detained from the Senate on official business. If he were here, he would vote "nay."

The roll call was concluded.

Mr. GLASS (after having voted in the negative). I have a general pair with the senior Senator from Connecticut [Mr. McLEAN], which I transfer to the Senator from New Jersey [Mr. EDWARDS], and let my vote stand.

Mr. GERRY. I desire to announce that the Senator from Kentucky [Mr. BARKLEY] is paired with the Senator from Utah [Mr. KING]. If the Senator from Kentucky were present, he would vote "nay," and if the Senator from Utah were present, he would vote "yea."

Mr. JONES. I desire to announce that the Senator from Idaho [Mr. GOODING], the Senator from Oklahoma [Mr. PINE], the Senator from Montana [Mr. WHEELER], and the Senator from New York [Mr. WAGNER] are absent from the city in con-

sequence of their duties on the committee of the Senate investigating coal conditions in Pennsylvania.

The result was announced—yeas 17, nays 55, as follows:

YEAS—17

Bingham	Hale	Oddie	Warren
Borah	Jones	Phipps	Waterman
Dale	Kendrick	Reed, Pa.	
Edge	Keyes	Sackett	
Gillett	Metcalf	Smoot	

NAYS—55

Ashurst	Dill	McKellar	Shipstead
Black	Fess	McMaster	Simmons
Blaine	Fletcher	McNary	Steck
Blease	Frazier	Mayfield	Steiwer
Bratton	George	Neely	Stephens
Brookhart	Gerry	Norbeck	Swanson
Broussard	Glass	Norris	Thomas
Bruce	Harris	Nye	Tydings
Capper	Harrison	Overman	Tyson
Caraway	Hayden	Pittman	Walsh, Mass.
Copeland	Heflin	Ransdell	Walsh, Mont.
Couzens	Howell	Robinson, Ind.	Watson
Cutting	Johnson	Schall	Willis
Deneen	La Follette	Sheppard	

NOT VOTING—22

Barkley	Goff	McLean	Smith
Bayard	Gooding	Moses	Trammell
Curtis	Gould	Pine	Wagner
du Pont	Greene	Reed, Mo.	Wheeler
Edwards	Hawes	Robinson, Ark.	
Ferris	King	Shortridge	

So the amendment of the committee was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Appropriations was, on page 85, after line 3, to insert:

FLOOD RELIEF

Flood relief, Mississippi River: For the reimbursement of funds contributed by local interests to the Mississippi River Commission, and used for emergency levee construction and repair work on the lower Mississippi River on account of the flood of 1927, $1,500,000, to be immediately available and to be expended by the Mississippi River Commission: *Provided*, That the provisions of the flood control act approved March 1, 1917, in so far as they forbid expenditures by the Mississippi River Commission for levee work unless local interests contribute one-third the cost thereof, shall not apply to emergency levee work done, or to be done, on account of the flood of 1927.

The amendment was agreed to.

The next amendment was, under the subhead "National Home for Disabled Volunteer Soldiers," on page 90, after line 22, in the item for the Pacific Branch, Santa Monica, Calif., to insert:

For the construction on land now owned by the National Home for Disabled Volunteer Soldiers of a sanitary, fireproof mess hall of a seating capacity of 1,200, including kitchen, bakery, and dormitories for employees; such mess hall shall include all necessary buildings with the appropriate mechanical equipment, including service lines, and equipment for heat, light, fuel, water, sewage, and gas, and kitchen, bakery, and mess-hall furniture and equipment, including tableware, as may be approved by the Board of Managers, National Home for Disabled Volunteer Soldiers, $200,000, to be immediately available: *Provided*, That the Secretary of the Treasury, upon request of the Board of Managers, may have all architectural and inspection work in connection with such mess hall performed by the office of the Supervising Architect of the Treasury Department and the proper appropriations of that office may be reimbursed from this appropriation on that account.

The amendment was agreed to.

The next amendment was, on page 91, at the end of line 15, to change the total appropriation for the Pacific Branch, National Home for Disabled Volunteer Soldiers, from $1,210,000 to $1,410,000.

The amendment was agreed to.

The next amendment was, on page 94, line 18, to change the total appropriation for the National Home for Disabled Volunteer Soldiers from $8,500,300 to $8,700,300.

The amendment was agreed to.

The next amendment was, under the subhead "Repeal of appropriations," on page 100, after line 4, to strike out "Cantonment construction, Panama Canal, $204,546.61."

The amendment was agreed to.

The next amendment was, on page 100, after line 9, to strike out "Sites for military purposes, $335,669.31."

The amendment was agreed to.

The next amendment was, on page 100, after line 11, to strike out "Terminal storage and shipping buildings, $322,381.63."

The amendment was agreed to.

The next amendment was, on page 100, after line 12, to strike out "Evacuation of ordnance depots, $122,904.22."

The amendment was agreed to.

The next amendment was, on page 100, line 14, after the name "Frankford Arsenal," to strike out "$94,123.44" and insert "$25,183.44," so as to read:

Frankford Arsenal, $25,183.44.

The amendment was agreed to.

The next amendment was, on page 100, line 15, after the name "Rock Island Arsenal," to strike out "$143,191.48" and insert "$6,693.25," so as to read:

Rock Island Arsenal, $6,693.25.

The amendment was agreed to.

The next amendment was, on page 100, line 18, to change the total appropriations to be covered into the Treasury from $1,445,814.73 to $254,874.73.

The amendment was agreed to.

Mr. CURTIS. Mr. President, has the consideration of committee amendments been concluded?

Mr. REED of Pennsylvania. The amendment just stated completes the committee amendments.

The VICE PRESIDENT. That concludes the committee amendments.

Mr. CURTIS. I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment proposed by the Senator from Kansas will be stated.

The CHIEF CLERK. On page 25, line 14, it is proposed to strike out the figures "$12,668,944" and insert in lieu thereof the figures "$12,981,775," and on the same page, after the word "Ferry," in line 22, to insert the following proviso:

Provided further, That not exceeding $286,831, shall be available immediately for the installation of a new heating plant at Fort Leavenworth, Kans., and that $26,000 shall be available immediately for the purpose of paving that portion of the road across the Military Reservation at Fort Leavenworth, Kans., connecting the State highways of Missouri and Kansas.

Mr. REED of Pennsylvania. Mr. President, I am sorry to do so, but I shall have to make the point of order against the amendment. It has not been estimated for.

The VICE PRESIDENT. The point of order is well taken and is sustained.

Mr. DENEEN. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 83, after line 18, it is proposed to insert the following:

That the Chief of Engineers, War Department, be authorized to make a preliminary survey for a breakwater and harbor in the Mississippi River at Hamilton, Ill.

Mr. DENEEN. Mr. President, I should like to have read by the Secretary a letter from General Deakyne explanatory of the item.

The VICE PRESIDENT. The Secretary will read, as requested.

The Chief Clerk read as follows:

FEBRUARY 25, 1928.

Hon. CHARLES S. DENEEN,
United States Senate, Washington, D. C.

MY DEAR SENATOR: In reply to your inquiry of the 20th instant as to whether an examination and survey for a breakwater and harbor in Mississippi River at Hamilton, Ill., can be made to determine the merits of the proposition by this department without congressional authority, permit me to advise you that, based upon present knowledge of the situation at Hamilton, I consider that the proper course to follow will be to have the examination made under congressional authority. Difference of opinion as to the necessity of a borbor at Hamilton has existed for some years, and the question can best be disposed of one way or the other by a thorough formal examination.

Very truly yours,

HERBERT DEAKYNE,
Brigadier General, Acting Chief of Engineers.

Mr. REED of Pennsylvania. Mr. President, I am very sorry that I shall have to make the point of order against that amendment that it is not estimated for, and that it is new legislation.

Mr. FLETCHER. It is legislation on an appropriation bill. The Senator will have to wait for the river and harbor bill.

The VICE PRESIDENT. The point of order is well taken.

Mr. WILLIS. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 55, line 9, after the words "National Guard," it is proposed to insert "except for pay of National Guard (armory drill)."

Mr. WILLIS. Mr. President, I can explain the purpose of this amendment in a moment. It relates to the interchangeable provision in this bill found in lines 7 to 15, inclusive, which provides that "when approved by the Secretary of War 10 per cent of each of the foregoing amounts"—that is, the amounts under this heading, "Arming, equipping, and training the National Guard"—"shall be available interchangeably for expenditure on the objects named, but no one item shall be increased by more than 10 per cent." In other words, if there shall be an emergency, they can transfer within that limit from one item to another.

Here is the difficulty about having that applicable to pay for the National Guard. If transfer is made from the amount that is provided for pay of the National Guard, we are then confronted with the embarrassing situation and the impossible situation in which there is no money available for the pay of the National Guard. I am told that exactly that situation exists. I therefore offer the amendment to provide that this interchangeable provision contained in lines 7 to 15 shall not be applicable to the provision for pay for the National Guard. That is an amendment which is very much desired by the National Guard of the country.

Mr. REED of Pennsylvania. Mr. President, I hope that amendment will not be agreed to.

The policy of the department and of the Congress is for 48 armory drills per year for the National Guard. That figure has been generally agreed on as the proper one. It has been found this year that the attendance at those drills is so much better than has been known before that the appropriation will certainly be overrun. We do not know how much, nor is it possible to compute the amount by which it will be overrun. We tried to find out, in order that we might increase the item for armory drills; but it is agreed on all hands that the 48 drills will be adhered to, and that a deficiency appropriation will be estimated for and made; and the Senator need not be afraid that money will be transferred out of that item so as to affect the schedule of the 48 drills. On the other hand, if this does not remain as it now is and has been in years past, it may pinch the Guard very severely in other activities when an emergency arises. I doubt if it is for the best interests of the guard to insert that amendment.

Mr. WILLIS. Mr. President, will the Senator yield for an interruption there? Is it not a fact that there is a deficiency right now in the pay of the National Guard?

Mr. REED of Pennsylvania. Absolutely; that is true; but does not the Senator see that that is going to be cared for this year in the deficiency bill as soon as we know how much the deficiency is going to be? I do not mean that this year's appropriation has been overrun by the 27th of February; of course, it has not been; but the current appropriation will be overrun if the drills go on as planned for the balance of the fiscal year.

It may be that some day we are going to appropriate more than is absolutely needed for armory drills. It would be no service to the National Guard to provide that that balance could not be used for their other purposes. It could be used for camps or for additional animals, and would be of great help to them; and looked at in that way, I think the Senator will agree that it is of dubious benefit to the guard to put in a limitation, because I can assure him that those 48 drills will be provided for in this year's deficiency and in the deficiency of the year 1929, for which we are now appropriating.

Mr. WILLIS. Mr. President, just one other word.

I can not agree with the view expressed so ably by the Senator from Pennsylvania. Here are various items that are provided for under this general heading. As I suggested before, suppose there should be an emergency that required a larger amount than is provided under this specific head. Then it could be handled as it has been heretofore. They would transfer a portion of the provision for pay of the National Guard.

I know something about the National Guard. While it does not exist simply for the purpose of getting the little pittance of pay for armory drill, if you get the men into a company and they drill and then they find that there are no funds available to pay for their armory drill you have created a very unfortunate situation. So all that I propose to provide here is that this transfer provision shall not apply to the item of pay; that that shall be held intact; and I am sure that the National Guard organizations throughout the country are very much interested in having the amondment adopted.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Ohio.

The amendment was rejected.

Mr. BROOKHART. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 68, lines 5 and 6, it is proposed to strike out the words "including repair, operation, and maintenance of motor-propelled and animal-drawn vehicles" and to insert "at the rate of 5 cents per mile, which shall include subsistence while traveling."

Mr. BROOKHART. Mr. President, this amendment does not change in any way the import of the bill. It provides a better method of administering these expenses and saves the trouble of getting a lot of difficult receipts and accounts; and, as I understand, the Senator in charge of the bill has no objection to the amendment.

Mr. REED of Pennsylvania. I have no objection to the suggestion; but, as I look at the language of the bill, I am afraid I have advised the Senator wrongly.

The Senator will notice on page 67 that the item of subsistence is provided for, including commutation of rations to authorized teams, and including the enlisted men of teams from the Regular Army from the date of departure from their homes or stations. Then the item of transportation which the Senator wants to amend I believe includes not the travel allowance but the transportation at the matches. I suggest that he put the provision in line 7, after the word "travel," and make it read "travel at the rate of 5 cents per mile, including subsistence, of authorized teams representing the Regular Army, National Guard, Organized Reserves," and so forth.

Mr. BROOKHART. Line 7 on page 67?

Mr. REED of Pennsylvania. Line 7 on page 68, after the word "travel." I think the amendment that the Senator suggests is a very good one, because it will save a great deal of clerical work for the Government and require no additional outlay. At present these men are required to save receipts for all their meals on dining cars, and it leads to a great deal of clerical work and a great deal of irritation.

Mr. BROOKHART. I shall be very glad to accept the suggestion.

The VICE PRESIDENT. The question is on agreeing to the amendment as modified.

The amendment as modified was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time and passed.

HORTICULTURAL, ETC., WORK IN SEMIARID OR DRY-LAND REGIONS

Mr. WARREN. I ask unanimous consent to take up a little bill, Senate bill 2569, order of business 359, providing for horticultural experiment and demonstration work in the semiarid or dry-land regions of the United States.

Mr. McKELLAR. Let it be read.

The VICE PRESIDENT. The bill will be read.

The Chief Clerk read the bill; and there being no objection, the Senate as in Committee of the Whole, proceeded to its consideration.

The bill had been reported from the Committee on Agriculture and Forestry with an amendment, on page 2, after line 10, to insert:

SEC. 3. That there is hereby authorized to be appropriated each fiscal year thereafter necessary appropriations to enable the Secretary of Agriculture to carry on the experiments contemplated by this act.

So as to make the bill read:

Be it enacted, etc., That the Secretary of Agriculture be, and he is hereby, authorized and directed to cause such shade, ornamental, fruit, and shelter-belt trees, shrubs, vines, and vegetables as are adapted to the conditions and needs of the semiarid or dry-land regions of the United States, to be propagated at an experiment station of the Department of Agriculture to be established at or near Cheyenne, Wyo., and seedlings and cuttings and seeds of such trees, shrubs, vines, and vegetables to be distributed free of charge under such regulations as he may prescribe for experimental and demonstration purposes within the semiarid or dry-land regions of the United States.

SEC. 2. That for carrying out the purposes of this act, including the erection of buildings, there is hereby authorized to be appropriated the sum of $100,000, out of any money in the Treasury not otherwise appropriated, to be expended under the supervision of the Secretary of Agriculture.

SEC. 3. That there is hereby authorized to be appropriated each fiscal year thereafter necessary appropriations to enable the Secretary of Agriculture to carry on the experiments contemplated by this act.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

SPEECH BY SENATOR CARAWAY ON FARM RELIEF

Mr. McKELLAR. Mr. President, a few days ago the junior Senator from Arkansas [Mr. CARAWAY] delivered in Boston, Mass., one of his inimitable speeches on farm relief. I ask unanimous consent that it may be printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered. The matter referred to is here printed, as follows:

This is Boston. And if we from the hinterland smile when we say it, be assured that it is not from derision but reverence. We share with you the pride that every stone in your crooked streets has echoed to the marching feet of men who have laid down their lives on every battle field where American honor was at stake. We share with you the pride that every breeze that blows has wafted the philosophy, the wisdom, the sweet songs of men and women who have lent to you your chiefest charm. We share with you your pride in your Lowells, your Emersons, your Careys, your Carrolls, your Hawthornes, your Longfellows, and above all that singer, though not a native of your city but of your Commonwealth, Whittier. Your schools are the fount from which the thirsty for knowledge of all the States have freely drunk. Your statesmen helped to lay the foundation of this Republic and to guide its infant feet into those paths of wisdom and morality which have made us the most powerful government this world knows. Of your other contributions to the wealth, the happiness, the culture, the learning not alone of America but of the world we freely accord you the honor due you.

Of these, however, I came not here to speak. I came to discuss with you as business men, as professional men, as men of letters, but above all as American citizens, the interest that you have, the special interest that you may have in what the Congress of the United States shall do. I say your special interest because I am firmly persuaded that you have a special interest. And by special interest I mean that you have an interest that is more pressing for solution and more far reaching in its results than most sections of the United States. You are passing through an era of "great prosperity," but you will say to me that it is a "profitless prosperity." A prosperity of which you read but which does not increase your bank account nor add to your comfort. That "prosperity" if it be the result of causes that are world wide and over which American statesmanship can not exercise control, then you have no special interest in the causes that produce it. You are then but the victims of conditions that foresight and patriotism can not prevent. But I deny this.

New England's prosperity rests primarily upon New England thrift and New England industry. It rested, however, also upon the commercial instincts of your people, your ability to trade. But your commercial supremacy passed long ago. It was replaced by industrialism. You became an industrial and not a commercial community.

Your industry prospered, however, largely because it farmed the Government. But like any other special privilege that privilege may finally destroy those who are its beneficiaries. You may, therefore, destroy yourselves by the very means by which you formerly prospered. Let's examine the facts to see if this is not the case.

We who live 1,500 miles south of you inherited from our ancestors of the British Empire a love of agriculture. It was not only a profitable but a pleasant occupation. It likewise was the hallmark of social station. While that has passed or is passing, still the love of the land lingers. Once we were content to produce the raw materials and permit you to transform them into the finished product. As long as the profit derived from this joint enterprise was reasonably fairly distributed there was no great complaint on either side, no political or industrial strife divided us. However, as I said, you farmed the Government and we farmed our fields. Eventually by means of tariff and other governmental favoritisms gained through political control you prospered and the profits of agriculture dwindled. And instead of independent owners of their homes farmers became merely the holders of equities in their former estates. This decline was so accelerated by the deflation of 1920 until ruin threatened all.

Since 1914 farm taxes in the United States have risen 150 per cent, while their revenue have risen but 60 per cent. The cost of production has increased even greater than this. So that of net profit there is none. From 1920 to 1926 the average net income for the farm operator, capital, labor, and management, as reported by the United States Department of Agriculture, was less than $760 a year.

If the capital invested be credited with an interest rate of 4.5 per cent, the average reward for the labor of the farmer and his family would be less than $520 per year. The average farmer's family numbers five. So that the average return per capita would be around $104 per year.

In 1919 the invested capital in agriculture was more than $79,000,000,000. In 1926 it had shrunk to less than $59,000,000,000. In other words, the shrinkage in value in investment alone in that period was more than $20,000,000,000.

Students of sociology declare that an unskilled laborer can not maintain his family with proper standards of living with an income less than $2,200. Compare that with the farmer's family who is having to exist on less than $620 per year. Add to that the staggering loss of invested capital of more than $20,000,000,000 and you will conceive the farmer has some reason to complain of this industrial controlled and conducted Government.

But that is not all the story. During this time the interest paid on farm indebtedness has increased more than $600,000,000 a year above the 1914 era.

If in the past seven years the relationship between the retail price which the consumer paid for farm products had been in the same relation to the amount the producer received for it and the consumer paid prior to 1914 the farmer would have received within that period $8,500,000,000 more than he did receive.

If during this period the price for food and the same ratio continued as before 1914 had risen in proportion to the advanced cost of living, the farmer would have received more than $15,000,000,000 in excess of what he actually did receive.

The agricultural population of the United States is about 30,000,000, or about 29 per cent of our total population. Yet it received but 10 per cent or a fraction more of the national income. In other words, 70 per cent of our population engaged in commerce and industry receives 90 per cent of our income and 30 per cent of our population engaged in agriculture receive but 10 per cent of our national income.

Despite this disparity between its income and that of the other 70 per cent of our population, agriculture pays one-fifth of the total cost of Government. It purchases nearly $10,000,000,000 worth of the goods and services of the other groups annually. It supplies one-eighth of the total tonnage of all the freight carried by railroads. Its products constitute nearly one-half of the value of our total exports. And yet with these figures it is denied its equal opportunities under the law, its equal opportunity to share in the wealth it creates.

The farmers then realized that it was not sufficient that they be intelligent; that they be industrious; that they make two blades of grass to grow where one grew before; that they were destroyed by the very laws which made prosperous other sections of the country; that their foreign markets were destroyed; that the cost of production was increased; that the cost of transportation was exorbitant; that the charges of the middleman more than absorbed what remained of the returns from their products; that they and their families were reduced to destitution. They asked for relief—not relief in the sense that the Government should make them a present of what somebody else had earned, but that the Government make it possible for a fair distribution of the joint earning of all those who toiled and produced.

This measure came before Congress in the last Congress. Not a single Representative from the New England States supported it. It passed, however, and was vetoed by a New England President. I say, a New England President vetoed it. I want to qualify that statement. The veto consists of five incompatible parts—five alleged reasons, each in conflict with the other—and is the result of five collaborators who did not collaborate.

One is recognized as the great farmer and friend of agriculture, Mr. Mellon, who has from the beginning been the President's closest adviser upon all agricultural matters, although it is admitted by all who know him that he would not know a cow from a horse if the cow were dehorned. His specialty is money, liquor, oil—and of the last, putside of Fall, Sinclair, and Doheny, he doubtless knows more than any other man. He contributed his share, which largely dealt with the constitutionality of the act; although, so far as indications go, he knows no more about the Constitution than he does of livestock.

Hoover, who is the advisor extraordinary and plenipotentiary to the President, and whose specialty is standardizing men and material things, although it makes no difference if the standard set irks everybody who is compelled to comply with it, also contributed; but just what he contributed, I have read, but am unable to comprehend. Then Doctor Work, who left off being first aid to undertakers and became the chief advisor to those who seek advantage in our unappropriated assets of the West, contributed. But his contributions had as well been written in symbols, as one time were his prescriptions, so far as this information enlightened. That great friend also of the farmer, the Secretary of Agriculture, Mr. Jardine, whose name, I understand, is pronounced Mr. Jardown, made his contribution, which were predictions that farm products were selling too high. Then the great Attorney General from Vermont, whose name I do not recall—and I am sure none of you do either—likewise collaborated. At the bottom of all these works the President wrote "Calvin Coolidge"; that was his contribution. The result was that what had formerly been a most serious agricultural situation became a problem so aggravated that ruin engulfed agriculture, and in its destruction your prosperity also perished until my subject, "Profitless prosperity," becomes applicable to your industry. But that is the point I wish to discuss with you business men.

As I said, we were willing to produce raw materials. We were farmers by inheritance, farmers by love, farmers by training, and we were contented to remain such. We were not disturbed that you made a greater profit out of processing our raw materials than we made out of the production of them so long as we were permitted to make a profit at all. But when the right not only to make a profit but to preserve our inheritance was denied us we did the inevitable—we sought out the means which made you profitable. We determined that if there is

more profit in processing our products than producing them that we would both produce and process them.

The President vetoed the farm-relief measure on the 5th day of February, 1927. In my own State the reaction was this: We have great potential hydroelectric power. We determined to develop it. We produce the raw materials, the fifth State in the United States in the production of cotton. We have 1,500,000 Anglo-Saxon citizens, intelligent, industrious, free from agitation, anxious and willing to work. And since the President vetoed the farm bill we have removed from New England to my State alone within the last year five large mills—four textile and one paper mill. We are negotiating for twice that many more. We had seen North Carolina in one county alone—Gaston—set to turning more spindles than you have in any county in New England. We determined to try the experiment for ourselves. Your statesmen—and of them I do not complain—believed that they were representing your interest when they denied us an equal opportunity to find a market for our products and to make a profit that under the Government your industries returned. Denied this right, we propose to turn industrialist. Therefore the question I propound is: Have you any special interest in the legislation that Congress shall enact? Were it possible for agriculture to have realized a reasonable profit, we would have been content to till our fields, rear our children in our own modest homes, find employment for them in the occupations we ourselves have pursued. But the New England Representatives in Congress and a New England President said that this Government shall be rededicated to the prosperity of the commercial and industrial classes of New England, whether it meant the destruction of agriculture or not. They threw down the gage of battle. I am proud to say that the section from which I come has never hesitated to take it up, and if there must be war, industrial war, you so declared it. If it must be a strife that is sectional and occupational, we have no choice. The initiative lies with you. Whether you shall be able to grasp the significance of the changing conditions time will tell. Whether mutual happiness, peace, and prosperity of this American Republic shall be promoted by sectional war or occupational war time will also tell.

How much happier, however, for all sections, for all classes of American producers and sharers of wealth if we may find a solution for our economical differences that will enable us to have prosperity and peace instead of strife and ruin.

OHIO RIVER BRIDGE AT OR NEAR CAIRO, ILL.

Mr. DENEEN. Mr. President, I ask unanimous consent for the immediate consideration of House bill 121, Order of Business 369. It is a bridge bill.

The VICE PRESIDENT. Is there objection to the request of the Senator from Illinois?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 121) authorizing the Cairo Association of Commerce, its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Cairo, Ill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

INDEPENDENT OFFICES APPROPRIATIONS—CONFERENCE REPORT

Mr. BLACK. Mr. President, I move that the House of Representatives be requested to return to the Senate the conference report on House Hill 9481, making appropriations for the Executive Office, sundry independent executive bureaus, boards, commissions, and offices, for the fiscal year ending June 30, 1929, and for other purposes; and I enter a motion to reconsider the vote by which the report was agreed to.

Mr. WARREN. Mr. President, does the Senator desire to take the matter up now, or is he simply giving notice?

Mr. BLACK. I make the motion now, and if the Senator prefers, I will ask that the matter be taken up to-morrow.

The VICE PRESIDENT. The Senate can not act on the matter until the report is returned from the House.

Mr. WARREN. Of course, the Senator is entitled to make a motion for a reconsideration within two days. I wanted to know if he desired that the matter should be taken up this evening.

Mr. BLACK. I am ready to take it up now.

Mr. WARREN. My impression is that the report was sent to the House this morning after the action here, and it will have to be recalled from the House.

The VICE PRESIDENT. The report will have to be returned from the House before the Senate can act on it.

The question is on agreeing to the motion of the Senator from Alabama, that the House of Representatives be requested to return the conference report on the independent offices appropriation bill.

The motion was agreed to.

Mr. BLACK. Now, Mr. President, I enter a motion that the vote by which the conference report was agreed to be reconsidered.

HENRY W. LONGFELLOW

Mr. FRAZIER. Mr. President, I report back favorably from the Committee on Banking and Currency Senate bill 2280, authorizing the coinage of Longfellow medals, and submit a report thereon (No. 438). Inasmuch as to-day is the anniversary of the birth of Mr. Longfellow, I ask unanimous consent for the immediate consideration of the bill.

Mr. SMOOT. Did the Senator say medals or coins?

Mr. FRAZIER. Medals. Practically the same bill passed the Senate a year ago.

Mr. SMOOT. I have no objection to the bill if it provides for medals, but I was going to object if it provided for coins.

The Senate, by unanimous consent, proceeded to consider the bill as in Committee of the Whole.

The bill had been reported from the Committee on Banking and Currency with amendments, on page 2, line 7, after the name "United States," to strike out "1-cent pieces to the number of not more than 10,000,000, such 1-cent pieces to be of the diameter as the large copper coins of a century ago and bear a likeness of Longfellow to be selected by the Director of the Mint, with the approval of the Secretary of the Treasury, which said 1-cent pieces shall be legal tender in any payment to the amount of their face value," and insert "Longfellow medals of such design as may be approved by the Director of the Mint"; on page 3, line 6, before the word "herein," to strike out "coins" and insert "medals"; in line 9 strike out "par value of such coins" and insert "cost of same," and after line 9 to strike out—

SEC. 3. All laws now in force relating to the subsidiary or minor coins of the United States and the coining or striking of the same, regulating and guarding the process of coinage, providing for the purchase of material and for the transportation, distribution, and redemption of coins, for the prevention of debasement or counterfeiting, for security of the coin, or for other purposes, whether said laws are penal or otherwise, shall, so far as applicable, apply to the coinage herein authorized.

So as to make the bill read:

Whereas the International Longfellow Society was incorporated in 1913 under the laws of Illinois "To secure and preserve the birthplace of America's greatest poet, Henry W. Longfellow; to collect and exhibit and preserve printed and other matter and material relating to him; to encourage a world-wide observance of each succeeding anniversary of his birth; to promote the study of his writings and other literature; to honor him and other writers in such ways and by such means as the society may be able"; and

Whereas this birthplace of the world's best loved poet was occupied continuously by members of the family for more than 40 years and is one of the finest old colonial mansions in America, and was dedicated October 29, 1914, with impressive ceremony by the Governor of Maine and a distinguished assembly as the International Longfellow Memorial; and

Whereas more than 1,000 women's clubs representing every State in the Union have aided in its preservation and embellishment; and many of the most eminent scholars and distinguished men of the Nation are associated with the International Longfellow Society and have heartily indorsed its work, including more than 100 presidents of colleges and universities and governors of States, as well as President Roosevelt, President Taft, President Wilson, and President Coolidge; and

Whereas the Longfellow University, an international institution for the promotion of Christian civilization, the advancement of learning, and the diffusion of knowledge, has been incorporated in the District of Columbia by authority of Congress and named in honor of the most universally beloved of the world's poets, whose beautiful life and work is one of the most perfect examples of noble living, of loving and helpful service in all human history: Now therefore

Be it enacted, etc., That to aid the International Longfellow Society in the preservation of the birthplace of Longfellow and in furtherance of the objects of the society and development of the Longfellow University there shall be coined at the mints of the United States Longfellow medals of such design as may be approved by the Director of the Mint.

SEC. 2. The medals herein authorized shall be issued only upon the request of the International Longfellow Society and upon payment of such society to the United States of the cost of same.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. SMOOT. Mr. President, I suppose the Senator will have no objection to having the preamble stricken out. All the Senator desires is that the bill be enacted.

Mr. FRAZIER. I have no objection to striking out the preamble. My only thought was that it might help in the passage of the bill through the House. It failed to pass the House at the last session.

Mr. SMOOT. The preamble is in the RECORD now, so that Members of the House can read it. I ask that the preamble be stricken out.

Mr. FRAZIER. I have no objection to that.

The VICE PRESIDENT. The preamble will be stricken out.

The title was amended so as to read: "A bill to authorize the coinage of Longfellow medals."

Mr. COPELAND. Mr. President, we have just heard that to-day is the birthday of Henry W. Longfellow. I ask unanimous consent to insert in the RECORD one of his finest poems, My Lost Youth, and an appreciation by Alfred Noyes, who refers to this as one of the most perfect poems ever written.

We have also heard read in the bill reported by the Senator from North Dakota a reference to the activities of the Longfellow University. I ask that there be inserted in the RECORD a brief prospectus of that institution and a tribute by James H. Hamilton. It is proper that this should be done, because the institution does not charge any tuition fee. Its faculty is a volunteer faculty. The institution is organized for the promotion of the advancement of learning, and the diffusion of knowledge.

I ask that these articles be inserted in the RECORD.

The VICE PRESIDENT. Is there objection?

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

MY LOST YOUTH

Often I think of the beautiful town
That is seated by the sea;
Often in thought go up and down
The pleasant streets of that dear old town,
And my youth comes back to me.
And a verse of a Lapland song
Is haunting my memory still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I can see the shadowy lines of its trees,
And catch, in sudden gleams,
The sheen of the far-surrounding seas,
And islands that were the Hesperides
Of all my boyish dreams.
And the burden of that old song,
It murmurs and whispers still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I remember the black wharfs and the slips,
And the sea tides tossing free;
And Spanish sailors with bearded lips
And the beauty and mystery of the ships,
And the magic of the sea.
And the voice of that wayward song
Is singing and saying still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I remember the bulwarks by the shore
And the fort upon the hill;
The sunrise gun with its hollow roar,
The drum beat repeated o'er and o'er,
And the bugle wild and shrill.
And the music of that old song
Throbs in my memory still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I remember the sea fight far away,
How it thundered o'er the tide,
And the dead captains, as they lay
In their graves, o'erlooking the tranquil bay,
Where they in battle died.
And the sound of that mournful song
Goes through me with a thrill:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I can see the breezy dome of groves,
The shadows of Deerings Woods;
And the friendships old and the early loves
Come back with a Sabbath sound, as of doves
In quiet neighborhoods.
And the verse of that sweet old song,
It flutters and murmurs still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I remember the gleams and glooms that dart
Across the schoolboy's brain;
The song and the silence in the heart,
That in part are prophecies and in part
Are longings wild and vain.
And the voice of that fitful song
Sings on and is never still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

There are things of which I may not speak;
There are dreams that can not die;
There are thoughts that make the strong heart weak
And bring a pallor into the cheek
And a mist before the eye.
And the words of that fatal song
Come over me like a chill:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

Strange to me now are the forms I meet
When I visit the dear old town;
But the native air is pure and sweet,
And the trees that o'ershadow each well-known street,
As they balance up and down,
Are singing the beautiful song,
Are sighing and whispering still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

And Deerings Woods are fresh and fair,
And with joy that is almost pain
My heart goes back to wander there,
And among the dreams of the days that were
I find my lost youth again.
And the strange and beautiful song,
The groves are repeating it still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

(The following appreciation is from "Some aspects of modern poetry," by Alfred Noyes, universally acknowledged as one of the world's greatest living poets.)

For perfect simplicity, for tender truth of quite unaffected feeling, for beauty and enchantment of the kind that can only be drawn up from the living wells of memory by a true poet, there is nothing very much better in our language than that exquisite poem My Lost Youth. Here, in one poem, we have the most important part of his own historical background, and the best that he had to give the world in his art. It could have been written only by a man who loved nature intensely, whose whole being was suffused with the sunsets of that beautiful old New England town where his boyhood was passed, and was really haunted as he wrote by the verse of the Lapland song, into which he distilled the essence of all the poetry that he had made his own in Europe. Even in technique the unrhymed line at the end of the stanza, at the time when it was written, had an entirely original effect and is not without metrical suggestiveness at the present day. The sweetness and truth of the poem can hardly be praised too highly. Nothing is here exaggerated, wrenched, or overstated. There is no false realism, dwelling on the insignificant or ugly for the mere sensation of it. It is an absolutely true impression of the past, idealized only by the harmony of nature and art and memory. The remembered town is no more than "dear" and "old" and "beautiful." The streets are merely "pleasant," and yet what a glamor is thrown over it all by the sheer longing of the heart.

Poetry of this kind does not die, and it will never be dislodged from the memory of the race.

A MESSAGE TO ALL NATIONS

"And like a bell, with solemn, sweet vibrations
I hear once more the voice of Christ say, 'Peace!'"

—Longfellow.

THE LONGFELLOW UNIVERSITY—AN INTERNATIONAL INSTITUTION FOR THE PROMOTION OF CHRISTIAN CIVILIZATION, THE ADVANCEMENT OF LEARNING, AND THE DIFFUSION OF KNOWLEDGE

Incorporated in the District of Columbia by authority of Congress, and named in honor of the most universally beloved of the world's poets, whose beautiful life and work is one of the most perfect examples of noble living, of loving and helpful service in all human history.

A university founded to aid the abolition of illiteracy, the advancement of learning, the diffusion of knowledge, and the promotion of Christian civilization among all classes and conditions of people, regardless of age, sex, race, or religion, in the spirit of Him, who was the Light of the World and taught mankind to love God and man.

Among the many members of the International Longfellow Society are educators and scholars representative of every department of useful knowledge. A volunteer faculty will donate such time as it may be

able for the instruction of young and old in as many communities as possible without fees or dues of any kind.

The very existence of our Republic depends on adult education, yet we are confronted with the appalling fact that nearly one-quarter of our adult population can not read a newspaper, can not write a letter.

More than three years ago President Coolidge stated in an address to the National Education Association that—

"It is not alone the youth of the land which needs and seeks education, but we have a large adult population requiring assistance and direction. Our last census showed nearly 14,000,000 foreign-born white persons residing among us, made up largely of those beyond school age, many of whom, nevertheless, need the opportunity to learn to read and write the English language, that they may come into more direct contact with the ideals and standards of our life, political and social. There are likewise over 3,000,000 native illiterates. When it is remembered that ignorance is the most fruitful source of poverty, vice, and crime, it is easy to realize the necessity for removing what is a menace not only to our social well-being but to the very existence of the Republic. A failure to meet this obligation registers a serious and inexcusable defect in our Government. Such a condition not only works to a national disadvantage but directly contradicts all our assertions regarding human rights. One of the chief rights of an American citizen is the right to an education. The opportunity to secure it must not only be provided but if necessary made compulsory."

With anything like unanimity of action, the teachers of America could very largely eliminate illiteracy in this country by the time the census of 1930 is taken, for there is scarcely a teacher living who could not find and individually teach one or more of our illiterate millions how to read and write English.

This would be something worth doing, a splendid Christian endeavor that would bring joy to many a lonely soul, and should do much for the perpetuity of the best American ideals and institutions and the promotion of Christian civilization and world peace.

It is not alone the professional teacher who could and should do this; there are other thousands of young and old, in and out of church and school, who could and should achieve the same result. Will you not begin without delay?

You are also cordially invited to join the International Longfellow Society and the Longfellow University, in a world-wide observance of the Tolstoi centenary and the Bunyan tercentenary of 1928 and the duo millennium of Vergil in 1930.

"I salute thee, Mantovano, I that loved thee since my day began,
Wielder of the stateliest measure ever molded by the lips of man."
—Tennyson.

THE LONGFELLOW UNIVERSITY,
Washington, D. C., and Portland, Me.
ARTHUR CHARLES JACKSON,
President.

Hon. MARTIN DODGE,
Rev. R. W. BROOKS,
HORACE A. LATIMER,
MARSHALL W. PICKERING,
Trustees.

THE LONGFELLOW UNIVERSITY

By James H. Hamilton, Ph. D., formerly professor sociology, Syracuse University, and formerly head worker of the University Settlement, New York

Nowhere in the world is higher education less standardized—in spite of so much talk of standardization—nowhere are the different grades of schools less articulated and less understandable than with us. The graduate of a training school may by virtue of his diploma enter here—but not there. My purpose is not to discuss or to criticize the system—or lack of it—perhaps it is as well that we are still not too conventionalized. My purpose is simply to warn the reader that a quite new institution—still different—very different from all the rest, which he will attempt to describe—is not giving variety, it is only adding to the variety which already exists.

The Longfellow University, incorporated under the laws governing the District of Columbia, is something new in the academic world in certain very startling ways.

The striking features are not found in the charter, with the declaration that it is open to both sexes, and with no religious or color tests. Locally the absence of a color test is new, but it has practically ceased to exist in all the States north of the Mason and Dixon line, and it is not singular that an institution located at the Nation's Capital should not enforce this barrier, and we need not stop to discuss that.

The fact is that the organization of this new university has not yet proceeded beyond the board of trustees. That, of course, is the natural starting point and the fact is in itself not startling.

There are no amazing features in the educational program. We find here all the potentialities of a university—composed of colleges of liberal arts, post graduate, professional, and technical schools. It may shoot forth all these branches of instruction and research—expediency will determine that—with the usual credit, promotions, and degrees, both in course and honorary. A proposal is under consideration providing that students shall not be tested by the professors who give them instruction. This would be a departure from the general rule, but it would not be entirely new. The system is universal in the French secondary schools, and to a considerable extent in the universities. It is applied by at least one college in America, the Cincinnati Law School, where the examiners are appointed by the chief justice of the State supreme court.

The startling things are to be sought in the mind of the founder, Arthur Charles Jackson, of Portland, Me., and Washington, D. C. New things always trace back to some human brain—the Salvation Army to General Booth, the social settlement to Edward Dennison, the Chautauqua system to Bishop Simpson, and so on. The Longfellow University idea when it spreads abroad, if it does spread, will trace back to the brain of Jackson, educated at Illinois University, the Harvard Law School, and Ben Butler's Boston law office—sometime teacher, public lecturer, president of the International Roads Society, president of the International Longfellow Society, etc., a man who has gone much about the world, taking notes and thinking of ways and means for human betterment.

This preface is not too long. One had best not come too suddenly upon the amazing features of the Longfellow University, which Mr. Jackson fully, confidently expects to see realized.

Here, finally, are the amazing features: The corporation owns no property, no ground, no buildings. And it is not for want of time. If need be the university expects to function without them.

The university has no endowment.

No; it is not for want of sufficient time to solicit funds. If need be, the university expects to function without an endowment.

Then students' dues are to cover rent and salaries?

Right there, especially there, most wrong—and we have reached the very heart and soul of this new institution. The students are to pay nothing, not a cent.

Now the way is cleared, and no false guesses are possible. It is expected that property will be lent, not rented. It is expected that labor, instructional, administrative, clerical, and manual, will be gladly rendered without pecuniary reward.

Is such faith in the essential goodness of men justified by experience?

Don't jump at conclusions. Probably no such a combination of hypothetical altruisms was ever presented before. Still, Mr. Jackson may find some comfort in the testimony of experience.

Let us note some of the evidences.

The social settlement was established on the no-salary principle. The social workers were and are still in good part not paid. The most of them receive not even their board—in America—and still more in England.

Building associations and cooperative insurance societies are for the most part carried on without salaries.

The system of noonday lunches for school children, which started and was beautifully developed in Switzerland, depends upon unpaid service. Each table is looked after by an unpaid servant, and the head waiter looks over the whole—a group of volunteer servants is on duty every school day for two weeks, when it gives place to another and returns in due course. I one time had the pleasure to sit at the servants' table, after the children were gone, at one of the Geneva lunch centers. My plate was beside that of the head waiter. He earned his living as chief editor of a Geneva newspaper. The other side of me sat a table servant who earned his living as a doctor. Opposite us sat the kitchen chef, in white cap and apron. He had accumulated a fortune as a wholesale provision merchant and was giving all his time during the school year to this service which he knew well.

Boards of aldermen are in many places unpaid.

Members of the British Parliament were unpaid through the years when the high quality of the statesmanship in the mother country was the admiration of the world. The members now receive small salaries since labor has come into politics, and the bread-earning vocations of its representatives do not permit of time out of working hours for legislative duties.

The members of the Dawes commission, whose postwar service to all Europe—in some sense to all the world—was beyond all praise, paid their own expenses, and received not a cent of pay.

Under the excitement of war no end of illustrations could be found of highly effective and long-sustained effort without a trace of wage stimulation.

In times of peace many illustrations could be added to show that a group may be inspired to high and long-sustained effort without a trace of wage stimulation.

The social-service type of person may not be so rare as one might think. My own experience and observation convince me that a respectably sized group of this type may be found in every community, civilized or savage. And the hardest-working man I know, and certainly one of the most able, has passed middle age without pay for his services, except for a short term when he was vested with public office.

Yes; the evidence is strong that the thing is possible.

Much might be said about the place utility of such an institution in Washington where there are, on the one hand, thousands of young people employed at clerical work—work fit enough for youth, but of a kind which a young man or woman who wishes to make the most possible out of his life would not wish to remain long in; on the other hand, there are very many persons of the highest training in almost every department of science and learning. Out of the lot it is not difficult to imagine that courses of two or three periods in a week in every department could be provided with volunteer teachers. One hypothetical example will do for all. Say the dean of the liberal arts college has sketched a year's course in American poetry of two periods a week. He has grouped the subject matter into two parts for the first and second semester, respectively. It is difficult to imagine him looking through the staff of the Congressional Library and finding a professor for the first semester, and one for the second semester, most happy to meet with bright and eager young people for 1 hour 2 days in the week—for 16 weeks.

Thus, bit by bit, one can imagine the development of a comprehensive liberal arts curriculum; and also for law or medicine or engineering.

Washington is rich in instructional material in all branches of learning and I should say that in a yearly contribution of 32 hours of academic service so far from impairing the energies and weakening their powers for the services for which they are paid would prove to be a mental tonic, rendering them more fit and more capable.

Where will the classes be held? Among the possibilities may be noted the public-school buildings, when not in regular use, lodges clubs, churches, synagogues, theater reception rooms, private dwellings—abundant facilities are possible if the property-owning institutions and individuals could be stirred to extend the usefulness of their properties.

And janitor service? And clerical service? Girls and boys could and would look after that.

And the lighting and heating? Where is the faith that could move this mountain?

Probably the public-service corporations would not feel justified in making these contributions since the stockholders do not reside in Washington.

The Congress could grant the small contribution necessary, and consistently, since the students come from all the States.

There remains still another possibility—a strong probability—that the receipts from a few student presentations of Miles Standish or Evangeline also dramatized by students would cover these charges. Or Hiawatha adapted and set to music—either incidental of the course in American poetry.

When will the classes be held? Generally, no doubt, at an hour when most of the students and professors are free, and when the places are also most likely to be free. In this case there could be no more beautiful sychronization of free time with students, professors, and places.

The new university throws down no gauntlet to the institutions already fully organized and functioning. It has no quarrel with them. They all are based chiefly on altruism. Their endowments are raised in that spirit. The fees exacted of students are only a small part of the cost. And yet, to many they are prohibitive.

The founder believes, as many others also believe, that in Washington it is possible and expedient to develop a high-class university where the best of instruction is to be had without money, and without price.

Its consummation, devoutly to be wished for, waits upon the spread of this high faith.

We will watch, and wait, and hope.

JAMES H. HAMILTON,
Authors Club, London, England.

Mr. COPELAND. Mr. President, I may add that it is proper that we should discuss Henry W. Longfellow to-day in the Senate, because his father was a Member of Congress, a fact which may not be generally known. On that account it is fitting that tribute should be paid to that great poet on the floor of the Senate.

Mr. President, I ask that we now consider the joint resolution (S. J. Res. 98) authorizing the selection of sites and the erection of monuments to John Bunyan and William Harvey in the District of Columbia. The joint resolution is reported favorably by the Committee on the Library and the committee recommends that the preamble be stricken out, though I can see no reason for it.

Mr. McKELLAR. Let the joint resolution be read.

The joint resolution was read, as follows:

Resolved, etc., That authority is hereby granted to the International Longfellow Society to erect suitable monuments to John Bunyan and William Harvey at such places in the city of Washington as may be designated by the Fine Arts Commission, subject to the approval of the Joint Committee on the Library, the models of the monuments to be erected to be first approved by the said commission and by the Joint Committee on the Library, the same to be presented by the said society to the people of the United States.

SEC. 2. That for the preparation of the sites under the direction of the Director of Public Buildings and Public Parks of the National Capital, such sum as may be necessary is hereby authorized to be appropriated out of any money in the Treasury not otherwise appropriated.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The VICE PRESIDENT. Without objection, the preamble will be stricken out, as recommended by the committee.

The preamble was stricken out, as follows:

Whereas the International Longfellow Society, incorporated in 1913 under the laws of Illinois "To secure and preserve the birthplace of America's greatest poet, Henry W. Longfellow; to honor him and other writers in such ways and by such means as the society may be able"; and

Whereas more than 1,000 women's clubs, representing every State in the Union, and many of the most eminent scholars and distinguished men of the Nation are associated with the International Longfellow Society, and have indorsed its work, including more than 100 presidents of colleges, universities, and governors of States, as well as President Roosevelt, President Taft, President Wilson, and President Coolidge; and

Whereas 1928 is the tercentenary of the birth of John Bunyan and also the two hundred and fiftieth anniversary of the publication of his immortal Pilgrim's Progress, by common consent of all authorities, one of the greatest books ever produced in the English language; and

Whereas 1928 is also the three hundred and fiftieth anniversary of the birth of William Harvey, pronounced by Huxley, "The favored friend of his sovereign, the honored Nestor of his profession, the pride of his countrymen," and the tercentenary of the publication of his discovery of the circulation of the blood, one of the greatest epochs in the progress of medical science: Now, therefore, be it.

ST. LAWRENCE WATERWAY

Mr. COPELAND. Mr. President, I ask unanimous consent to have inserted in the RECORD an article from the Montreal Herald and Weekly Star, of February 22, 1928, on the St. Lawrence waterway.

The VICE PRESIDENT. Is there objection?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE ST. LAWRENCE WATERWAY—DO WE NEED IT AND WHAT WILL IT COST?

By J. Lambert Payne

THE ST. LAWRENCE WATERWAY THE PARAMOUNT ISSUE TO-DAY

(Shortsighted politicians and hired publicity agents are urging Canada to undertake the most expensive enterprise to which she has ever been committed.

The average citizen is confused by the conflicting opinions of those who regard the proposal as a staggering outlay of capital, the surrendering of a great heritage with little prospect of adequate benefits in return, and those who so loudly proclaim it as a great national undertaking, full of promise for the future.

Which side holds the more reasonable view?

The same sort of arguments are being put forward with the same energy and the same bitterness that were employed when the ruinous Grand Trunk Pacific Railway was projected. The politicians who were most enthusiastic for the project had the advantage of having the power to build. Yet the most rabid partisan of those days came in time to a realization that the building of the road was a huge blunder. The tragedy of the matter lies in the fact that the error was discovered too late.

The St. Lawrence waterway scheme was planned in the United States and its originators were quick to seek the neighborly cooperation of Canada in the project. A kindly but by no means disinterested pressure has been exerted to persuade Canada of the benefits of this doubtful enterprise. Perhaps if Canada had not had the experience of the Grand Trunk Pacific she would have listened with more earnestness to the siren voices across the line.

Nevertheless the public has the right to form an independent opinion which can only be gained by a clear presentation of the facts and the history of the negotiations. The Family Herald and Weekly Star has therefore asked a highly competent authority to give his views of the undertaking through the columns of this paper. The invitation was not extended to him as a supporter or an antagonist of the scheme, but because the Family Herald thought that no one was better qualified to enlighten the public.

The Family Herald is thus able to publish for the benefit of its readers two authoritative and illuminating articles on this subject by Mr. J. Lambert Payne, of Ottawa. There is no more competent judge

of all the facts at issue living to-day than Mr. Payne. These articles should be carefully read and digested by everyone.)

If the proposed St. Lawrence development were laid before a group of business men as a purely commercial project, they would instinctively approach the consideration of the matter by asking such questions as would go to the roots of its economic merits. They would first want to know if a new and deeper channel had been made necessary by growing traffic and congestion in connection with the existing waterway. They would be particularly interested in the probable cost of the work, and having got that information, would then be disposed to measure cost against the public service which would be given. In short, they would dispassionately seek to know if the thing would pay; and since there would not be any revenue from transportation, the question of profit would take the form of an inquiry as to the probability of freight tolls being lowered.

That the proposition is of a public nature does not in the slightest degree alter its essential merits. What a commercial corporation would regard as sound procedure should be regarded as equally expedient and necessary on the part of a government. Economic laws are universal in their application. What would be unprofitable and wasteful in the case of a private corporation could not possibly be otherwise simply because the people at large would foot the bill. Nor should the approach be any less cautious and calculating. In other words, a public project is not essentially different from a private project, in the sense that unsoundness is not turned into soundness by the fact that public money rather than corporate capital is involved.

It is here proposed to discuss this matter strictly on its economic merits, just as a business corporation would do. In 1903 Canada blundered most disastrously in seeking increased transportation facilities in the Western Provinces, although sincere and convinced of the need at the time, and our grave railway problem remains as a warning against impetuosity on this occasion. When Sir Wilfrid Laurier exclaimed, "Pray God it may not be too late!" he was undoubtedly voicing the prevailing optimism of that period; yet everybody now knows that the building of the Grand Trunk Pacific Railway was at least 50 years ahead of any possible need for it. Canada must be on her guard against mass emotion in this instance, and in the meantime should yield to the chastening influence of the 1903 experience.

DO WE NEED IT?

There should not be the slightest difficulty in deciding the question as to need. If the existing waterway has become inadequate and inefficient by reason of swelling traffic, the official records would at once reflect that situation. Our Canadian people are never inarticulate when their personal interests are at stake, and it is therefore significant that not a single complaint has ever been uttered as respects the adequacy of the St. Lawrence canal system, or any part of the inland-waterway system between Montreal and the head of lake navigation. No one has ever heard an outcry from the shipping interests. There has never, even during those autumn months when western grain is urgently seeking an outlet to the ocean, been even a hint of congestion from any quarter. The plain and indisputable truth is that the St. Lawrence route has not been used up to 50 per cent of its capacity.

On this fundamental aspect of the matter the proofs are overwhelming. As has just been said, the need for a new and deeper channel would have to rest upon official facts as to growth in traffic. There has actually been a very substantial shrinkage, which is all the more significant in view of a tremendous increase coincidentally in the volume of railway business. If the canals have not been moving more traffic it has not been because the trade of the country has fallen off. Quite to the contrary. The cause is to be found in a world-wide disposition to swing away from inland water transportation and to use the railways in increasing measure. Hence there has been no increase whatever in Canadian canal traffic during the past quarter of a century. There has been some growth in the movement of iron ore through the gateway at Sault Ste. Marie; but it is not Canadian business, and we are not concerned as a nation in it.

It is not necessary to overload this statement of the case with a mass of statistical data. The official reports are available to anyone who may question the conclusions here drawn. To analyze these reports is to remove every trace of doubt as to the absence of any need whatever for a huge expenditure in order to provide increased facilities. As between the years 1913 and 1926, there was a falling off in purely Canadian freight business by water from 11,130,875 tons to 9,656,190 tons, or by over 15 per cent. The situation is even worse than that when 10-year periods are concerned.

The official record of purely Canadian traffic, as distinct from Canadian and American traffic combined, does not go back of the year 1908—a period of 19 years down to the end of 1926. For the first 10 years of that period Canadian business through the canals had a total of 78,197,089 tons. During the succeeding nine years the volume was 59,065,770 tons. The average for the first period was 7,819,708 tons per annum, and for the second 6,451,741. By a simple calculation it will be seen that, as between these two averages, there was an actual falling off in freight tonnage of 21.2 per cent. Could any fact be more significant?

The situation as to need might be aptly illustrated by the case of a hotel keeper who, having increased his accommodation from 50 to 100 rooms, found that his normal patronage required but 40. What would be thought of his sanity, if, without any change whatever in immediate conditions or in the outlook, he suddenly resolved to increase the number of his rooms to 500 at a cost of ten times his original investment? That is precisely what would be done if this proposed St. Lawrence development were carried into execution.

WHY CANALS ARE UNPOPULAR

This adverse showing in the movement of Canadian commerce on inland waters was not due to conditions in any sense peculiar to Canada. With the single exception of the Panama Canal, which connects the two great trade oceans of the world, the same thing has happened in all countries.

Canal traffic did not decrease because less business was available. Quite the opposite. During the same 10-year period, between 1908 and 1917, inclusive, the railways of Canada hauled 905,991,796 tons of freight, or an average of 90,599,179 per annum. During the nine years ended 1926 the total was 1,305,168,977 tons, or an average of 115,018,975. The increase was equal to 27.12 per cent, as contrasted with a canal-traffic decrease of 21.2 per cent. Apart from the striking difference in the magnitude of the railway figures as compared with the relatively insignificant totals relating to canal business, this contrast tells the plain story of what has been occurring in the two fields of transportation.

In the face of such convincing facts how can anyone say that a new and larger canal system on the St. Lawrence is called for on the ground of need? At that point the irresistible teaching of official data can not be ignored by rational men. But it does not do to pause there. The unpopularity of canals is to be found in two things: First, the nature of the service given; and second, the shortness of the season of navigation. At best the movement of commodities through a chain of locks takes place slowly. Transportation by such means is therefore confined largely to shipments which can be made in cargo lots, such as grain, ore, sand, pig iron, etc. And then for five months each year the canals are closed. That is the vital factor.

The case of the New York State Barge Canal comes in aptly at this point. It was built to take the place of the old Erie, and was completed about five or six years ago. It gave a draft of 12 feet instead of the former 5, and therefore had a capacity probably ten times greater than that of the canal which it replaced. In every respect it was designed to be the last word in efficiency, and operated through one of the most highly industrialized States in the American Union. Yet the new Erie in 1926 did not move a freight tonnage one-third as large as did the old Erie 30 years ago. This led Governor Smith to solemnly suggest to the legislature last year that the new canal should either be closed or passed over to private interests. The annual loss on capital invested has been enormous.

WHAT WILL IT COST?

Every instinct of prudence and prescience would lead a group of business men, viewing this St. Lawrence proposition on its economic merits, to look very carefully at the probable cost. A nation can not afford to be less cautious and businesslike. At once, however, the honest inquirer finds himself confronted by a great deal of purely speculative data. The facts of the case preclude any other judgment as to the nature of that information.

When this project was first mooted a board of international engineers was appointed to make surveys and report upon the probable cost. The engineers took a couple of years to do their work and reported that the cost of the combined canal and water-power scheme would be $252,728,200. That was in 1924. Under date of November 16, 1926, this second board reported, and now the probable cost was raised to a maximum of $650,000,000. There the matter rests.

Is there a reasonable probability that this huge project could be carried out of $650,000,000? The history of all canal building is against such an assumption. In fact, primary estimates of big public works are invariably much below the actual cost. Here is a little table of facts in that regard which is well worth studying:

	Estimate	Cost
Panama Canal	$100,000,000	$430,000,000
New York Barge Canal	55,000,000	115,000,000
Chicago Drainage Canal	16,000,000	90,000,000
Manchester Canal	37,000,000	78,000,000
New Welland	55,000,000	115,000,000

Many will remember the disaster which overtook the famous Count de Lesseps when it was found that the actual cost of the Suez Canal was going to be several times the amount of his original estimate. The primary promoters were ruined. That is the teaching of all history as to canal building; so that when we are told this immense canal and

water-power undertaking can be carried out for $650,000,000, it is well to bear in mind what has always happened in the case of public works of that nature. The final capital outlay would probably reach a billion dollars, and even then the difference between estimate and actual cost would be much less than in any of the instances just quoted.

THE TAXATION VIEW

Business men would look beyond the probable cost. They would at once translate the capital outlay into terms of overhead, which in the case of a nation means taxation, and see what that would mean. It is the essence of the matter. Here again, however, it is impossible to begin the necessary calculation with definite data. The capital cost is uncertain. The terms upon which the work would be carried out have not been agreed upon. As a joint undertaking, it is a fair assumption that each nation would bear an equal share. But the first commission which had the matter under review suggested that the cost might be divided on the basis of user. That would mean something like 70 per cent for the United States and 30 per cent for Canada. But neither the United States nor Canada has come to a decision on that point. It has not even been the subject of official correspondence. Therefore, while nobody knows what the capital cost will be, it is also true that nobody knows how that cost will be divided between the two countries. Uncertainty remains at every point.

Under any circumstances Canada would have to borrow the money, and would also have to provide her share of the annual maintenance. The amount would be very large, and whatever it might be it would have a direct effect on taxation. We are now carrying an exceedingly burdensome debt and taxing the people on an unprecedented scale to pay the interest charges thereon. We have been able to reduce the national debt by only $106,000,000 since the armistice. We have not been able to do anything substantial in the way of cutting down taxes. The situation, therefore, would be tremendously aggravated if we went into this huge international scheme. It could not mean less than $12,000,000 per annum for interest and maintenance, and every penny of that would have to be got out of the people through the tax collector.

No matter from what angle the proposed development is viewed, it takes on the ugly aspect of a new and heavy burden on the people of Canada. If we do not need a new canal, nor the water power either, what justification could be offered for adding to our debt and taxation? The mere sentimental satisfaction of substituting a big canal for a smaller one, although the latter is serving the country most efficiently and is not being used to more than half its capacity, would not be in the nature of a sound reason for going into this thing. At some point common sense ought to rise above the appeal of mere propaganda. At some point we ought to commence to think in the same way we would think about our own private affairs.

Thus far consideration of need and cost have received attention. Two very important further points remain. One is the question of whether or not tolls could be lowered, and the other is the internationalization of the St. Lawrence River. The latter touches the very marrow of this entire project.

ARTICLE NO. 2

Probably there are many people in Canada who, if the matter were put to a vote, would be in favor of the proposed St. Lawrence development. I have taken some little trouble to ascertain the reasons for that attitude, and the information I have gathered might be summed up in the state of mind of a gentleman I met in central Ontario recently. "It would be a good thing, wouldn't it?" was his vague and interrogative way of putting it. When I asked him why he thought it would be a good thing, he said at once that he had not given the matter any thought, but had taken it for granted anything of that nature would promote the commerce of the country.

If this is a typical instance of public thinking on the subject, as I believe it is, there would seem to be urgent need of enlightenment before the issue reaches a finality. In my way of looking at the situation, it is impossible to see how trade could in any way be helped. We have an efficient and much more than adequate inland waterway system at the present time, and it is not being used to 50 per cent of its capacity. A new and larger channel could not, therefore, stimulate commerce. It might even hinder it, for a reason which urgently demands public consideration.

The reason to which allusion has just been made relates to tolls. There can be no doubt of three things: First, that this scheme had its origin in the United States; second, that its organized promoters have water power in view rather than an improved canal service; and third, that the canal improvement has been tacked on to it in order to get the water-power project through. The United States is no more in need of enlarged canal facilities than is Canada; but the transportation proposition has been joined to the other in order to make possible the announcement that freight rates would be materially lowered. That is intended to command the support of western grain growers.

WATER RATE ON WHEAT

One of the chief advocates of this St. Lawrence proposition had an article in Nation's Business recently in which he hinted that the rate on wheat from the West to the seaboard might be reduced by as much as 12 cents per bushel. Since the average rate between Fort William and Montreal last autumn was about 9 cents, the absurdity of this statement is at once apparent. But this gentleman speaking with assumed knowledge and authority, declared it would be brought about by shortening the rail haul. The truth is that the rail haul would not be shortened by a single mile, for the sufficient reason that it could not. It is not proposed to open up a new route. It is simply intended to deepen the existing channel. The distance between the rail head at Lake Superior and tidewater, which is now 1,222 miles, would not therefore be reduced by a foot.

Very little wheat is moved by rail anyway. The movement in that way is negligible during the season of navigation. Eighty-five per cent of all export grain comes down by water before the middle of December, and of that volume two-thirds goes out every year to New York by way of Buffalo. I am speaking of both Canadian and American western-grown grain. Why does it take that route? Not because it costs less to ship it in that way. It actually costs from 1 to 3 cents per bushel more. But every bushel of such grain is somebody's property, and that somebody dictates the route it shall take to the foreign market. The uninformed layman does not pause to learn or measure that pivotal fact, and it happens to be the very core of the whole matter.

Our Canadian wheat takes the Buffalo-New York route because of three reasons: First, it has been sold for delivery at a foreign port on a specified date, and profit on the transaction turns on avoiding demurrage. Bottoms are available in large volume on the New York Marine Exchange, and that is not true in the same degree, if at all, of Montreal. Second, all shippers want their cargoes off the inland route as soon as possible. They fear it, with its sudden storms and the possibilities of other hindrances. They dread canals in particular. The third reason is insurance, both inland and seagoing. The rate from New York is low and constant; the Canadian rate is higher to start with, and rises progressively after the early part of November. But the chief reason is the factor of certainty in making delivery abroad.

We may argue as we will about this situation as to export wheat; but it is as stated. If I am in error, any responsible exporter could at once upset what I have said. But I have taken care to make sure of my ground, and the logical deduction is that the deepening of the St. Lawrence Channel could not possibly alter or modify any one of these factors.,

The hope of bringing about lower tolls on export wheat rests wholly upon the assumption that larger vessels could move cargoes at less cost. They probably could if all things were equal. But they are not. They are very unequal in this instance, as can be convincingly shown. The factor of overhead comes in with peculiarly destructive force and meaning. The layman would not realize what overhead means; but every business man would. It has everything to do with the issue of profit or loss; and in this case it takes on much more than ordinary significance. Let us look at it dispassionately and judicially; for this problem will never be understood by those who ignore it.

TRAFFIC MAINLY ONE WAY

The fearsome truth in this matter of the St. Lawrence route is that practically all traffic is one way. It is 90 per cent eastbound, so far as Canadian business is concerned. The westbound traffic has no place at all in the reckoning. The second and equally vital truth, is that the season of operation seldom extends beyond seven months. As a matter of fact, 70 per cent of the entire grain movement takes place between the last week of September and the second week of December. That is to say, shipping takes place under singular conditions as to pressure. Yet the canals have never been congested nor have they at any time been more than an incidental cause of delay.

The man who wants to look at this proposition in a judicial spirit will at once put these facts as to one-way traffic and a short season together and apply them to the question of rates. The larger the vessel the higher the operating cost and the greater the overhead. Because of one-way business, and the shortness of the operating season, the larger vessel is heavily handicapped. It can not move a sufficient volume of grain during 7 months to take care of operating expenses and 12 months of high overhead unless the rates are commensurate. It certainly could not earn a profit at lower rates than now obtain.

This is not a personal opinion, and therefore of little value. It happens to have been the specific reason why the State of New York some 25 years ago abandoned the ambitious project of a ship canal by the old Erie route and substituted a barge canal. The scheme had been approved by the legislature and the necessary money had been voted, but Colonel Symmons, who was placed in charge of construction, took advice from competent quarters and proved conclusively three things: First, that ocean-going ships could not be operated at all through an inland canal system; second, that transportation by large vessels under the conditions which obtained would inevitably result in higher tolls for the reasons just indicated; and, third, that the cost of the canal would be enormously above the estimate.

The Erie proposition of 1902 was on all fours with the St. Lawrence scheme now under consideration. The conditions are identical in every respect. New York State had been overwhelmed by an agitation for a ship canal, and the propagandists carried everything before them, including the legislature. But when Colonel Symmons got through the

scheme was not only dead, but has never been even hinted at since. In particular the idea of making ocean ports on the Great Lakes perished beyond resuscitation. Anybody in Canada who doubts what has here been said would do well to send to Albany for a copy of Colonel Symmon's reports. We ought not to want to go into a similar costly undertaking blind to incontrovertible facts.

And now we come to the very marrow of this important matter. It is the international aspect. All other considerations lose weight when it has been given its appropriate place and value. To begin with, and as has been already said, the St. Lawrence proposition did not originate in Canada. It came from the United States. Frankly, however, that does not matter. If the project is meritorious, and would serve Canadian interests, the fact that it was urged upon us by our neighbors across the line should not arouse prejudice.

But the origin of the scheme is nevertheless suggestive. It very clearly indicates that our neighbors had a definite and selfish object in view. That object, obviously, was not increased transportation facilities by way of the St. Lawrence. They have more than they could possibly need for the next century; for it must be remembered that the United States can not much longer continue to export wheat. The urge was water power. Canada has abundance. So large is the undeveloped supply on this side of the line, and so accessible, that no one would have thought of turning to the St. Lawrence for economic reasons until other resources, capable of being developed at much lower cost, had been exhausted.

HUNGRY FOR CHEAP POWER

In particular, the Eastern States are short of water power, and that is why the New York Times, in discussing this very project in September last, spoke frankly of that section of the country as being "hungry for cheap power." These Eastern States had seen their control of the pulp and paper industry pass to Canada, and they naturally cast covetous eyes on the latent possibilities of the St. Lawrence. Transportation had absolutely nothing to do with their interest in the matter. Thus it came about that Canada was approached with this canal and water-power proposition. The canal was attached as an expedient—a bait, if you will. Obviously, too, the scheme had to be international in scope and purpose. The work would have to be undertaken on a joint basis, and administered in the same way.

Quite apart from what may happen as between the United States and Canada in this matter, is the attitude of the Province of Quebec and the Province of Ontario in relation to their rights in the St. Lawrence. Hon. Mr. Taschereau has already made his position clear as respects the Province of Quebec, and Hon. Mr. Ferguson, Premier of Ontario, has done the same thing. The latter has given emphasis to the position he takes in his comments on the speech from the throne at the recent opening of the Dominion Parliament. Both these defenders of provincial interests declare that they will fight to the last ditch to prevent interference by the Dominion in the water-power rights of the St. Lawrence. The history of disputes of this nature shows quite clearly that the Provinces have been usually sustained in their claims of jurisdiction. Sir Oliver Mowat's famous streams bill case of some 40 years ago is in point, and stands as a precedent on the side of the provincial contention.

Let us calmly look at the situation as it obtains at this moment. Canada owns and administers every foot of canal in the St. Lawrence, as it does up to the northern end of Lake Huron. At that point the United States has several locks. We have one. Thus a ship may now pass from Montreal to the head of Lake Superior without for a moment being in American water. Under treaty rights, dating back to the forties, American vessels have had the use of our canals on equal terms with our own vessels, although the United States contributed nothing to the cost of our inland waterway nor to its maintenance. Our sovereignty in the St. Lawrence is therefore absolute.

THE INTERNATIONAL ASPECT

Our position would be vitally changed the moment we entered into the proposed international pact. Not only would the United States become joint owners of the St. Lawrence waterway but would also become joint administrators of it. The same thing applies to the water-power rights. More than that, under the scheme as revised in the final report of the joint board of engineers and commissioners some 9 miles of the new waterway would be in American territory. That fact is pregnant with sinister possibilities. It leaves no doubt as to the nature of the change which would be brought about. It leaves no doubt as to the completeness of our surrender of the national and important rights we now hold.

If a new canal system on the St. Lawrence were vital to the expansion of Canadian commerce or if we stood in urgent need of the water power which would be developed, and could not get it from any other source, these points might be ignored. But who could give an affirmative answer to those two questions? Certainly not any Canadian who is familiar with the facts of the case. Nothing whatever has arisen to justify the sacrifice Canada would be called upon to make. Every factor of gain would go to the other party in the bargain. Can there be any doubt of that?

If the United States has everything to gain in this proposed pact, and Canada has much to lose, there are still other cogent reasons why we should move cautiously. Looking ahead, it is clear that equality of ownership and administrative powers is the only basis which could be adopted. At all events, it is the only one which has been suggested or considered. What would be our position after the agreement in that regard had been executed? In the event of a dispute, either one party or the other would have to compromise or a deadlock would result. Every sensible and prescient Canadian ought to clearly realize what that means—what even a deadlock might mean. Let us see.

Who would suggest, for example, that an agreement could be drawn up which would be so perfect as to anticipate every contingency that might arise? At the outset Canada could not ask for any considerable allotment of water power, because she has about all she needs, with immense development under way. Let it be assumed that under such conditions the larger share should go to the United States. In subsequent negotiations, even a deadlock would insure the retention of the original assignment to the United States. This is no more than an example of what might occur.

But that view is subordinate to all the possibilities which might arise under the play of three forces which could not be excluded. They are industrial rivalry, greed for profits, and politics. No one can doubt that the United States is Canada's most powerful competitor in trade. With rivalry, profits, and politics at all times in the equation, no one may say what would happen, and the time to give due weight to all the factors in the situation is before the bargain is sealed rather than after. At present Canada holds a sovereign position in the St. Lawrence. Once the river and its improvements had passed under international control, that position would be vitally changed.

In our entire history as a self-governing people no issue has arisen of an international nature comparable in gravity to this proposed St. Lawrence development. The monetary aspect should be sobering; but it must have been a common discovery that the moment the figures run into hundreds of millions they lose all significance to the average citizen. That is most unfortunate, since a huge addition to our national liabilities is precisely the opposite to what all forward-looking men know to be expedient. Even if the need for increased transportation facilities by water were genuine and urgent no man who has calmly thought about our heavy obligations would feel that we could afford the outlay. We can not.

THE LAST WORD IN FOLLY

Canada has bright prospects. Not another country in the world may look forward with an equal degree of hope and confidence. In the very nature of things there will be heavy calls upon our resources for further capital expenditure; and every dollar so spent will delay the time when we can arrest the diversion of taxes from the Public Treasury to productive enterprises. But to lay out several hundred millions in something we do not need would be the last word in folly.

It seems to be our fate, however, to forever be moving at cross purposes. We have built a new Welland Canal, which will enable deep-draft vessels to take their cargoes as far east as Kingston or Prescott; and the logical course would be to transfer there to smaller craft. To take a big vessel through the canals would be uneconomical. But this new proposition would at once take away our present advantage. If ships did not pass directly to Montreal, why build a larger channel which we would never use?

We are also building the Hudson Bay Railway. Every bushel of grain which went out by way of the St. Lawrence would be lost to that route. Moreover, the construction of the Panama Canal has made an important change as to Alberta wheat, which now goes out almost entirely via Vancouver. Therefore Alberta is not interested any longer in the St. Lawrence route. Manitoba and Saskatchewan are committed to the Hudson Bay outlet. These facts should be remembered when we are asked to go into a project of an exceedingly costly nature, and with tremendous possibilities as to international complications. At all events, we had better give the closest possible consideration to every aspect of the matter before we come to a decision. We can not afford to blunder into it blindly, as we did in the case of the Grand Trunk Pacific 24 years ago, and are still paying for our lack of prudence.

MISSISSIPPI RIVER BRIDGE

Mr. BROUSSARD. Mr. President, I ask that the Senate proceed to the consideration of Senate bill 2449, for the construction of a bridge across the Mississippi River at Baton Rouge, La.

Mr. CURTIS. Is it in regular form?

Mr. BROUSSARD. It is recommended by both the Agricultural Department and the Secretary of War, and is unanimously reported by the committee.

Mr. CURTIS. I have no objection.

The Senate, by unanimous consent, proceeded to consider the bill as in Committee of the Whole.

The bill had been reported from the Committee on Commerce with amendments, on page 2, line 7, after the word "begun," to strike out "in not less than" and insert "within"; in line 8, after the word "completed," to strike out "in not less than" and insert "within"; in line 13, after the word "bridge,"

to insert "and interest on the investment as provided in section 3 thereof"; on page 3, line 20, after the words "and by," to strike out "Secretary of War and the"; in line 24, after the words "by the," to strike out "Secretary of War and the"; on page 5, line 16, after the name "Secretary of War," to strike out "that the rates of toll to be charged for the use of said bridge shall be subject to approval by the Louisiana Highway Commission and by the Secretary of War; and"; in line 19, after the word "from," to strike out "such"; on page 7, line 19, before the name "Secretary of War," to strike out "Louisiana Highway Commission and by the"; in line 20, before the word "ferriage," to insert "maximum," and in the same line, after the word "rates," to strike out "charged" and insert "as provided in the franchise in effect," so as to make the bill read:

Be it enacted, etc., That authority is hereby granted the Louisiana Highway Commission to construct, maintain, and operate a highway bridge, or a combination highway and railroad bridge, with necessary approaches thereto, across the Mississippi River, at a point suitable to the interests of navigation, at or near the city of Baton Rouge, in the parish of East Baton Rouge, and a point opposite thereto in the parish of West Baton Rouge, both in the State of Louisiana, in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906: *Provided*, That the construction of such bridge shall be begun within two years and completed within five years after the date of approval of this act.

SEC. 2. That if tolls are charged by the Louisiana Highway Commission for the use of such bridge, the rates of toll shall be so adjusted as to provide a fund sufficient to pay the cost of maintaining, repairing, and operating the bridge and interest on the investment, as provided in section 3 thereof, and provide a sinking fund sufficient to amortize the cost of its construction, exclusive of any Federal funds paid thereon, as soon as possible under reasonable charges, but within a period of not to exceed 25 years from the completion thereof. After a sinking fund sufficient to pay the cost of constructing the bridge shall have been provided, such bridge shall thereafter be maintained and operated free of tolls, or the rates of toll shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper care, repair, maintenance, and operation of the bridge. An accurate record of the cost of the bridge and its approaches, the expenditures for operating, repairing, and maintaining the same, and of the daily tolls collected shall be kept, and shall be available for the information of all persons interested.

SEC. 3. That the authority to construct the bridge and approaches thereto hereby granted may be transferred or assigned by the Louisiana Highway Commission to any person, company, or corporation after advertisement a sufficient time previously for sealed proposals respecting same to be submitted to said commission. All such bids received shall be publicly opened and read by the Louisiana Highway Commission, and any such transfer or assignment shall be made only to the bidder offering the most advantageous terms from the standpoint of the public and shall be subject to the following terms and conditions, which shall be incorporated in and be made a part of the instrument by which such transfer or assignment may be made: That the transferee or assignee accepts all the terms and conditions of this act; that the plan for financing the construction of said bridge shall be subject to approval by the Louisiana Highway Commission and by the Secretary of Agriculture; that the location, plans, specifications, and estimates for the construction of said bridge shall be subject to approval by said Louisiana Highway Commission and by the Secretary of Agriculture; that the construction of said bridge by such transferee or assignee shall be by contract let to the lowest responsible bidder with the approval of the Louisiana Highway Commission after due public advertisement; that during the construction of said bridge all work shall be subject to inspection and approval by the Louisiana Highway Commission; that the transferee or assignee shall not encumber said bridge by the issue of stock, bonds, notes, mortgages, or other evidence of indebtedness in an amount which, including all previous encumbrances whether retired or still outstanding, shall exceed in the aggregate the contract cost of its construction plus 10 per cent; that any encumbrance of whatever nature placed against said bridge shall contain a provision making same subject to call at par plus accrued interest at any time after five years; that the State of Louisiana, acting by and through the Louisiana Highway Commission, shall have the right upon six months' written notice to acquire said bridge at any time after completion of its construction on a basis of cost not to exceed the amount of such encumbrances outstanding on the date of such acquisition by the State; that six months after receipt of such written notice the transferee or assignee shall convey to the State of Louisiana all right, title, and interest in said bridge on the payment or assumption by the State of such encumbrances then outstanding and unpaid; that neither such transfer or assignment nor the rights thereunder granted will be voluntarily transferred or assigned by such transferee or assignee without the written approval of the Louisiana Highway Commission, and any successor to or assignee of the rights of the original transferee or assignee hereunder, whether by voluntary transfer, judicial sale, foreclosure sale, or otherwise, shall be subject to all the conditions of the original transfer or assignment from the Louisiana Highway Commission and also subject to all the provisions and conditions of this act to the same extent as though such successor or assignee were the original transferee or assignee hereunder; that the expenditures for operating, repairing, and maintaining the bridge shall be subject to approval by the Louisiana Highway Commission, and an accurate record of such expenditures and of the daily tolls collected shall be kept and shall be available to the Louisiana Highway Commission and to the Secretary of War; that the proceeds from tolls shall be used, first, to pay the maintenance, repair, and operation costs; second, to pay not to exceed 7 per cent in dividends or interest on outstanding stock, bonds, notes, mortgages, or other obligations legally incurred against said bridge; and, third, one-half of any funds then remaining shall be retained by the transferee or assignee and the other one-half thereof shall be paid into the State treasury and be credited to a sinking fund to be used by the State in acquiring said bridge, and the Louisiana Highway Commission shall at any time have the authority to utilize any portion of said sinking fund for the purpose of purchasing and retiring any of said stock, bonds, notes, mortgages, or other outstanding obligations legally incurred against said bridge. After all stock, bonds, notes, mortgages, or other obligations legally incurred against said bridge shall have been retired, or a sinking fund sufficient for their retirement shall have been provided, such bridge, the approaches thereto, and all appurtenant structures shall immediately become the property of the State of Louisiana, without cost or expense to the State, and shall thereafter be maintained and operated free of tolls, and the right, title, and interest of such transferee or assignee herein shall then cease and determine.

SEC. 4. That in the event a combination highway and railroad bridge shall be constructed, the authority to construct the same as hereby granted may be transferred or assigned by the Louisiana Highway Commission in the manner prescribed in section 3 hereof and, except as hereinafter otherwise provided, all of the terms and conditions set forth in said section shall apply to the portion of such bridge to be used for highway traffic. Within 90 days after the completion of such bridge the transferee or assignee shall file with the Louisiana Highway Commission and with the Secretary of War a sworn itemized statement showing the actual cost of its construction and the part of such cost properly chargeable against the portion of the bridge to be used for highway traffic and against the portion thereof to be used for railroad traffic, respectively; and, at any time within one year after completion of the bridge, the Secretary of War shall investigate the statement of cost filed by the transferee or assignee and for such purpose shall be given access to all records in connection with the construction of the bridge. The findings of the Secretary of War as to the actual cost of the bridge and as to the part of such cost properly chargeable against the highway portion of the bridge and the part thereof chargeable against the railroad portion of the bridge shall be conclusive, subject only to review in a court of equity for fraud or gross mistake. The rates of toll for use of the portion of said bridge to be used for highway traffic shall be subject to approval by the Secretary of War and shall not exceed the maximum ferriage rates as provided in the franchise in effect on the date of approval hereof for like traffic by the ferry operating between Baton Rouge and Port Allen, and the proceeds from tolls collected from traffic over the highway portion of said bridge shall be used in the manner prescribed in section 3 hereof. When a percentage of the encumbrances incurred against such bridge in accordance with the provisions of this act equal to the percentage that the part of the cost of the bridge properly chargeable against the highway portion thereof is of its total cost, as finally determined by the Secretary of War, shall have been retired from the proceeds of tolls collected from highway traffic, or a sinking fund sufficient for the retirement thereof in full shall have been provided, the portion of such bridge used for highway traffic, the highway approaches thereto, and appurtenant structures, shall become the property of the State of Louisiana, without cost or expense to the State and shall thereafter be maintained and operated free of tolls, or the rates of toll for the use of such portion of the bridge shall thereafter be so adjusted as to provide a fund of not to exceed the amount necessary for the proper care, repair, maintenance, and operation of such portion of the bridge and its approaches; and the right, title, and interest of such transferee or assignee therein shall then cease and determine.

SEC. 5. The term "Louisiana Highway Commission," as used herein, shall include its legal successor or successors; and the term "bridge," as used herein, shall be construed to include approaches and other necessary appurtenant structures.

SEC. 6. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MISSOURI RIVER BRIDGE, NEBRASKA

Mr. HOWELL. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of House bill 5679, authorizing the Nebraska-Iowa Bridge Corporation, a Delaware corporation, its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River between Washington County, Nebr., and Harrison County, Iowa.

Mr. CURTIS. Is it in the regular form?

Mr. HOWELL. It is.

The VICE PRESIDENT. Is there objection to the request of the Senator from Nebraska?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and the Senate (at 5 o'clock p. m.) adjourned until to-morrow, Tuesday, February 28, 1928, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate February 27, 1928

MEMBER OF FEDERAL BOARD FOR VOCATIONAL EDUCATION

Perry W. Reeves, of Indiana, to be a member of the Federal Board for Vocational Education for the unexpired term of three years from July 17, 1926, vice Harry L. Fidler.

ASSOCIATE JUSTICE SUPREME COURT OF DISTRICT OF COLUMBIA

Peyton Gordon, of the District of Columbia, to be associate justice, Supreme Court, District of Columbia, vice A. A. Hoehling, resigned.

UNITED STATES MARSHAL

Oscar P. Cox, of Hawaii, to be United States marshal, district of Hawaii. A reappointment, his term having expired.

CONFIRMATIONS

Executive nominations confirmed by the Senate February 27, 1928

ASSISTANT SECRETARY OF THE TREASURY

Seymour Lowman to be Assistant Secretary of the Treasury.

MEMBER OF UNITED STATES CUSTOMS COURT

William J. Tilson to be a member of the United States Customs Court.

UNITED STATES COAST GUARD

James F. Hottel to be captain.
Michael J. Ryan to be commander.
James Pine to be commander.
Edward M. Kent to be constructor.
Lucien J. Ker to be commander (engineering).
Robert C. Ward to be chief carpenter.

UNITED STATES ATTORNEY

John R. Watkins to be United States attorney, eastern district of Michigan.

POSTMASTERS

COLORADO

Emma B. Champie, Kersey.
Royden G. Girling, Lazear.
J. Harry Mallot, Mount Harris.

CONNECTICUT

Walter M. Slocum, New London.

HAWAII

Bert D. Chilson, Hilo.

ILLINOIS

Sibyl J. Stanley, Keithsburg.

KANSAS

Susie W. Rhine, Gove.

KENTUCKY

Anna M. Siske, Allensville.

MAINE

William Osborne, jr., Danforth.

MICHIGAN

Elmer C. Clute, Harrison.

NEW HAMPSHIRE

Charles F. Southard, North Haverhill.
Joseph P. Conner, Portsmouth.

NEW YORK

Jennie M. Steinhilber, Beaver Falls.
Charles W. Dunn, Calcium.
Stanley W. Parsons, Copenhagen.

OHIO

Warren S. Myers, Dupont.

PENNSYLVANIA

Samuel A. Morrison, Delmont.

TEXAS

Joe B. Carter, Beckville.
Edith M. Bursey, Brackettville.
Willie Kennedy, Putnam.

VERMONT

Truman E. Wheeler, Lyndonville.

HOUSE OF REPRESENTATIVES

MONDAY, *February 27, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Almighty God, Thy mercy need not be graven in stone, for it has been stamped forever on the hearts of grateful men. It has transcended time, space, and light, and embraces a multitude which no one can number. Breath of our breathing, light of our gladness, and soul of all, hear us. Be with us in our aims, our ambitions, and in our dearest affections. Pardon us if we are miserly, forgive us if we are filled with pride, and spare us from becoming a victim of an evil temper. Thou who canst bind up the hurt hearts and inspire with bright hopes those who are tossed on the maddened waves of life, be Thou our way, our truth, and our life. O Thou whose wisdom we never seek in vain, be at our sides. Amen.

The Journal of the proceedings of Friday, February 24, was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed bills and joint resolutions of the following titles, in which the concurrence of the House of Representatives is requested:

S. 205. An act to authorize the Secretary of the Treasury to pay the claim of Mary Clerkin;

S. 802. An act for the relief of Frank Hanley;

S. 1103. An act permitting the withdrawal of water from White River, Ark.;

S. 1705. An act authorizing the Court of Claims to render judgment in favor of the administrator of or collector for the estate of Peter P. Pitchlynn, deceased, instead of the heirs of Peter P. Pitchlynn, and for other purposes;

S. 2007. An act to authorize the Secretary of War to pay officers and Filipinos formerly enlisted as members of the National Guard of Hawaii for field and armory training during years 1924 and 1925, and to validate payments for such training heretofore made;

S. 2227. An act for the relief of F. L. Campbell;

S. 2279. An act authorizing the Secretary of the Interior to purchase certain lands in the city of Bismarck, Burleigh County, N. Dak., for Indian school purposes;

S. 2335. An act for the relief of the National Surety Co.;

S. 2360. An act to amend section 1 of the act of Congress of March 3, 1921 (41 Stat. L. 1249), entitled "An act to amend section 3 of the act of Congress of June 28, 1906," entitled "An act for the division of the lands and funds of the Osage Indians in Oklahoma, and for other purposes";

S. 2549. An act providing for payment to the German Government of $461.59 in behalf of the heirs or representatives of the German nationals, John Adolf, Hermann Pegel, Franz Lipfert, Albert Wittenburg, Karl Behr, and Hans Dechantsreiter;

S. 2644. An act to carry out the findings of the Court of Claims in the case of the P. L. Andrews Corporation;

S. 2707. An act to provide for the classification of all unallotted land of the Klamath Indian Reservation and to reserve for forest-production purposes all land primarily adapted to the production of crops of timber;

S. 2800. An act authorizing E. K. Morse, his successors and assigns (or his or their heirs, legal representatives, and as-

signs), to construct, maintain, and operate a bridge across the Delaware River at or near Burlington, N. J.;

S. 3062. An act for the relief of Anna Faceina;

S. 3066. An act for the relief of Herman Shulof;

S. J. Res. 23. Joint resolution providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by Gen. George Rogers Clark and his army, and authorizing an appropriation for construction of a permanent memorial of the Revolutionary War in the West, and of the accession of the old Northwest to the United States on the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779;

S. J. Res. 30. Joint resolution to provide for the expenses of participation by the United States in the Second Pan American Conference on Highways at Rio de Janeiro;

S. J. Res. 31. Joint resolution to provide that the United States extend to the Permanent International Association of Road Congresses an invitation to hold the sixth session of the association in the United States, and for the expenses thereof;

S. J. Res. 33. Joint resolution authorizing the selection of a site and the erection of a memorial monument to the pioneers of the Pacific Northwest in Washington City, D. C.

S. J. Res. 72. Joint resolution to grant permission for the erection of a memorial statue of Cardinal Gibbons; and

S. J. Res. 88. Joint resolution authorizing the erection on public grounds in the District of Columbia of a stone monument as a memorial to Samuel Gompers.

The message also announced that the Senate had passed without amendment bills of the House of the following titles:

H. R. 48. An act to erect a tablet or marker to the memory of the Federal soldiers who were killed at the Battle of Perryville, and for other purposes;

H. R. 83. An act to approve Act No. 24 of the Session Laws of 1927 of the Territory of Hawaii, entitled "An act to authorize and provide for the manufacture, maintenance, distribution, and supply of electric current for light and power within Hanapepe, in the District of Waimea, island and county of Kauai";

H. R. 482. An act to provide relief for the victims of the airplane accident at Langin Field, Moundsville, W. Va.;

H. R. 3144. An act for the relief of Augustus C. Turner;

H. R. 5925. An act for the relief of the Fidelity & Deposit Co. of Maryland;

H. R. 8281. An act to provide for the withdrawal of certain described lands in the State of Nevada for the use and benefit of the Indians of the Walker River Reservation;

H. R. 8282. An act to provide for the permanent withdrawal of certain lands bordering on and adjacent to Summit Lake, Nev., for the Paiute, Shoshone, and other Indians;

H. R. 8291. An act to amend section 1 of the act of June 25, 1910 (36 Stat. L. 855), "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes";

H. R. 8292. An act to reserve 120 acres on the public domain for the use and benefit of the Koosharem Band of Indians residing in the vicinity of Koosharem, Utah;

H. R. 8527. An act for the relief of the International Petroleum Co. (Ltd.), of Toronto, Canada;

H. R. 9037. An act to provide for the permanent withdrawal of certain lands in Inyo County, Calif., for Indian use; and

H. R. 9994. An act to reimburse certain Indians of the Fort Belknap Reservation, Mont., for part or full value of an allotment of land to which they were individually entitled.

The message also announced that the Senate had passed with amendments bills of the following titles, in which the concurrence of the House is requested:

H. R. 2808. An act for the relief of Ella G. Richter, daughter of Henry W. Richter; and

H. R. 3145. An act for the relief of Willis B. Cross.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10635) entitled "An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1929, and for other purposes."

ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 5501. An act authorizing the Hermann Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Hermann, Gasconade County, Mo.;

H. R. 5502. An act authorizing the Washington-Missouri River Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Washington, Franklin County, Mo.;

H. R. 5722. An act authorizing the Rogers Bros. Co., its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Ashland, Ky.;

H. R. 6639. An act authorizing the Centennial Bridge Co. of Independence, Mo. (Inc.), its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Liberty Landing, Clay County, Mo.;

H. R. 6991. An act authorizing the erection of a nonsectarian chapel at the Army medical center in the District of Columbia, and for other purposes;

H. R. 8106. An act authorizing F. C. Barnhill, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Arrow Rock, Saline County, Mo.; and

H. R. 8107. An act authorizing Frank M. Burruss, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Miami, Saline County, Mo.

CONFERENCE REPORT—TREASURY AND POST OFFICE DEPARTMENTS APPROPRIATION BILL

Mr. MADDEN, from the Committee on Appropriations, filed conference report on the bill (H. R. 10635) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1929, and for other purposes, which was ordered printed.

REREFERENCE OF A BILL

The SPEAKER. The Chair would like the attention of the gentleman from Tennessee [Mr. GARRETT].

The bill (S. 1347) to amend an act entitled "An act to provide relief in cases of contracts connected with the prosecution of the war, and for other purposes," approved March 2, 1919, as amended, was referred by the Chair to the Committee on Military Affairs, it being an amendment of a bill originally reported out by the Committee on Military Affairs. However, the Chair finds that a substantially similar bill last year was considered by the Committee on Mines and Mining. The Chair has consulted the chairman of the Committee on Military Affairs, and he approves of the rereference of the bill to the Committee on Mines and Mining, and, without objection, this will be done.

Mr. GARRETT of Tennessee. I understand, Mr. Speaker, that some hearings were held on the bill by the Committee on Mines and Mining at the last session.

The SPEAKER. The bill was considered and hearings were held by the Committee on Mines and Mining at the last session.

Mr. MADDEN. Mr. Speaker, is this the bill under which we provided for the production of certain classes of minerals during the war?

The SPEAKER. Yes.

Mr. MADDEN. Was not that reported originally by the Committee on Mines and Mining?

The SPEAKER. No; it was originally reported by the Committee on Military Affairs.

Mr. TILSON. It was originally known as the Dent Act.

Mr. MADDEN. Yes; the bill providing for the adjudication of it was known as the Dent Act, but I thought the bill originally came from the Committee on Mines and Mining.

The SPEAKER. The bill was considered last year by the Committee on Mines and Mining and that committee held hearings upon it. The Committee on Military Affairs was not claiming jurisdiction at that time. Without objection, the bill will be rereferred to the Committee on Mines and Mining.

There was no objection.

FARMERS' PRODUCE MARKET

Mr. ZIHLMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 8298) authorizing acquisition of a site for the farmers' produce market, and for other purposes; and pending that motion I ask unanimous consent that general debate on this bill be limited to one hour, one-half to be controlled by the gentleman from Texas [Mr. BLANTON] and the other one-half by myself.

The SPEAKER. The gentleman from Maryland moves that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 8298, and pending that asks unanimous consent that general debate be limited to one hour, one-half to be controlled

by himself and one-half by the gentleman from Texas? Is there objection?

Mr. BLANTON. With the understanding, Mr. Speaker, of course, that in justice to those who are against the bill we will yield them half the time; in other words, we will yield on each side both to those who are for and against the bill; otherwise it would not be just.

Mr. CHINDBLOM. Is the gentleman from Texas for the bill

Mr. BLANTON. There are three different bills. I am for one of them. I am backing the committee. I propose to yield half of my time to those with whom I do not agree.

The SPEAKER. Does the gentleman from Maryland so modify his request?

Mr. ZIHLMAN. I so modify it, Mr. Speaker.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 8298, with Mr. BEEDY in the chair.

The Clerk read the title of the bill.

Mr. ZIHLMAN. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

Mr. DYER. I object, Mr. Chairman.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Commissioners of the District of Columbia be, and they are hereby, authorized and directed to acquire by purchase or by condemnation, or partly by purchase and partly by condemnation, as they may deem best, the whole of squares Nos. 354 and 355, as shown on the plat books in the office of the surveyor of the District of Columbia, and when same shall have been acquired to close to public occupation and use as a street all of F Street SW., within the adjacent curb lines of Tenth and Eleventh Streets SW., the area of said squares and the portion of F Street SW., when same shall have been acquired and closed, to be used and occupied by the District of Columbia as and for the purposes of a wholesale farmers' produce market.

For the purposes of such acquisition, including all necessary expenses incident thereto and for the clearing and leveling of the ground and the erection thereon of protecting sheds and suitable stands and stalls, and the installation of sanitary conveniences and necessary heating and telephone service, the sum of $300,000, or so much thereof as may be necessary, is hereby authorized to be appropriated out of and charged against the general funds not otherwise appropriated in the Treasury of the United States and against the revenues of the District of Columbia in the same proportion and to be paid in the same way and manner as are other appropriations to cover the expenses of operation and government of the District of Columbia.

And the said Commissioners of the District of Columbia are hereby authorized to make, promulgate, and enforce all appropriate rules and regulations for the control and operation of such market when established, and may establish a reasonable scale of charges to be paid by farmers and others making use of the market or of any of its appurtenant facilities.

Mr. ZIHLMAN. Mr. Chairman, I yield five minutes to the gentleman from New York [Mr. STALKER].

Mr. STALKER. Mr. Chairman, ladies and gentlemen of the committee, in the Sixty-ninth Congress we passed a bill (H. R. 15668) authorizing the Commissioners of the District of Columbia to negotiate for the acquirement of a site for the farmers' produce market, at a cost not to exceed $600,000, and to report to Congress with their recommendation not later than December 15, 1927.

In accordance with that mandate of Congress the commissioners held hearings during the month of October and recommended the site now designated in my bill and known as southwest site No. 1. A part of their report says:

> In the opinion of the commissioners the first choice for a permanent farmers' market, if the decision must be made at this time, under the present conditions and as indicated by the evidence before them, would be southwest site No. 1.

There has been a good deal of lobbying against southwest site No. 1 on account of the traffic situation. I want to read a letter dated July 27, 1928, signed by Mr. Moore, chairman of the Commission of Fine Arts. It is as follows:

> THE COMMISSION OF FINE ARTS,
> INTERIOR DEPARTMENT BUILDING,
> *Washington, January 27, 1928.*
>
> Mr. WRISLEY BROWN,
> *President The Washington Market Co.,*
> *Four-and-a-half and D Streets SW., Washington, D. C.*
>
> MY DEAR MR. BROWN: As requested by you, I am writing to say that the legislation providing for the elimination of grade crossings within the District of Columbia was designed to permit the use of the lands in southwest Washington for commercial purposes. The plans of 1901 for the improvement of the city of Washington recognized this situation, and in the treatment of the Mall provision was made for the crossing of that space by north and south bound traffic. Nothing in these plans and nothing in any subsequent plans has changed that situation. On the contrary, provision was made for an open plaza on the west of the Capitol at Second Street, for the opening of Ninth Street through the Mall, and also for the opening of Fifteenth Street. These plans are still being adhered to.
>
> Yours very truly,
>
> CHARLES MOORE, *Chairman.*

That takes care of the argument as to whether or not the southwest site is suitable for commercial purposes. Therefore I introduced H. R. 8298 on January 4, 1928, authorizing the Commissioners of the District of Columbia to purchase the whole of squares Nos. 354 and 355 for the purpose of a wholesale farmers' produce market.

The farmers' market is and always has been essentially a wholesale market, an integral part of the wholesale food-distribution system of the city of Washington, although it does a comparatively small retail business as a side line. No large city in modern times has found it practicable to locate its wholesale market district with relation to its center of population. For economic reasons the wholesale markets are located at the rail and water terminals, in order to save the heavy haulage, rehandling, and spoilage costs, which naturally must be passed on to the ultimate purchasers. It is highly important to establish a concentrated wholesale food area, where the buyers for market stores, hotels, restaurants, and other large users of perishable products may coordinate their buying on an economical basis, with a minimum expenditure of time. A scattered wholesale market must necessarily increase the cost of doing business to the dealers and the cost of living to the consumers. It should be noted that the bulk of the buyers who sustain the farmers' market and the wholesale market supply houses strongly urge the location of the wholesale market district in the southwest section.

There is a large and growing volume of perishable freight brought to Washington by water transportation and unloaded at the steamboat wharves in southwest Washington.

To the most superficial observer it is obvious that it would be an economic blunder to separate the farmers' market from the aggregation of wholesale market supply houses. If all the elements of the wholesale-market system—including the farmers' market—were located at the rail and water terminals of southwest Washington, there would be a substantial saving in haulage, rehandling, and spoilage costs, which naturally must be passed on to the ultimate purchaser of perishable food products. In such a concentrated food area the buyers for market stores, hotels, restaurants, and other large users of perishable products could coordinate their buying and distribution operations on the most economical basis. A scattered wholesale market must necessarily increase the cost of doing business to the dealers and the cost of living to the consumers. This is why the wholesale buyers generally, who support the farmers' market and the wholesale market supply houses, have urged the location of the complete wholesale market district in the water-front area.

The southwest site is just one-half mile directly south of the present farmers' market, which has been established there for over 50 years. The farmers come there in the early hours of the morning when city traffic is at its lowest ebb. The southwest site is even more convenient for the farmers coming from Virginia and southern Maryland, and it would only require traveling a short distance farther on paved streets for the Maryland farmers coming from the north of the city.

It is highly significant that practically all the buyers for these stores, hotels, and so forth, have strongly urged the concentration of a wholesale food area in southwest Washington—including the farmers' market—adjacent to the rail and water terminals and the municipal fish market, where they can organize their quantity buying on an economical and efficient basis.

The north and south bound streets open to heavy traffic to and from the southwest section are Third, Four-and-a-half, Sixth, Seventh, Twelfth, and Fourteenth Streets. In addition Second, Ninth, and Fifteenth Streets are to be cut through.

Mr. BUTLER. What are we providing for in this bill?

Mr. STALKER. Only for a wholesale market.

Mr. BLANTON. If you remove the selfishness from the proposition, there is nothing left but the committee's location.

Mr. SNELL. I want to get the proposition before the House. Where is the other proposition?

Mr. STALKER. There are five other propositions.

Mr. BUSBY. Will the gentleman yield?

Mr. STALKER. Yes.

Mr. BUSBY. As I understand the proposition you are discussing, it is the wholesale market on the water front?

Mr. STALKER. That is right.

Mr. BUSBY. Is it proposed to establish in addition to that a market corresponding with the present Center Market?

Mr. STALKER. No, sir.

Mr. BUSBY. You propose to do away with the retail Center Market and have a wholesale market only?

Mr. STALKER. Yes; there are several retail markets located now in various parts of the city.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. BLANTON. I yield the gentleman five minutes more.

Mr. BUSBY. Are any of these markets the gentleman speaks of supported by the Government as the Center Market is at the present time?

Mr. CHINDBLOM. I understand the Center Market is not involved here?

Mr. STALKER. No, sir; it relates only to the farmers' market.

Mr. BUSBY. Why do you call it the farmers' market when you are establishing a wholesale market to receive shipments from river traffic?

Mr. STALKER. This market will receive shipments from the farmers in the South.

Mr. HUDSON. Will the gentleman yield?

Mr. STALKER. Yes.

Mr. HUDSON. I suppose this legislation——

Mr. CLARKE. Mr. Chairman, may I ask the gentleman a question?

Mr. HUDSON. The gentleman can not take me off my feet.

Mr. BUSBY. I make the point of order that the gentleman from New York has the floor.

The CHAIRMAN. Does the gentleman from New York yield to the gentleman from Michigan?

Mr. HUDSON. The gentleman yielded to me and I was propounding a question when I was taken off my feet. Do I understand that in the scheme of relocating public buildings there is to be a market?

Mr. STALKER. No, sir.

Mr. HUDSON. You do not touch the Center Market?

Mr. STALKER. That will be abolished.

Mr. HUDSON. You create two markets where there is one now?

Mr. STALKER. All we do is to change the farmers' market.

Mr. HUDSON. Are they not contiguous, and would not the average person recognize them now as one market?

Mr. STALKER. Not necessarily, because one is a retail market and the other is a wholesale market.

Mr. HUDSON. It is recognized by the average person in the city of Washington as one market.

Mr. STALKER. Oh, no; the farmers' market is where you see those long sheds, covering about two blocks.

Mr. BUSBY. Mr. Chairman, will the gentleman yield?

Mr. STALKER. Yes.

Mr. BUSBY. Will there be any market similar to the retail market that is now maintained in connection with the wholesale market south of the avenue after this bill is passed?

Mr. STALKER. No.

Mr. BUSBY. And this will withdraw entirely any support to a retail market, if I understand the situation, after the passage of this bill.

Mr. STALKER. Yes; so far as the Center Market is concerned, but we already have several retail markets scattered about the city.

Mr. BUSBY. And are they maintained in any sense by the city government? Are they not privately owned and operated?

Mr. STALKER. I understand that the District owns four and that there are several privately owned.

Mr. BUSBY. They are not maintained by the Government.

Mr. STALKER. The Federal Government owns only the Center Market.

Mr. BUSBY. And it is only proposed to maintain a wholesale market by the government?

Mr. STALKER. Yes; by the city government.

Mr. CHINDBLOM. While the gentleman answered "no" to the inquiry about the future existence of Center Market, is it not a fact that this bill now before the House, H. R. 8298, has nothing to do with the Center Market or any of the other retail markets?

Mr. STALKER. It has nothing to do with any of them.

Mr. CHINDBLOM. And we are not deciding in this bill whether the Center Market will continue or not.

Mr. STALKER. That is correct.

Mr. HUDSON. But you are deciding by this legislation that the Government will help support a wholesale market.

Mr. STALKER. Yes.

Mr. HUDSON. And will not help support a retail market. Will the gentleman tell us why this Government should help support a wholesale market and withdraw its support from a retail market?

Mr. STALKER. It is necessary to maintain a wholesale market where the farmers may compete with the wholesale commission merchant; otherwise the commission merchants would have a monopoly. At present the farmers bring in 89,000 tons of produce per year and they sell to the chain stores, restaurants, the commission merchants, and the hotels.

Mr. HUDSON. If you still maintain it as a wholesale market, do you not just put it into the hands of the commission merchants to control the food prices to the consumers of this city?

Mr. STALKER. No; absolutely not. I will say this about the Center Market. There is no legislation eliminating the Center Market, but I understand there is no effort being made on the part of the merchants to continue as a group elsewhere after they are driven out of their present location. The Center Market has continually lost business on account of the limited parking space.

Mr. HUDSON. Oh, I beg leave to differ with the gentleman. I visit the Center Market and buy food there week after week, and the retail consumer does the same.

Mr. CHINDBLOM. Then you ought to maintain it.

Mr. HUDSON. Partly.

Mr. STALKER. He does not maintain it to the extent that it is profitable to the merchant.

The CHAIRMAN. The time of the gentleman from New York has again expired.

Mr. ZIHLMAN. Mr. Chairman, I yield 10 minutes to the gentleman from Maryland [Mr. GAMBRILL].

Mr. GAMBRILL. Mr. Chairman, ladies and gentlemen of the committee, this subject can hardly be discussed within the time which has been allotted to me, 10 minutes. I shall endeavor to touch upon the high points of the subject only. The proposition as presented by the bill introduced by the gentleman from New York [Mr. STALKER] is to locate the farmers' produce market in southwest Washington. We have before us here a map of the city of Washington, and I point to the place where it is proposed to locate the farmers' produce market. You will see that the Capitol stands here and the green on the map here represents the Mall, and here is the Executive Mansion and Potomac Park. This line along here is Pennsylvania Avenue. Under the building act of 1926, all of the property south of that down to this railroad line, south of the Mall, is going to be used for parking purposes and public buildings, and back of all that development and all that territory, which, let us hope, is going to be graced ultimately by public buildings of simplicity and grandeur, it is proposed to locate a farmers' produce market.

At the proper time amendments will be offered to this bill seeking to give discretion to the Commissioners of the District of Columbia to locate the farmers' market north of Pennsylvania Avenue. My own disposition is to favor a square in Eckington, square 669, on North Capitol Street on the one side, on the west, and First Street on the east, and between O and P Streets, a square which would be suitable for the farmers' market, which would be convenient to the farmers coming in from Maryland in particular when they bring their produce to the farmers' market. And let me say here that 83 per cent of the produce brought into the farmers' market comes from the State of Maryland. In conjunction with the gentleman from Maryland [Mr. ZIHLMAN], I represent 83 per cent of the farmers who bring their produce to the farmers' market.

Now, as I have time only to touch upon——

Mr. HARE. Mr. Chairman, will the gentleman yield there?

Mr. GAMBRILL. Yes.

Mr. HARE. I understood the gentleman to say that 83 per cent of the produce brought into this market is brought in by the farmers of Maryland. Is that correct?

Mr. GAMBRILL. That is correct.

Mr. HARE. What per cent of the produce sold in the city of Washington is obtained from that market?

Mr. GAMBRILL. I do not understand the question of the gentleman.

Mr. HARE. What percentage of the total produce consumed in the city of Washington is brought in by the farmers of Maryland?

Mr. GAMBRILL. I have no figures to show that.

Mr. HARE. The reason I ask that question is because I noticed a few days ago a statement that 70 per cent of the produce consumed in the city of Washington was brought in from foreign territory; that is, from other sections of the country.

Mr. GAMBRILL. I have no doubt but that that statement is correct. But we are now dealing with the location of the farmers' produce market. If we are going to discuss this question as it relates to the major market, which includes the wholesale and retail merchants and commission men, we would have to take it up in a different way.

Mr. CHINDBLOM. Mr. Chairman, will the gentleman yield?

Mr. GAMBRILL. Yes.

Mr. CHINDBLOM. Would the produce brought into the District of Columbia by rail and boat from other points and locations than the farms themselves be taken to this farmers' market?

Mr. GAMBRILL. No; it would not, and if it were used essentially as a farmers' market, 99½ per cent of it would come by trucks.

Mr. STALKER. Does the gentleman favor the Eckington site No. 1?

Mr. GAMBRILL. Yes; I favor the Eckington site. We are faced with this situation, that all agree, the Commisisoners of the District of Columbia, the Bureau of Efficiency, the National City Parking and Planning Commission, and all agree that it would be desirable to have the farmers' market located in the same vicinity as that of the wholesale commission merchants; and the wholesale commission merchants have recently acquired the right to purchase the Patterson tract on which they intend to locate, which is just east of this site which I am advocating, square 669.

Mr. STALKER. Mr. Chairman, will the gentleman yield?

Mr. GAMBRILL. Yes.

Mr. STALKER. I just want to ask the gentleman if he is aware of the fact that No. 1——

Mr. GAMBRILL. I would like to have the opportunity to go into this whole proposition for half an hour. The gentleman from Texas says the only thing back of this matter is selfish interests. Yes; and the proposition introduced by the gentleman from New York should rather be entitled a bill for the relief of the Potomac Freight Terminal Co. and the Terminal Refrigerating & Warehousing Co.

Mr. BLANTON. I expect to yield to the gentleman five minutes out of my time. Will the gentleman yield to me for a question?

Mr. GAMBRILL. Yes; certainly.

Mr. BLANTON. Mr. Chairman, I yield to the gentleman from Maryland five minutes out of my time.

Mr. GAMBRILL. I thank the gentleman.

Mr. BLANTON. I would like for the gentleman to tell us exactly his views on the southwest tract, as to why it is not the best location? In that connection, is it not a fact that by automobile you can get from there to this Capitol in four minutes

Mr. GAMBRILL. Yes.

Mr. BLANTON. That shows how easily accessible it is.

Mr. GAMBRILL. Let me answer the gentleman's argument. It is all in the record. The population of the city of Washington is about 472,000. In the northeast and in the northwest there are 380,500 people. In the southeast over here [pointing to map], which is just as close to the Eckington site as it would be to this site, there are 62,000, and only 29,000 people in southwest Washington.

Mr. WOOD. Mr. Chairman, will the gentleman yield?

Mr. GAMBRILL. Let me finish this—so that you have in the northeast and northwest 380,500 people as against 91,500 in the southeast and southwest, and there is only 6 per cent of the population of Washington in the southwest district.

Mr. WOOD. I notice in the Post this morning a statement that the commission men say this Patterson site is merely a bluff and is for the sole purpose of speculating and dealing in real estate out there and was never intended for a market site, but that the Patterson tract is intended for another purpose. What does the gentleman say about that?

Mr. GAMBRILL. I am not here representing the commission merchants and can not speak for them. But I understand they have put up $40,000 as an evidence of their good faith respecting the purchase of the Patterson tract, and the papers are in escrow for the completion of the purchase.

Mr. WOOD. There is no water front and no railroad there.

Mr. GAMBRILL. The gentleman is mistaken. The tract is served by the Baltimore & Ohio and by the Pennsylvania Railroad.

Mr. WOOD. There is no water front there.

Mr. GAMBRILL. I am not advised as to that. Do I understand the gentleman from Indiana to say that there is no water conveniences to the tract on Florida Avenue?

Mr. LANKFORD. Water front.

Mr. GAMBRILL. Oh, that is different. I will say to the gentleman from Indiana regarding water front that the equivalent of only about 577 cars, or 8 per cent of the total shipments into Washington of perishable fruits and vegetables, came by water last year, so that the water proposition is negligible.

Mr. WYANT. Mr. Chairman, will the gentleman yield?

Mr. GAMBRILL. Yes.

Mr. WYANT. Large sums of money for water transportation are being expended, and does not the gentleman think that this would put the Potomac to some useful purpose?

Mr. GAMBRILL. There was an idea when the fish market was located on the water front that the fish would come right up to the fish market located on Water Street. [Laughter.] The statistics show that 80 per cent of the fish brought to market on Water Street came by truck, so that it is a fact that the fish caught in the Potomac and down the Chesapeake Bay are not shipped by water, which would require two days' transportation, but are immediately put upon trucks and hauled to Washington. Eight per cent of the population is located on this tract, and the physical conditions are such that it can not conveniently supply the hotels and boarding houses of the northeast and northwest, 130 in number, whereas in the southeast there are but 3, and in the southwest none.

Mr. DEMPSEY. Mr. Chairman, will the gentleman yield?

Mr. GAMBRILL. Yes.

Mr. DEMPSEY. What are the relative conditions of the railroads in the two sites? How many railroads go into the Stalker site, and how many into the one the gentleman favors?

Mr. GAMBRILL. The southwest site is served by the Pennsylvania Railroad, and the Eckington site may be served by both the Pennsylvania and the Baltimore & Ohio. If the farmers' market were located in the Patterson tract, then that section would be served by both railroads.

Mr. DEMPSEY. Would not the Stalker site be served over the line of another railroad by five of the railroads which come into the city, and only one railroad come into the other site?

Mr. GAMBRILL. A good many of the railroads which come from the South have their terminal at the Potomac yards, where the freight is "broken" and then hauled over the Pennsylvania Railroad to the Fourteenth and B Streets yard of the Pennsylvania Railroad. I have statistics here and a report from the Interstate Commerce Commission to the effect that the rates would be the same on the Eckington site as to the southwest site, regardless of where the shipments come from or who made the shipments.

Mr. LAGUARDIA. How about trucking from the railroad to the market?

Mr. GAMBRILL. If it came in on the Pennsylvania Railroad, then it would be shunted around to the Baltimore & Ohio Railroad, and vice versa.

Mr. LAGUARDIA. I understand that the site covered by the Stalker bill is accessible to all railroads coming into the District of Columbia; is that correct?

Mr. GAMBRILL. No; it is not.

Mr. DEMPSEY. All but one. Five out of six, and it would be 21 miles longer to the other site.

Mr. GIBSON. Will the gentleman yield?

Mr. GAMBRILL. I yield to the gentleman from Vermont.

Mr. GIBSON. Fifty-five per cent of the carload shipments made to the city of Washington by rail come from the North and East over the Baltimore and Ohio, and only 45 per cent comes over the railroads from the South.

Mr. GAMBRILL. That is true; and all shipments from the West come through the great centers of St. Louis and Chicago, and they are brought into Washington over the Pennsylvania Railroad and the Baltimore & Ohio.

Mr. GREEN of Florida. Will the gentleman yield?

Mr. GAMBRILL. Yes.

Mr. GREEN of Florida. But that does not take into consideration all of the fruits and vegetables shipped to the District and consumed in the District. More than half, probably, is shipped in from the North, but that does not represent all of the farm products.

Mr. GAMBRILL. I will go into that question if I am allowed further time. Thirty-four per cent of the shipments of perishable fruits and vegetables come into Washington over the Baltimore & Ohio Railroad and those shipments are unloaded at Eckington.

Mr. WYANT. In the event that perishable fruits could be shipped over any of the five railroads from the South to Washington, would there not be an additional amount charged in having them sent to Eckington, and would there not be a delay of probably 10 or 12 hours in Washington on perishable goods?

The CHAIRMAN. The time of the gentleman from Maryland has again expired.

Mr. GAMBRILL. Will the gentleman from Maryland yield me five additional minutes?

Mr. ZIHLMAN. I will say that I have not any time on that side.

Mr. GAMBRILL. Will the gentleman from Texas yield me five minutes?

Mr. BLANTON. I am sorry, but I have not the time. I would, but I have promised all of the time.

Mr. Chairman, I yield myself two minutes.

Gentlemen, so far as the Center Market is concerned, which is a retail market and also a wholesale market contiguous to it, that is being torn down now and another one must be established. Since 1907 there has been a wholesale fish and oyster market where we are proposing to establish this market. It is not only wholesale but it is retail. Everybody who wants to goes down there after their fish and oysters when they do not want to pay city prices, and they get them at wholesale. You also go down there for some of your vegetables, because there are some vegetables that come in on boats on sale there in connection with the fish and oyster market. The gentleman from Michigan [Mr. HUDSON] said he had been down there and all of us go down there very frequently after our fish and oysters and get them at cheaper prices. You can easily go where we are going to try to place this market within a few minutes by car.

Your subcommittee—and I was not on it—carefully investigated this matter. They took into consideration every selfish interest that was trying to unload land on the Government. After a careful consideration of several weeks they decided to locate this market in the southwest, where it is easily accessible to everybody. It is only a four minutes' drive from the Capitol and it is easily accessible to every farmer who brings farm products here. It is easily accessible to railroad transportation and water transportation, and you will save anywhere from $300,000 to $500,000 in initial cost and have plenty of room. You have more parking space and you have your traffic problem solved if you put it where your subcommittee is trying to put it.

When the Stalker subcommittee made its report to the full committee there were 4 members out of 21 members who voted against adopting this site reported as being the proper site by the subcommittee, and I hope you will place it where your committee has carefully considered it should be placed. If you do this, you will eliminate all of the selfish interests, and if you adopt this site you will give the people a proper location at a proper place and at low cost. [Applause.]

Mr. Chairman, I yield three minutes to the distinguished lady from New Jersey [Mrs. NORTON]. [Applause.]

Mrs. NORTON of New Jersey. Mr. Chairman and members of the committee, I arise in support of this bill (H. R. 8298), having fully considered all of the sites presented to the committee and believing the southwest site to be the most logical and best site for a farmers' wholesale market that can be found in the District.

My reasons for voting for this bill are:

First. This southwest site was recommended to the District Committee by the Commissioners of the District. It would seem to me reasonable to suppose that the District Commissioners, having the interest of the District at heart, should be the best judges of whether or not the location is a good one.

My understanding is that the commissioners held hearings in connection with the transfer of the market location, and after considerable time spent trying to solve the problem agreed that the proposed southwest site as indicated in this bill was, in their opinion, the proper location for the farmers' market.

Second. It is close to the present market site.

Third. It is a wholesale farmers' market, not retail.

Fourth. It has the advantage of being closely connected with the largest cold-storage plant in the District and with the wholesale fish market.

Fifth. It also has the benefit of six railroad lines: The Pennsylvania system from the north and west; the Chesapeake & Ohio Railroad from the west; and the Southern Railway, Atlantic Coast Line, Seaboard Air Line, and Richmond, Fredericksburg & Potomac Railroad from the south.

Being near the river front affords excellent water transportation. All of which should be of great advantage to the consumers. The facilities for delivery and distribution are better than from any other point in the District of Columbia.

I understand that no wholesaler or consumer trading in market supplies appeared at the hearing before the commissioners opposing this southwest site. All were in favor of it. Furthermore, I am informed that only a small portion of the produce sold at the farmers' market is purchased by consumers; but the same class of consumers who buy directly from the farmers also buy directly from the fish market, and they would be put to considerable disadvantage by a widely scattered market.

In a general poll of this city, conducted not long ago by the Washington Post, there were 19,307 votes cast in favor of the southwest site, 9,434 in favor of midcity, and only 59 votes in favor of Eckington, and, I believe, 82 in favor of other sites.

This newspaper poll was fairly conducted, I am advised, and expresses the public mind and position of the consumers of the city.

The CHAIRMAN. The time of the gentlewoman from New Jersey has expired.

Mr. ZIHLMAN. Mr. Chairman, I yield the gentlewoman from New Jersey three additional minutes.

Mrs. NORTON of New Jersey. I thank the gentleman. Two minutes will be quite sufficient.

The committee is informed that this site in southwest Washington can be acquired and put in condition for occupancy, as a first-class market, at a cost not to exceed $300,000, or one-half of the maximum amount specified by Congress. This is the most economical site that could be purchased as well as the best for location and delivery and distribution of food produce.

The zoning commission has already zoned all of this region of the southwest for industrial and commercial purposes, and that section, I understand, will never again be residential. Therefore, in no way would this site jeopardize the plans for the city beautiful.

In the final analysis, the purchase of a site for the wholesale farmers' market will constitute a substantial investment of the funds of the taxpayers of Washington, and the general welfare of the city at large must be the paramount consideration. [Applause.]

Mr. BLANTON. Mr. Chairman, I yield two minutes to the gentleman from Indiana [Mr. WOOD.]

Mr. WOOD. Mr. Chairman and gentlemen of the committee, I have visited all of the principal sites proposed. To my mind there is no question but what the southwest site should be selected, not only as a matter of convenience but as a matter of economy.

As a matter of convenience, it is only one-half mile away from where the market is now. The argument that it will obstruct traffic or that it will interfere with the general beauty of improvements to be made is satisfied by the report of the Fine Arts Commission, and my observation and experience with that commission is that they are about as technical a body as I have ever had to deal with.

The Government will save $300,000 if the site in the southwest is selected rather than the Eckington site. All of the sidetracks leading into this city are now built there. The cold-storage warehouses are all there. If the plant is located at Eckington, there will have to be an entirely new plant, and if my information is correct, it is purely a speculative proposition out there. This morning's Post discloses the real reason they are advocating the Patterson site as the site for the commission houses. There has not been even the commencement of a commission house out there. It is all depending on whether the wholesale market is established at that point, and they are taking options for the purpose of dealing in property speculation.

The site in the southwest has received the approval of the commissioners of this city, who gave the utmost attention and the most careful consideration to all of these sites. It is their primary business to locate this market where it will best serve the people under the most economical conditions. [Applause.]

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. ZIHLMAN. Mr. Chairman, I yield five minutes to the gentleman from Virginia [Mr. MOORE].

Mr. MOORE of Virginia. Mr. Chairman, very properly a lady always gets better attention in the House than a man, and the House listened very closely to the remarks of the lady from New Jersey [Mrs. NORTON], and should I say anything it will be hardly more than in the way of simply repeating and trying to emphasize the very strong argument which she made in favor of the adoption of the committee's report.

I do think, with great deference to my respected and distinguished friend from Maryland [Mr. GAMBRILL], whom I always dislike to separate from, that the objections to the southwest site are very fantastic. The Fine Arts Commission raises some sort of objection due to the prospect of certain buildings being erected in proximity to the proposed site, and there is some discussion of traffic conditions. Then there is an objection based upon the theory that the automobile haul may be longer for some people to the southwest than to Eckington; but the truth is that at this time the present farmers' market is only six-tenths of a mile from this southwest location. The farmers get into the present market without any difficulty, both from

Maryland and from Virginia, and they can get into the southwest market, many of them, quicker than to the present site, and all of them nearly as quickly as to the present site.

Objections of that sort are heard. But, on the contrary, what is to be considered? I do not think, for one, that the matter should be disposed of from the point of view altogether of the farmers—and the farmers are divided. Some of the farmers in Virginia would, perhaps, prefer the southwest and some would prefer the Eckington site. So far as concerns the Maryland farmers, a great many of them coming across the Anacostia bridge from Prince Georges County in my friend's district would get to the southwest site easier than to Eckington.

I think the matter ought to be broadly considered from the point of view of the interests of the public of the District of Columbia [applause], and so far as that public is concerned, it has been spoken for and its opinion is represented by the unanimous conclusion of the District Commissioners, who have told us that after a meticulous survey of all the facts that should be taken into account they have determined that the southwest site is the proper site.

Let me now stress for a moment another point. Everybody who has had to do with freight matters, who has been engaged in litigation involving the operation of railroad companies and water carriers knows that the matter of transportation is one of primary concern in dealing with a question of this sort.

There is no kind of dispute that at the southwest there is transportation by several railroad companies and at least potential water competition. So there is, first, expedition in the delivery of the goods, and, second, the potential and, to an extent, actual competition of water carriers which will assist in restraining freight rates.

As for the Eckington site, it is served by but one railroad. Suppose a tie-up occurs on that railroad, as I understand happened a few weeks ago. It is 21 miles farther to make the haul by the Baltimore & Ohio up to Eckington. If a tie-up occurs, what happens to the produce? It is more difficult to restore the road to operation up there than to restore the tracks coming in from the Potomac yards to the southwest. Meanwhile the produce has to be reiced. There are no facilities at Eckington, so far as I am informed, for reicing, and the people who ship in from the South—and the South is very largely interested, especially the trucking districts represented by gentlemen like the gentleman from Florida [Mr. GREEN]—if Eckington is selected, will be liable to embarrassment and loss which will not occur if the House accepts the committee report and fixes this market location in the southwest. [Applause.]

Mr. BLANTON. And for four months of the year we are dependent on this water transportation.

Mr. MOORE of Virginia. Yes.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. BLANTON. Mr. Chairman, I yield five minutes to the gentleman from Maryland [Mr. LINTHICUM].

Mr. LINTHICUM. Mr. Chairman and members of the committee, I am in favor of the Eckington site. Perhaps it is useless for me to tell you that. I do not know why they call it the Eckington site unless it was because there was a village of Eckington there at one time. I think it can be better brought to your minds if I call your attention to the fact that the Government Printing Office is at the corner of North Capitol and H Streets, and this site is the distance from H to P Streets. That is where we want to place it.

Now, why do we want to place it there? As my colleague, the distinguished gentleman from Maryland [Mr. GAMBRILL] has told you, we think that location is more convenient to the public at large. We think it is more convenient for the vast number of farmers who come to it; we think that it will serve the people better in that location than if it is put down along the water front far from the center of population. You know as well as I do that very few perishable articles come by water; it takes too long. If you want to bring oysters or fish here, they come by truck. If you want to bring vegetables that are perishable here, they come by truck.

Mr. LAGUARDIA. Will the gentleman yield?

Mr. LINTHICUM. Yes.

Mr. LAGUARDIA. What we are trying to find out is what is the primary purpose of this market. Is it to be a wholesale market or a retail market or both?

Mr. LINTHICUM. It is to be a farmers' wholesale market, where retailing is also done.

Mr. BLANTON. But there will be retailing done there?

Mr. LINTHICUM. Oh, yes; you will not have to buy a whole carload or a whole wagonload; they will retail, and you can buy a small lot.

Mr. LAGUARDIA. The retailer can go there as well as the wholesaler?

Mr. LINTHICUM. The retailer can go and buy articles as well as the wholesaler and much cheaper than in the stores.

Mr. COCHRAN of Missouri. Will the gentleman yield?

Mr. LINTHICUM. Yes.

Mr. COCHRAN of Missouri. I read in the report where 25 per cent of the produce sold by the farmers goes directly to the people; cutting out the middleman?

Mr. LINTHICUM. That is the fact.

Mr. COCHRAN of Missouri. And you still call it a wholesale market?

Mr. LINTHICUM. They call it a produce market, but it will be both a wholesale and retail market.

Mr. BUTLER. Will the gentleman tell us who is going to market—the man with the cart or the man with the basket?

Mr. LINTHICUM. The man with the basket can go as well as the man with the cart.

Mr. BUTLER. That is not a wholesale market.

Mr. BLANTON. Will the gentleman yield?

Mr. LINTHICUM. Yes.

Mr. BLANTON. Is it not a fact that during four months of the year most of the products we get come from the extreme South by rail and water?

Mr. LINTHICUM. I presume in the wintertime that is true. I want you to remember that 14,227 acres of land are cultivated for supplying the city of Washington, and of that number 11,572 acres are in Maryland and only 1,835 acres in Virginia. I presume that is owing a good deal to the fact that Virginia is on the other side of the river while Maryland is directly connected. There are 880 acres in the District of Columbia itself. We want to have a market where the people can get to it. If you put it along the water front you will get it entirely away from the people, whereas if you put it at North Capitol and P Streets you get it right in the midst of the people.

Just imagine the congestion in crossing Pennsylvania Avenue. When you come down at 8 or 9 o'clock you know it is difficult to get across Pennsylvania Avenue. You would have to cross there and go down to the water front. How many people do you believe are going down there just to save a little money, who want to buy for their families?

What I am particularly interested in is getting the market where the people can get to it in order that they may reduce the cost of living.

Now, in Baltimore we have several markets, and thousands go to market where they buy fresher articles and cheaper than they can in the stores. Anybody who has been through our markets knows what a great selection they have.

Mr. BLANTON. And that market in Baltimore is on the water front?

Mr. LINTHICUM. We have Center Market on the water front and a market at Lexington, Howard, and Eutaw Streets, one on Pennsylvania Avenue, another on Gay Street, and so forth, and we are building another for the northern part of the city.

The farmers of Maryland are from Montgomery and Prince Georges Counties, and they grow 85 per cent or more of the produce intended for the District of Columbia. This location would make it convenient and accessible to these farmers, whereas the other location would be rather inaccessible, approached through dense traffic and a longer route.

As I have said, my principal reason for favoring the Capital and P Street location, known as the Eckington site, is because of its nearness to the center of population. Ninety per cent of the hotels are closer to this location, as well as the vast number of boarding houses, restaurants, and buyers; 80 per cent of the retail stores are closer; in fact, it is an ideal location for this market. The fact that it will cost more to purchase this site than it does the other site—to wit, some $300,000 more—should not be considered when we are providing a market for many years to come and considering the public in the question of location.

I sincerely trust the committee will consider this matter most seriously, as it is one in which we are interested merely because we believe it to be the most advantageous from every standpoint.

The CHAIRMAN. The time of the gentleman from Maryland has expired.

Mr. BLANTON. Mr. Chairman, I yield to the gentleman from Florida [Mr. GREEN].

Mr. GREEN of Florida. Mr. Chairman and gentlemen of the committee, H. R. 8298, providing for accession of squares 354 and 355 and authorizing an appropriation for same undoubtedly should pass.

This location is what is known as the southwest location, and in my opinion the farmers' produce market should be placed in the southwest section of the city of Washington. The advantages of this site considerably outweigh the Eckington sites Nos. 1, 2, and 4. Southwest site No. 1 has superior advantages in that great railroad facilities exist and that water transportation is present. Cold-storage facilities are already available as well as railroad produce terminal on an adjacent square. The municipal fish market is already established one block away from the proposed site. This would be a convenient location for the Virginia farmers as well as all of the Maryland farmers except those coming directly from the north.

Our subcommittee has decided after careful consideration, long hearings, and careful study of the matter that the southwest site is preferable. The general area of the water front presents more and greater advantages for development than any other section of the city. Few, if any, large cities of modern times have found it practical to locate their wholesale markets with direct relation to the center of population or the geographical center of the city. The municipal fish market was established at the water front of southwest Washington by an act of March 4, 1913. It does a gross business of approximately the same volume as the farmers' market, and it is patronized by the same general class of buyers. The location of the farmers' market near the fish market would be a logical extension of market facilities. By an act of February 1, 1907, Congress authorized the establishment of a large public cold-storage plant and warehouse to cover the entire block known as square 328 in this immediate section. This is an essential facility to the perishable-food industry. By the act of June 7, 1926, Congress authorized the laying of conduits across Twelfth Street SW. to furnish refrigeration by pipe line to the area known as the Water Street terminal, containing between 8 and 9 acres of land, adjoining the railroad lines of avenue at the intersection of Water Street.

At this point the larger proportion of all perishable freight brought to the city by railway from the north, south, and west is unloaded and distributed through the wholesale and commission houses, or stored in the cold-storage warehouses as reserve supply to wait future demand. Near this terminal and the municipal fish market all the perishable freight brought to Washington by water transportation, including coastwise ships, is unloaded at the steamboat wharves. There is here the possibility of developing direct connection between railway and water.

Last year Congress provided for the extension of an inland waterway system from Washington to Jacksonville and Miami, Fla. There are quite a number of tributary streams, and when the canals are completed there will be a considerable movement of produce and fruit from the South to Washington by inland water transportation. This will be augmented when Florida's cross-State canal from Fernandina to the Gulf of Mexico is constructed. The amount of produce coming by water from the South, and Florida in particular, will ever increase as water transportation is so much cheaper. The economy of employing both railroads and waterways for transportation of perishable food will become more important with the increase of population, and it is sound economy to locate the wholesale market at the water front.

The competition thus obtaining between railway transportation and water transportation will always have a tendency to lower freight rates, and, my friends, I would have you bear in mind that no other class of people are now deserving more of economic consideration than is the great class of farmers and fruit growers. I feel that it is our duty to in every way possible lower the high freight rates that they are now compelled to pay in order to get their produce on the market. From my own State, Florida, I believe it is safe to say that taking the whole season round, half of the amount of money received for vegetables and fruits sold goes to pay freight and express charges. The cheaper freight and express charges are the less will the consuming public of the city of Washington have to pay for the farmers' products, and this is another good reason why the southwest site should be chosen.

Mr. GAMBRILL. Will the gentleman yield?

Mr. GREEN of Florida. I am sorry I have not sufficient time to yield to the gentleman.

It is true that there are people and interests in the city of Washington who prefer the northwest and northeast sites, but I would have my colleagues remember that the southwest site is only about one-half mile from the present city market; therefore those who come from the northwest with their produce would have to travel only this distance; and, as you know, the streets between the present market and the southwest site are all paved, and during the early hours of the morning when the farmers are carrying their produce to market, traffic in this section of the city is not congested. Surely it would be better for these few to travel this half mile than it would be for probably 90 or 95 per cent of the produce sold at the market to travel several miles over to the northwest site.

I feel that the interest of the States of the southeast, and Florida in particular, should be considered in the location of this market, inasmuch as we ship so much of the produce sold in this market. In 1926 Florida's crops were worth $85,805,000; in 1927, $88,676,000. Compared with the country as a whole the 1927 value of Florida crops was greater than Maryland, West Virginia, Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New Jersey, Delaware, Wyoming, New Mexico, Arizona, Utah, and Nevada. The total of the South's crops at $3,612,130,000 is nearly 40 per cent of the total value of all crops in the United States in 1927. Of course, all of Florida's crops are not sold on the market; but a large portion is sold, and a very large portion of that sold comes to the District of Columbia. During the last shipping season, from September 1, 1926, to July 31, 1927, 11 months, Florida shipped 91,002 carloads of fruit and vegetables. Thousands of carloads of fruit and vegetables are consumed at home.

Florida produced in 1926, 81 per cent of the entire Nation's production of grapefruit; eggplants, 59 per cent; table cucumbers, 41 per cent; snap beans, 38½ per cent; peppers, 61 per cent; celery, 32 per cent; tomatoes, 24 per cent; early Irish potatoes, 10 per cent. Florida produces almost all of the other common vegetables, but in a lesser percentage; therefore, my friends, it occurs to me that Florida should have something to say about where the Capital City's farmers' produce market is located. It would not be equity for these producers, producing as they are in many cases more than half of the entire Nation's production of vegetables, to be compelled to carry their produce several miles farther and pay the penalty of higher freight rates in order to accommodate a few local producers.

The citrus fruit is one of Florida's greatest industries. Florida has 274 car-lot packing houses. She has 70,000 acres planted to grapefruit trees, 50,000 of which are bearing. She has 160,000 acres planted to orange trees, 95,000 of which are bearing, different varieties producing grapefruit and oranges for the market at different times of the year. For example, the early varieties of oranges placed on the market from November to January are such as Parsons, Temples, and Enterprise; mid-season varieties from January to March, seedlings and pineapple; later varieties from March to January, Valencias, Lue Gim Gongs, and others.

Another of Florida's most lucrative products is strawberries. It furnishes the entire country with early strawberries. Plant City and other places in its vicinity begin shipping as early as November or December. My own city of Starke begins shipping a little later, and sends to Washington and other cities north of Florida millions of dollars' worth of strawberries annually. Sanford, Fla., is a great producer of celery. It is estimated that $6,000,000 worth of celery will be shipped from there this season. Nearly 2,000 carloads of celery have already been shipped from Florida this season.

Mr. Chairman and fellow Members, I heartily approve the southwest site and trust that the bill authorizing its designation, purchase, and development will pass.

Mr. BLANTON. Mr. Chairman, I yield two minutes to the gentleman from Massachusetts [Mr. UNDERHILL].

Mr. UNDERHILL. Mr. Chairman, there are undoubtedly many arguments which can be used for any one of the sites proposed to the committee, but taking the question by and large and considering each and every argument outside of the hidden one, and that is a real-estate development and the prospect of making a little off this market, the southwest site seemed to be the best site in the judgment of the committee. Out of 21 members, only 4 favor another site. As a matter of fact, and I am speaking to those who have asked particularly about a retail market, a farmers' market is not essentially a retail market. The farmer brings his produce in wagonload lots. He gets there very early in the morning, long before you or I are up, and the producers are buyers from the various distributing stores and other points, and usually the farmer sells his whole wagonload, and then it is distributed in the thousand and one stores throughout the length and breadth of the District.

As a matter of fact, you can go to these various chain stores and buy produce from those chain stores for less than you can buy it in the farmers' market itself. So that a question of price to the consumer really does not enter into this argument. The chief argument, according to my viewpoint, is the concentration of the distribution of food products in a convenient location. Already we have the fish market down there, and the packers have built two large plants down there. Put it there, and those who patronize the farmers' market and those who bring the

produce to the farmers' market in the course of six months will never know that there has been a change at all.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. BLANTON. Mr. Chairman, I yield one minute to the gentleman from South Carolina [Mr. HARE].

Mr. HARE. Mr. Chairman and gentlemen, the thing which impresses me most in the arguments in this matter is the question of economy. If a carload of strawberries, for instance, is shipped to the Potomac yards to be redirected, probably to some other point to-morrow, and the shipper learns that he is going to ship them to the District of Columbia, he will direct the car to the District. If it is in the Potomac yards, it can be drawn across the river to the southwest site, to the cold-storage plant, in 30 minutes and be placed on the market the same day and the same hour by the wholesaler. If it is to be directed to Eckington, it must be carried a distance of 21 miles, carried on two different railroad lines, subject to delay, and consequently would reach the market anywhere from 2 to 10 hours later in the day, too late to be received by the commission man to be distributed to the retailer.

The thing that impresses me most in selecting the location of a market is the arrangement to be made so that farmers or producers may receive the maximum net return for the produce and that the consumer may obtain such produce without having to pay any unnecessary or useless charges in the delivery of same. It appears to me that it would be to the advantage of both the producers and consumers to locate this wholesale farmers' produce market at the southwest site rather than at the Eckington site, and I can best assign my reasons by giving an illustration. For instance, suppose a producer from my district in South Carolina should ship a carload of cantaloupes to Potomac yards to be redirected and it should arrive there in the afternoon at 4 o'clock; suppose, then, the shipper learns from the Market News Service at 5 o'clock that there is only a limited quantity of cantaloupes in the Washington market and he directs that the car be consigned to his commission merchant in Washington. Then, as I understand, this car could be moved across the river from Potomac yards into the southwest market in a very short time, probably less than 30 minutes, the southwest market being located only a mile or so from Potomac yards; whereas if the producer directed the car of cantaloupes to his commission merchant in Washington and the wholesale market is located at Eckington, the car would then have to be forwarded over two railroad lines and a distance of at least 21 miles before it could reach the market. I do not know how much longer this would take, but I can easily see that during the time this car is being transferred from Potomac yards to the latter place the wholesale market would close, the cantaloupes would have to be held over another day when there might be considerable deterioration unless the car was thoroughly iced, and to do so might require an additional icing, which would necessarily mean an additional charge to the producer in the way of transportation, and probably an additional cost to the consumer. Therefore in the interest of the fruit, vegetable, and other farm products to be shipped from my district and in the interest of the consumers here, I shall cast my vote in support of the bill providing for the location of this market at the southwest site instead of the amendment which attempts to locate it at Eckington.

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. BLANTON. Mr. Chairman, we are entitled to close debate on behalf of the committee's bill, and we ask the gentleman from Maryland to proceed.

Mr. ZIHLMAN. Mr. Chairman, I yield five minutes to the gentleman from Vermont [Mr. GIBSON].

Mr. GIBSON. Mr. Chairman, ladies and gentlemen of the committee, this bill relates to the relocation of the farmers' produce market, a wholesale market. Without doubt all of you know the location of the Center Market. To the easterly of the Center Market is the farmers' retail market, and westerly of the Center Market is the farmers' wholesale market. The ground is to be used for the new Internal Revenue Building. It has become necessary to have it vacated, and so at the last session of Congress an act was passed providing that the commissioners should negotiate for a relocation and report back to this Congress. Whether the Congress lacked confidence in any selection by the commissioners I do not know, but Congress kept its hand on the matter, and so it is before us to-day. I have no axe to grind, have no interest to serve. I am in favor of no particular location except that I am opposed to the southwest location. [Applause in the gallery.]

Mr. BLANTON. Mr. Chairman, I ask the Chair to admonish the gallery.

The CHAIRMAN. The galleries will forego applause.

Mr. GIBSON. Mr. Chairman, my only interest is what is best for the people of the District of Columbia and the farmers who sell their produce here.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. GIBSON. Yes.

Mr. BLANTON. The gentleman is not with the committee. He is not with Mr. LAMPERT. There were 17 Members of the committee for the southwest site. The gentleman from Vermont is for another site, and the gentleman from Wisconsin [Mr. LAMPERT] is for another site.

Mr. STALKER. And he stands alone for this site.

Mr. BLANTON. Yes; and Mr. GIBSON stands alone for his.

Mr. GIBSON. Oh, no. The minority report of Mr. LAMPERT bears the names of two or three other members of the committee. The gentleman from Vermont stands on his own judgment. In answer to the suggestion of the gentleman from Texas [Mr. BLANTON], I say that a bare majority of the District Committee was present when the vote was taken to report this bill, and that his statement that the vote was 17 to 4 is not correct.

I call your attention to a few facts that are undisputed. The geographical center of the city of Washington is near the corner of Fourth and L Streets NW. The center of population is near the corner of Fifth and M Streets NW. North of Pennsylvania Avenue we have a population of 400,000, and south of Pennsylvania Avenue a population of not more than 100,000. Of the hotels and boarding houses, 130 are located north of Pennsylvania Avenue and only 3 south of it. Of the 690 restaurants, over 600 are north of the Avenue. Of the 1,764 retail grocers in the four geographical areas, 1,350 are north of the Avenue. The farmers' market should be located where all interests can be served.

Mr. HALL of Indiana. Mr. Chairman, will the gentleman yield?

Mr. GIBSON. Yes.

Mr. HALL of Indiana. Is it not true that the hotels of Washington placed before the subcommittee their desire for the southwest section?

Mr. GIBSON. About 12 of them did out of the whole 133.

Mr. BLANTON. None of them went against it?

Mr. GIBSON. I think they did.

Mr. BLANTON. Mr. Chairman, will the gentleman allow me to ask him one question?

Mr. GIBSON. The gentleman is taking up all of my time.

Mr. BLANTON. Is it not a fight by the Baltimore & Ohio Railroad and a few special interests in agreement against the committee's report?

Mr. GIBSON. Since the gentleman has asked the question, I will tell him where the fight is. In this same immediate section is a plat of land held by three trustees.

The CHAIRMAN. The time of the gentleman from Vermont has expired.

Mr. ZIHLMAN. Mr. Chairman, I yield to the gentleman three additional minutes.

The CHAIRMAN. The gentleman from Vermont is recognized for three additional minutes.

Mr. GIBSON. The plat that is set aside for the Potomac Freight Terminal Co. is controlled by three trustees. The cold-storage plant referred to in this debate is said to be controlled by the same trustees, and two of these trustees are directors of the Pennsylvania Railroad, and the third one, as I remember, is our British friend, Sir Harry Wardman. This is a fight between the people of the city of Washington and a combination seeking to control the food supplies of this city.

Mr. WYANT. Who controls the other site?

Mr. GIBSON. The Patterson tract is controlled by the Winslow heirs. The Eckington site is controlled by some 43 different people, and no one man controls it.

Mr. WYANT. Is not this property now held by real estate men?

Mr. GIBSON. What property?

Mr. WYANT. The other site.

Mr. GIBSON. No.

Mr. ZIHLMAN. What is the price in the southwest section?

Mr. GIBSON. At least $300,000.

Mr. HALL of Indiana. What is the price per square foot?

Mr. GIBSON. Two dollars and sixty-nine cents.

Mr. ZIHLMAN. Can not sites be purchased in the northwest and in the southwest section for 50 cents a foot?

Mr. GIBSON. Yes. On New York Avenue we can get 35 acres of land for $210,000.

Mr. BLANTON. And on Niggerhead Mountain you can get it at even a cheaper rate.

Mr. GIBSON. The gentleman is too facetious. Both of the sites, New York Avenue and Buzzards Point, are available. I

am opposed to the southwest section site for several reasons. This is the proposed layout of the southwest site. Opposite to it is a modern 8-room school, and under the five-year program that is to be extended to a 16-room school building. It is known as the Fairbrother School.

What is to be done with this school building if the market is located on the southwest site? To place a market across the street from this or any other school would be to place the health and lives of the children in jeopardy.

On the corner and nearly opposite the proposed site is a fire station. That is an objection which can not be overlooked.

Only one street-car line serves this location and that is three squares east of the proposed site.

The topography of the squares 354 and 355 is such that considerable grading must be done before sheds can be located thereon. It would cost for sheds, offices, paving of streets, and contingencies $130,000, aside from the cost of the land, in order to put the farmers' market into shape on this site. It will be necessary to erect retaining walls around one of the squares in order to preserve the level surface on which to erect sheds, and it may be necessary to have more than one level and to have step-ups from one level to another in order to use it.

Nearly every customer of this market would be compelled to go through the down-town congested zone of the city to reach the market.

Every farmer coming into the city from the north and west would have to go through the down-town congested zone of the city.

The Federal development of the Mall triangle will further add to the congestion of the so-called down-town congested zone.

There are only four north-and-south highways running through the Mall that would be convenient to southwest sites Nos. 1 and 2, namely, Sixth, Seventh, Twelfth, and Fourteenth Streets.

It is impossible to extend either Eighth, Ninth, Tenth, Eleventh, or Thirteenth Streets through the Mall on account of existing public buildings or projected ones.

The Federal building program for the Mall triangle will undoubtedly necessitate the changing of existing car tracks and the rerouting of all street-car lines traversing this area.

Four-fifths of the entire population of the District of Columbia live north of Pennsylvania Avenue.

More than nine-tenths of the hotels and boarding houses, more than four-fifths of the restaurants and lunch rooms, and more than three-fourths of the retail grocery stores are located north of Pennsylvania Avenue.

The future expansion of the city—in population and in the number of hotels and boarding houses, restaurants and lunch rooms, and retail grocery stores—will in a large measure be north of Pennsylvania Avenue.

At least 20 per cent of the business of the farmers' produce market is a retail business, which in a large measure would be lost to the farmers if the market is located in Southwest Washington. This retail business amounts to more than $600,000 per year.

Not within my recollection in this House has there been such activity on the part of a well-organized lobby on the part of high-priced lawyers on the part of those interests engaged in the commercial exploitation of this District as has attended the efforts to force a selection of the so-called southwest site. The interests of the people of the city are in direct opposition to the selection of that site. Far too little consideration is given by the Congress to the rights of the ordinary citizen of the District.

Not a single legitimate argument has thus far been advanced that would justify the selection of the southwest site.

The CHAIRMAN. The time of the gentleman from Vermont has again expired.

Mr. BLANTON. Mr. Chairman, I yield the balance of my time—three minutes—to the gentleman from Illinois [Mr. MADDEN].

The CHAIRMAN. The gentleman from Illinois is recognized for three minutes.

Mr. MADDEN. Mr. Chairman and gentlemen, I do not often mix in these contests between factions of the District, and that is what this seems to be. I am interested, however, in seeing that the best thing in the long run is done.

Now, we have a committee of 21 members who have investigated this proposition. Seventeen of the 21 recommended the southwest site. It is fair to assume that the 17 are not all idiots, and that the other 4 are not the only wise men. There are five or six railroads that come in on the southwest site. This will give each of these railroads an equal chance. It gives the people the facilities which the river affords in its close proximity to the people generally. It is a more economical purchase from the financial side of the case. It will result, in my judgment, in the solution of a strongly contested problem in the best interests of the people of the District of Columbia. The purchase of the site on the southwest side can be made for less money than any of the other available sites, if there are any other available.

Now, I understand that the gentleman from Vermont [Mr. GIBSON] stands alone for his site, and that the gentleman from Wisconsin [Mr. LAMPERT] stands alone for his site.

Mr. GIBSON. The minority report is signed by four.

Mr. BLANTON. Four out of 21.

Mr. MADDEN. Yes; 4 out of 21; and it is not fair to assume that their judgment in each one individual case is better than the individual judgment of each of other 17. And if numerical figures have any weight, the southwest site stands best before the House. And if the financial side has any weight, the southwest site has won the case. And if the accommodations that are to be afforded to the public have any weight, all the elements are in favor of the southwest site. So that I do not see what else I can say, except that I would be very glad to see the southwest site adopted for the wholesale agricultural market, if that is what you want to call it. [Applause.]

The CHAIRMAN. The time of the gentleman from Illinois has expired. All time has expired. The Clerk will read.

The Clerk read the bill for amendment.

Mr. GAMBRILL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Maryland offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. GAMBRILL: Strike out all of the bill after the enacting clause on lines 1 and 2 and insert the following:

"That the Commissioners of the District of Columbia be, and they are hereby, authorized and directed to acquire by purchase or by condemnation, or partly by purchase and partly by condemnation, as they may deem best, as a site for a farmers' market, property suitably located north of Pennsylvania Avenue.

"For the purposes of such acquisition, including all necessary expenses incident thereto and for the clearing and leveling of the ground and the erection thereon of protecting sheds, and suitable stands and stalls, and the installation of sanitary conveniences and necessary heating and telephone service, the sum of $600,000, or so much thereof as may be necessary, is hereby authorized and be appropriated out of and charged against the general funds not otherwise appropriated in the Treasury of the United States and against the revenues of the District of Columbia in the same proportion and to be paid in the same way and manner as are other appropriations to cover the expenses of operation and government of the District of Columbia.

"And the said Commissioners of the District of Columbia are hereby authorized to make, promulgate, and enforce all appropriate rules and regulations for the control and operation of such market when established, and may establish a reasonable scale of charges to be paid by farmers and others making use of the market or of any of its appurtenant facilities."

Mr. BLANTON. Mr. Chairman, I make a point of order against the gentleman's amendment for the reason that it is not germane. I call the Chair's attention to the fact that the bill now under consideration is a specific one and for a specific purpose. It proposes to authorize an appropriation for the purchase of two specific blocks of land within the District, and shows their designation, for a farmers' market. The gentleman's amendment is not a specific one. It is a general one. It merely proposes to leave to the commissioners the selection of some market place anywhere north of Pennsylvania Avenue, without any instructions, without any designation, and is in no way germane to the purposes of the bill now under consideration.

The CHAIRMAN. Does the gentleman from Maryland desire to be heard?

Mr. GAMBRILL. No.

Mr. ZIHLMAN. Mr. Chairman, I would like to be heard on the point of order. I would call the Chair's attention to the fact that this is a bill authorizing the acquisition of a site for a farmers' produce market and that the Commissioners of the District of Columbia in the bill are authorized and directed to acquire by purchase a certain site. The gentleman from Maryland by his amendment simply specifies that the Commissioners of the District of Columbia are authorized and directed to acquire a site, but does not specify the particular site they are to buy. It would seem to me, Mr. Chairman, that the subject matter of the amendment is clearly germane to the purposes of the bill, in that it directs the commissioners to acquire a site north of Pennsylvania Avenue, without designating the particular square.

Mr. BLANTON. Will the gentleman yield?

Mr. ZIHLMAN. I yield.

Mr. BLANTON. It has been held time and time again, Mr. Chairman, that you can not amend a specific proposition with a general one, because a general one is not germane. You can amend a general proposition with some specific one. That would be germane, but the reverse is not true.

The CHAIRMAN (Mr. BEEDY). The Chair is ready to rule. It is true that a specific provision in a bill can not be amended by a general provision which reposes a wide discretion in those empowered to carry out the proposed legislation. The bill before the committee designates a specific tract or tracts of land for the purpose nominated in the bill, while the amendment would open the entire area north of Pennsylvania Avenue for availability as a site. The Chair thinks that the proposed amendment is such a general provision and reposes such a wide discretion in those authorized to carry out the purposes of the proposed legislation that it offends against the rule. The Chair therefore sustains the point of order.

Mr. GAMBRILL. Mr. Chairman, I offer another amendment.

The CHAIRMAN. The gentleman from Maryland offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. GAMBRILL: Strike out all of lines 7 to 10, inclusive, on page 1, and all of lines 1 to 7, inclusive, on page 2, and insert the following:

"Square 669, bounded by North Capitol Street, First Street, Florida Avenue, O and P Streets NE., for the purpose of a farmers' produce market, and to close as a street and to use for the purposes of this act such portion of any public street or streets adjacent to or within such site as an addition thereto as in their judgment the public interests will permit: *Provided*, That no property owner shall thereby be deprived of egress from or ingress to his property."

Mr. GAMBRILL. Mr. Chairman, ladies, and gentlemen of the committee, I want to speak for five minutes and I insist on speaking without interruption. It has been suggested by the gentleman from New York [Mr. STALKER] that there is a great deal of lobbying against the proposition to locate the farmers' market in Southwest Washington. The gentleman from Texas [Mr. BLANTON] says the proposition would be a simple one if selfish interests were removed. The gentleman from Massachusetts [Mr. UNDERHILL] says if you could eliminate the selfish real-estate interests the proposition would be a simple one. I do not know whether those references were intended to cast a reflection upon my motives in introducing this amendment, but let me say that I have no interest, financial or otherwise, in the Baltimore & Ohio Railroad Co. I have not discussed this proposition with any officer or official of that railroad company. Across the territory I represent runs the lines of two great railroads, the Pennsylvania and the Baltimore & Ohio, and a mere statement of that situation should be sufficient to show to anyone that I would be unprejudiced so far as those two interests are concerned, and would not take any position unless some public interests were involved.

You tell me that this is a selfish interest. Why, right to the side of where the Terminal Refrigerating & Warehousing Co. is located there is vacant land which up until a few years ago was owned by the Southern Railroad Co. Authorization of Congress was granted to put pipes and conduits under Twelfth Street in anticipation of the time when those interests might be able to get the farmers, wholesalers, and retailers down there and control the food supply of the city of Washington.

Among the incorporators of the Potomac Freight Terminal Co. is Mr. Wrisley Brown, the president of the Terminal Refrigerating & Warehousing Co., and four directors or officers of the Pennsylvania Railroad Co. When the gentleman from Texas speaks about special interests and favored interests seeking to acquire a site in Eckington I throw the challenge back in his face and ask him whether he is not representing the interests of the Pennsylvania Railroad Co. when he is seeking to get this site in southwest Washington.

Mr. BLANTON. No; I am not. I am representing only the people. Will the gentleman yield?

Mr. GAMBRILL. Certainly.

Mr. BLANTON. What about the other five railroads that are interested besides the Pennsylvania? Who is representing them?

Mr. GAMBRILL. The point I make is that you are lending yourself to a scheme under which certain interests will get the wholesalers, retailers, and farmers down in southwest Washington and then control the food supply of the city of Washington.

Mr. BLANTON. I am trying to get us away from schemes. And who represents the shipping interests that come up the Potomac by water? Somebody surely must represent them. They are involved here.

Mr. GAMBRILL. I am speaking of what you are seeking to do through your interest.

Mr. BLANTON. I have no personal interest. I am representing the interests of the people solely that are antagonistic to one railroad—the Baltimore & Ohio.

Mr. GAMBRILL. You are seeking to put the farmers' market 1½ miles away from the center of population. The center of population in Washington is on L and M Streets, and between Fifth and Ninth Streets.

The distance in an air line from the center of population to the proposed market site in southwest Washington is 1½ miles, with only 6 per cent of the total population of Washington in that district of the southwest. Within 20 years we will have only about 3 per cent, because this section can not grow, and the growth is to the northeast, the southeast, and the northwest.

Let us brush aside all the specious statements and all the sophistry contained in the majority report filed by the gentleman from Indiana [Mr. HALL] for the Committee on the District of Columbia, and let me say that the bill introduced by the gentleman from New York [Mr. STALKER] might appropriately be entitled a bill for the relief of the Terminal Refrigerating & Warehousing Co. and the Potomac Freight Terminal Co., concerning which I shall speak later in no uncertain terms.

But for the present let me state some of the interesting facts concerning the circumstances under which this bill, introduced by the gentleman from New York [Mr. STALKER], comes before the Committee of the Whole of the House with the recommendation that it do pass. This matter of the location of a farmers' market here in Washington, which is in all probability foredained to be the location of most of the major market activities, including commission merchants and the retail and farmers' market, was considered by the subcommittee on parks and playgrounds of the Committee on the District of Columbia. That subcommittee consists of its chairman, the gentleman from Vermont [Mr. GIBSON], the gentlewoman from New Jersey [Mrs. NORTON], the gentleman from Wisconsin [Mr. LAMPERT], the gentleman from Indiana [Mr. HALL], and the gentleman from Virginia [Mr. WHITEHEAD].

By a vote of 3 to 2 the subcommittee decided to recommend to the full Committee on the District of Columbia the acquisition of squares 354 and 355 in southwest Washington for a farmers' market. It is a singular situation, that of the three members of the committee so voting for the southwest site—the gentlewoman from New Jersey [Mrs. NORTON], the gentleman from Indiana [Mr. HALL], and the gentleman from Virginia [Mr. WHITEHEAD]—not a single one was present at the committee hearing when the facts and arguments relative to site 669 in Eckington, which I am advocating, were presented. And the members of the subcommittee who voted in favor of the southwest site did so before the committee hearings were transcribed, and could not have read the testimony and informed themselves regarding the desirability of a farmers' market being located in the Eckington area.

This proposition comes before this Committee of the Whole of the House on a majority report, and on minority reports signed and indorsed by four members of the Committee on the District of Columbia, who are opposed to the southwest site. This bill for the acquisition of a site in southwest Washington should not pass, as it does not meet the approval of the citizens of Washington nor of the producers themselves. May I be so bold as to venture the assertion that in common with my colleague from Maryland [Mr. ZIHLMAN] I feel justified in speaking on this subject with as great a degree of assurance and directness as any Member of this House.

Assuming, if you please, that my interest in the development and beautification of Washington is the same as any other Member of this House, then I venture the statement that, in common with my colleague from Maryland [Mr. ZIHLMAN], I am justified in claiming your attention for something which means much to the farmers who bring their produce to the farmers' market.

I am opposing the acquisition of a site in southwest Washington for a farmers' produce market because it is the most unsuitable and inaccessible place in Washington for such a market and because the great majority of the farmers who bring their produce to the farmers' market are opposed to being relegated to this cut off, inaccessible, and remote section of the city—to this cul-de-sac. I claim the right to speak for the farmers who bring their produce to the farmers' market as, in conjunction with my colleague [Mr. ZIHLMAN], I represent 80 or 83 per cent of the farmers who bring their produce to the farmers' market. In House Report 1695, Sixty-ninth Congress, second session, there is a statement, prepared, I believe, from information furnished by Mr. George M. Roberts, superintendent of

weights, measures, and markets of the District of Columbia, which gives some interesting information, and from which I read:

The total number of acres cultivated in truck, fruits, etc., by farmers who sell more or less regularly at this market (meaning the farmers' market) as indicated by statements of their respective acreage contained in their applications for space, is as follows:

In Maryland	14,312
In Virginia	2,366
In District of Columbia	862

Of the 17,540 acres so cultivated, the products of which come to the farmers' market, 83 per cent of the total acreage is under cultivation in Maryland.

In a report, Document No. 119, submitted to this Congress by the Commissioners of the District of Columbia, there is this statement:

A recent check gave the number of farmers using the market as—

From Maryland	465
From the District of Columbia	55
From Virginia	81

But I shall consider this proposition from its broadest aspect; the convenience of the people of Washington and the desire of the great body of the farmers who bring their produce to the farmers' market, and who help so greatly in giving the consuming publish fresh fruits and vegetables at reasonable prices.

For nearly 60 years the farmers' produce market has occupied a Federal reservation at the intersection of Ohio and Louisiana Avenues, between Tenth and Twelfth Streets NW., just north of the National Museum. By an act of Congress of May 20, 1870, this space was dedicated to the city of Washington for use as a farmers' market.

The Commissioners of the District have been requested by the Treasury Department to vacate this space as it is proposed to use the land for the new Internal Revenue Building, but in view of the act of 1870 it is very doubtful if the commissioners have the right as a legal proposition to surrender this land to be used for purposes other than those designated by the act of 1870.

The public building act of May 25, 1926, gave to the Secretary of the Treasury broad powers, but there was no expressed repeal of the act of May 20, 1870, and it can hardly be doubted that the earlier and special act remains in force. However, no one wants to quibble over a question of this kind nor do anything which will interfere with the orderly developments of the building program of the Government here in Washington; and the question of the rights of the commissioners in the premises may now be an academic one, since I understand part of this territory has already been surrendered by the commissioners to the Treasury Department. However, in the bill I introduced for the acquisition of square 669 in Eckington for a farmers' market, provision was made that after the site authorized to be acquired has been secured the space now occupied by the farmers' produce market shall be vacated by the District of Columbia. I did this to preserve the form, if not the substance, of orderly legal procedure.

In considering any site for a farmers' market a number of factors must enter into the problem. First, the availability of sufficient ground for the development, ultimately, of a joint farmers' wholesale and retail market area. Secondly, its geographical position in relation to the center of population. Third, its accessibility to the consumers and buyers. Fourth, its accessibility to the producers. Fifth, traffic conditions and street-car service and railroad facilities, when considered in their relation to a wholesale as well as a farmers' market.

It is interesting to bear in mind that, taking the farmers' produce market as a separate proposition, you are dealing with a business which, in the city of Washington, amounts to about $3,000,000 a year, and it means much to the consumers of the city to have this business encouraged and stimulated. It has been stated by reliable investigators that seven commodities purchased in small quantities on the farmers' market totaled $1.58, in contrast to $2.20 for the same commodities of similar quality purchased in a privately owned market in northwest Washington. This percentage of yearly savings on a business of $3,000,000 is no inconsiderable sum to the consumers. If we are to consider the site of a farmers' produce market and an ultimate centralization of the farmers' retail and wholesale markets from the standpoint of its availability, its relationship to the center of population, and its accessibility, both to the buyers and the producers, then one turns almost instinctively to square 669 on North Capitol Street or some equivalent site in Eckington. In square 669 you have a space 782 feet long and 354 feet wide, not including the 12-foot sidewalks on both O and P Streets. The area has 276,828 square feet, or over 6 acres, with an assessed value of $443,000. Immediately adjacent are block 668, 670, and 710, which are either unimproved or, with a few exceptions, contain buildings of comparatively little value. This combined area would be large enough for the erection of wholesale and commission houses, surrounded with ample parking facilities. This site is very close to the center of population. According to the survey of population based on the 1925 census, prepared for the North American Co., the center of population for the city of Washington was shown to be that approximate area bounded by Fifth and Ninth Streets and L and N Streets NW., and square 669 is near that center.

A large percentage of the produce sold at the farmers' market is bought by the hotels, restaurants, grocery, and chain stores, and 80 per cent of the retail grocery stores and 97 per cent of the hotels are located in the northeast and northwest sections of the city, and a farmers' market at square 669 would be convenient to the greatest number of people. This site is accessible by street cars and wide thoroughfares, and being near the center of population is the most convenient site to be found.

Square 669, which I am advocating, is about 3,500 feet, or 66 per cent of a mile from the center of population, and is at the convergence of two great arteries of the city, Florida and New York Avenues, and much nearer to the routes over which the farmers would come in hauling their produce to the market. On the other hand, squares 354 and 355 in southwest Washington are 8,500 feet from the center of population, or a mile and a half.

It is interesting to know that the Commissioners of the District recommended in their budget, which has been approved by the Director of the Budget, an appropriation to grade and extend New York Avenue so as to connect with the Baltimore-Washington Boulevard or the Bladensburg Road near the point where the Pennsylvania tracks cross the boulevard. When this project is carried out it will greatly relieve traffic on Florida Avenue, and all farmers coming from the direction of Bladensburg will pass into Washington over a direct route to the market, if the farmers' market is located in the Eckington district, square 669. Those coming from the direction of Bennings will pass along the Bennings Road to Florida Avenue in a direct line to the market; those crossing the Pennsylvania Avenue Bridge will pass up Fifteenth Street to Florida Avenue; those coming across the Anacostia Bridge would proceed to Eleventh Street in a direct way and turn into Florida Avenue, while those coming from Montgomery County would pass down R Street, or perhaps Georgia Avenue, and continue into Florida Avenue.

It is unquestionably true that it would be desirable to have a central distributing point for the major food supplies of Washington, and the Commissioners of the District in their report to Congress, Document No. 119, Seventieth Congress, first session, have said:

That the farmers' produce market should be located in close proximity to the commission houses.

In the course of the hearings before the subcommittee on parks and playgrounds of the District of Columbia an attempt was made by Col. Wrisley Brown, president of the Terminal Refrigerating & Warehousing Co. and the Potomac Freight Terminal Co., to prove that the commission merchants of Washington intended to locate their business near Water Street in southwest Washington, in the vicinity of these squares 354 and 355, proposed as a farmers' market site. There is no doubt that the business of the farmers and the commission merchants is interrelated and it would be highly desirable to keep them together. This is going to be accomplished if my amendment is accepted, as the commission merchants, who, it is estimated, handle 80 per cent of the foodstuffs that come to Washington for distribution, have acquired the right to purchase or have actually purchased about 80 acres of land, comprising the Patterson tract, which is east of square 669, and on which tract they propose to establish their business.

At this point let me say parenthetically that should it be the judgment of this body that the farmers' market be located in the Patterson tract in closer relation to the commission merchants, I will change my amendment accordingly so as to bring about this objective.

The place for a farmers' produce market is in the Eckington district and it should not be placed in southwest Washington. I will give my reasons for this conclusion, and set forth the powerful financial interests back of the effort to compel the farmers and commission merchants to locate in southwest Washington; an influence which has reached far, has come into the Halls of Congress, and has caused the Committee on the District of Columbia, by a majority vote, to ignore the recommendations of the National City Park and Planning Committee, the Department of Agriculture, and the Bureau of Efficiency.

In southwest Washington near Water Street is located the plant of the Terminal Refrigerating & Warehousing Co., of which Col. Wrisley Brown is president. Across to the east of this refrigerating plant are squares 354 and 355, on which these powerful financial interests are moving heaven and earth to compel this Congress to locate a farmers' market. Directly to the west of this refrigerating plant are four or five squares and which were owned by the Southern Railway Co. By an act of Congress this refrigerating company secured the right to run pipes and conduits under Twelfth Street from this plant to this property on the west, all in anticipation of the day when they could induce the commission merchants to locate in southwest Washington on this property of which I have spoken, and in anticipation of congressional action which would bring the farmers' produce market to squares 354 and 355.

So, in the further development of this scheme, which would give certain financial interests an almost undisputed control over the food supply of Washington, there was formed in 1925 a corporation known as the Potomac Freight Terminal Co., whose object was to acquire all of the right, title, and interest of the Southern Railway in these properties. Among the incorporators and trustees are to be found the names of Col. Wrisley Brown and four officials of the Pennsylvania Railroad and the presidents of some of the leading banks and trust companies of Washington. As agents and purveyors of these interests there appeared on the scene of action such well-known lawyers and lobbyists as Thomas J. Littlepage and Mr. Ed. Colladay, who hesitated not to disseminate false and misleading information regarding the alleged advantages of the southwest site.

In their efforts to influence the action of the Representatives in Congress from the Southern States, these agents and purveyors disseminated false statements, which have created the impression that if the food-distributing point was in the Eckington area instead of the southwest, the freight rates from the South would be more to the Eckington freight yards than to the Pennsylvania terminal at Fourteenth and B Streets SW.

I read from a brief filed of these proceedings by the Baltimore & Ohio Railroad Co.:

> It is, of course, understood that the same freight rates apply to any delivery on either railroad in Washington.

You may say this is not sufficient evidence, as it comes from an interested party. This being the case, I direct your attention to a letter which I will insert in my remarks, under leave to extend, a letter written on the 9th day of February, 1928, to Mr. Shaw, chief inspector of the University of Maryland, extension service. This letter is from the Interstate Commerce Commission and is signed by G. B. McGinty, secretary:

INTERSTATE COMMERCE COMMISSION,
Washington, February 9, 1928.

Mr. S. B. SHAW,
Chief Inspector University of Maryland Extension Service,
Maryland State Department of Markets, College Park, Md.

DEAR SIR: The commission is in receipt of your letter of February 7, requesting information as to whether there is any difference in freight rates on shipments of fruits and vegetables from points in North Carolina, South Carolina, Georgia, Alabama, Florida, Louisiana, Mississippi, and Texas when consigned for shipment to Washington, D. C., for delivery at the Pennsylvania Railroad terminal, Fourteenth and B Streets SW., as compared to shipments for delivery at the Baltimore & Ohio Railroad terminal at Eckington.

An examination of the tariffs on file with the commission indicates that rates for Baltimore & Ohio and Pennsylvania Railroad deliveries at Washington are the same. As an illustration, we find that the rate on peaches from Fort Valley, Ga., to Washington, D. C., for delivery to the Pennsylvania Railroad at their Fourteenth Street yards and for delivery to the Baltimore & Ohio at their Eckington yards is $1.20 per 100 pounds, plus a refrigeration charge of $77.50 per car. The rates from Sanford, Fla., on cabbage in car lots, is $1.09 per 100 pounds for delivery on either one of the above lines plus a refrigeration charge of $70 per car. The rate on apples in car lots from Portland, Oreg., to Washington for delivery either at the Baltimore & Ohio Eckington yards or the Pennsylvania Fourteenth Street yards is $1.50 per 100 pounds plus a refrigeration charge of $100 per car.

There is a difference in the rates on vegetables from near-by points. For example, from Rockville, Md., on the Baltimore & Ohio Railroad to Washington, the rate for Baltimore & Ohio delivery on potatoes is 13 cents per 100 pounds, while, for Pennsylvania delivery, it is 15½ cents. On business from Bowie, a local point on the Pennsylvania Railroad, the rate for Pennsylvania delivery is 13 cents, while the rate for Baltimore & Ohio delivery is 15½ cents per 100 pounds.

The only way where a higher rate would be charged for Baltimore & Ohio delivery than for Pennsylvania delivery would be where the shipment was billed for delivery at the Pennsylvania yards and after reaching that point reconsigned to the Baltimore & Ohio yards. This would bring about an additional charge for reconsigning, switching, etc., but, as indicated, if the shipment in the first place was routed for Baltimore & Ohio delivery by the shipper, they would enjoy the same rate as shipments billed for Pennsylvania delivery, vice versa, a shipment billed for Baltimore & Ohio delivery and after reaching the Baltimore & Ohio yards reconsigned to the Pennsylvania yards, an additional charge would be made for reconsignment, switching, etc.

Respectfully,

G. B. MCGINTY, *Secretary.*

Thus we dispose of all arguments based on the assumption that there is a difference in freight rates in favor of the Pennsylvania Railroad terminal. Ah, but it has been asserted by Colonel Brown and his shock troops that the southwest site should be selected for the reason that a great deal of the freight which has its origin in the South, and which is consigned to Washington, comes to the Potomac yard, 5 miles below Washington, in Virginia, over the Southern Railway, the Chesapeake & Ohio, the Atlantic Coast Line, the Richmond, Fredericksburg & Potomac Railroad, and the Seaboard Air Line. At the Potomac yards the freight is "broken" and passes into Washington over the Pennsylvania Railroad, whose system bounds the proposed market site in southwest Washington on the north.

It will be admitted that the southwest site would be served by the Pennsylvania Railroad and the Eckington site, which I am advocating, square 669, by the Baltimore & Ohio Railroad Co. But, if in the judgment of the House, it would be advisable to locate the farmers' market in the Patterson tract where the commission merchants are going, then both railroads would be available for shipments. It may be of interest to examine into the shipments made to Washington of fruits and vegetables by rail if we are to consider the site of the farmers' market as a first step in the ultimate centralization of all the major market activities, including a retail market and the commission merchants. Again, I emphasize the fact that considering the farmers' market independently, the railroad factor is negligible as the farmers haul by trucks and they do not ship by rail.

The report of the United States Department of Agriculture for 1926 shows that the entire movement of fruit and vegetables into Washington amounted to 7,100 cars. Of these, 107 cars were from unknown points, leaving 6,993 cars from known points of origin. The receipts by boats amounted to the equivalent of 577 cars, or about 8 per cent of the total. Of the 6,993 cars, about 33 per cent originated in States from which the shipment would necessarily pass through the Potomac yards. About 12 per cent originated in the States where the shipment need not necessarily be through the Potomac yards. The grand total is 45 per cent of all possible movements through the Potomac yards. About 34 per cent of the total movement into Washington was from Western States, and 21 per cent from Eastern States, or a grand total of 55 per cent, the greater portion of which would come over the Baltimore & Ohio Railroad, as its main lines run into Washington and tap the great industrial centers of St. Louis and Chicago, which are the great converging points for freight consigned to Washington.

In 1926 the Baltimore & Ohio handled at its Eckington yard, or for sidetrack delivery in that section, 34 per cent of this total rail movement. It would take a corps of statisticians and traffic experts to work out the mathematical problem of which site affords the greatest railway advantages, but the figures given will show that this question of a farmers' market and a site for a consolidated market for farmers, retail men, and commission merchants need not be determined by the rivalries of railroad statisticis.

And yet the propaganda which has been carried on by these financial interests, who have their own purposes to serve, has led the gentleman from Indiana [Mr. HALL] to make this absurd statement in his report on the Stalker bill:

> It appears from the testimony at the hearings that many of the near-by truck farmers do not want the farmers' market located near the water front because of the feared competition of produce raised by the farmers of the tidewater counties of Maryland and Virginia and the South, which would probably move to Washington by cheap water transportation as well as by truck and rail if the market were established contiguous to the wharves.

There is not a scintilla of evidence in the hearing to support this absurd conclusion, and it is ridiculous to suppose that the farmers from near-by counties—Prince Georges and Montgomery—who furnish 83 per cent of the foodstuffs brought to the farmers' market—the other 17 per cent coming from Virginia and the District of Columbia—and who can gather their vegetables and fruits in the afternoon and place them on the market the following morning, have anything to fear from tide-

water shipments from Maryland and Virginia, which would require two or more days for transportation. And then we have seen from the report of the Department of Agriculture that the entire shipment of all fruits and vegetables into Washington from everywhere by boat is the equivalent of only 577 cars a year, or 8 per cent of the total. This 8 per cent shipment is largely cold-storage foodstuffs, which can not compete with fresh vegetables and fruits gathered in the afternoon and on the table of the consumer the next day.

I would like to get the record straight so far as I am concerned. I have no interest, financial or otherwise, in the Baltimore & Ohio Railroad Co., nor have I had any communication from or conversation with any official, officer, or employee of that railroad regarding this subject, either directly or indirectly.

The fifth congressional district of Maryland, which I represent in Congress, embraces all of the territory adjacent to Washington, with the exception of Montgomery County, and includes all of southern Maryland and the southern section of the city of Baltimore.

Across the district I represent runs, in almost parallel lines, the two great railroads, the Baltimore & Ohio and the Pennsylvania. And the mere statement of such a condition should be sufficient to indicate that as between the interests of the two railroads I would be neutral, providing no questions of public interest were involved.

Gentlemen of this committee, you are asked by the majority of the Committee on the District of Columbia to locate this farmers' market in southwest Washington, 1½ miles from the center of population, access to which can only be had from the north, northeast, and northwest by crossing and recrossing Pennsylvania Avenue, or if traveling by street car, then down widely separated streets—Seventh and Fourteenth Streets. You are asked to do this when four-fifths of the population of Washington is north of Pennsylvania Avenue. On Fourteenth Street is the Bureau of Engraving and Printing, and eventually between the populous section of the city and where it is proposed to center the market activities you have the Department of Agriculture, the National Museum, the Post Office Building, the Mall, and within a few years you will have all the territory south of Pennsylvania Avenue occupied by public buildings, such as that of the Interior Department and others.

The proposal is to locate the market in a section that will be cut off from the rest of Washington; in a section that can not grow, owing to its physical limitations or restrictions, and which is away from all that development of Washington which is and will be to the northeast, northwest, and southeast. If you indorse such a proposition you will disregard all physical and topographical conditions, which can not be ignored. You will be going contrary to the recommendations of the Bureau of Efficiency.

You will be going contrary to the recommendation of the National Park and Planning Commission. At a meeting of this commission, held on October 15 and 16, 1922, the following motion was offered and carried:

(A) That this commission recommends that the farmers' market and the commission houses be moved simultaneously to one of the following sites, given in order of preference:

(a1) To the site next to the Eckington yards.

(a2) To the southwest near the river front.

(a3) To the mid-city site.

This report may be found in the Senate hearings, in the Sixty-ninth Congress, second session, on H. R. 15668.

The farmers' market represents a business of $3,000,000 yearly, and each year 60,000 loads of produce are brought to this market by trucks and wagons from near-by sections, and it does seem a short-sighted policy to send all of this foodstuff down to southwest Washington far from the consuming public (four-fifths of the population of Washington is north of Pennsylvania Avenue), there to be unloaded, made into broken lots, and hauled across Pennsylvania Avenue in trucks and wagons, in number many times 60,000.

But it is contended that the farmers' market should be located in southwest Washington because the fish market is there. This might be a persuasive argument if fish were in fact shipped by water and the consumers went there. Let me read what Maj. Carey H. Brown said about the fish market:

The experience of the fish market is this, as I am informed: It was contemplated by the municipal government at the time the fish market was located that there would be a very large retail business in fish and sea food that would come down to that market. That has not been borne out by experience. People do not go down there to buy fish and sea food, because it is too far, too inconvenient.

Perhaps it was a reasonable assumption when the fish market was located on the water front that as fish live in water they would be shipped by water when caught. As a matter of fact, 80 per cent of the fish supply of Washington is brought to the city by rail and trucks, and the fish caught in the Chesapeake Bay and the lower Potomac for the Washington market are brought here by truck and not by water, so it was a fallacious idea that ever put the fish market on Water Street.

In our consideration of this broad question, which means much to the consumers and the producers and to Washington as our National Capital, we must have not only the present in view but a contemplation of vision of the future. It seems to me almost inevitable that any thought given now to a farmers' market must have associated with it the idea of a central market site for the three allied market activities—the farmers, the retailers, and wholesalers—one which will be convenient, close to the center of population, and yet so located as not to clash with the beautification of the city.

Viewing this matter then from the æsthetic as well as the utilitarian standpoint, we must have a vision for the future. The public building act of May 25, 1926, contemplated the use for Government purposes of all that territory south of Pennsylvania Avenue and west of Maryland Avenue, projected in a straight line to Twining Lake, which takes us south of the Mall to Maryland Avenue, which, when projected in a straight line as indicated, carries us to the railroad tracks. And back of all this proposed development, which is to be occupied, let us hope, by Government buildings of simplicity, and back of all the expanses of green lawns and trees, it has been recommended that a market be located. The vision must have been a group of imposing public buildings and beautiful greens crowded with visitors and officials to witness the daily procession of trucks loaded with perishable vegetables and fruits meandering their way back and forth through the devious pathways of parks and Government buildings to this cul-de-sac, this bottled-in section of Washington.

Let the recommendation of the committee be rejected and let the market be placed in Eckington, close to the center of population and convenient to the greatest number of people, and yet so located as to be outside of the zone of the æsthetic development of Washington.

I am convinced that it is highly important to have the farmers' produce market and all the major market activities north of Pennsylvania Avenue. For the purpose of bringing about this objective, I am willing to offer or to support an amendment which will authorize and direct the Commissioners of the District of Columbia to acquire, by purchase or condemnation, a site for the farmers' market north of Pennsylvania Avenue, leaving the selection of the site to the commissioners.

I am going to summarize the reasons why such an amendment will be in accord with the preponderance of the recommendations made by the public bodies and officials. I believe it must be conceded by everyone that the commission merchants are going to reestablish their business on the Eckington area, north of Pennsylvania Avenue, on the Patterson tract. Commission merchants controlling over 80 per cent of the perishable fruits and vegetables handled in the city of Washington have signified their intention to locate on the Patterson tract and they have entered into contracts to purchase this property.

The Commissioners of the District of Columbia, in their report to this Congress, on the location of a farmers' market, made three significant statements:

First. That the perishable industry can be most ecenomically and efficiently conducted by a centralization of the entire industry in a market area.

Second. That this market area must be, from an economic standpoint, located at a railroad terminal where the receivers can deliver direct from the cars and thereby avoid the present high cost of truck drayage.

Third. That the farmers' produce market should be located in close proximity to the commission houses.

With these conclusions I find myself in accord.

In the majority report submitted by the gentleman from Indiana [Mr. HALL] there is this statement: "It clearly appears from the hearings that the wholesale market should not be divided." With this statement I agree, and we have seen that the wholesale merchants are going to locate north of Pennsylvania Avenue.

The National City Park and Planning Commission has recommended that the market area be north of Pennsylvania Avenue. The Bureau of Efficiency has made a similar recommendation and the use of ordinary judgment and common sense would prompt one to locate the market convenient to the population of Washington.

I conclude my remarks with a few simple illustrations which are so significant as to require no explanation:

Southeast Washington is as near, if not nearer, the Eckington section of northeast Washington than it is to the southwest section. The northeast and northwest sections have a combined population of 380,500 as against 29,500 for the southwest and 91,500 for the southwest and southeast together.

There are 130 hotels and boarding houses in the northwest and northeast as against 3 in the southeast and none in the southwest.

There are 616 restaurants and hotels in the northwest and northeast as against 74 in the southeast and southwest.

There are 1,461 retail grocery stores in the northwest and northeast as against 403 in the southeast and southwest.

Sixty-four per cent of the population of the District live in the northwest section, 17 per cent in the northeast, 13 per cent in the southeast, and only 6 per cent in the southwest.

In the course of 20 years there will not be 3 per cent of the population of the District of Columbia in the southwest, as this section has reached the limits of its development. And yet notwithstanding these facts and the further fact that four-fifths of the population of the District is north of Pennsylvania Avenue, the author of the bill [Mr. STALKER] and the majority of the Committee on the District of Columbia would put the market south of Pennsylvania Avenue.

Gentlemen, I suggest to you that in view of these facts the market site ought to be near the center of population, convenient to the roads that the farmers use.

The CHAIRMAN. The time of the gentleman from Maryland has expired.

Mr. BLANTON. Mr. Chairman, I ask recognition in opposition to the amendment.

Mr. Chairman, I never represented a railroad in my life. I have always represented the people, and that is what I am trying to do now—represent the people against this railroad fight that has been brought on the floor. My friend the gentleman from New York [Mr. STALKER] knew what he was talking about when he told you about lobbying. We have had one of the biggest lobbyists you ever saw this morning circulating around through the House Office Building from the great State of Maryland to tell us how to vote on this proposition. I will not call him by name unless our friend, Brother GAMBRILL, calls for his name. Then I will give it.

Mr. GAMBRILL. Will the gentleman——

Mr. BLANTON. Doctor Simmons, from Maryland, is the man I am speaking of.

Mr. GAMBRILL. Will the gentleman allow me to make a statement to him?

Mr. BLANTON. Yes; certainly.

Mr. GAMBRILL. Who are Mr. Littlepage and Mr. Colladay representing? They have visited every Member of Congress.

Mr. BLANTON. They have not visited me, and they were not before our committee. Brother Colladay has not visited me, because he knew he could not influence me.

Mr. GAMBRILL. He knew the gentleman was all right.

Mr. BLANTON (continuing). Because I have never stood with him on anything. I have stood in his way many times.

Mr. STALKER. And they have not visited me.

Mr. MADDEN. Neither of them has visited me.

Mr. GAMBRILL. They have visited most of the Members of Congress.

Mr. MADDEN. The gentleman said they had visited every Member of Congress.

Mr. GREEN of Florida. They did not visit me.

Mr. BLANTON. This is the question: Do you believe in committee work or not? Do you believe in giving any credence whatever to one of your authorized committees that spends weeks of time carefully considering a proposition? Your District of Columbia Committee is composed of 21 members. I was not on the subcommittee that had this bill in charge, but I checked up every bit of its work. I found it did its work well. As the distinguished lady from New Jersey [Mrs. NORTON], who was a member of that subcommittee, told you, they went into the proposition carefully and they considered it from every angle. They heard every single interest that appeared before it. The subcommittee made a report to our regular committee and we stood 17 out of 21 to back up our subcommittee. There were four members against the committee's action, and the four members were divided. The gentleman from Wisconsin [Mr. LAMPERT] was for a certain site. The gentleman from Vermont [Mr. GIBSON] did not know where he was. He was for one site other than the southwest, but he could not concentrate on anything.

Now, what are you going to do? Follow a proposition that is up in the air? The gentleman from Maryland [Mr. GAMBRILL] did not propose a certain site in lieu of the one mentioned in the bill. The gentleman came in and still wanted to leave it up to the commissioners so long as they placed the market north of Pennsylvania Avenue. When the gentleman found out his proposition was not germane, then he comes in and tries to place it out here at Eckington.

Mr. COCHRAN of Missouri. Will the gentleman yield?

Mr. BLANTON. I am sorry, I can not yield now. I have only five minutes.

May I say to those of you who keep house here and who have to buy the products of the farmers for your table, if you have not been buying from the fish and oyster market down here on Water Street you have missed an opportunity which you were entitled to take advantage of. You ought to begin buying down there. You can get the finest oysters from Maryland you ever ate in your life. You can get the finest fish from Maryland you ever ate in your life. They come up the Potomac from Chesapeake Bay, from Maryland fishermen, if you please. You also get such fish and oysters from Virginia fishermen. You can get blue points and Lynnhavens and scallops and fish delicacies of every kind in this market.

Mr. MOORE of Virginia. Blue points and Lynnhavens.

Mr. BLANTON. And instead of having to go to the fish market and then out to Eckington for the balance of your products, under this proposed plan you can go down there to one market and buy your fish and your oysters and your vegetables and your head lettuce from Florida and your strawberries from the South and everything you may need at one time.

Mr. JOHNSON of Texas. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. JOHNSON of Texas. Is it not also true that the street-car facilities are good at that location?

Mr. BLANTON. The street-car facilities are good, and the Traffic Bureau has stated that the traffic part of the problem has been solved, and you will have better traffic accommodations where they propose to locate this market than anywhere else.

Mr. COCHRAN of Missouri. Will the gentleman now yield?

Mr. BLANTON. Yes.

Mr. COCHRAN of Missouri. I wish the gentleman would tell the House how many times he has disagreed with the great committees of the House.

Mr. BLANTON. Oh, I have disagreed with them at times. [Laughter.] I am not here to say that a man ought not to disagree with them. I admire my friend the gentleman from Maryland, because he is doing what he thinks is right in this proposition, but we ought not to follow him when he is wrong just because he thinks he is right. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BUSBY. Mr. Chairman, I rise in support of the amendment.

Mr. ZIHLMAN. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 15 minutes.

Mr. DALLINGER. Reserving the right to object, Mr. Chairman, I have an amendment to offer.

Mr. CROSSER. I object, Mr. Chairman.

Mr. ZIHLMAN. Mr. Chairman, I move that all debate on this section and all amendments thereto close in 20 minutes.

Mr. CROSSER. That practically closes debate on the bill in 20 minutes.

Mr. HOLADAY. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. HOLADAY. How will the 20 minutes be prorated?

Mr. BLANTON. The Chair will control it.

Mr. HOLADAY. There are other amendments at the desk that have not been read.

The CHAIRMAN. That is solely within the discretion of the Chair. The Chair will try to divide the time equally.

Mr. DALLINGER. If the gentleman will make it a half hour.

Mr. GRIFFIN. A parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GRIFFIN. I want to inquire whether the request or the motion of the gentleman from Maryland will exclude debate upon any other amendment which may be offered to the section. I have an amendment to strike out the enacting clause, and I am interested in knowing whether his motion will exclude debate.

The CHAIRMAN. When the gentleman offers his amendment debate on that amendment will be in order. The question is on the motion of the gentleman from Maryland to close debate on this section and all amendments thereto in 20 minutes.

Mr. ZIHLMAN. Mr. Chairman, I ask unanimous consent to modify my motion and make it a half hour.

The CHAIRMAN. The gentleman from Maryland asks unanimous consent to modify his motion by limiting debate on this section and all amendments thereto to 30 minutes. Without objection, the Chair will put the motion as amended. The motion is that debate on the present section and all amendments thereto be limited to 30 minutes.

The question was taken, and the motion was agreed to.

Mr. BUSBY. Mr. Chairman and gentlemen of the committee, I rise in support of the amendment. I was amused at the statement of the gentleman from Texas [Mr. BLANTON] as to how you could get good fish and oysters and other things at the fish market on the water front. The gentleman did not tell you that the hearings on this bill show that 80 per cent of the fish and oysters sold at the fish market are brought into the city by truck and deposited in the fish houses where you have to go to buy them and then haul them back to your homes. It has been said that this is primarily a real-estate proposition. I would like to have you mention any site that does not involve some real-estate dealer or organization trying to make money out of the sale of it. I am not condemning them for that; it is natural that they should want to place the market on real estate they have to sell, so all sites are equal on that point.

There was another matter brought out here to-day. My friends from Florida and Texas and the Rio Grande Valley, where they raise oranges and grapefruit, say that it will be one day nearer their place if you leave the market on the water front than if you take it to some other point north of Pennsylvania Avenue nearer the consumers.

Mr. GREEN of Florida. And for the additional reason that you have water transportation.

Mr. BUSBY. Now, most of the retail grocery business in Washington is done by chain stores. The Sanitary Grocery Co. has about 340 stores, and it also owns the Piggly Wiggly stores, of which there are about 30. There are the Atlantic & Pacific stores, numbering about 200, and the District Grocery stores, 25, and about 30 Old Dutch Market stores. You might say that the bulk of the retail grocery business here is done by these chain stores in the District of Columbia. I do not think that we are called upon as a Government to furnish warehouses for grocery organizations and the railroads when the people do not enter into it one way or the other.

BRING PRODUCER AND CONSUMER TOGETHER

I stand for the proposition, wherever the site may be placed, that the producer and the consumer be brought together without the help of a middleman placed between them. Every time we get a proposition up trying to bring the people in contact with the producers somebody wants to stick the middleman in between them so he can get a hand-out or a dish-out at the expense of the people. That is my objection to the southwest site, because the Government should not be required to furnish a warehouse for unloading vegetables or other produce from some other section of the country.

If a man comes in here from his farm and has 10 dozen eggs to sell, I am in favor of getting him to the man that wants to consume the eggs without having some one else come in between them. If they ship oranges and grapefruit in here, I believe in letting them get to the market like everybody else. The farmers and market gardeners of the country surrounding Washington want a chance to bring their produce here and sell it to the consumer for a fair price, for on that they depend for a living.

Go down there to the market where it is located and you can see those people standing out there in the cold hour after hour, day after day, where they have built up their business; and now you are going to obliterate the business of the producers, sweep them aside off the face of the earth in favor of the big producer and the man who buys and sells to us. This is a bill for the middleman and is neither for the producer nor consumer.

Mr. HALL of Indiana. Mr. Chairman, will the gentleman yield?

Mr. BUSBY. Yes.

Mr. HALL of Indiana. May I suggest that in the hearings the farmers themselves testified that 8 per cent of their sales were directly to the consumer and 92 per cent went to the wholesaler.

Mr. BUSBY. Yes; and you will not have that 8 per cent left when you get through with this proposition as it is handled in the bill——

Mr. GREEN of Florida. Mr. Chairman, will the gentleman yield?

Mr. BUSBY. No; I can not yield, I have not the time. Here is the proposition: If you will move the market another mile away from the people, you will not have 2 per cent of the sales to the consumers from the producers, because you will get it beyond their reach. You put it down there where the retail trade can not get to it, and you will find that the people will have to surrender and say, "We will go to the chain stores, the ones that Congress legislated for, and we will buy from them because Congress is forcing us to buy from them."

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

MESSAGE FROM THE PRESIDENT

The committee informally rose; and Mr. TILSON having assumed the chair as Speaker pro tempore, a message in writing from the President of the United States was presented to the House of Representatives by Mr. Latta, one of his secretaries, who also announced that on the following dates the President had approved bills of the following titles:

On February 24, 1928:

H. R. 278. An act to amend section 5 of the act entitled "An act to provide for the construction of certain public buildings, and for other purposes," approved May 25, 1926.

On February 25, 1928:

H. R. 7032. An act authorizing the Valley Bridge Co., (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge across the Cumberland River at or near Canton, Ky;

H. R. 7033. An act authorizing the Valley Bridge Co., (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge across the Cumberland River at or near Iuka, Ky.;

H. R. 7034. An act authorizing the Midland Bridge Co. (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge across the Cumberland River at or near Smithland, Ky.;

H. R. 7035. An act authorizing the Midland Bridge Co. (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge across the Tennessee River at or near the mouth of Clarks River;

H. R. 7036. An act authorizing the Valley Bridge Co., (Inc.), of Paducah, Ky., its successors and assigns, to construct, maintain, and operate a bridge across the Tennessee River at or near Eggners Ferry, Ky.;

H. R. 8216. An act to confer authority on the United States District Court for the Western District of Virginia to permit J. L. Sink, a bankrupt, to file his application for discharge and to authorize and empower the judge of said court to hear and determine the same;

H. R. 9280. An act to extend the times for commencing and completing the construction of a bridge across the Ohio River approximately midway between the city of Owensboro, Ky., and Rockport, Ind.;

H. R. 9660. An act authorizing the city of Louisville, Ky., to construct, maintain, and operate a toll bridge across the Ohio River at or near said city; and

H. J. Res. 156. Joint resolution authorizing the President to accept the invitation of the British Government to appoint delegates to the Eighth International Dairy Congress, to be held in Great Britain during June–July, 1928, and providing for an appropriation of $10,000 for the payment of the expenses of the delegates.

FARMERS' PRODUCE MARKET

The committee resumed its session.

Mr. DALLINGER. Mr. Chairman, I offer the following amendment, which I send to the desk.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report for information.

The Clerk read as follows:

Mr. DALLINGER offers the following amendment: Strike out the first 11 lines on page 1, and the first 5 lines on page 2 of the bill, and insert in place thereof the following:

"That the Commissioners of the District of Columbia be, and they are hereby, authorized and directed to acquire, by purchase or condemnation, or partly by purchase and partly by condemnation, as they might deem best, a site for the farmers' produce market in squares 656, 658, 661, 663, 665, 667, and south of 667, bounded by First, Half, P Street, and the Anacostia River, southwest."

Mr. DALLINGER. Mr. Chairman, ladies, and gentlemen of the committee, I offer this amendment because I want to get the merits of an alternative site before the committee, so that the members will have all the facts before them, when they make a decision on this important matter. This amendment of mine calls for the taking of a site for the proposed farmers' market at Buzzards Point, so called, within a gunshot of this Capitol, where land is cheap and is either vacant or is occupied by buildings of little value. It is situated on the Anacostia

River, between the Army War College and the Navy Yard, in the southwest section of the District. There are no large real estate or railroad interests behind this site, which accounts for the fact that there has been little mention of it. Nevertheless, it has all of the advantages of the so-called southwest site recommended by the Committee on the District of Columbia in the pending bill, with none of the disadvantages. It is within easy reach of all parts of the District, and is fully as accessible as the site chosen by the committee. It has all of the railroad facilities of the committee's site and better water facilities. Above all, it is by far the cheapest site of any of those seriously considered.

The so-called "southwest site" that the committee has reported in favor of has an assessed valuation of over $2 a square foot. Moreover, it is not large enough now, and when the time comes to expand, the taxpayers will have to go to an enormous expense, because, like Eckington, it is in the congested area. The so-called southwest site, according to the Bureau of Efficiency, has certain other disadvantages. It has a serious traffic problem, because it is right beside the Mall, and most of the traffic will have to go across the Mall twice to get there and return. In the second place, there is no available parking space, because the site proposed by the committee is in close proximity to the Bureau of Engraving and Printing and the buildings occupied by the Agricultural Department, the employees of which already occupy practically all of the parking space in that vicinity.

As I said before, the site at Buzzards Point has the advantage of being on wide, deep water, near the confluence of the Anacostia and Potomac Rivers, and not on a narrow congested channel such as the southwest site proposed by the committee's bill. If this wholesale farmers' market is located at Buzzards Point, not only will little boats have ample room to come with the produce of the farms of Virginia and Maryland but fruit steamers from the Southern States and the Tropics can unload their cargoes. At the present time many of the hotels in this city buy their fruits and vegetables in Baltimore and truck them from Baltimore here, because Baltimore has water transportation from the sources of supply and therefore has lower prices. Washington can enjoy the same water transportation that Baltimore possesses, and this will mean cheaper food for all the people of the District of Columbia. As you will see by this map, marked in red, there is a bus line and there are car lines within a block of the Buzzards Point location. The Government already owns these water-front tracts that are printed in dark red on this map and the remaining land proposed to be taken is very cheap at the present time, being worth not over 40 cents a square foot at the highest. There are 150 acres in the immediate vicinity so that you can expand indefinitely. There is plenty of parking space and no traffic problem. It has the same railroad facilities as the committee's site, as spur tracks run to the navy yard at the present time, and all that will have to be done is to connect up from the navy yard spur track, and the Buzzards Point site will then have the advantage of all six railroads to which reference has been made.

In short, as I have said before, the site proposed in the amendment which I have offered has all the advantages of the site described in the bill reported by the committee and now before the House with none of the disadvantages.

Under the privilege granted me I extend my remarks by appending thereto a more detailed statement of the arguments for this Buzzards Point site, so that it can be a matter of record for the future:

BUZZARDS POINT SITE—GENERAL STATEMENT

It is generally conceded that the farmers' market, commission men, seed and farming-implement stores, and business of a kindred nature should be located in the same general area. Congress, of course, will have little to say about where the commission men will locate, but economic laws will eventually compel the commission men to move to the vicinity of the farmers' market, where the retail dealers must go to obtain the farmer's produce.

Assuming that it would be economic and otherwise desirable to have the wholesale produce business all in the same area, there are certain fundamental characteristics which the site should possess, otherwise it would not be suitable for a wholesale produce district for Washington now and in the future. Those characteristics are, as we see them, sufficient ground, rail facilities, water facilities, and accessibility.

SUFFICIENT GROUND

This not only means sufficient ground to accommodate the 613 farmers who visit the market now but also sufficient to permit expansion necessary to meet the demands of a million and a half or two millions of people.

It means sufficient ground adjacent to the market site to accommodate commission men and farming implements and seed stores.

It also means sufficient ground adjacent to the commission houses, at a reasonable cost, for railroad sidings sufficient to accommodate several hundred cars.

The census figures tell us that between 1910 and 1920 the population of Washington increased 32 per cent. Between 1920 and 1927 the population increased 20 per cent. At the same ratio of increase the population will be more than 650,000 in 7 years, in 14 years it will be more than 800,000, and in something over 20 years the population of this city will be double what it is to-day.

In view of the increase in population, it can be readily seen how soon the need for expansion will come and how important it is to provide for that expansion now. Once the market is established the price of surrounding ground will begin to increase and in a few years it will cost four or five times what it would cost to-day.

RAIL FACILITIES

To have a wholesale produce district away from the railroads would be uneconomic. Not only that, but the double haul would unnecessarily add to traffic congestion. The Baltimore & Ohio Railroad has its freight yards in the northeast section of the city. The Pennsylvania Railroad has its freight tracks in the southwest and southeastern sections of the city. All of the fruit and produce brought to Washington over the Southern, the Chesapeake & Ohio, the Atlantic Coast Line, the Seaboard Air Line, the Richmond, Fredericksburg & Potomac, and over the Pennsylvania Railroad itself comes into the southwestern section of the city, over the Pennsylvania tracks.

No variety of fruit or produce can be brought to Washington over the Baltimore & Ohio that can not at the same time of the year be brought here by some of the railroads which come in over the Pennsylvania tracks.

On the other hand, not one pound of the southern fruit or produce, upon which the people of Washington depend so much in winter, can be delivered at the Baltimore & Ohio freight yards until it is turned over to the Baltimore & Ohio Railroad at Potomac yards in Virginia, then brought through the city over the Pennsylvania tracks, carried out into Maryland, and by a circuitous route to Hyattsville, Md., and then brought back into the city.

That southern fruit and produce is of a highly perishable nature and it should be placed upon sale as soon after it reaches Potomac yards as possible, thereby saving loss to the shipper by deterioration and insuring good, fresh produce to the consumer.

WATER FACILITIES

The produce center should be accessible to water facilities. This would insure Washington of an abundant supply of fruit and produce from Tidewater Virginia, the Eastern Shore of Maryland and Virginia, and from southern Maryland. Water is the natural and in some respects the only highway to Washington from these vast areas.

Many articles of fruit and produce are cheaper in Baltimore than in Washington. This is especially true of tropical fruits, and it is due to the fact that Baltimore has developed her water front.

ACCESSIBILITY

The site should be accessible to the farmers and the public. Accessibility does not mean central. It means sufficient approach and parking space at the market. A mile one way or the other means only about two or three minutes' travel. On the other hand, a central location does not mean accessibility. It means congestion, a conglomeration of street cars, busses, trucks, wagons, automobiles, and people having to do with different classes of business. Placing the market in a zone isolated from other business centers tends to order and economy, while placing near other business districts tends to disorder and chaos.

LOCATION OF BUZZARDS POINT SITE

This site lies between P Street on the north, Half Street SW. on the east, the Anacostia River on the south, and First Street SW. on the west, and contains 7 squares of ground. The United States Government owns about 33,000 feet of the site. In addition, the Government owns all the water front. The site is pierced by five streets which are broad and improved by water and sewer. The site would accommodate about 2,000 farmers.

The ground could be obtained partly from private owners at 40 cents per foot and the balance through condemnation proceedings at about the same price.

There is an abundance of ground adjacent to the market for commission men, seed and farming implement stores, and business of a kindred nature.

There is sufficient space adjacent to the site for railroad siding enough to provide for several hundred cars. This would enable commission men to sell and deliver direct from the cars, thereby reducing cost of handling to a minimum.

There is sufficient ground in the vicinity to permit expansion for years to come.

RAIL FACILITIES

The Pennsylvania Railroad freight tracks lie five squares north of the site. Congress could authorize the running of a spur from those tracks to the vicinity of the site. Congress could provide that all the railroads which pass over the Pennsylvania tracks in the southwestern part of the city could use that spur. The Baltimore & Ohio would be barred from the sidings now proposed for the southwest site. This would, of course, include the Baltimore & Ohio, which now has trackage rights to Potomac yards, but not on the southwest sidings. This would mean that every railroad bringing fruit and produce to this city could deliver direct to the sidings adjacent to Buzzards Point.

WATER FACILITIES

This site is located adjacent to the only available deep water where boats could navigate. The Government owns the water front, and I am informed there are already tentative plans to build docks on that water front for bulk cargoes. Any other city would consider that broad, deep body of water a great asset. A part of the money which Congress appears willing to purchase a market site with could be used in building docks on that water front, where this city could receive fruits from the Tropics and fruits and vegetables from the fruit and truck growing area along the Chesapeake Bay and the Potomac River.

Even now strawberries from the Norfolk area and watermelons from the country adjacent to the tributaries of the Potomac River come to Washington by boat. Why truck them across the city to Eckington or the mid-city sites when they could be unloaded and sold practically at the water's edge?

ACCESSIBILITY

Buzzards Point because of its isolation from other business districts is the most accessible site that has been presented for your consideration. It is but a few minutes' ride from the center of the city. There is sufficient approach and there would be an abundance of parking space for all. More than half the farmers who are signed up for space at the present farmers' market enter the city at points nearer the Buzzards Point site than any other site proposed. Farmers from every direction and the public as well could reach the site from every direction of the city without coming in contact with the congested down-town areas. In fact, it would not be necessary to cross Pennsylvania Avenue west of the Capitol near the Government buildings or through the Mall.

DISADVANTAGES OF THE SOUTHWEST SITE

The site will accommodate less than 500 farmers according to the present plan of the farmers' market and only about 304 according to the ideal plan which has been suggested.

There are already 613 farmers signed up at the present market. The highest number in any one day to visit the market was 532. The present market would not accommodate them and it was necessary to place them on Tenth and Twelfth Streets. This information was given us by the market master.

The market master also stated that the number of farmers visiting the market has increased about 20 per cent within the last three or four years. This increase is due to the fact that roads are being opened up throughout the country which enable farmers to come here from greater distances than ever before. One farmer came last year from the vicinity of Richmond, Va.

In view of the fact that the southwest site will not accommodate all the farmers who visit the market now, and the further fact that the number is steadily increasing, would it not be the height of folly to select a site which is too small to accommodate the farmers of to-day?

ENGINEERING WEAKNESS

The southwest site is on a steep grade. It is said that it will cost more than $110,000 to grade and build retaining walls. Certainly that in itself should serve to render that site impossible.

The southwest site is located in a pocket near where Potomac Park and the Mall converge. Two squares north of the site the new Agricultural Building will be located. Three squares north is the Smithsonian Institution, three squares west is the Bureau of Engraving and Printing.

It is planned to run a boulevard along Water Street. The south end of the site would be on that boulevard. One square north of the site is the main thoroughfare for automobiles bound from the North to Florida and other southern points. There is heavy traffic both east and west on that street. What interstate traffic does not pass along that street passes up and down Fourteenth Street, three squares west of the site. The traffic on that street is also heavy, for it is the main street leading to Highway Bridge.

Mr. Moore, of the Fine Arts Commission, according to the papers of January 31, stated that Ninth Street could be cut through the Mall, and Fifteenth Street could be cut through the Monument lot to make it possible to get to and from the southwest site. A bill was introduced in Congress a short time ago to provide $5,000,000 to terrace and build steps around the Monument. Now, the suggestion is made to cut streets through the Monument lot and the Mall, so that it will be possible to place the market at the southwest site.

One of the arguments advanced by the southwest advocates is that the fish market is already in that vicinity. If the fish market is there and is in the wrong place, why make a bad condition worse? Why place the farmers' market where both it and the fish market will be eyesores as viewed from Potomac Park?

Suggestions have been made concerning razing the United States post-office building at Twelfth and Pennsylvania Avenue because its location or architectural design will be out of harmony with the building program. We understand that it will be removed within the next 10 years. If the Government favors razing such a building for the sake of art and beauty, it might possibly move the fish market as well.

If the southwest site possessed all the characteristics of an ideal wholesale produce center, which it does not, the fact that it would be out of harmony with the Government buildings and parks would alone be sufficient to render it impossible as a market site.

Within a few years there will be a magnificent array of Government buildings standing between Third and Fourteenth Streets NW. People from all over the world will come to Washington. They will go up in that Monument and look out over that magnificent panorama of Government buildings and parks, and the only thing to mar the beauty of that scene would be the farmers' market.

Not only that, but the slow-moving, heavily laden trucks constantly passing through the Mall to and from the market would impede traffic and contribute to congestion in an area which should by all means be kept beautiful.

Mr. Auth, who testified for the southwest site before the subcommittee, said that the market should be placed in a section of the city away from everything else. We think that is true.

THE ECKINGTON SITE

According to Doctor Simons's own statement and the plan he submitted for the market, the site will only accommodate 521 farmers, nearly a hundred less than are signed up at the market now. If the market is placed there, surrounding ground will immediately advance in price and the cost of expansion will be prohibitive. The site suggested will cost more than $600,000.

The site lies in a triangle between New York Avenue, North Capitol Street, and Florida Avenue. There are car lines on all three streets. The retail trade at the market is so small the car lines will be more of a disadvantage than an advantage. They will only contribute to the general traffic congestion. Florida Avenue is one of the main thoroughfares of the city. The traffic director testified that the automobile count on that street was 2,800 in two hours. The city and suburban cars come down Eckington Place past the Baltimore & Ohio freight yards and then west on New York Avenue.

There are thousands of officeholders who use that car line and in the mornings and late afternoons the cars run every two or three minutes or closer. The Baltimore & Ohio general freight yards are within one square of the Eckington site, where automobiles, building material, furniture, fruit and produce, and every kind of freight is unloaded there and it practically all comes out of the yards onto Eckinton Place and then down to Florida Avenue past the proposed market site.

If you should add to the present congestion the additional traffic which would result from the wholesale produce business being concentrated at that point, you would have an intolerable condition.

THE MID-CITY SITE

This site has the disadvantage of being centrally located. It is too near other business districts. It is but one square from what is known as the congested area, and there is heavy traffic on K Street immedaitely past the site. The K Street market has been located in that square for years and to-day we doubt if more than 40 per cent of the stalls are rented. Notwithstanding its central location, the farmers and the public have preferred to cross to the south of Pennsylvania Avenue to the present farmers' market.

The mid-city site has neither the advantages of rail or water. If the wholesale produce dealers should locate in that vicinity all of their fruits and produce would have to be trucked to their

places of business and then trucked out again, which would add unnecessarily to traffic congestion and increase the ultimate cost to the consumer.

The mid-city site is too small, being the smallest site proposed for this market.

SQUARE 672

According to the newspapers, the Bureau of Efficiency, through Mr. George C. Havenner, has recommended the north half of square 672.

This site is much smaller than the Eckington site, which will accommodate only 521 farmers, and it will not permit expansion except at great cost.

It is only one square from Sibley Hospital, and that alone would make it an undesirable location for the farmers' market.

It would not have the benefit of water facilities and the rail facilities are inadequate.

CONCLUSION

In view of the foregoing, it is plainly evident that the Buzzards Point site is the most logical place for the farmers' market.

Mr. CROSSER. Mr. Chairman and members of the committee, it seems to me that our first consideration in order to determine the location of a farmers' market is: What will suit the convenience of the most buyers?

It will be to the interest of the farmer to go to the place which is easily accessible for the people and where, therefore, they can most easily reach his goods. If we determine the matter from that standpoint, there is no doubt that the southwest location is the most objectionable of all. In the few minutes at my disposal I shall not have an opportunity to treat the subject as I would like. I shall, however, call your attention to several important facts.

Since the question of financial interest has been mentioned, let me call attention to the fact that the Terminal Refrigerating & Warehousing Co. and the Pennsylvania Railroad Co. own the Potomac Freight & Terminal Co. The Potomac Freight & Terminal Co. owns a tract of land just west of the Terminal Refrigerating Co.'s cold-storage plant and lying between the railroad freight yards and Water Street SW. They propose to build on that tract of land stores to be rented to wholesale produce dealers who handle shipped-in produce, when those dealers are forced from their present location at B Street and Louisiana Avenue. The Terminal Refrigerating & Warehousing Co. expects to furnish refrigerating and other service to the produce merchants who rent the proposed storerooms. Laws have already been passed permitting the piping of the freezing medium.

The Terminal Refrigerating & Warehousing Co., for profit, keeps dealers' produce in cold storage and also loans money to the owners of that produce.

If the plan of these interests can be consummated, it is easy to see that to a large extent they will control the wholesale business in Washington. They will have the merchants in that business within their grasp. Likewise the wholesale meat dealers, whom they hope to have, because of necessity, in their building. Thus these financiers plan to control the food supply of the city. Their concern about the location of the farmers' market is because they realize that wherever the farmers' market goes the wholesale produce merchants handling shipped-in produce will go.

That explains why they have a formidable staff of lawyers and lobbyists, including some of the highest-priced men in Washington, who have been particularly active in this matter. The staff is bipartisan. There is Charles Douglas, Democrat; and Edward F. Colladay, Republican; National Committeeman Thomas Littlepage, Republican; and we can not say how many others. They are all high-priced lawyers.

This bill would make the farmers' market strictly a wholesale institution, whereas it should be a retail market as well.

Mr. BLANTON. We have not seen any of those gentlemen.

Mr. CROSSER. I did not interrupt the gentleman, and I did not procure time from him.

If you locate this market in the southwest, it will never amount to anything so far as retail business is concerned. If you wish to bring the farmer and the purchaser together, then you should locate the market where the people will have access conveniently to the farmers' goods; somewhere in the northwest, where four-fifths of the population of the city lives.

Now let me call your attention to the names of some of these gentlemen who own this tract of land immediately across the street from the proposed southwest site for the farmers' market.

POTOMAC FREIGHT TERMINAL CO.—INCORPORATORS

Col. Wrisley Brown, president Terminal Refrigerating & Warehousing Co.; president Washington Market Co.; president Potomac Freight Terminal Co.; residence, 2319 Wyoming Avenue NW.

Frederic D. McKinney, (McKinney & Flanary) lawyer, office Hibbs Building; residence, 1336 New Hampshire Avenue NW. (said to be attorney for Pennsylvania Railroad).

Clarence P. Aspenwall, president Security Storage Co.; residence, 1839 Wyoming Avenue NW.

W. W. Bowie, freight agent Pennsylvania Railroad Co.; Richmond, Fredericksburg & Potomac Railroad; Southern Railroad; and Chesapeake & Ohio Railroad; residence, 2630 University Place NW.

George L. Starkey, president National Bank of Washington; residence, 519 Michigan Avenue NW.

Trustees holding title to tract of land to which I have referred:

Charles J. Bell, president American Security & Trust Co.; chairman of the board Terminal Refrigerating & Warehousing Co.; chairman of board Washington Market Co.; residence, Twin Oaks, Woodley Lane NW.

Clarence F. Norment, chairman of board National Bank of Washington; president Norfolk & Washington Steamboat Co.; vice president Norment, Smith & Fuller Co. (real estate); president Home Mutual Building & Loan Association; residence, Wardman Park Inn.

Thomas W. Hulme, vice president Pennsylvania Railroad Co., Philadelphia, Pa.

Henry H. Lee, treasurer Pennsylvania Railroad Co., Philadelphia, Pa.

George M. Smith, superintendent Baltimore division Pennsylvania Railroad Co., Baltimore, Md.

Harry Wardman, president Wardman Construction Co.; president Wardman Motors (Inc.); residence, 2640 Connecticut Avenue NW.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. BLANTON. Mr. Chairman, I ask unanimous consent that the gentleman may have one minute more. I want to ask him a question.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. GRIFFIN. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GRIFFIN. Is the one minute requested to be in addition to the time fixed upon?

The CHAIRMAN. It is.

Mr. GRIFFIN. I object.

The CHAIRMAN. Objection is heard.

Mr. HOLADAY. Mr. Chairman, I ask that the Clerk read in my time the amendment which I have sent to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Illinois.

The Clerk read as follows:

Amendment offered by Mr. HOLADAY: Page 2, line 18, strike out the period and insert a colon and the following: "*Provided*, That no part of the sum authorized shall be expended for the purchase of any site, the cost of which shall exceed the full value of the assessment of such property last made before purchase, plus 25 per cent of said assessed value."

Mr. BLANTON. Mr. Chairman, when the time comes, I want to make a point of order against the amendment. Is that time now, or some time later?

The CHAIRMAN. Not now.

Mr. BLANTON. Then I reserve a point of order against it.

The CHAIRMAN. The gentleman from Texas reserves a point of order against the amendment.

Mr. HOLADAY. Mr. Chairman and gentlemen, you have heard considerable in the last hour about the fight that is on between the Pennsylvania Railroad and the Baltimore & Ohio Railroad. All that you have heard on both sides is correct. This is a fight between the two railroads, and the interests of the common people have not been considered very much. The amendment I have offered is an amendment that has been adopted in the purchase of school sites, and provides that in buying this site the purchase price shall not be more than the assessed value plus 25 per cent.

I am not very much interested in this fight between the two railroads, because whichever one wins out the taxpayers of Washington are going to lose, and this amendment simply cuts down the amount they are going to lose. I think I know something about this situation. If we would not authorize the purchase of any site, either the Pennsylvania Railroad or the Baltimore & Ohio Railroad would furnish a site free of charge, because either one of them could well afford to do so. I am not going to enter into this dispute between the two railroads, but I do believe it is our duty to place this limitation on this bill or on any bill that may be passed, so that the taxpayers of the District of Columbia and the Government shall be protected.

Mr. BLANTON. Mr. Chairman, will the gentleman yield there?

Mr. HOLADAY. Yes

Mr. BLANTON. It has been stated that this market ought to be placed where the most people are. If you cut off the segment between North Capitol Street west and Pennsylvania Avenue north it would embrace the great majority of the people of Washington living in that segment. If you were to attempt to place this market in that segment you would have the people rising up in arms against it, as they have risen up against the detention house.

They would not want it. Instead of increasing the value of property it will decrease the value of property. They do not want this market near where they live.

Mr. HOLADAY. I am not going into that question; but let us put on this limitation and save that much for the people of Washington. [Applause.]

Mr. ZIHLMAN. Mr. Chairman and gentlemen of the committee, during the last session of Congress I sponsored and passed through this House a bill authorizing an appropriation of $600,000 for a farmers' market, leaving the selection of the site in the discretion of the District Commissioners. The Senate amended that bill by simply providing that the commissioners should make an investigation and report to Congress as to available market sites and the estimated price of the same. In accordance with the provisions of that law there was reported to Congress on the 15th of December a number of recommendations for a market site.

The farmers' market was established in 1870. There are more than 600 farmers using this market. They bring to the market, or did during the past year, 58,000 truck loads of produce and farmers' products, which represents 89,000 tons of produce. These farmers pay 20 cents per day each for the use of a market stall, and that 20 cents last year yielded an aggregate sum of $12,503. Four hundred and sixty-five of these farmers come from Maryland, only 85 from Virginia, and 55 from the District of Columbia. The aggregate value of their products last year was $2,600,000.

It has been stated in the report of the District Commissioners, and it has been conceded by those advocating the various sites, that a farmers' market should be located in close proximity to the commission men. The commission men, as stated upon this floor, have purchased a site in the northeast section; they have put up their money for an option and they are prepared to give to the District Commissioners an available site of as much land as they want in proximity to their establishments for a maximum price of 50 cents per square foot. It is proposed by this bill that we shall go to the southwest section. Why are we going to the southwest section? Is the land cheap?

There are 156,000 square feet in this area and it is estimated that will cost $300,000, $2 a square foot in the southwest section, when land can be purchased in the same section of the city which is available and just as suitable for the purposes of a farmers' produce market, directly south of this Capitol, for 40 cents a square foot. Why go to a site that is owned by a cold-storage company, which, in their arguments before this committee and in their arguments before the District Commissioners, say they will be able to offer cold-storage facilities to the farmers?

Now, a great deal has been said about freight rates over the Pennsylvania and the Baltimore & Ohio Railroads. My friends, a car consigned to Washington for delivery in Eckington, a car from Florida, from the Northwest, or any other section of the country, will carry the same freight rates to a designated point in Eckington as it carries to the southwest section of this city, as is shown by a letter from the Interstate Commerce Commission, which I herewith insert as a part of my remarks.

The Interstate Commerce Commission advises that—

An examination of various of the tariffs shows that in most instances rates for Baltimore & Ohio Railroad and Pennsylvania Railroad deliveries at Washington are the same. As illustrations, the rates on peaches from Fort Valley, Ga., to Washington, for delivery by the Pennsylvania Railroad at their Fourteenth Street yards or for delivery by the Baltimore & Ohio Railroad at their Eckington yards, is $1.20 per 100 pounds, plus a refrigeration charge of $77.50 per car. The rates from Sanford, Fla., on cabbage in car lots is $1.09 per 100 pounds for delivery by either of the above lines, plus a refrigeration charge of $70 per car. The rate on apples in car lots from Portland, Oreg., for either delivery is $1.50 per 100 pounds, plus refrigeration of $400 per car. Traffic moving under class rates as it usually does—from the Central States and from the New England States—the rates are the same. From points on the Richmond, Fredericksburg & Potomac Railroad the rates are the same. From various points noted in Pennsylvania, New York, New Jersey, and Maryland the rates are the same for both deliveries. Rates on fruit and vegetables, carloads, from most points south of the Potomac and east of the Mississippi Rivers are usually the same for either delivery.

In some instances, however, the rates do differ. For illustration, from points in New York on the New York Central Railroad, when traffic moves under class rates, the rates are lower for Baltimore & Ohio Railroad delivery than when for Pennsylvania Railroad delivery; for example, the rates from Syracuse, N. Y., are as follows:

Classes	In cents per 100 pounds							
	1	2	R. 25	3	R. 26	4	5	6
For Baltimore & Ohio R. R. delivery	66½	56½	48	47½	38	34	28½	25
For Pennsylvania R. R. delivery	76½	64½	55	53½	44	40	33½	30

Fresh fruits and vegetables in car lots range from first to fifth class, according to description; from various points on the Baltimore & Ohio Railroad (Ellicott City, Frederick, and Hancock, Md., and Grafton, W. Va., and various other points) the rates (class rates) are lower for Baltimore & Ohio Railroad than for Pennsylvania Railroad delivery; from Lanham, Md. (Pennsylvania Railroad), the fifth-class rates are 11½ and 13 cents for Pennsylvania Railroad and Baltimore & Ohio Railroad deliveries, respectively; from Rockville, Md. (Baltimore & Ohio Railroad), different rates for Baltimore & Ohio Railroad and Pennsylvania Railroad deliveries, respectively, are fourth class 16 and 17 cents and fifth class 13 and 15½ cents per 100 pounds. Other than from Lanham and Rockville representative of near-by points we have not noted other points with different rates for the different deliveries; rates on fruit and vegetables from North Carolina and Virginia points on Norfolk Southern Railroad are higher for Baltimore & Ohio Railroad than for Pennsylvania Railroad delivery; watermelons from points on Southern Railway or Georgia Southern & Florida Railway are higher for Baltimore & Ohio Railroad than for Southern Railway delivery (also at Fourteenth Street yards). Watermelons originating at other than Southern Railway or Georgia Southern & Florida Railway stations or when routed via lines (Atlantic Coast Line, Seaboard Air Line, etc.) other than Southern Railway rates are the same for both deliveries.

A general and exhaustive tariff search would require a great amount of time and such check has not been made, but the partial check as indicated is believed to be fairly representative.

A great deal has been said about water transportation. Less than 6,000 tons of produce, out of a total of 89,000 tons, came into this city last year by water transportation, and that chiefly on the Norfolk and Washington steamboats.

A great deal has been said about putting it adjacent to a fish market. The fish market was located in the southwest section of the city and heralded as a great accommodation to the people, but how many people of the retail trade use it? How many use the fish market?

I make this statement, and I challenge somebody in their own time to answer it, that the fish market to-day is exclusively a wholesale market, and if you locate this market in the southwest section of this city it is going to become exclusively a wholesale market.

I have not advocated any particular site, but I have been in favor of a site which would serve everybody.

I originally favored amending the bill by providing that the farmers' market should be located north of Pennsylvania Avenue, as advocated by 95 per cent of the farmers who use the market, as advocated by the National Capital Park and Planning Commission, the Bureau of Efficiency, and a majority of the citizens' associations of the District of Columbia, but this proposal was ruled out on a point of order made by the gentleman from Texas [Mr. BLANTON].

The site in the southwest section, containing only 156,000 square feet, is not large enough for use as a market center, and the squares on which it is proposed that the market should be built do not lend themselves to the economic erection of sheds for a market of this kind.

I am advised that it will cost $110,000 to put this site in condition for the erection of the steel sheds which it is proposed to build.

I predict the members of the committee will realize that a monumental mistake has been committed in putting this convenience to the south of the public buildings and grounds on which it is estimated nearly $100,000,000 will be spent during the coming five years.

Last Friday we passed in the House the District of Columbia appropriation bill, which imposed a limitation of 125 per cent on the price to be paid for all land for school sites and park purposes. The gentleman from Illinois [Mr. HOLADAY] has offered an amendment which will put the same limitation in this bill. I favor that amendment and hope it will be adopted, as it will save the Government in the neighborhood of $150,000.

This market should be placed near the center of population, and 70 per cent of the population is northeast and northwest and not southwest. Eighty per cent of the retail stores are in the northeast and northwest, and 97 per cent of the hotels are in the northeast and northwest.

It is impractical and undesirable to compel automobile and truck traffic, totaling 58,000 loads last year, to pass through the densest traffic area of the city, to be unloaded and then redistributed in smaller volume through the same congested area.

The amendment proposed by the gentleman from Maryland [Mr. GAMBRILL] would substitute an area of 6½ acres, containing approximately 301,000 square feet. This land can be purchased at a price of $1.60 per square foot, as compared with $2 in the southwest section. This area is sufficiently large to permit the erection of buildings and the installation of equipment that will adequately provide facilities for the truckers and farmers in the immediate vicinity of Washington for many years to come. This site is close to the center of population and close to the geographical center of the city, and so situated as to be easily reached by the large and growing population, and the growth of Washington is to the northeast and northwest.

This site is accessible to the great majority of farmers and truckers, regardless of the territory from which they come. The total acreage devoted to fruits and vegetables by farmers who sell on the farmers' market is 14,227.

The same routes which make this location easily accessible to the farmers and truckers will provide easy access to the market for wholesale buyers and for such consumers as may travel by automobile. Those who make use of the street cars will be able to reach this market site easily from any part of the city over the three lines now operating on New York Avenue, Florida Avenue, and North Capitol Street. From the buyer's standpoint, square 669 is the best location that can be found.

This location is away from the down-town office and business section, close enough to well-traveled and broad thoroughfares to promote business, and yet sufficiently far from the heavily congested traffic area to prevent traffic complications. Ample parking space is available in this vicinity, and the many different streets radiating to all sections of the city make it an ideal distribution point. It is at the junction of two of the city's broad thoroughfares—New York and Florida Avenues—and is served by another important highway—North Capitol Street. An easy flow of traffic in all directions is thus assured.

The CHAIRMAN. The time of the gentleman from Maryland has expired.

Mr. BLANTON. Mr. Chairman, I challenge that statement in my own time.

Mr. SEARS of Florida. Mr. Chairman, I did not want to get involved in this dispute, because I did not know it was a question between the railroads or the District of Columbia. For intelligent men, though, I have heard strange arguments advanced. In other words, we must locate a fish market and a city market at or near Du Pont Circle for the convenience of the citizens or in order that we may enhance the value of that property. That is near the center of population. My good friend and colleague who has just closed said that the commission men, with their usual foresight, have already gotten options on the other site, and they will lose their money unless we pass a bill providing for a site in that section. Let me commend the commission men upon their wonderful foresight.

Mr. ZIHLMAN. I did not say that.

Mr. SEARS of Florida. I am congratulating those men upon their judgment. The gentleman said they had options down there, and certainly they must have taken those options in anticipation of something being located down there.

I listened to another one of my good friends who said he did not think anything about the people back home. Of course, Florida always has to come in. I want to be frank with you. I think he thinks about the people back home just as much as I do, and I am here to speak for the truck growers of Florida, and I have no apology to make.

I want to say to you that at one time I had an apartment in Washington, and, if I remember correctly, you have markets in nearly every section of the city. Those are the places where these people can come in with their trucks and sell their produce. But when you send in trainloads, it is a different proposition. Those of you who know anything about railroading know that the railroads have to use their switch engine with nearly every car and shoot it around the city, and sometimes it is from one to three days before you get your tomatoes finally to the place where you can unload them. That is why we are appealing to you. I again assure you I have nothing against the railroads or the good people of the District of Columbia, and I sincerely believe the bill as drawn and reported by the committee is best for both.

I want to say to the good people of Washington that if you should cut off the outside supplies, the few good people around Maryland could not feed Washington for one hour. God knows I want them to prosper, but they could not give Washington one good, square meal. You have to rely on the other sections of the country, and I believe we ought to locate this market in the southwest for the benefit of the entire country. This is not a District subject but a national subject, and I believe the truckers and the growers of the entire country will profit by the passage of this bill placing the market in the southwest.

Mr. BLANTON. Will the gentleman yield?

Mr. SEARS of Florida. Yes.

Mr. BLANTON. Not only do the people of Washington go down to the southwest market on Water Street for their fish and oysters now, but they go down to that market for bananas and for watermelons, and for iceberg lettuce and strawberries in season, and for lots of other things that come in by the shipload up the Potomac.

Mr. SEARS of Florida. My good friend from Texas does not like oysters any better than I do. I tried to eat six dozen one night, but I could not do it. I only got away with about five dozen; and, as usual in Washington, I lost. But they have other things in Washington and as a business proposition I trust you gentlemen will favor the passage of this bill.

Mr. HOLADAY. Will the gentleman yield?

Mr. SEARS of Florida. Yes.

Mr. HOLADAY. Has the gentleman considered the possibilities of Buzzards Point where great ocean liners from Miami or liners coming down through the Cape Cod Canal could unload?

Mr. SEARS of Florida. Buzzards Point appeals to me because down in Florida we have the buzzard, and you could throw out the decayed fish at the market and the buzzards would devour them and you would not have to haul them away.

Mr. BUTLER. Will the gentleman yield?

Mr. SEARS of Florida. I will always yield to my friend from Pennsylvania [Mr. BUTLER].

Mr. BUTLER. Will the gentleman please put his finger on that map at a point where the town-lotters are not interested?

Mr. SEARS of Florida. I doubt if there is such a place.

Mr. BUTLER. I want to vote for that. I am not going to help to exploit town lots, and if somebody can tell me where the town-lotters are not interested I will vote for that location.

Mr. SEARS of Florida. The chairman of the Committee on Appropriations, the gentleman from Illinois [Mr. MADDEN], said that one site would cost $300,000, which is the site I am advocating, and the other would cost $600,000. I am opposing the $600,000 site.

Mr. BUTLER. I suppose there are options on the real estate surrounding both of these proposed sites. Where is there some place we can get where we will not be putting the price of real estate way up in the air at the expense of the people of the city?

The CHAIRMAN. The time of the gentleman from Florida has expired.

Mr. GRIFFIN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. GRIFFIN: Strike out the enacting clause.

Mr. GRIFFIN. Mr. Chairman, ladies and gentlemen of the committee, this House is practically the board of aldermen and the board of estimate and apportionment of a great city.

This body wants to do the square thing. The membership of this House, realizing the handicaps under which the residents of Washington suffer, want to consider their interests if the facts are honestly and fairly placed before them. I know from the interest displayed in this proposal a most unusual interest, far superior to the interest usually displayed in District bills, that the men and women of this House want to know the truth.

Now, there is danger of your not knowing the truth if you allow your judgment to be perverted and your hearts and sympathies to be biased by so-called attitudes of certain persons or bodies. It has been said this bill is reported out by 17 members of the District of Columbia Committee, who ought to know the facts, and there is a tendency to prejudge the matter—influenced by the fact that a mere majority voted for this particular bill. It has also been suggested that the Commissioners of the District are for this particular site.

Now, my friends, arguments of this kind having to do with persons make no appeal to me. They leave me cold. I have no blessed interest in any site in the city of Washington. I do not care where they put this market, as a matter of fact, but I

do feel in all candor that I ought to say to you that the site selected in the southwest section of the city is not selected for the benefit of the people of the District but rather for the benefit of certain railroads and certain cold-storage warehouses.

This bill is a vicious, damnable bill. It is a crime upon the people of the District to put a market in this section of the city where it is not available to the great bulk of the consumers. The fundamental reason for the establishment of a market anywhere is to bring the consumers and the producers together.

Mr. STALKER. Will the gentleman yield?

Mr. GRIFFIN. Are you going to bring the consumers and the producers together there? No; confessedly not. They show "the horn and foot" when they say that a proposal to put the market somewhere else will put it out of contact with the cold-storage plants.

Mr. STALKER. Will the gentleman yield?

Mr. GRIFFIN. If you ask the average consumer he will say the people do not want storage warehouses. Cold-storage warehouses where the farm produce is stored in ice so as to keep it back for profiteering and away from the consumers are a curse rather than a blessing. Cold-storage warehouses are, in some respects, great things—they are a mark of modern progress, but they have been perverted so that they have become instrumentalities of profiteering. It is wrong, and unnecessary, to put this market contiguous to a cold-storage plant because the farm produce that is raised by the farmers and brought here by their trucks ought to be put where the people can get fresh produce, where they can use it the day it is brought in. [Applause.] We do not want to put the farm products in storage warehouses on ice where the people can not get them until the profiteers see fit to release them to the consumers. [Applause.]

Mr. Speaker, my amendment is to strike out the enacting clause of this bill, not because I am opposed to the authorization for a farmers' market but solely because I am opposed to the particular site in the southwest section, where it will be quite obviously out of reach of the bulk of residents of the District.

PROPOSITION 1

The object of a public market, built and maintained by any government, is to bring the producers and the taxpaying consumers together without the intervention of commission men or middlemen.

As a corrollary to this, it follows that a farmers' produce market ought to be placed in some part of the city where it will be convenient to the farmers to show their stock and easily accessible to the consumers who come to purchase their supplies.

The southwest site proposed in this bill does not meet these conditions. It is convenient enough to trucks of the farmers of Virginia, but it has appeared in this discussion, and not controverted, that only 17 per cent of the produce comes from Virginia, while 83 per cent comes from the Maryland side.

Manifestly, placing the market so as to consult the convenience of Virginia farmers would not be just to the Maryland farmers, who furnish the great bulk of the supplies.

It would also not be fair to the great bulk of the consumers who live north of Pennsylvania Avenue.

To place it south of Pennsylvania Avenue, as this bill proposes, introduces another factor of concern to the general welfare of the city at large, for if it is put in that location it will increase the congestion of traffic at points in the city already unduly congested, by throwing into the converging avenues of traffic not only the farmers produce wagons from Maryland but the conveyances of the consumers who will be obliged to patronize the market.

Furthermore, the Mall is expected to be a monumental feature of the Capital of the Nation and it is not going to add to its attractiveness to have its avenues cluttered with farm wagons, grocery wagons, and conveyances all day long.

The argument has been gravely made here to-day that it is desirable to have the farmers' produce markets contiguous to a certain cold-storage plant. I will pass over the point that the owners of this particular plant have been the most insistent, if not the only, advocates of this particular site, and that an interlocked corporation is the owner of the land proposed to be purchased under the bill.

PROPOSITION 2

Are farmers' produce markets for the convenience of the consumers or are they to be built at public expense to furnish business to cold-storage plants, where the products of the farm, the orchard, and the dairy are kept out of the reach of consumers?

To talk about the necessity of having the proposed market contiguous to the cold-storage plant betrays the real animus behind the bill. Not only that, but it presents the strongest possible argument against the entire project.

What is a farmers' produce market for? To furnish a dumping place where fruits, vegetables, eggs, and butter may be easily transferred into a cold-storage plant, where they can be held by middlemen and speculators until they see fit to release them?

Or is the market a place where the consumers can deal directly with the producers and provide their tables with the products of the farm and dairy without the vicious intervention of profiteers?

As I have heretofore said, I have no interest in any particular site among all those proposed. All that I maintain is the fundamental proposition that the market be so placed as to consult the convenience of the bulk of the consumers.

The advocates of the various sites north of Pennsylvania Avenue have injured themselves and done a great injustice to the people of the District by dividing their forces and quibbling over particular sites. They should have sunk their individual preferences and interests and united as one against the southwest site—leaving the future to take care of itself. That is why I moved to kill the present bill by striking out the enacting clause.

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. GRIFFIN. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

Mr. STALKER. Mr. Chairman, I object.

Mr. BLANTON. Mr. Chairman, I rise in opposition to the motion. They are now tearing down the farmers' market. In a few days there will not be any farmers' market, and there must be another one established. Our committee has had the question of locating a new farmers' market before it ever since this Congress met. If you were to adopt the drastic motion of the gentleman from New York to strike out the enacting clause, you would place us right back where we were at the beginning of this Congress. What would your committee do under such circumstances when it has brought in here a bill, by a vote of 17 out of 21 to locate the market in the southwest?

I want to say that there is not a man in this House that would have a farmers' market at his back door. There is not a citizen living in the District who wants the market put in his street or near his residence, and yet the whole argument against this location and this selection has been that you are taking it away from the people. That is where the people want it, away from them.

If you will draw a segment from North Capitol Street west and then north of Pennsylvania Avenue, that segment will contain a great majority of the people who live in that district. If you were to make an attempt to-day to locate the market in that segment west of North Capitol and north of Pennsylvania Avenue, you would find every property holder rising up in arms against it.

What has been done? Your committee voted under the careful guidance of the gentleman from New York [Mr. STALKER], with the help of the distinguished lady from New Jersey [Mrs. NORTON], with our friend from Indiana [Mr. HALL], and the gentleman from Virginia [Mr. WHITEHEAD], having carefully heard all of the arguments for and against this site—voted for it.

They heard every one of the arguments for and against every other site. They have found out that they can buy the southwest site for $300,000.

Mr. GAMBRILL. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. GAMBRILL. If you select this location, will you not be right across, or nearly so, from an eight-room school building?

Mr. BLANTON. Well, I hope the time will come when you can not locate a market anywhere without being close to a school building. [Laughter.] Your committee has found that it can buy this site for $300,000. They have solved the traffic problem and the traffic department has approved the site. The District Commissioners have unanimously approved the site, and they are unanimously in favor of this southwest site.

If you vote for the motion to strike out the enacting clause, you are turning down the District Commissioners, you are turning down to 17 men out of the 21 members of the District Committee, you are leaving the people of Washington without any market whatever; and when are they going to get a market?

Mr. GRIFFIN. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. GRIFFIN. I would like to ask whether or not it is not a fact that in order to put this southwest site in proper condition for a farmers' market it will be necessary to spend $110,000?

Mr. BLANTON. It will not cost half as much as it will to put the Eckington site into condition. Our friends from Maryland admit that the same wholesalers and cold-storage men

have a $40,000 option up for this Eckington site, and they hope to unload it on the District of Columbia at a big profit.

The CHAIRMAN. The time of the gentleman from Texas has expired. The question before the House is the motion of the gentleman from New York to strike out the enacting clause.

The question was taken; and on a division (demanded by Mr. GRIFFIN) there was 1 aye and 110 noes.

So the motion was lost.

Mr. GAMBRILL. Mr. Chairman, I ask to modify my amendment by changing the figures from 7 to 11 on page 1, and 1 to 5 on page 2.

The CHAIRMAN. The gentleman from Maryland asks unanimous consent to modify his amendment, and without objection it will be so ordered. The Clerk will report the amendment in its modified form.

The Clerk read as follows:

Amendment proposed by Mr. GAMBRILL: Strike out all of lines 7 to 11, inclusive, on page 1, and all of lines 1 to 5, inclusive, on page 2 and insert the following: "Square 669 bounded by North Capitol Street, First Street, Florida Avenue, O, and P Streets SE., for the purpose of a farmers' produce market, and to close as a street, and to use for the purpose of this act such portion of any public street, or streets adjacent to, or within such site as an addition thereto, as in their judgment, the public interests will permit: *Provided*, That no property owner shall thereby be deprived of egress from or ingress to his property."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maryland.

The question was taken; and on a division (demanded by Mr. GAMBRILL), there were—yeas, 15; nays, 109.

So the amendment was rejected.

Mr. HOLADAY. Mr. Chairman, I offer the amendment which is at the Clerk's desk.

Mr. BLANTON. Mr. Chairman, will the Chair permit a parliamentary inquiry?

The CHAIRMAN. Yes.

Mr. BLANTON. Has debate closed?

The CHAIRMAN. All debate is closed.

Mr. BLANTON. Would it be parliamentary to state that this amendment, if adopted would have the same effect, as striking out the enacting clause? It would kill the bill?

The CHAIRMAN. That is not a parliamentary inquiry. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. HOLADAY: Page 2, line 18, strike out the period, insert a colon, and add the following: "*Provided*, That no part of the sum herein authorized shall be expended for the purchase of any site, the cost of which shall exceed the full-value assessment of such property last made before purchase, plus 25 per cent of such assessed value."

Mr. BLANTON. Mr. Chairman, I make the point of order against the amendment, that it is not germane to the purpose of the bill. It is a well-known fact to the committee that this property was assessed at $111,000. If we were to adopt this amendment, you could not pay for the site more than $147,000, which will not buy the property. The committee is well aware of the fact that the property itself is really worth, actual market value, about $300,000.

Mr. TILSON. Mr. Chairman, the gentleman should address himself to the point of order.

The CHAIRMAN. The gentleman will confine himself to a dicussion of the point of order.

Mr. BLANTON. The purpose of this bill is to acquire this market site, which will require the expenditure of $300,000. To restrict the price to half that sum will defeat the bill.

Mr. TILSON. Mr. Chairman, the gentleman has made a point of order, and he should address himself to the point of order and not to the merits of the amendment.

Mr. BLANTON. My point of order is that the amendment is not germane, in that it would defeat the very purpose of the bill and would prevent the purchase of a market site. I am thus trying to get this cogent fact before you when you vote.

Mr. TILSON. The gentleman knows very well that because the proposed amendment might defeat entirely the purpose of the bill is no argument on the point of order.

The CHAIRMAN. The Chair is prepared to rule. The amendment in question is simply a clarifying phrase. The bill provides for an authorization of $300,000, "or as much thereof as may be necessary." The amendment proposed by the gentleman from Illinois merely undertakes to state the manner in which the amount authorized shall be expended. The point of order is overruled.

The question is on the amendment offered by the gentleman from Illinois.

The question was taken; and on a division (demanded by Mr. HOLADAY) there were—ayes 75, noes 96.

Mr. HOLADAY. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed Mr. HOLADAY and Mr. BLANTON to act as tellers.

The committee again divided; and the tellers reported—ayes 75, noes 121.

So the amendment was rejected.

Mr. DALLINGER. Mr. Chairman, I ask for a vote upon my amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Massachusetts.

The Clerk read as follows:

Amendment offered by Mr. DALLINGER: Strike out the first 11 lines on page 1 and the first 5 lines on page 2 of the bill and insert in place thereof the following:

"That the Commissioners of the District of Columbia be, and they are hereby, authorized and directed to acquire, by purchase or condemnation, or partly by purchase and partly by condemnation, as they might deem best, a site for the farmers' produce market in squares 656, 658, 661, 663, 665, 667, and south of 667, bounded by First, Half, and P Streets, and the Anacostia River southwest."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts.

The question was taken, and the amendment was rejected.

Mr. BLANTON. Mr. Chairman, I move that the committee do now rise and report the bill back to the House without amendment, with the recommendation that the bill do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. BEEDY, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 8298) authorizing acquisition of a site for a farmers' produce market, and for other purposes, and had directed him to report the same back to the House without amendment, with the recommendation that the bill do pass.

Mr. BLANTON. Mr. Speaker, I move the previous question on the bill to final passage.

The previous question was ordered.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. BLANTON, a motion to reconsider the vote by which the bill was passed was laid on the table.

CONFERENCE REPORT—INDEPENDENT OFFICES

Mr. WOOD, from the Committee on Appropriations, submitted a conference report upon the bill H. R. 9481, making appropriations for the Executive Office and sundry independent executive bureaus, boards and commissions, and offices, for printing under the rule.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9481) "making appropriation for the Executive office and sundry independent executive bureaus, boards, commissions, and offices, for the fiscal year ending June 30, 1929, and for other purposes," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 5, 7, 11, 12, 13, and 14.

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: ", of which $1,000,000, or so much thereof as may be necessary, may be used for reconditioning and operating ships for carrying coal to foreign ports," and the Senate agree to the same.

Amendment numbered 8: That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: ": *Provided*, That not more than one attorney shall be paid in excess of $10,000 per year"; and the Senate agree to the same.

The committee of conference have not agreed on amendments numbered 1, 4, 9, and 10.

WILL R. WOOD,
EDWARD H. WASON,
THOMAS H. CULLEN,
Managers on the part of the House.

F. E. WARREN,
REED SMOOT,
W. L. JONES,
LEE S. OVERMAN,
CARTER GLASS,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9481) "making appropriations for the Executive office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1929, and for other purposes," submit the following statement in explanation of the effect of the action agreed upon by the conference committee and embodied in the accompanying conference report as to each of such amendments, namely:

On No. 2: Inserts the language, proposed by the Senate, including in the appropriation for the National Advisory Committee for Aeronautics the sum of $5,000 for procurement and development of a design for a wind tunnel suitable for research on full-sized airplanes.

On No. 3: Strikes out the appropriation of $14,347, inserted by the Senate, for a utility building and the lighting of the grounds of the Perry Victory Memorial.

On No. 5: Restores the language, stricken out by the Senate, providing for the location of a bathing pool on the site of the McKinley High School.

On No. 6: Inserts the language, proposed by the Senate, relative to the use of the appropriation for the Merchant Fleet Corporation for reconditioning and operating ships for carrying coal to foreign ports, modified so as to reduce the amount to be so available from $1,400,000 to $1,000,000, to strike out reference to the number of ships to be so used, and to make the authority permissive instead of mandatory.

On Nos. 7 and 8, relative to the compensation of officers and employees of the Shipping Board and Merchant Fleet Corporation: Under the limitation upon salaries which may be paid at rates in excess of $10,000 a year, three at not to exceed $15,000 are provided as proposed by the House, instead of two as proposed by the Senate; and the limitation of $10,000 upon salaries of attorneys, proposed by the Senate, is modified so as to permit the employment of only one attorney at a rate in excess of $10,000.

On No. 11: Strikes out the limitation, proposed by the Senate, on the amount that may be expended for fees of attorneys.

On No. 12: Strikes out the appropriation of $65,000, inserted by the Senate, for an additional amount for the Water Boundary Commission, United States and Mexico.

On No. 13: Corrects a section number in the bill to conform to the action of the conferees.

On No. 14: Inserts the total of the bill in the amount as passed by the House, instead of the amount as passed by the Senate.

The committee of conference have not agreed to the following amendments:

On No. 1: Extending the duties of the Bureau of Efficiency to include investigations in connection with the municipal government of the District of Columbia.

On No. 4: Providing pay at per diem rates for certain classes of employees under the Office of Public Buildings and Public Parks of the National Capital.

On No. 9: Relating to the discontinuance of the sea service bureau of the Merchant Fleet Corporation.

On No. 10: Relative to the use of not to exceed $10,000,000 from the construction and loan fund of the Shipping Board in reconditioning the steamships *Mount Vernon* and *Monticello*.

WILL R. WOOD,
EDWARD H. WASON,
THOS. H. CULLEN,
Managers on the part of the House.

CONFERENCE REPORT—ALIEN PROPERTY BILL

Mr. GREEN of Iowa. Mr. Speaker, I present a conference report upon the bill (H. R. 7201) to provide for the settlement of certain claims of American nationals against Germany and of German nationals against the United States for printing under the rules and ask unanimous consent that I may have until midnight to-night to file the statement accompanying the conference report.

The SPEAKER. The gentleman from Iowa asks unanimous consent that he may have until midnight to-night to file a statement. Is there objection?

Mr. GARRETT of Tennessee. Is this a complete agreement signed by all the conferees?

Mr. GREEN of Iowa. Yes.

The SPEAKER. Is there objection?

There was no objection.

EMPLOYMENT OF MINORS WITHIN THE DISTRICT OF COLUMBIA

The SPEAKER. The gentleman from Maryland moves that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 6685) to regulate the employment of minors within the District of Columbia. The question is on agreeing to that motion.

Mr. BLANTON. Will not the gentleman from Maryland ask unanimous consent to withdraw his motion and move to have this bill considered in the House as in Committee of the Whole? We can dispose of several bills in that way. Otherwise we would have to report each bill back to the House after we got through with it.

Mr. ZIHLMAN. Mr. Speaker, I ask unanimous consent that this bill be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 6685) to regulate the employment of minors within the District of Columbia

Be it enacted, etc., That no child under 14 years of age shall be employed, permitted, or suffered to work in the District of Columbia, in, about, or in connection with any gainful occupation, with the exemption of housework performed outside of school hours in the home of the child's parent or legal guardian or agricultural work performed outside of school hours in connection with the child's own home and directly for the child's parent or legal guardian.

SEC. 2. No minor under 18 years of age shall be employed, permitted, or suffered to work in, about, or in connection with any gainful occupation, except in agricultural work or housework, as specified in section 1 of this act, more than 6 consecutive days in any 1 week, or more than 48 hours in any 1 week, or more than 8 hours in any 1 day, nor shall any girl under 18 years of age or boy under 16 years of age be so employed, permitted, or suffered to work before the hour of 7 o'clock in the morning or after the hour of 6 o'clock in the evening of any day, nor shall any boy between 16 and 18 years of age be so employed before the hour of 6 o'clock in the morning or after the hour of 10 o'clock in the evening of any day. Every employer shall post and keep conspicuously posted in the establishment, in or about which any minor is employed, permitted, or suffered to work, a printed notice, furnished by the official authorized to enforce this act, setting forth the legal regulations governing the employment and hours of work of minors and occupations prohibited to minors in such establishments, and, in addition, shall keep accessible in the place of employment a list of minors under 18 employed, permitted, or suffered to work, and an accurate time record showing the hours of beginning and ending work each day and the hours when the time allowed for meals begins and ends for said minors. The presence of any such minor in the place of work for a longer time in the day or week than stated in the printed regulation shall be prima facie evidence of a violation of the provisions of this section.

SEC. 3. No minor shall be employed, permitted, or suffered to work in any place of employment, or at any employment, dangerous or prejudicial to the life, health, safety, or welfare of such minor. It shall be the duty of the Board of Education of the District of Columbia, and the said board shall have power, jurisdiction, and authority, after hearing duly held, to issue general or special orders prohibiting the employment of such minors in any employment or at any place of employment dangerous or prejudicial to the life, health, safety, or welfare of such minors: *Provided*, That no such order shall permit the employment of any minor at any employment specified in sections 4 to 7 of this act at a lower age than the age therein specified.

Mr. BLANTON. Mr. Speaker, I ask unanimous consent that the further reading of the bill be dispensed with.

The SPEAKER. The gentleman from Texas asks unanimous consent that the further reading of the bill be dispensed with. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report the committee amendments.

The Clerk read as follows:

Page 2, end of line 2, strike out period, insert comma, and add: *"Provided,* That boys 10 years of age and over may be employed outside of school hours in the distribution or sale of newspapers, subject to the provisions of sections 17 to 24 of this act."

Page 2, section 2, line 8, after the word "housework" add "or in the distribution or sale of newspapers."

Page 2, section 2, line 11, after the word "act" add "and except in newspaper stuffing subject to the provisions of section 17 of this act."

Page 2, section 2, line 16, strike out the word "six" and insert the word "seven" in lieu thereof.

Page 3, section 2, line 9, after the word "regulation" insert the following: "or during the prescribed hours."

Page 4, section 6, line 18, after the word "male" strike out the words "under 21 years of age" and insert the words "between the ages of 18 and 21" in lieu thereof.

Page 4, section 6, line 23, strike out the words "10 o'clock in the evening" and insert the words "12 o'clock midnight" in lieu thereof.

Page 6, section 9, line 17, strike out the word "excepting" and insert the word "except" in lieu thereof.

Page 11, section 12, line 11, strike out the word "my" and insert the word "by" in lieu thereof.

Page 14, section 17, beginning of line 18 insert: "No boy under 16 years of age shall be employed in the stuffing of newspapers, nor shall the work of any boy between the ages of 16 and 18 so employed exceed 40 hours in any one week, nor shall he be employed on more than one night in any one week."

Page 14, section 17, line 23, strike out the word "fourteen" and insert the word "twelve" in lieu thereof.

Page 15, section 17, line 4, after the word "that,' insert the words "the provisions of this bill shall not apply to."

Page 15, section 17, line 5, strike out the word "twelve" and insert the word "ten" in lieu thereof.

Page 15, section 17, line 5, after the word "over" insert the words "engaged in the."

Page 15, section 17, line 5, strike out the word "distribute" and insert the words "distribution of" in lieu thereof.

Page 15, section 17, line 7, strike out the words "subject to the provisions of this act."

Page 18, section 22, line 18, after the word "custodian" insert the words "and with his or her knowledge or counsel."

Page 23, after section 28, insert the following:

"SEC. 29. The Board of Education shall exercise general supervision and appellate jurisdiction over the agents and employees of said board engaged in the execution of this act."

Page 23, line 4, change the figures "29" to "30."

The SPEAKER. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ZIHLMAN, a motion to reconsider the vote whereby the bill was passed was laid on the table.

DEPOSITS OF MONEY AND PROPERTY IN BANKS

Mr. ZIHLMAN. Mr. Speaker, I call up House bill H. R. 6856, from the House Calendar.

The SPEAKER. The gentleman from Maryland calls up the bill H. R. 6856, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 6856) relating to the payment or delivery by banks or other persons or institutions in the District of Columbia of deposits of money and property held in the names of two or more persons, and for other purposes.

Mr. BLANTON. Mr. Speaker, I ask unanimous consent that the first reading of the bill be dispensed with.

Mr. TILSON. Mr. Speaker, I think the bill should be read at least once.

Mr. BLANTON. This bill comes with the approval of the committee and with the approval of every bank in the District. Yet I think it should be read at least once.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That when a deposit shall have been made or shall hereafter be made in, or any collection item shall have been placed or shall hereafter be placed with, any bank, trust company, savings bank, building association, or other banking institution, including national banks, transacting business in the District of Columbia, or when any shares of stock shall have been issued or shall hereafter be issued by any building association, transacting business in the District of Columbia, in the names of two or more persons, including husband and wife, payable to either, or payable to either or the survivor or survivors, such deposit, or in any part thereof, or any interest or dividend thereon, and such collection item or its proceeds, or any interest or dividend thereon, or such shares of stock issued by a building association or any interest or dividend thereon, may be paid or delivered to either of said persons whether the other or others be living or not; and the receipt or acquittance of the person to whom such payment or delivery is made shall be a valid, sufficient, and complete release and discharge of the bank, trust company, savings bank, building association, or other banking institution, including national banks, for any payment or delivery so made.

SEC. 2. That when a safety deposit box or vault shall have been hired or shall hereafter be hired from any bank, trust company, savings bank, building association, or other banking institution, including national banks, or any other corporation, transacting business in the District of Columbia, in the names of two or more persons, including husband and wife, with the right of access being given to either, or with access to either or the survivor or survivors of said persons, or property is held for safe-keeping by any such bank, trust company, savings bank, building association, or other corporation or banking institution, including national banks, for two or more persons, including husband and wife, with the right of delivery being given to either, or with the right of delivery to either or the survivor or survivors of said persons, any one or more of such persons, whether the other or others be living or not, shall have the right of access to such safety deposit box or vault and to remove the contents thereof, or any part of such contents, or to have delivered to him or them the property so held for safe-keeping, or any part thereof, and in case of such removal or delivery the said bank, trust company, savings bank, building association, or other corporation or banking institution, including national banks, shall be exempt from any liability for permitting such access or removal or for the delivery to such person or persons.

SEC. 3. Whenever a writ of attachment shall be served on any bank, trust company, savings bank, or other banking institution, including national banks, or on any other corporation, association, or person as garnishee, and such garnishee holds a credit or property for two or more persons, including the person whose credit or property is sought to be attached, or holds a credit or property for any person as agent or trustee or in any other representative capacity without designation of the principal or beneficiary, such credit or property shall not be subject to withdrawal by any person, but shall be held by the garnishee until the attachment shall have been dismissed or otherwise disposed of by the court. If the credit or property is condemned, payment or delivery thereof as ordered by the court shall be a complete discharge of the garnishee from all liability to any person in respect of said credit or property. The provisions of this section shall not be construed to apply to a credit or property of a partnership.

The SPEAKER. Without objection, the Clerk will correct the text on page 3, line 3.

There was no objection.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ZIHLMAN, a motion to reconsider the vote whereby the bill was passed was laid on the table.

DESCENT AND DISTRIBUTION OF PROPERTY

Mr. ZIHLMAN. Mr. Speaker, I call up the bill H. R. 49 on the House Calendar.

The SPEAKER. The gentleman from Maryland calls up the bill H. R. 49, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 49) to amend the Code of Law for the District of Columbia in relation to descent and distribution

Be it enacted, etc., That the Code of Law for the District of Columbia be, and the same is hereby, amended as follows:

When a person having right or title to any real or personal estate shall die intestate as to such estate it shall descend to his kindred, male and female, in the following order, viz:

1. To the surviving husband or wife so much thereof and under such conditions as now provided by law; then

2. To his children and their descendants; if none, then

3. To his father and his mother, if both are living, one moiety each; but if the father be dead, then the mother, if living, shall take the whole estate; if the mother be dead, then the whole estate shall pass to the father; if no father nor mother, then

4. To his brothers and sisters and their descendants; if none, then

5. One moiety of the estate shall pass to the paternal and the other to the maternal kindred, in the following order:

6. First, the grandfather and grandmother, equally, if both be living, but if one be dead, then the entire moiety shall go to the survivor; if no grandfather or grandmother, then

7. To the uncles and aunts and their descendants; if none, then

8. To the great-grandfathers and great-grandmothers, in the manner prescribed for grandfathers and grandmothers, in subsection 6; if none, then

9. To the brothers and sisters of the grandfathers and grandmothers, and their descendants, and so on in other cases without end, passing to the nearest lineal ancestors and their descendants as herein prescribed.

10. If there be no such kindred to one of the parents, the whole shall go to the kindred of the other; if there is neither paternal nor maternal kindred, the whole shall go to the husband or wife of the intestate; or, if the husband or wife be dead, to his or her kindred, as if he or she had survived the intestate and died entitled to the estate.

A. When any or all of a class first entitled to inherit are dead, leaving descendants, such descendants shall take per stirpes.

B. Collaterals of the half blood shall inherit only half as much as those of the whole blood, or as ascending kindred, when they take with either.

SEC. 2. All laws and parts of laws in conflict with the foregoing are hereby repealed.

With a committee amendment, as follows:

Page 3, after line 12, insert:

"C. Real estate; when to descend to parent giving it. When a person dies intestate and without issue, having real estate of inheritance, the gift of either of his parents, such parent, if living, shall inherit the whole of such estate.

"D. Real estate of infant dying without issue: If an infant dies without issue, having the title to real estate derived by gift, devise, or descent from one of his parents, the whole shall descend to that parent and his or her kindred as hereinbefore directed, if there is any; and if none, then in like manner to the oher parent and his or her kindred; but the kindred of one shall not be so excluded by the kindred of the other parent, if the latter is more remote than the grandfather, grandmother, uncles, and aunts of the intestate and their descendants."

The SPEAKER. The question is on agreeing to the committee amendments.

Mr. BLANTON. Mr. Speaker, I move to strike out the last word.

The SPEAKER. The gentleman from Texas moves to strike out the last word.

Mr. BLANTON. I do not want this bill to pass without calling attention to the splendid work which our colleague, the gentleman from Kentucky [Mr. GILBERT], has done on this bill. He has prepared it and gone to a great deal of trouble to correct a matter that has for long years been going on in the District uncorrected. For instance, in the District, where a son died leaving an estate, and where his father had had nothing to do with him for years, and where the mother had been caring for him all the time, yet under the laws of the District, the father would inherit all the property and the mother none. This bill is to correct that matter. I think the gentleman from Kentucky, Judge GILBERT, deserves the commendation of all his colleagues and of everybody in the District of Columbia for correcting it. [Applause.]

The SPEAKER. The question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ZIHLMAN, a motion to reconsider the vote by which the bill was passed was laid on the table.

FRATERNAL BENEFICIAL ASSOCIATIONS

Mr. ZIHLMAN. Mr. Speaker, I call up H. R. 10869, a bill amending section 764 of Subchapter XII, fraternal beneficial associations, of the Code of Law for the District of Columbia, which bill is on the House Calendar.

The SPEAKER. The gentleman from Maryland calls up a bill, which the Clerk will report.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 764 of Subchapter XII, fraternal beneficial associations, of the Code of Law for the District of Columbia, be amended to read:

"SEC. 764. This law not to apply to associations for profit: Nothing in this subchapter shall be construed to apply to any corporation, society, order, or association carrying on the business of life, health, casualty, or accident insurance for profit or gain, and it shall only apply to fraternal beneficial associations as defined by section 749, and nothing in this subchapter contained shall be construed to affect any grand or subordinate lodge or branch of any such fraternal beneficial societies, orders, or associations which limits its certificate holders to a particular religious denomination or to the employees of a particular town or city, designated firm, business house, or corporation, or department or branch of the United States Government, nor the grand or subordinate lodges of the Independent Order of Odd Fellows, nor any grand or subordinate lodge, or other body of Free and Accepted Masons, nor the grand or any subordinate lodge of the Knights of Pythias, nor the National Council or any subordinate council of the Junior Order United American Mechanics, nor the national council or any subordinate council of the Daughters of America, or similar orders, associations, or societies that do not have as their principal object the issuance of benefit certificates of membership in case of death or the payment of sick, funeral, or death benefits exceeding in amount $100."

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ZIHLMAN, a motion to reconsider the vote by which the bill was passed was laid on the table.

CODE OF INSURANCE LAW FOR THE DISTRICT OF COLUMBIA

Mr. ZIHLMAN. Mr. Speaker, I call up H. R. 10147, a bill to provide a complete code of insurance law for the District of Columbia (excepting marine insurance as now provided for by the act of March 4, 1922, and fraternal and benevolent insurance associations or orders as provided for by the act of March 3, 1901), and for other purposes, and I ask unanimous consent that the bill may be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Maryland calls up H. R. 10147, and asks unanimous consent that it may be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The Clerk read the bill with committee amendments.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. ZIHLMAN, a motion to reconsider the vote by which the bill was passed was laid on the table.

POLICE AND FIRE DEPARTMENTS, DISTRICT OF COLUMBIA

Mr. ZIHLMAN. Mr. Speaker, I call up H. R. 9346, a bill to fix the salaries of officers and members of the Metropolitan police force and the fire department of the District of Columbia, and I ask unanimous consent that the bill may be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Maryland calls up H. R. 9346 and asks unanimous consent that the bill, being on the Union Calendar, may be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the annual basic salaries of the officers and members of the Metropolitan police force shall be as follows: Major and superintendent, $6,250; assistant superintendents, $4,500 each; inspectors $4,000 each; captains, $3,500 each; lieutenants, $3,000 each; sergeants, $2,700 each; privates, class 1, $2,100 each; privates, class 2, $2,200 each; privates, class 3, $2,400 each.

SEC. 2. That the annual basic salaries of the officers and members of the fire department of the District of Columbia shall be as follows: Chief engineer, $6,250; deputy chief engineers, $4,500 each; battalion chief engineers, $4,000 each; fire marshal, $4,000; deputy fire marshal, $3,000; inspectors, $2,460 each; captains, $3,000 each; lieutenants, $2,840 each; sergeants, $2,600 each; superintendent of machinery, $4,000; assistant superintendent of machinery, $3,000; pilots, $2,600 each; marine engineers, $2,600 each; assistant marine engineers, $2,460 each; marine firemen, $2,100 each; private of class 3, $2,400 each; privates of class 2, $2,200 each; privates of class 1, $2,100 each.

SEC. 3. That the salaries herein provided for shall be payable on and after July 1, 1928.

With the following committee amendments:

Page 1, line 5, strike out "$6,250" and insert "$5,700."
Page 1, line 6, strike out "$4,500" and insert "$3,950."
Page 1, line 6, strike out "$4,000" and insert "$3,650."
Page 1, line 7, strike out "$3,500" and insert "$3,350."
Page 1, line 7, strike out "$3,000" and insert "$3,050."
Page 1, line 8, strike out "$2,700" and insert "$2,750."
Page 2, line 5, strike out "$6,250" and insert "$5,700."
Page 2, line 6, strike out "$4,500" and insert "$3,950."
Page 2, line 7, strike out "$4,000" and insert "$3,650."
Page 2, line 7, at the end of the line, strike out "$4,000" and insert "$3,650."
Page 2, line 8, strike out "$3,000" and insert "$2,850."
Page 2, line 9, strike out "$2,460" and insert "$2,460."
Page 2, line 9, strike out "$3,000" and insert "$2,850."
Page 2, line 10, strike out "$2,840" and insert "$2,650."
Page 2, line 10, strike out "$2,600" and insert "$2,500."
Page 2, line 11, strike out "$4,000" and insert "$3,650."
Page 2, line 12, strike out "$3,000" and insert "$2,850."
Page 2, line 12, strike out "$2,600" and insert "$2,550."
Page 2, line 13, strike out "$2,600" and insert "$2,550."
Page 2, line 14, strike out "$2,460" and insert "$2,450."

Mr. MADDEN. Mr. Speaker, is this the police and firemen's bill?

The SPEAKER. It is.

Mr. MADDEN. Mr. Speaker, I ask unanimous consent to speak for 10 minutes on this bill.

Mr. TILSON. Does the gentleman wish more than 10 minutes?

Mr. MADDEN. I might want more than that.

Mr. TILSON. Mr. Speaker, owing to the circumstances under which this bill is called up I ask unanimous consent that the gentleman from Illinois have 15 minutes, if he desires that much time.

Mr. MADDEN. I may not want that much time.

The SPEAKER. The gentleman from Connecticut asks unanimous consent that the gentleman from Illinois may proceed for 15 minutes. Is there objection?

There was no objection.

Mr. MADDEN. Mr. Speaker, there is a tremendous amount of expense being added to the tax-paying public in the District of Columbia through the passage of this bill. It amounts to $800,000 a year over and above what it costs to-day.

It was understood that because I did not have the time to make a proper study of this bill it would not be called up to-day.

Mr. BLANTON. Will the gentleman yield?

Mr. MADDEN. Yes.

Mr. BLANTON. If the gentleman from Maryland [Mr. ZIHLMAN] does not want this bill slaughtered he had better not proceed with it. With both the gentleman from Illinois [Mr. MADDEN] and the floor leader against it, I know that we can not pass it to-day. I am sure he wants to always, as we say, tote fair with the chairman of the Appropriations Committee, and if the gentleman from Maryland would rescind his action in calling it up and ask unanimous consent to withdraw this bill, we may get obstacles out of its way and pass it next time. Would that satisfy the gentleman from Illinois?

Mr. MADDEN. That will suit me.

Mr. BLANTON. I hope the gentleman from Maryland will make that request, because he could not afford to have a fight made on this bill at this time and have it killed.

Mr. ZIHLMAN. I may say to the gentleman from Texas that I did say to the chairman of the Committee on Appropriations that we would probably not reach this bill on account of the insurance bill, which is quite voluminous.

Mr. MADDEN. The gentleman did more than that; he said he would not call it up and that it would not be taken up for consideration until I had an opportunity to go over the figures and see what it meant to the tax-paying public of the District.

Mr. ZIHLMAN. Mr. Speaker, I ask unanimous consent to withdraw the bill from consideration.

Mr. TILSON. I am glad the gentleman has made this request.

Mr. MADDEN. I am much obliged to the gentleman. That is all I want.

The SPEAKER. The gentleman from Maryland asks unanimous consent that the bill which has just been reported be withdrawn. Is there objection?

There was no objection.

THE OLD FORD THEATER

Mr. ZIHLMAN. Mr. Speaker, this concludes the District legislation on the calendar with the exception of a bill (H. R. 7206) sponsored by the gentleman from Illinois [Mr. RATHBONE], who is not in the city.

Mr. BLANTON. Let us call that bill up and pass it. It is a meritorious bill.

Mr. TILSON. What is the bill?

Mr. BLANTON. It is a bill which the committee has reported out unanimously.

Mr. UNDERHILL. Not unanimously.

Mr. BLANTON. Possibly without the vote of the gentleman from Massachusetts; otherwise unanimous. It is a bill to designate this old Ford Theater Building down here as a Lincoln memorial. I think it ought to be preserved, and I think it ought to be used for that purpose. I think it is a good bill. I do not see how in the world any good Republican, especially, could object to it.

Mr. UNDERHILL. Mr. Speaker, I am perfectly willing to offer my objections to the bill now or wait until the sponsor of the bill is present.

Mr. BLANTON. There are enough good Republicans and enough good Democrats here to take care of the bill, even though the gentleman from Illinois is not present.

Mr. TILSON. Mr. Speaker, I do not deem this to be a political question, and, certainly, not a party question in any sense of the word. It seems to me, since the gentleman from Illinois is not here, it might not be fair to him to call up a bill of this importance, and I do not believe it would be fair to the rest of the Members of the House to bring it up now.

Mr. ZIHLMAN. My recollection is the gentleman from Illinois [Mr. RATHBONE] stated he wanted to make a speech on the bill at the time of its consideration.

Mr. BLANTON. The gentleman would lots rather for us to take it up and thresh it out now than to have it die on the calendar, which it is going to do if the gentleman passes it over. The gentleman knows the condition of the calendar now and the condition of the Congress. The gentleman knows that most of the Members here have politics in their upper story now and are going to want to get away from here as soon as possible.

Mr. TILSON. Sometimes it is as important to make a political speech as it is to get a bill passed. [Laughter.] Mr. Speaker, if there is nothing further I shall move that the House adjourn.

Mr. BLANTON. Oh, let us thrash this out now. I will state to the gentleman from Maryland [Mr. ZIHLMAN], now is as good a time to pass on this matter as any other time. It is just 3.27 o'clock, and why not utilize the rest of this day on District business when we have business on the calendar. I hope the gentleman will call up this bill.

Mr. UNDERHILL. Mr. Speaker, I ask unanimous consent to proceed for five minutes.

Mr. BLANTON. Let us call up the bill first.

Mr. UNDERHILL. Very well.

Mr. ZIHLMAN. I will call up the bill. I have no objection to doing that.

Mr. TILSON. Mr. Speaker, I do not think this bill ought to be called up under these circumstances. We have given up this day for the consideration of bills concerning the District of Columbia because this House wishes to deal fairly with the District of Columbia. We think that we have done so, but it does not seem to me that this bill ought to be called up in the absence of the gentleman from Illinois, who has perhaps made more of a study of this question than any other man in the House.

Mr. BLANTON. If the gentleman wants to ruin the gentleman from Illinois politically for not being here he will do so by not calling up the bill.

Mr. TILSON. Oh, no; there will be other opportunities.

Mr. LOZIER. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Missouri rise?

Mr. LOZIER. To suggest that I think it would be very unfortunate if this bill is called up in the absence of its author, the gentleman from Illinois [Mr. RATHBONE]. I do not believe the House ought to take the responsibility of calling up this bill and take the responsibility of what might result from a vote on it in the absence of the author of the bill. I hope the gentleman will not call this measure up for consideration this afternoon.

Mr. GARRETT of Tennessee. Mr. Speaker, I understand there are several gentlemen who have bridge bills that they would like to bring up. I do not know how the Chair would feel about taking them up now.

The SPEAKER. The Chair, in the first instance, would recognize the gentleman from Mississippi [Mr. COLLIER].

EXTENSION OF REMARKS

Mr. ZIHLMAN. Mr. Speaker, may I present a unanimous-consent request?

The SPEAKER. The Chair recognizes the gentleman from Maryland.

Mr. ZIHLMAN. Mr. Speaker, I ask unanimous consent that members of the committee be given five days in which to file extensions of remarks on the bills that were considered to-day.

Mr. BLANTON. Mr. Speaker, if the gentleman will make it two legislative days, I shall not object.

Mr. ZIHLMAN. I so modify my request.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

LOCATION OF THE FARMERS' MARKET

Mr. LAMPERT. Mr. Speaker and Members of the House, being unable to subscribe to the majority report of the subcommittee, which has held extended hearings upon the relocation of the farmers' market and recommended the southwest site, we hereby submit a minority report recommending the selection of square 669 in the Eckington area. We consider the southwest site highly undesirable for the following reasons:

First. The area presented to the committee for consideration is entirely too small. According to the evidence submitted, it will not provide for the number of farmers now patronizing the market on any plan that permits adequate facilities. Testi-

mony, supported by plans adapted to the southwest site, showed that only 304 of the more than 500 farmers could be accommodated with any reasonable allowance of space for market stalls, unloading, display, and reloading of produce and the general vehicular traffic incident to the conduct of the market. Moreover, the plans adapted to this site represent the minimum requirements as indicated by those in charge of the present market and as are borne out by experience in similar markets in other cities. It is clear, therefore, that the southwest site does not provide for any further growth, and the congestion that would follow its use will seriously add to the cost of handling produce in the market, which, in turn, will be borne by the ultimate consumer, not to mention the great inconvenience to both buyer and seller.

Second. The southwest site is undesirable by virtue of its relation to the geographical and population centers of Washington City. It is essential, as we see it, for the farmers' market to be located in close proximity to the geographical center and in a convenient section of the city. A farmers' market is a service institution. It is for use every day in the year and must be located not only where it can be used but used conveniently. We are opposed to the location of the farmers' market in the southwest on account of its inaccessibility, being located on the extreme edge of the city and District of Columbia, and mile and a half by air line from the center of population, and can only be approached from three sides. It is acknowledged that the southwest is not a residential section; that its present population is small; and its limitations prohibit development along these lines.

Third. The southwest site is inaccessible to the great majority of producers who supply fresh produce to the people of Washington. This was clearly indicated by the farmers who testified before the committee and by the evidence submitted. It should be emphasized in this connection that the farmers, as a whole, are unalterably opposed to the southwest site because of its inaccessibility. It is very questionable in our opinion whether the farmers will patronize a market located in this section of the city. It is equally inaccessible to those who buy on the farmers' market. Testimony has shown that a great majority of the grocery stores and hotels which patronize the market, to say nothing of boarding houses, restaurants, etc., are located in the northeast and northwest sections of the city.

Fourth. I am opposed to the southwest site because of traffic conditions surrounding the area. It is deemed impracticable and undesirable to compel a vehicular traffic, totaling 60,000 loads per year, to pass through the densest traffic area of the city, only to be unloaded at an inaccessible point and then redistributed in smaller volume by many more vehicles through the same congested area in order to reach the consuming sections of the city.

I believe the suggestion of by-passing this traffic away from the congested area to be visionary and impracticable. This not only applies to the farmers coming to the market, but to a still greater degree to the traffic involved in the delivery of food to consuming centers.

Fifth. The location of the farmers' market on the southwest site is not in accord with the plans and recommendations of the National Capital Park and Planning Commission as submitted in testimony before the committee. Further, the location of the market upon this site will place it in close proximity to a large number of Government buildings now in use and to additional buildings being erected. Obviously, placing the farmers' market in this area will not promote the program of Congress for the beautification of the Mall. It must be remembered that the development of the Mall will in itself develop peculiar traffic conditions. It is possible, and very probable, as is now the case in other parked areas of the city, that heavy traffic will be debarred from this region or greatly restricted. Further, the erection of additional Government buildings in the Mall will greatly complicate the traffic and parking conditions by virtue of the additional number of Government employees concentrated in this area.

Sixth. I believe that the only possible advantage of the southwest site—namely, water transportation—is a negligible factor in the movement of food products to the city. There has been abundant testimony before the committee to prove this assertion. Furthermore, the farmers' market is in no way influenced by water facilities or the lack of them. Water transportation of fresh produce is steadily losing ground in all sections of the Chesapeake Bay and the rivers flowing into it.

Seventh. The southwest site offers no advantages in railroad facilities that are not to be found in the Eckington area.

I therefore feel that in view of the above reasons the southwest site for a farmers' market is unsuitable and undesirable as being too small in area, too distant from the geographical center of the city, too far removed from the center of population, too inaccessible to the producers and consumers, too difficult of access except through the densest traffic areas of the city, and not in accord with the plans and recommendations of the National Capital Park and Planning Commission.

A careful analysis of all the testimony submitted in behalf of the sites proposed for the relocation of the farmers' market leads me to the belief that square 669, in the Eckington area, offers the best site not only for the immediate relocation of the farmers' market but for the development of an ultimate market area suited to the growing needs of Washington, and providing facilities for the wholesale and retail dealers, commission men, and the allied business interests. Square 669 is bounded by North Capitol Street, First Street, Florida Avenue, O and P Streets NE.

The following reasons for this opinion were established by the testimony submitted to the committee:

First. Square 669 contains an area of approximately 6 acres, nearly twice the size of the southwest site. The committee has in its possession, as a part of the record, a plan showing how a farmers' market can be adapted to this area to accommodate at least 521 farmers, with ample provision for stall space, display room, and facilities for transfer of produce, and space for vehicular traffic and parking. The area involved in this square, and in those immediately adjacent thereto, is sufficiently large to permit of the erection of buildings and the installation of equipment which will adequately provide facilities for the truckers and farmers in the immediate vicinity of Washington for many years to come.

Second. The Eckington site, square 669, is located close to the center of population and close to the geographical center of the city of Washington. The site is so situated as to be easily reached by a large and growing population, and the natural development of Washington is toward the northeast and northwest. Testimony submitted by expert engineers emphasized the fact that a farmers' market should be placed in a section where there is a large consuming population. Evidence before the committee has shown that 80 per cent of the retail grocery stores, 97 per cent of the hotels, and a large percentage of the boarding houses, restaurants, and other large buyers on the farmers' market are located in the northeast and northwest sections of the city. Further evidence presented showed that one of the largest chain-store systems purchased 50 per cent of its fresh farm produce on the farmers' market, and that a vast majority of its stores are located in the northeast and northwest.

Third. The Eckington site, square 669, is accessible to the great majority of farmers and truckers regardless of the territory from which they come. Evidence presented showed that the total acreage devoted to fruits and vegetables by farmers who sell on the farmers' market is 14,227. The acreage under production by Maryland farmers totals 11,572, by Virginia farmers, 1,835, and by the District of Columbia farmers, 820 acres. The Maryland farmers who bring produce to the farmers' market are principally from Prince Georges and Montgomery Counties. A knowledge of the topography of the District and the two counties, Prince Georges and Montgomery, which grow 75 per cent or more of the produce brought to the farmers' market, shows that the routes used by these farmers enter the city from the northeast and northwest.

The same routes which make this location easily accessible to the farmers and truckers will provide easy access to the market for wholesale buyers and for such consumers as may travel by automobile. Those who make use of the street cars will be able to reach this market site easily from any part of the city over the three lines now operating on New York Avenue, Florida Avenue, and North Capitol Street. From the buyer's standpoint square 669 is the best location that can be found.

Fourth. This location is away from the downtown office and business section, close enough to well-traveled and broad thoroughfares to promote business, and yet sufficiently far from the heavily congested traffic area to prevent traffic complications. Ample parking space is available in this vicinity and the many different streets radiating to all sections of the city make it an ideal distribution point. It is at the junction of two of the city's broad thoroughfares—New York and Florida Avenues—and is served by another important highway—North Capitol Street. An easy flow of traffic in all directions is thus assured.

Fifth. I believe that a farmers' market site should be adjacent to railroad facilities principally on account of its relation to the wholesale produce and commission houses. I am of the opinion that the railroad facilities in the Eckington area are equal to or superior to those in the southwest area. Figures from the United States Department of Agriculture for 1926 show that the entire movement of fruits and vegetables into

Washington amounted to 7,100 cars. Of these, 6,993 cars were from known points of origin. The receipts by boats amounted to the equivalent of 577 cars, or about 8 per cent of the total. Of the 6,993 cars, about 33 per cent originated in States from which the shipment would necessarily pass through the Potomac Yards. About 12 per cent originated in the States where the shipment need not necessarily be through the Potomac Yards. The grand total is 45 per cent of all possible movements through the Potomac Yards. About 34 per cent of the total movement into Washington was from Western States and 21 per cent from Eastern States, or a grand total of 55 per cent, the greater portion of which would come over the Baltimore & Ohio Railroad, as its main lines run into Washington and tap the great industrial centers of St. Louis and Chicago, which are the great converging points for freight consigned to Washington. In 1926 the Baltimore & Ohio handled at its Eckington Yard, or for sidetrack delivery in that section, 34 per cent of this total rail movement. It is not without its significance that an increasing number of large industrial and supply companies which are absolutely dependent upon quick and ample railroad facilities for their shipments have located in northeast Washington, in the vicinity of square 669, and have established warehouses, some with track-side facilities. It should be pointed out, in this connection, that freight rates to Washington are the same regardless of whether shipments are consigned to the Eckington Yards or the Potomac Yards, and that it is just as easy and logical to transfer consignments from the Potomac to the Eckington Yards as it is to transfer them from the Eckington to the Potomac Yards.

Sixth. It is recognized by all parties that the success of a farmers' market is largely dependent upon its relation and proximity to the wholesale commission business. In fact, in the District Commissioners' report to Congress, it is asserted that the farmers' market should not be removed until it is learned where the great wholesale produce and commission business houses are going to locate. Evidence before this committee showed that 85 per cent of the wholesale commission merchants desire and intend to locate in the Eckington area. If this is a determining factor in the relocation of the farmers' market, then the great majority of the commission men prefer the Eckington area for their business.

Seventh. We believe that the recommendation of the National Capital Park and Planning Commission deserves primary consideration. After making a careful study of the principal sites involved, the National Capital Park and Planning Commission, assisted by representatives from the United States Department of Agriculture and the Bureau of Markets in the District, and the foremost landscape architects and consulting engineers in this country, recommended the site next to the Eckington yards as their preference.

Eighth. No one considering the problem of relocating the farmers' market can ignore the united plea of the responsible producers, who are the regular space holders on the farmers' market, and who are producing the great bulk of fresh produce sold on this market. Their plea before this committee was in behalf of square 669, in the Eckington area. Moreover, the preponderance of evidence submitted to this committee by the consumers of Washington was for a location of this market north of Pennsylvania Avenue.

The greatest problem involved in the selection of a farmers' market site is convenience of traffic to and from it, especially for automobiles, for practically every pound of farmers' products must be unloaded onto automobiles from railroad cars, even though adjacent to the market site. The short haul to the market site must not be overlooked, as it is of vital importance. As I say, traffic is the greatest problem; square 669 has all the advantage as to this, in that practically all traffic lines converge at or near this site and without an unusual tendency to congestion. From all parts of the District it is a natural site. From Georgetown sections through New York and Rhode Island Avenues; from Chevy Chase region through Connecticut or Wisconsin Avenues and cross streets N, O, P, or Q; from adjacent Maryland, northeast through Georgia Avenue and Rhode Island Avenue; from Bennings region over Florida Avenue; from Marlboro region over Pennsylvania Avenue SE., Eleventh Street, and Florida Avenue; from Anacostia section over Eleventh Street SW. and Florida Avenue. The lengths of these lines of traffic as related to a trade center for the farmers are all less than to the site recommended by the committee.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Craven, its principal Clerk, announced that the Senate agrees to the report of the committee of conference, on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9481) entitled "An act making appropriations for the Executive Office, and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1929, and for other purposes."

VICKSBURG BRIDGE & TERMINAL CO.

Mr. COLLIER. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H. R. 11197) to authorize the Secretary of War, to grant rights of way to the Vicksburg Bridge & Terminal Co., upon, over, and across the Vicksburg National Military Park at Vicksburg, Warren County, Miss. This bill has a favorable report from the War Department.

The Clerk read the title of the bill.

The SPEAKER. The Chair understands the gentleman from Mississippi is prepared to say to the House that this is a matter of emergency and that work on the bridge can not be proceeded with unless the bill is passed.

Mr. COLLIER. I will say, Mr. Speaker, that I would hardly go that far; an emergency does exist, and it is a matter of the gravest inconvenience to the people building the bridge, because advances will not be made until the bill is passed. The men are at work there, but I would not go so far as to say that the builders could not get the money from some other source, but it puts them to great inconvenience and may result in serious consequences. The bill has a unanimous report from the Committee on Military Affairs, and we have the approval of the Secretary of War. In fact, the bill was drawn in the Judge Advocate General's office, and the land that is to be used for the bridge is to be selected by and under the direction of the Secretary of War and with his approval.

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

A bill (H. R. 11197) to authorize the Secretary of War to grant rights of way to the Vicksburg Bridge & Terminal Co. upon, over, and across the Vicksburg National Military Park at Vicksburg, Warren County, Miss.

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and empowered to grant to the Vicksburg Bridge & Terminal Co., a corporation organized and existing under the laws of the State of Delaware, its successors and assigns, rights of way, in such location and under such conditions and regulations as are deemed advisable by the Secretary of War, for the construction, maintenance, and operation of railroad, telegraph, telephone, street car, water, gas, oil, and electric light and power lines, and a highway for vehicular traffic upon, over, and across the Vicksburg National Military Park in the county of Warren, State of Mississippi: *Provided,* That such construction, maintenance, and operation shall not interfere with the use of said military park for the purpose for which established: *And provided further,* That any and all work that may be required by the Secretary of War to be performed by the Vicksburg Bridge & Terminal Co., its successors and assigns, shall be without expense to the United States.

SEC. 2. That any other person, firm, corporation, copartnership, or association organized or existing under the laws of any State or Territory of the United States, or the trustees, lessees, or receivers thereof, having a franchise for the operation of railroad, telegraph, telephone, street car, water, gas, oil, and electric light and power line or lines may, upon obtaining a license from the Secretary of War, use the facilities mentioned, or any of them upon payment to the Vicksburg Bridge & Terminal Co. of just compensation for such use; and if the parties concerned can not agree upon the amount of such compensation, the sum or sums to be paid for the said use shall be fixed by the Secretary of War.

SEC. 3. That no part of such rights of way as may be granted by the Secretary of War under the provisions of this act for the purposes aforesaid shall be used for any other purpose or purposes, and if any part thereof shall be so used, or shall cease to be used for the purposes for which granted, such part shall revert to the United States.

SEC. 4. That the right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion by Mr. COLLIER to reconsider was laid on the table.

ADDRESS BY HON. WILLIAM TYLER PAGE

Mr. SPROUL of Illinois. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing an address by Hon. William Tyler Page on the acts of Congress.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. SPROUL of Illinois. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following radio address of Hon. William Tyler Page, on February 21, 1928, from WRC, Washington, D. C., conducted by Mr. Charles G. Ross, Washington correspondent of the St. Louis Post-Dispatch, under the auspices of the National League of Women Voters:

THE MACHINERY OF LEGISLATION

Mr. PAGE. The Constitution created a legislative body which is called the Congress. This body consists of two parts, a Senate with 96 Members, two from each State, and a House of Representatives with 435 Members, elected in districts in which the population is as nearly equal as possible. The present basis on the 1910 census is 211,877 for each congressional district. Members of the House are spoken of as Congressmen. This may be correct, but it is unofficial and misleading. Members of the Senate are just as much "Congressmen" as are those of the House, but they are Senators and are never called "Congressmen." The use of the term "Congressman" as applied to Members of the House has led many good people into the mistake of thinking that the House is Congress and the Senate something else and apart from Congress. Frequently strangers ask "Where does Congress meet" when they mean "Where does the House meet," and when asked whether they mean the Senate or the House the reply is, "We don't mean the Senate, we mean Congress." This all comes about through the application of the term "Congressman" to Members of the House alone. The correct designation of a House member is "Representative." Congress itself is often spoken of as the "two Houses."

There are two kinds of legislative machinery just as there are two coordinate branches of Congress. One kind is official and the other is party, or political. The former could hardly function without the latter. This was not always so. At one time it was a matter of catch-as-catch-can; but now Congress is better organized for business than ever before in its history. The Senate reels off a lot of work when it buckles down to business. The House works with celerity and precision. The great appropriation bills are considered and passed according to schedule, and every class of business is given a chance for consideration. The official machinery is set up by the rules; the political machinery is the creation of party.

The Vice President is the Senate's presiding officer. To enrolled bills he signs as "Vice President of the United States and President of the Senate." He is elected by the people in the same manner as is the President, that is, by the electoral votes of the States. He can vote in the Senate only in case of a tie. The Senate itself elects a President pro tempore, who presides in the absence of the Vice President, and when the former is not present a Senator is designated whose title is Presiding Officer. The Vice President may be of a different political faith than that of a majority of the Senate, which latter selects the President pro tempore.

The Senate's officers—Secretary and Sergeant at Arms and Doorkeeper and Chaplain—are elected by its political majority, and their subordinate employees are appointed as senatorial patronage, dispensed through a majority-party committee; but minority Senators are accorded some recognition, and certain employees are carried on an efficiency roll.

Membership on Senate committees is determined by party conference and selections ratified by the Senate. The seniority rule is generally observed. A political majority of a committee is in ratio to that of the Senate itself.

Party policy in the Senate is sought—not always determined—in conference, never in binding caucus. Conferences select the majority and minority floor leaders, respectively.

These functionaries are parliamentary and political mouthpieces and are usually accorded prior recognition by the Chair. The majority leader is a member of the steering committee (whose function is to formulate a legislative program more or less in conjunction with a like committee of the House), and he, together with the floor leader of the House, confers with the President—assuming their political faith to be the same.

The Senate whips—majority and minority—are also selected in party conference. They represent their respective parties in appraising party strength on a given question, finding the weak spots, rounding up absentees, and in arranging and announcing pairs.

The Constitution provides that the House of Representatives shall choose its speaker and other officers. The House always has chosen a Speaker from its own Membership. The House, unlike the Senate, must reorganize every two years. The Senate being a continuous body, is not subject to reorganization biennially unless its political complexion should change when one-third of its membership undergoes election.

Prior to the first meeting of a new House the political majority in caucus, designates its nominee for Speaker, and its nominees for other offices—Clerk, Sergeant at Arms, Doorkeeper, Postmaster, and Chaplain; selects a committee on committees composed of one Member from each State having party representation in the House and elects a chairman and secretary of the party caucus.

The person thus selected for Speaker is placed in nomination in the House by the chairman of the caucus, a minority nomination is likewise made, and the vote is viva voce, recorded by tellers. Until a Speaker is elected the Clerk of the preceding House presides. A Speaker pro tempore may be appointed by the Speaker or elected by the House, according to the period of the Speaker's absence. The other officers of the House are elected by resolution. Their subordinate employees, excepting those on a soldier's roll and such as may be exempt, are selected by a patronage committee. There are many other functionaries, each a cog in the congressional machinery, the most important of which is the Speaker. Although divested of powers once possessed and now diffused, that great office is second in importance in our system only to that of the Chief Executive.

The committee on committees selects the majority members on committees, usually following the seniority custom. These selections, as well as those of the minority, must be ratified by the party caucus and elected by the House. This committee also nominates the personnel of the steering committee and of the patronage committee and selects the majority floor leader and the whip, subject to the approval of the caucus.

This constitutes the machinery of the political majority of the House.

The political minority has its own method of organizing. As now constituted it acts chiefly by caucus decree. The caucus selects its membership on the Ways and Means Committee, and this in turn nominates minority representation on committees. The caucus also elects a minority floor leader, usually the minority candidate for Speaker. Its patronage consists of "minority employees" to the number authorized by law who are selected in caucus.

The majority steering committee consists of nine members, with the floor leader chairman ex officio, and the Speaker, by courtesy.

The floor leader is not a member of any House committee, his position requiring him to be in touch with the work of all committees, through their chairmen. He is the majority spokesman in a parliamentary and political sense. But the conduct of particular business is generally controlled by the chairman of the committee reporting it.

The patronage committee consists of three members of the majority party.

The number of members to be appointed on committees of the House is determined by its rules, but the majority party conference fixes the ratio of party representation according, as near as may be, to the relative party representation in the House. The larger and more important committees are divided into subcommittees, the political ratio still being observed, such committees being necessary for expeditious action. Thus the Appropriations Committee of 35 members is divided into 10 subcommittees, each formulating an appropriation bill.

The chairman of a committee, unless he assigns that duty to another member of the majority, usually has charge in the House of a measure reported from his committee; and the ranking minority member of the committee controls the debate for and represents his side.

The "ranking member" either was chairman when his party controlled the House or is in line for promotion when party control changes.

A distinction between a "majority" and a "political majority" should be made. The latter organizes, formulates, and customarily dominates the House, but the former, disregarding party lines, not infrequently controls a given situation. This also is sometimes the case in committees.

The Committee on Rules is an important part of the House political organization. It is given high privilege under the rules and can bring in special rules. Hence it is that the steering committee's program or policy must often be translated into action by one of these special rules.

Committees are the workshops of Congress. In the Senate are 34 and in the House 45 standing committees. They are tributary mills that turn out the grist for the finishing touches of the main legislative body. Hearings before committees cover a wide variety of subjects. They are a safety valve. They offer the opportunity to blow off a lot of steam harmlessly. Hearings before any given committee furnish a complete library on the subject of that committee's jurisdiction. In one session, following the World War, the total number of printed pages of hearings reached the fabulous figure of over 12,000,000,000. Ornamental committees have been abolished, and now all committees function. There are a few special and one joint committee.

A legislative proposition of the superior class is called a "bill." When a bill is approved by the President it becomes an "act." The term "bill" is derived from English parliamentary terminology (with apologies to Mayor Thompson), and is very old. A bill of the same import may be pending at the same time in each House, but both Houses must pass an identical bill before it can become a law. When we speak of laws passed by Congress we really mean enactments, because the bulk of congressional legislation is administrative and temporary in character and not laws for the regulation of conduct. The great appropriation bills in the main carry no permanent legislation. They must be passed each and every year, and the great majority of so-called laws are of mere private and not public interest. On the fingers of two hands may be counted the number of actual laws.

A "joint resolution" differs in no essential respect from a bill. It must go through the same legislative processes. A joint resolution, however, proposing an amendment to the Constitution does not require

presidential approval. Practically, therefore, the only difference between a joint resolution and a bill is in the name. Resolutions are local to each House and concurrent resolutions express fact, principles, opinions, and purposes of the two Houses, but may not contain legislation. In the last Congress a grand total of 24,729 propositions were submitted in Congress. The total enactments were 1,423, including omnibus pension bills containing 5,533 House and Senate bills lumped together. It is easy to introduce bills. In the House they are dropped into a hopper. In the Senate they are formally presented. But it's a far cry to final enactment.

The negative work of Congress is not appreciated. It requires as much or more time and labor and more courage to kill a bad bill than it does to pass a good one.

The first thing Thomas Jefferson did when elected Vice President was to formulate a code of rules for the Senate. Rules are indispensible for the orderly transaction of business. Upon their interpretation has grown up a vast body of parliamentary practice without which a legislative body representing 125,000,000 people would be as a ship without a rudder. And in a body like Congress, where so many and diversified interests clash, rules and practice are inseparably linked with the destiny of every measure.

Congress is a great big institution. Its housekeeping alone is an all-year-round job. Its work is not confined to the daily and annual sessions. The wheels are in constant motion more or less in preparation for and in the aftermath of a session. The cost of Congress is negligible comparatively. An extra session makes little or no difference. Of the total cost of running the entire Government the share of Congress is less than one-half of 1 per cent, and this includes the Library of Congress, the Government Printing Office, the Botanic Gardens, the Senate and House Office Buildings, and the Capitol power plant, salaries, upkeep, and everything.

There is an old saying that "more water runs through the mill than wots the miller of"; and this is true of the mill we call Congress. I daresay the average busy person knows little and care less about Congress, except to get a wrong impression of what it really is and of what it does. From the gallery, the idea is conveyed to the uninformed that it is a do-nothing body and given to "much heap" talk. It does talk a lot, but it works harder than it talks. The real work is done behind the scenes, not behind closed doors, but out of view of most people. Congress is not only a hard working but a much worked body. Propagandists add to its troubles. Members work on an average of 10 to 14 hours a day, and even their social hours are not free from official cares and intrusion. Congress always has been and probably always will be the butt of coarse jokes and quips. It has no comeback. A teacher asked a class of youngsters, "Of what is Congress composed?" The answer came back from a little urchin: "Civilized, half civilized, and savage." This is a fairly good illustration of what a lot of grown folks think who believe, and seem to want to believe, the mean and unjust things said of their own representatives. Congress, no matter what it does or fails to do, will never escape criticism or receive due meed of commendation. And still the fact remains that Congress is a fundamental creation of the Constitution. It is a free people's institution. It is no better nor worse than the people choose to make it. It represents the sovereignty of the American people. Its deeds are the people's deeds. The people make and unmake it. Therefore, it does not lie in the mouths of Americans unduly to criticise it, for it is not a thing apart from themselves. It is the system whereby government by the people finds expression—the representative system.

The present personnel compares favorably with that of any Congress in my experience, and I daresay with any Congress in history, as to ability, and is superior to many in points of industry and personal integrity.

BRIDGE BILLS

Mr. GARRETT of Tennessee. Mr. Speaker, a few minutes ago I suggested the possibility of considering some of the bridge bills. That probably would not be in accordance with the policy of the Chair.

The SPEAKER. If the Chair is assured that time is the real essence of the matter and that a real emergency exists, he would recognize the gentleman to call up a bridge bill, but otherwise he would prefer not to.

BRIDGE ACROSS THE MISSISSIPPI AT NEW ORLEANS

Mr. SPEARING. Mr. Speaker, I ask unanimous consent to take up the bill (H. R. 10298) to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near New Orleans. I want to say that the time for commencing the bridge expires on March 30 next, and it is necessary for the bill to pass the House and go to the Senate.

The SPEAKER. The Chair under the circumstances will recognize the gentleman. The Clerk will report the bill.

The Clerk read the bill, as follows:

A bill (H. R. 10298) to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near New Orleans

Be it enacted, etc., That the times for commencing and completing the construction of the bridge across the Mississippi River, at or near New Orleans, authorized to be built by George A. Hero and Allen S. Hackett, their successors and assigns, by the act of Congress approved March 2, 1927, are hereby extended one and three years, respectively, from the date of approval hereof.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

With the following committee amendments:

Line 4, before the word "bridge" strike out the word "the" and insert the letter "a."

Line 5, after the word "Orleans," insert the word "Louisiana."

The committee amendments were agreed to.

The bill as amended was ordered to be engrossed and read the third time, was read the third time, and passed.

Amend the title so as to read: "A bill to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near New Orleans, La."

A motion by Mr. SPEARING to reconsider was laid on the table.

COL. CHARLES A. LINDBERGH

Mr. FROTHINGHAM. Mr. Speaker, I ask unanimous consent to consider the bill (H. R. 10715) to authorize Col. Charles A. Lindbergh, United States Army Air Corps Reserve, to accept decorations and gifts from foreign governments. He was a reserve officer and technically was debarred from so doing.

Mr. BLANTON. I shall not object to anything being done for Colonel Lindbergh, but I shall object to other matters being called up.

Mr. GARNER of Texas. Has this bill been reported from the Committee on Foreign Affairs?

Mr. FROTHINGHAM. Reported from the Committee on Military Affairs.

Mr. GARNER of Texas. Is not this the character of bill that is referred to the Foreign Affairs Committee permitting one to accept decorations of foreign countries?

Mr. COCHRAN of Missouri. Yes; and sometimes the Committee on Naval Affairs and sometimes the Military Affairs has jurisdiction.

The SPEAKER. The Clerk will report the bill.

The Clerk read the bill, as follows:

A bill (H. R. 10715) to authorize Col. A. Lindbergh, United States Army Air Corps Reserve, to accept decorations and gifts from foreign governments.

Be it enacted, etc., That Col. Charles A. Lindbergh, United States Army Air Corps Reserve, is hereby authorized and permitted to accept decorations, medals, certificates, or gifts which have been heretofore or may hereafter be tendered him by the government of any foreign state with which the Government of the United States was at the time of such tender and acceptance on friendly terms; and the consent of Congress required therefor by clause 8 of section 9 of Article I of the Constitution is hereby expressly granted.

With the following committee amendment:

Line 6, after the word "him," insert "in recognition of services, exploits, or achievements."

Amend the title so as to read: "A bill to authorize Col. Charles A. Lindbergh, United States Army Air Corps Reserve, to accept decorations and gifts from foreign governments."

Mr. LAGUARDIA. It seems to me that the customary form for these bills is to grant authority to receive decorations heretofore bestowed. This goes further and says, "or may hereafter." While there may be no objection in this case, I fear it will establish a very bad precedent.

Mr. BLANTON. But in this case it is a good one.

Mr. QUIN. The bill was considered by the Committee on Military Affairs, and all of that was thrashed out. Colonel Lindbergh is not yet through performing services for this Government.

Mr. LAGUARDIA. And the gentleman's committee is not going to use this as a model?

Mr. QUIN. No; never again. We had to do that.

The committee amendments were agreed to and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended to read as follows: "A bill to authorize Col. Charles A. Lindbergh, United States Army Air Corps Reserve, to accept decorations and gifts from foreign governments."

MESSAGE FROM THE PRESIDENT—REVEREND MR. NORTH

The SPEAKER laid before the House the following message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Foreign Affairs:

To the Congress of the United States:

I transmit herewith a report from the Secretary of State in relation to a claim presented by His Britannic Majesty's Government for the payment of a sum of money turned over to American citizens in Russia by the British subject, the Reverend Mr. North, upon his departure from Moscow, and I recommend that an appropriation be authorized to effect a settlement of this claim in accordance with the recommendation of the Secretary of State.

CALVIN COOLIDGE.

THE WHITE HOUSE.

LEAVE OF ABSENCE

By unanimous consent leave of absence was granted to Mr. EDWARDS, of Georgia, for 10 days (at the request of Mr. CRISP), on account of the death of his brother, Mr. J. C. Edwards, of Claxton, Ga.

ORDER OF BUSINESS

Mr. TILSON. Mr. Speaker, it was expected that the Department of Agriculture appropriation bill would be ready for consideration to-morrow. Several hours of general debate have been promised under that bill. It so happens that the printing of the bill or of the hearings in connection with the bill has been delayed, so that the bill will not be ready for consideration to-morrow. Meanwhile these gentlemen who have been promised time under general debate are ready to proceed with their speeches. Therefore I ask unanimous consent that two of these gentlemen, whom I shall name, be granted the same time to address the House to-morrow that they had been promised under general debate. The first is the gentleman from Utah [Mr. COLTON], for 30 minutes; and the second is the gentleman from Massachusetts [Mr. TINKHAM], for 1 hour and 30 minutes. Mr. TINKHAM, as you all know, is a member of the Appropriations Committee.

The SPEAKER. The Chair calls the attention of the gentleman from Connecticut to an order already made by the House that the gentleman from Texas [Mr. WILLIAMS] shall be granted one hour to-morrow after the reading of the Journal and the disposition of business on the Speaker's table, and that the gentleman from Oklahoma [Mr. CARTWRIGHT] shall be granted 10 minutes.

Mr. TILSON. Then the two requests that I make would follow.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. TILSON. Yes.

Mr. MADDEN. We have two conference reports from the Committee on Appropriations.

Mr. TILSON. They should take precedence.

Mr. GARRETT of Tennessee. And the gentleman from Massachusetts [Mr. TINKHAM] is not going to elucidate the appropriation bill, is he?

Mr. TILSON. He is a member of the Committee on Appropriations, and, therefore, would be liberally dealt with as to time under general debate, so that time now granted would simply be in lieu of so much time that would be taken by him under general debate.

Mr. BLANTON. I presume the speech of the gentleman from Massachusetts will be along his usual line of social and other equalities for the colored race.

Mr. TILSON. I am not authorized to speak for the gentleman from Massachusetts. He is able to speak for himself.

The SPEAKER. The gentleman from Connecticut asks unanimous consent that at the conclusion of the speech of the gentleman from Oklahoma [Mr. CARTWRIGHT] the gentleman from Utah [Mr. COLTON] may be permitted to proceed for 30 minutes, to-morrow, and that following his address the gentleman from Massachusetts [Mr. TINKHAM] may be permitted to proceed for one hour and a half. Is there objection?

There was no objection.

Mr. GARRETT of Tennessee. Mr. Speaker, I ask unanimous consent that at the conclusion of the speech of the gentleman from Massachusetts, the gentleman from Arkansas [Mr. TILLMAN] may proceed for 25 minutes.

The SPEAKER. Is there objection?

Mr. SCHAFER. Mr. Speaker, reserving the right to object, on what subject?

Mr. GARRETT of Tennessee. On political subjects.

The SPEAKER. Is there objection?

Mr. BLANTON. Mr. Speaker, I shall not object, but I want to give notice that I am going to try to keep a quorum here during Mr. TINKHAM's speech.

The SPEAKER. Is there objection?

There was no objection.

Mr. MADDEN. Mr. Speaker, I serve notice now that the Committee on Appropriations will call up the conference report on the independent offices appropriation bill after the reading of the Journal, and later the Post Office and Treasury appropriation bill conference report.

Mr. GARRETT of Tennessee. Can the gentleman tell us about the alien property bill?

Mr. GARNER of Texas. The conference report has been signed.

Mr. GARRETT of Tennessee. The gentleman from Iowa [Mr. GREEN] filed it a short time ago and obtained until midnight to file a statement.

Mr. GARNER of Texas. I do not know whether he intended to call it up to-morrow or not.

Mr. TILSON. It will be privileged, whenever it is reached.

Mr. GARRETT of Tennessee. How long does the gentleman from Illinois expect to take with these two conference reports?

Mr. MADDEN. The Post Office and Treasury appropriation bill conference report will take no time. It is merely the adoption of the report. The Senate added only one amendment, and in conference we struck that out. The other is mostly in agreement except in one or two instances.

Mr. GARRETT of Tennessee. And the gentleman will get through with them probably in an hour?

Mr. MADDEN. Oh, easily.

Mr. CULLEN. Yes; we ought to get through in less than an hour.

ADJOURNMENT

Mr. TILSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 3 o'clock and 48 minutes p. m.) the House adjourned until to-morrow, Tuesday, February 28, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Tuesday, February 28, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

Navy Department appropriation bill.

COMMITTEE ON AGRICULTURE

(10 a. m.)

To insure adequate supplies of timber and other forest products for the people of the United States, to promote the full use for timber growing and other purposes of forest lands in the United States, including farm wood lots and those abandoned farm areas not suitable for agricultural production, and to secure the correlation and the most economical conduct of forest research in the Department of Agriculture, through research in reforestation, timber growing, protection, utilization, forest economics, and related subjects (H. R. 6091).

COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

To authorize alterations and repairs to certain naval vessels (H. R. 5493).

COMMITTEE ON RIVERS AND HARBORS

(10.30 a. m.)

To consider a project relating to the harbor at San Francisco, Calif.

COMMITTEE ON WORLD WAR VETERANS' LEGISLATION

(10 a. m.)

To amend the World War Veterans' Act, 1924 (H. R. 10160).

COMMITTEE ON LABOR

(10.30 a. m.)

To divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases (H. R. 7729).

COMMITTEE ON THE MERCHANT MARINE AND FISHERIES

(10 a. m.)

To further develop an American merchant marine, to assure its permanence in the transportation of the foreign trade of the United States (S. 744).

To promote, encourage, and develop an American merchant marine in connection with the agricultural and industrial commerce of the United States, provide for the national defense, the transportation of foreign mails, the establishment of a merchant-marine training school, and for other purposes (H. R. 2).

To amend the merchant marine act of 1920, insure a permanent passenger and cargo service in the North Atlantic, and for other purposes (H. R. 8914).

To create, develop, and maintain a privately owned American merchant marine adequate to serve trade routes essential in the movement of the industrial and agricultural products of the United States and to meet the requirements of the commerce of the United States; to provide for the transportation of the foreign mails of the United States in vessels of the United States; to provide naval and military auxiliaries; and for other purposes (H. R. 10765).

COMMITTEE ON IMMIGRATION AND NATURALIZATION

(10.30 a. m.)

To amend the immigration act of 1924 by making the quota provisions thereof applicable to Mexico, Cuba, Canada, and the other countries of continental America and adjacent islands (H. R. 6465).

COMMITTEE ON FOREIGN AFFAIRS

(10.30 a. m.)

For the relief of Nicholas R. Snyder (H. R. 8352).

For the relief of Edward F. Lathrop (H. R. 6360).

To amend Public Resolution No. 65, approved March 3, 1925, authorizing the participation of the United States Government in the International Exposition to be held in Seville, Spain (H. J. Res. 211).

COMMITTEE ON THE JUDICIARY

(10 a. m.)

Fixing the salaries of the justices of the Supreme Court of the Philippine Islands (H. R. 384).

To fix the salaries of certain judges of the Territory of Hawaii (H. R. 7933).

To provide for the dispensing with oath or affirmation as a method of verifying certain written instruments (H. R. 9343).

To fix the salaries of certain judges in Hawaii and Porto Rico (H. R. 9677).

To fix the salaries of certain judges of the Territories and insular possessions of the United States (H. R. 10872).

To amend section 6 of title 15, chapter 1, of the Code of Laws of the United States of America relating to the forfeiture of property in transit and owned in violation of section 1 thereof, and as amended, providing for the forfeiture of property owned or used in violation of section 1, irrespective of whether same is or is not in transit (H. R. 10877).

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

376. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of channel from Newport News Channel, Va., to municipal boat harbor in Newport News; to the Committee on Rivers and Harbors.

377. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination of William Henry Bay, Alaska; to the Committee on Rivers and Harbors.

378. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination of Port Frederick, Alaska; to the Committee on Rivers and Harbors.

379. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination of Vineyard Haven Harbor, Mass.; to the Committee on Rivers and Harbors.

380. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination of Newtown Creek and Maspeth Creek, N. Y.; to the Committee on Rivers and Harbors.

381. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of Petaluma Creek, Calif. (H. Doc. No. 183); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

382. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of Nansemond River, Va., including the western branch thereof (H. Doc. No. 184); to the Committee on Rivers and Harbors and ordered to be printed.

383. A letter from the Secretary of War, transmitting a report from the Chief of Engineers on partial survey of the Tennessee River and its tributaries (H. Doc. No. 185); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

384. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of Coquille River, bar, and entrance, Oreg. (H. Doc. No. 186); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

385. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of Bellingham Harbor, Wash., with a view to improving Squalicum Creek waterway (H. Doc. No. 187); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

386. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of Choptank River, Md. (H. Doc. No. 188); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

387. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of Scotts Creek, Portsmouth, Va. (H. Doc. No. 189); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

388. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of Kanawha River, W. Va. (H. Doc. No. 190); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

389. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination of Cedar Keys Harbor and Channel, Fla.; to the Committee on Rivers and Harbors.

390. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination of Inner Oak Bluffs Harbor, Marthas Vineyard, Mass., with a view to the removal of Steamboat Rock; to the Committee on Rivers and Harbors.

391. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination of Bristol Harbor, R. I., with a view to removing rock obstruction off steamboat wharf; to the Committee on Rivers and Harbors.

392. A communication from the President of the United States, transmitting a proposed amendment to an estimate, amounting to $400,000, fiscal year 1929, transmitted with letter of January 30, 1928, for the Department of Agriculture to enable the Secretary of Agriculture to meet an emergency caused by new outbreaks of the pink bollworm of cotton in the State of Texas; to the Committee on Appropriations, and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. HICKEY: Committee on the Judiciary. S. 2752. An act to amend section 80 of the Judicial Code to create a new judicial district in the State of Indiana, and for other purposes; without amendment (Rept. No. 770). Referred to the Committee of the Whole House on the state of the Union.

Mr. KIESS: Committee on Insular Affairs. H. R. 8567. A bill to amend section 29 of the act of March 29, 1916, entitled "An act to declare the purpose of the people of the United States as to the future political status of the people of the Philippine Islands, and to provide a more autonomous government for those islands," and for the insertion of a new section in said act between sections 29 and 30 of said act, to be designated as "section 29½" of said act; with amendment (Rept. No. 771). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. STEELE: Committee on Claims. S. 380. An act for the relief of Charles H. Niehaus; with amendment (Rept. No. 756). Referred to the Committee of the Whole House.

Mr. SWING: Committee on the Public Lands. H. R. 852. A bill authorizing the issuance of a certain patent; without amendment (Rept. No. 757). Referred to the Committee of the Whole House.

Mr. WARE: Committee on Claims. H. R. 2658. A bill for the relief of Finch R. Archer; with amendment (Rept. No. 758). Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. H. R. 4925. A bill for the relief of John M. Savery; without amendment (Rept. No. 759). Referred to the Committee of the Whole House.

Mr. MICHENER: Committee on the Judiciary. H. R. 7824. A bill authorizing the Court of Claims to render judgment in favor of the administrator of, or collector for, the estate of Peter P. Pitchlynn, deceased, instead of the heirs of Peter P. Pitchlynn, and for other purposes; without amendment (Rept. No. 760). Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. H. R. 9319. A bill for the relief of the Glens Falls Insurance Co., of Glens Falls, N. Y.; without amendment (Rept. No. 761). Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. H. R. 9320. A bill for the relief of the Home Insurance Co., of New York, N. Y.; without amendment (Rept. No. 762). Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. H. R. 10502. A bill for the relief of J. B. Holder; with amendment (Rept. No. 763). Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. H. R. 10503. A bill for the relief of R. P. Washam, F. A. Slate, W. H. Sanders, W. A. McGinnis, J. E. Lindsay, and J. T. Pearson; without amendment (Rept. No. 764). Referred to the Committee of the Whole House.

Mr. ROWBOTTOM: Committee on Claims. H. R. 7518. A bill for the relief of the Farmers National Bank of Danville, Ky.; with amendment (Rept. No. 767). Referred to the Committee of the Whole House.

Mr. MOORE of Virginia: Committee on Foreign Affairs. H. R. 8650. A bill for the relief of C. S. Winans; with amendment (Rept. No. 768). Referred to the Committee of the Whole House.

Mr. MOORE of Virginia: Committee on Foreign Affairs. H. R. 8651. A bill for the relief of Lynn W. Franklin; with amendment (Rept. No. 769). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 11287) granting an increase of pension to Louisa Donnelly; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 11448) granting an increase of pension to Alex M. Burns; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 11393) granting an increase of pension to Mary P. Crawford; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 11433) granting a pension to Zuleska A. Chadwick; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 11052) granting an increase of pension to Rosa M. Able; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 11392) granting an increase of pension to Matilda L. Hardman; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DEMPSEY: A bill (H. R. 11462) to prevent fraud in respect to the sale or disposition of securities through agencies of interstate or foreign commerce and to provide a summary proceeding therefor and penalties for the violation thereof; to the Committee on the Judiciary.

By Mr. DYER: A bill (H. R. 11463) to fix the salaries of certain judges of the Territories and insular possessions of the United States; to the Committee on the Judiciary.

By Mr. CONNALLY of Texas: A bill (H. R. 11464) to amend section 21 of the Federal highway act; to the Committee on Roads.

Also, a bill (H. R. 11465) to authorize the Secretary of War to lend War Department equipment for use at the tenth national convention of the American Legion; to the Committee on Military Affairs.

By Mr. EVANS of California: A bill (H. R. 11466) to make permanent the additional office of district judge created for the southern district of California; to the Committee on the Judiciary.

Also, a bill (H. R. 11467) for the erection of a public building at the city of Monrovia, State of California, and appropriation of money therefor; to the Committee on Public Buildings and Grounds.

By Mr. FRENCH: A bill (H. R. 11468) authorizing the Secretary of the Interior to execute an agreement or agreements with drainage district or districts providing for drainage and reclamation of Kootenai Indian allotments in Idaho within the exterior boundaries of such district or districts that may be benefited by the drainage and reclamation work, and for other purposes; to the Committee on Indian Affairs.

By Mr. MORIN: A bill (H. R. 11469) to authorize appropriations; for construction at the United States Military Academy, West Point, N. Y.; to the Committee on Military Affairs.

Also, a bill (H. R. 11470) to authorize appropriations for construction at West Point, N. Y., and for other purposes; to the Committee on Military Affairs.

By Mr. HUDSPETH: A bill (H. R. 11471) extending the time of construction payments on the Rio Grande Federal irrigation project, New Mexico-Texas; to the Committee on Irrigation and Reclamation.

By Mr. WILLIAMS of Missouri: A bill (H. R. 11472) to provide for the purchase of a site and the erection thereon of a public building in the city of Festus, Mo.; to the Committee on Public Buildings and Grounds.

By Mr. BURTNESS: A bill (H. R. 11473) granting the consent of Congress to the States of North Dakota and Minnesota, to construct, maintain, and operate a bridge across the Red River of the North at Fargo, N. Dak.; to the Committee on Interstate and Foreign Commerce.

By Mr. BERGER: A bill (H. R. 11474) to provide for old-age pensions; to the Commitee on Pensions.

By Mr. DENISON: A bill (H. R. 11475) to revise and codify the laws of the Canal Zone; to the Committee on Interstate and Foreign Commerce.

By Mr. FOSS: A bill (H. R. 11476) to authorize the Postmaster General to impose demurrage charges on undelivered collect-on-delivery parcels; to the Committee on the Post Office and Post Roads.

By Mr. FULBRIGHT: A bill (H. R. 11477) to establish the Shepherd of the Hills National Park near Reeds Springs, in Stone and Taney Counties, Mo.; to the Committee on the Public Lands.

By Mr. LEAVITT (by request): A bill (H. R. 11478) to amend an act to allot lands to children on the Crow Reservation, Mont.; to the Committee on Indian Affairs.

By Mr. MORROW: A bill (H. R. 11479) to reserve certain lands on the public domain in Valencia County, N. Mex., for the use and benefit of the Acoma Pueblo Indians; to the Committee on Indian Affairs.

By Mr. JOHNSON of Oklahoma: A bill (H. R. 11480) authorizing the Secretary of the Interior to sell certain tracts of land on the Wichita and Caddo Indian Reservation in Oklahoma and use the proceeds thereof in the purchase, improvement, and upkeep of other tracts suitably situated for cemetery purposes for these Indians and affiliated bands or tribes; to the Committee on Indian Affairs.

By Mr. PARKS: A bill (H. R. 11481) to make certain portions of Bayou Bartholomew in Arkansas a nonnavigable stream; to the Committee on Interstate and Foreign Commerce.

By Mr. THATCHER: A bill (H. R. 11482) to amend section 2 of an act entitled "An act to authorize an appropriation for the care, maintenance, and improvement of the burial grounds containing the remains of Zachary Taylor, former President of the United States, and the memorial shaft erected to his memory, and for other purposes, approved February 24, 1925; to the Committee on the Library.

By Mr. VINSON of Georgia: A bill (H. R. 11483) to amend section 1493 of the Revised Statutes as amended; to the Committee on Naval Affairs.

By Mr. WILLIAMSON: A bill (H. R. 11484) authorizing a per capita payment to the Rosebud Sioux Indians, South Dakota; to the Committee on Indian Affairs.

By Mr. DENISON: A bill (H. R. 11485) to amend the act entitled "An act to regulate the construction of bridges over navigable waters," approved March 23, 1906 (ch. 1130, 34 U. S. Stat. L. 84, secs. 491–502, inclusive; ch. 11, title 33, the Code of Laws of the United States, December 6, 1926); to the Committee on Interstate and Foreign Commerce.

By Mr. GARNER of Texas: Joint resolution (H. J. Res. 217) providing for the remission of duties on certain cattle which have crossed the boundary line into foreign countries; to the Committee on Ways and Means.

By Mr. SCHAFER: Joint resolution (H. J. Res. 218) directing the Federal Power Commission to withhold granting of license to develop power sites on the Wolf River within the Menominee Indian Reservation in Wisconsin, and to forward any recommendations for the issuance of such license to the Congress of the United States; to the Committee on Interstate and Foreign Commerce.

By Mr. McDUFFIE (by request): Joint resolution (H. J. Res. 219) authorizing the lawful heirs of loyal citizens of the United States to prosecute their claims in the various United States district courts against the United States Government for property taken, used, or destroyed by the Government in its prosecution of the Civil War, and to grant to the said district courts jurisdiction to hear and determine the merits of such claims, and for other purposes; to the Committee on the Judiciary.

By Mr. TILSON: Concurrent resolution (H. Con. Res. 23) to investigate the problem of the control of aircraft for seacoast defense; to the Committee on Rules.

By Mr. WILLIAMS of Texas: Concurrent resolution (H. Con. Res. 24) creating a joint committee to investigate the affairs of the Federal Reserve Bank of Dallas, Tex.; to the Committee on Rules.

SENATE

TUESDAY, *February 28, 1928*

The Chaplain, Rev. ZeBarney T. Phillips, D. D., offered the following prayer:

Most holy and merciful God, the strength of the weak, the rest of the weary, the comfort of the sorrowful, the savior of the sinful, and the refuge of Thy children in every time of need, save us from all pride and self-will, from weakness of judgment, from indecision and infirmity of purpose, from the sluggishness of indolence, from despondency in failure, and from a feeble sense of our duty, that leaning only upon Thee we may here find joy in Thy service, and at the last the fruition of all our labors, where mortal and immortal merge and human dies divine. Through Jesus Christ our Lord. Amen.

The Chief Clerk proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 49. An act to amend the Code of Law for the District of Columbia in relation to descent and distribution;

H. R. 6685. An act to regulate the employment of minors within the District of Columbia;

H. R. 6856. An act relating to the payment or delivery by banks or other persons or institutions in the District of Columbia of deposits of moneys and property held in the names of two or more persons, and for other purposes;

H. R. 8298. An act authorizing acquisition of a site for the farmers' produce market, and for other purposes;

H. R. 10147. An act to provide a complete code of insurance law for the District of Columbia (excepting marine insurance as now provided for by the act of March 4, 1922, and fraternal and benevolent insurance associations or orders as provided for by the act of March 3, 1901), and for other purposes;

H. R. 10298. An act to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near New Orleans, La.;

H. R. 10715. An act to authorize Col. Charles A. Lindbergh, United States Army Air Corps Reserve, to accept decorations and gifts from foreign governments;

H. R. 10869. An act amending section 764 of subchapter 12, fraternal beneficial associations, of the Code of Law for the District of Columbia; and

H. R. 11197. An act to authorize the Secretary of War to grant rights of way to the Vicksburg Bridge & Terminal Co. upon, over, and across the Vicksburg National Military Park at Vicksburg, Warren County, Miss.

The message also announced that the House had agreed to a concurrent resolution (H. Con. Res. 25) providing for the enrollment of House bill 10635, the Treasury and Post Office Departments appropriation bill for the fiscal year 1929, with certain amendments, in which it requested the concurrence of the Senate.

CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Bruce	Ferris	Hale
Barkley	Capper	Fess	Harris
Bayard	Caraway	Fletcher	Harrison
Bingham	Copeland	Frazier	Hayden
Black	Couzens	George	Heflin
Blaine	Curtis	Gerry	Howell
Blease	Cutting	Gillett	Johnson
Borah	Dale	Glass	Jones
Bratton	Deneen	Gooding	Kendrick
Brookhart	Dill	Gould	Keyes
Broussard	Edge	Greene	King
La Follette	Norris	Schall	Tydings
McKellar	Nye	Sheppard	Tyson
McLean	Oddie	Shipstead	Walsh, Mont.
McMaster	Overman	Shortridge	Warren
McNary	Phipps	Simmons	Waterman
Mayfield	Pittman	Smoot	Watson
Metcalf	Ransdell	Steck	Willis
Moses	Reed, Pa.	Steiwer	
Neely	Robinson, Ind.	Stephens	
Norbeck	Sackett	Thomas	

Mr. FLETCHER. I desire to announce that my colleague the junior Senator from Florida [Mr. TRAMMELL] is unavoidably absent. I will let this announcement stand for the day.

Mr. GERRY. I was requested to announce that the junior Senator from New Jersey [Mr. EDWARDS] is detained from the Senate by illness in his family. I ask that this announcement may stand for the day.

The VICE PRESIDENT. Eighty-one Senators having answered to their names, a quorum is present.

HOUSE JOURNAL, FOURTEENTH LEGISLATURE OF HAWAII

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Interior, transmitting a copy of the House Journal of the Fourteenth Legislature, Territory of Hawaii, regular session of 1927, which was referred to the Committee on Territories and Insular Possessions.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate a telegram from the Texas Federated Agricultural Association, signed by R. M. Kleberg, of Corpus Christi; S. Gough, of Amarillo; Roger Gillis, of Del Rio; and Ed Henry, of San Antonio, resolutions committee, all in the State of Texas, requesting that an impartial investigation be made of conditions relative to immigration from Mexico before consideration or passage of the so-called Box bill, affecting immigration into the United States from the Republic of Mexico, which was referred to the Committee on Immigration.

The VICE PRESIDENT also laid before the Senate a telegram in the nature of a petition from the Connecticut State Federation of Women's Clubs, signed by Emily Louise Plumley, president, Stamford, Conn., praying for the passage of the so-called McSweeney bill, being the bill (H. R. 6091) to insure adequate supplies of timber and other forest products for the people of the United States, to promote the full use for timber growing and other purposes of forest lands in the United States, etc., which was referred to the Committee on Agriculture and Forestry.

Mr. WARREN presented a resolution adopted by the Business Men's Club, of Saratoga, Wyo., remonstrating against the passage of legislation changing the public land laws or extending the present limits of forest reserve and game preserve areas, which was referred to the Committee on Public Lands and Surveys.

Mr. FRAZIER presented the petition of R. M. Crihton and 52 other citizens of Verona, N. Dak., praying for the passage of the so-called Brookhart bill, S. 1667, relative to the distribution of motion pictures in the various motion-picture zones of the country, which was referred to the Committee on Interstate Commerce.

Mr. BLAINE presented a memorial of 390 citizens of the State of Wisconsin, remonstrating against the passage of the so-called Brookhart bill (S. 1667) relative to the distribution of motion pictures in the various motion-picture zones of the country, which was referred to the Committee on Interstate Commerce.

Mr. DENEEN presented a memorial of sundry citizens of the State of Illinois, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. COPELAND presented a resolution adopted by the Nassau County Organization, representing 30 American Legion posts, Department of New York, protesting against the use of second-hand, dilapidated coffins that have been exposed to the elements of five years for the reburial of bodies of veterans in the cemetery at Bony, France, which was referred to the Committee on Military Affairs.

He also presented resolutions adopted by the Woman's Foreign Missionary Society of the Methodist Episcopal Church, favoring the revision of treaties between the United States and China so as to afford more equitable and favorable treatment to China, which were referred to the Committee on Foreign Relations.

Mr. REED of Pennsylvania presented a petition of the Philadelphia (Pa.) Board of Trade praying for the passage of the bill (S. 810) to reduce passport fees, and for other purposes, which was referred to the Committee on Foreign Relations.

He also presented a petition of the Philadelphia (Pa.) Board of Trade praying for the passage of the bill (H. R. 8557) to provide for the establishment and operation of foreign trade zones in ports of entry of the United States, etc., which was referred to the Committee on Commerce.

Mr. BINGHAM presented a letter in the nature of a memorial from the Connecticut Beekeepers' Association, remonstrating against the passage of legislation permitting the use of corn sugar in certain classes of foods without being so labeled, which was referred to the Committee on Manufactures.

He also presented a resolution adopted by the New London County (Conn.) Dental Association, praying for the passage of House bill 5766, the so-called Parker bill, to provide for the coordination of the public h alth activities of the Government, which was referred to the Committee on Finance.

He also presented letters in the nature of petitions from the American Legion auxiliaries of Stonington, Fairfield County and of Portland, all in the State of Connecticut, praying for adoption of the proposed naval building program, which were referred to the Committee on Naval Affairs.

He also presented a resolution adopted by the Seymour Grange, of Seymour, Conn., protesting against adoption of the proposed naval building program, which was referred to the Committee on Naval Affairs.

He also presented telegrams in the nature of petitions from the New Haven Chapter, Norwich Chapter, No. 110, Nathan Hale Chapter, No. 58, of Hartford, and Elpis Chapter, No. 117, of New Britain, all of the Order of Ahepa, in the State of Connecticut, praying for adoption of the pending debt settlement between the United States and Greece, which were referred to the Committee on Foreign Relations.

INTERSTATE COMMERCE COMMISSIONER JOHN J. ESCH

Mr. SACKETT. Mr. President, I ask unanimous consent to have printed in the RECORD in the regular order of proceedings and referred to the Committee on Interstate Commerce a letter from Mr. Alba B. Johnson to Senator CARTER GLASS and the reply of Senator GLASS thereto.

There being no objection, the letters were referred to the Committee on Interstate Commerce and ordered to be printed in the RECORD, as follows:

RAILWAY BUSINESS ASSOCIATION,
Philadelphia, February 21, 1928.

Hon. CARTER GLASS,
Senate, Washington, D. C.

MY DEAR SENATOR: The courtesy and deference shown to Interstate Commerce Commissioner Esch in his examination by the Senate committee creates an atmosphere inviting impartial discussion of the issues by those not directly interested in the Lake Cargo Coal case.

Colloquy at the hearing has focused attention upon the question whether Mr. Esch believes the commission to have the power, and should exercise it, to make rate adjustments designed to take business from one region and give it to another. As presented, this general question is complicated with collateral matters. One is the frequent obligation to correct inequity in rate relations, though such adjustment always tends and is intended to shift business. Another is the Hoch-Smith resolution, which was cited in the lake coal decision as requiring rate concessions to a depressed industry whenever within the zone of reasonableness the commission lawfully has discretion. For the purpose, however, of the point which I desire to call to your attention, imagine if you can that the commission in some rate case has deliberately and statedly asserted and exercised the power, clearly beyond the sphere of making rates reasonable, to transfer prosperity from one group of producers to another. Suppose, further, that a Senator dissents from such assertion of power. What course should he pursue?

Should he advise against the renomination and oppose the confirmation of the commissioners who voted as complained of when the term of each expires? Before adopting that procedure the Senator might well reflect upon the mischief threatened by such use of political pressure upon a semijudicial body. In this coal case some remonstrants against the decision have earnestly protested against such pressure, to which they accuse two commissioners of yielding in a change of vote between 1925 and 1927. By their indignation they fully recognize the impropriety and danger of efforts to subjugate the commission. To defeat the reappointment of an individual commissioner as punishment would merely perpetuate the practice which they deplore.

Should the Senator perhaps restrict his opposition to renominees who have changed their votes? If so, why wait until each culprit's term expires? If Mr. Esch, who changed his vote, and whose term expired in 1927, is unfit to be a commissioner, is Mr. Aitchison, who did likewise, qualified to retain office until the end of 1928?

If Messrs. Esch and Aitchison, against whom no evidence of having been politically influenced can in the nature of things be adduced and whose integrity nobody has heretofore or now assailed, were wrong on the merits in voting as they did in 1927, were not the five commissioners who concurred with them equally wrong? If he is moved to oust Mr. Esch on the ground that he voted wrong, will the Senator sit supine while all these other partners in the same guilt grind out to completion each his seven-year term?

It seems to me that this process of reasoning reduces to absurdity the resort to decapitation by senatorial rejection as warning for the future. As a servant of the whole people the Senator is bound to consider the national interest as paramount, charting for himself a route calculated to promote in the commission on one hand observance of constitutional and statutory limitations and on the other maintenance of a high standard of judgment as well as of integrity.

For the observance of constitutional and statutory limitations the commission can be held accountable through the courts. If all 10 of the commissioners who participated in the 1927 decision were beheaded, the executioners would not by such bloodshed have advanced one inch toward a permanent determination defining the power of the commission. Is it necessary for the country to lose the services of one or more experienced, capable, and reputable commissioners merely to convince the rest that their conception of powers is erroneous? Can not the courts interpret the law when in dispute? Can not Congress clarify its statutes if these are believed to have been misunderstood and misapplied?

Suppose, finally, that apart from the constitutional and legal aspects of power as exercised the Senator wishes that the commission might average higher in mental and moral attributes. Will he entertain for a moment the hope of promoting that object by refusing his confirmation vote to a statesman who in Congress and in the commission has served nearly 30 years and whom his leading interrogator at the hearing salutes as a "high-grade man"? Need the Senator hope to aid Presidents in winning the acceptance of more high-grade men, to say nothing of higher-grade men, by letting it be seen that they are expected to substitute the desire of litigants for their own judgment on pain of dismissal and may look forward to imputations upon their integrity following each decision between competitors?

The Railway Business Association, national organization of concerns manufacturing or dealing in railway equipment, material, and supplies, whose roll, herewith attached, includes members in all the States, has never discussed a freight rate or a rate level. It has no opinion upon the lake cargo controversy. It never recommends to the President candidates for the commission. Its platform, however, contains a plank urging the retention of incumbent commissioners during good health and good conduct, and urging Senators to refrain from disclosing to nominees under examination opinions by which they desire them to be governed. These things we say because, in our judgment, such a course is essential to the upbuilding and preservation of the commission as a tribunal to whose findings the public will accord the same respect as to those of the courts. We believe that no element in the country can gain so much as in the long run it will lose through breaking down the commission.

We do not say whether Mr. Esch should be confirmed or not. It is the prerogative and the duty of Senators to ascertain whether he has displayed intelligence, industry, and fidelity. We urge you, however, to leave to the courts the question whether he has participated in action contrary to the Constitution or the statutes, and to adopt measures other than rejection of a nominee for improving the quality of judgment exercised by commissioners. It is my purpose to recommend to the Railway Business Association a resolution favoring longer terms, higher salaries, and reduction of burden for interstate commerce commissioners.

With high respect,

Yours truly,

ALBA B. JOHNSON, *President.*

FEBRUARY 25, 1928.

MY DEAR SIR: I am this moment in receipt of yours of February 21 relating to the hearings before the Interstate Commerce Committee of the Senate in the case of Mr. Esch, nominated for continued membership on the Interstate Commerce Commission. I am not a member of the Interstate Commerce Committee and can not assume to conjecture what considerations may influence the action of the committee in the Esch case, nor will I pretend to speak for any other Senator. For myself I may say that the considerations so kindly presented by you, for the guidance of the committee and the Senate, have not been entirely overlooked.

You will pardon me if I venture to say that, in my conception of the case, your argument in behalf of the Interstate Commerce Commission and of the confirmation of Mr. Esch as a member thereof is specious rather than substantive or convincing. I take leave to believe confidently that the opposition to the confirmation of Mr. Esch is so far from being an exhibition of political influence as that it is distinctively a vehement protest against the exercise of political influence in matters relating to the functioning of the Interstate Commerce Commission.

A bit of background may clarify my meaning. For approximately 15 years the commission, from time to time, made decisions in adjustment of rate differentials between the competitive bituminous coal fields

of Pennsylvania and States adjacent without eliciting a single suggestion or a murmur from the Representatives or Senators in Congress from the adversely affected territory. This was because these Senators and Representatives in Congress assumed, as a matter of course, that the decision in each case related itself alone to the rate structure within the terms of the transportation act.

However, and of special significance, two years ago when the commission finally halted at the demands of the Pittsburgh operators for a still greater rate differential and refused to grant the petition, the political influence which now so alarms you was instantly invoked and applied. A Senator from your State of Pennsylvania bitterly antagonized the nomination of Mr. Woodlock as a member of the commission upon the avowed ground that Mr. Woodlock had participated in the decision adversely affecting the Pittsburgh coal fields. There was no breath of objection to Mr. Woodlock on the score of character or preeminent ability. He had been selected by the President because of his peculiar fitness in a realm of activity in which the commission was thought to be deficient. For weeks Mr. Woodlock's nomination was held up by your Pennsylvania Senator and opposition to his confirmation abandoned only for the avowed reason that to the opposing Senator had been practically delegated the right to name the next appointee on the commission and to name him from the State of Pennsylvania!

Soon after this occurrence the term of Commissioner Cox, of New Jersey, expired. Notwithstanding he had given satisfactory service and acquired a useful experience, Mr. Cox, having voted against the high Pittsburgh differential, was denied reappointment, and in accordance with the previously avowed understanding a gentleman long and intimately identified with the Pittsburgh coal interests was nominated to take his place on the commission. I do not recall having received at that time any word of remonstrance from you against the interjection of political influence in matters of this kind. Nevertheless the Senate, without your insistent aid, overwhelmingly repudiated this attempt to pack the Interstate Commerce Commission in behalf of a greater rate differential for the Pittsburgh coal fields, and the President found himself constrained to make a selection for the commission outside the territory affected. However it may seem to you, to some Senators it appears important to remember these circumstances.

As far as I am concerned, my association with Mr. Esch in the House of Representatives and my general knowledge of his character and nature would preclude me from supposing that he could be corruptly influenced or induced consciously to yield to extraneous influences. There are others, not so well acquainted with Mr. Esch, who feel inclined by all the attendant facts to think that the bitter opposition to Woodlock, in the first instance, and the tragic fate of Cox in the second place, were not forgotten history when two commissioners with terms nearing expiration reversed themselves and again yielded to the prayer of the Pittsburgh coal operators for an increased advantage over their competitors in other States. It is not to asperse the character of a public official to imagine a touch of timidity as an unconscious influence upon his mental processes, and I resent the suggestion from you or from any source that a Senator who has this conception of the case is actuated by political motives. As I have already said, just the reverse is true; he is indignantly resisting the political influences which were interjected without any admonitory outcry from you.

You ask if there is any more reason why Commissioner Aitchison, who likewise shifted his position, should be permitted to remain on the commission for the balance of his term than that Mr. Esch should be confirmed for another term. I should say there is not; but the name of Mr. Aitchison is not now before the Senate for confirmation. He could be removed only by impeachment, and you should be aware of the fact that the Senate has no constitutional right to initiate such a proceeding. When and if Mr. Aitchison's name shall come to the Senate for its approval, I should say that exactly the same objection might then reasonably be made to his confirmation as to that of Mr. Esch now. In neither case would the objection necessarily take the form of aspersing the nominee's character.

I very earnestly trust that I am not quite as simple as you would seem to imply when reminding me that the Interstate Commerce Commission is empowered to make rate adjustments which always tend to shift business.

I happen to know that; but I flatly deny your other postulate to the effect that such adjustments are "intended to shift" business in contemplation of the statute. I think the shifting of business is incident to rate adjustment and not the primary purpose of it. The Interstate Commerce Commission was empowered by Congress to adjust transportation rates solely with a view to the reasonableness and justness of such rates to the public, inseparably related to their compensatory nature as far as the railroads are concerned. The commission has no right, nor can Congress delegate to it any power, to adjust transportation rates with the deliberate design of "shifting business" from a competing industry or commercial enterprise in one section of the country to that of another section. The possession or exercise of any such power would make the commission the sole arbiter of industrial and business success or failure in the United States. The power in question, as recently exercised by the commission, is the power to enrich or to ruin. I do not think the Congress itself has any constitutional right to exercise such power, and until recently it was never conceived that it had intended to delegate any such right to the Interstate Commerce Commission.

With me this is the whole question; politics has not the remotest thing to do with it. I might much more readily ascribe to you political considerations in view of your utter silence when such tactics were employed to promote the industrial interests of Pennsylvania in contrast with your intemperate remonstrance now when there is resistance to their vicious effects. And as to your remarkable suggestion that Senators are proposing to coerce Interstate Commerce Commissioners "to substitute the desire of litigants for their own judgment," I say again that this is exactly what is not true. This is exactly what some Senators are protesting against, and precisely what you failed to condemn at the proper time. You were perfectly indifferent when it was proposed to "substitute the desire" of Pittsburgh coal litigants for the judgment of the commission. You were silent when it was even proposed to substitute a former attorney of the Pittsburgh coal interests for a member of the Interstate Commerce Commission who refused to yield to their demands, but now you are alert to the point of offensiveness when some Senators protest against the evil effects of the thing you once so lightly regarded, and when they also protest against the exercise of a power in behalf of your Pennsylvania coal interests which the Interstate Commerce Commission does not lawfully possess.

In your zeal you go so far beyond the confines of propriety as to tell me I have no right as a Senator to interrogate a nominee to the commission, upon whose fitness I am required by the Constitution to pass judgment lest he might assume that I do not agree with his interpretation of the law. In short, the nominee, in his immediate service, may have usurped and exercised a dangerous power, whether in a sinister way or from lack of mental perception makes no difference; nevertheless, it is your contention that a Senator, constitutionally required to determine for himself the fitness of this nominee, is not permitted to ask why the latter assumed to appropriate and exercise such a destructive power! Perhaps you know, as you clearly assume to know, more than I about the duties of a United States Senator and his sense of propriety; but since I may not always have the privilege of drawing you into conference I shall try to rely somewhat upon my own judgment in these important matters.

At the risk of briefly extending a letter now altogether too long, I venture to say that I have little patience with the contention that the so-called Hoch-Smith resolution had anything to do with the decision of the Interstate Commerce Commission in the Lake Cargo case. Inherently the resolution requires that the proposed general survey of the rate structure, as well as any action taken as a result of such survey, should be "according to the law." Repeatedly in the text of the resolution this is accentuated, and Mr. Esch and former Commissioner Hall testified that the reference was to the transportation act itself. Hence, it is idle to contend that the Hoch-Smith resolution either added to or subtracted from any provision of the interstate commerce act. The whole purpose of the Hoch-Smith resolution was revealed in the brief discussion of it in Congress, when its proponents insistently declared that the intention was to counsel the Interstate Commerce Commission to reduce transportation rates on agricultural products. The adversaries of the resolution just as insistently proclaimed that it was a futile gesture; that it conferred no authority which the commission did not already possess; that it was another of the multitude of schemes to deceive the farmers.

No Member of the Senate or House, whether favoring or opposing the resolution, ever dreamed that it might be taken as an excuse or used as a shelter for the exercise by the Interstate Commerce Commission of the power, by a manipulation of the transportation rates, to destroy a competitive industry in one section of the country in order that the industry might flourish in another section. It was never imagined by anybody that Congress was delegating to the commission power to transfer misery and squalor, however produced or to whatever extent prevailing, from one field of operation to another. Exercise of the power was never attempted by the commission until the lake cargo decision, when the evil influence which you now belatedly deplore was set in motion at your doorstep without eliciting from you a single word of expostulation.

Your suggestion that dissidents have recourse to the courts for correction of injustices and for curbing unwarranted exercise of authority is true, of course. Already appeal has been taken, and injured litigants may derive satisfaction from the reflection that the decision of the courts will not be reached under the terrifying influence of powerful interests which have not hesitated to threaten and to attempt an abasement of an inferior forum. Meanwhile your suggestion does not comprehend the full available remedy against the peril to the industry and commerce of the country in the arbitrary exercise by the Interstate Commerce Commission of a power it does not lawfully possess.

The Senate, in a proper exercise of its indubitable constitutional function, may say whether nominees to the commission who have, in its judgment, yielded to pressure to have flagrantly arrogated authority not contemplated by law, should be confirmed in the exercise of such power.

The Congress itself, if it agrees that the statute has been misinterpreted or the limits of the law exceeded, may properly so amend the act as to make plainer its intent, so that the commission may not hereafter find shelter for its abuse of power in any dubious provision of the law.

Very likely, despite your advice to the contrary, these remedies may immediately be invoked, since the favored beneficiaries of the commission's unprecedented decision are making gusty boasts that the sum of their triumph in Washington is a million dollars per week in the pockets of the Pittsburgh coal operators, taken, of course, under the color of law, from the pockets of their competitors in other States. The compensatory nature of the rate to the carriers, as the other millions of dollars to be picked from the pockets of users of bituminous coal, seem as far from the minds of these rejoicing Pittsburgh coal operators as from the thought of the Interstate Commerce Commission.

Very truly yours,

CARTER GLASS.

Mr. ALBA B. JOHNSON,
Packard Building, Philadelphia, Pa.

REPORTS OF COMMITTEES

Mr. EDGE, from the Committee on Banking and Currency, to which was referred the bill (H. R. 6491) to amend section 8 of the act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914, as amended, reported it without amendment and submitted a report (No. 439) thereon.

Mr. WALSH of Montana, from the Committee on the Judiciary, to which was referred the bill (S. 759) to give the Supreme Court of the United States authority to make and publish rules in common-law actions, submitted an adverse report (No. 440) thereon.

Mr. SHIPSTEAD, from the Committee on Agriculture and Forestry, to which was referred the joint resolution (S. J. Res. 59) authorizing the President to ascertain, adjust, and pay certain claims of grain elevators and grain firms to cover insurance and interest on wheat during the years 1919 and 1920, as per a certain contract authorized by the President, reported it without amendment and submitted a report (No. 441) thereon.

COL. CHARLES A. LINDBERGH

Mr. REED of Pennsyvania. Mr. President, there is now lying upon the clerk's desk House bill 10715, which has just been passed by the House, to authorize the acceptance by Colonel Lindbergh of the various gifts and medals which have been conferred upon him in the course of his successful flights. He is an officer in the Officers' Reserve Corps of the Army of the United States and, therefore, under the Constitution can not properly accept the gifts and medals without consent of Congress. In view of the high distinction of his service and in view of the fact that these gifts are coming to him every day, by almost every mail and express delivery, it seems to me to be suitable that the Congress should take swift action upon the request that consent be given for the acceptance of the gifts. Therefore, I ask unanimous consent for the present consideration, without reference to a committee, of House bill 10715.

The VICE PRESIDENT. Is there objection to the request of the Senator from Pennsylvania?

Mr. CURTIS. Mr. President, I hope the request will not be made. I am just as anxious as anyone to have the measure passed, but if we start waiving the rule requiring the reference of bills to a committee we shall have to extend the privilege every time a Senator asks it. I do hope that the Senator will withdraw his request. He can make a poll of the committee in 15 or 20 minutes and then report the bill in the regular order. I wish he would take the regular course.

Mr. REED of Pennsylvania. Of course, if there is any objection I withdraw the request.

The VICE PRESIDENT. The bill will be read twice by title and referred to the Committee on Military Affairs.

The bill (H. R. 10715) to authorize Col. Charles A. Lindbergh, United States Army Air Corps Reserve, to accept decorations and gifts from foreign governments was read twice by its title and referred to the Committee on Military Affairs.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. COPELAND:

A bill (S. 3408) for the relief of the owners of cargo shipped on board the U. S. schooner barge *Catskill* in September, October, and November, 1920; to the Committee on Claims.

By Mr. JONES:

A bill (S. 3409) for the relief of M. C. Cooper (with accompanying papers); to the Committee on Claims.

By Mr. GILLETT:

A bill (S. 3410) for the relief of Mary E. O'Connor; to the Committee on Claims.

A bill (S. 3411) granting a pension to Mary H. J. Abbott; to the Committee on Pensions.

By Mr. DENEEN:

A bill (S. 3412) granting a pension to Lowell T. Newlon; to the Committee on Pensions.

A bill (S. 3413) authorizing the appointment of Lewis W. Glossinger as a warrant officer, United States Army; to the Committee on Military Affairs.

By Mr. GLASS:

A bill (S. 3414) to repeal the joint resolution entitled "Joint resolution directing the Interstate Commerce Commission to take action relative to adjustments in the rate structure of common carriers subject to the interstate commerce act, and the fixing of rates and charges," approved January 30, 1925; to the Committee on Interstate Commerce.

By Mr. McNARY:

A joint resolution (S. J. Res. 102) authorizing the erection of a memorial building to commemorate the winning of the Oregon country for the United States; to the Committee on the Library.

HOUSE BILLS AND CONCURRENT RESOLUTION REFERRED

The following bills and a concurrent resolution were severally read twice by their titles and referred as indicated below:

H. R. 49. An act to amend the Code of Law for the District of Columbia in relation to descent and distribution;

H. R. 6685. An act to regulate the employment of minors within the District of Columbia;

H. R. 6856. An act relating to the payment or delivery by banks or other persons or institutions in the District of Columbia of deposits of moneys and property held in the names of two or more persons, and for other purposes;

H. R. 8298. An act authorizing acquisition of a site for the farmers' produce market, and for other purposes;

H. R. 10147. An act to provide a complete code of insurance law for the District of Columbia (excepting marine insurance as now provided for by the act of March 4, 1922, and fraternal and benevolent insurance associations or orders as provided by the act of March 3, 1901), and for other purposes; and

H. R. 10869. An act amending section 764 of subchapter 12, fraternal beneficial associations, of the Code of Law for the District of Columbia; to the Committee on the District of Columbia.

H. R. 11197. An act to authorize the Secretary of War to grant rights of way to the Vicksburg Bridge & Terminal Co., upon, over, and across the Vicksburg National Military Park at Vicksburg, Warren County, Miss.; to the Committee on Military Affairs.

H. R. 10298. An act to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near New Orleans, La.; to the Committee on Commerce.

The concurrent resolution (H. Con. Res. 25) was referred to the Committee on Appropriations, as follows:

Resolved by the House of Representatives (the Senate concurring), That the Clerk of the House of Representatives is authorized and directed, in the enrollment of H. R. 10635, entitled "An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1929, and for other purposes," to make the following changes in the engrossed bill:

On page 20, line 13, after the word "act," where it occurs the first time, insert the words: ", as amended."

On page 20, line 24, after the word "act," insert the following: "and for carrying out the applicable provisions of the act approved March 3, 1927 (Stat. L. v. 44, p. 1381)."

On page 20, line 25, after the word "officers," insert the word "attorneys."

On page 21, line 1, after the word "supervisors," insert the following: "gaugers, storekeepers, storekeeper-gaugers."

On page 22, line 9, after the syllable "tions," insert the word "prescribed."

On page 22, line 14, strike out the word "bonds" and insert the word "bonded."

AMENDMENT OF THE INTERSTATE COMMERCE ACT

Mr. METCALF submitted an amendment intended to be proposed by him to the bill (S. 656) to amend section 15a of the interstate commerce act, as amended, which was ordered to lie on the table and to be printed.

MUSCLE SHOALS

Mr. HARRISON submitted a modified amendment intended to be proposed by him to the joint resolution (S. J. Res. 46)

providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes, which was ordered to lie on the table and to be printed.

NOMINATION OF WILLIAM R. GREEN FOR THE COURT OF CLAIMS

Mr. BLEASE submitted the following resolution (S. Res. 160), which was referred to the Committee on the Judiciary:

Whereas His Excellency the President of the United States has nominated WILLIAM R. GREEN to the position of judge of the Court of Claims; and

Whereas said nomination is now up for consideration before the Judiciary Committee of the Senate; and

Whereas it is rumored that the said appointment was not made upon a question of ability but possibly of relieving an embarrassing situation by placing this party upon said bench and thereby causing a vacancy in another position: Be it

Resolved, That the Judiciary Committee be requested to inquire especially as to the ability as a lawyer of the nominee, when he last practiced law, where he last practiced law, what cases he has in the last several years been connected with in courts in which a display of any special legal ability was required and if he is a citizen of the District of Columbia and that they further inquire into the fact as to whether or not his son now holds a position at a salary of around $10,000 a year in the department to which he is to be appointed judge or an associate department and that they report their findings to the Senate upon these matters along with their recommendation as to confirmation.

PRINTING OF SOIL SURVEY OF PINELLAS COUNTY, FLA.

Mr. FLETCHER (for Mr. TRAMMELL) submitted the following resolution (S. Res. 161), which was referred to the Committee on Printing:

Resolved, That there be printed 2,000 copies of the soil survey of Pinellas County, Fla., for the use of the document room of the United States Senate, after such revision as may be deemed necessary by the Bureau of Soils of the Department of Agriculture.

TRAVEL EXPENSES OF SENATORIAL CLERKS

Mr. NYE submitted the following resolution (S. Res. 162), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate is authorized and directed to reimburse from the contingent fund of the Senate one clerk or one assistant clerk to each Senator, or to one clerk or assistant clerk to each committee of the Senate, such amounts as may be necessarily paid by said clerk or assistant clerk for transportation, Pullman charges, and meals en route from Washington, D. C., to the place of residence in the State of the Senator by whom employed at the time such trip is made, and return therefrom; said reimbursement being hereby expressly limited to one round trip for each regular, extra, or special session of Congress or of the Senate to and from said place of residence, for not to exceed one said clerk or assistant clerk, by the most direct route of travel, on vouchers to be certified by their respective Senators that such travel has been performed, and approved by the chairman of the Committee to Audit and Control the Contingent Expenses of the Senate.

HERBERT HOOVER

Mr. OVERMAN. Mr. President, last Tuesday morning an article appeared in a leading paper of my State in regard to Mr. Hoover's transactions in Europe which was said to be libelous in character. That was followed up with an article last Sunday morning, which I ask to have printed in the RECORD, together with what purports to be a photostatic copy of the decision of the court rendered in London in the case referred to in the article.

The VICE PRESIDENT. Without objection, it is so ordered. The matters referred to are as follows:

[From the Greensboro Daily News, Sunday, February 26, 1928]

HOOVER FORCES DENY HE WAS DEFENDANT IN SUIT

WASHINGTON, February 25.—There is an impression on Capitol Hill, as well as among politicians, that more is to be heard concerning the article published in a weekly paper here, Politics, in which Secretary Hoover was represented as a defendant in a losing litigation in London 20 or more years ago, involving coal-mining properties in China. This bureau caused a reprint of portions of the article, and it was immediately resented by friends of Secretary Hoover, who declared last night that the article in question, among other things, was libelous, that Mr. Hoover had not been a defendant in the case at all, but a witness whose testimony had resulted in the restoration of the mining property to the rightful owners, the Chinese and German associates.

The suit had been a four-cornered affair, with two British firms, a Chinese firm, and Belgium group concerned, and Belgians having been interested the Hoover people have long been armed with a letter from the Belgian ambassador, declaring the course of Mr. Hoover to have been above criticism, and this letter was brought out and made ready for service shortly after copies of the Daily News came here yesterday afternoon containing extracts from Politics, which publication the Hoover forces have characterized as irresponsible.

It likewise appears, following the arrival of the Daily News in Washington, that a hurried conference of Hoover leaders was called, Secretary Work, field marshal of the Hoover forces, having been among those called into council. At the conclusion of this conference a Daily News representative was requested to make correction, or denial of the story that Secretary Hoover had been involved in the Chinese suit in an unpleasant way, and to give publicity to the letter of the Belgian ambassador, all requests that this bureau gladly complied with. A representative of the paper also accepted an invitation to visit the Department of Commerce to-day and look over a photostat copy of the London court records, which, it was explained, would make it all very plain that nothing had happened in the London courts to reflect disagreeably upon Mr. Hoover, that the record and court decision would disclose that Mr. Hoover had only appeared in court as a witness, not a defendant in the one-time celebrated, international case.

The Daily News representative did visit the Commerce Department, when gentlemen sitting next door to Secretary Hoover showed the reporter a brief prepared by attorneys for the Secretary of Commerce in which the case was explained in detail, and the assertion made by the law firm that Mr. Hoover had been guilty of no impropriety in his business dealings in China and London, and all reports to the contrary were characterized as "wanton defamation." Apparently this brief, along with the Belgian ambassador's letter, have long been in hand, ready for just such an emergency as appeared last night. There was a reiteration to-day of the statement of last night that Mr. Hoover had only appeared as a witness in the case in question, but no photostat or certified copies of the decision in the case were produced.

At the office of Politics, however, those in charge were somewhat more communicative when it came to records in the case. It was asserted that the article quoted by the Daily News was nothing more nor less than a digest of the decision of the court in the Chinese case, and that Mr. Hoover had, in point of fact, been mentioned as a defendant, not once but several times, and what purported to be a photostat copy of the London Times was produced, in which mention was made of the Chinese coal case. The decision of his lordship, Justice Joyce, chancery division, high court of justice, was published in the London Times of March 2, 1905. The Times called it a suit brought by His Excellency Chang Yen Moa against Bewick, Moreing & Co., H. C. Hoover, and others.

The court dealt rather severely with the defendants, and the point is, was Mr. Hoover among the defendants or was he present merely in the capacity of a witness? Friends of Mr. Hoover declare with great emphasis that he never at any time appeared as defendant or plaintiff, but merely as witness on the side of righteousness and justice. Critics of the Commerce Secretary declare with equal emphasis that the London Times's report of the court proceedings will be borne out by the opinion of court itself, and they hint broadly this court opinion—the full text thereof—will shortly be published, with a view to permitting the public to render judgment in the light of the court's decision. They aver that this decision will afford a complete answer to the question of whether Mr. Hoover was present as defendant or witness in this Chinese case.

By way of supplementing the London Times court report, and in contrast to the letter of the Belgian ambassador, the anti-Hoover camp to-night presented what they termed excerpts from the opinion of the London court. They thus quote the court: "Incidentally it appears by a letter of Mr. Hoover of March 22, 1901, that he actually took possession of some of the title deeds of the property by main force. Under the circumstances I am of the opinion that to allow the defendant company, while they insist on retaining the benefits of the transfer to escape from the obligations of the memorandum upon any such pretext that Hoover or De Wanbers were not authorized to agree to its terms, or that it was impossible for the defendant company to perform some of their terms without altering the constitution, would be contrary to one of the plainest principles of equity. It would be to sanction such a flagrant breach of faith as, in my opinion, could not be tolerated by the law of any country."

It is suspected that this is just the beginning of attacks to be directed against Mr. Hoover personally. If accusations of this kind are found to have little foundation in fact, they will redound, of course, to the advantage of Mr. Hoover in the preconvention campaign. Just now the politically inclined are awaiting the publication of the opinion of the London court in the Chinese case to determine, first, whether Mr. Hoover was numbered among the defendants, and, second, whether the court found fault with Mr. Hoover's conduct.

[From the London Times, Thursday, March 2, 1905]

High Court of Justice—Chancery Division

(Before Mr. Justice Joyce)

CHANG-YEN-MAO *v.* MOREING AND OTHERS

Judgment was given in this case this morning. It was an action by the plaintiff, his excellency Chang-Yen-Mao, to have it declared that a certain memorandum of conditions relating to the transfer of mining

property in China to a company called the Chinese Engineering & Mining Co. (Ltd.) was binding upon the defendants, and, in the event of its not being held to be so binding, for a declaration that the transfer of the property was obtained by fraud and ought to be set aside.

Mr. Levett, K. C., Mr. Gill, K. C., Mr. Younger, K. C., and Mr. G. Lawrence appeared for the plaintiff; Mr. Hughes, K. C., Mr. Rufus Isaacs, K. C., and Mr. G. F. Hart for the defendants, C. A. Moreing and Bewick Moreing & Co.; and Mr. Haldane, K. C., Mr. W. F. Hamilton, K. C., and Mr. Vernon for the defendant company.

The hearing occupied the time of the court for 13 days and will be found reported in the Times of January 19, 20, 25, 26, and 28, and February 1, 2, 4, 8, 9, 11, and 13.

Mr. Justice Joyce said: "This is an action by his excellency Chang and the Chinese Mining & Engineering Co. of Tientsin, whom I will call the Chinese company, asking for a declaration that a certain document called the memorandum of February 19, 1901, is binding on the defendants, and an order for the carrying into effect of the provisions of such memorandum. Alternatively, and in the event of such memorandum being held not to be so binding, for either a declaration that a certain other document called the transfer of February 19, 1901, was obtained by the fraudulent representations and fraud of the defendants or their agents and ought to be set aside, and an order that the same may be set aside accordingly, or a declaration that the defendants are not entitled to retain the benefits of the said transfer, except on the condition of making good to the plaintiffs the obligations imposed by, and performing the provisions contained in the said memorandum and such order consequent on such declaration as may be necessary for giving effect thereto.

"Then there is a general claim for damages. The transfer is a document which was drafted in English by Mr. White Cooper, a solicitor in Shanghai, who was brought over to Tien-tsin for the purpose. It is in the form of an indenture, expressed to be made between the Chinese company, his excellency Chang, as the director general of all the mines in the Provinces of Chi-li and Jehol, and director general of the Chinese company, and Gustav Detring, a director of the same company, of the first part, Mr. Hoover, as agent of Moreing, of the second part, and the defendant company, of the third part. It contains recitals of, among other things, a certain agreement of July 30, 1900, which I shall have to refer to again hereafter, and purports to be a conveyance in pursuance of that agreement of the mines and property of the Chinese company to the defendant company. No consideration was expressed, but it contains an undertaking by the defendant company to assume the liabilities of the Chinese company and indemnify such last-mentioned company therefrom. As to the nature, extent, and enormous value of the property comprised in this transfer I may refer, without reading it, to the speech of the chairman of the company at the extraordinary general meeting of that company held on July 16, 1901. A Chinese translation of this document, the principal party to which was his excellency Chang, who can not speak English and must be ignorant of our statute law in reference to joint-stock companies and English law generally, was made; and both the Chinese version and the English version were executed by the parties thereto other than the defendant company, being sealed with the official seal of his excellency as director general of the mines in the Province, and so representing the Chinese Government, and with the official seal of the Chinese company. The place of execution was Tien-tsin, in the Empire of China, where all the property which the transfer purported to comprise was situated. I do not know whether this document of itself operated as a conveyance of immovable property in China secundum legem domicilii. I have some reason to suspect that it did not; and I observe that the third clause, according to the English version, provides that 'the Chinese company and his excellency and Detring hereby agree with the defendant company to sign all other documents, and do all other acts that may respectively be required for completing the transfer to the Chinese company of all the properties hereby agreed to be transferred.' I have not been informed, however, what is the law of China with reference to any of the matters in question in this action. None of the parties has offered any evidence or made any allegation on the subject, though I have from time to time suggested that it might be required to be considered, and have rather invited argument upon it.

"The transfer was the outcome of protracted discussion and negotiations for the formation of the Chinese company into what I may call an Anglo-Chinese company to be formed in England, the principal objects in view being the better protection of the property of the company in the disturbed state of the country caused by the Boxer riots, and also the introduction of foreign capital for the development and more advantageous working of the mines. The parties between whom such negotiations took place were the defendant Moreing and his firm on the one side and on the other His Excellency Chang and the Chinese company by their director general, his excellency, who was also director general or governor of the mines of the Province under the Emperor. His excellency was from time to time assisted in the matter by Mr. Detring, a foreigner who had been long resident in China and had held some considerable office in the Chinese customs. Various stipulations had from the first been made by his excellency in reference to the constitution and administration of the proposed company into which the Chinese company was to be transformed. In particular it had been contemplated all along and definitely agreed that the capital of the new company should be £1,000,000 in £1 shares, and that of these £375,000 should go, quite properly, to the shareholders of the Chinese company as the price or part of the price of the property, subject to encumbrances that were to be taken over. There were to be two boards of directors, one in China and one in London. The management of the property in China was to be in the China board, and his excellency was to be director general as before in general charge of affairs. The defendant company was registered on December 21, 1900, by the Moreings, or a certain oriental syndicate which Mr. Moreing has associated with himself in the business, and to whom he in some way turned over the formation of the company, and, I suppose, its promotion and management. According to the memorandum of association, the first object, and I may say the principal object of the company, was to carry into effect, with such modifications, if any, as may be agreed upon, the agreement mentioned in clause 3 of the articles of association; and clause 3 of the articles of association provides that the company shall forthwith enter into an agreement in the terms of the draft, which for the purpose of identification has been initialled by two of the subscribers to the memorandum of association, and the board shall carry the same into effect, subject to any modification, and so on. Now, it is a somewhat curious circumstance that this draft has not been, and could not be, produced at the trial.

"I am not at all sure what it was, if indeed it ever existed. I omitted to say that at an early period of the negotiations, which I mentioned before—namely, in the month of August, 1900—the agreement I have mentioned of July 30, 1900, was executed. It purported to be a grant of an assignment in terms by Detring, as agent and attorney of the Chinese company, to Hoover, who was the agent of the defendant Moreing, upon trust, of all the property of the Chinese company, and it was thereby in effect provided, among other things, that Hoover should hold the property as trustee for the contemplated new company when formed. Now, His Excellency Chang, being urged by the defendants and the oriental syndicate, through their agents in China, including Mr. White Cooper, the solicitor from Shanghai, and also being advised by Detring, to transfer the property of the Chinese company to this defendant company, personally objected, and, as it has turned out very wisely, declined positively to execute the transfer when submitted to him because it did not contain any statement of the arrangements for which he had stipulated with respect to, among other things, the constitution and management of the new company into which the Chinese company was to be transformed. The document did not appear to him adequately to protect his Government or the Chinese shareholders or himself; and in this he was perfectly right. In particular, as I observe, it did not even provide for the 375,000 shares being given or paid to the shareholders of the Chinese company for the purchase of that company's property. Between his excellency and the agents of the defendants, including Mr. White Cooper, which agents also represented the oriental syndicate, as I consider, and its creature, the defendant company, there were long and heated discussions extending over four days. Hoover, as he himself admits, went so far as to use various threats to his excellency. Ultimately his excellency was induced with difficulty to accede to a proposal of Mr. White Cooper's, that the terms, on account of the absence of which from the transfer he declined to execute, should be embodied in another document, being the memorandum I have already spoken of, to be executed previously to and at the same time with the transfer. Under this arrangement his excellency was assured by the representatives of the other parties to the transaction that the memorandum would be, as it was expressed to be, the ruling document and be acted upon, or, in other words, would be binding and be carried into effect. It was upon the faith of and in reliance on these assurances that his excellency was induced to affix his seal to the two versions of the transfer.

"The memorandum in two versions, Chinese and English, was executed at the same time in the same manner by Hoover, the agent of the defendant Moreing, De Wouters, who I think, may be taken to have represented the oriental syndicate and the defendant company and every one interested through them, and it was also executed by his excellency and Detring. In truth the execution and terms of the memorandum appear to me to have formed not only a material but an essential part of the consideration for the transfer—if it was a transfer—of the property therein comprised. Mr. White Cooper, a member of the firm of English solicitors at Shanghai, who acted for the oriental syndicate and the defendant company, and prepared the draft of the transfer, as also the memorandum, attested the execution. After the present dispute had arisen, Detring, on behalf of the plaintiff or of his excellency, on July 25, 1902, made a representation of their complaints to Mr. White Cooper's firm at Shanghai, they being the solicitors to the defendant company; and these solicitors, replying on August 11, 1902, say, among other things: 'It was in order to maintain the rights of yourselves'—that is, Detring and his excellency—'and the Chinese shareholders that the agreement'—that is, the memorandum of February, 1901—'was made. This agreement was dated and signed on the same day as the transfer and recognized by Mr. Hoover and De Wouters

and ourselves as a binding agreement and a condition precedent'—that is not, perhaps, a very accurate expression—'for the transfer of the old company's property. The terms of this agreement'—that is, the memorandum—'should consequently be loyally carried out. Further, we note the position you and his excellency have taken up and will send a copy of your letter to the London board'—that is, the board of the defendant company—'by the next mail, leaving it to them to act as they think fit, and pointing out the serious consequences to the welfare of the company of their refusal to comply with your requirements.' Hoover, as appears by his evidence, is really of the same opinion; and De Wouters says that he executed the memorandum simply because it contained nothing but what had been agreed to before, which is true. Indeed, it has not been seriously disputed before me, and at all events I find as a fact, that the terms of this memorandum formed the basis and foundation of the whole arrangement, and were well understood by all parties to be an essential condition, whether as a collateral agreement or otherwise, of any transfer being made by the plaintiffs or either of them to the defendant company. I also find as a fact that the terms of this memorandum have not been observed or performed.

"As alleged by the statement of claim, not denied by the defense of the defendant company, and as proved by the evidence, the defendant company and its directors have declined to recognize the memorandum as having any force or effect or to abide by the provisions thereof, and they did this down to the time of the trial, although they had somehow managed to get possession of the property and were claiming it under the transfer. Incidentally, it appears by a letter of Mr. Hoover of March 22, 1901, that he actually took possession of some of the title deeds of the property by main force. Under the circumstances I am of opinion that to allow the defendant company, while they insist on retaining the benefits of the transfer to escape from the obligations of the memorandum upon any such pretext as that Hoover or De Wouters were not authorized to agree to its terms or that it was impossible for the defendant company to perform some of these terms without altering its constitution, would be contrary to one of the plainest principles of equity. It would be to sanction such a flagrant breach of faith as, in my opinion, could not be tolerated by the law of any country. In this court a purchaser of real estate, even though he may have obtained possession and an actual conveyance may have been made to him, will not be allowed to keep the property without discharging the consideration for the same. If authority be wanted for the existence of so natural and obvious an equity, I need only refer to Lord Eldon's judgments in the leading case of Mackreth *v.* Symons (15 Ves. 329). Both at law and in equity a person who claims under a deed, though he may not have executed it, must give effect to all its provisions; and for the purpose of applying this principle to the present case I am entitled, I think, if necessary under the circumstances, to consider the transfer and memorandum as practically one instrument. Nevertheless, the defendant company, not being able or not choosing to agree with his excellency and the Chinese shareholders as to the meaning and effect of the memorandum, or finding it inconvenient to fulfill its obligations, took up the position that, as they expressed it, vis à vis the defendant company the memorandum was of no binding effect; that the agents who obtained and executed the so-called transfer had no authority to enter into the memorandum, and so on; in short, the defendant company, the defendant Moreing being then a director, and, as he now says, overborne by his colleagues, repudiated the memorandum and set the plaintiffs at defiance; and thereupon the present action was instituted. In due course defenses were delivered, one by the Moreings and the other by the company.

"I do not consider it necessary to discuss these in detail. Suffice it to say that both, as I read them, dispute the memorandum, insisting upon every objection, whether well founded in fact or not, that could be raised to it, some of these objections, to my mind, being under the circumstances not very creditable. Ultimately his excellency and Mr. Detring, as I can not help suspecting somewhat to the disappointment of the defendants, came over to this country for this trial and gave their evidence before me. At length, after the evidence and cross-examination of his excellency were completed, and Mr. Detring, the other witness on the part of the plaintiffs, had been examined in chief and cross-examined on behalf of the Moreings, and in the midst of his cross-examination by the leading counsel of the defendant company, a remark of mine elicited the statement, then for the first time made, that the defendant company did not dispute the memorandum. Indeed, in my opinion, after the evidence that had been given, they could not have done so with the slightest prospect of success, or, indeed, as I think, honestly. But they began to suggest questions as to the construction or effect of the document and technical difficulties in the way of the plaintiffs' obtaining the relief which they claim in the action. Later on it appeared that the counsel for the Moreings also were not able, or, as they possibly would say, did not care, to dispute the memorandum. In other words, the memorandum is now (I may almost say admittedly) binding, as, indeed, it always was. This memorandum, however, does not, in my opinion, either with or without the transfer, constitute a contract of such a nature as this court could decree specific performance of. I can not directly order that it should be carried into effect, and I think there would be great difficulties in the way of the plaintiffs' maintaining an action for damages upon it against any of the defendants. But I hold and declare that the memorandum dated February 19, 1901, is binding as against the defendants, and that the defendant company was not, and is not, entitled to take or retain possession or control of the property comprised in the transfer or the benefits thereof without complying with and performing the provisions and obligations contained in the memorandum. In other words, I am of the opinion that, unless within a reasonable time the provisions and obligations of the memorandum be complied with and performed, this court ought to do what it can to restore to the plaintiffs the mines and property the subject of the transfer, and, probably by injunction if necessary, to prevent the defendant company, its agents and servants, from retaining possession. The plaintiffs, therefore, succeed upon the principal issue in the action, and, in my opinion, are entitled to their costs. I now proceed to consider the plaintiffs' claim to damages.

"The defendant company has all along claimed, and still claims, to have acquired all the property of the Chinese company by virtue of the transfer of February 19, 1901, expressed to be made in pursuance of the agreement of July 30, 1900. Nevertheless, by an agreement dated May 2, 1901, nearly three months afterwards, and expressed to be made between the oriental syndicate of the one part and the defendant company of the other, the whole of whose nominal capital was £1,000,000 in £1 shares, the syndicate affect to sell to the company the benefit of the aforesaid agreement of July 30, 1900, for a purchase consideration of 999,993 of these 1,000,000 shares to be allotted as fully paid up to the syndicate or their nominees, and the sum of £2,000 and odd in cash, being the amount of the fees paid by the syndicate on the registration of the defendant company. This agreement of May 2, 1901, was sealed at a meeting of the board of the defendant company held on the 25th of the same month of May. At that meeting 50,000 of these shares are allotted as fully paid up to the defendant Moreing and 150,000 as fully paid up to the oriental syndicate, and it was resolved that the board agree to allot to the nominees of the Chinese company 375,000 shares. These, of course, were for the shareholders of the Chinese company, and then (this is the extraordinary part of it) to the nominees of the oriental syndicate 424,993 shares—that is, all the rest of the capital, deducting the seven shares required for the signatories of the memorandum of association. I think these 424,000 and odd shares are not in the minutes, if I recollect rightly, expressed to be fully paid up, but as I understand they have been always so treated and dealt with. Now, the plaintiffs, very naturally, complain of this transaction. Suppose it be granted that the 50,000, and even the 150,000 (making together 200,000 shares) were to go for promotion profits—if, indeed, that were allowable—why were 424,993 fully paid-up shares of the company to go among the nominees of the syndicate for no consideration that I have been able to discover? In short, it appears to me upon the facts that transpired in the course of this trial, that there are at least plausible grounds for contending that the defendant company has been defrauded of nearly 425,000 shares, to the injury and loss of the Chinese shareholders, who were justly entitled to the 375,000 shares. These shares, as I understand, are not of a merely nominal value, but are being or have been sold at a price above par; for the plaintiffs say, and it seems to me with reason, that the value of the 375,000 shares coming to the shareholders of the Chinese company for the purchase of their property, undoubtedly of great value, is substantially—it may be to the extent of one-half—reduced by the issue, for no consideration whatever, of these fully paid-up shares to the promoters or their nominees.

"The defendants have endeavored to excuse the promoters by saying that of these shares 250,000 had been given as a bonus or additional consideration to persons who subscribed £500,000 to the company upon the security of debentures, which debentures were issued without the consent or knowledge, so far as I can make out, of the Chinese shareholders. The plaintiffs reply that it was not necessary to issue nearly so large an amount of debentures, and that of the money so raised, £200,000, or thereabouts, has never been expended, but is still to the credit of the defendant company with their bankers, and also that the money, if required, could have been obtained without sacrificing the shares. No offer of the debentures was made to the public, but the promoters, as I understand, distributed the shares and allotted the debentures among themselves and their friends, who I suppose still hold the debentures and the 424,993 fully paid-up shares, for which nothing has in fact been paid. Now, certainly, the proceedings of the board of directors of the defendant company, in the month of May, 1902, are of a remarkable nature, though I do not pretend to have given a complete statement of all the facts. They have not yet been fully investigated. At all events, it seems to me I can not set the matter right in this action, which was not framed and is not properly constituted for the purpose. The only materiality in this action of the apparently unauthorized issue of fully paid-up shares is that it is put forward as a ground for a claim to damages made against the defendant Moreing in respect of the consequent diminution in value of the 375,000 shares going to the shareholders of the Chinese com-

pany. But this claim, as it appears to me, if it could be dealt with in this action, must be founded upon a breach of the terms of the memorandum, which was no doubt executed by Hoover as agent for the defendant Moreing. I do not, however, find in the memorandum any contract by the defendant Moreing that no shares shall be issued as fully paid up, nor indeed do I see anything to prevent fully paid-up shares being issued by the defendant company bona fide for a proper purpose and a proper consideration. Nor do I see how the Moreings are directly responsible to the plaintiffs for the improper issue of fully paid-up shares to the oriental syndicate or its nominees (if such issue was improper); in other words, I do not think I am able to make the defendant Moreing, or his firm, responsible in this action for any loss sustained by the plaintiffs through the misfeasance of the directors of the defendant company or of the oriental syndicate as promoters of the defendant company. But my judgment in this action must be expressed to be without prejudice to any action or other proceedings that may be taken by or on behalf of the defendant company, or against any of the defendants by anyone in reference to the promotion or formation of the defendant company, or the issue of any shares or debentures thereof or any of the transactions of the same company or its directors.

"Counsel for the plaintiffs, in opening the case, asked me to make certain amendments, which I allowed; these appear in the amended statement of claim as printed. Subsequently—in fact, upon the thirteenth day of the trial—after all the evidence had been taken and in the midst of the summing up of the case for the defendants Moreings, by their counsel, the plaintiffs for the second time asked to amend by alleging that Mr. Detring (I suppose as agent of the plaintiff Chang) was induced by the fraudulent representations contained in a letter of November 9, 1900, from the defendant Moreing to Mr. Detring to agree to make certain alterations; in truth, really to agree to reexecute with alterations the document I have mentioned more than once of July 30, 1900. What happened with respect to these alterations is a long story, but not, I think, directly material in this action, though it may be most material upon some future occasion. As at present advised I do not think that these alterations, made at the time and under the circumstances when they were made without the concurrence of the defendant company, can be of any validity, nor am I satisfied at present that the plaintiffs have sustained any damage thereby. No one has contended before me that these alterations are binding upon anyone. It was also proposed to allege by the same amendment that his excellency was induced to execute the transfer of February 19, 1901, by fraudulent representations contained in a letter of February 9, 1901, from Hoover, who is not a defendant but was an agent of the Moreings, to Mr. Detring. Having regard to the concluding words of paragraph 17 of the amended statement of claim, I am not quite sure that this claim for damages was intended to be made unless the memorandum were held by me and not to be binding. But how have the plaintiffs sustained damage as a necessary or natural consequence of the execution by his excellency of the transfer, if the memorandum be binding and be enforced, as I hold it must be? Upon the whole I think that I ought not to allow these proposed amendments; but my judgment will be without prejudice to any future action or other proceeding that may be taken by the plaintiffs, or either of them, upon the ground of any alleged misrepresentations (fraudulent or other) in either of these two letters. There remains only one other claim for damages, which is a claim by His Excellency Chang against the defendant company for damages on the ground of his excellency's having been, as it has been expressed, deprived of a valuable appointment, which means, I suppose (if it means anything), on the ground of his not getting an appointment, in pursuance of the memorandum, of director general in China of the defendant company with the same powers and emoluments as he enjoyed in the Chinese company before February 19, 1901.

"But I do not understand that his excellency is not still director general of the Chinese company. The claim, if it can be supported, is for damages in respect of a breach of a particular clause in the memorandum. Besides other difficulties, to give these damages would, as it seems to me, be inconsistent with the other relief which I am granting in this action. I am assuming that as a consequence of my judgment the terms of the memorandum will be performed or complied with in their entirety; otherwise, if I am right, the defendant company will not be allowed to retain the property. Certain accounts may have to be taken, and the defendant company may be entitled to reimburse their expenditure, or part of it, so far as not provided by means of moneys received from the mines. I shall reserve any question of damages that may arise in respect of any default or delay in the performance of the obligations and provisions of the memorandum until it be seen what is the result of my present judgment. The defendant company must pay the costs of the plaintiff. The defendants Moreing, who were necessary parties to this action as against the company, having regard to their course of conduct and the attitude which they have maintained until a late period of the trial, and to the fact that in my opinion the costs have been seriously increased by their conduct in these proceedings and otherwise, must bear their own costs. I think perhaps I ought to add one other observation, which is that, in the investigation taken before me of the transactions in question, it has not been shown to me that His Excellency Chang has been guilty of any breach of faith or of any impropriety at all, which is more than I can say for some of the other parties concerned."

FEDERAL INTERMEDIATE CREDIT BANK INVESTIGATION

Mr. BLEASE. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial from the Charleston (S. C.) News and Courier relating to a resolution which I introduced day before yesterday calling for an investigation of the administration of the affairs of the Federal intermediate credit bank in Columbia.

The VICE PRESIDENT. Without objection, it is so ordered. The editorial is as follows:

SHOULD BE PRESSED

The resolution introduced in the United States Senate by Senator BLEASE for the appointment of a subcommittee to investigate the administration of the affairs of the Federal intermediate credit bank in Columbia deserve approbation and the interest of the whole country demands its adoption.

It is far from certain that the whole story of the transactions of 1925 and 1926 in Beaufort have been or will be told in the courts. It has come to light that in Beaufort a State bank has failed, an association of farmers has gone into bankruptcy, and that a tremendous sum of money was borrowed from the intermediate credit bank 130 miles away in Columbia.

It has been said that the dealings of the intermediate credit bank with the group of planters in Beaufort were on a larger scale by far than they have been with farmers' associations in general.

One would like to know whether the Federal banks of this nature in other parts of the United States have had immense transactions with a single farm association?

The crash in Beaufort came with a suddenness for which the public was wholly unprepared and disregarding all considerations of where the fault lay the fact remains that agricultural operations have been left in Beaufort in a sadly demoralized and precarious state. The News and Courier does not suggest that the credit bank in Columbia has deviated in the least degree from legal prescriptions; that is a subject of which it knows nothing, but the bank was organized to assist the farmers and it can not be disputed now that the Beaufort district would be in a condition far better had the intermediate credit bank act not been passed by Congress.

The proposed investigation should inquire whether or not the intermediate credit banks are serving the end for which they were established and if they are not the Congress should abolish them.

The history of events in Beaufort the last two years furnish abundant reason to make the investigation suggested by Senator BLEASE advisable. These banks are an experiment, an experiment entered upon by Congress, and it is the business of Congress to watch it.

The investigation should be pressed.

MOTOR TOURISTS IN SOUTH CAROLINA

Mr. BLEASE. Mr. President, I ask unanimous consent to have printed in the RECORD an article taken from the Charleston (S. C.) News and Courier relative to motor tourists in South Carolina and the South.

The VICE PRESIDENT. Without objection, it is so ordered. The article is as follows:

MOTOR TOURISTS FLOODING

(Editorial correspondence)

AIKEN, February 25.—This city, named for a Charlestonian, seat of the United States District Court in Western Carolina, far famed for its winter colony of wealthy eastern people, is in United States Highway No. 1. This route enters South Carolina near Cheraw and proceeds through Camden and Columbia. For several years it has been rated the most popular route between the Eastern and Middle Atlantic States, and the Florida resorts.

Through Aiken, on to Augusta, thence southward, in the late fall and early winter, pours a flood of motor tourists; in the late winter and early spring the movement is in both directions. Motor licenses from "all over" are on streets and highways. Local hotels and boarding houses are doing a turn-away business. The town is full and overflowing.

Towns on this highway have been catering to this motor tourist business. They issue maps and they issue instructions. Their folders tell of the attractions of the towns and of their facilities for visitors. They limn a pretty poster. They are broadcast in Eastern and Middle Atlantic States and they are broadcast in Georgia and Florida towns. In short, towns on United States Highway No. 1 are, and have been, investing generously in direct advertising, and they have built up a system of practical cooperation.

Another winter the Coastal Highway, conceded to be the most direct, the most attractive, and the most convenient route between the New

England States and the Keys of Florida will be the only all-paved route. Over it will begin to flow a great stream where until now there has been little more than a dribble. In course of time the practical advantages of using this all-winter, all-season highway will become known throughout the land; meanwhile, towns on the route need to coordinate their activities in directing attention to the way.

If towns on the Coastal Highway and hotels on the Coastal Highway scatter their folders independently, they will lose the greater part of their effort. If they would achieve maximum results they must concentrate and labor together in a common cause. Towns on United States Highway No. 1 furnish excellent maps and charts about themselves; Charleston, Savannah, Walterboro, Florence, and other towns on the Coastal Highway are not shown on any of these maps, except in pointing out laterals from the main No. 1 highway.

Towns on the No. 1 highway are not called upon to advertise towns on the Coastal Highway, a competitive route. If towns on the Coastal Highway wish to spread information about themselves, they will have to do as towns on the No. 1 highway are doing—broadcast folders through cooperation. Proper effort will hasten the growing volume of traffic over the all-paved route. The Coastal Highway will advertise itself through its advantages and its attractions, but towns which hope to benefit from a motor-tourist traffic need to accelerate the fame of their incomparable route.

Added to the picturesqueness of many stretches on the Coastal Highway, added to the high excellence of the pavements, are scores of Colonial and Revolutionary relics. In the Charleston zone, the Middleton Place and Magnolia Gardens furnish an attraction of rare value. Summerville in the early spring is a fairy bower, the whole village radiating loveliness. These features are important, but there are scores of other things of interest to highway travelers who are not in a hurry.

T. P. L.

ADDRESS OF SENATOR FESS, OF OHIO

Mr. CAPPER. Mr. President, I present an address delivered by the junior Senator from Ohio [Mr. FESS] at the anniversary of the birth of George Washington, celebrated at Washington, D. C., on February 22, under the auspices of the District of Columbia Commissioners and the District of Columbia Federation for Patriotic Observances. Senator FESS was the author of the resolution creating the George Washington Bicentennial Commission, vice chairman of the commission, and chairman of the commission's executive committee. He spoke of the plans and hopes of the commission in the address to which I have referred. I ask, on behalf of the commission, that his address be printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered. The address is as follows:

Mr. Chairman, General Pershing, distinguished citizens, ladies, and gentlemen, the George Washington Bicentennial Commission has an ambition to make the two hundredth anniversary of the Father of his Country one of the most notable occasions in the history of America. One year ago to-day the President of the United States, in accordance with a resolution of Congress adopted two years before, delivered an address to the American people which was heard by the people of two continents upon the significance of the character of this leader, and also the significance of the coming celebration in 1932.

For the past three years the commission has been seeking and receiving suggestions from various sections of the country as to the proper character, or the most fitting celebration to be held. The commission hopes that we may have the cooperation of all the States, through State commissions yet to be appointed, in many of the States commissions having already been appointed.

A representative of the commission, a distinguished scholar, formerly of Harvard, has been in various parts of the country and also in England. He has visited every locality connected with the Washington family in the mother country, and with probably one exception, has an unbroken link of lineage running back 16 generations. He has linked up the American Library Association in an effort to stimulate popular interest among the people of the country, including the schools of the country, by the supplying of lists of readers, or a list of books, graduated to the various grades of school, so that there may be a more effective effort on the part of our youthful population to read more generally the life and character of this great man.

And there has been an effort also, in the appointment of advisory committees, representing the leadership of all activities in the Nation, in the work of promoting public opinion, including the various patriotic societies, here represented, and those elsewhere, and also including the various clubs—service clubs, patriotic clubs, and clubs of various character, in the hope that there may be a general federated effort, so that by 1932 the entire country may be studying in a sympathetic way this great leader. It is the ambition of the commission, that beginning with next year, a year from to-day, there will be set in motion a series of celebrations reaching the climax in 1932—having one each in 1929, 1930, 1931, and 1932. It is hoped that those places where Washington was distinguished, like, for example, Valley Forge, Trenton, and other places where great events took place in the Revolutionary War, will have special programs of celebration.

The commission has an ambition to make something permanent when the day is over. It, therefore, has recommended and asked Congress to authorize a definitive publication of the complete works of Washington, never yet undertaken. The Sparks edition is long ago out of print, and never was complete. The Ford edition, which was an improvement on the Sparks edition, omitted the general orders of Washington. There are many manuscript letters, state papers, utterances, and also general orders of Washington, that never have reached print, although they are in manuscript.

Congress is asked to authorize a complete publication for the first time of all the utterances of significance of our first President, in an edition of about 22 volumes; and then, in addition, the historian is asked to edit a series of Washington books, to be known as the "Washington series," covering the various activities of this great leader—Washington, the statesman; Washington, the soldier; Washington, the business man; etc., covering about 15 volumes.

This will probably cost $300,000, a very small sum as a contribution to the work that never yet has been undertaken, and that this Government ought speedily to undertake and complete.

Then, it is the hope of the commission that there will be some permanent physical memorial, in addition to those already established. Just what form that will take I am not in a position now to suggest, as the commission has not been a unit upon what the recommendation will be.

I am thinking at this moment of the reasons for these undertakings—whether it is justified that the Government assume such a stupendous undertaking in the interest of this leader. I think it is entirely justified, on the basis of the utterances announced by the distinguished chairman to-day, where we are attempting to give emphasis to the American ideals that were so splendidly embodied in this great character.

We know him familiarly as the great soldier of his day. Nothing more need be said about that. We know him as the exemplar, as a citizen held out to the world as an example. This example is the common heritage not only of America but of all the world. We know him as a most successful business man of his time, possessing in his own right over 60,000 acres of land; owning along one river a frontage of over 4 miles, to say nothing about his rich possessions here in and about what now is the Capital City.

We know him as a powerful and dominating personality. We know him as a leader among men, especially in the line of statesmanship, his greatest influence and most important service; and, if it were proper and time would permit, which it does not, it would be delightful to mention his service in making possible the development of the great empire west of the Alleghenies, to whom we owe more than to any other man or group of men.

It would indicate his tremendous power in leadership as he presided over an aggregation of 56 men that are rightfully known to be one of the most distinguished aggregations of leaders that were ever assembled in one place in the history of the world.

But the thing that I want to impress upon you in the brief time allotted to me is an item in his life that has a world significance that is not properly appreciated. All past history in the efforts of government is a struggle between authority in the interest of law and order, on the one hand, and liberty, in the interest of the largest development of the individual, on the other. The major portion of the history of civilization, so far as government is concerned, is detailing the struggle between the efforts on the part of the government for order and the efforts on the part of the individuals to maintain unhindered liberty in the interest of strong development.

The two things have always been in conflict and people sometimes assert they are contradictory; that you can not maintain authority and at the same time enjoy liberty; that if you do exercise liberty, it is in that degree a denial of authority; and therefore, if liberty is of value, government can not interfere with it.

Then, on the other hand, there are those who believe that the greatest contribution to modern civilization is government—the exercise of power, of authority.

Ladies and gentlemen, the history of the world shows that whenever there was exercised too much authority and there was enjoyed too little liberty, the result was despotism; and whenever there was enjoyed too much liberty at the expense of authority, it was anarchy. When too much liberty was given to the free cities of Greece, Greece went down in anarchy. When too much authority was exercised by Rome, Rome went down in despotism. The struggle in history has been to reconcile the two so as to exercise needed authority in government, and yet not deny the essential liberty in the citizen or in the part of the nation.

That has been the progress of the race in the approach to the form of government that we now enjoy. It failed in the Old World. An effort was made to solve it in the Teutonic nations with some degree of success, and also in the Anglo-Saxon system of modern government as we saw it in the mother country.

But never until the American Republic was established were we on the high road to a complete solution. After 100 years of training

ground in every Colony of the 13 where we were attempting to employ self-government, in which liberty was recognized as well as authority, we came into the efforts of the federation of all the 13 Colonies under our Constitution.

Here, ladies and gentlemen, sitting in one room, the 56 leaders of the world announcing a theory of government, there was shown the sharp demarcation between those who emphasized authority and those who emphasized liberty.

And at a moment of crisis after three weeks of contention a delegate arose and made a motion to adjourn the convention. That was the only occasion where Washington spoke, from May 25 until September 17, the duration of that famous Constitutional Convention. Upon the motion to adjourn this Godlike figure presiding over that convention arose and said, "If we should take a position now that we can not indorse, what will be our attitude when we return home to make a report? Let the standard be lifted so high that all the good can repair to it. This is not the work of man—the hand of God is in this thing." And he asked the mover to withdraw the motion to adjourn, which was done. [Applause.] And the convention went on.

And I wonder what would have been the outcome had that convention adjourned at that time? The convention proceeded. It gave us the Federal Constitution. That Federal Constitution was designed to carry into effect the principles of the Declaration of Independence. As the Declaration of Independence is the finest expression of liberty in government, and as Thomas Jefferson, its author, was the greatest exponent of liberty in government in history, so the Constitution is the finest expression of authority in government, and Alexander Hamilton, its defender, was the greatest exponent of authority in government in the history of the world. [Applause.] While the Constitution proper is Hamiltonian, the bill of rights appended to it is Jeffersonian.

Both of these leaders, advocates of the respective views, needed the mollifying influence of the leader above them. For, had Hamilton had his view, so that there would have been authority without liberty, it would have been an approach to despotism; and had Jefferson had his view, so that there would have been liberty without authority, it would have been an approach to anarchy. Either extreme would have been dangerous. Both principles are essential, but each must be modified by the other.

And here is where America and the world owe their greatest debt to George Washington. Presiding in that convention, listening to the presentation of the arguments, able to judge as an expositor instead of as a mere advocate, he could see both sides and detect the danger of each as well as recognize the value of each. Therefore, through that masterful personality these conflicting leaders were held together until they had worked out the great problem.

Please do not misunderstand me. Jefferson was not in the Constitutional Convention; he was in France. But he was in communication with the representatives who believed in his theory, such as James Madison and others.

Then later when, by unanimous consent, George Washington was called to be the first President to inaugurate in government the principles under the Constitution, seeing the value of both of the schools, he took into his Cabinet Alexander Hamilton, the representative of power, and Thomas Jefferson, the representative of liberty [applause], and inaugurated into the new Government both of these principles. For, while the two were seemingly irreconcilable, Washington held that there is no liberty without authority; as there can be no authority without liberty. [Applause]. The two are essential.

There, ladies and gentlemen, is the great contribution of General Washington to the history of the world. That was in 1789 that he inaugurated these principles. We have had conflicts—one conflict that even swept the Nation into the strife of Civil War, over the dispute between the two theories. But wisely, under the leadership of Lincoln, a leader in character and scope of comprehension not unlike the first great leader, we came out of the Civil War without the loss of liberty and without the breakdown of authority. [Applause.]

And to-day, nearly 200 years after the birth of this great leader, behold the product of his leadership. One hundred and twenty million people—the happiest, the best cared for, the greatest in the general share of the comforts of the world, in the history of all the world. And never before has the American system been stronger than it is in 1928. [Applause.]

And during these years all over the world there has been a gravitation away from the monarchical forms toward the democratic forms. Look the world over—South America, Europe, even Asia, gravitating year by year toward accepting the form of government inaugurated by General Washington here in America.

The World War caused some setback, and I regret to say that in some of the countries of Europe, probably in six if not eight, there is a retrogression toward what we call a dictatorship. That is not American. That can not be done in America. [Applause.] Here in America we never will lose sight of the importance of necessary authority in the interest of order, but we never will sacrifice essential liberty on the altar of despotism—never. [Applause.]

And after the World War, here is America coming through the fires of that crisis under the leadership of the great general who honors us to-day with his presence, doubtlessly stronger than ever before. And I here and now declare that it is pertinent and altogether appropriate that this country should set the plan of a proper recognition, not only as a figure in America but as a figure in the government of the world, of the exemplar of the foregoing principles, familiarly known as "First in war, first in peace, and first in the hearts of his countrymen."

It is a fine thing, in the mad rush of business and commercial progress as we see it to-day, to lay aside for a little while the industrial activity, so all absorbing in modern life, and think upon these things which we owe to George Washington, our first great President. [Applause.]

PUEBLO INDIAN LANDS

The VICE PRESIDENT. Morning business is closed. Pursuant to the order of Friday last, the Chair lays before the Senate the amendment of the House of Representatives to the bill (S. 700) authorizing the Secretary of the Interior to execute an agreement with the Middle Rio Grande conservancy district providing for conservation, irrigation, drainage, and flood control for the Pueblo Indian lands in the Rio Grande Valley, N. Mex., and for other purposes. The question is on agreeing to the amendment reported by the Committee on Indian Affairs to the House amendment.

PROGRESS OF TRANSOCEANIC AIR NAVIGATION

Mr. BINGHAM. Mr. President, I desire to make some observations in connection with the successful flight which has just been completed by the Navy's rigid dirigible *Los Angeles* between Panama and New York.

Quite a number of Senators have stated to me their belief that we ought not to have rigid dirigibles. I agree with them so far as the Army is concerned, but the great flight made by the *Los Angeles*, bringing the Panama Canal within 38 hours of New York, comes to us as an apt reminder of the importance of airships in naval and commercial aeronautics, particularly as regards transoceanic flights. Never before has the distance between the site of that great work of American engineering and the metropolis on the Atlantic coast been spanned in less than thrice the time consumed by the *Los Angeles*. No vehicle of regular commercial transport has ever covered that route on a scheduled time of less than a week, as against a day and a half for this great airship of characteristically commercial design.

It will be remembered, Mr. President, that we secured the *Los Angeles* from Germany after the war with the stipulation that we were not to use her for military purposes. She is fitted out as a commercial airship, although operated by the Navy. She is used for experimental and training purposes. She is the only rigid dirigible in America to-day.

In our sincere admiration for the great achievements of Colonel Lindbergh and of those other bold and skillful pilots of airplanes who have made flights of great daring and difficulty, we should not forget that the airplane does not stand alone as an instrument of aerial navigation in commerce and war. The airplane has its own field; it does its appointed work; it is of vast importance; but in regular operation, either for civil transportation or upon military errands, it is subject to certain limitations which make it essentially a vehicle of comparatively short range. Never yet has any man made a nonstop journey in a heavier-than-air craft over a distance exceeding 4,000 miles, and for economy and assured success in regular employment it is necessary that the distance to be covered in a single flight be not above 1,000 or 1,200 miles, and far preferable, especially in commercial service, that it should not exceed 300 or 400. For services over land and over stretches of water of moderate extent, and for military and naval operations not requiring voyages of enormous length, the airplane daily proves itself ideally suited. When oceans must be spanned with regularity, or when aircraft must be turned to naval employments requiring the constant surveillance over long periods of suspect areas far from friendly bases, the airplane is no longer capable of doing the work alone. Under those conditions it finds its necessary complement in the rigid airship.

Between the airplane, dependent for its lift upon the rapid forward motion of its wings through the air, and the airship, securing static buoyancy from the gas which fills its hull, there need be no rivalry. They are natural adjuncts. Improvements in either type do not lessen, but rather reinforce, the usefulness of the other. Only when they are used in conjunction, with each filling the gap left by the other, with the airplane in intensive service over routes interrupted by stopping places at reasonable intervals and with the airship accomplishing the long, unbroken voyages over ocean and desert, can we secure the full commercial benefits of aerial navigation. Only if lighter-than-air craft and those heavier than air be employed jointly and in harmony can we feel that aircraft are making their full potential contribution to our national defense.

The validity of these conclusions is receiving general recognition among the other great nations of the world. They are committing themselves, with but few exceptions, neither to airplane nor to airship, but to a nicely proportioned combination of both. Great Britain is actively engaged in the execution of a great rigid-airship program. So, too, under somewhat different conditions, is Germany. The Italian Government is enthusiastically proceeding with the design and construction of new and improved ships of the moderate-sized semirigid type upon which that country has specialized and which are adapted to its peculiar geographical position and needs. In Japan and elsewhere the airship for commerce and the airship for military employment are the subject of constant study either through the medium of native designs and construction or of the purchase from abroad of craft representing an advanced stage of the art of airship design.

The experience of Great Britain is one which we may observe with special interest, for in many respects it has resembled our own. It is natural that we should share an interest in a type of aerial vehicle peculiarly suited for use over those broad seas which are the carriers of our trade. The point of view of our commerce is an intercontinental or transoceanic one, and we, like the British and the people of other countries having a great overseas trade, should feel ourselves obligated to take advantage of every progressive step in facility of intercontinental communication and transport.

The serious development of British rigid airships, leaving aside one or two early and abortive experiences, began in 1915, when observation of the usefulness of the Zeppelin ships attached to the German naval service moved the British Government also to undertake a naval airship program. Fourteen ships of varying size and type were constructed and operated during the war and immediately thereafter, with varying degrees of success, but with no serious mishap. The preliminary experiments made in England between 1917 and 1920 paralleled in a general way the experience which we ourselves acquired in the construction and early operations of the *Shenandoah* some years later.

In 1920, under the spur of the Government's economy policy, Great Britain abandoned airship development entirely. The existing program was annihilated and the existing airships were laid up in dead storage in their sheds. Plans for laboratory research were ruthlessly suspended. Great Britain had turned its back upon the airship in such a manner as to give every indication that the renunciation was intended to be permanent. Never has there been any serious suggestion from any quarter in this country of so utter an abandonment of that type of aircraft.

Time, and perhaps the observation of continuing American airship operation, convinced them that a mistake had been made. Notwithstanding what must have appeared as a very strong argument in favor of abandoning airship development furnished by the Nation's sorrow over the joint American and British tragedy of the *R–38* or *ZR–2*, in the collapse of which 16 American and 28 British lives were lost, in 1923 the airship activity was resumed and two successive British Governments, with different air ministers, have pressed it vigorously forward. There are being built at a cost not exactly known, but certainly of several million dollars, two airships, each of 5,000,000 cubic feet capacity, each nearly twice as large as the *Los Angeles*. They are now nearing completion. We have been assured that one of them will make its first trial flights within the next four or five months and that it is expected shortly thereafter to go into regularly scheduled service on long routes. The ships are fitted with elaborate accommodations for the comfort of the passengers, with staterooms, promenade decks, and stately and spacious dining saloons, and it is anticipated that they will be able to reach India from England in less than five days in normal operation, or to cross the Atlantic in 60 hours, carrying a hundred passengers. The confidence with which their future commercial utility is viewed has been evidenced by the British Government and by a great part of the press and public which has given attention to such matters. They stand on the threshold of commercial employment because of the far-sighted and courageous action which the British Government took in reversing itself and resuming researches upon airships and embarking anew upon their actual construction four years ago. In the building and operation of large airships we should start, even if we delayed not another day, handicapped to the extent of those years of operating experience represented by our delay in initiating the new construction program.

The Germans, the pioneers of the airship world, who have had greater opportunity to observe the merits and the defects of rigid lighter-than-air craft than have any other people in the world, have been relatively no less active. Delayed for a number of years in inaugurating their postwar program of construction by the regulations made under the treaty of Versailles, they no sooner secured remission of those restrictions than they set to work with new zeal in the Zeppelin factory. Although the airplane has been by no means neglected in that country, airplanes under German management crossing and recrossing central Europe on regular air lines each day, they have not committed the error of supposing that the airplane could replace the airship. Great popular enthusiasm attended the launching of a project for a new Zeppelin ship of 4,000,000 cubic feet displacement, half again as large as the *Los Angeles*, and the ship is now nearing completion, and will go forth for its first flights during the coming spring or summer.

The new German ship, like those under construction in England, is evidence of a confidence on the part of those who know airships best through longest experience that they need no longer be regarded with doubt. Regular commercial operations are evidently considered by the Zeppelin organization to be just around the corner, and plans for an airship service between Spain and Buenos Aires, and possibly other South American points, are reported to be already well advanced.

It is significant, and it would be ominous for us if we were to continue our inaction in the field of rigid airship construction, that the greatest optimism is felt in those countries in which there has been the largest amount of past experiment with such ships and from which, therefore, the most reliable judgment might be expected. There are three countries in which rigid airship development has been the subject of intensive effort at some time in the past. Of the three, Germany has been most persistent and has built the largest number of ships, and German enthusiasm for the future of the airship is not open to doubt. Great Britain ranks second in extent of past activity in that field, and the British Government is now sparing no effort to make up for the time lost when operations were interrupted. We alone among the countries of the earth with past experience in rigid airship design and operations are not at present actively engaged upon any new construction. Already we have lost some two or three years in the race to complete airships large enough for regular transoceanic operation, but our delays need not be further extended.

On the basis of two unhappy experiences—the collapse of the British *R–38* with a number of American officers and men on board and the loss of the *Shenandoah*—we as a people have fallen into a serious misapprehension. There has grown up a widespread belief that the history of airships has been a long tale of failure, and that total wreck has been their ordinary fate.

Nothing could be further from the facts. Of the 138 rigid airships built in Germany by the Zeppelin firm and its rivals in the field during 25 years and operated by German personnel, not one ever failed structurally during a flight. I do not include the *Dixmude*, taken over by France after the war, which disappeared in flight in December, 1923, its fate still a mystery. Of 14 ships built and operated in England during and after the war, only one, the *R–38*, met that fate. It is tragic that there should ever have been even one or two collapses with great loss of life, but engineering science is not upon a basis of such absolute certainty that there can be complete assurance against such mishaps in the development of new applications. Structural failures have occurred repeatedly in ocean ships and occur occasionally even to-day. They have been not unknown even in great bridges, but failures are fortunately rare, and as the art of the engineer continues to advance with increasing experience they become progressively less likely. The lessons learned in the breaking of the *R–38* and the *Shenandoah* have in themselves pointed the way to a large measure of insurance against a repetition of those catastrophes.

With structural failure recognized as the extreme rarity that it is, it becomes a matter of great interest to us in the determination of our own policy toward airships to survey the record of what they have done and of the perils to which they have been subject.

Mr. President, I regret that these facts which I am presenting do not command the attention of more of the Members of this body who are interested in the public defense and in our overseas commerce. The very fact that we show so little interest in the subject is due to a misapprehension of what has been done, and points, it seems to me, to the necessity of our studying the case in order that we may not make in the future mistakes similar to those made in the past, and in order that we may not go on blindly without providing in this country for an industry to construct rigid airships and for more training in the navigation of rigid airships.

Of 117 airships built by the Zeppelin Co. in Germany and 21 produced by the Schutte-Hanz group, 45 were dismantled as obsolete while still in operating condition or were surrendered after the armistice or destroyed at that time. One, the *Los Angeles*, is still in active, continuous operation. Of the remain-

ing 92, more than half were destroyed by allied gunfire or by bombing of their hangars, or had to be landed in neutral or allied territory where the crews were taken prisoners or interned. Several ships, especially among the early ones, were either burnt in their hangars as a result of the use of hydrogen or damaged in handling on the ground because of unsatisfactory handling methods, now much improved, or inexperienced crews, hastily recruited and trained under war conditions. Of the 138 ships there were but two, not counting those shot down by allied airplanes or by fire from the ground—and excluding the *Dixmude*—which met with mishap in the air, wrecking the ship and causing extensive loss of life, and of those two mishaps one occurred in 1913, the other in 1915. The approximately 50 Zeppelin airships turned over to the German naval service since the last of those fatal accidents made approximately 2,200 flights of varying length, about half of them on missions explicitly military, without misfortune in the air other than that due to enemy action. As far back as 1911 the Zeppelin Co. was building ships for commercial service, and 1,588 trips were made between Berlin and Baden-Baden and other German cities before the war without any mishap involving loss of life or injury to passengers. Immediately after the war service was resumed with two small ships, operating, for want of satisfactory commercial liaison at that time with countries outside of Germany, on the comparatively short route between Berlin and Friedrichshafen, in southern Germany, the site of the Zeppelin factory. Service with the first of these airships was continued without any untoward event from August to December, 1919, making 103 flights in 98 days, when its abandonment was ordered by the allied governments and the two ships were turned over to allied powers.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER (Mr. SHORTRIDGE in the chair). Does the Senator from Connecticut yield to the Senator from North Carolina?

Mr. BINGHAM. I yield.

Mr. SIMMONS. I have been greatly interested in the remarks of the Senator upon this very important question; but I have formed the opinion, from reading the newspapers, that we are having an exceptionally large casualty list as the result of accidents to airplanes, both those of the Army and Navy and those engaged in civilian activities.

I desire to ask the Senator, who seems to have given a great deal of thought and study to the situation with respect to the use of these craft, both in this country and abroad, how the casualties resulting in this country from the operations of the Army and the Navy and from the use of these craft in commerce compare with those in European countries.

Mr. BINGHAM. The Senator's question, I take it, deals with airplanes rather than with airships?

Mr. SIMMONS. We will take it as dealing with both. I prefer a comprehensive answer.

Mr. BINGHAM. We have no rigid airships in the Army or Navy or in commerce in this country except the *Los Angeles*. That is the only rigid airship in the Western Hemisphere.

Mr. SIMMONS. Then, if it be true that that is the only one we have in this country, I will confine my question to those of the other type.

Mr. BINGHAM. We have had but two rigid dirigibles. The other one was the *Shenandoah*. The *Los Angeles*, the Senator realizes from the morning papers, has just completed a marvelous flight from New York to Panama in a day and a half. She has engaged in a great many flights which have never gotten into the papers, because her flights are considered so safe that very little notice is taken of them. They have no news value. The *Los Angeles* has made one or two trips to Bermuda and back, and one to Porto Rico and back.

What I am endeavoring to point out in the remarks I am making this morning, I will say to the Senator, is the relative safety of the airship in flights over the ocean. In flights across the Atlantic between this country and Europe the airship is the only one of all the flying machines that has succeeded in flying directly from the continent of Europe to the continent of North America. All attempts by airplane have failed.

In flying in the other direction, the direction in which Colonel Lindbergh flew, rather more than half of the attempts to fly in airplanes of a land type have failed and the passengers and crews have been lost. Of those made in the seaplane type only a few have been successful, but no lives have been lost. Only one attempt has been made by rigid airship, and that was successful.

What I am trying to emphasize is that although the American public and a certain number of our colleagues here take the position that the airship is very unsafe—they remember vividly what happened to the *Shenandoah*—and they believe that we ought not to build rigid airships, as a matter of fact they are mistaken, because the airship is far safer for transoceanic travel than the airplane.

To answer the Senator's other question, with regard to airplanes, I will say to the Senator that in Europe no attempt is made to fly the mails overnight, as is done in this country every night, when thousands of miles are flown. On the airplane route from Chicago to San Francisco—which, as the Senator knows, is flown every night—it is necessary to fly all night long. There is nothing like that in Europe; and yet even over that route the accidents have been about one fatal accident for every 1,000,000 miles flown. There is practically no safer transportation than the operation of airplanes over land, over improved airways. The great British company, the Imperial Airways, which is a commercial concern, has issued figures to show that it has recently completed something like 900,000 miles flown without the loss of a life. Most of those trips are very short. In other words, the records in this country and in Europe compare favorably.

So far as the Army and Navy are concerned, military flying must always be dangerous.

Mr. SIMMONS. The figures given by the Senator of these great mileages in this country and Europe refer to mail service, do they not?

Mr. BINGHAM. Commercial service, yes, sir; mail, passenger, and express service. Of course, there are more lines in Europe than there are in America, but we do more flying in this country, because our distances are greater than they are in Europe; and we do immeasurably more flying at night, which is, of course, by far the most dangerous type of flying.

Mr. SIMMONS. Now, take all lines of service, not only mail and commercial but those conducted by the Army and the Navy and those conducted for pleasure and other purposes in this country. How do our casualties compare with those of Europe in the case of planes engaged in like operation; and if the disadvantage is on our side, if accidents are more frequent here, what is the reason?

Mr. BINGHAM. The only way we can compare those two things is by taking different types of flying—that is to say, the training for military aviators, the actual practice of military tactics, and the normal work of the military and naval aviators.

The latest figures which I have seen show that our records are considerably better than those of any European country in the training of aviators. The new training plane which we have developed and put into general use in our air schools within the past three years has had a very remarkable record. There has not been a single cadet killed in learning to fly in the preliminary flying school at Brooks Field, Tex., where the Army has its preliminary flying school, since we adopted this new type of training plane, which we believe is the best and safest in the world. No other nation has a record approaching that.

With respect to pursuit planes, which are used in the highest form of fighting in the air, we have better pursuit planes, we believe and the experts believe, than any other country. They are extremely difficult to operate. It is necessary in military aviation to have highly efficient planes that are not as safe as those used in commercial aviation. We must sacrifice safety to speed, maneuverability, and special use in war. It will always be inevitable that there will be a certain number of accidents in the air, just as there are on the ocean, where we lose a certain number of lives in the Navy, and in the merchant marine every year. But comparing accidents in military and naval aviation in this country, about which the Senator has asked, with those in other countries, such as Japan and England, France and Italy, our record is as good as theirs, if not better. This has been particularly true within the last two or three years, since we put into effect the legislation which the Senator will remember we passed in the early part of 1926, which placed our military flying under specialists in the departments, and created the office of Assistant Secretary of War for Aeronautics and the office of Assistant Secretary of the Navy for Aeronautics. We secured for those posts highly trained specialists, one of them a former war pilot, the other a great aeronautical engineer, one of the greatest in this country. Under their leadership we have ceased to make the mistakes which we were making some three or four and more years ago. Does that answer the Senator's question?

Mr. SIMMONS. Yes; and I want to say that I am very much gratified at what the Senator has said upon this subject. I know there is a feeling in this country—I have heard it expressed frequently; I have participated in it myself, as the result of reading the newspapers—that we were having entirely too many accidents, and that that must be due to some carelessness in the manufacture of the machines or in the management and direction of our Air Services. I am glad—and it is a matter of congratulation both to the public and to individuals

who are interested in this subject—to have this information assuring us that we are operating these machines with as little loss and just as successfully in this country as is the case anywhere in the world, the information coming from a Senator who I know has given probably more study to this question than any other man in this body, probably than any other man in public life. I receive the information from him as authoritative, and I am exceedingly gratified to hear that it is a mistake to suppose that we are having in this country an unusual and an unnecessary number of accidents as compared with those that are taking place in other countries in the use of these craft.

I suppose that while we are having a great many accidents in this country, it is probably due to the fact that flying is still in its infancy, comparatively speaking, and we have not yet quite perfected the machinery which is used in the operation of aircraft, something we might have expected to require many years, as has been the case with the automobile. But that we are making progress in America, that we are keeping up with the balance of the world, that we are having no greater proportion of accidents in this country than are happening in other countries is a matter of information which I think should be gratifying to the country, the information coming from the sourse from which it emanates.

Mr. BINGHAM. I thank the Senator. On the other hand, I am endeavoring this morning to point out the fact that we are not keeping up with the rest of the world in rigid dirigibles and in airship construction and operation. We have conceived the erroneous idea that money spent for rigid dirigibles is thrown away. We have gone ahead wonderfully with the airplanes, as has just been said, but in rigid dirigibles we have not. Let us see what has been done recently with rigids.

A study of British airships shows no conspicuously dark spot, save the loss of the *ZR-2*. Of the 14 ships built, a majority continued their careers for considerable lengths of time and were either wrecked in handling, again due to inadequate and unsatisfactory early methods, or dismantled as obsolete in order to make room in their sheds for later types. The round-trip voyage of the *R-34* to our shores in 1919 was one of the most notable of British airship exploits. It still stands on the record as the only round trip across the North Atlantic ever made by any aircraft, and the only other aerial crossing of that ocean in a westerly direction has been made by another airship, our own *Los Angeles*.

While there has been no absolutely clinching evidence in the form of a regular and long-continued transoceanic operation of airships, the past history of the art indicates steady progress toward that goal. During a quarter of a century of airship operation the performance of the ships has been improving. The safety and reliability of their operation have been increasing. The governments and corporations of European countries are giving evidence that they consider it practicable now to build with regular commercial operation in view, and airships capable of maintaining a regular schedule of transoceanic voyages certainly possess enormous potentialities for the uses of our own naval service.

We need not, in fact, turn exclusively to European experience to find practical evidence of the general safety and utility of rigid airships. We have had the *Los Angeles* before our own eyes, her latest exploit typical of the uniform success with which her operations have been carried on. That ship was delivered to us three and a half years ago in a nonstop flight 5,000 miles in length, exceeding by 25 per cent the longest trip that has even now been made by any airplane. Since that time it has made approximately 100 separate flights, totaling about 1,500 hours in the air, and in addition has remained moored in the open at its mast, entirely subject to the elements, for a total of about 650 hours.

Mr. President, one of our naval officers has invented and constructed a mooring mast very much shorter, more economical to build, and more efficient than the great mooring masts that were formerly built. By this mast the ship may be moored close to the ground instead of requiring to be navigated all night long by a man at the helm in order to equalize every gust of air. It is placed on a truck revolving around the low mast on tracks, which makes it possible for it to be more easily handled and moored, at a great saving of expense over anything known before.

Furthermore, as I have said, cruises to Porto Rico and to Bermuda have been planned and executed, together with several cross-country voyages to points in this country, the longest taking the ship to Pensacola. Improvements are constantly being made in the apparatus for handling the ship on the ground and in the technique of using it, which make it feasible to become more largely independent of weather conditions in planning regular operation. Already there have been notable instances of strict adherence to schedule where that was absolutely necessary. Eclipses of the sun do not wait upon the plans of men, and the *Los Angeles* was used successfully for photographing the total eclipse of January, 1925, leaving Lakehurst at the time originally scheduled in spite of weather conditions on the whole unfavorable. Flights made in connection with Navy Day observances have also had to conform strictly to schedule and have done so. The flights of the *Los Angeles* have become so much a matter of course and so little one of news interest that few Members of this body or of the general public realize how frequently the ship is going forth from its hangar in pursuance of plans definitely laid down in advance and carrying them through successfully.

It is an anomalous situation that we should be looking with so much doubt and apparent disfavor upon airships while other governments are vigorously prosecuting activities in that field, for we have logical reason to rate lighter-than-air craft more highly than the people of any other nation. To us they are not only an important instrument of intercontinental commerce, in which we should desire a share, but also a valuable tool of the national defense. In that particular they have a greater significance for us than for any other nation. Our naval problem and interest is upon the high seas, where we have very few bases of operation available for either surface vessels or aircraft. A state which is particularly interested in the defense of its coast and in protecting the movements of its commerce within comparatively narrow waters, or which has many bases strategically located over the ocean, may well depend exclusively upon airplanes for aerial scouting and patrol. We can not afford to do so. Vital though the airplane, operating both from ships and from fixed bases on shore, is in our naval organization, we can not neglect a type of aircraft which makes it possible to maintain constant surveillance far beyond airplane range. The airship is a self-sustaining scouting vehicle, capable of including whole oceans within the scope of its operation from a fixed base, and as such it has a peculiar application to our problem.

Nor is that the only reason why we should consider the airship with special favor. Among the wealth of natural resources with which we are so beneficently blessed there is included an enormous amount of helium, the only noninflammable gas light enough and otherwise suited for airship inflation. So far as is now known, a vastly preponderant part of the world's supply of this gas available for extraction by processes now known and commercially practicable underlies the soil of the United States. For commercial operation of airships helium does not appear as a necessity. Although an added safeguard of no small importance, it can be dispensed with in favor of hydrogen without excessive hazard if great care is exercised in handling the airship. German and British plans are in fact proceeding upon that line. For naval purposes, however, the difference between the use of hydrogen and that of helium is the difference between the extreme and a moderate vulnerability. The hydrogen-filled airship can be brought down in flames, as was demonstrated during the war, by a single burst of incendiary bullets from an aircraft or ground machine gun. The helium ship, on the other hand, could have its gas cells riddled with hundreds of bullet holes of that caliber and still remain in the air for many hours before the loss of gas would force descent. Nothing less than the separate perforation of several of the gas cells by projectiles of large diameter or the occurrence within the structure of the ship of a shell or bomb explosion of such violence as to wreck the framework would be fatal when helium is used.

That helium will be available for use on all ships built for the American Navy and, indeed for commercial purposes, too, supposing that the commercial operators desire it, may be taken as axiomatic. There is already in sight, its location well known and available as rapidly as wells are drilled to extract it, an amount of helium estimated to be sufficient for the normal operation for the greater part of a century of three ships of the largest size so far considered. By more rapid drilling of wells the output could be increased to a rate of flow sufficient to take care for a more limited period of 5 or 10 or 25 large airships instead of 3, and there are other helium resources not accounted for in that total. Already helium is being regularly secured on contract from a privately operated field, in addition to that which comes from the work done under the direction of the Bureau of Mines. Shortage of helium need give no concern for the next generation unless the use of airships increases even more rapidly than the greatest optimists would at present be prepared to prophesy. Furthermore, the gas supply can be increased by the drilling of new wells even more rapidly than new ships could be built in which to use it. Even if the construction of two new rigid airships were to be inaugurated tomorrow and pressed forward with all possible vigor, the production of helium could easily be made to more than keep pace

with the demands thus occasioned. Our special advantage in planning for the naval uses of airships in our possession of this priceless resource should never be overlooked.

The potential importance of airships as naval scouts can hardly be overestimated. Airships can now be constructed which will have a speed approaching closely 100 miles an hour and will be able to maintain that speed for 48 hours or more, while capable of traveling over 10,000 miles at more moderate rates. The new ships projected would quite normally make a run from New York to Panama in 32 hours without dependence upon favoring winds. With a cruising speed well over twice that of any surface vessel, the area which they could keep under effective observation would be correspondingly increased. Scouting is a prime function of naval operations, and anything which adds to its effectiveness must be eagerly sought after.

The airship can be of great service, too, in steady patrol of wide areas of sea bordering critical points in our overseas possessions. The flight of the *Los Angeles* gains a special significance from the prospective value in the event of war of such patrol flying by lighter-than-air craft around the Canal Zone. The canal and other outlying possessions would benefit also by the use of airships as transports and message carriers for delivering important plans, supplies, or personnel from the United States at three times the speed possible with surface transport. Given airships for the purpose, high-ranking officers holding responsible posts in the canal defense could return to Washington for councils of war and be back at their posts of duty again within a total elapsed time of three and a half days, and direct liaison in the form of personal conference could be established with equal promptness between personnel stationed in Hawaii and those in the Pacific coast area. A craft offering so alluring a picture of varied naval and commercial utility simply can not be neglected.

Even if the naval employment of airships, important as it is, were to be put aside entirely for the moment, there would still be ample reason for us to encourage airship construction and to take those steps which may be necessary to promote the creation of an airship industry. The commercial use of the airship deserves encouragement for its own sake. We should not be left in arrears in the upbuilding of an aerial merchant marine. The success of American endeavors to get under way with commercial operation on international routes is for the present absolutely dependent upon the placing of governmental contracts to aid in the starting of an industry and the development of new designs. Commercial business may be expected to follow upon the construction and successful demonstration of new ships such as those authorized in the Navy's five-year aircraft program bill adopted by the Sixty-ninth Congress, but not yet started because of lack of authorization to make actual expenditures of money under any of the bases which have been found in any degree mutually acceptable to the Navy Department and to any available contractor. It is not to be expected, however, that private investors will lead the way and carry the entire risk in developing such ships as these, so enlarged in dimensions as to constitute a wholly new class. They have not done so in Great Britain, and it is hardly possible to expect that they could be persuaded to do so here. The field of rigid-airship construction is one in which it is impossible to proceed by short steps or upon a small scale. To manifest its particular advantage over the airplane in its own field of operation the airship must have both high speed and the ability to make overocean flights of great length. The two things are compatible only in ships of relatively vast size, and the pioneer work in the design and construction of such ships might very properly command extensive governmental support even if there were no ultimate prospect except the commercial one. The ease and rapidity with which we shall take a share in the conduct of transoceanic air commerce depends primarily upon our action at this juncture. It is more than a year and a half since the bill authorizing the construction of two airships, each of 6,000,000 cubic feet capacity, became law. It is substantially a year since the appropriation was made to start work upon one of those ships, and as yet no piece of material has been cut, no shop has been set aside for the construction, no contract has been signed. The most available contractor, who submitted a design that won first award in a competition conducted by the Navy Department during the spring of 1927, has declared himself willing either to build a single airship upon a modified cost-plus basis, so written as to furnish exceptional safeguard to the interest of the Government, or to take a contract for the building of the two ships authorized in 1926 at a flat price for the two of $8,000,000. On such a two-ship contract provision would be made that lessons learned in the course of construction of the first ship would be incorporated in the design of the second, the actual fabrication of which would not be started until two years or more after the contract was signed and until after the first unit was very well advanced toward completion. Either of these two alternatives, however, would require slight modifications in existing law, and under present conditions the Navy Department is helpless to proceed upon either plan.

Mr. FESS. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Connecticut yield to the Senator from Ohio?

Mr. BINGHAM. I yield.

Mr. FESS. I am anxious to know just why the tardiness. It seems to be wholly indefensible. Where is the trouble?

Mr. BINGHAM. I shall be glad to tell the Senator. We originally provided an authorization for the construction of two great rigid airships at a cost for the two of not to exceed $8,000,000. When we came to make the proper appropriation, the Congress declined to do more than appropriate a small amount of money for the beginning of one ship and declined to do anything to contract for the building of a second ship, with the result that, since one ship could not possibly be built under the limit set by the provision in the appropriation bill, nothing has been done. If we are to build only one ship, it will take a larger authorization and an appropriation eventually of, or perhaps even more than, $5,500,000.

The Senator will realize that in order to construct one ship a very large shop must be constructed of a type not used for anything else. That shop, however, could be used for the second airship equally well since that is not to be begun until the first is practically completed and that would make the cost of the second one very much less; so the company is perfectly willing to contract to build two ships for the sum originally set, but can not possibly build one ship for the price set by the provision in the appropriation bill to which I have referred. Consequently the Congress, by the provision it has made for the construction of only one ship, has denied the country the right to have even one rigid airship built in this country.

Mr. FESS. Really, then, the fault lies with Congress?

Mr. BINGHAM. Yes, with Congress; and also with the Bureau of the Budget, which recommends the appropriation of over a million dollars to proceed with the building of one ship. We are again faced with the fact that we can not get the ship built here. Nobody will take the money, because no one will contract to build in America the one ship under the limitation proposed.

Mr. FESS. If the Senator will permit just a comment upon the difficulty of getting anything done that must have any authorization and management on the part of Congress, I would remind him that we are having the same situation in the radio matter. There we have a commission which is within 15 days of expiring, which never has had any authority of any sort to proceed, and yet we are holding it responsible. I use that as an illustration of what seems almost indefensible in the way we proceed from the Government standpoint.

Mr. BINGHAM. I hope the Senator will join with me in an effort to secure an appropriation this year to authorize the contracting for at least the beginnings of two airships, in order that we may proceed with this program, which other countries are doing and which is so greatly needed and upon which we are doing nothing.

Mr. FESS. The Senator will have my sympathetic support in that matter, and I hope we shall have the sympathetic support of the Senator in the matter of the situation at Akron to which he refers, where really something ought to be done.

Mr. BINGHAM. I shall be glad to do what I can. The development of the rigid airship art for several years to come, and the creation of an American rigid airship industry rest at present in the hands of Congress, dependent upon our taking the action necessary to enable the Navy Department to proceed in accordance with the will expressed by the Sixty-ninth Congress in the two separate actions of authorization and appropriation, both in its first and its second sessions.

I hope most sincerely that this Nation will have the courage to face the facts. Our glorious history has been based largely on courage and foresight. Had the motto of the Pilgrim fathers been "safety first" they would never have taken passage in the *Mayflower* and landed at Plymouth Rock. Had our western pioneers decided to avoid danger and any possible loss of life, there would have been no Oregon Trail and no great Northwest. Had the Wright brothers decided to take no risk, there would have been no first successful flight in a heavier-than-air machine.

The risk involved in the undertaking of building two rigid dirigibles, as planned by the Navy Department, and originally approved by the Congress, is no greater than that involved in a hundred enterprises that have made America famous and made us able to hold up our heads in pride, as we do as citizens

of this great Republic. We should do all in our power to promote the rapid development of this great aid to transoceanic flight, and the necessary industry, both for the sake of the national defense and for the future of American transoceanic air navigation.

FILLING OF VACANCY ON JOINT TAX COMMISSION

Mr. SIMMONS. Mr. President, there is a vacancy in the Joint Committee on Internal Revenue Taxation of the two Houses of Congress. That commission is composed of five members from the Finance Committee of the Senate and five members from the Ways and Means Committee of the House of Representatives. It is bipartisan, two Democrats and three Republicans represent the Senate on the commission. The vacancy is in the Democratic representation by reason of the death of the late Senator Jones, of New Mexico. I ask the unanimous consent of the Senate that the senior Senator from Rhode Island [Mr. GERRY] may be appointed a member of the Joint Committee on Internal Revenue Taxation in place of the late Senator Jones.

The PRESIDING OFFICER (Mr. SHORTRIDGE in the chair). The Senate has heard the request. Is there any objection? The Chair hears none, and it is so ordered.

PUEBLO INDIAN LANDS

The Senate proceeded to consider the House amendment to the bill (S. 700) authorizing the Secretary of the Interior to execute an agreement with the Middle Rio Grande conservancy district providing for conservation, irrigation, drainage, and flood control for the Pueblo Indian lands in the Rio Grande Valley, N. Mex., and for other purposes.

Mr. BRATTON obtained the floor.

Mr. LA FOLLETTE. Mr. President, will the Senator yield to me? I think the matter which is coming up now for discussion is one of considerable importance. If it is agreeable to the Senator, I make the point of no quorum.

Mr. BRATTON. Very well.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	Ferris	Keyes	Sackett
Barkley	Fess	King	Schall
Bayard	Fletcher	La Follette	Sheppard
Bingham	Frazier	McKellar	Shortridge
Black	George	McMaster	Simmons
Blaine	Gerry	McNary	Smoot
Blease	Gillett	Mayfield	Steck
Borah	Glass	Metcalf	Steiwer
Bratton	Gooding	Moses	Stephens
Brookhart	Gould	Neely	Tydings
Bruce	Greene	Norbeck	Tyson
Capper	Hale	Norris	Walsh, Mont.
Caraway	Harris	Nye	Warren
Copeland	Harrison	Oddie	Waterman
Couzens	Hayden	Overman	Watson
Curtis	Heflin	Phipps	Wheeler
Cutting	Howell	Pittman	Willis
Deneen	Johnson	Ransdell	
Dill	Jones	Reed, Pa.	
Edge	Kendrick	Robinson, Ind.	

Mr. COPELAND. My colleague the junior Senator from New York [Mr. WAGNER] is absent on official business connected with a Senate investigation.

The PRESIDING OFFICER. Seventy-eight Senators having answered to their names, a quorum is present. The amendment of the House of Representatives to Senate bill 700 will be read.

The CHIEF CLERK. Strike out all after the enacting clause and insert:

That the Secretary of the Interior is hereby authorized to enter into an agreement with the Middle Rio Grande conservancy district, a political subdivision of the State of New Mexico, providing for conservation, irrigation, drainage, and flood control for the Pueblo Indian lands situated within the exterior boundaries of the said Middle Rio Grande conservancy district, as provided for by plans prepared for this purpose in pursuance to an act of February 14, 1927 (44 Stat. L. 1098). The construction cost of such conservation, irrigation, drainage, and flood-control work apportioned to the Indian lands shall not exceed $1,593,311, and said sum, or so much thereof as may be required to pay the Indians' share of the cost of the work herein provided for, shall be payable in not less than five installments without interest, which installments shall be paid annually as work progresses: *Provided*, That should at any time it appear to the said Secretary that construction work is not being carried out in accordance with plans approved by him, he shall withhold payment of any sums that may under the agreement be due the conservancy district until such work shall have been done in accordance with the said plans: *Provided further*, That in determining the share of the cost of the works to be apportioned to the Indian lands there shall be taken into consideration only the Indian acreage benefited which shall be definitely determined by said Secretary and such acreage shall include only lands feasibly susceptible of economic irrigation and cultivation, and materially benefited by this work, and in no event shall the average per acre cost for the area of Indian lands benefited exceed $67.50: *Provided further*, That all present water rights now appurtenant to the approximately 8,346 acres of irrigated Pueblo lands owned individually or as pueblos under the proposed plans of the district, and all water for the domestic purposes of the Indians and for their stock shall be prior and paramount to any rights of the district or of any property holder therein, which priority so defined shall be recognized and protected in the agreement between the Secretary of the Interior and the said Middle Rio Grande conservancy district, and the water rights for the newly reclaimed lands shall be recognized as equal to those of like district lands and be protected from discrimination in the division and use of water, and such water rights, old as well as new, shall not be subject to loss by nonuse or abandonment thereof so long as title to said lands shall remain in the Indians individually or as pueblos or in the United States, and such irrigated area of approximately 8,346 acres shall not be subject by the district or otherwise to any pro rata share of the cost of future operation and maintenance or betterment work performed by the district. The share of the cost paid the district on behalf of the Indian lands under the agreement herein authorized, including any sum paid to the district from the funds authorized to be appropriated by the act of February 14, 1927 (44 Stat. L. 1098), shall be reimbursed to the United States under such rules and regulations as may be prescribed by the Secretary of the Interior: *Provided*, That such reimbursement shall be made only from leases or proceeds from the newly reclaimed Pueblo lands, and there is hereby created against such newly reclaimed lands a first lien, which lien shall not be enforced during the period that the title to such lands remains in the pueblos or individual Indian ownership: *Provided further*, That said Secretary of the Interior, through the Commissioner of Indian Affairs, or his duly authorized agent, shall be recognized by said district in all matters pertaining to its operation in the same ratio that the Indian lands bear to the total area of lands within the district, and that the district books and records shall be available at all times for inspection by said representative.

The PRESIDING OFFICER. The clerk will state the amendment reported by the Senate Committee on Indian Affairs to the amendment of the House of Representatives.

The CHIEF CLERK. On page 3, line 19, of the engrossed House amendment it is proposed to strike out the words "lease or proceeds" and insert in lieu thereof the words "proceeds of leases."

Mr. BRATTON. Mr. President, I assume that there is no opposition to the amendment recommended by the Senate Committee on Indian Affairs to the House amendment to the bill. I would, therefore, suggest as a procedural matter that we agree to that amendment, and then the discussion may proceed upon the House amendment as amended by the Senate committee amendment.

Mr. CURTIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Mexico yield to the Senator from Kansas?

Mr. BRATTON. I yield.

Mr. CURTIS. I wish to propose an amendment to the House text.

Mr. BRATTON. The observation I made was that the Senate Committee on Indian Affairs has recommended an amendment to the House amendment to the bill; that is, to strike out the language "leases or proceeds" and to insert in lieu thereof the words "proceeds of leases." I understand there is no objection to that amendment.

Mr. CURTIS. And the request of the Senator is that that amendment be acted upon now?

Mr. BRATTON. That it be acted upon now, and then that the debate may proceed upon the House amendment as amended.

Mr. CURTIS. Subject, of course, to the notice which I now serve that later on I shall offer another amendment.

Mr. BRATTON. Certainly, I so understand.

The PRESIDING OFFICER. Without objection, the committee amendment to the House amendment is agreed to.

Mr. BRATTON addressed the Senate. After having spoken with interruptions for over half an hour——

The PRESIDING OFFICER (Mr. MCKELLAR in the chair). The Senator from New Mexico will suspend for a moment. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The CHIEF CLERK. A joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

Mr. SMOOT. Mr. President, I have spoken to the Senator having in charge the unfinished business, the senior Senator from Nebraska [Mr. NORRIS], and he has agreed with me that we

might lay the unfinished business temporarily aside for the consideration of a conference report, which is a privileged question. I refer to the conference report on the alien property bill. Therefore I ask unanimous consent that the unfinished business may be temporarily laid aside and that the conference report on the alien property bill may be laid before the Senate.

Mr. BRATTON. Mr. President, I hope the Senator will not insist upon the request. We are engaged in the discussion of the measure relating to Pueblo Indian lands.

Mr. SMOOT. I have no objection to the measure, but I have given way all the week on the conference report. I had the report printed on Monday.

Mr. CURTIS. Mr. President, I inquire if the Senator from New Mexico would not agree to let us proceed with the conference report, which I understand will not take very long, and then take up again the House amendment to Senate bill 700?

Mr. BRATTON. On the statement of the Senator that the conference report will not take long and that we shall then resume consideration of House amendment to the Pueblo Indian lands bill I consent.

Mr. LA FOLLETTE. Mr. President, is that satisfactory to the Senator from Nebraska [Mr. NORRIS]?

Mr. CURTIS. I think so.

Mr. BRATTON. The thing I am most concerned in is that I should like very much to get the bill finally disposed of.

Mr. SMOOT. It is going to take quite some time to dispose of the Senator's bill, and I think we can dispose of the conference report much more quickly than the Senator can dispose of his bill.

I ask unanimous consent that the unfinished business, being Senate Joint Resolution 46, be temporarily laid aside, and that the Senate proceed to the consideration of the conference report on the alien property bill.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Utah?

Mr. BRATTON. Before consent is given, let it be with the understanding that when the conference report has been disposed of we shall then return to the consideration of the measure which has been before the Senate.

Mr. SMOOT. If the Senator from Nebraska is agreeable I would not object at all.

Mr. BRATTON. I ask unanimous consent that at the conclusion of the consideration of the conference report the Senate shall return to the consideration of the special order, being the House amendment to Senate bill 700.

The PRESIDING OFFICER. The Chair will put the first unanimous-consent request first. Is there objection to the unanimous-consent request submitted by the senior Senator from Utah that the unfinished business be temporarily laid aside and that the Senate proceed to the consideration of the conference report on the alien property bill? The Chair hears none, and it is so ordered.

The Senator from New Mexico asks unanimous consent that at the conclusion of the consideration of the alien property conference report the Senate shall return to the consideration of the House amendment to Senate bill 700, the Pueblo Indian land bill. Is there objection?

Mr. LA FOLLETTE. I have no disposition to object, and I hope that the request of the Senator from New Mexico will be granted, but it seems to me that in all fairness to the Senator from Nebraska, who has charge of the unfinished business, he should be consulted before the request is granted.

Mr. REED of Pennsylvania. Mr. President, will the Senator yield for a suggestion? If the Senator from Nebraska does not care to yield, all he has to do is to call for the regular order and the Senate will then resume the consideration of the unfinished business.

The PRESIDING OFFICER. That is a correct statement of the situation. Is there objection to the unanimous-consent request submitted by the Senator from New Mexico?

Mr. LA FOLLETTE. It seems to me the Senator from Nebraska should be consulted. I suggest to the Senator from New Mexico that he ascertain from the Senator from Nebraska whether that Senator has any objection or not, and that he submit his request at the conclusion of the disposition of the conference report.

Mr. BRATTON. If the Senator from Nebraska has objection I shall withdraw the request.

Mr. LA FOLLETTE. The Senator could not withdraw it after it has been entered into, except by unanimous consent.

Mr. REED of Pennsylvania. The Senator from Nebraska could ask for the regular order, and that would have the effect of withdrawing the unanimous-consent agreement.

Mr. BRATTON. The Senator from Nebraska unquestionably has the right to bring the unfinished business before the Senate at any time.

The PRESIDING OFFICER. Is there objection to the request submitted by the Senator from New Mexico? The Chair hears none, and it is so ordered.

Mr. SMOOT obtained the floor.

Mr. REED of Pennsylvania. Mr. President, will the Senator from Utah yield to me?

Mr. SMOOT. Certainly.

Mr. BRATTON subsequently said: I ask unanimous consent that when the Senate concludes its regular morning business tomorrow morning it shall proceed to the consideration of the House amendment to Senate bill 700, commonly called the conservancy bill.

The PRESIDING OFFICER. The Chair calls the attention to the Senator from New Mexico to the fact that there has already been an agreement to proceed with the matter after action upon the pending conference report.

Mr. BRATTON. That agreement was subject to the approval of the Senator from Nebraska [Mr. NORRIS]. I understand he desires to resume his address this afternoon on the unfinished business, and I therefore ask unanimous consent as I have indicated.

The PRESIDING OFFICER. Is there objection?

Mr. NORRIS. What is the request?

Mr. BRATTON. That when the Senate concludes its routine business to-morrow it shall proceed to the consideration of the amendment to Senate bill 700, commonly called the conservancy bill.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

[Mr. BRATTON'S speech will be published entire after it shall have been concluded.]

SUSQUEHANNA RIVER BRIDGE

Mr. REED of Pennsylvania. I ask unanimous consent to call up a bridge bill, which is in the regular form, which can be passed without any debate, and which the interested parties are very anxious to have passed.

Mr. SMOOT. If the bill is in the usual form I have no objection.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Pennsylvania?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 8227) authorizing the Sunbury Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Susquehanna River, at or near Bainbridge Street, in the city of Sunbury, Pa.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CONFERENCE REPORT—ALIEN PROPERTY AND OTHER CLAIMS

The PRESIDING OFFICER. The Chair lays before the Senate the conference report on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7201) to provide for the settlement of certain claims of American nationals against Germany and of German nationals against the United States, for the ultimate return of all property of German nationals held by the Alien Property Custodian, and for the equitable apportionment among all claimants of certain available funds.

The Chief Clerk read the conference report.

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 7201) to provide for the settlement of certain claims of American nationals against Germany and of German nationals against the United States, for the ultimate return of all property of German nationals held by the Alien Property Custodian, and for the equitable apportionment among all claimants of certain available funds, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"That this act may be cited as the 'settlement of war claims act of 1928.'

"CLAIMS OF NATIONALS OF THE UNITED STATES AGAINST GERMANY

"SEC. 2 (a) The Secretary of State shall, from time to time, certify to the Secretary of the Treasury the awards of the Mixed Claims Commission, United States and Germany, established in pursuance of the agreement of August 10, 1922, between the United States and Germany (referred to in this act as the 'Mixed Claims Commission').

"(b) The Secretary of the Treasury is authorized and directed to pay an amount equal to the principal of each award so certified, plus the interest thereon, in accordance with the award, accruing before January 1, 1928.

"(c) The Secretary of the Treasury is authorized and directed to pay annually (as nearly as may be) simple interest, at the rate of 5 per cent per annum, upon the amounts payable under subsection (b) and remaining unpaid, beginning January 1, 1928, until paid.

"(d) The payments authorized by subsection (b) or (c) shall be made in accordance with such regulations as the Secretary of the Treasury may prescribe, but only out of the German special deposit account created by section 4, within the limitations hereinafter prescribed, and in the order of priority provided in subsection (c) of section 4.

"(e) There shall be deducted from the amount of each payment, as reimbursement for the expenses incurred by the United States in respect thereof, an amount equal to one-half of 1 per cent thereof. The amount so deducted shall be deposited in the Treasury as miscellaneous receipts. In computing the amounts payable under subsection (c) of section 4 (establishing the priority of payments) the fact that such deduction is required to be made from the payment when computed or that such deduction has been made from prior payments, shall be disregarded.

"(f) The amounts awarded to the United States in respect of claims of the United States on its own behalf shall not be payable under this section.

"(g) No payment shall be made under this section unless application therefor is made, within two years after the date of the enactment of this act, in accordance with such regulations as the Secretary of the Treasury may prescribe. Payment shall be made only to the person on behalf of whom the award was made, except that—

"(1) If such person is deceased or is under a legal disability, payment shall be made to his legal representative, except that if the payment is not over $500 it may be made to the persons found by the Secretary of the Treasury to be entitled thereto, without the necessity of compliance with the requirements of law in respect of the administration of estates;

"(2) In the case of a partnership, association, or corporation, the existence of which has been terminated, payment shall be made, except as provided in paragraphs (3) and (4), to the persons found by the Secretary of the Treasury to be entitled thereto;

"(3) If a receiver or trustee for the person on behalf of whom the award was made has been duly appointed by a court in the United States and has not been discharged prior to the date of payment, payment shall be made to the receiver or trustee or in accordance with the order of the court; and

"(4) In the case of an assignment of an award, or an assignment (prior to the making of the award) of the claim in respect of which the award was made, by a receiver or trustee for any such person, duly appointed by a court in the United States, such payment shall be made to the assignee.

"(h) Nothing in this section shall be construed as the assumption of a liability by the United States for the payment of the awards of the Mixed Claims Commission, nor shall any payment under this section be construed as the satisfaction, in whole or in part, of any of such awards, or as extinguishing or diminishing the liability of Germany for the satisfaction in full of such awards, but shall be considered only as an advance by the United States until all the payments from Germany in satisfaction of the awards have been received. Upon any payment under this section of an amount in respect of an award, the rights in respect of the award and of the claim in respect of which the award was made shall be held to have been assigned pro tanto to the United States, to be enforced by and on behalf of the United States against Germany, in the same manner and to the same extent as such rights would be enforced on behalf of the American national.

"(i) Any person who makes application for payment under this section shall be held to have consented to all the provisions of this act.

"(j) The President is requested to enter into an agreement with the German Government by which the Mixed Claims Commission will be given jurisdiction of and authorized to decide claims of the same character as those of which the commission now has jurisdiction, notice of which is filed with the Department of State before July 1, 1928. If such agreement is entered into before January 1, 1929, awards in respect of such claims shall be certified under subsection (a) and shall be in all other respects subject to the provisions of this section.

CLAIMS OF GERMAN NATIONALS AGAINST UNITED STATES

"SEC. 3. (a) There shall be a war claims arbiter (hereinafter referred to as the "arbiter") who shall be appointed by the President, by and with the advice and consent of the Senate, without regard to any provision of law prohibiting the holding of more than one office. The arbiter, notwithstanding any other provision of law, shall receive a salary to be fixed by the President in an amount, if any, which if added to any other salary will make his total salary from the United States not in excess of $15,000 a year.

"(b) It shall be the duty of the arbiter, within the limitations hereinafter prescribed, to hear the claims of any German national (as hereinafter defined), and to determine the fair compensation to be paid by the United States, in respect of—

"(1) Any merchant vessel (including any equipment, appurtenances and property contained therein), title to which was taken by or on behalf of the United States under the authority of the joint resolution of May 12, 1917 (40 Stat. 75). Such compensation shall be the fair value, as nearly as may be determined, of such vessel to the owner immediately prior to the time exclusive possession was taken under the authority of such joint resolution, and in its condition at such time, taking into consideration the fact that such owner could not use or permit the use of such vessel, or charter or sell or otherwise dispose of such vessel for use or delivery, prior to the termination of the war, and that the war was not terminated until July 2, 1921, except that there shall be deducted from such value any consideration paid for such vessel by the United States. The findings of the board of survey appointed under the authority of such joint resolution shall be competent evidence in any proceeding before the arbiter to determine the amount of such compensation.

"(2) Any radio station (including any equipment, appurtenances, and property contained therein) which was sold to the United States by or under the direction of the Alien Property Custodian under authority of the trading with the enemy act, or any amendment thereto. Such compensation shall be the fair value, as nearly as may be determined, which such radio station would have had on July 2, 1921, if returned to the owner on such date in the same condition as on the date on which it was seized by or on behalf of the United States, or on which it was conveyed or delivered to, or seized by, the Alien Property Custodian, whichever date is earlier, except that there shall be deducted from such value any consideration paid for such radio station by the United States.

"(3) Any patent (or any right therein or claim thereto, and including an application therefor and any patent issued pursuant to any such application) which was licensed, assigned, or sold by the Alien Property Custodian to the United States. Such compensation shall be the amount, as nearly as may be determined, which would have been paid if such patent, right, claim, or application had been licensed, assigned, or sold to the United States by a citizen of the United States, except that there shall be deducted from such amount any consideration paid therefor by the United States (other than consideration which is returned to the United States under section 27 of the trading with the enemy act, as amended).

"(4) The use by or for the United States of any invention described in and covered by any patent (including an application therefor and any patent issued pursuant to any such application) which was conveyed, transferred, or assigned to, or seized by, the Alien Property Custodian, but not including any use during any period between April 6, 1917, and November 11, 1918, both dates inclusive, or on or after the date on which such patent was licensed, assigned, or sold by the Alien Property Custodian. In determining such compensation, any defense, general or special, available to a defendant in an action for infringement or in any suit in equity for relief against an alleged infringement, shall be available to the United States.

"(c) The proceedings of the arbiter under this section shall be conducted in accordance with such rules of procedure as he may prescribe. The arbiter, or any referee designated by him, is authorized to administer oaths, to hold hearings at such places within or without the United States as the arbiter deems necessary, and to contract for the reporting of such hearings. Any witness appearing for the United States before the arbiter or any such referee at any place within or without the United States may be paid the same fees and mileage as witnesses in courts of the United States. Such payments shall be made out of any funds in the German special deposit account hereinafter provided for, and may be made in advance.

"(d) The arbiter may, from time to time, and shall, upon the determination by him of the fair compensation in respect of all such vessels, radio stations, and patents, make a tentative award to each claimant of the fair compensation to be paid in respect of his claim, including simple interest, at the rate of 5 per cent per annum, on the amount of such compensation from July 2, 1921, to December 31, 1928, both dates inclusive. If a German national filing a claim in respect of

any such vessel fails to establish to the satisfaction of the arbiter that neither the German Government nor any member of the former ruling family had, at the time of the taking, any interest in such vessel, either directly or indirectly, through stock ownership or control or otherwise, then (whether or not claim has been filed by or on behalf of such Government or individual) no award shall be made to such German national unless and until the extent of such interest of the German Government and of the members of the former ruling family has been determined by the arbiter. Upon such determination the arbiter shall make a tentative award in favor of such Government or individual in such amount as the arbiter determines to be in justice and equity representative of such interest, and reduce accordingly the amount available for tentative awards to German nationals filing claims in respect of the vessel so that the aggregate of the tentative awards (including awards on behalf of the German Government and members of the former ruling family) in respect of the vessel will be within the amount of fair compensation determined under subsection (b) of this section.

"(e) The total amount to be awarded under this section shall not exceed $100,000,000, minus the sum of (1) the expenditures in carrying out the provisions of this section (including a reasonable estimate for such expenditures to be incurred prior to the expiration of the term of office of the arbiter) and (2) the aggregate consideration paid by the United States in respect of the acquisition of such vessels and radio stations, and the use, license, assignment, and sale of such patents (other than consideration which is returned to the United States under section 27 of the trading with the enemy act, as amended).

"(f) If the aggregate amount of the tentative awards exceeds the amount which may be awarded under subsection (e), the arbiter shall reduce pro rata the amount of each tentative award. The arbiter shall enter an award of the amount to be paid each claimant, and thereupon shall certify such awards to the Secretary of the Treasury.

"(g) The Secretary of the Treasury is authorized and directed to pay the amount of the awards certified under subsection (f).

"(h) The Secretary of the Treasury is authorized and directed to pay annually (as nearly as may be) simple interest, at the rate of 5 per cent per annum, upon the amount of any such award remaining unpaid, beginning January 1, 1929, until paid.

"(i) The payments in respect of awards under this section shall be made in accordance with such regulations as the Secretary of the Treasury may prescribe, but only out of the German special deposit account created by section 4, within the limitations hereinafter prescribed, and in the order of priority provided in subsections (c) and (d) of section 4.

"(j) The Secretary of the Treasury shall not pay any amount in respect of any award made to or on behalf of the German Government or any member of the former ruling family, but the amount of any such award shall be credited upon the final payment due the United States from the German Government for the purpose of satisfying the awards of the Mixed Claims Commission.

"(k) No payment shall be made under this section unless application therefor is made, within two years after the date the award is certified, in accordance with such regulations as the Secretary of the Treasury may prescribe. Payment of any amount in respect of any award may be made, in the discretion of the Secretary of the Treasury, either in the United States or in Germany, and either in money of the United States or in lawful German money, and shall be made only to the person on behalf of whom the award was made, except that—

"(1) If such person is deceased or is under a legal disability, payment shall be made to his legal representative, except that if the payment is not over $500 it may be made to the persons found by the Secretary of the Treasury to be entitled thereto, without the necessity of compliance with the requirements of law in respect of the administration of estates;

"(2) In the case of a partnership, association, or corporation, the existence of which has been terminated, payment shall be made, except as provided in paragraphs (3) and (4), to the persons found by the Secretary of the Treasury to be entitled thereto;

"(3) If a receiver or trustee for the person on behalf of whom the award was made has been duly appointed by a court of competent jurisdiction and has not been discharged prior to the date of payment, payment shall be made to the receiver or trustee or in accordance with the order of the court; and

"(4) In the case of an assignment of an award, or of an assignment—prior to the making of the award—of the claim in respect of which such award was made, by a receiver or trustee for any such person, duly appointed by a court of competent jurisdiction, payment shall be made to the assignee.

"(l) The head of any executive department, independent establishment, or agency in the executive branch of the Government, including the Alien Property Custodian and the Comptroller General, shall, upon request of the arbiter, furnish such records, documents, papers, correspondence, and information in the possession of such department, independent establishment, or agency as may assist the arbiter, furnish them statements and assistance of the same character as is described in section 188 of the Revised Statutes, and may temporarily detail any officers or employees of such department, independent establishment, or agency to assist the arbiter, or to act as a referee, in carrying out the provisions of this section. The Attorney General shall assign such officers and employees of the Department of Justice as may be necessary to represent the United States in the proceedings under this section.

"(m) The arbiter, with the approval of the Secretary of the Treasury, is authorized to (1) appoint and fix the salaries of such officers, referees, and employees, without regard to the civil service laws and regulations or to the classification act of 1923, and (2) make such expenditures—including expenditures for the salary of the arbiter, rent, and personal services at the seat of government and elsewhere, law books, periodicals, books of reference, and printing and binding—as may be necessary for carrying out the provisions of this section and within the funds available therefor. Any officer or employee detailed or assigned under subsection (l) shall be entitled to receive—notwithstanding any provision of law to the contrary—such additional compensation as the arbiter, with the approval of the Secretary of the Treasury, may prescribe. The arbiter and officers and employees appointed, detailed, or assigned shall be entitled to receive their necessary traveling expenses and actual expenses incurred for subsistence—without regard to any limitations imposed by law—while away from the District of Columbia on business required by this section.

"(n) On the date on which the awards are certified to the Secretary of the Treasury under subsection (f) or the date on which the awards are certified to the Secretary of the Treasury under subsection (e) of section 6 (patent claims of Austrian and Hungarian nationals), whichever date is the later, the terms of office of the arbiter, and of the officers and employees appointed by the arbiter, shall expire, and the books, papers, records, correspondence, property, and equipment of the office shall be transferred to the Department of the Treasury.

"(o) No award or tentative award shall be made by the arbiter in respect of any claim if (1) such claim is filed after the expiration of four months from the date on which the arbiter takes office, or (2) any judgment or decree awarding compensation or damages in respect thereof has been rendered against the United States, and if such judgment or decree has become final (whether before or after the enactment of this act), or (3) any suit or proceeding against the United States, or any agency thereof, is commenced or is pending in respect thereof and is not dismissed upon motion of the person by or on behalf of whom it was commenced, made before the expiration of six months from the date on which the arbiter takes office and before any judgment or decree awarding compensation or damages becomes final.

"(p) There is hereby authorized to be appropriated, to be immediately available and to remain available until expended, the sum of $50,000,000, and, after the date on which the awards of the arbiter under this section are certified to the Secretary of the Treasury, such additional amounts as, when added to the amounts previously appropriated, will be equivalent to the aggregate amount of such awards plus the amounts necessary for the expenditures authorized by subsections (c) and (m) of this section (expenses of administration), except that the aggregate of such appropriations shall not exceed $100,000,000.

"(q) The provisions of this section shall constitute the exclusive method for the presentation and payment of claims arising out of any of the acts by or on behalf of the United States for which this section provides a remedy. Any person who files any claim or makes application for any payment under this section shall be held to have consented to all the provisions of this act. This subsection shall not bar the presentation of a claim under section 21 (relating to the claims of certain former German nationals in respect of the taking of the vessels *Carl Diederichsen* and *Johanne*); but no award shall be made under section 21 in respect of either of such vessels to or on behalf of any person to whom or on whose behalf an award is made under this section in respect of such vessel.

"(r) If the aggregate amount to be awarded in respect of any vessel, radio station, or patent is awarded in respect of two or more claims, such amount shall be apportioned among such claims by the arbiter as he determines to be just and equitable and as the interests of the claimants may appear.

"(s) The Secretary of the Treasury, upon the certification of any of the tentative awards made under subsection (d) of this section and the recommendation of the arbiter, may make such pro rata payments in respect of such tentative awards as he deems advisable, but the aggregate of such payments shall not exceed $25,000,000.

GERMAN SPECIAL DEPOSIT ACCOUNT

"SEC. 4. (a) There is hereby created in the Treasury a German special deposit account, into which shall be deposited all funds hereinafter specified and from which shall be disbursed all payments authorized by section 2 or 3, including the expenses of administration authorized under subsections (c) and (m) of section 3 and subsection (e) of this section.

"(b) The Secretary of the Treasury is authorized and directed to deposit in such special deposit account—

"(1) All sums invested or transferred by the Alien Property Custodian, under the provisions of section 25 of the trading with the enemy act, as amended;

"(2) The amounts appropriated under the authority of section 3 (relating to claims of German nationals); and

"(3) All money (including the proceeds of any property, rights, or benefits which may be sold or otherwise disposed of, upon such terms as he may prescribe) received, whether before or after the enactment of this act, by the United States in respect of claims of the United States agaisnt Germany on account of the awards of the Mixed Claims Commission.

"(c) The Secretary of the Treasury is authorized and directed, out of the funds in such special deposit account, subject to the provisions of subsection (d), and in the following order of priority—

"(1) To make the payments of expenses of administration authorized by subsections (c) and (m) of section 3 or subsection (e) of this section;

"(2) To make so much of each payment authorized by subsection (b) of section 2 (relating to awards of the Mixed Claims Commission), as is attributable to an award on account of death or personal injury, together with interest thereon as provided in subsection (c) of section 2;

"(3) To make each payment authorized by subsection (b) of section 2 (relating to awards of the Mixed Claims Commission), if the amount thereof is not payable under paragraph (2) of this subsection and does not exceed $100,000, and to pay interest thereon as provided in subsection (c) of section 2;

"(4) To pay the amount of $100,000 in respect of each payment authorized by subsection (b) of section 2 (relating to awards of the Mixed Claims Commission), if the amount of such authorized payment is in excess of $100,000 and is not payable in full under paragraph (2) of this subsection. No person shall be paid under this paragraph and paragraph (3) an amount in excess of $100,000 (exclusive of interest beginning January 1, 1928), irrespective of the number of awards made on behalf of such person;

"(5) To make additional payments authorized by subsection (b) of section 2 (relating to awards of the Mixed Claims Commission), in such amounts as will make the aggregate payments (authorized by such subsection) under this paragraph and paragraphs (2), (3), and (4) of this subsection equal to 80 per cent of the aggregate amount of all payments authorized by subsection (b) of section 2. Payments under this paragraph shall be prorated on the basis of the amount of the respective payments authorized by subsection (b) of section 2 and remaining unpaid. Pending the completion of the work of the Mixed Claims Commission, the Secretary of the Treasury is authorized to pay such installments of the payments authorized by this paragraph as he determines to be consistent with prompt payment under this paragraph to all persons on behalf of whom claims have been presented to the commission;

"(6) To pay amounts determined by the Secretary of the Treasury to be payable in respect of the tentative awards of the arbiter, in accordance with the provisions of subsection (s) of section 3 (relating to awards for ships, patents, and radio stations);

"(7) To pay to German nationals such amounts as will make the aggregate payments equal to 50 per cent of the amounts awarded under section 3 (on account of ships, patents, and radio stations). Payments authorized by this paragraph or paragraphs (6) may, to the extent of funds available under the provisions of subsection (d) of this section, be made whether or not the payments under paragraphs (1) to (5), inclusive, of this subsection have been completed;

"(8) To pay accrued interest upon the participating certificates evidencing the amounts invested by the Alien Property Custodian under subsection (a) of section 25 of the trading with the enemy act, as amended (relating to the investment of 20 per cent of German property temporarily withheld);

"(9) To pay the accrued interest payable under subsection (c) of section 2 (in respect of awards of the Mixed Claims Commission) and subsection (h) of section 3 (in respect of awards to German nationals);

"(10) To make such payments as are necessary (A) to repay the amounts invested by the Alien Property Custodian under subsection (a) of section 25 of the trading with the enemy act, as amended (relating to the investment of 20 per cent of German property temporarily withheld), (B) to pay amounts equal to the difference between the aggregate payments (in respect of claims of German nationals) authorized by subsections (g) and (h) of section 3 and the amounts previously paid in respect thereof, and (C) to pay amounts equal to the difference between the aggregate payments (in respect of awards of the Mixed Claims Commission) authorized by subsections (b) and (c) of section 2, and the amounts previously paid in respect thereof. If funds available are not sufficient to make the total payments authorized by this paragraph, the amount of payments made from time to time shall be apportioned among the payments authorized under clauses (A), (B), and (C) according to the aggregate amount remaining unpaid under each clause;

"(11) To make such payments as are necessary to repay the amounts invested by the Alien Property Custodian under subsection (b) of section 25 of the trading with the enemy act, as amended (relating to the investment of the unallocated interest fund); but the amount payable under this paragraph shall not exceed the aggregate amount allocated to the trusts described in subsection (c) of section 26 of such act;

"(12) To pay into the Treasury as miscellaneous receipts the amount of the awards of the Mixed Claims Commission to the United States on its own behalf on account of claims of the United States against Germany; and

"(13) To pay into the Treasury as miscellaneous receipts any funds remaining in the German special deposit account after the payments authorized by paragraphs (1) to (12) have been completed.

"(d) Fifty per cent of the amounts appropriated under the authority of section 3 (relating to claims of German nationals) shall be available for payments under paragraphs (6) and (7) of subsection (c) of this section (relating to such claims) and shall be available only for such payments until such time as the payments authorized by such paragraphs have been completed.

"(e) The Secretary of the Treasury is authorized to pay, from funds in the German special deposit account, such amounts, not in excess of $25,000 per annum, as may be necessary for the payment of the expenses in carrying out the provisions of this section and section 25 of the trading with the enemy act, as amended (relating to the investment of funds by the Alien Property Custodian), including personal services at the seat of government.

"(f) The Secretary of the Treasury is authorized to invest and reinvest, from time to time, in bonds, notes, or certificates of indebtedness of the United States any of the funds in the German special deposit account, and to deposit to the credit of such account the interest or other earnings thereon.

"(g) There shall be deducted from the amounts first payable under this section to any American national in respect of any debt the amount, if any, paid by the Alien Property Custodian in respect of such debt which was not credited by the Mixed Claims Commission in making its award.

CLAIMS OF UNITED STATES AND ITS NATIONALS AGAINST AUSTRIA AND HUNGARY

"SEC. 5. (a) The Commissioner of the Tripartite Claims Commission (hereinafter referred to as the "commissioner") selected in pursuance of the agreement of November 26, 1924, between the United States and Austria and Hungary shall, from time to time, certify to the Secretary of the Treasury the judgments and interlocutory judgments (hereinafter referred to as "awards") of the commissioner.

"(b) The Secretary of the Treasury is authorized and directed to pay (1) in the case of any such judgment, an amount equal to the principal thereof, plus the interest thereon in accordance with such judgment, and (2) in the case of any such interlocutory judgment, an amount equal to the principal thereof (converted at the rate of exchange specified in the certificate of the commissioner provided for in section 7), plus the interest thereon in accordance with such certificate.

"(c) The payments authorized by subsection (b) shall be made in accordance with such regulations as the Secretary of the Treasury may prescribe, but only out of the special deposit account (Austrian or Hungarian, as the case may be), created by section 7, and within the limitations hereinafter prescribed.

"(d) There shall be deducted from the amount of each payment, as reimbursement for expenses incurred by the United States in respect thereof, an amount equal to one-half of 1 per

cent thereof. The amount so deducted shall be deposited in the Treasury as miscellaneous receipts.

"(e) The amounts awarded to the United States in respect of claims of the United States on its own behalf shall be payable under this section.

"(f) No payment shall be made under this section (other than payments to the United States in respect of claims of the United States on its own behalf) unless application therefor is made within two years after the date of the enactment of this act in accordance with such regulations as the Secretary of the Treasury may prescribe. Payment shall be made only to the person on behalf of whom the award was made except in the cases specified in paragraphs (1) to (4) of subsection (g) of section 2.

"(g) Any person who makes application for payment under this section shall be held to have consented to all the provisions of this act.

CLAIMS OF AUSTRIAN AND HUNGARIAN NATIONALS AGAINST THE UNITED STATES

"SEC. 6. (a) It shall be the duty of the arbiter, within the limitations hereinafter prescribed, to hear the claims of any Austrian or Hungarian national (as hereinafter defined) and to determine the compensation to be paid by the United States, in respect of—

"(1) Any patent (or any right therein or claim thereto, and including an application therefor and any patent issued pursuant to any such application) which was licensed, assigned, or sold by the Alien Property Custodian to the United States. Such compensation shall be the amount, as nearly as may be determined, which would have been paid if such patent, right, claim, or application had been licensed, assigned, or sold to the United States by a citizen of the United States, except that there shall be deducted from such amount any consideration paid therefor by the United States (other than consideration which is returned to the United States under section 27 of the trading with the enemy act, as amended).

"(2) The use by or for the United States of any invention described in and covered by any patent (including an application therefor and any patent issued pursuant to any such application) which was conveyed, transferred, or assigned to, or seized by the Alien Property Custodian, but not including any use during any period between December 7, 1917, and November 3, 1918, both dates inclusive, or on or after the date on which such patent was licensed, assigned, or sold by the Alien Property Custodian. In determining such compensation, any defense, general or special available to a defendant in an action for infringement or in any suit in equity for relief against an alleged infringement, shall be available to the United States.

"(b) The proceedings of the arbiter under this section shall be conducted in accordance with such rules of procedure as he may prescribe. The arbiter, or any referee designated by him, is authorized to administer oaths, to hold hearings at such places within or without the United States as the arbiter deems necessary, and to contract for the reporting of such hearings. Any witness appearing for the United States before the arbiter or any such referee at any place within or without the United States may be paid the same fees and mileage as witnesses in courts of the United States. Such payments may be made in advance, and may be made in the first instance out of the German special deposit account, subject to reimbursement from the special deposit account (Austrian or Hungarian as the case may be) hereinafter provided for.

"(c) The arbiter shall, upon the determination by him of the fair compensation in respect of all such patents, make a tentative award to each claimant of the fair compensation to be paid in respect of his claim, including simple interest, at the rate of 5 per cent per annum, on the amount of such compensation from July 2, 1921, to December 31, 1928, both dates inclusive.

"(d) The total amount to be awarded under this section shall not exceed $1,000,000, minus the sum of (1) the expenditures in carrying out the provisions of this section (including a reasonable estimate for such expenditures to be incurred prior to the expiration of the term of office of the arbiter) and (2) the aggregate consideration paid by the United States in respect of the use, license, assignment, and sale of such patents (other than consideration which is returned to the United States under section 27 of the trading with the enemy act, as amended).

"(e) If the aggregate amount of the tentative awards exceeds the amount which may be awarded under subsection (d), the arbiter shall reduce pro rata the amount of each tentative award. The arbiter shall enter an award of the amount to be paid each claimant, and thereupon shall certify such awards to the Secretary of the Treasury.

"(f) The Secretary of the Treasury is authorized and directed to pay the amount of the awards certified under subsection (e), together with simple interest thereon, at the rate of 5 per cent per annum, beginning January 1, 1929, until paid.

"(g) The payments authorized by subsection (f) shall be made in accordance with such regulations as the Secretary of the Treasury may prescribe, but only out of the special deposit account (Austrian or Hungarian, as the case may be), created by section 7, and within the limitations hereinafter prescribed.

"(h) No payment shall be made under this section unless application therefor is made, within two years after the date the award is certified, in accordance with such regulations as the Secretary of the Treasury may prescribe. Payment of any amount in respect of any award may be made, in the discretion of the Secretary of the Treasury, either in the United States or in Austria or in Hungary, and either in money of the United States or in lawful Austrian or Hungarian money (as the case may be), and shall be made only to the person on behalf of whom the award was made, except in the cases specified in paragraphs (1) to (4) of subsection (k) of section 3.

"(i) The provisions of subsections (l), (m), and (o) of section 3 shall be applicable in carrying out the provisions of this section, except that the expenditures in carrying out the provisions of section 3 and this section shall be allocated (as nearly as may be) by the arbiter and paid, in accordance with such allocation, out of the German special deposit account created by section 4 or the special deposit account (Austrian or Hungarian, as the case may be) created by section 7. Such payments may be made in the first instance out of the German special deposit account, subject to reimbursement from the Austrian or the Hungarian special deposit account in appropriate cases.

"(j) There is hereby authorized to be appropriated, to remain available until expended, such amount, not in excess of $1,000,000, as may be necessary for carrying out the provisions of this section.

"(k) The provisions of this section shall constitute the exclusive method for the presentation and payment of claims arising out of any of the acts by or on behalf of the United States for which this section provides a remedy. Any person who files any claim or makes application for any payment under this section shall be held to have consented to all the provisions of this act.

"(l) If the aggregate amount to be awarded in respect of any patent is awarded in respect of two or more claims, such amount shall be apportioned among such claims by the arbiter as he determines to be just and equitable and as the interests of the claimants may appear.

AUSTRIAN AND HUNGARIAN SPECIAL DEPOSIT ACCOUNTS

"SEC. 7. (a) There are hereby created in the Treasury an Austrian special deposit account and an Hungarian special deposit account, into which, respectively, shall be deposited all funds hereinafter specified and from which, respectively, shall be disbursed all payments and expenditures authorized by section 5 or 6 or this section.

"(b) The Secretary of the Treasury is authorized and directed to deposit in the Austrian or the Hungarian special deposit account, as the case may be—

"(1) The respective amounts appropriated under the authority of section 6 (patent claims of Austrian and Hungarian nationals);

"(2) The respective sums transferred by the Alien Property Custodian, under the provisions of subsection (g) of section 25 of the trading with the enemy act, as amended (property of Austrian and Hungarian Governments);

"(3) All money (including the proceeds of any property, rights, or benefits which may be sold or otherwise disposed of, upon such terms as he may prescribe) received, whether before or after the enactment of this act, by the United States in respect of claims of the United States against Austria or Hungary, as the case may be, on account of awards of the commissioner.

"(c) The Secretary of the Treasury is authorized and directed, out of the funds in the Austrian or the Hungarian special deposit account, as the case may be, subject to the provisions of subsections (d) and (e)—

"(1) To make the payments of expenses of administration authorized by section 6 or this section;

"(2) To make the payments authorized by subsection (b) of section 5 (relating to awards of the Tripartite Claims Commission); and

"(3) To make the payments of the awards of the arbiter, together with interest thereon, as provided by section 6 (relating to claims of Austrian and Hungarian nationals).

"(d) No payment shall be made in respect of any award of the commissioner against Austria or of the arbiter on behalf of an Austrian national, nor shall any money or other property be

returned under paragraph (15), (17), (18), or (19) of subsection (b) of section 9 of the trading with the enemy act, as amended (relating to the return of money and other property by the Alien Property Custodian to Austrian nationals), prior to the date upon which the commissioner certifies to the Secretary of the Treasury—

"(1) That the amounts deposited in the Austrian special deposit account under paragraph (2) of subsection (b) of this section (in respect of property of the Austrian Government or property of a corporation all the stock of which was owned by the Austrian Government) and under paragraph (3) of subsection (b) of this section (in respect of money received by the United States in respect of claims of the United States against Austria on account of awards of the commissioner) are sufficient to make the payments authorized by subsection (b) of section 5 in respect of awards against Austria; and

"(2) In respect of interlocutory judgments entered by the commissioner, the rate of exchange at which such interlocutory judgments shall be converted into money of the United States and the rate of interest applicable to such judgments and the period during which such interest shall run. The commissioner is authorized and requested to fix such rate of exchange and interest as he may determine to be fair and equitable, and to give notice thereof, within 30 days after the enactment of this act.

"(e) No payment shall be made in respect of any award of the commissioner against Hungary or of the arbiter on behalf of an Hungarian national, nor shall any money or other property be returned under paragraph (15), (20), (21), or (22) of subsection (b) of section 9 of the trading with the enemy act, as amended by this act (relating to the return of money and other property by the Alien Property Custodian to Hungarian nationals), prior to the date upon which the commissioner certifies to the Secretary of the Treasury—

"(1) That the amounts deposited in the Hungarian special deposit account under paragraph (2) of subsection (b) of this section (in respect of property of the Hungarian Government or property of a corporation all the stock of which was owned by the Hungarian Government) and under paragraph (3) of subsection (b) of this section (in respect of money received by the United States in respect of claims of the United States against Hungary on account of awards of the commissioner), are sufficient to make the payments authorized by subsection (b) of section 5 in respect of awards against Hungary; and

"(2) In respect of interlocutory judgments entered by the commissioner, the rate of exchange at which such interlocutory judgments shall be converted into money of the United States and the rate of interest applicable to such judgments and the period during which such interest shall run. The commissioner is authorized and requested to fix such rate of exchange and interest as he may determine to be fair and equitable, and to give notice thereof, within 30 days after the enactment of this act.

"(f) Amounts available under subsection (e) of section 4 (relating to payment of expenses of administration) shall be available for the payment of expenses in carrying out the provisions of this section, including personal services at the seat of Government.

"(g) The Secretary of the Treasury is authorized to invest and reinvest, from time to time, in bonds, notes, or certificates of indebtedness of the United States, any of the funds in the Austrian or the Hungarian special deposit account, and to deposit to the credit of such account the interest or other earnings thereon.

"(h) There shall be deducted from the amounts first payable under this section to any American national in respect of any debt the amount, if any, paid by the Alien Property Custodian in respect of such debt which was not credited by the commissioner in making his award.

"(i) The payments of the awards of the commissioner to the United States on its own behalf, on account of claims of the United States against Austria or Hungary, shall be paid into the Treasury as miscellaneous receipts.

"(j) Any amount remaining in the Austrian or the Hungarian special deposit account after all the payments authorized to be made therefrom have been completed shall be disposed of as follows:

"(1) There shall first be paid into the Treasury as miscellaneous receipts the respective amount, if any, by which the appropriations made under the authority of section 6 and deposited in such special deposit account exceed the payments authorized by such section; and

"(2) The remainder shall be refunded to Austria or Hungary, as their respective interests may appear.

FINALITY OF DECISIONS

"SEC. 8. (a) Notwithstanding the provisions of section 236 of the Revised Statutes, as amended, the decisions of the Secretary of the Treasury in respect of the funds to be paid into the German, the Austrian, or the Hungarian special deposit account and of the payments therefrom shall be final and conclusive and shall not be subject to review by any other officer of the United States, except that payments made under authority of subsection (c) or (m) of section 3 or subsection (e) of section 4 or subsection (f) of section 7 (relating to expenses of administration) shall be accounted for and settled without regard to the provisions of this subsection.

"(b) The Secretary of the Treasury, in his annual report to the Congress, shall include a detailed statement of all expenditures made in carrying out the provisions of this act.

EXCESSIVE FEES PROHIBITED

"SEC. 9. (a) The arbiter, the Commissioner of the Mixed Claims Commission appointed by the United States, and the Commissioner of the Tripartite Claims Commission, respectively, are authorized (upon request as hereinafter provided) to fix reasonable fees (whether or not fixed under any contract or agreement) for services in connection with the proceedings before the arbiter and the Mixed Claims Commission and the Tripartite Claims Commission, respectively, and with the preparations therefor, and the application for payment, and the payment, of any amount under section 2, 3, 5, or 6. Each such official is authorized and requested to mail to each claimant in proceedings before him or the commission, as the case may be, notice (in English, German, or Hungarian) of the provisions of this section. No fee shall be fixed under this subsection unless written request therefor is filed with such official before the expiration of 90 days after the date of mailing of such notice. In the case of nationals of Germany, Austria, and Hungary, such notice may be mailed to, and the written request may be filed by, the duly accredited diplomatic representative of such nation.

"(b) After a fee has been fixed under subsection (a), any person accepting any consideration (whether or not under a contract or agreement entered into prior to the enactment of this act), the aggregate value of which (when added to any consideration previously received) is in excess of the amount so fixed, for services in connection with the proceedings before the arbiter or Mixed Claims Commission or Tripartite Claims Commission, or any preparations therefor, or with the application for payment, or the payment, of any amount under section 2, 3, 5, or 6, shall, upon conviction thereof, be punished by a fine of not more than four times the aggregate value of the consideration accepted by such person therefor.

"(c) Section 20 of the trading with the enemy act, as amended, is amended by inserting after the word 'attorney' wherever it appears in such section the words 'at law or in fact.'

INVESTMENT OF FUNDS BY ALIEN PROPERTY CUSTODIAN

"SEC. 10. The trading with the enemy act, as amended, is amended by adding thereto the following new section:

"'SEC. 25. (a) (1) The Alien Property Custodian is authorized and directed to invest, from time to time upon the request of the Secretary of the Treasury, out of the funds held by the Alien Property Custodian or by the Treasurer of the United States for the Alien Property Custodian, an amount not to exceed $40,000,000 in the aggregate, in one or more participating certificates issued by the Secretary of the Treasury in accordance with the provisions of this section.

"'(2) When in the case of any trust written consent under subsection (m) of section 9 has been filed, an amount equal to the portion of such trust the return of which is temporarily postponed under such subsection shall be credited against the investment made under paragraph (1) of this subsection. If the total amount so credited is in excess of the amount invested under paragraph (1) of this subsection, the excess shall be invested by the Alien Property Custodian in accordance with the provisions of this subsection, without regard to the $40,000,000 limitation in paragraph (1). If the amount invested under paragraph (1) of this subsection is in excess of the total amount so credited, such excess shall, from time to time on request of the Alien Property Custodian, be paid to him out of the funds in the German special-deposit account created by section 4 of the settlement of war claims act of 1928, and such payments shall have priority over any payments therefrom other than the payments under paragraph (1) of subsection (c) of such section (relating to expenses of administration).

"'(b) The Alien Property Custodian is authorized and directed to invest, in one or more participating certificates issued

by the Secretary of the Treasury, out of the unallocated interest fund, as defined in section 28—

"'(1) The sum of $25,000,000. If, after the allocation under section 26 has been made, the amount of the unallocated interest fund allocated to the trusts described in subsection (c) of such section is found to be in excess of $25,000,000, such excess shall be invested by the Alien Property Custodian in accordance with the provisions of this subsection. If the amount so allocated is found to be less than $25,000,000, any participating certificate or certificates that have been issued shall be corrected accordingly; and

"'(2) The balance of such unallocated interest fund remaining after the investment provided for in paragraph (1) and the payment of allocated earnings in accordance with the provisions of subsection (b) of section 26 have been made.

"'(c) If the amount of such unallocated interest fund, remaining after the investment required by paragraph (1) of subsection (b) of this section has been made, is insufficient to pay the allocated earnings in accordance with subsection (b) of section 26, then the amount necessary to make up the deficiency shall be paid out of the funds in the German special deposit account created by section 4 of the settlement of war claims act of 1928, and such payment shall have priority over any payments therefrom other than the payments under paragraph (1) of subsection (c) of such section (relating to expenses of administration) and the payments under paragraph (2) of subsection (a) of this section.

"'(d) The Alien Property Custodian is authorized and directed (after the payment of debts under section 9) to transfer to the Secretary of the Treasury, for deposit in such special deposit account, all money and the proceeds of all property, including all income, dividends, interest, annuities, and earnings accumulated in respect thereof, owned by the German Government or any member of the former ruling family. All money and other property shall be held to be owned by the German Government (1) if no claim thereto has been filed with the Alien Property Custodian prior to the expiration of one year from the date of the enactment of the settlement of war claims act of 1928, or (2) if any claim has been filed before the expiration of such period (whether before or after the enactment of such act), then if the ownership thereof under any such claim is not established by a decision of the Alien Property Custodian or by suit in court instituted, under section 9, within one year after the decision of the Alien Property Custodian, or after the date of the enactment of the settlement of war claims act of 1928, whichever date is later. The amounts so transferred under this subsection shall be credited upon the final payment due the United States from the German Government on account of the awards of the Mixed Claims Commission.

"'(e) The Secretary of the Treasury is authorized and directed to issue to the Alien Property Custodian, upon such terms and conditions and under such regulations as the Secretary of the Treasury may prescribe, one or more participating certificates, bearing interest payable annually (as nearly as may be) at the rate of 5 per cent per annum, as evidence of the investment by the Alien Property Custodian under subsection (a), and one or more noninterest-bearing, participating certificates, as evidence of the investment by the Alien Property Custodian under subsection (b). All such certificates shall evidence a participating interest, in accordance with, and subject to the priorities of, the provisions of section 4 of the settlement of war claims act of 1928, in the funds in the German special deposit account created by such section, except that—

"'(1) The United States shall assume no liability, directly or indirectly, for the payment of any such certificates, or of the interest thereon, except out of funds in such special deposit account available therefor, and all such certificates shall so state on their face; and

"'(2) Such certificates shall not be transferable, except that the Alien Property Custodian may transfer any such participating certificate evidencing the interest of a substantial number of the owners of the money invested, to a trustee duly appointed by such owners.

"'(f) Any amount of principal or interest paid to the Alien Property Custodian in accordance with the provisions of subsection (c) of section 4 of the settlement of war claims act of 1928 shall be allocated pro rata among the persons filing written consents under subsection (m) of section 9 of this act, and the amounts so allocated shall be paid to such persons. If any person to whom any amount is payable under this subsection has died (or if, in the case of a partnership, association, or other unincorporated body of individuals, or a corporation, its existence has terminated), payment shall be made to the persons determined by the Alien Property Custodian to be entitled thereto.

"'(g) The Alien Property Custodian is authorized and directed (after the payment of debts under section 9) to transfer to the Secretary of the Treasury, for deposit in the special deposit account (Austrian or Hungarian, as the case may be), created by section 7 of the settlement of war claims act of 1928, all money and the proceeds of all property, including all income, dividends, interest, annuities, and earnings accumulated in respect thereof, owned by the Austrian Government or any corporation all the stock of which was owned by or on behalf of the Austrian Government (including the property of the Imperial Royal Tobacco Monopoly, also known under the name of K. K. Oesterreichische Tabak Regie), or owned by the Hungarian Government or by any corporation all the stock of which was owned by or on behalf of the Hungarian Government.'

RETURN TO NATIONALS OF GERMANY, AUSTRIA, AND HUNGARY OF PROPERTY HELD BY ALIEN PROPERTY CUSTODIAN

"SEC. 11. Subsection (b) of section 9 of the trading with the enemy act, as amended, is amended by striking out the punctuation at the end of paragraph (11) and inserting in lieu thereof a semicolon and the word "or" and inserting after paragraph (11) the following new paragraphs:

"'(12) A partnership, association, or other unincorporated body of individuals, or a corporation, and was entirely owned at such time by subjects or citizens of nations, States, or free cities other than Austria or Hungary or Austria-Hungary and is so owned at the time of the return of its money or other property, and has filed the written consent provided for in subsection (m); or

"'(13) A partnership, association, or other unincorporated body of individuals, having its principal place of business at such time within any country other than Austria, Hungary, or Austria-Hungary, or a corporation organized or incorporated within any country other than Austria, Hungary, or Austria-Hungary, and that the written consent provided for in subsection (m) has been filed; or

"'(14) Any individual who at such time was a citizen or subject of Germany or who at the time of the return of any money or other property is a citizen or subject of Germany or is not a citizen or subject of any nation, State, or free city, and that the written consent provided for in subsection (m) has been filed; or

"'(15) The Austro-Hungarian Bank, except that the money or other property thereof shall be returned only to the liquidators thereof; or

"'(16) An individual, partnership, association, or other unincorporated body of individuals, or a corporation, and that the written consent provided for in subsection (m) has been filed, and that no suit or proceeding against the United States or any agency thereof is pending in respect of such return, and that such individual has filed a written waiver renouncing on behalf of himself, his heirs, successors, and assigns any claim based upon the fact that at the time of such return he was in fact entitled to such return under any other provision of this act; or

"'(17) A partnership, association, or other unincorporated body of individuals, or a corporation, and was entirely owned at such time by citizens of Austria and is so owned at the time of the return of its money or other property; or

"'(18) A partnership, association, or other unincorporated body of individuals, having its principal place of business at such time within Austria, or a corporation organized or incorporated within Austria; or

"'(19) An individual who at such time was a citizen of Austria or who at the time of the return of any money or other property is a citizen of Austria; or

"'(20) A partnership, association, or other unincorporated body of individuals, or a corporation, and was entirely owned at such time by citizens of Hungary and is so owned at the time of the return of its money or other property; or

"'(21) A partnership, association, or other unincorporated body of individuals, having its principal place of business at such time within Hungary, or a cooperation organized or incorporated within Hungary; or

"'(22) An individual who at such time was a citizen of Hungary or who, at the time of the return of any money or other property, is a citizen of Hungary;—'

"SEC. 12. (a) Subsection (d) of section 9 of the trading with the enemy act, as amended, is amended to read as follows:

"'(d) Whenever an individual, deceased, would have been entitled, if living, to the return of any money or other property without filing the written consent provided for in subsection (m), then his legal representative may proceed for the return of such money or other property in the same manner as such individual might proceed if living, and such money or other property may be returned to such legal representative without requiring the appointment of an administrator, or an ancillary

administrator, by a court in the United States, or to any such ancillary administrator, for distribution directly to the persons entitled thereto. Return in accordance with the provisions of this subsection may be made in any case where an application or court proceeding by any legal representative, under the provisions of this subsection before its amendment by the settlement of war claims act of 1928, is pending and undetermined at the time of the enactment of such act. All bonds or other security given under the provisions of this subsection before such amendment shall be canceled or released and all sureties thereon discharged.'

"(b) Subsection (e) of section 9 of the trading with the enemy act, as amended, is amended by striking out the period at the end thereof and inserting a semicolon and the following: 'nor shall a debt be allowed under this section unless notice of the claim has been filed, or application therefor has been made, prior to the date of the enactment of the settlement of war claims act of 1928.'

"(c) Subsection (g) of section 9 of the trading with the enemy act, as amended, is amended to read as follows:

"'(g) Whenever an individual, deceased, would have been entitled, if living, to the return of any money or other property upon filing the written consent provided for in subsection (m), then his legal representative may proceed for the return of such money or other property in the same manner as such individual might proceed if living, and such money or other property may be returned, upon filing the written consent provided for in subsection (m), to such legal representative without requiring the appointment of an administrator, or an ancillary administrator, by a court in the United States, or to any such ancillary administrator, for distribution to the persons entitled thereto. This subsection shall not be construed as extinguishing or diminishing any right which any citizen of the United States may have had under this subsection prior to its amendment by the settlement of war claims act of 1928 to receive in full his interest in the property of any individual dying before such amendment.'

"SEC. 13. Subsections (j) and (k) of section 9 of the trading with the enemy act, as amended, are amended so as to comprise three subsections, to read as follows:

"'(j) The Alien Property Custodian is authorized and directed to return to the person entitled thereto, whether or not an enemy or ally of enemy and regardless of the value, any patent, trade-mark, print, label, copyright, or right therein or claim thereto, which was conveyed, transferred, assigned, or delivered to the Alien Property Custodian, or seized by him, and which has not been sold, licensed, or otherwise disposed of under the provisions of this act, and to return any such patent, trade-mark, print, label, copyright, or right therein or claim thereto, which has been licensed, except that any patent, trade-mark, print, label, copyright, or right therein or claim thereto, which is returned by the Alien Property Custodian and which has been licensed, or in respect of which any contract has been entered into, or which is subject to any lien or encumbrance, shall be returned subject to the license, contract, lien, or encumbrance.

"'(k) Except as provided in section 27, paragraphs (12) to (22), both inclusive, of subsection (b) of this section shall apply to the proceeds received from the sale, license, or other disposition of any patent, trade-mark, print, label, copyright, or right therein or claim thereto, conveyed, transferred, assigned, or delivered to the Alien Property Custodian, or seized by him.

"'(l) This section shall apply to royalties paid to the Alien Property Custodian, in accordance with a judgment or decree in a suit brought under subsection (f) of section 10; but shall not apply to any other money paid to the Alien Property Custodian under section 10.'

"SEC. 14. Section 9 of the trading with the enemy act, as amended, is amended by adding at the end thereof the following new subsections:

"'(m) No money or other property shall be returned under paragraphs (12), (13), (14), or (16) of subsection (b) or under subsection (g) or (n) or (to the extent therein provided) under subsection (p), unless the person entitled thereto files a written consent to a postponement of the return of an amount equal to 20 per cent of the aggregate value of such money or other property (at the time, as nearly as may be, of the return), as determined by the Alien Property Custodian, and the investment of such amount in accordance with the provisions of section 25. Such amount shall be deducted from the money to be returned to such person, so far as possible, and the balance shall be deducted from the proceeds of the sale of so much of the property as may be necessary, unless such person pays the balance to the Alien Property Custodian, except that no property shall be so sold prior to the expiration of six years from the date of the enactment of the settlement of war claims act of 1928 without the consent of the person entitled thereto. The amounts so deducted shall be returned to the persons entitled thereto as provided in subsection (f) of section 25. The sale of any such property shall be made in accordance with the provisions of section 12, except that the provisions of such section relating to sales or resales to, or for the benefit of, citizens of the United States shall not be applicable. If such aggregate value of the money or other property to be returned under paragraphs (12), (13), (14), or (16) of subsection (b) or under subsection (g) is less than $2,000, then the written consent shall not be required and the money or other property shall be returned in full without the temporary retention and investment of 20 per cent thereof.

"'(n) In the case of property consisting of stock or other interest in any corporation, association, company, or trust, or bonded or other indebtedness thereof, evidenced by certificates of stock or by bonds or by other certificates of interest therein or indebtedness thereof, or consisting of dividends or interest or other accruals thereon, where the right, title, and interest in the property (but not the actual certificate or bond or other certificate of interest or indebtedness) was conveyed, transferred, assigned, delivered, or paid to the Alien Property Custodian, or seized by him, if the President determines that the owner thereof or of any interest therein has acquired such ownership by assignment, transfer, or sale of such certificate or bond or other certificate of interest or indebtedness (it being the intent of this subsection that such assignment, transfer, or sale shall not be deemed invalid hereunder by reason of such conveyance, transfer, assignment, delivery, or payment to the Alien Property Custodian or seizure by him), and that the written consent provided for in subsection (m) has been filed, then the President may make in respect of such property an order of the same character, upon the same conditions, and with the same effect, as in cases provided for in subsection (b), including the benefits of subsection (c).

"'(o) The provisions of paragraph (12), (13), (14), (17), (18), (19), (20), (21), or (22) of subsection (b), or of subsection (m) or (n) of this section, and (except to the extent therein provided) the provisions of paragraph (16) of subsection (b), shall not be construed as diminishing or extinguishing any right under any other provision of this act in force immediately prior to the enactment of the settlement of war claims act of 1928.

"'(p) The Alien Property Custodian shall transfer the money or other property in the trust of any partnership, association, or other unincorporated body of individuals, or corporation, the existence of which has terminated, to trusts in the names of the persons (including the German Government and members of the former ruling family) who have succeeded to its claim or interest; and the provisions of subsection (a) of this section relating to the collection of a debt (by order of the President or of a court) out of money or other property held by the Alien Property Custodian or the Treasurer of the United States shall be applicable to the debts of such successor and any such debt may be collected out of the money or other property in any of such trusts if not returnable under subsection (a) of this section. Subject to the above provisions as to the collection of debts, each such successor (except the German Government and members of the former ruling family) may proceed for the return of the amount so transferred to his trust, in the same manner as such partnership, association, or other unincorporated body of individuals, or corporation might proceed if still in existence. If such partnership, association, or other unincorporated body of individuals, or corporation, would have been entitled to the return of its money or other property only upon filing the written consent provided for in subsection (m), then the successor shall be entitled to the return under this subsection only upon filing such written consent.

"'(q) The return of money or other property under paragraph (15), (17), (18), (19), (20), (21), or (22) of subsection (b) (relating to the return to Austrian and Hungarian nationals) shall be subject to the limitations imposed by subsections (d) and (e) of section 7 of the settlement of war claims act of 1928.'

"SEC. 15. The trading with the enemy act, as amended, is amended by adding thereto the following new sections:

"'SEC. 26. (a) The Alien Property Custodian shall allocate among the various trusts the funds in the "unallocated interest fund" (as defined in section 28). Such allocation shall be based upon the average rate of earnings (determined by the Secretary of the Treasury) on the total amounts deposited under section 12.

"'(b) The Alien Property Custodian, when the allocation has been made, is authorized and directed to pay to each person entitled, in accordance with a final decision of a court of the United States or of the District of Columbia, or of an opinion

of the Attorney General, to the distribution of any portion of such unallocated interest fund, the amount allocated to his trust, except as provided in subsection (c) of this section.

"'(c) In the case of persons entitled, under paragraph (12), (13), (14), or (16) of subsection (b) of section 9, to such return, and in the case of persons who would be entitled to such return thereunder if all such money or property had not been returned under paragraph (9) or (10) of such subsection, and in the case of persons entitled to such return under subsection (n) of section 9, an amount equal to the aggregate amount allocated to their trusts shall be credited against the sum of $25,000,000 invested in participating certificates under paragraph (1) of subsection (b) of section 25. If the aggregate amount so allocated is in excess of $25,000,000, an amount equal to the excess shall be invested in the same manner. Upon the repayment of any of the amounts so invested, under the provisions of section 4 of the settlement of war claims act of 1928, the amount so repaid shall be distributed pro rata among such persons, notwithstanding any receipts or releases given by them.

"'(d) The unallocated interest fund shall be available for carrying out the provisions of this section, including the expenses of making the allocation.

"'SEC. 27. The Alien Property Custodian is authorized and directed to return to the United States any consideration paid to him by the United States under any license, assignment, or sale by the Alien Property Custodian to the United States of any patent (or any right therein or claim thereto, and including an application therefor and any patent issued pursuant to any such application).

"'SEC. 28. As used in this act, the term "unallocated interest fund" means the sum of (1) the earnings and profits accumulated prior to March 4, 1923, and attributable to investments and reinvestments under section 12 by the Secretary of the Treasury, plus (2) the earnings and profits accumulated on or after March 4, 1923, in respect of the earnings and profits referred to in clause (1) of this section.

"'SEC. 29. (a) Where the Alien Property Custodian has made demand or requirement for the conveyance, transfer, assignment, delivery, or payment to him of any money or other property of any enemy or ally of enemy (whether or not suit or proceeding for the enforcement thereof has been begun and whether or not any judgment or decree in respect thereof has been made or entered) and where the whole or any part of such money or other property would, if conveyed, transferred, assigned, delivered, or paid to him, be returnable under any provision of this act, the Alien Property Custodian may, in his discretion, and on such terms and conditions as he may prescribe, waive such demand or requirement, or accept in full satisfaction of such demand, requirement, judgment, or decree, a less amount than that demanded or required by him.

"'(b) The Alien Property Custodian shall not make any such waiver or compromise except with the approval of the Attorney General; nor (if any part of such money or property would be returnable only upon the filing of the written consent required by subsection (m) of section 9) unless, after compliance with the terms and conditions of such waiver or compromise, the Alien Property Custodian or the Treasurer of the United States will hold (in respect of such enemy or ally of enemy) for investment as provided in section 25, an amount equal to 20 per cent of the sum of (1) the value of the money or other property held by the Alien Property Custodian or the Treasurer of the United States at the time of such waiver or compromise, plus (2) the value of the money or other property to which the Alien Property Custodian would be entitled under such demand or requirement if the waiver or compromise had not been made.

"'(c) Where the Alien Property Custodian has made demand or requirement for the conveyance, transfer, assignment, delivery, or payment to him of any money or other property of any enemy or ally of enemy (whether or not suit or proceeding for the enforcement thereof has been begun and whether or not any judgment or decree in respect thereof has been made or entered) and where the interest or right of such enemy or ally of enemy in such money or property has not, prior to the enactment of the settlement of war claims act of 1928, vested in enjoyment, the Alien Property Custodian may, in his discretion, and on such terms and conditions as he may prescribe, waive such demand and requirement, without compliance with the requirements of subsection (b) of this section, but only with the approval of the Attorney General.

"'(d) Nothing in this section shall be construed as requiring the Alien Property Custodian to make any waiver or compromise authorized by this section, and the Alien Property Custodian may proceed in respect of any demand or requirement referred to in subsection (a) or (c) as if this section had not been enacted.

"'(e) All money or other property received by the Alien Property Custodian as a result of any action or proceeding—whether begun before or after the enactment of the settlement of war claims act of 1928, and whether or not for the enforcement of a demand or requirements as above specified—shall for the purposes of this act be considered as forming a part of the trust in respect of which such action or proceeding was brought, and shall be subject to return in the same manner and upon the same conditions as any other money or property in such trust, except as otherwise provided in subsection (b) of this section.

"'SEC. 30. Any money or other property returnable under subsection (b) or (n) of section 9 shall, at any time prior to such return, be subject to attachment in accordance with the provisions of the code of law for the District of Columbia, as amended, relating to attachments in suits at law, and to attachments for the enforcement of judgments at law and decrees in equity, but any writ of attachment or garnishment issuing in any such suit, or for the enforcement of any judgment or decree, shall be served only upon the Alien Property Custodian, who shall for the purposes of this section be considered as holding credits in favor of the person entitled to such return to the extent of the value of the money or other property so returnable. Nothing in this section shall be construed as authorizing the taking of actual possession, by any officer of any court, of any money or other property held by the Alien Property Custodian or by the Treasurer of the United States.

"'SEC. 31. As used in this act, the term "member of the former ruling family" means (1) any person who was at any time between April 6, 1917, and July 2, 1921, the German Emperor or the ruler of any constituent kingdom of the German Empire, or (2) the wife or any child of such person.'

FUGITIVES FROM JUSTICE

"SEC. 16. Section 22 of the trading with the enemy act, as amended, is amended to read as follows:

"'SEC. 22. No person shall be entitled to the return of any property or money under any provision of this act, or any amendment of this act, who is a fugitive from justice of the United States or any State or Territory thereof, or the District of Columbia.'

RETURN OF INCOME

"SEC. 17. Section 23 of the trading with the enemy act, as amended, is amended to read as follows:

"'SEC. 23. The Alien Property Custodian is directed to pay to the person entitled thereto, from and after March 4, 1923, the net income (including dividends, interest, annuities, and other earnings), accruing and collected thereafter, in respect of any money or property held in trust for such person by the Alien Property Custodian or by the Treasurer of the United States for the account of the Alien Property Custodian, under such rules and regulations as the President may prescribe.'

TAXES

"SEC. 18. Section 24 of the trading with the enemy act, as amended, is amended by inserting '(a)' after the section number and by adding at the end of such section new subsections to read as follows:

"'(b) In the case of income, war-profits, excess-profits, or estate taxes imposed by any act of Congress, the amount thereof shall, under regulations prescribed by the Commissioner of Internal Revenue with the approval of Secretary of the Treasury, be computed in the same manner (except as hereinafter in this section provided) as though the money or other property had not been seized by or paid to the Alien Property Custodian, and shall be paid, as far as practicable, in accordance with subsection (a) of this section. Pending final determination of the tax liability the Alien Property Custodian is authorized to return, in accordance with the provisions of this act, money or other property in any trust in such amounts as may be determined, under regulations prescribed by the Commissioner of Internal Revenue with the approval of the Secretary of the Treasury, to be consistent with the prompt payment of the full amount of the internal-revenue taxes.

"(c) So much of the net income of a taxpayer for the taxable year 1917, or any succeeding taxable year, as represents the gain derived from the sale or exchange by the Alien Property Custodian of any property conveyed, transferred, assigned, delivered, or paid to him, or seized by him, may at the option of the taxpayer be segregated from the net income and separately taxed at the rate of 30 per cent. This subsection shall be applied and the amount of net income to be so segregated shall be determined, under regulations prescribed by the Commissioner of Internal Revenue with the approval of the Secretary of the

Treasury, as nearly as may be in the same manner as provided in section 208 of the revenue act of 1926 (relating to capital net gains), but without regard to the period for which the property was held by the Alien Property Custodian before its sale or exchange, and whether or not the taxpayer is an individual.

"(d) Any property sold or exchanged by the Alien Property Custodian (whether before or after the date of the enactment of the settlement of war claims act of 1928) shall be considered as having been compulsory or involuntarily converted, within the meaning of the income, excess-profits, and war-profits tax laws and regulations; and the provisions of such laws and regulations relating to such a conversion shall (under regulations prescribed by the Commissioner of Internal Revenue with the approval of the Secretary of the Treasury) apply in the case of the proceeds of such sale or exchange. For the purpose of determining whether the proceeds of such conversion have been expended within such time as will entitle the taxpayer to the benefits of such laws and regulations relating to such a conversion, the date of the return of the proceeds to the person entitled thereto shall be considered as the date of the conversion.

"(e) In case of any internal-revenue tax imposed in respect of property conveyed, transferred, assigned, delivered, or paid to the Alien Property Custodian, or seized by him, and imposed in respect of any period (in the taxable year 1917 or any succeeding taxable year) during which such property was held by him or by the Treasurer of the United States, no interest or civil penalty shall be assessed upon, collected from, or paid by or on behalf of, the taxpayer; nor shall any interest be credited or paid to the taxpayer in respect of any credit or refund allowed or made in respect of such tax.

"'(f) The benefits of subsections (c), (d), and (e) shall be extended to the taxpayer if claim therefor is filed before the expiration of the period of limitations properly applicable thereto, or before the expiration of six months after the date of the enactment of the settlement of war claims act of 1928, whichever date is the later. The benefits of subsection (d) shall also be extended to the taxpayer if claim therefor is filed before the expiration of six months after the return of the proceeds.'

"SEC. 19. Subsection (f) of section 10 of the trading with the enemy act, as amended, is amended by adding at the end thereof the following new paragraph:

"'In the case of any such patent, trade-mark, print, label, or copyright, conveyed, assigned, transferred, or delivered to the Alien Property Custodian or seized by him, any suit brought under this subsection, within the time limited therein, shall be considered as having been brought by the owner within the meaning of this subsection, in so far as such suit relates to royalties for the period prior to the sale by the Alien Property Custodian of such patent, trade-mark, print, label, or copyright, if brought either by the Alien Property Custodian or by the person who was the owner thereof immediately prior to the date such patent, trade-mark, print, label, or copyright was seized or otherwise acquired by the Alien Property Custodian.'

"SEC. 20. The proviso of paragraph (10) of subsection (b) of section 9 of the trading with the enemy act, as amended (relating to the return to certain insurance companies), is repealed.

SHIP CLAIMS OF FORMER GERMAN NATIONALS

"SEC. 21. (a) It shall be the duty of the arbiter to hear the claims of any partnership, association, joint-stock company, or corporation, and to determine the amount of compensation to be paid to it by the United States, in respect of the merchant vessels *Carl Diederichsen* and *Johanne* (including any equipment, appurtenances, and property contained therein), title to which was taken by or on behalf of the United States under the authority of the joint resolution of May 12, 1917, and which were subsequently sold by or on behalf of the United States. Such compensation shall be determined as provided in paragraph (1) of subsection (b) of section 3 of this act, but the aggregate compensation shall not exceed, in the case of the *Carl Diederichsen*, $166,787.78 and in the case of the *Johanne*, $174,600 (such amounts being the price for which the vessels were sold, less the cost of reconditioning). The arbiter shall not make any award under this section in respect of the claim of any partnership, association, joint-stock company, or corporation unless it appears to his satisfaction that all its members and stockholders who were, on April 6, 1917, citizens or subjects of Germany, became, by virtue of any treaty of peace or plebiscite held or further treaty concluded under such treaty of peace, citizens or subjects of any nation other than Germany, and that all its members and stockholders on the date of the enactment of this act were on such date citizens or subjects of nations other than Germany.

"(b) Upon the determination by him of such compensation the arbiter shall enter an award in favor of such person of the amount of such compensation and shall certify such award to the Secretary of the Treasury. The amount of such award, together with interest thereon, at the rate of 5 per cent per annum, from July 2, 1921, until the date of such payment, shall be paid by the Secretary of the Treasury, in accordance with such regulations as he may prescribe. There is authorized to be appropriated such amount as may be necessary to make such payment.

"(c) No payment shall be made in respect of any award under this section unless application therefor is made, within two years after the date such award is certified, in accordance with such regulations as the Secretary of the Treasury may prescribe, and payment shall be made only to the person on behalf of whom the award was made except in the cases specified in paragraphs (1) to (4) of subsection (k) of section 3. The provisions of subsections (c), (l), (m), (o), and (r) of section 3 shall be applicable in carrying out the provisions of this section.

"(d) The provisions of this section shall constitute the exclusive method for the presentation and payment of claims arising out of any of the acts by or on behalf of the United States for which this section provides a remedy. Any person who files any claim or makes application for any payment under this section shall be held to have consented to all the provisions of this act. This subsection shall not bar the presentation of a claim under section 3 (relating to the ship claims of German nationals) in respect of the taking of the vessel *Carl Diederichsen* or the vessel *Johanne;* but no award shall be made under section 3 in respect of either of such vessels to or on behalf of any person to whom or on whose behalf an award is made under this section in respect of such vessel.

DEFINITIONS

"SEC. 22. As used in this act—

"(a) The term 'person' means an individual, partnership, association, or corporation.

"(b) The term 'German national' means—

"(1) An individual who, on April 6, 1917, was a citizen or subject of Germany, or who, on the date of the enactment of this act, is a citizen or subject of Germany.

"(2) A partnership, association, or corporation, which on April 6, 1917, was organized or created under the law of Germany.

"(3) The Government of Germany.

"(c) The term 'member of the former ruling family' means (1) any person who was at any time between April 6, 1917, and July 2, 1921, the German Emperor or the ruler of any constituent kingdom of the German Empire, or (2) the wife or any child of such person.

"(d) The term 'Austrian national' means—

"(1) An individual who, on December 7, 1917, was a citizen of Austria, or who, on the date of the enactment of this act, is a citizen of Austria.

"(2) A partnership, association, or corporation which on December 7, 1917, was organized or created under the law of Austria.

"(3) The Government of Austria.

"(e) The term 'Hungarian national' means—

"(1) An individual who, on December 7, 1917, was a citizen of Hungary, or who, on the date of the enactment of this act, is a citizen of Hungary.

"(2) A partnership, association, or corporation which, on December 7, 1917, was organized or created under the law of Hungary.

"(3) The Government of Hungary.

"(f) The term 'United States' when used in a geographical sense includes the Territories and possessions of the United States and the District of Columbia.

LEGISLATIVE COUNSEL AND SPECIAL ASSISTANT TO SECRETARY OF THE TREASURY

"SEC. 23. (a) Section 1303(d) of the revenue act of 1918, as amended by section 1101 of the revenue act of 1924, is amended by adding at the end thereof a sentence to read as follows: 'Notwithstanding the foregoing provisions, the compensation of each of the two legislative counsel in office upon the date of the enactment of the settlement of war claims act of 1928 shall, after such date, be at the rate of $10,000 a year.'

"(b) The salary of the special assistant to the Secretary of the Treasury in matters of legislation, so long as the position is held by the present incumbent, shall be at the rate of $10,000 a year."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate to the title, and agree to the same.

W. R. GREEN,
W. C. HAWLEY,
ALLEN T. TREADWAY,
JOHN N. GARNER,
J. W. COLLIER,
Managers on the part of the House.

REED SMOOT,
CHARLES CURTIS,
DAVID A. REED,
PETER G. GERRY,
PAT HARRISON,
Managers on the part of the Senate.

Mr. SMOOT. Mr. President, in presenting the report of the conference on the settlement of war claims act, it may be well for me to explain briefly the action of the conference. The differences between the Senate and the House were not great and, except in one or two instances, occasioned practically no difficulties.

DECLARATION OF POLICY

The Senate struck out the declaration of policy contained in section 2 of the House bill, and the House receded.

AUSTRIA AND HUNGARY

The Senate adopted a series of amendments relating to the Austrian and Hungarian situation; and the House accepted all of them. Under the bill, consequently, all the property held by the Alien Property Custodian of Austrian or Hungarian nationals, including their proper share of the unallocated interest fund, will be returned and all claims of their nationals against the United States for patents used or purchased by the United States will be adjudicated and paid in full as soon as their government provides for the payment of the claims of American nationals.

CLAIMS OF AMERICAN NATIONALS AGAINST GERMANY

The Senate amendment contained a provision intended to relieve the situation occasioned by the failure of American claimants to file their claims within the six months' period specified in the exchange of notes at the time of signing the agreement creating the Mixed Claims Commission. This provision requests the President to enter into negotiations with the German Government with a view to extending the time so that claims otherwise within the jurisdiction of the Mixed Claims Commission can be considered by it if presented at any time prior to July 1, 1928. This provision was accepted by the House with an amendment providing for the filing of the claims with the State Department rather than their presentation to the Mixed Claims Commission, prior to July 1, 1928. Claims which have already been filed with the State Department should be presented by the State Department to the Mixed Claims Commission without imposing upon the claimants the additional burden of again filing their claims.

The Senate authorized the Secretary of the Treasury to make payments to American claimants under paragraph (5) of subsection (c) of section 4, without waiting for the Mixed Claims Commission to complete its consideration of the claims presented to it. This provision should expedite payments to American citizens considerably and was accepted by the House.

The Senate also provided that $40,000,000 of the funds in the hands of the Alien Property Custodian should be immediately available for the payment of awards of the Mixed Claims Commission, without awaiting the decisions of the Alien Property Custodian upon the claims filed with him. The House receded.

CLAIMS OF GERMAN NATIONALS AGAINST THE UNITED STATES

The Senate provided that the appointment of the arbiter, who is to adjudicate the claims against the United States for ships, patents, and the radio station, should be subject to confirmation by the Senate. This provision was accepted.

The Senate provisions for the appointment of a special counsel to represent the United States in the proceedings before the arbiter were eliminated.

The provisions of the Senate proposing to adjudicate and pay claims on account of the Tuckerton radio station were also stricken out.

The Senate provided that the awards of the arbiter should include interest to January 1, 1929, instead of to January 1, 1928, as in the House bill, so as to include an additional year's interest in the maximum limitation. This provision was accepted.

The Senate amendment provided that the findings of the Naval Board of Survey as to the values of the ships should be competent evidence in the proceedings before the arbiter. The House accepted this provision.

The Senate amendment placed upon the claimants before the arbiter the burden of proving that neither the German Government nor any member of the former ruling family had any interest, direct or indirect, in the ships; and the House receded.

The Senate also inserted a definition of the term "member of the former ruling family," to be applicable to claims before the arbiter and also to the return of property held by the Alien Property Custodian. The rulers of the constituent States of the German Empire were included in the definition, the effect of which was to prevent the payment of any compensation or the return of any alien property to them. The provisions of the House bill had limited the term to the German Emperor and his family. The conference action proposes to amend the Senate definition so that it will be applicable only to the German Emperor and the Kings of the three constituent kingdoms—Bavaria, Saxony, and Wurttemberg, the Emperor having been also the King of Prussia—and their wives and children.

The Senate inserted a separate section providing for the payment of compensation on account of two ships which were owned by German associations or corporations all the German members of which became, under the plebiscite under the Versailles treaty, citizens of Denmark, and who are, on the date that the bill becomes law, citizens of a country other than Germany. This provision was accepted by the House with an amendment making it clear that all the interests on the date that the bill becomes law are non-German, whether or not the individuals now having an interest are the same as those formerly having an interest.

RETURN OF ALIEN PROPERTY

The Senate amendment provided that all property held by the Alien Property Custodian should be considered as the property of the German Government if a claim therefor was not filed within six months or if the ownership thereof was not established under a claim duly filed. The House accepted this provision with amendments permitting claims to be filed within one year after the bill becomes law and providing that if a claim is or has been filed, the ownership must be established by a decision of the Alien Property Custodian or by a court decision in an action heretofore instituted, or instituted within one year after the decision of the Alien Property Custodian, or, in cases where the custodian has already decided the claim, then if instituted within one year from the date on which the bill becomes law. No limitation is imposed, of course, upon the time within which the Alien Property Custodian must reach his decision.

The Senate amendment enlarged paragraph (16) of subsection (b) of section 9 of the trading with the enemy act, so that any individual, partnership, association, or corporation could elect to apply for the return of property under this paragraph, without proof of citizenship or nationality, if they were willing to file the written consent to the retention of 20 per cent of the property. The House receded.

The Senate provided in its amendment to subsections (d), (g), and (p) of section 9 of the trading with the enemy act that in the case of the dissolution of the partnership, association, or corporation the successors in interest would proceed for the return in the same manner as the original owner, and that the right to the return of all or a part of the property would be dependent upon the status of the former owner, rather than the status of the successors in interest. This provision was accepted by the House.

The Senate provided that trusts of less than $2,000 could be returned to German nationals in full. The House receded.

The Senate removed the limitations in section 12 of the trading with the enemy act upon sales by the Alien Property Custodian, so that the sales would not be restricted to American citizens. This provision was accepted.

The Senate authorized the Alien Property Custodian to waive or compromise outstanding demands or actions in any case with the approval of the Attorney General, and also permitted the waiver of outstanding demands for interest not vested in enjoyment, without regard to the provisions requiring the Alien Property Custodian to hold 20 per cent of the property of German nationals. These provisions were accepted by the House.

The Senate amendment providing that all moneys recovered in suits brought by the Alien Property Custodian should be placed in the trust in respect of which the suit was brought was also accepted by the House.

The Senate amended subsection (f) of section 10 of the trading with the enemy act so as to provide that suits for reasonable royalties brought either by the original owners of the patents or by the Alien Property Custodian should be considered as having been properly brought for the purposes of this section. It will be noted that subsection (1) of section 9, added by section 13 of the bill, provides that royalties recovered by the Alien Property Custodian in suits instituted by him will be

returned under section 9 to the former German owner. The House receded.

The Senate added two provisions relative to the return of money held by the Alien Property Custodian and belonging to insurance companies. During the enactment of the Winslow Act the Senate added a proviso to paragraph (10) of subsection (b) of section 9 of the trading with the enemy act prohibiting the return under this paragraph to insurance companies unless and until the companies paid claims filed against them. The House insisted that this proviso be repealed and accordingly the Senate amendment—section 20 of the Senate bill—was adopted. The Senate also added a provision prohibiting any return to the insurance companies until suits brought against them, in which the statute of limitations was suspended and in which any number of claimants could join, had been satisfied. This provision is eliminated.

In order to afford a remedy for American creditors of persons whose property is held by the Alien Property Custodian, the Senate provided that any money or other property returnable under subsection (b) or (n) of section 9 should be subject to attachment. This provision was accepted by the House, with an amendment making clear that it was also applicable to attachments for the purpose of enforcing judgments or decrees. The Senate amendment also contained a paragraph the effect of which was to make the principles of law and equity in force in the District of Columbia applicable to suits brought against any person to whom any money or other property was returnable involving a purchase of shares in an American corporation. This paragraph was eliminated.

The Senate amendment provided that the participating certificates representing the interest of German nationals in the unallocated interest fund should bear simple interest at the rate of 5 per cent per annum, payable after all other payments under the bill had been completed. This provision was eliminated.

ATTORNEYS' FEES

The Senate bill provided for the fixing of attorneys' fees in every case in the proceedings before the Mixed Claims Commission, the Tripartite Claims Commission, or the arbiter and, in addition to the fine imposed for a violation, provided that any attorney who violates the provisions of the section should be disqualified from practice before the executive departments. This provision was accepted with an amendment providing for the fixing of attorneys' fees only in case of a request from the client within 60 days after the mailing of a notice to him, and imposing as a penalty a fine of not more than four times the amount of the aggregate consideration accepted. It was felt that the ordinary disbarment proceedings were adequate.

FEDERAL TAXATION

The House bill provided that the Federal taxes should be computed in the same manner as though the property had not been seized by the Alien Property Custodian, and should be paid wherever possible out of the funds held by the Alien Property Custodian. The Senate added five qualifications: First, that, in the case of the disposition of capital assets, the rate should not exceed 12½ per cent; second, that the provisions of the regulations and laws relating to involuntary conversion should be applicable; third, that no interest or penalties should be payable by the taxpayer and that no interest on refunds should be payable by the Government; fourth, that claims for refund could be filed within six months after the bill becomes law, notwithstanding the expiration of the ordinary statutory period, and according to the Government the corresponding right to assess within six months; and fifth, that tentative returns could be filed and tentative assessments made, and that the 20 per cent of the property withheld should be retained by the Alien Property Custodian as security for the payment of any deficiency finally determined to be due. The first provision was accepted by the House with an amendment making the maximum rate 30 per cent and also making it certain that it applies to partnerships, associations, and corporations as well as to individuals. The second and third provisions were accepted without change. The fourth provision was amended so as to permit the filing of claims for refund solely for the purpose of obtaining the benefit of the provisions just referred to. A substitute for the fifth provision was agreed to, permitting the return, prior to a final determination of tax liability, under Treasury regulations which will protect the interests of the Government. For example, a partial return could be authorized if the remainder (not including the 20 per cent) would be sufficient to meet the probable tax liability, or if a bond were given in an amount sufficient to cover the probable tax liability.

ABOLITION OF ALIEN PROPERTY CUSTODIAN'S OFFICE

The Senate bill provided that upon the expiration of 18 months the Alien Property Custodian's office should be abolished and its functions transferred to the Treasury Department. This provision is stricken out.

CONCLUSION

I believe that this bill presents one of the most important matters of legislation which have been before Congress. It is far-reaching in international policy, it involves tremendous sums of money, and it affects a vast number of persons. The basic policies of the bill are sound. I am glad, indeed, that it is soon to become law.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

Mr. SHORTRIDGE. Mr. President, it may appear ungracious for me to throw in a discordant note. That it is a very important report which we now have under consideration is manifestly so, and that it has met with the unqualified—I will not say hasty—approval of the Senate conferees is a matter perhaps in doubt. It does not meet with my approval, however, which at this stage of proceedings may be of little consequence. I listened to the Senator from Utah [Mr. SMOOT] in vain to hear some comment in respect of an amendment which was put on the bill and was in the bill when it left the Senate. That amendment was found on pages 104 and 105 of the bill.

Mr. SMOOT. That amendment had reference to money held by the Alien Property Custodian and belonging to certain insurance companies?

Mr. SHORTRIDGE. Yes, sir; my amendment did have reference to certain moneys in the hands of the Alien Property Custodian belonging provisionally to certain fire insurance companies which once operated in California, in San Francisco, and which funds were seized long ago by virtue of an amendment to the trading with the enemy act and held by virtue of an amendment which I caused to be made to what was known as the Winslow bill.

The Senate will recall that it seemed proper and just and perhaps wise to amend the trading with the enemy act so as to permit the withdrawal from the custody of this country of certain property up to, I believe, $10,000, but, due to an amendment which I was happy to have adopted to that proposed amendment of the main act, three German fire-insurance companies were not permitted to avail themselves of the law concerning the withdrawal of funds.

I will trouble those who are listening to recall briefly certain tragic facts. It was on the morning of April 18, 1906, when the earth trembled and in San Francisco there was a great catastrophe. To be very plain about it, there was an earthquake. It was followed by a great and destructive fire, and what was once the beautiful city lay in ashes. The cottage and the palace, the humble church and the noble cathedral, the whole building structure of the city lay in ashes and the people were prostrated by the great catastrophe.

These German fire-insurance companies had outstanding and in full force and effect a great many policies. Such was the distress of the people, such was the pressing necessity resting on them, that, as charged, certain settlements were secured by the gross, the wicked fraud of these companies.

Gentlemen of the highest character, lawyers of eminence representing hundreds of claimants, have asked Congress to withhold money of these companies now in the hands of the Alien Property Custodian until just settlement shall be made with these companies. It is charged, Mr. President, that these settlements were secured by gross fraud, such fraud, indeed, as would cause any court of equity in the civilized world to set them aside. Contracts entered into through false words spoken or true words withholden, contracts entered into through gross misrepresentation of facts, of course will be set aside in any court of equity in any civilized country on the rolling earth.

I will not now take up the time to go into detail as to the nature or character of the fraudulent acts or representations which resulted in these settlements; but perhaps to make the matter clear I should say that under the state of facts and the law it has been necessary, and it is necessary, for these claimants to go into a court of equity and have these contracts set aside. The claimants, however, filed their claims with the Alien Property Custodian; but it was necessary, as stated—and the claimants were so advised—to bring actions in a court of equity, in the Federal court exercising equity jurisdiction, to avoid or set aside these contracts.

Now, what have I asked, and what do these claimants ask, and what was incorporated in this bill as it went from the Senate? It was this:

That these claimants might assign or combine the various claims so that one action might be brought and all contracts determined to be valid or invalid as the truth might develop.

It was a question of law and procedure in the Federal courts as to whether you may thus assign various claims to one who may become the plaintiff in the action. Therefore, the bill asked that all these claims might be combined in one action, thus and thereby saving expense and time of all parties concerned.

What else was asked? This:

Time has run. Time has the habit of running. It is ever on the wing, and therefore it was well understood by everybody that if these citizens of California should go into the court and seek to avoid these fraudulent contracts, these same German fire-insurance companies could and no doubt would interpose the statute of limitations or the equitable defense of laches; wherefore we have asked that as to the statute of limitations or the equitable defense of laches these prospective defendants might not be permitted to interpose either of those defenses.

Mr. KING. Mr. President, will the Senator permit an inquiry?

The PRESIDING OFFICER. Does the Senator from California yield to the Senator from Utah?

Mr. SHORTRIDGE. Certainly.

Mr. KING. Information was brought to my attention during the consideration of the bill in the Finance Committee that most, if not all, of the claims of California citizens for relief were against German companies and some American companies bearing German names that are getting nothing whatever under this bill; in other words, that the two or three insurance companies that have funds in the hands of the Alien Property Custodian did make settlement with all of the persons who were insured by them, paying as much as 75 and 80 per cent, and in some instances more. My information was that there were some companies, however, two or three of them American companies bearing German names, and several German companies, that did not make proper or adequate settlement with their insured, but that those corporations are not beneficiaries under this bill. I should be glad to be advised if such is the fact.

Mr. SHORTRIDGE. I understand that this amendment was introduced, this legislation is sought, in behalf of claimants against three certain companies, and I will advertise them by naming them—the Hamburg-Bremen, the Aschen Munich, and the Prussian National Fire Insurance Cos. This amendment and this proposed legislation refers to and aims at those three companies.

As to other companies referred to by the Senator, there may be other frauds committed. I am not prepared to say, to admit, or to deny. But gentlemen of character—not pettifoggers, not police-court shysters, but lawyers of eminence and established reputation and of learning—have fathered this proposed legislation; and they have said, as I in a poor way have said, that the purpose of this legislation was not to do more than to have a court of equity, a United States court exercising equitable jurisdiction, pass on the merits of certain contracts which, it is alleged, were entered into through gross fraud; and to the end that the court might pass upon the contracts on their merits the Congress was asked to provide in this bill that these companies might not come into court and in effect say, "Yes; we did enter into these contracts through fraud, but the statute of limitations protects us, or the doctrine of laches protects us," and send the complainants away without any relief.

That is all that has been asked—to join in one action all these three or four or five hundred claims, and provide that the statute of limitations or the doctrine of laches might not be interposed to defeat a trial upon the merits.

Now, I will trouble the Senate for a moment longer to say this:

I do not wish to do more than merely ask the Senate in memory to picture conditions in San Francisco as of the time of entering into these contracts. Babylon in all her desolation was not to be compared to the conditions in that once great, majestic, beautiful city. I am grateful and happy to add that she has risen, and stands to-day by the Golden Gate one of the most beautiful cities in all the world. But as of the time these contracts were entered into by these people, they were in great distress. In the contemplated action the court would, of course, consider all the facts laid before it, and if it be that fraud was practiced the court would so determine. As I have said to gentlemen representing these companies, I should think they would welcome an opportunity to show that they had acted in the utmost good faith, to the end that if they are right they would be vindicated, their reputation enhanced, and commercially speaking, they would be benefited. But they have refused and fought against coming into court and laying the cards on the table.

"How was this fraud accomplished?" may still be asked. It was represented that these companies were bankrupt, that they had no funds in America subject to attachment, no funds with which to pay the adjusted claims; and gentlemen here familiar with legal procedure will remember that as of that time—and I think now—a judgment obtained against any one of those companies in America could not be enforced in a German court, as judgments obtained against nationals of Great Britain or Italy or France, for example, could have been and can now be enforced. Under the law as it then was, if you obtained a judgment here in America against one of those companies and proceeded to Germany to enforce it, you had to commence the action anew and try the case de novo. You could not file an exemplified or certified copy of the judgment and then seek execution of it, as you could in a case of a judgment lodged in an English court. Therefore the San Francisco claimants were told, in effect, this: "We have no money here to pay these adjusted losses. You accept this amount or proceed to Germany and enforce your claims there."

In a word, and for brevity, the facts as charged here—and I will not take the time to run over them—if true, I venture to express the opinion, would cause a court of equity to set aside these agreements. But it is not for me to give my opinion or ask the Senate and Congress to rely wholly upon it. The papers in the case set out the facts; the attorneys representing these claimants vouch for them and claim that they can establish them all and are willing to leave the matter, then, to a court of equity.

I was hopeful, Mr. President, that the Senate conferees might persuade the conferees of the House to retain this amendment in whole in the bill, or that the amendment might be modified somewhat along these lines: In so far as the funds now in the possession of the Alien Property Custodian are concerned, let them be released; for these companies now have funds in America. Judgments obtained against them can now be enforced in America; and, therefore, personally, I should have been quite content to have eliminated from the amendment the provision as to holding the funds longer by the custodian, and to provide as follows:

> In any action brought within 90 days after the enactment of this act by one or more persons who, prior to the date of the enactment of this act, have filed with the Alien Property Custodian one or more claims against any insurance partnership, association, or corporation for unpaid amounts for losses or damages caused directly or indirectly by the great San Francisco conflagration of April, 1906, neither the statute of limitations nor laches shall be considered as a defense; and any number of such persons may join in any such action.

That is all we have sought, and therefore I regret exceedingly that the Senate conferees, I will not say surrendered, but, to be milder in expression, yielded to the persuasion or to the threat of the House conferees.

Upon what raw meat do these House conferees feed that they have become so dominant, so aggressive, and so defiant? Is it because they call themselves the popular House? I venture to believe that we are just as popular as they are.

Mr. COPELAND. Does the Senator mean that they are as unpopular as we are?

Mr. SHORTRIDGE. I do not admit that the Senate is unpopular. Look at these galleries. The occupants of them applaud occasionally, and the people afar off approve of us.

I would like to know, however, in my own simple, far western way, why it is that when an amendment is adopted in the Senate at a late hour in the afternoon, without discussion, but, as I claim, a meritorious amendment, the House conferees would not permit any explanation before them. They knew nothing about it. They were in Egyptian darkness.

I understand a suggestion was made that I, or some one better qualified, appear before the conferees and explain this amendment. Upon its face it may not have been fully understood, but it would have been easy for me there, much easier than it has been here, to explain it. It was a very simple amendment, merely providing that various claimants might join in one action and try all these matters in one action; and, secondly, that these defendant companies, charged, I ask Senators to observe, with fraudulent conduct and with bringing about contracts through gross fraud, be not permitted to interpose the statute of limitations or the equitable doctrine of laches as a defense. That is all that was asked. Yet I am told that the House conferees, with a sort of lordly attitude, refused to permit any discussion or any argument, or to receive any information in respect of this amendment. If I do them wrong, I am at fault; and, of course, will prostrate myself in begging forgiveness.

Mr. CARAWAY. Mr. President, will the Senator permit me to ask a question?

Mr. SHORTRIDGE. Certainly.

Mr. CARAWAY. Is not information always at a very low ebb in a conference? There is not much demand for it, as far as I have been able to observe.

Mr. SHORTRIDGE. Of course, the chairman of our great committee undertakes to report what takes place there. If I do not understand it, it is not because he is not clear, but due to my inability.

Mr. CARAWAY. Do not be too modest.

Mr. SHORTRIDGE. Frankly, I rarely grasp fully what is going on in a conference or what is reported.

In all candor and seriousness, I wish to sum up what I set out to say. A great catastrophe overwhelmed a city and its people. Certain great companies that had reaped millions, perhaps, from those same people in the carrying on of business, had outstanding insurance policies. The losses were admitted, and they were adjusted in each and every of these three or four hundred cases. When it came to pay the companies represented that they were bankrupt and intended to abandon California and the United States, that they had no funds here with which to pay. The claimants, as we will term them, were forced, through dire necessity, and for the reasons assigned by these companies, to accept practically what they offered, and certain contracts of settlement were entered into.

When these claims were presented to the Alien Property Custodian the claimants were advised that it was necessary for them to go into a court of equity and have these contracts set aside. The bill, therefore, asked that they might combine in one action, and that the statute of limitations or the equitable doctrine should not be interposed as a defense, all to the end that the cases be tried upon their merits. That is all this amendment provided for.

Mr. CARAWAY. Mr. President, when I was a Member of the House that same matter was before the Committee on the Judiciary. What was ever done with the measure covering that subject?

Mr. SHORTRIDGE. If the Senator refers to this immediate case——

Mr. CARAWAY. No; it was much later than that, about 1914 or 1915, when there was before the House some legislation affecting these insurance companies which did not pay their losses in the San Francisco fire.

Mr. SHORTRIDGE. That was before these events.

Mr. CARAWAY. That had nothing to do with the matter the Senator is now discussing?

Mr. SHORTRIDGE. No. But I remind the Senator, and he will recall, for I think he was then a member of the Judiciary Committee of the Senate, when the so-called Winslow bill was passed here two or three years ago, I offered an amendment to the bill, which was adopted and became a part of the law, whereby all these funds in the hands of the Alien Property Custodian were held up, and they are still held by the custodian, and it is provided in that very law that they shall not be delivered over until this relief which I am seeking is granted, or at least until the actions shall be commenced and the matter decided. But this bill, of course, when it goes through, will impliedly, at any rate, repeal the Winslow provision.

Mr. CARAWAY. The Senator wants to be certain that this bill will not release the properties of these insurance companies until they have paid?

Mr. SHORTRIDGE. I do; I do not want them released.

Mr. CARAWAY. The Senator is protesting against it?

Mr. SHORTRIDGE. Yes.

Mr. CARAWAY. I find myself in much sympathy with the Senator's position.

Mr. SHORTRIDGE. It is only in fairness that I add that these companies doubtless would appear and claim that they had entered into just and fair settlements. Of course, the claimants, represented, as I have said, by lawyers of eminence and of established reputation for character at our bar, assert and claim ability to prove such facts as would cause the court to set aside all these contracts.

I have detained the Senate perhaps too long, but I have deemed it proper to say what I have said in order that the Senate, and perhaps others, might know exactly what was sought and why I thought and think this amendment should have remained in the bill and become a part of the law.

I hope it is not necessary for me to say that there is nothing personal in this amendment, no personal hostility to individuals; but when gentlemen I have known all my life, representing these claimants, write to me, furnish me with briefs as to the law and the facts, and earnestly urge appropriate legislation, I must pay heed to them and respect their views.

I realize that it is perfectly idle for me to hope to prevent the adoption of this report, but I take occasion to say that, even though the report shall be adopted and the bill as amended become a law, perhaps we are not without hope, perhaps not without possible relief, for I imagine that a separate and independent bill may be introduced seeking in effect the same relief. Of course, the funds will have gone out of the possession of the Government, but if the Congress shall pass a simple bill authorizing the combining of the claims into one action and provide that the defenses which I have mentioned may not be interposed, the claimants can maintain the action and perhaps ultimately recover, should the court decide in their favor.

Since certain gentlemen are listening, I wish to add that there is no question under the authorities as to the power and, in proper case, propriety of Congress enacting a law suspending the statute or the equitable defense mentioned. Of course, no man has a vested right in the statute of limitations, no man has a vested right in the equitable doctrine of laches, and it is perfectly competent for Congress or for a State legislature to provide that neither of those defenses shall be set up. That was decided many, many years ago by the Supreme Court of the United States. But if anyone wishes to pursue the matter as to the power of Congress to enact a law suspending the statute of limitations or laches as a defense to claims of this or other character, I refer him to the early case of Campbell *v.* Holt (115 U. S. 620; 29 L. Ed. 483). That decision by the Supreme Court stands. It was followed by a great many others, which need not now be cited. I conclude by again expressing regret that in conference on this bill the House conferees were the more powerful. But I am not without hope that justice will yet be done to these defrauded claimants.

Mr. KING. Mr. President, the lamentations of my friend from California find a responsive place in my heart. If the facts are as stated by him, a situation is presented which should seriously engage the attention of the Senate. I appreciate, however, that no matter how serious the infirmities are in the pending measure, its progress can not be arrested and that it will soon become law. When the bill was before the Finance Committee I offered various amendments which were accepted. On the floor of the Senate I tendered a number of further amendments, substantially all of which were agreed to. I regret to learn that the conferees have not adopted two of the amendments which the Senate accepted; and the conference report, if adopted, effectually kills such amendments.

I regret that the Senate conferees did not insist upon these two amendments, because I regard them—at least, one of them—as of very great importance. I appreciate, however, that few laws are enacted except upon the basis of compromises. The measure before us deals with a multitude of questions, complicated and difficult of solution; it is therefore not to be wondered at that any legislation dealing with these matters must be the result of concessions. Is it not difficult to announce academic propositions and to declare what principles ought to be applied, but the situation dealt with in this bill presented concrete questions and questions of policy. Governmental questions were involved, and the course to be pursued must be determined in part at least by treaties between the German Government and the allied nations and between Germany and the United States. Moreover, the nationals of the two countries entered into certain agreements with respect to their claims, and their wishes called for consideration by Congress even if they were not determinative of the questions involved. I was not satisfied with the bill which came from the House, nor was I satisfied with the measure after it passed the Senate. I believed that the Senate bill improved the House bill, but even then there were provisions in the bill that did not meet my approval. And I am not satisfied now with the measure as it comes from the committee of conference. I realize, however, that no further changes can be made. If this bill is not accepted and passed by Congress it will be disappointing not only to American claimants but also to German nationals.

It seems, therefore, that it is this bill or no legislation for the present. It would mean that American claimants would be unable to receive any part of the awards made in their favor for an indefinite period; and it would also result in postponing the hour when German nationals may have restored to them a part of their property now held by the American Alien Property Custodian. If the United States had been alert and vigilant in protecting the rights of its nationals, as well as its own rights, we would not be confronted with the complicated questions now before us relating to the claims of Americans and to the property sequestered by the Alien Property Custodian.

As I pointed out when the bill was before the Senate a few days ago, the executive department of our Government neglected to cooperate with our former allies when they were seeking reparations at the hands of Germany. The Versailles treaty afforded ample protection for American nationals as well as for claims which the United States had against Germany. We refused to ratify the Versailles treaty and refused to associate the United States with the allied nations when they were

working out plans to secure reparations and indemnities from Germany because of the wrongs done to such nations and their nationals. Germany understood when the war was over and after the Versailles treaty was ratified by her that she must make reparations to the allied and associated powers and to their nationals.

She expected, of course, that the United States was entitled under the armistice agreement, if not under the treaty, to compensation growing out of the expenses incurred in maintaining military forces in Germany following the World War. Germany knew that American nationals had claims against her and her nationals, which, under the treaty of Versailles, as well as under the treaty of Berlin, she was obligated to meet. The United States understood the terms of the two treaties just referred to, and the State Department knew that it was expected to take proper steps to protect the rights of the United States and of American citizens, and to see that they received a just share of all reparations exacted of Germany. But the State Department was inert and did not associate itself with the allied nations when they were seeking to secure reparations from Germany and to formulate and execute a plan that would protect them and their nationals.

The Dawes Commission was appointed to fix the amount which Germany was to annually pay by way of reparations, but the United States took no part in selecting the members of the commission or in presenting its claims for a share of the reparations which Germany was required to pay. The attitude of our Government is most extraordinary, and one can scarcely understand why the State Department and those in the executive department having the matter in hand should have refused to participate with the representatives of the allied nations in fixing the reparations and in demanding a fair share of the same to meet the claims of the United States and American citizens. Because of the failure of the United States to ratify the treaty of Versailles and because the party in power was bitterly hostile to the League of Nations did not justify the laissez faire policy pursued by the State Department and the abandonment of the claims of the United States and its nationals against Germany and her nationals.

When the property of German nationals was sequestered by the United States after we entered the war it was understood that it was to be held until the war was over and then returned to its owners. There was no thought that the property was to be held indefinitely, or to be applied in satisfaction of the claims of American nationals or of the United States. And it is my opinion that if our Government had vigorously sought to protect its rights and the rights of its nationals, and for that purpose had associated itself with the allied nations in determining what Germany should pay, and what proportion of all payments should be made to the United States and to American citizens, the situation in which we find ourselves would never have been brought about, and the property held by the Alien Property Custodian, or most of it, would have been returned long before this to those from whom it was taken.

The Berlin treaty did not comprehensively deal with the rights of the United States and of American nationals, nor make adequate provisions for the liquidation of their claims. It is true that Germany, both in the Versailles and in the Berlin treaties, asserted her sovereign power with respect to the property of her nationals which was in the possession of the Alien Property Custodian. No one will deny that Germany possessed the power to expropriate a part or all of the property of German citizens which was held by the American Alien Property Custodian.

Apparently our Government was willing to have Germany expropriate the use, if not the property itself, which was in the hands of the Alien Property Custodian and to hold the same until Germany made suitable provisions to settle the claims of the United States and its nationals. The treaty of Berlin was in fact an act of expropriation by Germany, and the property in the hands of the Alien Property Custodian was thus impressed with the sovereign authority of Germany. The American nationals could have insisted with propriety that this property be held until their claims were satisfied, particularly in view of the fact that their Government had adopted no suitable measures to secure reparations from Germany or to satisfy their just and valid claims.

I regret that conditions developed which indicated that American nationals would not be paid except by utilizing a portion of the property of German nationals in the possession of an official of the United States; but it is too late to complain or remonstrate. We are to accept this bill with its imperfections or perhaps get no legislation. To postpone the settlement of these questions would be not only unwise but would work serious injury to American citizens as well as to German nationals. Both groups prefer this measure to no legislation or to indefinite postponement. I accept the situation, but do so with reluctance, believing that the standards which our Government has set with respect to the sanctity of private property and its immunity from expropriation even in times of war by belligerent nations, have not been fully observed.

It must be admited, however, that we have treated Germany and her nationals far more generously than have the allied nations; and it must be conceded that Germany exercised the right of eminent domain against the property of her nationals and told the United States that such property might be held by it until Germany made suitable arrangements for the payment of American claims against her and her nationals.

One of the provisions of this bill which does not meet my approval is that which places the United States in the last priority for payment. This means that the United States will not be paid, if paid at all, for many years. If Germany should fail to meet the reparations, then the claims of some American citizens would not be paid in full, and the United States would receive no part of the amount due her under the award made by the Mixed Claims Commission. Senators will recall that the allied nations consented that the United States might receive 2¼ per cent of the annual reparations paid by Germany, to be applied upon the claims against Germany.

From time to time we hear that Germany will not continue to pay reparations for any length of time. As stated, if Germany should default, then the United States, unless some other arrangements were made, would receive nothing, notwithstanding under this bill she is placed in a category entitling her to the payment of $60,000,000 at some future time. It is to be hoped that Germany will meet the awards of the Mixed Claims Commission. In my opinion, these judgments against Germany were not harsh; indeed, as I understand the facts, Germany has been dealt with by the Mixed Claims Commission in a most liberal, generous, and sympathetic manner.

Mr. President, I referred a few moments ago to two amendments agreed upon in the Senate but not accepted by the conferees. One of them I regard as of great importance. Senators will recall that under the terms of the bill $25,000,000 of accumulated interest now in the Treasury of the United States was to be placed in the deposit fund and applied in meeting the claims of American nationals. This interest came from the property of Germans held by the Alien Property Custodian. Much of this property was converted into Government bonds, and the interest, as stated, has been derived from the investment of German funds. Under the bill this $25,000,000 is to be immediately available to pay the claims of American citizens. It is to be returned to German nationals who own the same after various priorities have been paid. It is quite certain that the owners of this large sum will not be paid unless Germany meets her reparation obligations. It seemed to me that in taking this $25,000,000 belonging to German nationals—and it belongs to them as much as does the money and property which produced it—that they were not only entitled to its return but that at some time they were entitled to simple interest upon the same. Accordingly I offered an amendment, which was agreed to in the Senate, providing that after all claimants were paid, including the United States, that the owners of the $25,000,000 should be paid simple interest out of the reparations paid by Germany to the United States. In other words, I proposed that Germany should pay her own nationals simple interest upon $25,000,000 which was taken from them and applied in settlement of claims of American citizens against Germany and her nationals.

There are some who will believe that the taking of the $25,000,000 and the holding of the same for such a long period of time is confiscation; and certainly the claim will be made to hold this sum for many years and pay no interest upon the same is confiscation. In my opinion, it is unwise and unfair to deny interest certificates to the owners of the $25,000,000. But the conferees have reported against my position and I must submit to the Senate if it shall uphold their action. I repeat, we could have relieved the United States of the imputation of confiscation by making provision for interest upon this deferred interest of $25,000,000, and it will be a mistake to accede to the proposition embodied in the conferees' report.

Another amendment agreed to in the Senate and rejected by the conferees, provided that the Alien Property Custodian should conclude his work within 18 months. I believe that the Alien Property Custodian can wind up the business connected with carrying out the provisions of this act within that period. However, my amendment provided that at the end of that time, if there were further duties to be performed, the Treasury Department should take over the work of the Alien Property Custodian and carry out the provisions of the law. Senators know the tenacity with which bureaus and Federal agencies cling to life. Federal organizations that are created for a limited period

find some excuse to continue their existence. I believe that it was wise to announce in the bill that the work of the office of the Alien Property Custodian should be performed within 18 months. Such a declaration would have been an admonition to all persons concerned, that celerity in executing the terms of the bill was imperative. It would, in my opinion, have hastened the performance of the duties and responsibilities provided in this bill. In making this statement I am not criticizing the Alien Property Custodian or any of his official staff. He is a man of integrity and I am sure will, with fidelity, perform the duties laid upon him.

Mr. President, as I have stated this bill has features which do not meet my approval. However, it is the best that can be obtained and I shall detain the Senate no longer in discussing its provisions and shall not seek to delay action upon the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10635) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1929, and for other purposes.

The message returned to the Senate, in compliance with its request, the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9481) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1929, and for other purposes.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were subsequently signed by the Vice President:

H. R. 48. An act to erect a tablet or marker to the memory of the Federal soldiers who were killed at the battle of Perryville, and for other purposes;

H. R. 83. An act to approve Act No. 24 of the Session Laws of 1927 of the Territory of Hawaii, entitled "An act to authorize and provide for the manufacture, maintenance, distribution, and supply of electric current for light and power within Hanapepe, in the district of Waimea, island and county of Kauai";

H. R. 482. An act to provide relief for the victims of the airplane accident at Langin Field, Moundsville, W. Va.;

H. R. 3144. An act for the relief of Augustus C. Turner;

H. R. 5925. An act for the relief of the Fidelity & Deposit Co. or Maryland;

H. R. 8281. An act to provide for the withdrawal of certain described lands in the State of Nevada for the use and benefit of the Indians of the Walker River Reservation;

H. R. 8282. An act to provide for the permanent withdrawal of certain lands bordering on and adjacent to Summit Lake, Nev., for the Paiute, Shoshone, and other Indians;

H. R. 8291. An act to amend section 1 of the act of June 25, 1910 (36 Stat. L. 855), "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes";

H. R. 8292. An act to reserve 120 acres on the public domain for the use and benefit of the Koosharem Band of Indians residing in the vicinity of Koosharem, Utah;

H. R. 8527. An act for the relief of the International Petroleum Co. (Ltd.), of Toronto, Canada;

H. R. 9037. An act to provide for the permanent withdrawal of certain lands in Inyo County, Calif., for Indian use; and

H. R. 9994. An act to reimburse certain Indians of the Fort Belknap Reservation, Mont., for part or full value of an allotment of land to which they were individually entitled.

MUSCLE SHOALS

The PRESIDING OFFICER. The Chair lays before the Senate the unfinished business, Senate Joint Resolution 46.

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (S. J. Res. 46) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals for the manufacture and distribution of fertilizer, and for other purposes.

Mr. NORRIS obtained the floor.

Mr. HARRISON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Barkley	Dill	Kendrick	Reed, Pa.
Bayard	Edge	Keyes	Robinson, Ind.
Bingham	Fess	King	Sackett
Black	Fletcher	La Follette	Sheppard
Blaine	Frazier	McKellar	Shortridge
Blease	George	McMaster	Simmons
Borah	Gerry	McNary	Smoot
Broussard	Gillett	Mayfield	Steiwer
Bruce	Glass	Metcalf	Tydings
Capper	Gooding	Moses	Tyson
Caraway	Hale	Neely	Walsh, Mont.
Copeland	Harris	Norris	Warren
Couzens	Harrison	Nye	Waterman
Curtis	Hayden	Overman	Watson
Cutting	Heflin	Phipps	Wheeler
Deneen	Howell	Ransdell	Willis

Mr. SHEPPARD. I wish to announce that the Senator from Washington [Mr. JONES] and the Senator from Mississippi [Mr. STEPHENS] are detained by the business of the Commerce Committee.

Mr. COUZENS. I desire to announce that the Senator from Iowa [Mr. BROOKHART] is engaged in the Interstate Commerce Committee.

The PRESIDING OFFICER. Sixty-four Senators having answered to their names, a quorum is present.

Mr. HARRISON. Before the Senator from Nebraska proceeds with his speech, will he permit me to ask unanimous consent to modify my amendment, so that it may be printed and be here in the morning to be voted on?

Mr. NORRIS. I yield.

Mr. HARRISON. Mr. President, I ask to modify my amendment.

The PRESIDING OFFICER. The Senator from Mississippi may modify his amendment as he desires.

Mr. NORRIS. Mr. President, when I had the floor on Friday last, discussing the Muscle Shoals proposition, I was in the midst of an attempt to show the connection of the Cyanamid Co. and the Air Nitrates Corporation, the bidders who are striving to get Muscle Shoals through the instrumentality of the bill introduced by the Senator from Ohio [Mr. WILLIS]—and I am sorry he is not present to listen to the explanation of his own bill—and I was part way through in the evidence I was offering, connecting those companies with the various water-power companies, the so-called Fertilizer Trust and the Aluminum Co. of America of Mr. Mellon. I had reached a point, I believe, when the Senate adjourned at that time, where I was about to read the testimony of the late Senator Lodge, who for a great number of years was an honored Member of this body, whose ability was then and still is unquestioned, and whose word always went for 100 per cent.

On April 7, 1916, he made a speech in the Senate which I desire to quote. It will be found in the CONGRESSIONAL RECORD of that date on page 6471. Senator Lodge said, among other things:

> It appears from the New York Times of October 23, 1915, that the Ammo-Phos Corporation was organized under the laws of New York with a capital stock of $6,000,000 to manufacture cyanamide and to acquire shares of the Amalgamated Phosphate Co. (Inc.) under the laws of West Virginia, its incorporators being A. H. Sands, jr., private secretary of James B. Duke; Walter C. Parker, secretary and treasurer of Southern Power Co., of which James B. Duke is president; and William L. Baldwin, all of No. 200 Fifth Avenue, New York.

It will be unnecessary for me, perhaps, to say that I have already connected the Duke interests with various corporations and with the Cyanamid Co., and with the Air Nitrates Corporation in particular.

Mr. FESS. Mr. President, will the Senator permit me to state that my colleague [Mr. WILLIS] is detained from the Senate in the Commerce Committee, which is considering proposed flood control legislation.

Mr. NORRIS. I am sorry he is not present.

Mr. FESS. I have sent for him.

Mr. NORRIS. A. H. Sands, jr., the private secretary of James B. Duke, according to Senator Lodge's statement, was one of the incorporators of the Ammo-Phos Corporation and the Ammo-Phos Corporation is a part of the American Cyanmid Co., and ammo-phos, they say, they will be able to convert into fertilizer. The Duke interests are not only connected with the Fertilizer Trust but with the Water Power Trust as well and with the Aluminum Trust through connections with the Aluminum Co. of America.

Senator Lodge says:

> Its incoporators being A. H. Sands, jr., private secretary of Jame B. Duke; Walter C. Parker, secretary and treasurer of the Southern Power Co.—

Another place where they are connected up with power—

of which James B. Duke is president; and William L. Baldwin, all of No. 200 Fifth Avenue, New York.

It appears—

Says Senator Lodge—

It appears from Moody's Manual, 1915, page 2027, that the Amalgamated Phosphate Co. is a corporation under the laws of West Virginia, with capital of some $8,000,000; that it owns various phosphate beds—those are necessary for the fertilizers—and that the Virginia-Carolina Chemical Co. is largely interested in the company. The directors include several directors of the Virginia-Carolina Chemical Co.—

Which is one of the defendants in the suit of the United States to dissolve the Fertilizer Trust—

including S. T. Morgan, president of the latter company.

The Virginia-Carolina Chemical Co. is a corporation under the laws of New Jersey, with a capital stock of $68,000,000, with a bonded indebtedness of $18,000,000, its president being S. T. Morgan, who is also a director of that company. This company appears to own Charleston Mining & Manufacturing Co. This company owns over 68,000 acres of phosphate lands in South Carolina, Tennessee, and Florida. Of course, the phosphates are to be treated with the nitrates. It also owns all of the stock of the Consumers' Chemical Co., a corporation manufacturing fertilizer here in New York; it controls Southern Cotton Oil Co., which company refines and manufactures cottonseed oil and other by-products, with mills and factories at various cities of the South; and it controls various sulphur, chemical, and fertilizer companies in this country and in Germany, and has a practical monopoly throughout the South of the fertilizer and cottonseed-oil business.

That is the testimony of Senator Lodge. If that is not getting pretty close to the Fertilizer Trust with this company that is trying to get Muscle Shoals out of love for the American farmer, to give him cheap fertilizer, then I do not know what is.

Mr. CARAWAY. Mr. President, will the Senator pardon me? He is now talking about the Willis-Madden bill?

Mr. NORRIS. Yes, sir.

Mr. CARAWAY. I thought that had been turned over to an undertaker some days ago.

Mr. NORRIS. If it has been turned over to an undertaker, I am trying to fill up the grave with the real facts.

Mr. CARAWAY. I think the Senator has done that pretty well.

Mr. NORRIS. It is always necessary, especially when anything with a bad odor is put in the grave, that the grave be well filled, for the protection of people who are still on the earth.

Still reading from Senator Lodge:

The Southern Power Co. is a corporation under the laws of New Jersey, with a capital stock of $11,000,000 and a bonded indebtedness of $7,000,000, owning various electric properties in North Carolina and South Carolina, its president being J. B. Duke.

Mr. President, on page 5708 of the same volume of the CONGRESSIONAL RECORD, Senator Kenyon, whom all Senators remember well and pleasantly, spoke as follows:

Mr. Cooper, who is vice president of the $6,000,000 fertilizer company, known as the Duke Fertilizer Co., is the general manager of the American Cyanamid Co. The American Cyanamid Co., in their statement of assets, schedule "Founding and propaganda, $230,589," as a part of their assets.

That is Senator Kenyon. That connects them up on the other side. They are related both ways, to the Fertilizer Trust and the Water Power Trust.

On February 25, 1927, pages 4753, 4754, and 4755 of the CONGRESSIONAL RECORD, I find a speech made by the Senator from Illinois [Mr. DENEEN], from which I quote:

I send to the desk—

He was talking at that time upon the power bid that was reported from the so-called joint committee on Muscle Shoals, of which committee he was the chairman, as I remember—

I send to the desk a list of the subsidiary corporations which comprise the Union Carbide Co. in the United States and Canada. The Union Carbide Co. recommended that the bid of the American Cyanamid Co. should be accepted—

That bid is the bid which the bill of the Senator from Ohio, if passed, would accept.

Continuing reading, now, from the Senator from Illinois—

and stated that 50,000 of the 83,000 or 84,000 horsepower developed at Muscle Shoals should be assigned to the Union Carbide Co. by the Air Nitrates Co.

This is the corporation, with the American Cyanamid Co., that is to get Muscle Shoals if the bill of the Senator from Ohio is passed.

Now, let us see what this memorandum is that the Senator from Illinois sent to the clerk's desk: It is headed:

Memorandum

FEBRUARY 1, 1927.

The Union Carbide Co. is a corporation incorporated in 1898 in Virginia, with an authorized capital stock of $50,000,000, $39,757,854 of which is outstanding, all owned by the Union Carbide & Carbon Corporation (Inc.), November 1, 1917, in New York.

The Union Carbide Co. was incorporated for the purpose, among other things, of manufacturing, purchasing, using, and selling throughout the United States and elsewhere calcium carbide and all gas-producing materials and gas, especially acetylene gas, and all machinery, apparatus, and fixtures for any purposes relating in any manner to the production and use of calcium carbide and acetylene or other gas; also to manufacture, produce, buy and sell, or otherwise deal or traffic in any or all metallurgical, electrometallurgical, chemical, and electrochemical products and compounds, including any and all elementary substances and any and all alloys and compounds thereof; also coal, coke, gas, oil, lumber, etc. Works are located at Niagara Falls, N. Y., and Sault Ste. Marie, Mich.

The Michigan Northern Power Co., with a power house developing 40,000 horsepower of electrical energy, is controlled by the Union Carbide Co.

The Union Carbide & Carbon Corporation owns directly or indirectly substantially all the common capital stock of the following 26 companies:

Beacon Electric Corporation.
Canadian National Carbon Co. (Ltd.).
Carbide & Carbon Chemicals Corporation.
Carbide & Carbon Realty Co. (Inc.).
Clendenin Gasoline Co.
J. B. Colt Co.
Dominion Oxygen Co. (Ltd.).
Electric Furnace Products Co. (Ltd.).
Electro Metallurgical Co.
Electro Metallurgical Co. of Canada (Ltd.).
Electro Metallurgical Sales Corporation.
Haynes Stellite Co.
The Linde Air Products Co.
The Linde Air Products Co. of Texas.
Linde Air Products Co., Pacific Coast.
Michigan Northern Power Co.
National Carbon Co. (Inc.).
Oxweld Acetylene Co.
Oxweld Railroad Service Co.
The Prest-O-Lite Co. (Inc.).
The Prest-O-Lite Co. of Canada (Ltd.).
Sauda Falls Co. (Ltd.).
Union Carbide Co.
Union Carbide Sales Co.
Union Carbide Co. of Canada (Ltd.).
Union Carbide & Carbon Research Laboratories (Inc.).

We see from that, Mr. President, that the Union Carbide Co., with all these subsidiaries, is very closely allied with the Air Nitrates Co. and the American Cyanamid Co., and they are going to get the great bulk of the power at Muscle Shoals if this bid is accepted by the United States Government.

Following along the same line, I want to call the attention of the Senate to a brief quotation from the report of the Federal Trade Commission upon its investigation of the so-called Fertilizer Trust. This was sent to the Senate in the Sixty-seventh Congress, fourth session, Document No. 347. Among a good many other things, they say this:

The salient facts disclosed by the investigation are as follows—

Now we are getting to the Fertilizer Trust—

1. The seven largest companies are the American Agricultural Chemical Co., the Virginia-Carolina Chemical Co.—

That is the one I have been talking about—

the International Agricultural Corporation, F. S. Royster Guano Co., Armour Fertilizer Works, Swift & Co., and the Baugh companies.

In the former report of the commission it was found that these concerns, with their subsidiaries, produced about 58 per cent of the total output of mixed fertilizers. In 1921 these concerns produced and sold about 65 per cent of the total fertilizer used.

Mr. McKELLAR. What was the first per cent—58?

Mr. NORRIS. Fifty-eight.

In the industry the first six concerns named are usually referred to as the "big six." The American Agricultural Chemical Co. and the Virginia-Carolina Chemical Co. sell about the same tonnage, their combined output being about one-third of the total of the country.

This corporation that I have been talking about both to-day and last Friday is one of the companies included in the bill

that the Attorney General filed to dissolve the combination operating through the South—in fact, I think all of these companies were included in it—selling, in 1921, 65 per cent of all the fertilizer used in the United States, connected with the Air Nitrates Corporation, with the American Cyanamid Co., with the Ammo-Phos Co., and the companies with which the American Cyanamid Co., which is attempting now to get Muscle Shoals, has been dealing during all the time that we have been listening to the cries of the farmer for cheaper fertilizer; and you propose now, by this bill, to turn over Muscle Shoals to a member practically of the same combination that you have been condemning for years, with the idea of getting cheap fertilizer for the farmer!

If these people so loved the farmer, if they were moved by an idea to give to American agriculture a cheap fertilizer, why have they waited so long to do it? Why have they conducted themsleves in such a way that they were charged continually, even by the Department of Justice, with being a Fertilizer Trust, formed for the purpose of holding up the price of fertilizer to the American farmer?

We also had a report some time ago of the special assistant to the Attorney General on the Aluminum Co. of America, and this report was presented to the Senate by the Senator from Pennsylvania [Mr. REED.] That report of the special assistant to the Attorney General has something to say about how the Aluminum Co. of America is connected up with power and is a part of a great trust.

> In July, 1925, the Aluminum Co. of America acquired an undeveloped water power on the Saguenay River in Canada by merging with the Canadian manufacturing company.
>
> The Duke interests own the stock of the Canadian Manufacturing Development Co.
>
> The Canadian Manufacturing Development Co. owns 11.12 per cent of the stock of the Aluminum Co. of America.

That is from the Federal Trade Commission's report on the Aluminum Co. of America. The Duke interests own a large interest in the American Cyanamid Co.

Right here let me call to the attention of my esteemed friend from Ohio, who is now honoring me by his presence, the fact that the president of the American Cyanamid Co., the bidder in this case, is one of the trustees of the Duke estate. So that there is no unfriendly rivalry, perhaps, between these great corporations.

In this special report to the Senate to which I have referred—Sixty-ninth Congress, first session, Document No. 67——

Mr. FESS. Mr. President, will the Senator yield before he goes into that?

Mr. NORRIS. Yes.

Mr. FESS. I have listened to the Senator for the three days he has been very elaborately, and I think very intelligently, discussing this great problem, and I am wondering if I am under the wrong impression, namely, that the Senator is rather attacking these various organizations on the ground that they are large.

Mr. NORRIS. No; the Senator is mistaken about that. Let me tell the Senator the situation. I said last Friday, as I remember it—and I have said it at other times—that I never made a personal investigation myself into the so-called Fertilizer Trust, and I neither deny nor claim that there is such a trust. I was relying on the claims made by Senators here from time to time ever since we have had the Muscle Shoals question before us that there was such a trust, and it seemed evident to me that the farmer was paying too much for his fertilizer. To my mind, it was more important to reduce the cost of fertilizer than to go into the question of whether or not there was a trust, although I concede it is important and relevant.

I went into a discussion of those claims that had been made from time to time in order to show that if there was a fertilizer trust these bidders were pretty close to it; if there was a waterpower trust, they were pretty close to that; if there was an Aluminum Trust, that the Aluminum Trust, the Mellon interests, the Duke interests, the fertilizer interests, these big chemical companies, and the Cyanamid Co. were all at least on very friendly business terms. I think that is proven by the fact that when Mr. Duke died, Mr. Bell, who was president of the Cyanamid Co., was made one of the trustees of his estate. I am not complaining about that. I am calling attention to it on the theory that these Senators have been correct all these years. But if they were correct, we will be going deeper into this than ever before if we accept this bid.

Mr. FESS. Mr. President, if the Senator will permit, am I to understand that the Senator believes that because Mellon might be interested in one of these companies, just the mere fact that he is interested, is conclusive reason why we should not have anything to do with it, that the same applies to the Dukes, and that the same applies to the du Ponts?

Mr. NORRIS. I agree with the Senator.

Mr. FESS. If these men are successful, we ought not, just because they are successful, to say, "That shuts them out." Of course, I agree with the Senator that when it comes to the question of a trust that might take advantage of the public, the Government should have some control over them. I have thought that concentration in great units is inevitable, and I would not vote to prevent it if we can keep proper control over them.

These agencies which have achieved tremendous success in the country are just the ones to whom I would refer if I were about to enter upon a great enterprise, and the mere fact that they have been successful should not raise a prejudice in our minds against giving them any consideration. That was my idea.

Mr. NORRIS. Mr. President, I hope I have made myself plain to the Senator as to why I have entered upon this discussion. I might say that as far as my investigation has gone, I am firmly convinced of two things; that there is a Water Power Trust and that there is an Aluminum Trust; and as far as I have gone into the evidence which has been produced here, there is a strong indication at least that if there is not a Fertilizer Trust, it comes very near to it. But I went into this line of argument to show to some of the people who are in favor of the Cyanamid bid, and who think there has been a Fertilizer Trust and that the farmer has been robbed on account of the Fertilizer Trust, that they were going to have the farmer jump right out of the frying pan into the fire if they accept this bid.

Mr. FESS. It might be that I was misled by the suggestion the Senator made a moment ago when he referred to these people having no particular love for the farmer. Of course, I admit that no business is going to be run purely for the love that any group might have for anybody, but rather on a basis of profit.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. NORRIS. I yield.

Mr. McKELLAR. If I understand the argument of the Senator it is this, that, as it is the purpose of some of us to secure for the farmers cheaper fertilizer, it would be a wholly useless and improvident thing to turn this plant down there over to those who are now engaged in manufacturing fertilizer, hoping that they will, of their own accord, learn to make cheaper fertilizer. In other words, we would be turning the plant over to these people who are now maintaining high prices, and who some maintain were alleged to be in a combination to hold prices up. We would be turning the property over to them to see if they could not find some process by which to furnish the American people cheaper fertilizer.

Mr. NORRIS. That is right.

Mr. McKELLAR. That is what I understand the attitude of the Senator to be.

Mr. NORRIS. Mr. President, there is a feeling, especially on the part of Senators from the South, that they want to keep the Alabama Power Co., for instance, from getting control of Muscle Shoals. I share in that feeling. I think Senators are right when they fear that consummation. That is not because I have anything against the Alabama Power Co. I have come in contact with them since the beginning of this investigation, and there has never been an official of the Alabama Power Co., so far as I have observed, before the committee of which I had the honor to be the chairman, where they were continually appearing, who ever undertook to do anything dishonorable or dishonest. I was not looking for anything of the kind. As far as I know they were perfect gentlemen. But the Alabama Power Co. owns the distributing system all around Muscle Shoals, and the Alabama Power Co. in turn is owned by other corporations—as I have shown here before, and I do not expect to go into again—and is a part of the Fertilizer Trust. If we turn Muscle Shoals over to them we will simply turn it over to the Water Power Trust. They will make out of it all they can. They are in the business for money, and it is perfectly honorable of them to do so. I presume I would do the same if I should get this plant. I would get everything out of it that I could, moved by financial interest entirely.

For the same reason that I do not want to turn the water power over to the Alabama Power Co., I do not want to turn the fertilizer business over to the Virginia-Carolina Co., and the others who—the evidence stands here, I think, undisputed from these reports—control the fertilizer business in most of the Southern States.

It might be we could turn it over to them, and they would be philanthropists and give the farmer the benefit, but the

natural thing to expect would be that they would make all the money they could out of it. We have been selling power to the Alabama Power Co. for quite a while, selling it, I think, very cheap, although in the way they have to bid I would not expect them to pay much more. Nobody has heard that because they got this power so cheap they had given to the consumers of power in the South a penny reduction. If they have, I have not heard of it.

Mr. McKELLAR. Mr. President, as I understand it, they buy it from the Government at one-fifth of a cent, and the maximum price at which they sell it is 12½ cents. There is somewhere between six and eight thousand per cent spread between their purchase price and their highest selling price.

Mr. FESS. I assume, Mr. President, that the Senator from Nebraska believes that in a rather new development, such as the manufacture of fertilizer, a private company like the Alabama Power Co., or any other, might not inaugurate methods for improving and cheapening the article, and if they did, they would not allow the public to have the advantage of it, while in case the Government holds this plant and operates it, both those results might be obtained.

Mr. NORRIS. I think so. I think the Senator is right in that. If we should decide to sell this power to somebody else, or that we were going to let some private enterprise run the fertilizer plant, while I conceive it to be possible, it is almost impossible, very improbable, that we could find a company that would handle the water power, or a company that would handle the fertilizer, that is not already somehow connected with one or the other or both branches of these great industries.

Mr. FESS. The Senator has always had confidence in the ability of the Government to handle matters of this sort. I have always feared that Government ownership and operation is not as effective or efficient nearly as private. We differ in our theory on that.

Mr. NORRIS. Yes.

Mr. FESS. The Senator may be right in the matter. The other view is the view I have held. I have thought that if we could find a responsible company and make a lease that would be acceptable, under conditions of recapture, we would be better off than if we should undertake to have the Government handle the plant. That is my honest opinion.

Mr. NORRIS. I do not criticize the Senator for his viewpoint. I ought to say, too, that he may be right and I may be wrong. But I want to say to the Senator that those who believe as he does have had all the chance in the world with Muscle Shoals and have failed. We appointed a joint committee, and I think they acted conscientiously. Prior to that time we had had extended hearings before the Committee on Agriculture and Forestry of the Senate. The joint committee, I think, unanimously shared the Senator's idea. Men who thought as I did were not on the committee, and were properly kept off. I am not complaining about it. I do not know but that I said in effect on the floor of the Senate that I wanted those whom the Senator believes are right to go to work to see if they could bring in something which would meet the contingencies and be good for the farmer and the people of the South, and that if they could do so, I would support it. They had their own way about it, and brought in a bill. Of course, I opposed it very desperately when it came in. It was demonstrated, I think, that it was connected up with the Water Power Trust. It never came to a vote, even, and the Cyanamid bid did not even get the favor of the joint committee. This has come in since. So we have had an opportunity to do it, but we have never been able to present a bill here for Muscle Shoals that is free either from the Fertilizer Trust or the Water Power Trust, and it can not be done.

Mr. FESS. If the Senator will permit me, I think the strongest position in his argument and which somewhat staggers me is that in a new field like electricity or the application of electric power to industry, where some new inventions might tremendously change the efficiency and economy of production, it is somewhat doubtful whether it would be wise to tie up in a long-time contract without any protection on behalf of the public in case those improvements were made. I think the Senator has a very strong position there. The question is whether we could not make the contract so that we would get the benefit of such improvements if the property were operated by private enterprise. I do not know that we could get any company to enter upon such a contract.

Mr. NORRIS. No. There is another thing that must be considered in discussing the position I have taken ever since the beginning of the consideration of the Muscle Shoals matter. I would disagree with the Senator when we come to municipal ownership of electric-light plants, and so forth, but I contend that this is not that kind of proposition. Here we have a dam at Muscle Shoals which is already owned by the Government. The taxpayers' money has been used to build it. We have an improvement there costing in round numbers about $150,000,000 of the taxpayers' money. It is ours. It belongs to the people of the United States, not to Alabama. But it is so located that the people of Alabama, Mississippi, Georgia, Kentucky, and all the Southern States are very likely to get more benefit out of it than the people of other portions of the country.

But if we had a war to-morrow the people of Nebraska and the people of Ohio would be definitely interested in the Muscle Shoals property and we would go to using it at once. We want to keep it so we can use it at any time. That being true, it is not a question of the Government entering business. That we decided, I suppose, when we first considered the question. We are in it, and it is a question of what we are going to do with our own property.

I have been trying here in my weak way to have the Government use it in such a way that the people anywhere within transmission distance would get the benefit of cheapening electricity. From my study of the electrical problem I am convinced, as firmly as I have ever been convinced of anything in my life, that the people there as well as elsewhere in the United States are paying exorbitant prices for electricity. While my own people care little about the fertilizer question as a question, I know that it is one of the most important things that confronts civilization to-day; not only the United States but the entire civilized world. It may be that we will get into no trouble, because some new thing may happen, as the Senator said a while ago; but unless it does, the world is going to be short of fertilizer.

As I have said in the Senate, we may reach the time when we will have to subsidize fertilizer on a large enough scale to give every farmer in the United States some of it more cheaply. The man who eats bread, the man who eats meat, the man who wears cotton or woolen clothes, the man who wears shoes, has an interest in the problem just as much as the man who follows the plow and tills the soil. Everybody is interested in it. It is a world question. When we come, then, to the getting of nitrogen, one of the necessary ingredients of every good fertilizer, from the atmosphere, we face a different problem. I have observed from the testimony of scientific men that we are still, perhaps, in our infancy in that field, that we have been gradually developing and improving and cheapening the process from the beginning, but we ought to cheapen it still more in order to get any material reduction to the farmer in the price of his fertilizer. I am willing to go any distance, even to the expenditure of public money, for an honest, intelligent, and scientific working out of that problem.

I am not willing, however, to say we will set nitrate plant No. 2 at work to its capacity, which we could do, to make fertilizer, and then sell it away down below cost, because that would not be of any final benefit to agriculture in America. It would benefit a few people in the vicinity of Muscle Shoals, but, much as I would like to see them prosper, they have no right to call upon the balance of the country to subsidize fertilizer in their midst when they do not subsidize it anywhere else. Therefore the question that is presented to us is, What can we do best to get cheaper fertilizer?

Mr. FESS. I agree with the Senator that the project is not just like any other upon which the Government has expended $150,000,000. The fact is that the first speech that made any impression on me when I first came to the House of Representatives was made by Oscar W. Underwood, and that was on the possibilities of Muscle Shoals. I had never heard of it before. Then we were asking for only a very small appropriation. Every year it came up and was negatively acted upon until we got into the war, and then it was used for nitrate purposes and, as I recall, only $20,000,000 was asked for; but it grew and grew until now we have it. I admit it is a new problem. I hope we may work it out.

Mr. NORRIS. That is what I want to do. The fertilizer question is the most important, but while I believe that it is the most important, the other question is exceedingly important, too. We are just at the beginning of a great electrical development. It is spreading over the country like a whirlwind, and I think it is a subject which is worthy the consideration of every man and every woman who wants to assist our civilization; something that must soon be considered, if it has not been already, as one of the necessaries of life in every home to turn the wheels and do the drudgery and toil the housewife has to do now. I think that is more important than the manufacturing part of it. From my study, which has been conscientious, because I had no idea when I started in where I was coming out, I am convinced, and I am going to demonstrate it before I

conclude my remarks on this feature of the question, that the charge for electricity in the United States is away beyond where it ought to be, particularly in the homes.

I believe I had not finished my reference to the Aluminum Co. of America. I am reading now from the report of the special assistant to the Attorney General:

> In July, 1925, the Aluminum Co. of America acquired an undeveloped water power on the Saguenay River in Canada by merging with the Canadian Manufacturing & Development Co., the only asset of which company was the capital stock of the Chute a Caron Power Co., the only property of the Chute a Caron Power Co. being the undeveloped power above referred to. As a result of this merger the present Aluminum Co. of America is, therefore, technically a new corporation which came into existence on July 29, 1925.

At another place in the report it is said, speaking of some tabulations there set forth:

> In the second tabulation, showing the stock as of current date, there is a fourth group, entitled "Canadian Manufacturing & Development Co.," consisting of the stock owned by the Duke interests, which owned the company merged with the Aluminum Co. of America.

Mr. President, I told the Senate at the beginning of my remarks the other day that before I finished I expected to explain something about the wonderful propaganda which had been carried on all over the country to secure the passage of the so-called Willis bill. There has been a propaganda on the proposition ever since it was first started. It has a great many branches and travels in a great many directions. There was a propaganda in favor of the acceptance of the Ford bid in the beginning. There was a propaganda in opposition to it. The men who are now asking for Muscle Shoals for the Cyanamid people were part and parcel of the opposition to the Ford bid. They testified, as I have read from their testimony, and I think they have told the truth. They said over and over again that they could not make fertilizer down there with Dam No. 2 unless we subsidized it by giving enough water power to make up the losses on the fertilizer. Now, they are coming here on the theory that they are going to make cheap fertilizer and are going to get a great deal more power than Henry Ford ever would have received under his bid. Henry Ford would have gotten Dam No. 2 and Dam No. 3. He was not to get Cove Creek Dam. He was not to get either of the other three dams that this company would have a special right to get if the bill passes, and about which I shall speak later. So that the power possibilities under this bid are much greater than under any other bid which has ever been made to the Senate.

I would like to call attention to the testimony of Mr. Bell and Mr. Washburn and Mr. Hammitt, when they appeared before the various committees of the Senate, and told them, and I think truthfully, that fertilizer could not be cheapened by the operation of nitrate plant No. 2 unless we subsidized the people who operated it by giving them a whole lot of power so they could make up on power the losses that they made on fertilizer. That would not help the American farmer. One of the things that I want to do and one of the things that I have tried to do in this matter, although it was many times at great risk to my political life and political future when I was doing it, was to tell the truth to the American farmer as I actually believed it to exist. It will do no good in the end to the American farmer if we do make a whole lot of fertilizer and sell it for less than it cost. Every farmer outside of the freight limits of any factory which we established would have a just right to say, "That is class legislation and you must not use my tax money to subsidize something in favor of some fellow who happens to live in a favored locality."

So the really important thing is to make fertilizer cheap without having anything handled or monopolized by a monopoly. Let it be free and open to the entire world. If the Cyanamid Co. should develop a new improvement, if they have their bid accepted according to the bill of the Senator from Ohio [Mr. WILLIS], and if they have their way about it, and develop something new, something that would cheapen fertilizer, what would happen? The first thing would be a patent. They would get a patent and they would be the only ones who could use it. Suppose the Government of the United States improves it; then the Cyanamid Co., every fertilizer company in the country and, in fact, every fertilizer company in the world, would have access to it; it would be free, as everything of that kind has been free in the past, and the general public would get the benefit of it.

Even now if we undertook by the Government to operate plant No. 2 to make fertilizer, we would be confronted with the claim of the American Cyanamid Co., "You have no right to use plant No. 2 to make fertilizer because we have the patent, which you have never contracted for or never purchased; you have the right by the paying of certain royalties to make explosives; but the right is limited to explosives; so long as our patent lives there is not anybody but us who could use it unless we give permission."

Mr. McKELLAR. Mr. President——

Mr. NORRIS. I yield to the Senator from Tennessee.

Mr. McKELLAR. What the Senator from Nebraska has just stated is the very question that is bothering me. Suppose we give this subsidy in the way of power; suppose we turn this plant over for the very small consideration that has been mentioned in the bid; suppose that shall be done; how can we reasonably expect that the persons to whom it is turned over, and whose every interest is to keep the price up, will cheapen the price of fertilizer to the farmer? That is the question that worries me.

Mr. NORRIS. Mr. President, we know human nature, and it is about the same everywhere. There are some few exceptions; there are some Godlike men; but I do not meet many of them. There are not many of them around here now. All of us are more or less selfish, and I think properly so. The men in big business want to make more money; it is proper for them to do it; I am not finding fault with them; but when they come to make a contract with me and I am a trustee for some property for some innocent people whose money has built it and has made it possible, I am not going to permit them to make profit out of the sacrifices of somebody else that will do nobody but them any good.

Mr. GEORGE. Mr. President, I want to ask the Senator from Nebraska this question: Has there ever been any proposition made in connection with Muscle Shoals that was a reasonable and bona fide fertilizer proposition?

Mr. NORRIS. I do not think so.

Mr. GEORGE. In that respect I agree with the Senator and have always agreed with him. It has been at bottom a power proposition and a power proposition only.

Mr. NORRIS. That is correct.

Mr. GEORGE. Of course, the various bids have provided for the making of a certain amount of fertilizer at cost-plus, which, as the Senator has very properly stated, means nothing in the world to the farmer. Probably in order to sell it at all they would have to sell it below cost, but that would be of no consequence to the bidder, because he would recoup all of his losses out of the cheap power which he would receive under his bid.

I agree with the Senator from Nebraska entirely, so far as I have studied the proposals—and if there are to be others presented I want to study them—that none of them have been fertilizer propositions. The fertilizer proposition has been purely an incidental thing thrown in. The whole object has been to control the power, and whatever obligation was entered into to make fertilizer was very largely incidental.

The Senator from Nebraska will recall that when first I came into this body the Underwood bill was pending, the Ford bid about that time having been withdrawn. I earnestly labored for and finally secured an amendment to the Underwood bill providing for the distribution of all the power not needed for fertilizer, but when the bill went to conference the Senator from Nebraska will likewise recall that the very life was cut out of the amendment.

Mr. NORRIS. Yes, sir.

Mr. GEORGE. And when it came back here I was unable even to vote for the measure, because it seemed to me then that the proposal was one under which and by which the surplus power or the power being produced at Muscle Shoals was really the stake.

Mr. NORRIS. I thank the Senator from Georgia.

Mr. President, I started a while ago to take up the question of propaganda, and I said that for a long time propaganda has been conducted. The American Farm Bureau Federation is a great farmers' organization. They are opposed, they say, to Government operation of this plant, although I believe quite a number of years ago they went on record in favor of it. I am not complaining about that, for they have a right to change their minds. Principally through their legislative agent, Mr. Chester H. Gray, in the city of Washington, they have been carrying on a propaganda over the United States in favor of the bid of the Cyanamid Co. and the Air Nitrates Corporation that is almost without a parallel, it seems to me. I can not myself understand how the American Farm Bureau Federation in the city of Washington can properly represent the farmers of the United States when their agent devotes practically all of his time—and certainly he must use up all the funds of that organization, if it is their funds that he is using—in carrying on a propaganda which, upon analysis, is condemned by all the scientific and disinterested men who have studied the subject and by the testimony of his own men before they

were directly interested. I can not understand how he can do it and honestly represent the farmers.

I want to call the attention of the Senate to some of the articles that have been sent out—and I presume I know only a small part of them—and to some of the misrepresentations that have gone forth upon the question of Muscle Shoals. I have here [exhibiting] an illustrated article on Muscle Shoals. It went out from the city of Washington from the office of the American Farm Bureau Federation. It is a reproduction of what can be printed from the mat, as I think it is called, which they will send free of charge to any newspaper in the United States which will agree to publish it. At the top of this article is this statement:

To the EDITOR:

Thousands of persons are interested in the question of the final disposition of Muscle Shoals. Farmers are particularly interested in getting Muscle Shoals put to work producing a supply of cheap fertilizers. We believe your readers would like to have the information given herewith. It is furnished in mat form on request free of charge, to one newspaper in each town by the Washington office of the American Farm Bureau Federation, 601–604 Munsey Building, Washington, D. C.

Merely sign your name and address and mail the inclosed postal card.

Here [exhibiting] is the inclosed postal card already stamped and it is directed to—

THE AMERICAN FARM BUREAU FEDERATION,
Washington Office, 601–604 Munsey Building, Washington, D. C.

GENTLEMEN: Please send me the plates/mats (indicate choice) for the Muscle Shoals articles shown in the proof sheet recently received from you. It is my understanding that there is no charge for these and that I will have exclusive use of them in this town, provided my request reaches you first. Address the package as follows:

Name of paper ———, town ———, State ———.

And a blank line for the signature.

These were sent out by Mr. Gray, I presume, to every newspaper, perhaps not to the big city newspapers, but to every country newspaper, at least, in the United States, and to one in every town they agreed to send free of charge this mat or plate.

Here [exhibiting] is an illustrated article. If Senators will examine the article itself they will find, I think, if they are fair about it, that while it states a great many things that are true it omits to state many other things which are equally true and which ought to be stated in order to make the matter plain.

There is deception, I think, all the way through. For instance, I do not know whether this is the one that has an article in it by Mr. Landis, but here is an article by Mr. Jardine. He does not say he is in favor of the leasing bill. It is a very shrewdly arranged affair. The reader would get the idea that the Secretary of Agriculture was in favor of the bill, but if one will read what he says he will find it is merely a general statement on the desirability of securing cheap fertilizer.

Then there is a picture of the House Member, Mr. MADDEN, who introduced the bill in the House, and a beautiful engraving—it might almost be called an engraving—of a farmer plowing with oxen, and several other illustrations of scenes on the farm. At the top of it is a very beautiful picture of Dam No. 2 at Muscle Shoals. I presume it is meant for Dam No. 2, but when I look at it closely it does not appear to me to be an accurate picture of that dam, because it has a covered top and the dam at Muscle Shoals does not have. After that had gone the rounds another one came out in the same way.

Here [exhibiting] is an article for press release for Monday papers of January 16, 1928, which, to my mind, while stating some truths, also contains much deception. When Mr. Gray was on the stand in the Agricultural Committee I asked him why he did not tell all the truth when he was giving statistics about the cyanamide proposition, and in substance he said to me, "I was working for the cyanamide bid; it was not up to me to state something in favor of some other bid, for the synthetic process, or anything of that kind." That may be his idea of representing the farmers, but it is my view that when he does that he is framing the farmers and representing one of the great corporations that wants to get its finger in the Treasury by securing cheap money with which to handle a great power proposition. He thinks it is all right as representing the farmer to tell them half the story. If he were honest with the American farmers he would have said to them, "There are other processes; here is another method that scientific men of the world claim will obtain nitrates from the air for a much less expenditure of money than by the cyanamide process. That is the testimony," he ought to have said to those farmers, "of Mr. Bell, of Mr. Hammitt, of Mr. Washburn, the officials of the American Cyanamid Co., when they were fighting Mr. Ford and telling the committees of Congress that it could not be done"; but now he is telling the farmers that this property, paid for by the farmers and the other taxpayers of the United States, should be turned over to this corporation, giving them the greatest gift of power that has ever been given anywhere at any time by any government or any corporation or any individual.

Here is the next one that went out. Here is the same thing at the top.

To the editor.

He tells them it will be sent in plate or mat form upon request, free of charge, to one newspaper in each town. All they have to do is to sign the inclosed postal card and drop it in the mails. It does not cost them a single penny.

Now let us see about this circular.

Here is an article or an interview from Mr. W. S. Landis. Let us see what this says, now:

"Under American conditions the cyanamide process is the cheapest one for fixing air nitrogen," declares Dr. W. S. Landis, former president of the American Chemical Society.

Did Mr. Gray tell these farmers or these editors that that man was an official of the Cyanamid Co.? Did he tell them, and if he had been honest with the American farmer would he not have said, "You perhaps ought to look with some suspicion upon the statements of Mr. Landis, because he is one of the officials of the American Cyanamid Co." ?—one of the vice presidents, as I remember. But he does not tell them that. He puts him forth as former president of the American Chemical Society, which is not true. Mr. Landis never was president of the American Chemical Society, so members of that great society tell me; and yet Mr. Gray sends this out to the American farmer, representing the American farmer, as the statement of this great chemist, "former president of the American Chemical Society." He tells us "what's what" about Dam No. 2, when, as a matter of fact, in the first place, he is not former president of the American Chemical Society, and in the next place he is an official of the American Cyanamid Co.

Can a man be honest with those whom he represents, who pay him to represent them, when he puts out that kind of stuff to influence their action, and try to induce them to write to you and to me and to the Members of the other House of Congress telling them what to do about Muscle Shoals? I have no objection to anything Mr. Gray wants to put forth if he will, in the first place, be fair, and in the next place tell the truth. He does not do either one. He has been practicing deception upon the American farmer, who pays him, ever since he has been carrying on this unfair, this wicked propaganda to take from the taxpayers of America this valuable property and turn it over to a corporation for their private gain. That is the representative of the American Farm Bureau Federation!

Mr. LA FOLLETTE. Mr. President, will the Senator yield?

Mr. NORRIS. Yes.

Mr. LA FOLLETTE. Does the Senator know who paid the expense of sending out this mat or plate matter, whether it was paid for by the American Farm Bureau Federation or some one else?

Mr. NORRIS. I have some evidence indicating that the American Farm Bureau Federation did not pay it. I have no personal knowledge about it. Mr. Gray was questioned about it and did not answer the questions. He avoided them, just as he is deceiving the farmers here, telling part of the truth, and only part.

I have here the statements of Mr. Bower. This is an article by Mr. Bower, another man who is part and parcel of this propaganda. He is classified here as a "member of President Coolidge's Muscle Shoals inquiry." Probably he was; and this article gives a picture of part of the works down at Muscle Shoals. I had his various statements analyzed by a chemist. I have in my office the analysis made by the chemist. I intended at the time to produce them here and have them published in the RECORD; but I had to stop somewhere. There is no end to this propaganda. I could keep up the recital of it for a week. I thought it would be sufficient to say that every important proposition that Mr. Bower lays down is either partially or wholly erroneous, as analyzed for me by a noted chemist.

In this particular sheet which Mr. Gray sends out is the picture of the boss himself. He is right there—"Chester H. Gray, Washington representative of the American Farm Bureau Federation." He was getting in the limelight somewhat then.

Mr. President, I have here a country newspaper in which that same article is reproduced, you will see. There is Mr. Gray shining out in all his glory, and here are other illustrations. It did not cost that paper anything to get that matter, except that the editor had to sign his name. That stuff was delivered to him. He did not have to set the type. It was all

set up. It came by express, and he simply had to shove it in the press—that is all he had to do—and fill up that space. That was published in the Oxford Standard in its issue of January 12, 1928, published at Oxford, Nebr.

I have here a little editorial in another country newspaper published in the same county, and I should like to read that to show that probably a great many of these newspapers take this matter just to fill up space. Some of them, perhaps, believe the stuff that is in it.

Some of them are conscientious about it. Some of them see the trick, and will not have anything to do with it. That was the case with the editor of the Beaver City Times-Tribune; and he had this to say in his paper about it:

The Oxford Standard fell for the free Muscle Shoals plates and printed them in the last issue of that excellent paper—

It is an excellent paper, too—

This is understood to be propaganda of the powerful Union Carbide Co., although it is sent out by the "Farm Bureau headquarters" in Washington. There is so much of this free publicity stuff that has a hidden motive that it is pretty safe to pass all of it along to the waste basket.

I ought to say, going back again to the article by Mr. Landis that was printed in this second propaganda sheet that Mr. Gray sent out, that Mr. Landis is a chemist. I think he is a great chemist. He is known among chemists as being a chemist. He is one of the chemists of the American Cyanamid Co.; and I am not finding fault with Mr. Landis. Of course, he is in favor of his own company making a whole lot of money if they can get it. He never was president of the American Chemical Society, although very likely he has been an officer or president of some other chemical societies; but the great chemical society at least in the United States, and I think in the world, is the American Chemical Society, and while it is stated that Mr. Landis was president of that society it is not true. He never was.

Mr. President, I am not going to offer all of the material I have here on this propaganda, unless later on I think it becomes necessary. I want to read a letter written from Clarkston, Mont.

Mr. OVERMAN. Mr. President, may I ask where the headquarters of this Cyanamid Co. is?

Mr. NORRIS. I have given it here in my address. I can not recall it offhand.

Mr. FLETCHER. In New Jersey.

Mr. NORRIS. They have a headquarters in Canada and one in New Jersey, too. I think their main American office, at least, is in New Jersey. I can not call the name of the town just now.

This letter is from Clarkston, Mont., and was written by a man who, I think, was the president of the Montana State Farm Bureau. This letter was not written to me. The man who wrote it had written me a letter while I was ill and away from the office, and my secretary wrote him and asked him for some additional information or some proof about the assertions he made. He had claimed in the first letter that probably the American Farm Bureau Federation was not paying the expense of this propaganda that was going on, that he knew something about. My secretary asked him, in his reply—I have all the letters here if anybody wants to see them—if he had any proof of it, and, if he did, to send it; and here is the answer. This is written December 20, 1927:

DEAR SIR: Replying to yours on the reverse side of this sheet, re any positive proof that I may have that Chester Gray was not paid by the Farm Bureau, will say that I can not say that I have any "court room" proof, but I am sure that no officer of the Farm Bureau will deny the fact. I was told by several that was the case, including Mr. Bradfute, who was president then. I told Chester Gray when I saw him six months later that we did not have any use for him, as he had come out to Montana under false colors. He did not seem to understand what I was talking about, so I simply told him we were wise to him; that he had come out to Montana making the positive statement that he was sent by the American Farm Bureau Federation to get first-hand information from us as to what action we wanted them to take on pending legislation, when, as a matter of fact, he was not sent out by the American Farm Bureau Federation at all, but by the Tennessee Development Co., with the sole purpose of selling Muscle Shoals to us. He simply turned and walked away. Did not attempt to deny a word of it.

In fact, it is a well-known fact in Farm Bureau circles.

The Farm Bureau is right on this subject, in fact, so far as their information goes. A lot of the East and South have to spend a considerable amount for fertilizers, and, of course, any suggestion of a cheaper product sounds attractive to them. Chester Gray is a glib talker, and with the so-called data he has been loaded up with he has been able to flimflam a lot of those people.

Mr. Dimmick, president of the Louisiana Farm Bureau, told me at the recent Farm Bureau meeting in Chicago that Gray came down there to their annual meeting and simply put the deal over. He said he did not know the real facts himself till afterwards, but they instructed him to work for the adoption of the Madden bill—

That is this same bill—

so his hands were tied, but he was just as much against it as any one could be, and he was sure if it was brought to his Farm Bureau in its true light their action would be just the opposite of what it was.

I am willing to give a deposition, if desired, that the above are the facts to the best of my knowledge; but I do not think you will have any difficulty in getting Mr. Settle, of the Indiana Farm Bureau, or Mr. Hearst, of the Iowa Farm Bureau, or any of the officers of the American Farm Bureau Federation, to admit the above.

You may find a tendency to not give the information even from those who might be expected to give it. They are set on putting the McNary-Haugen bill on the books. It is conceded we will have to pass it over the President's veto. If they did anything to stop the letting of Muscle Shoals to the Cyanamid people, O'Neil and his bunch—

Mr. O'Neil is a man who lives almost within sound of the roaring waters of Dam No. 2. He is a very fine gentleman, I think. He owns a very fine ranch there, and is an active member of the Farm Bureau, as I understand, and very much in favor of getting this bid through because he thinks it will build up a city in that vicinity, probably, and might enhance the value of his property.

O'Neil and his bunch might be able to control the one or two votes needed to pass it over the veto.

O'Neil repeatedly made the threat at the American Farm Bureau Federation meeting in Chicago, "No Muscle Shoals, no McNary-Haugen." But for me, while I want the McNary-Haugen bill enacted into law as bad as anyone, I am not inclined to buy it at that price. The above are all actual facts, and if it means the waiting for the McNary-Haugen bill till we can elect another President I am willing to do it rather than permit myself to be sandbagged into standing for such a crooked deal as the Muscle Shoals deal is or I believe it is.

The balance of the letter is something referring to me personally, which I will not read. That is signed by Mr. W. L. Stockton, president of the Montana American Farm Bureau Federation.

Here is a letter that Chester Gray sent, I presume, to all Senators, and I suppose that is the reason I got a copy of it. It is dated February 8, 1928, and reads:

As the time approaches when the question of disposition of Muscle Shoals must be taken up by the Senate there are certain facts that the American Farm Bureau Federation desires to present for your careful consideration.

Unquestionably the argument will be made on the floor of the Senate that the great nitrate plant which the Government built at Muscle Shoals is obsolete and can not be used for the manufacture of fertilizer.

He seems to know what the argument is. I suppose he had been told by the officers of his own company, because they testified to that once before, before the committees of Congress.

This same objection has been raised to every proposal to operate the plant that has been offered.

In order to get at the real facts we have made a careful survey of the position of the cyanamide process and have pictured the results of the study in the inclosed map. It is an important decision that you must make on this question and involves the virtual scrapping of a plant which cost $67,000,000.

I called attention, I think on Friday, to the fact that while the cost of nitrate plant No. 2 was ordinarily given as $67,000,000, that included the steam plant, which would be worth a hundred cents on the dollar even if nitrate plant No. 2 never existed as an auxiliary to Dam No. 2.

Our contention is that this plant is not obsolete and that it can render a real service to American agriculture. We believe that this contention is fully justified by the facts as presented to you on this map.

We have an offer to take over this plant and operate it in the interests of agriculture which offer is embodied in the Willis-Madden bill. It is our purpose to send you further information covering the various phases of this controversy, but the first premise to be established is that the cyanamide process is not obsolete and we believe a careful study of this may well convince you of the truth of this basic fact.

It was that map to which his attention was called when he testified before the committee, and he had to admit in his cross-

examination that he had stated but part of the facts. It does not appear there that in the last five years, but particularly within the last year, the increase of production by the synthetic process in various places in the world has by all odds outstripped anything else in the way of getting nitrogen from the atmosphere. I gave the figures, and they are in the record, but speaking from memory now, I think it is shown that there was last year under construction machinery with a capacity of 316,000 tons, and very much less than that in the cyanamide process; that back in 1913 there was only one synthetic plant in the whole world, and that manufacture by that process has been growing since the war by rapid strides; that all of the synthetic-process plants were run at practically full capacity during the past year, which is not true of the cyanamide-process plants. He does not tell anything of that kind on this map. He is not fair either to the American farmer or to Senators. This map is deceptive. It tells only a part of the truth, and the purpose of the deception is to deceive you, Senators, and get your votes for something that could not get your votes if it had to stand on its own merits.

Mr. President, this is not a one-sided proposition. There are many people who honestly believe that we ought to accept this bid. In 90 cases out of 91 it will be found that honest men, who have no selfish interest involved, who favor it, have not studied it, but have taken the word of Chester Gray on it. They feel as though they have a right to take his word, and they ought to be able to feel that way. I do not like to say harsh things about any man, but when I see a man in his position trying to deceive the American farmer as to the true facts, I believe it to be my duty to expose it, at least to the extent that is necessary to enable people to properly consider the legislation which he proposes. I am making these remarks with no other motive.

I realize that some farm papers are supporting this proposal. They, like human beings, sometimes err. The great bulk of the farm papers, in my judgment, are on to this little scheme, and are opposing it. I have in my office copies of farm papers whose combined circulations number many millions, which have editorially denounced it. They are gradually coming over.

Here is a copy of the Southern Ruralist, printed in Atlanta, Ga. It is very much in favor of this legislation. It may be perfectly conscientious, but when I turn to page 9 of that newspaper I see a whole page advertisement, bearing in large type the name "Cyanamid," which can be read clear across the Senate Chamber. That may have nothing to do with the editorial policy, of course. It may be just an incident, may have just happened, but it does happen that this great farm paper, which, as I understand, has a very large circulation through the South, happens to be on the favored list of the Cyanamid Co., and they carry an advertisement in that paper. I have read that advertisement, and I do not believe that from the standpoint of selling the article they are advertising there, the advertisement would result in the disposition of a single pound. It seems to me that it is a clever excuse, and nothing else. I may be entirely wrong about that.

I realize that this man Chester Gray sent for several editors of some southern farm papers—and I think this was one of them—and had them up here to convince them that the great Senator from Ohio who introduced this bill, and who I would like to have explain it some time before it is voted on, was right in asking the Senate to support this Cyanamid bid. Yet, while they were up here, he did not find it possible to let me see those noted editors. It may all have happened naturally. I was particularly anxious to see them. I would have spent the day with them and the evening with them if they had given me a chance. Mr. Gray did call me on the phone and say, "I have this committee here of farm editors and we would like to see you and get your ideas about Muscle Shoals." I said, "I am very anxious to see them." That was about 10 o'clock, and he wanted to come at 11 o'clock. I said, "I have an appointment at 11. Can you not come after lunch, at 1?" He said, "We have an appointment at 1. We will come at 4." I said, "All right, come at 4." I stayed in my office from 4 until 7 waiting for them to come, and did not get an opportunity to see them. They do not have to see me about it, I admit; but it seemed to me that having been chairman of the Committee on Agriculture of the Senate and having been mixed up in this matter from the beginning, if the representative of this great farm organization wanted to get light, he would at least have brought the men around to get both sides of the question.

I wrote to each one of them afterwards. I have been told—I do not say that it is true—that an article was written in the shape of a letter giving my reasons why I could not support this bill, and I supposed while they were discussing both sides of it that they would at least give it publication. This great newspaper that carries this advertisement, I am told—I only get that from information—even refused to publish my letter. I may be wrong about that.

Mr. President, I have another letter in my pocket. I am reminded of it because the Senator from Washington [Mr. JONES] just entered the Chamber, and it is a letter to him. It was written to him from Colfax, Wash., signed by J. Carl Laney, secretary-treasurer of the Washington State Farm Bureau. He said:

DEAR SENATOR JONES: The farm bureau members of the State of Washington, and we believe other farmers also, are entirely out of sympathy with the efforts of Senator NORRIS—

Then he gives some Congressmen's names—

in their efforts to sidetrack the manufacture of cheap fertilizer at Muscle Shoals.

So he goes on in the letter. Who gave this man the information that I was trying to prevent the manufacture of fertilizer, or that I was trying to sidetrack this proposition? Who gave to this representative in the State of Washington, who can not afford, of course, to come here and study the matter himself, the idea that I, in effect, was fighting the farmers of the United States? Where did he get this information? I do not know positively, I could not swear to where he got it, but there is no doubt in any Senator's mind here as to where he got it. There is no question but that he got it from this man Gray, saying to the farmers of America, "Here is this man, who has been for years the presiding officer of the Agricultural Committee of the Senate, working against the interest of the American farmer, because that is what it means."

Is that fair? Every Senator here knows that it is not only unfair but that it is untrue. I may be fooled, I may be deceived, I may be ignorant, I may be unable to comprehend a fair proposition, or to look squarely through a legislative steal or propaganda, but nobody who knows what my work has been for the last six or seven years will claim that I have done anything except my conscientious duty to help the American farmer. When this man sends out that kind of word that he must know is not true, he is falsely representing the farmers of America.

Mr. President, I am not through with this subject nor this branch of the subject, but if the Senator from Kansas [Mr. CURTIS] wants to have an executive session I am willing now to yield the floor for the day in order that he may make the motion.

ARTICLE BY MAYOR WILLIAM HALE THOMPSON

Mr. WATSON, Mr. President, I ask unanimous consent to have inserted in the RECORD an article by Mayor William Hale Thompson, of Chicago, entitled "Shall we shatter the Nation's idols in school histories?" appearing in the February Current History.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SHALL WE SHATTER THE NATION'S IDOLS IN SCHOOL HISTORIES?

Treason-tainted school textbooks were a big issue in the Chicago mayoral campaign last spring.

I exposed in speeches and campaign literature the vicious pro-British, un-American propaganda in the school histories which were in the Chicago public schools with the approval of Supt. William McAndrew, who had been imported from New York by the Dever administration through influences exerted by Prof. Charles E. Merriam, of the University of Chicago, and members of the English Speaking Union. I showed how in many histories Revolutionary War heroes were defamed when mentioned, and how many were treated with the silence of contempt by being omitted entirely from the school histories. I revealed that League of Nations and World Court propaganda were distributed in the public schools under McAndrew; that the Spirit of '76 and other patriotic pictures had been stripped from the school walls; that McAndrew had expressed satisfaction with this desecration in the educational magazine he edits; that McAndrew had denied the Chicago public-school children the privilege of contributing their pennies and dimes to the fund for the restoration of the historic frigate *Constitution* ("Old Ironsides"), which collection and cause had been indorsed by President Coolidge.

To my meetings in the mayoral campaign I took a copy of Arthur Meier Schlesinger's history, New Viewpoints in American History, which history was the textbook in a history course conducted by the University of Chicago for Chicago school-teachers who sought advancement through extra credits in history. I read to my audiences the following, among other passages from this infamous history, which was being taught to our school-teachers, to be taught by them in turn to the 550,000 school children of Chicago:

"When the representatives of George V rendered homage a few years ago at the tomb of the great disloyalist and rebel of a former century, George Washington, the minds of many Americans reverted with a sense

of bewilderment to the time when another King George was guiding the destinies of the British Nation. The fact is that the average American still accepts without qualification or question the partisan justifications of the struggle for independence which have come down from the actual participants in the affair on the American side.

"These accounts, colored by the emotions and misunderstandings of the times and designed to arouse the Colonists to a warlike pitch against the British Government, have formed the basis of the treatment in our school textbooks and have served to perpetuate judgments of the American Revolution which no fair-minded historian can accept to-day." (P. 160.)

I pledged the people of Chicago that if elected mayor I would stop the teaching in the public schools that George Washington was "a rebel" and "a traitor"; that I would have recognition given to the heroes of Irish, Polish, German, Holland, Italian, and other extractions who had been dropped from the histories; that I would stop the defamation of America's heroes; that I would see to it that the histories were brought back to the American viewpoint and American ideals that formerly prevailed.

This issue was accentuated and emphasized, coincident with the mayoral campaign, through the activity of a patriotic group of Chicagoans called the Citizens' Committee for the Investigation of History Textbooks. Capt. William J. Grace, who commanded a machine gun company overseas in the World War, was one of the prime movers in this organization.

Some months after I began reading the Schlesinger history to audiences and exposing other unpatriotic propaganda, publicity was given in February, 1927, in one Chicago newspaper to a report on histories by this body. This report set forth in detail the charges that I had been making against the histories in my public speeches, and concluded with a petition that the histories be barred from the public schools.

Mayor Dever also accentuated the issue. Although on April 5 the Chicago voters were to decide who should administer their affairs for the next four years, Mayor Dever forced through the city council on February 23, 1927, a list of three new school trustees for six-year terms to succeed trustees whose terms had expired. This action had in view the purpose of assuring a Dever board of education for the next four years, irrespective of who won in April for the four-year mayoral term. There were strong public protests voiced against this action, but the Dever-Brennan machine, intrenched in power and backed up by powerful newspaper support, secured council confirmation for the Dever appointees.

SELECTION OF SCHOOL BOOKS

March 9 was the date set by statute for the school board to make its annual selection of books to be used in the public schools for the ensuing year. Before that important date, as Captain Grace has testified in the McAndrew trial, the petition-report of the Grace committee was placed in the hands of Mayor Dever, Superintendent McAndrew, and Dr. Otto L. Schmidt, then president of the Chicago Historical Society and a pro-McAndrew school trustee. But, as Captain Grace testified, McAndrew, instead of presenting the report to the board of education, suppressed it. It was not before the board on March 9, when the matter of considering the books for the ensuing year came before the board, and the board on recommendation of Superintendent McAndrew again included in the list of books for the Chicago public schools the histories which I had denounced, which the citizens' committee had denounced. The citizens' committee did not get the hearing on their report which they had requested for some date in advance of the annual book-adoption action of the board.

On March 18 McAndrew, although he still was suppressing the Grace report, addressed a communication to the board in which he defended the histories complained of, and declared that the citizens' committee's report (which the board had not seen) was without merit. Here is one quotation from Superintendent McAndrew's communication to the board of March 18: "Our Chicago course in history is not at fault in any of the points alleged." The superintendent induced certain persons to sign the communication with him.

So with the history issue clear—with Mayor Dever and Supt. William McAndrew standing by the unpatriotic histories which I, members of the Grace committee, and others publicly denounced—the mayoralty election came on April 5. I was elected by a plurality of 83,000. I proceeded to carry out the pledges I had made to the people; but this was the situation: A new mayor elected by the people, but the board of education in control of trustees appointed by the defeated mayor, and Superintendent McAndrew, with term unexpired, supporting the anti-American histories.

The fight went on. On May 3 the Grace patriotic committee finally was given a hearing by the school administration committee of the board of education, the hearing they had so diligently sought for on a date before the annual adoption of textbooks on March 9. The feature of that meeting of May 3 was this statement by Dr. Otto L. Schmidt, pro-McAndrew trustee (I quote from the stenographic transcript):

"I can not get away from the idea that after all it was the great Anglo-Saxon race that were the founders of it [our country] and were connected with and were the guides and took the most active part and the largest part in the large development of this country."

On May 28 there was another meeting, this time at the Chicago Historical Society. There were present three university professors, several school-teachers, Superintendent McAndrew, Doctor Schmidt, and Captain Grace. Superintendent McAndrew called the meeting to order and summoned Doctor Schmidt to the chair. The history professors gave caustic attention to "amateur historians," referring to the patriotic and highly educated members of the Grace committee; and generally all speakers, save Captain Grace, gave approval to the histories in the schools. Captain Grace stated that it was the contention of his committee that American school children were entitled to have American history written by Americans from the American viewpoint.

The school-teachers did not say anything. With reference to them Attorney Grace, in his testimony in the McAndrew trial, made this significant comment: "A dozen of the teachers came up afterwards and said to me, 'We believe you are right; of course, you are right! But what can we do; what can we do the way things are?'" I cite all this to show that McAndrew and his chief supporter, Dr. Otto L. Schmidt, stood by the unpatriotic histories after their faults had been pointed out by me in hundreds of speeches and by the Grace committee; that both before and after election they stood by the pro-British books.

But "things" did not stay as they were. Thanks to one Dever-appointed trustee who resigned, and to two Dever-appointed trustees who changed their positions with reference to McAndrew, my policies as indorsed by the people at the mayoral election finally became, last summer, the policies of a majority of the school board. Then by majority vote Superintendent McAndrew was suspended; then started, in accordance with the statutes of Illinois, the McAndrew trial, now of international fame, before the Chicago school board. The present line-up, as indicated by various test votes since the trial started, is as follows:

For McAndrew and unpatriotic histories: Trustees Otto L. Schmidt, Walter J. Raymer, Helen Hefferan, James Mullenbach—total, 4.

Against McAndrew and against unpatriotic histories: Trustees J. Lewis Coath, Theophilus Schmidt, John A. English, Oscar Durante, James A. Hemingway, Walter Brandenburg—total, 6.

In doubt: Trustee Charles J. Vopicka—total, 1.

Sworn testimony in the McAndrew trial has corroborated all that I charged in the mayoral campaign; revealed even more than I had charged. The truth of my charges that American school histories have been falsified and denatured, through pro-British influences, to the end that our children may be denationalized and fitted for Anglo-American union, has been shown with startling clearness in textbooks submitted in evidence.

Three of them present John Hancock as a "smuggler" only, with not one word of his great public service. (Everett Barnes: Short American History, Vol. II, p. 9; McLaughlin and Van Tyne: History of the United States, 1919, pp. 140, 153.)

Samuel Adams fares little better. West calls him "the first American political boss," and Hart calls him "a shrewd, hardheaded politician" (p. 125).

Hart (151), Muzzey (162), and McLaughlin and Van Tyne (238), all teach that Alexander Hamilton is said to have once exclaimed: "The people, sir, is a great beast!"

Six proclaim this to have been a popular toast: "Thomas Jefferson: May he receive from his fellow citizens the reward of his merit—a halter." (McLaughlin and Van Tyne, p. 249.)

Hart teaches that Jefferson was looked upon by Federalists as "an atheist, a liar, and a demagogue." (School History of the United States, 1920, p. 190.)

Patrick Henry is set forth by McLaughlin and Van Tyne to our children as "a gay, unprosperous, and unknown country lawyer" (p. 141).

By Ward it is taught of Washington:

"If you had called him an 'American,' he would have thought you were using a kind of nickname. He was proud of being an Englishman." (Burke's Speech on Conciliation, p. 10.)

One has given a half page of praise to Benedict Arnold. In the same book (Everett Barnes's) it is taught that—

"The Continental Congress was a shameful scene of petty bickerings and schemings among selfish, unworthy, shortsighted, narrow-minded, office-seeking and office-trading plotters (p. 34).

"We can afford now to laugh at our forefathers," McLaughlin and Van Tyne teach (p. 262).

"The righteousness of the American Revolution is questioned in a dozen Anglicized history textbooks. Professor Muzzey, for instance, teaches that it was 'a debatable question whether the abuses of the King's ministers justified armed resistance'" (p. 115).

Professor Hart is teaching in one of his textbooks:

"To this day it is not easy to see why the colonists felt so dissatisfied. They professed, and doubtless felt, the warmest attachment to the King, whom God and Parliament had provided for them." (New American History, 1916, p. 120.)

Professor Ward's text teaches:

"As long as there lurks in the back of the American consciousness a suspicion of English tyranny in 1775, so long will misunderstanding prevent the English-speaking nations from working in accord to develop Anglo-Saxon freedom." (Preface.)

The Anglicized school histories, submitted in evidence in the McAndrew trial, bristle with fulsome laudation of British democracy, British ideals, British institutions, and British achievements, those of America being made to appear as poor imitations. Children in the schools are taught in these texts that "our country's history has been hitherto distorted through unthinking adherence to traditional prejudices" (Guitteau: Our United States, 1919, preface), but is now to be "set right" through "newer tendencies in historical writing" (Muzzey, editorial preface); through "scientific exactness of higher historical scholarship" and "emotions of new-found gratitude to England." (Ward, introduction.)

PERNICIOUS TEACHINGS

False and pernicious teachings run through the Anglicized textbooks from beginning to end, such as follow in West's History of the American People:

"Most of the settlers were servants, and a rather worthless lot" (p. 67).

"They were a bad lot, with the vices of an irresponsible, untrained, hopeless class * * * cheats and drunkards from this class * * * led to crime or suicide" (p. 72).

"Democracy * * * the meanest and worst form of government" (p. 80).

"Many of them paid themselves indirectly for their devotion to public service by what would to-day be called graft" (p. 132).

"Pettiness and ignorance on the part of the colonists" (p. 141).

"Wolfe had only 700 Americans, whom he described as 'the dirtiest, most contemptible, cowardly dogs * * * such rascals are an encumbrance to an army'" (p. 182).

"Washington declared that he would have been wholly helpless for a long time had he not had under his command a small troop of English soldiers" (p. 183).

Those who took part in the stamp act protests, the Boston Tea Party, the Boston Massacre, and the capture of the *Gaspee* are referred to as "mobs." (West, 201, 206; Muzzey, 97; McLaughlin and Van Tyne, 146.)

The American Revolution, according to West (p. 178), was a calamity which "split the English-speaking race." The only hope Professor West has for America he states thus: "Now, after a century and a half, the two great divisions of the English-speaking race are coming together once more in sympathetic friendship, again to double their influence" (p. 243).

Among all the "Anglo-American professors of history" Dr. David S. Muzzey appears to rank first as scandal monger and mudslinger. His textbook, American History (1925), is used in more Chicago high schools than all other history texts combined. On page 170 he says:

"George Washington was reviled [by the press] in language fit to characterize a Nero. 'Tyrant,' 'dictator,' and 'despot' were some of the epithets hurled at him. He was called the 'step-father of his country,' while some one or other is said to have said that 'the day was hailed with joy by the Republican press when this imposter should be hurled from his throne.'"

Under the pretense of "promoting more friendly relations" and "mutual understanding" with Great Britain, our school children are now taught not the consecrated maxim, "Taxation without representation is tyranny," but, quite to the contrary, that "in England's taxation of the Colonies there was no injustice or oppression" (A. C. McLaughlin: History of the American Nation, p. 152), and that the real reason independence was sought was that after England had at great cost crushed out autocracy in the Western Hemisphere, the colonists no longer needed the protection of the mother country, and were unwilling to pay their fair share of the costs incurred.

Faneuil Hall, "the cradle of liberty," is of no consequency in these new histories, nor is the mutiny act, the stamp act, or the Boston Massacre.

The martyrdom of Nathan Hale, whose only regret on the British scaffold was that he had but one life to lose for his country, is in all of them ignored. In most of them there is no mention of Joseph Warren, Ethan Allen, Anthony Wayne, Paul Revere, Molly Pitcher, Betsy Ross, General Herkimer, General Schuyler, Von Steuben, De Kalb, Kosciuszko, Pulaski, John Stark, or Commodore Barry. Such important battles as Bunker Hill, Bennington, Oriskany, and Kings Mountain are omitted. The decisive victories of Ticonderoga, Saratoga, New Orleans, and the capture of the *Serapis* are belittled. The inspiring slogans, "We have met the enemy and they are ours." "Don't give up the ship," and "I've not yet begun to fight," are omitted or discredited.

PRO-BRITISH ORGANIZATIONS

The Carnegie Foundation, Rhodes Scholarship Fund, English-speaking Union, Interdependence Day Association, and other pro-British and pacifist propaganda organizations have been shown to have direct connection with these alterations, their own officials having written several of the Anglicized textbooks. The flood of evidence in the McAndrew trial, to which no answer has been offered because it is unanswerable, overwhelmingly proves that organized foreign influences pervade the colleges and public schools of our country, and have caused these authors to rewrite American school history from the British standpoint.

Pending the ousting of McAndrew and the restoration of real American histories to the public schools, I wrote the board of education on November 22 to notify history teachers to give oral instruction with reference to the lives and achievements of the many heroes of many nationalities now denied their proper places in the school histories. Among these "lost heroes" which I urged the teachers should bring back into the light are the following:

"Casimir Pulaski and Tadeusz Andrzeja Bonawentura Kosciuszko, Polish noblemen who made magnificent records in the American Revolution, the former giving up his life in the cause of freedom, but their deeds have been wiped out of Anglicized school history.

"Baron von Steuben and Johann De Kalb, Germans, who played glorious parts in the Revolution, the former being George Washington's chief drill master, bringing to the recruits the training and experience of the army of Frederick the Great. De Kalb, serving with the French troops, was mortally wounded at Camden.

"Gen. Richard Montgomery, in chief command of the Northern Army, and these other Irishmen:

"Gen. Henry Knox, who was the head of Washington's artillery; Commodore John Barry, brilliant sea fighter, first American commodore and Washington's first head of the United States Navy; Gen. Daniel Morgan, leader of Washington's infantry; Gen. Stephen Moylan, commander of his cavalry; Gen. Edward Hand, his adjutant general; Gen. Joseph Reed, his secretary; John Sullivan, Anthony Wayne, John Stark, and William Irvine, whom Washington made generals—all of these fare sadly at the hands of English-sympathizing histories now in the public schools. For instance, Historian Hart gives sole credit for the attack on Quebec to Benedict Arnold, with no mention at all of General Montgomery, who commanded and who lost his life there.

"Dutch heroes and pioneers, including Gen. Philip Schuyler, who played leading parts in Revolutionary days in Pennsylvania and New York; Swedish heroes and founders who played similar rôles in New Jersey and Delaware, and French heroes of Carolina.

"Nathan Hale, born in America and educated at Yale, who, just before being hanged by the British, said that he regretted he had but one life to give to his country. Also Gen. Abner Clark, George F. Harding's heroic ancestor, should be put back in the histories."

In this letter of November 22 to the board of education I called attention to another matter, as follows:

"I am informed that the University of Chicago man, Howard C. Hill, who has been teaching the unpatriotic Schlesinger history to the Chicago school-teachers, is the same Hill who now appears as the sole adviser of the committee which has put in the junior high schools the course of study in history and other 'social studies.' If, in fact, he is the same man, I recommend that he be eliminated from the Chicago public-school situation at once. While I am mayor I do not propose to have the school children taught that George Washington was a rebel and a traitor."

Unable to answer the charges in the McAndrews trial, the unpatriotic pack, perniciously busy in Chicago as elsewhere, resorted to falsehood. They broadcasted the story that I intended to burn up books in the library. Sounding this false alarm of fire, they tried to divert attention to the lake front to see a library fire. Beaten and silenced in the forum of reason, they resorted to lies and ridicule, featuring and headlining "the library fire" and "Bill Thompson's private war with the King of England." In the two letters I wrote to the Chicago Library Board last fall, the only letters I have written to this body since my election last April as mayor, I said:

"Please understand that I am not officially concerned in what books are on the library shelves, and I rejoice in the fact that we live in a day of free speech and free press, but it becomes an official matter and one of public concern when public officials, like our librarians and library trustees, suggest the reading of particular books; put them in reading courses and use their official positions and the influence and edifices of the public library system to circulate and impress certain of the teachings of such books."

TRUTH ABOUT LIBRARY ISSUE

In addition to reiterating the foregoing statement in my second letter of November 4 to the library board, I wrote also in that second letter:

"It is not to the texts of library books that I take exception but to the teaching of certain texts.

"A library is 'a depository of human thought.' It might, too, be termed a reservoir of human thought contributed by men and women, great and near great, of many climes through the centuries of civilization.

"No man in America to-day has fought harder, and at such sacrifice, as I have fought for the free speech and free press guaranteed by our Constitution. It is far from my mind and my ideals to censor the hundreds of thousands of books on the library shelves, and you know it, but I do step in when, under official sanction, propaganda pipe lines are led out of that reservoir of knowledge to poison the minds of American citizens."

What I objected to and protested against in the library case were certain booklets in a "reading course" prepared by the American Library Association and circulated with the official sanction and approval of our own public library, particularly one written by Herbert Adams Gibbons, of Princeton. Frederick Bausman, distinguished author and former justice of the Supreme Court of the State of Washington, found this pamphlet in the Seattle Library early in 1927, and its contents so shocked him that he wrote for the American Mercury a magazine article protesting against this and similar propaganda. This article was generally commended by patriotic citizens throughout America. Judge Bausman was one of the many distinguished witnesses who took the stand in the case against McAndrew and gave support to my charges of anti-American propaganda in schools and library-teaching courses in Chicago and in the country generally. Among such witnesses were Charles Edward Russell, Charles Grant Miller, and Frederick F. Schrader.

As I said in my letter of November 4 to the library board, I was amazed to find that this Gibbons anti-American booklet was still part of the Chicago Library official reading course—evidence to my mind that, even though the Canadian president no longer was at the head of the American Library Association, pro-British, anti-American propaganda continued to percolate through the libraries of Chicago and other cities. I pointed out other pro-British booklets in this American library reading course that were being circulated through the Chicago Library and the libraries of nearly all cities in America, and, incidentally, I pointed out that the Chicago Public Library trustees were violating the law by selling these booklets. So much for the Chicago Library case. So much for the details of the exposures in the McAndrew histories case.

Those who can not answer and have not answered in the forum of reason of the Chicago School Board trial have been seeking to ridicule and discredit my efforts to drive out anti-American propaganda from public-teaching courses in Chicago, in accordance with the pledge I made to the people, in accordance with the mandate from the people which came in the Chicago mayoral election at which 1,000,000 men and women cast ballots. The campaign of misrepresentation, ridicule, and abuse which has been waged against me, in America as well as abroad, should be a matter of serious concern to all who hold sacred the ideals and institutions of our Government. Why this opposition? Why this rage against an executive of a great American city who is but doing his plain duty? Do foreign powers plot to do by propaganda, circulated through innocent or unscrupulous agents in this country, what they have been unable to do by armed force? Have some persons the motive and hope of stupendous rewards through the cancellation of foreign war debts? Is an inferior Navy the goal sought? Is love for England greater with some than love for America? What is there for Americans to ridicule in the slogan "America first"? Is a man to be laughed at because he defends the name and fame of George Washington? Are we nearing a day (which some of the disloyal historians desire) to laugh at the founders of our Nation?

ATTITUDE OF FOREIGN ELEMENTS

Some critics scoff and say, "What's the school board fight all about?" They know, but they do not want to admit they know. The people of Chicago know and understand. The Poles have held a great mass meeting, at which they indignantly protested against the dropping of the names of Kosciuszko and Pulaski from the school histories. Citizens of German and Irish extraction in mass meetings in Chicago and elsewhere have protested against the wrongs done heroes of those nationalities. Chicago citizens of Dutch descent have met and passed resolutions tendering me support and protesting because there has been eliminated from the school histories credit due to Holland in the cause of democracy and freedom and credit due to Dutch pioneers in America.

Chicago citizens of Italian extraction have passed resolutions protesting against the teaching that "the spirit and institutions of our country are English"; declaring that the proposed English-speaking Union would "crowd to the background American citizens of other nationality origins"; pointing out that, because of the suspicion in Central and South America that we are tying up with England, our country has lost much of the friendship and confidence the Latin people of those countries formerly entertained for us. Other nationality groups have passed, or are now preparing to pass, similar resolutions. The Italians and others in their resolutions enthusiastically concur in the statement I made in my first letter last fall to the library board:

"In truth our national greatness was achieved, not by one but by many nationalities, and the present surpassing position of our country is due to the fact that here in America we have brought to the national surface the best in ideas and ideals of all nationalities, and the mingling of many strains has produced the highest type of civilization and the highest level of attainments in the world's history."

The Chicago case is not isolated. School books here are used in other cities. Some cities have thrown out propaganda-distorted books; most of them have not. The histories that the big cities use go to the small cities and to the crossroad schoolhouses of the country districts. So this matter of treason-tainted histories is not a Chicago local situation; it goes to the whole Nation. The reading courses of the American Library Association are circulated in libraries generally throughout America. What Judge Bausman found in the Seattle Public Library, I found in the Chicago Public Library. What we here in Chicago have found in our perverted school histories, people of other cities have found or are finding in their histories. This is not the case of Thompson against McAndrew. It is the case of patriotic Americans everywhere against those who defame our national heroes and make assaults on our national institutions.

The Christian church rests upon the divinity of Christ. To attack that is to assail the spiritual life of the Christian church. American patriotism rests upon the nobility of George Washington, father and founder of the Nation, and the righteousness of the cause of freedom and independence that he led. Take that away and the patriotic structure falls, leaving but the shell of commercialism. The nobility of heroes, with belief in their cause and their ideals, is to the Nation, what divinity is to religion. Freedom is in peril if the people turn from the ideals of the founders, because out of those ideals came the Nation. Patriotism lives by the light of her heroes. Nations have their shrines of patriotism, as churches have their altars of divinity. The patriotic must guard the one, as the devout protect the other. Drop the heroes from the country's histories, and you take the stars out of the firmament of patriotism.

"THE LAW OF ELIGIBILITY"

Mr. HEFLIN. Mr. President, I ask unanimous consent to have printed in the RECORD an article by Gilbert O. Nations, appearing in the Protestant for January, 1928, entitled "The law of eligibility." The article has reference to the eligibility of a Roman Catholic for the office of President of the United States.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A few lawyers are being drawn into the press discussion of the right of a Roman Catholic to be President of the United States. But it appears difficult for American lawyers, however learned and skillful in constitutional questions, to appreciate all the legal aspects of the problem.

They point very properly to the third clause in Article VI of the Constitution of the United States and to the first amendment to that great document. The former prohibits any religious test as a qualification to public office. It reads as follows:

"The Senators and Representatives before mentioned, and all the members of the several State legislatures, and all executive and judicial officers, both of the United States and of the several States, shall be bound by oath or affirmation to support this Constitution; but no religious test shall ever be required as a qualification to any office or public trust under the United States."

The first amendment is one of the 10 articles designed further to protect the rights of the people which were appended to the Constitution virtually as a condition of its ratification by the requisite number of States. That amendment prohibits Congress from interference with freedom of religion or of expression. It reads:

"Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof, or abridging the freedom of speech or of the press, or the right of the people peaceably to assemble and to petition the Government for a redress of grievances."

Prima facie those provisions appear to remove any valid legal objection to a Roman Catholic for the Presidency. If such objection rests on religious grounds alone, it must obviously be disallowed under the foregoing clauses of the Constitution. No careful lawyer can dissent from that view.

But religion is not the basis of the objection. It is precisely at this point that most legal discussions fail to grasp the real issue and the true attitude of the opposition. The legal status—not the religious status—of Roman Catholics differs essentially from that of most other people. It is the legal status alone which provokes objection to their presidential eligibility.

It is that basis on which the question must be determined. Roman Catholicism is a political system as well as a religious one. Indeed, it is primarily civil and political. This assertion rests not on prejudice or passion. It is firmly buttressed in the law of the Papacy, which is paramount to all other law in its binding force on all Roman Catholics.

"Let facts be submitted to a candid world." Let the highest legal authorities of the Papacy be considered. Only thus can the root and kernel of the issue be discerned. Sedulously kept in the difficult Latin to hide its provisions from the modern world, the public and private

canon law is less familiar to the learned bar than other judicial systems.

The statutes at large of the Papacy exist in scores of ponderous tomes hoary with age. They contain more than a thousand years of papal legislation. For want of codification in centuries, this material had become so voluminous and so ill arranged as to be difficult of administration and enforcement.

This condition caused Pope Pius X, on March 19, 1904, to issue an order, technically called a Motu Proprio, that those statutes in most constant use be compiled into a code for the convenience of the hierarchy and clergy. For 13 years eminent canonists, called to Rome for that purpose, were busy, under direction of the papal Secretary of State, in executing the order of the Pontifical throne. The work was finished about 10 years ago.

In an official brief known as Providentissima, Pope Benedict XV gave the force of law to the compilation. It was published by the Vatican under the name of Codex Juris Canonici—Code of Canon Law. In a 10-volume commentary on this code, Dr. P. Charles Augustine, a Roman priest, has translated the brief Providentissima into English with the approval of Archbishop Glennon of St. Louis, as evidenced by his imprimatur. The following excerpts from the brief attest the universal binding force of the code:

"Therefore, having invoked the aid of divine grace, and relying upon the authority of the Blessed Apostles Peter and Paul, and of our own accord and with certain knowledge, and in the fullness of the Apostolic power with which we are invested, by this our constitution, which we wish to be valid for all time, we promulgate, decree, and order that the present code, just as it is compiled, shall have from this time forth the power of law for the universal church, and we confide it to your custody and vigilance."

The brief is addressed to the hierarchy occupying thousands of thrones in all parts of the world. The very name of hierarchy, from the Greek, means the governing priesthood. It is the hierarchy to whose custody and vigilance the Sovereign Pontiff confided the code for enforcement under sanctions indicated in a later clause of the brief thus:

"For no one, therefore, is it lawful willingly to contradict or rashly to disobey in any way this our constitution, ordination, limitation, suppression, or derogation. If any should dare to do so let him know that he will incur the wrath of Almighty God and of the blessed Apostles Peter and Paul."

The specified sanctions include the wrath of Almighty God and of Peter and Paul. Assuming to be the successors of Peter, the Popes are accustomed, by an easy metonymy, to mention the authority of Peter when they mean their own. The context discloses that obvious meaning here. The sanctions of God are spiritual, but those of Peter and of the Pope as his alleged successor are physical and corporal and may even be capital. The scope of the latter appears in Elements of Ecclesiastical Law, by Dr. Sebastian B. Smith, published in three volumes with imprimatur of Cardinal McCloskey, of New York. On page 90 of volume 1 this appears:

"Has the church power to inflict the penalty of death? Cardinal Tarquini thus answers: 1. Inferior ecclesiastics are forbidden, though only by ecclesiastical law, to exercise this power directly. 2. It is certain that the Pope and the ecumenical councils have this power at least mediately; that is, they can, if the necessity of the church demands, require a Catholic ruler to impose this penalty."

Doctor Smith's work was published 40 years ago in New York. While civil government has all but abandoned the infliction of capital punishment, the canon law still retains it as an unquestioned prerogative of the Papacy. Under that prerogative in papal hands, millions of exalted Christian saints have given up their lives.

But all this would be less germane to the question in hand if the canon law were limited in its operation to religion. But it treats virtually the whole field of human rights. It invades basic prerogatives of civil authority. It flatly contradicts American constitutional and statutory law. Its boundless scope has, through many centuries and in every land where the hierarchy is strong enough to enforce it, engendered hostile conflict with the law of the State. Among the infinite number of points in which it contradicts American law, space will permit the mention of but few.

1. The Papacy claims and enjoys the status of a sovereign power and member of the family of nations. It maintains a secretary of state, and its Sovereign Pontiff occupies a throne, wears a crown, enacts laws, makes treaties with civil powers, and has diplomatic relations with 34 countries.

2. Canon law condemns popular sovereignty and government by the people. On page 123 of his Great Encyclical Letters, Pope Leo XIII stated the papal law on that question in these words:

"The sovereignty of the people, however, and this without any deference to God, is held to reside in the multitude; which is doubtless a doctrine exceedingly well calculated to flatter and inflame many passions, but which lacks all reasonable proof, and all power of insuring public safety and preserving order."

3. It rejects the American doctrine of separating church and state. Forty years ago Leo XIII made a concise statement of canon law on that subject. It appears at page 148 of his Great Encyclical Letters thus:

"Hence follows the fatal theory of the need of separation between church and state. But the absurdity of such a position is manifest."

4. It denies the elementary doctrine of all other legal systems, including our own, that title to real and personal property emanates from the state or is dependent in any way on civil authority. A brief and somewhat incomplete statement of the papal doctrine appears in Canon 1495 of the code. It is translated by Woywod, a Roman priest, in his work on The New Code of Canon Law, published with imprimatur of Cardinal Farley of New York, in these words:

"The Catholic Church and the Apostolic See have by their very nature the right, freely and independently of the civil power, to acquire, retain, and administer temporal goods for the prosecution of their proper purposes."

Consequently it denies the right of the state to tax or expropriate any ecclesiastical properties of any character.

5. It prohibits children from attending our public schools. Enforcement of that prohibition in this country keeps more than 2,000,000 of children out of our schools and forces them into its own schools of the character on which Latin America has so long depended, with the result of illiteracy nearly universal. Canon 1374 of the code says in Woywod's translation:

"Catholic children shall not attend non-Catholic indifferent schools that are mixed; that is to say, schools open to Catholics and non-Catholics alike."

6. The canon law condemns, and papal courts sitting in our cities set aside and disallow, marriages that are perfectly valid under American law. Woywod translates Canon 1094 of the code in these words:

"Those marriages only are valid which are contracted either before the pastor or the ordinary of the place, or a priest delegated by either, and at least two witnesses, in conformity, however, with the rules laid down in the following canons, and save for the exceptions mentioned below in canons 1098 and 1099."

The foregoing contradictions between canon law and that of the United States and the States have no relation to any questions of religion as such. They pertain to fundamental issues of sovereignty and governmental authority. They are entirely without the scope of our constitutional provisions touching religion.

The questions involved are civil and basic. The canonical doctrines are directed against the very foundations of American constitutional law. No clause in our National Constitution shields them or mitigates their pernicious force and effect. They bind every Roman Catholic in the world, whether he is aware of it or not. When necessity arises they will be rigidly enforced as they have been for more than a thousand years. It would be a tragic calamity to place any one subject to them in the Presidency of the United States.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and the Senate (at 5 o'clock and 5 minutes p. m.) adjourned until to-morrow, Wednesday, February 29, 1928, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate February 28, 1928

UNITED STATES MARSHAL

Cooper Hudspeth, of Arkansas, to be United States marshal, western district of Arkansas, vice Andrew J. Russell, resigned.

POSTMASTERS

ALABAMA

Ora B. Wann to be postmaster at Madison, Ala., in place of O. B. Wann. Incumbent's commission expires March 1, 1928.

Charles L. Jackson to be postmaster at Ashford, Ala., in place of A. B. Alford. Incumbent's commission expired January 9, 1927.

ARKANSAS

Warren P. Downing to be postmaster at Weiner, Ark., in place of W. P. Downing. Incumbent's commission expires March 1, 1928.

William E. Hill to be postmaster at Norphlet, Ark., in place of W. E. Hill. Incumbent's commission expires March 1, 1928.

Ralph F. Loche to be postmaster at Lockesburg, Ark., in place of R. F. Locke. Incumbent's commission expires March 1, 1928.

Julius L. Stephenson to be postmaster at Everton, Ark., in place of J. L. Stephenson. Incumbent's commission expires March 1, 1928.

Charles N. Ruffin to be postmaster at De Witt, Ark., in place of C. N. Ruffin. Incumbent's commission expires March 1, 1928.

CALIFORNIA

Jennie E. Kirk to be postmaster at Waterford, Calif., in place of J. E. Kirk. Incumbent's commission expired January 9, 1928.

Walter M. Brown to be postmaster at Turlock, Calif., in place of W. M. Brown. Incumbent's commission expired February 1, 1928.

Cassius C. Olmsted to be postmaster at San Rafael, Calif., in place of C. C. Olmsted. Incumbent's commission expired March 3, 1927.

Lew E. Wickes to be postmaster at Castella, Calif., in place of L. E. Wicks. Incumbent's commission expires March 3, 1928.

Peter Garrick to be postmaster at Camino, Calif., in place of Peter Garrick. Incumbent's commission expires March 3, 1928.

COLORADO

John R. Munro to be postmaster at Rifle, Colo., in place of J. R. Munro. Incumbent's commission expires March 1, 1928.

Edward F. Baldwin to be postmaster at Nucla, Colo., in place of E. F. Baldwin. Incumbent's commission expired February 26, 1928.

Paul C. Boyles to be postmaster at Gunnison, Colo., in place of P. C. Boyles. Incumbent's commission expires March 1, 1928.

Ben H. Glaze to be postmaster at Fowler, Colo., in place of B. H. Glaze. Incumbent's commission expires March 1, 1928.

John C. Straub to be postmaster at Flagler, Colo., in place of J. C. Straub. Incumbent's commission expired February 26, 1928.

Alice A. Blazer to be postmaster at Elizabeth, Colo., in place of A. A. Blazer. Incumbent's commission expires March 1, 1928.

Bessie Salabar to be postmaster at Bayfield, Colo., in place of Bessie Salabar. Incumbent's commission expires March 1, 1928.

CONNECTICUT

Sidney M. Cowles to be postmaster at Kensington, Conn., in place of S. M. Cowles. Incumbent's Commission expires March 1, 1928.

Harry K. Taylor to be postmaster at Hartford, Conn., in place of H. K. Taylor. Incumbent's commission expires March 1, 1928.

Marshall Emmons to be postmaster at East Haddam, Conn., in place of Marshall Emmons. Incumbent's commission expires March 1, 1928.

DELAWARE

George W. Mitchell to be postmaster at Ocean View, Del., in place of G. W. Mitchell. Incumbent's commission expires March 1, 1928.

FLORIDA

Mary Conway to be postmaster at Green Cove Springs, Fla., in place of Mary Conway. Incumbent's commission expires March 1, 1928.

IDAHO

Clarence P. Smith to be postmaster at Eden, Idaho, in place of C. P. Smith. Incumbent's commission expires March 1, 1928.

William W. McNair to be postmaster at Middleton, Idaho, in place of W. W. McNair. Incumbent's commission expired February 29, 1928.

Hannah H. Bills to be postmaster at Kimberly, Idaho, in place of H. H. Bills. Incumbent's commission expires March 1, 1928.

John E. McBurney to be postmaster at Harrison, Idaho, in place of J. E. McBurney. Incumbent's commission expires March 1, 1928.

ILLINOIS

Bryce E. Currens to be postmaster at Adair, Ill., in place of B. E. Currens. Incumbent's commission expired January 7, 1928.

INDIANA

William I. Ellison to be postmaster at Winona Lake, Ind., in place of W. I. Ellison. Incumbent's commission expires February 29, 1928.

Roy Sargent to be postmaster at Syracuse, Ind., in place of L. T. Heerman, resigned.

LaFayette H. Ribble to be postmaster at Fairmount, Ind., in place of L. H. Ribble. Incumbent's commission expires February 29, 1928.

Joseph W. Morrow to be postmaster at Charleston, Ind., in place of J. W. Morrow. Incumbent's commission expires February 29, 1928.

Jesse Dowen to be postmaster at Carbon, Ind., in place of Jesse Dowen. Incumbent's commission expires February 29, 1928.

IOWA

Joseph D. Schaben to be postmaster at Earling, Iowa., in place of J. D. Schaben. Incumbent's commission expired December 19, 1927.

Lewis H. Roberts to be postmaster at Clinton, Iowa, in place of L. H. Roberts. Incumbent's commission expires March 1, 1928.

KANSAS

Andrew M. Ludvickson to be postmaster at Severy, Kans., in place of A. M. Ludvickson. Incumbent's commission expired February 26, 1928.

Anna M. Bryan to be postmaster at Mullinville, Kans., in place of A. M. Bryan. Incumbent's commission expires March 1, 1928.

Nora J. Casteel to be postmaster at Montezuma, Kans., in place of N. J. Casteel. Incumbent's commission expires March 1, 1928.

George J. Frank to be postmaster at Manhattan, Kans., in place of G. J. Frank. Incumbent's commission expires March 1, 1928.

Forrest L. Powers to be postmaster at Le Roy, Kans., in place of F. L. Powers. Incumbent's commission expired February 26, 1928.

Joseph V. Barbo to be postmaster at Lenora, Kans., in place of J. V. Barbo. Incumbent's commission expires March 1, 1928.

Harry Morris to be postmaster at Garnett, Kans., in place of Harry Morris. Incumbent's commission expired February 26, 1928.

KENTUCKY

Charlie H. Throckmorton to be postmaster at Mount Olivet, Ky., in place of C. H. Throckmorton. Incumbent's commission expires February 29, 1928.

Egbert E. Jones to be postmaster at Milton, Ky., in place of E. E. Jones. Incumbent's commission expires February 29, 1928.

Harvey H. Pherigo to be postmaster at Clay City, Ky., in place of H. H. Pherigo. Incumbent's commission expires March 1, 1928.

Mattie R. Tichenor to be postmaster at Centertown, Ky., in place of M. R. Tichenor. Incumbent's commission expires February 29, 1928.

MAINE

Parker B. Stinson to be postmaster at Wiscasset, Me., in place of P. B. Stinson. Incumbent's commission expires March 1, 1928.

George E. Sands to be postmaster at Wilton, Me., in place of G. E. Sands. Incumbent's commission expired February 26, 1928.

Hiram W. Ricker, jr., to be postmaster at South Poland, Me., in place of H. W. Ricker, jr. Incumbent's commission expires March 1, 1928.

Harry S. Bates to be postmaster at Phillips, Me., in place of H. S. Bates. Incumbent's commission expired February 26, 1928.

Winfield L. Ames to be postmaster at North Haven, Me., in place of W. L. Ames. Incumbent's commission expires March 1, 1928.

Thomas E. Wilson to be postmaster at Kittery, Me., in place of T. E. Wilson. Incumbent's commission expires March 1, 1928.

Hugh Hayward to be postmaster at Ashland, Me., in place of Hugh Hayward. Incumbent's commission expired February 26, 1928.

MARYLAND

Harry E. Pyle to be postmaster at Aberdeen Proving Ground, Md., in place of H. E. Pyle. Incumbent's commission expires March 1, 1928.

MASSACHUSETTS

Fred C. Small to be postmaster at Buzzards Bay, Mass., in place of F. C. Small. Incumbent's commission expires March 1, 1928.

MICHIGAN

Wilda P. Hartingh to be postmaster at Pinconning, Mich., in place of W. P. Hartingh. Incumbent's commission expires March 3, 1928.

Patrick O'Brien to be postmaster at Iron River, Mich., in place of Patrick O'Brien. Incumbent's commission expired February 9, 1928.

Melvin A. Bates to be postmaster at Grayling, Mich., in place of M. A. Bates. Incumbent's commission expires March 3, 1928.

MINNESOTA

Alfred Gronner to be postmaster at Underwood, Minn., in place of Alfred Gronner. Incumbent's commission expires March 1, 1928.

Selma O. Hoff to be postmaster at St. Hilaire, Minn., in place of S. O. Hoff. Incumbent's commission expires March 1, 1928.

Francis S. Pollard to be postmaster at Morgan, Minn., in place of F. S. Pollard. Incumbent's commission expires March 1, 1928.

Louis W. Galour to be postmaster at Iona, Minn., in place of L. W. Galour. Incumbent's commission expires March 3, 1928.

Edith B. Triplett to be postmaster at Floodwood, Minn., in place of E. B. Triplett. Incumbent's commission expired December 21, 1926.

Eva Cole to be postmaster at Delavan, Minn., in place of Eva Cole. Incumbent's commission expired February 26, 1928.

Frederic E. Hamlin to be postmaster at Chaska, Minn., in place of F. E. Hamlin. Incumbent's commission expires March 1, 1928.

Paul B. Sanderson to be postmaster at Baudette, Minn., in place of P. B. Sanderson. Incumbent's commission expires March 3, 1928.

NEW YORK

John T. Gallagher to be postmaster at Witherbee, N. Y., in place of J. T. Gallagher. Incumbent's commission expired January 8, 1928.

Margaret T. Sweeney to be postmaster at East Islip, N. Y., in place of E. J. Sweeney, deceased.

Ralph C. Reakes to be postmaster at Truxton, N. Y. Office became presidential July 1, 1927.

Elmer Ketcham to be postmaster at Schoharie, N. Y., in place of Elmer Ketcham. Incumbent's commission expires February 29, 1928.

Fred L. Seager to be postmaster at Randolph, N. Y., in place of F. L. Seager. Incumbent's commission expires February 29, 1928.

Ruth W. J. Mott to be postmaster at Oswego, N. Y., in place of R. W. J. Mott. Incumbent's commission expires February 29, 1928.

Wallace Thurston to be postmaster at Floral Park, N. Y., in place of Wallace Thurston. Incumbent's commission expires February 29, 1928.

John E. Duryea to be postmaster at Farmingdale, N. Y., in place of J. E. Duryea. Incumbent's commission expires February 29, 1928.

Elmer C. Wyman to be postmaster at Dover Plains, N. Y., in place of E. C. Wyman. Incumbent's commission expires March 1, 1928.

John G. McNicoll to be postmaster at Cedarhurst, N. Y., in place of J. G. McNicoll. Incumbent's commission expires February 29, 1928.

NORTH DAKOTA

William H. Lenneville to be postmaster at Dickinson, N. Dak., in place of W. H. Lenneville. Incumbent's commission expired February 26, 1928.

Worthy Wing to be postmaster at Edmore, N. Dak., in place of O. S. Wing, removed.

Charles L. Erickson to be postmaster at Lankin, N. Dak., in place of S. N. Rinde, resigned.

OHIO

Ben F. Robuck to be postmaster at West Union, Ohio, in place of B. F. Robuck. Incumbent's commission expired February 26, 1928.

Charles O. Eastman to be postmaster at Wauseon, Ohio, in place of C. O. Eastman. Incumbent's commission expired January 7, 1928.

Iris L. Bloir to be postmaster at Sherwood, Ohio, in place of I. L. Bloir. Incumbent's commission expired February 26, 1928.

George B. Fulton to be postmaster at North Baltimore, Ohio, in place of G. B. Fulton. Incumbent's commission expired February 26, 1928.

La Bert Davie to be postmaster at New Lexington, Ohio, in place of La Bert Davie. Incumbent's commission expires March 1, 1928.

Clem Couden to be postmaster at Morrow, Ohio, in place of Clem Couden. Incumbent's commission expires March 1, 1928.

William H. Snodgrass to be postmaster at Marysville, Ohio, in place of W. H. Snodgrass. Incumbent's commission expires March 1, 1928.

Ida H. Cline to be postmaster at Kings Mills, Ohio, in place of I. H. Cline. Incumbent's commission expired February 26, 1928.

Wade W. McKee to be postmaster at Dennison, Ohio, in place of F. G. Pittenger. Incumbent's commission expired December 19, 1927.

Andrew L. Brunson to be postmaster at Degraff, Ohio, in place of A. L. Brunson. Incumbent's commission expires March 1, 1928.

Charles R. Ames to be postmaster at Bryan, Ohio, in place of C. R. Ames. Incumbent's commission expired January 7, 1928.

Charles E. Kniesly to be postmaster at Bradford, Ohio, in place of C. E. Kniesly. Incumbent's commission expires March 1, 1928.

Edward M. Barber to be postmaster at Ashley, Ohio, in place of E. M. Barber. Incumbent's commission expires March 1, 1928.

Arthur L. Vanosdall to be postmaster at Ashland, Ohio, in place of A. L. Vanosdall. Incumbent's commission expires March 1, 1928.

OKLAHOMA

Charles C. Chapell to be postmaster at Okmulgee, Okla., in place of C. C. Chapell. Incumbent's commission expires February 29, 1928.

Nellie V. Dolen to be postmaster at Okemah, Okla., in place of C. O. White, resigned.

OREGON

William I. Smith to be postmaster at Redmond, Oreg., in place of W. I. Smith. Incumbent's commission expires February 29, 1928.

Elmer F. Merritt to be postmaster at Merrill, Oreg., in place of E. F. Merritt. Incumbent's commission expires March 3, 1928.

William A. Morand to be postmaster at Boring, Oreg., in place of W. A. Morand. Incumbent's commission expires March 3, 1928.

PENNSYLVANIA

Thomas J. Kennedy to be postmaster at Renfrew, Pa., in place of T. J. Kennedy. Incumbent's commission expires March 1, 1928.

Christian Jansen to be postmaster at Essington, Pa., in place of J. C. McConnell, removed.

Michael A. Grubb to be postmaster at Liverpool, Pa., in place of M. A. Grubb. Incumbent's commission expires February 29, 1928.

John T. Painter to be postmaster at Greensburg, Pa., in place of J. T. Painter. Incumbent's commission expires February 29, 1928.

Edgar M. Chelgren to be postmaster at Grampian, Pa., in place of E. M. Chelgren. Incumbent's commission expires February 29, 1928.

Charles G. Fullerton to be postmaster at Freeport, Pa., in place of C. G. Fullerton. Incumbent's commission expires February 29, 1928.

Thomas Collins to be postmaster at Commodore, Pa., in place of Thomas Collins. Incumbent's commission expires March 1, 1928.

William A. Leroy to be postmaster at Canonsburg, Pa., in place of W. A. Leroy. Incumbent's commission expires March 1, 1928.

SOUTH CAROLINA

Malcolm J. Stanley to be postmaster at Hampton, S. C., in place of M. J. Stanley. Incumbent's commission expired February 26, 1928.

TENNESSEE

Ben M. Roberson to be postmaster at Loudon, Tenn., in place of B. M. Roberson. Incumbent's commission expires February 29, 1928.

William F. Osteen to be postmaster at Chapel Hill, Tenn., in place of L. B. Sweeney. Incumbent's commission expired December 19, 1927.

TEXAS

Silas J. White to be postmaster at Rising Star, Tex., in place of S. J. White. Incumbent's commission expires March 1, 1928.

Theodor Reichert to be postmaster at Nordheim, Tex., in place of Theodor Reichert. Incumbent's commission expires March 1, 1928.

Gustav A. Wulfman to be postmaster at Farwell, Tex., in place of G. A. Wulfman. Incumbent's commission expires March 1, 1928.

Charles H. Bugbee to be postmaster at Clarendon, Tex., in place of Homer Glascoe. Incumbent's commission expired December 19, 1927.

UTAH

Ivor Clove to be postmaster at Enterprise, Utah. Office became presidential July 1, 1927.

VIRGINIA

Robert L. Olinger to be postmaster at Blacksburg, Va., in place of R. L. Olinger. Incumbent's commission expires February 29, 1928.

WASHINGTON

Nellie Tyner to be postmaster at Dishman, Wash., in place of Nellie Tyner. Incumbent's commission expires February 29, 1928.

WEST VIRGINIA

James T. Akers to be postmaster at Bluefield, W. Va., in place of J. T. Akers. Incumbent's commission expires February 29, 1928.

Josephine B. Marks to be postmaster at Walton, W. Va. Office became presidential July 1, 1927.

FLORIDA

Frank B. Marshburn, Bronson.
Sherwood Hodson, Homestead.
John H. Anderson, Inglis.

NEW JERSEY

Elmira L. Phillips, Andover.
John G. Stoughton, Bergenfield.
William E. Allen, Blairstown.
John B. W. Berry, Clementon.
Z. Charles Challice, Fair Lawn.
Harold Pittis, Lakehurst.
Andrew Bauer, Little Ferry.
Thomas Post, Midland Park.
Margarethe Grund, New Milford.
Arthur F. Jahn, Ridgefield.

NEW MEXICO

Jose B. Martinez, Taos.

NEW YORK

Harrison D. Fuller, Antwerp.
Frederick J. Manchester, Clark Mills.
Benjamin R. Erwin, East Rochester.
Henry J. Frey, Ebenezer.
Thomas J. Courtney, Garden City.
Elizabeth T. Witherel, Lily Dale.

NORTH CAROLINA

John K. Brock, Trenton.

PENNSYLVANIA

Daniel J. Turner, Clarksville.
Cleo W. Callaway, Shawnee on Delaware.
Frances H. Diven, West Bridgewater.

RHODE ISLAND

Thomas D. Goldrick, Pascoag.

WISCONSIN

Walter C. Anderson, Rosholt.

HOUSE OF REPRESENTATIVES

TUESDAY, *February 28, 1928*

The House met at 12 o'clock noon, and was called to order by the Speaker.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Lord, our lives are just a breath of Thy infinite nature; hence, may we not look with disdain or hold in contempt any human creature. We thank Thee that we are Thy rational children. Humbly and earnestly we ask for discerning minds that our knowledge of principles, of methods, and of men may be wise. Thy supreme favor is on those who have hearts and minds of unselfish devotion to service. Give us courage to generously recognize another's worth, to guard another's interest, and to surrender to another's just claims. Blessed spirit of God, help us always to discern between the value and the curse of wealth, between the beauty and the disease of luxury. Be the bow of promise in every threatening cloud, the balance of all discord, and the compensation for all loss. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had ordered that the House of Representatives be respectfully requested to return to the Senate the conference report on the bill (H. R. 9481) entitled "An act making appropriations for the Executive Office, sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1929, and for other purposes," together with all accompanying papers.

The message also announced that the Senate had passed with amendments the bill (H. R. 10286) entitled "An act making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1929, and for other purposes," in which the concurrence of the House was requested.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 121. An act authorizing the Cairo Association of Commerce, its successors and assigns, to construct, maintain, and operate a bridge across the Ohio River at or near Cairo, Ill.; and

H. R. 5679. An act authorizing the Nebraska-Iowa Bridge Corporation, a Delaware corporation, its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River between Washington County, Nebr., and Harrison County, Iowa.

The message also announced that the Senate had passed bills and a joint resolution of the following titles, in which the concurrence of the House of Representatives was requested:

S. 2280. An act to authorize the coinage of Longfellow medals;

S. 2449. An act to authorize the construction of a bridge across the Mississippi River at or near the city of Baton Rouge, in the parish of East Baton Rouge, and a point opposite thereto in the parish of West Baton Rouge, State of Louisiana;

S. 2569. An act providing for horticultural experiment and demonstration work in the semiarid or dry-land regions of the United States; and

S. J. Res. 98. Joint resolution authorizing the selection of sites and the erection of monuments to John Bunyan and William Harvey in Washington, D. C.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 7201) entitled "An act to provide for the settlement of certain claims of American nationals against Germany and of German nationals against the United States, for the

ultimate return of all property of German nationals held by the Alien Property Custodian, and for the equitable apportionment among all claimants of certain available funds."

SENATE JOINT RESOLUTIONS AND BILLS REFERRED

Joint resolutions and bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred to the appropriate committees, as follows:

S. J. Res. 30. Joint resolution to provide for the expenses of participation by the United States in the Second Pan American Conference on Highways at Rio de Janeiro; and

S. J. Res. 31. Joint resolution to provide that the United States extend to the Permanent International Association of Road Congresses an invitation to hold the sixth session of the association in the United States, and for the expenses thereof; to the Committee on Foreign Affairs.

S. 205. An act to authorize the Secretary of the Treasury to pay the claim of Mary Clerkin; to the Committee on Ways and Means.

S. 802. An act for the relief of Frank Hanley; to the Committee on Naval Affairs.

S. 1103. An act permitting the withdrawal of water from White River, Ark.; to the Committee on Interstate and Foreign Commerce.

S. 1705. An act authorizing the Court of Claims to render judgment in favor of the administrator of or collector for the estate of Peter P. Pitchlynn, deceased, instead of the heirs of Peter P. Pitchlynn, and for other purposes; to the Committee on Indian Affairs.

S. 2227. An act for the relief of F. L. Campbell; to the Committee on Claims.

S. 2279. An act authorizing the Secretary of the Interior to purchase certain lands in the city of Bismarck, Burleigh County, N. Dak., for Indian school purposes; to the Committee on Indian Affairs.

S. 2280. An act to authorize the coinage of Longfellow medals; to the Committee on Coinage, Weights, and Measures.

S. 2335. An act for the relief of the National Surety Co.; to the Committee on Claims.

S. 2707. An act to provide for the classification of all unallotted land of the Klamath Indian Reservation and to reserve for forest-production purposes all land primarily adapted to the production of crops of timber; to the Committee on Indian Affairs.

S. 3062. An act for the relief of Anna Faceina; and

S. 3066. An act for the relief of Herman Shulof; to the Committee on Claims.

THE CONGRESSIONAL RECORD

Mr. CASEY. Mr. Speaker, I rise to make a unanimous-consent request that certain language printed in the CONGRESSIONAL RECORD during my remarks on the District of Columbia appropriation bill the other day, which was inserted without my knowledge or consent—by whom I do not know—be stricken from the RECORD.

I have in my hand the reporter's copy of my speech, just referred to. After the House adjourned on Friday, February 24, I took it to my office and corrected the reporter's copy of the speech I had made during the session of the Committee of the Whole. I then handed the copy to the messenger, as we all do, to take it to the Government Printing Office to be printed in the CONGRESSIONAL RECORD as part of the proceedings of that day. Judge of my surprise and amazement when I read the CONGRESSIONAL RECORD the next morning and discovered that somebody had inserted language into my remarks that did me a great injustice and put me in a rather embarrassing position in the eyes of the Members of the House, because the language inserted as it referred to me is absolutely untrue; and furthermore, Mr. Speaker, whoever is responsible for this is guilty of a violation of the rules of the House of Representatives.

Mr. MADDEN. What was the language?

Mr. CASEY. The language is as follows—I am reading from the reporter's notes:

Mr. SIMMONS. Will the gentleman yield?

Mr. CASEY. Yes.

Mr. SIMMONS. I would like to call the gentleman's attention to the fact that this paragraph was in the bill when the subcommittee reported to the full committee, and it was printed in italics in the report that the subcommittee presented to the main committee. The gentleman made no objection either in the subcommittee or the full committee to the language being in the bill; the bill was reported unanimously by the full committee, it was thoroughly discussed in the subcommittee and the full committee, and to the fact that at first the gentleman from Pennsylvania [Mr. WELSH] objected to this being done unless we would take care of and not cause any hardship to the children now in the District schools.

The gentleman was present at the meeting and stated he did not want to cause any hardship for the children then in the schools. No one on the committee desires to cause any hardship, and we drafted the amendment to meet the wishes of the gentleman and his colleague from Pennsylvania [Mr. WELSH].

The question propounded by the gentleman from Nebraska [Mr. SIMMONS], with the language inserted without my knowledge or consent, and in violation of the rules of the House, reads as follows:

Mr. SIMMONS. I would like to call the gentleman's attention to the fact that this paragraph was in the bill when the subcommittee reported to the full committee, and it was printed in italics in the report that the subcommittee presented to the main committee. The gentleman made no objection either in the subcommittee or the full committee to the language being in the bill, the bill was reported unanimously by the full committee.

The language which I have just read to the House was added to my remarks, and it was necessary to paste a piece of paper with that language written onto it to the original copy of the reporter's notes. The statement that the bill was reported to the full committee by unanimous consent is untrue and does me a great injustice, because the hearings will show that in the committee I was opposed to the proposition of closing the doors of the public schools to all children not dwelling in the District of Columbia. I opposed it on the floor of the House, which can be verified by the previous day's proceedings, and I was opposed to it when it was under discussion under the five-minute rule. The insertion of this language or any language into my remarks without my consent is a violation of the rules of the House. Mr. Speaker, I therefore ask unanimous consent that the language indicated by me be stricken from the CONGRESSIONAL RECORD.

Mr. CRAMTON. Reserving the right to object, Mr. Speaker, I know nothing about the matter except from the statement that the gentleman from Pennsylvania has just made. The statement seems to involve a colloquy with the gentleman from Nebraska [Mr. SIMMONS]. Has the gentleman discussed it with the gentleman from Nebraska? I ask the gentleman from Pennsylvania whether this matter has been discussed by him with the gentleman from Nebraska [Mr. SIMMONS]?
